Enterprise Postgres

On-demand training

Kickstart your  
Postgres team

# Fujitsu Enterprise Postgres On-demand training

**Self-paced, on-demand training allows you to learn anytime, anywhere with this cost-effective program**

Designed for DBAs and application developers, our online learning modules cater for all levels of expertise – from beginners to intermediate engineers.

Learn how to install, configure, and operate Fujitsu Enterprise Postgres with an understanding of our key enterprise features for security and high-availability.

Choose your modules from our list of courses, with a learning path including hands-on practice.

**Learn at your own pace**

# Kickstart your Postgres team with our on-demand training

## Acquire the skills required to deploy, manage, and develop applications for Fujitsu Enterprise Postgres

### Self-paced

Hands-on training and e-learning through our online Learning Management System.

### Wide-ranging

Learn how to deploy, operate and develop applications for Fujitsu Enterprise Postgres.

- Access courses and track your progress
- Learn anytime, anywhere
- Learn at your own pace
- Suitable for various skill levels
- Repeat courses as needed to ensure thorough comprehension
- Hands-on courses available

## Database Build and Operations for Fujitsu Enterprise Postgres

|                     |  |
|---------------------|--|
| <b>Type</b>         | e-learning + hands-on <sup>†</sup> / BYOPC or AWS Cloud <sup>‡</sup>   |
| <b>Level</b>        | Intermediate   |
| <b>Overview</b>     | Deep dive into and gain practical knowledge of the functions of Fujitsu Enterprise Postgres such as Transparent Data Encryption and Mirroring Controller. Composed of e-learning and hands-on exercises. |
| <b>Objective</b>    | <ul style="list-style-type: none"><li>• Build a database environment using Fujitsu Enterprise Postgres</li><li>• Design and operate Fujitsu Enterprise Postgres databases</li></ul>                      |
| <b>Target</b>       | DBAs, engineers, and application developers responsible for building and operating a database environment using Fujitsu Enterprise Postgres.   |
| <b>Duration</b>     | 12 hrs   |
| <b>Prerequisite</b> | Basic knowledge of databases   |
| <b>Notes</b>        | <p><sup>†</sup> Hands-on exercises will be performed in a Windows environment.</p> <p><sup>‡</sup> The AWS Cloud environment is subject to specific conditions for access. Contact us for details.</p>   |

## Practical SQL Guide for Fujitsu Enterprise Postgres

|                     |  |
|---------------------|--|
| <b>Type</b>         | e-learning + hands-on <sup>†</sup> / BYOPC or AWS Cloud <sup>‡</sup>   |
| <b>Level</b>        | Intermediate   |
| <b>Overview</b>     | Deep dive into the functions of Fujitsu Enterprise Postgres and application development using SQL. The course is composed of e-learning and hands-on exercises.  |
| <b>Objective</b>    | <ul style="list-style-type: none"><li>• Understand the SQL functions of Fujitsu Enterprise Postgres</li><li>• Execute SQL in Fujitsu Enterprise Postgres on a real machine</li><li>• Understand application development using SQL in Fujitsu Enterprise Postgres</li></ul> |
| <b>Target</b>       | DBAs, engineers, and application developers involved in the operation and development of Fujitsu Enterprise Postgres who want to learn about SQL   |
| <b>Duration</b>     | 6 hrs  |
| <b>Prerequisite</b> | Basic knowledge of databases   |
| <b>Notes</b>        | <p><sup>†</sup> Hands-on exercises will be performed in a Windows environment.</p> <p><sup>‡</sup> The AWS Cloud environment is subject to specific conditions for access. Contact us for details.</p>   |

# About Fujitsu

**Trust and performance for over 80 years.** Since it was founded back in 1935, Fujitsu has been innovating information and communication technologies (ICT) across the globe. A long line of landmark achievements and product milestones have made Fujitsu what it is today — a leading company in the ICT space.

**Experience — 40 years of database development.** Fujitsu Enterprise Postgres is the outcome of Fujitsu's experience in developing enterprise databases for 40 years, its vision for and commitment to open source, its contributions to PostgreSQL and its active participation in the PostgreSQL open source community.

**Proudly supporting customers around the world.** As Japan's largest and the world's fifth largest IT services provider, Fujitsu proudly supports customers in more than 100 countries with over 126,000 Fujitsu employees. We utilize our experience and the power of ICT to shape the future of society for our customers.
