Security Information

October, 16th, 2026

This is to inform you of the impact on Fujitsu Enterprise Postgres of the recent security vulnerability CVE-2026-102677 reported by OSS Electron community.

Title: Enterprise Postgres: Arbitrary Code Execution Vulnerability in Electron via Access to a Crafted External Site

1. Description

Electron did not sufficiently validate when untrusted content was loaded.
As a result, an attacker could write attacker-controlled cache data and cause it to be executed with higher privileges.

Fujitsu provides security patches shown in 3.
Please apply them as soon as possible.

2. Impact

Under the following conditions, an attacker may execute unauthorized processing on the terminal, potentially resulting in arbitrary code execution.

1) A malicious external Web page is accessed.

For a severity assessment of this vulnerability, see CVE information in "4. Related information".
