

Why choose Fujitsu Enterprise Postgres?

Secure, user-friendly data infrastructure for AI applications

FUJITSU

Enterprise-grade PostgreSQL backed by Fujitsu to deliver enhanced security, performance, and resilience

AI

Generative AI and RAG

- Generative AI for enterprise
- Knowledge Data Management
- RAG application development

Security

Developed with built-in cryptography

- Agility DevOps
- Easy for audit
- Transparent Data Encryption
- Data Masking
- Dedicated Audit Log

Performance

Enhanced for enterprise needs

- Accuracy BI reports on real time
- Fast backups
- In-Memory Columnar Index
- Parallel scanning and aggregation

Resilience

High availability for mission-critical data

- Disaster Recovery
- Mirroring Controller
- WAL duplication
- Connection Manager

Automation

Automate operation to optimize costs

- Operator level 5
- Auto-Scaling
- Monitoring
- Deep Insights

Compatibility

Flexibility for your environment

- No vendor lock-in
- Full compatibility with open-source PostgreSQL databases
- Enhanced compatibility with major proprietary database systems

Support

Leverage our engineers' expertise

- Fujitsu guarantees bug fixes & patches
- 24/7 coverage for your systems
- Premium support & services available

Cloud:agnostic

Shift to the cloud of your choice

- Amazon Web Services
- Google Cloud
- IBM Cloud
- Azure

Fujitsu Enterprise Postgres can help your journey

Fujitsu Enterprise Postgres is the enhanced version of PostgreSQL, for enterprises seeking a more robust, secure, and fully supported edition for business-critical applications.

It is fully compatible with PostgreSQL and shares the same operation method, interface for application development, and inherent functionality. Designed to deliver the Quality of Service (QoS) that enterprises demand of their databases in the digital world, while supporting the openness and extensibility expected of open source platforms, all at a lower cost than traditional enterprise databases.

Fujitsu Enterprise Postgres

Combine the strengths of open-source PostgreSQL with the enterprise features developed by Fujitsu.

Enhanced speed, security, and support — without the costs associated with most proprietary systems.

Fujitsu Enterprise Postgres for Kubernetes

Utilize operator capabilities for provisioning and managing operations on the OpenShift Container Platform.

Business-ready database that integrates container operation technology for rapid development-to-production deployments.

Fujitsu Enterprise Postgres on IBM LinuxONE™

World-class platform that embraces open source and improves data security, performance, and business continuity.

The best of open source flexibility with the peace of mind that comes from knowing it is backed by Fujitsu and IBM.

Fujitsu Enterprise Postgres on IBM Power®

Experience frictionless hybrid cloud that can help you modernize to respond faster to business demands.

Fujitsu database designed for security, performance, and reliability, combined with IBM server built for agility in the hybrid cloud.
