When changing the Mirroring Controller settings, in addition to backing up the database, back up the configuration file in the Mirroring Controller management directory so that the Mirroring Controller settings are not lost.

### 3.10.2 Database Backup Operation

Using database multiplexing mode is the same as obtaining the backup data on the standby server as a safeguard against a disk failure. Note that all server disks may be corrupted due to some cause.

As a safeguard against this type of case, execute the `pgx_dmpall` command on the primary server to create the backup data.

However, it is not definite as to which server runs as the primary server, so ensure that the `pgx_dmpall` command is executed periodically on all servers, so that the backup data will be obtained. For example, create a script to obtain the backup data, and set it in the operation management software.

Point

When the `pgx_dmpall` command is executed on the standby server, it will not match the statuses, however the error message shown below will be output and return the value "1".

If a script that ignores only this type of error is executed on all servers, the backup data of the primary server can be obtained.

Error message

```
ERROR:recovery is in progress (10095)
```

Note

- Consider the possibility that the server that runs as the primary server may be destroyed alongside the backup data, so it is recommended to promote another server to become the primary server, and then back up the data on the new primary server without waiting for the next scheduled backup.
- Specify the same backup directory name for the primary and standby servers. If different backup directory names are specified, and recovery is performed using the backup data of the other server, the recovery cannot be performed correctly.

See

- Period backups allow shorter recovery time and reduction in disk usage. Refer to "Backing Up the Database" in the Operation Guide for details on the backup operation.

- Refer to "[Chapter 5 Action Required when an Error Occurs in Database Multiplexing Mode](#)" for details on recovery based on the backup data that was obtained using the `pgx_dmpall` command.

# Chapter 4 Operations in Database Multiplexing Mode

This chapter describes the periodic operations that are performed when running database multiplexing mode.

The periodic operations are the same as the operations on a single server.

Refer to "Periodic Operations" in the Operation Guide for information on the periodic operations.

## 4.1 Starting and Stopping Instances

When database multiplexing mode is used, use the `mc_ctl` command or Windows service to start and stop the instance and Mirroring Controller at the same time.

Do not start or stop the instance by itself.

### 4.1.1 Starting Mirroring Controller

Mirroring Controller can be started using one of the following:

- Using the `mc_ctl` command
- Starting a service on system startup

Mirroring Controller must be started by a user with administrator privileges (user ID belonging to the Administrators group).

Using the `mc_ctl` command

While Mirroring Controller is in a stopped state, execute the `mc_ctl` command from the command prompt to start the instance and Mirroring Controller.

Enabling automatic switch/disconnection

Execute the `mc_ctl` command in start mode with the `-f` option specified.

If you start Mirroring Controller without specifying the `-f` option, start Mirroring Controller and then execute the `mc_ctl` command in enable-failover mode, or restart Mirroring Controller with the `-f` option specified.

Example )

```
> mc_ctl start -M D:\mdir\inst1 -w -f
```

Disabling automatic switch/disconnection

Execute the `mc_ctl` command in start mode.

Example )

```
> mc_ctl start -M D:\mdir\inst1 -w
```

To start the Mirroring Controller process only, execute the `mc_ctl` command in start mode with the `--mc-only` option specified.

## See

Refer to the Command Reference for information on how to specify the mc\_ctl command.

### Starting a service on system startup

Specify automatic start when registering Mirroring Controller to the Windows service during setup of database multiplexing mode. Accordingly, the Mirroring Controller service will start on startup of the operating system.

## See

Refer to "3.9 Setting Automatic Start and Stop of Mirroring Controller and Multiplexed Instances" for details.

## Note

When only the instance is started without starting Mirroring Controller, the impact will be as follows:

- Enabling automatic switch/disconnection  
Features such as automatic switch and automatic disconnection will not work until Mirroring Controller is started.
- Disabling automatic switch/disconnection  
Errors indicated in "2.1 What is Database Multiplexing Mode" will not be detected until Mirroring Controller is started.

## 4.1.2 Stopping Mirroring Controller

---

Mirroring Controller can be stopped using one of the following ways:

- Using the mc\_ctl command
- Stopping the service

## Note

Mirroring Controller must be stopped by a user with administrator privileges (user ID belonging to the Administrators group).

### Using the mc\_ctl command

While Mirroring Controller is running, execute the mc\_ctl command from the command prompt in stop mode to stop Mirroring Controller.

Example )

```
> mc_ctl stop -M D:\mdir\inst1
```

## Point

To stop the Mirroring Controller process only, execute the mc\_ctl command in stop mode with the --mc-only option specified.

## See

Refer to the Command Reference for information on how to specify the mc\_ctl command.

## Stopping the service

Select [Administrativehpq Tools], then [Services] to open the [Services] window, and then select the Mirroring Controller service and click the [Stop] menu.

### Note

- Before shutting down the operating system on the primary server, you must stop the Mirroring Controller, or shut down the operating system on the standby server.
- If you stop the Mirroring Controller by stopping the service, you must firstly exit all applications or programs that are using the instance that is to be stopped.
- When only the instance is stopped without stopping Mirroring Controller, the impact will be as follows:
  - Enabling automatic switch/disconnection  
Mirroring Controller determines that an error has occurred in the instance, and performs an unnecessary automatic switch. Automatic switch may also stop working correctly in some cases.
  - Disabling automatic switch/disconnection  
Mirroring Controller determines that an error has occurred in the instance, and outputs an error to the event log.

## 4.2 Checking the Database Multiplexing Mode Status

Check the multiplexed database status by executing the `mc_ctl` command in status mode.

Additionally, errors can be detected by monitoring the Mirroring Controller messages. If the status or messages are monitored periodically, you can react quickly following an automatic switch failure.

When the `mc_ctl` command is executed, the details of the multiplexing configuration, information about whether switch is possible following the error, and location and details of the error that caused the switch or disconnection are displayed.

After starting database multiplexing mode, execute the `mc_ctl` command in status mode to check the multiplexing status.

An example of the status displayed when the `mc_ctl` command is executed is shown below.

Example)

```
> mc_ctl status -M D:\mcdire\inst1

mirroring status
-----
switchable
server_id  host_role      host              host_status  db_proc_status  disk_status
-----
nd1        primary       192.0.2.100      normal       normal          normal
nd2        standby       192.0.2.110      normal       normal          normal
```

Additionally, by referencing the `pg_stat_replication` statistics view on the primary server, the data synchronization status can be confirmed. However, when creating the monitoring program, note that the content of `pg_stat_replication` may be changed in the future.

The following example shows that the locations of the transaction log after it is sent and received (`sent_location`, `replay_location`) match, and that they are fully synchronized.

Example)

```
postgres=# select * from pg_stat_replication;
-[ RECORD 1 ]-----+-----
pid           | 14336
usesysid     | 10
username     | fsep
application_name | standby
```

|                 |  |                               |
|-----------------|--|-------------------------------|
| client_addr     |  | 192.0.2.210                   |
| client_hostname |  |                               |
| client_port     |  | 27500                         |
| backend_start   |  | 2015-04-23 20:24:13.761424+09 |
| backend_xmin    |  |                               |
| state           |  | streaming                     |
| sent_location   |  | 0/3000060                     |
| write_location  |  | 0/3000060                     |
| flush_location  |  | 0/3000060                     |
| replay_location |  | 0/3000060                     |
| sync_priority   |  | 1                             |
| sync_state      |  | sync                          |

See

- Refer to "mc\_ctl" in Reference for information on the command.
- Refer to "Notes on Application Compatibility" in the Application Development Guide for information on retaining application compatibility.
- Refer to "The Statistics Collector" in "Server Administration" in the PostgreSQL Documentation for details on pg\_stat\_replication.

## 4.3 Manually Switching the Primary Server

The primary server cannot be switched automatically in the following case:

- If automatic switch/disconnection is disabled

In this case, to manually switch the primary server, execute the mc\_ctl command in switch mode on either the primary server or the standby server.

Example)

```
> mc_ctl switch -M D:\mcdire\inst1
```

## 4.4 Manually Disconnecting the Standby Server

The standby server cannot be disconnected automatically in the following case:

- If automatic switch/disconnection is disabled

In this case, to manually disconnect the standby server, execute the mc\_ctl command in stop mode on the standby server and comment out the synchronous\_standby\_names parameter in the postgresql.conf file on the primary server.

1. Execute the mc\_ctl in stop mode on the standby server.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1
```

2. Comment out the synchronous\_standby\_names parameter in the postgresql.conf file on the primary server.
3. Execute the pg\_ctl command in reload mode on the primary server.

Example)

```
> pg_ctl reload -D D:\database\inst1
```

## 4.5 Monitoring Mirroring Controller Messages

The messages that are output by Mirroring Controller are output to the event log. If the automatic switch fails, for example, an important message related to the continuation of the operation may be output, so ensure that the event log messages are monitored.

### Point

To monitor message types considered to be important, a setting must be configured in the event log beforehand.

Refer to the operating system manual, check if the monitoring target message type message is output to the event log, and configure the setting if required.

### Display format

```
eventSourceName[processId]: messageType: messageContent (messageNumber)
```

Specify the event source name in the event\_source parameter of the serverIdentifier.conf file.

The message types output by Mirroring Controller, their severity, and their corresponding value in the event log are shown in the table below.

Table 4.1 Message type, severity, and corresponding value in the event log

| Message type | Severity    | Meaning  | Event log   |
|--------------|-------------|--|-------------|
| INFO         | Information | Provides information that does not fall under LOG or NOTICE.   | INFORMATION |
| LOG          |             | Provides information recognized as a particularly important event in tracing the operation history.<br>(Example: Automatic switch is complete)                               |             |
| NOTICE       | Notice      | Outputs information that takes into account the user instructions within the program in response to an executed or automatically executed process.                           |             |
| WARNING      | Warning     | Provides a warning, for example it will soon be impossible to maintain multiplexing capabilities.  | WARNING     |
| ERROR        | Error       | Reports that an error other than FATAL or PANIC has occurred.  | ERROR       |
| FATAL        |             | Reports that an abnormality was detected in one of the multiplexed database systems requiring recovery of this system, and also the content and cause of the abnormality.    |             |
| PANIC        |             | Reports that an abnormality was detected in all multiplexed database systems requiring immediate recovery of this system, and also the content and cause of the abnormality. |             |

The message severity has the following meanings:

- Information

Informational status. A message that was reported by the system is displayed. No action is required.

- Notice

Informational status, but a message that should be noted is displayed. If necessary, take the actions described in the "Action" section of the message.

- Warning

No error has occurred, but the user is requested to check, and take action. Take the actions described in the "Action" section of the message.

- Error

An error has occurred. Take the actions described in the "Action" section of the message.

## 4.6 Server Maintenance

---

To perform maintenance tasks such as periodic server inspections and the application of updates for software products including the operating system, you must perform a planned stop of the server, and then perform the maintenance.

### 4.6.1 Rolling Updates

---

In database multiplexing mode, rolling updates, that perform the maintenance for the servers that comprise the cluster system, can be performed while jobs continue.

First, perform the maintenance for the standby server, and then switch the standby server to the primary server. Then, perform the maintenance for the original primary server that was switched to the standby server. This enables maintenance to be performed while jobs continue.

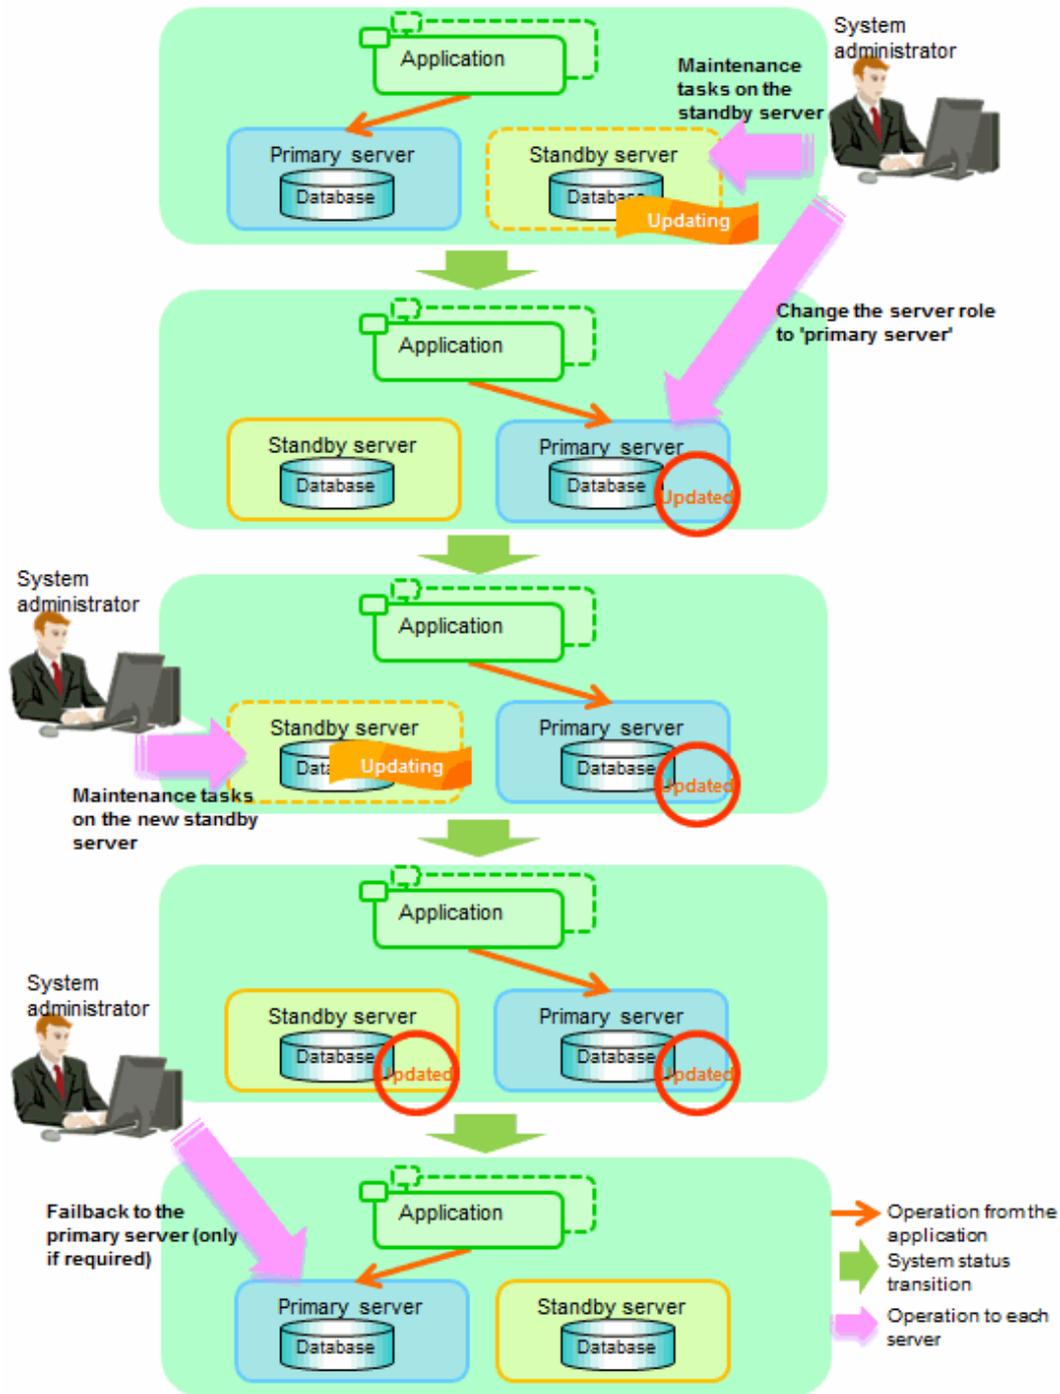

See

.....  
If the downtime due to the maintenance of the standby server is expected to be long, refer to "Standby server downtime" in "[4.7.1 Changes Required when the Standby Server is Stopped](#)".  
.....

The flow of a rolling update is shown below.

Figure 4.1 Performing a Rolling Update

Perform the following procedure as shown in the above figure:

### Standby server maintenance tasks

1. To perform the maintenance on the standby server, stop Mirroring Controller.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1
```

2. Ensure that Mirroring Controller has completely stopped.

If the multiplexed instances and Mirroring Controller have been configured on the standby server to start and stop automatically when the operating system of the database server is started or stopped, cancel the setting to start and stop automatically.

### See

Refer to "3.9 Setting Automatic Start and Stop of Mirroring Controller and Multiplexed Instances" for information on how to configure the multiplexed instances and Mirroring Controller to start and stop automatically when the operating system of the database server start and stops.

This task should be performed by the instance administrator user with administrator privileges.

Use the `sc config` command to disable automatic start of multiplexed instances and Mirroring Controller from the Windows service.

Example)

The following is an example using the registered service name "Mirroring\_Controller\_inst1".

```
> sc config "Mirroring_Controller_inst1" start= demand
```

### Information

You can use the `sc qc` command to check the registration status.

Refer to documentation such as Windows Help and Support for the `sc` command for information on registry content.

3. Perform maintenance tasks.
4. Create a copy of the primary server instance on the standby server.

Execute the `pg_basebackup` command to create data in the standby server by synchronizing with the primary server.

Example)

```
> pg_basebackup -D D:\mcd\inst1 --xlog --progress --verbose -R --  
dbname='application_name=standbyServerName' -h primaryServerHostName -p primaryServerPortNumber
```

### See

The procedure for copying the primary server instance to the standby server is the same as the procedure for setting up the standby server.

Refer to "3.4.2 Creating, Setting, and Registering the Standby Server Instance", and then perform the recovery.

5. Check the settings for automatic start and stop of the multiplexed instances and Mirroring Controller.

If the multiplexed instances and Mirroring Controller were configured in step 2 to not start and stop automatically when the operating system of the database server starts and stops, then change the settings back. This step can be skipped if automatic start and stop are not required.

This task should be performed by an instance administrator user with administrator privileges.

Use the `sc config` command to enable automatic start of multiplexed instances and Mirroring Controller from the Windows service.

Example)

The following is an example using the registered service name "Mirroring\_Controller\_inst1".

```
> sc config "Mirroring_Controller_inst1" start= auto
```

## Information

You can use the `sc qc` command to check the registration status.

Refer to documentation such as Windows Help and Support for the `sc` command for information on registry content.

### 6. Start (rebuild) Mirroring Controller on the standby server.

This operation is required when determining the maintenance tasks on the standby server.

#### Enabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode with the `-f` option specified. This enables automatic switch and disconnection.

If you start Mirroring Controller and the instance without specifying the `-f` option, automatic switch and disconnection will not be enabled. To enable both, start Mirroring Controller and then execute the `mc_ctl` command in enable-failover mode, or restart Mirroring Controller with the `-f` option specified.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w -f
```

#### Disabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w
```

## Switching to the primary server

To perform the maintenance on the primary server, execute the `mc_ctl` command in the switch mode on the primary server or the standby server.

Example)

```
> mc_ctl switch -M D:\mcdire\inst1
```

When the switch is complete, the `synchronous_standby_names` parameter in the `postgresql.conf` file of the new primary server will be commented as follows:

Example)

```
#synchronous_standby_names = 'primary'
```

## New standby server maintenance tasks

### 1. Stop the Mirroring Controller.

On the new standby server (the primary server before the switch), execute the `mc_ctl` command in stop mode.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1
```

### 2. Ensure that Mirroring Controller has completely stopped.

If the multiplexed instances and Mirroring Controller have been configured on the new standby server to start and stop automatically when the operating system of the database server is started or stopped, cancel the setting to start and stop automatically now.

## See

Refer to "[3.9 Setting Automatic Start and Stop of Mirroring Controller and Multiplexed Instances](#)" for information on how to configure the multiplexed instances and Mirroring Controller to start and stop automatically when the operating system of the database server starts and stops.

This task should be performed by an instance administrator user with administrator privileges.

Use the `sc config` command to disable automatic start of multiplexed instances and Mirroring Controller from the Windows service.

Example)

The following is an example using the registered service name "Mirroring\_Controller\_inst1".

```
> sc config "Mirroring_Controller_inst1" start= demand
```

## Information

You can use the `sc qc` command to check the registration status.

Refer to documentation such as Windows Help and Support for the `sc` command information on registry content.

3. Perform the maintenance on the new standby server that was stopped.
4. Create a copy of the new primary server instance on the new standby server.

Execute the `pg_basebackup` command to create data in the new standby server by synchronizing with the new primary server.

Example)

```
> pg_basebackup -D D:\mcdir\inst1 --xlog --progress --verbose -R --  
dbname='application_name=standbyServerName' -h primaryServerHostName -p primaryServerPortNumber
```

## See

The procedure for copying the primary server instance to the standby server is the same as the procedure for setting up the standby server.

Refer to "[3.4.2 Creating, Setting, and Registering the Standby Server Instance](#)", and then perform the recovery.

5. Check the settings for automatic start and stop of the multiplexed instances and Mirroring Controller.

If the multiplexed instances and Mirroring Controller were configured in step 2 to not start and stop automatically when the operating system of the database server starts and stops, then change the settings back. This step can be skipped if automatic start and stop are not required.

This task should be performed by an instance administrator user with administrator privileges.

Use the `sc config` command to enable automatic start of multiplexed instances and Mirroring Controller from the Windows service.

Example)

The following is an example using the registered service name "Mirroring\_Controller\_inst1".

```
> sc config "Mirroring_Controller_inst1" start= auto
```

## Information

You can use the `sc qc` command to check the registration status.

Refer to the document such as Windows Help and Support for the `sc` command for information on registry content.

6. After the maintenance is complete, edit the following parameters in the postgresql.conf file of the standby server as required.

Copying an instance results in the value of the synchronous\_standby\_names parameter becoming the specified value on the primary server. Therefore, correct it to the specified value on the standby server. If the parameter was commented out, then you must uncomment it.

7. On the standby server, start (rebuild) Mirroring Controller.

#### Enabling automatic switch/disconnection

As the instance administrator user, execute the mc\_ctl command in start mode with the -w and -f options specified. This enables automatic switch and disconnection.

If you start Mirroring Controller and the instance without specifying the -f option, automatic switch and disconnection will not be enabled. To enable both, start Mirroring Controller and then execute the mc\_ctl command in enable-failover mode, or restart Mirroring Controller with the -f option specified.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w -f
```

#### Disabling automatic switch/disconnection

As the instance administrator user, execute the mc\_ctl command in start mode with the -w option specified.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w
```

## Failback of the Primary Server

Revert the primary server and standby server to the original server configuration. Do this to execute the main job on the previous primary server. Refer to "5.1.1.3 Failback of the Primary Server" for details.

Obtain a backup as soon as this task is complete.

## 4.6.2 Stopping for Maintenance

Perform this procedure to stop all servers for periodic inspections, for example. On the server on which Mirroring Controller is running, execute the mc\_ctl command in stop mode to stop the instance and Mirroring Controller.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1 -a
```

## 4.7 Changes in Operation

The following changes in operation may be required:

- Changes required when the standby server is stopped
- Changing from single server mode to database multiplexing mode
- Changing from database multiplexing mode to single server mode

### 4.7.1 Changes Required when the Standby Server is Stopped

## Operation when the standby server is stopped

Before performing maintenance for the primary server instance when the standby server has been stopped, comment out the `synchronous_standby_names` parameter in the `postgresql.conf` file of the primary server, and then execute the `pg_ctl` command in reload mode.

If this operation is not performed, operations performed on the primary server for the instance will remain in a wait state.

Refer to "pg\_ctl" in Reference for information on the command.

## Standby server downtime

If you specified the `synchronous_standby_names` parameter of the `postgresql.conf` file and then the standby server instance is stopped, consider the points below.

- The `wal_sender_timeout` parameter in the `postgresql.conf` file

If the standby server is stopped after the timeout time set in this parameter was exceeded, an error stating that the transaction log could not be received may be output to the standby server event log, and all transaction logs that should be transferred to the standby server may be lost.

- The `wal_keep_segments` parameter in the `postgresql.conf` file

If a transaction log that exceeds the value set in this parameter was generated while the standby server was stopped, the transaction log may be deleted.

Additionally, setting this parameter requires consideration regarding stabilization of the database multiplexing mode. Refer to "[3.8.1 Tuning to Stabilize the Database Multiplexing Mode](#)" for details.

The standby server must be rebuilt in both cases above.

Take the action advised in the recovery operation that starts from "[5.1.1.1.3 Identify cause of error and perform recovery](#)" through to "[5.1.1.2 Rebuild the Standby Server](#)".

## 4.7.2 Changing from Single Server Mode to Database Multiplexing Mode

The procedure for switching single server mode to database multiplexing mode for the purposes of high reliability and load distribution of the system is explained below.

This procedure is equivalent to the setup procedure explained in "[Chapter 3 Setting up Database Multiplexing Mode](#)".

### If the data storage destination directory name is not comprised of ASCII characters

Stop the application job and then perform the following procedure to migrate to a directory with a name that uses only ASCII characters:

1. Stop the database instance on the primary server.
2. Change the name of the data storage destination directory to one that uses only ASCII characters.  
For example, do not perform operations that will cause the symbolic link contained in the data storage destination directory to become lost, such as moving data to another drive.

See

When encrypting the storage data, refer to "Database Multiplexing Mode" in the Operation Guide, and then perform the setup for encryption on the primary and standby servers.

1. Install on the standby server

Install FUJITSU Enterprise Postgres on the server to be started as the standby server.

Refer to "Installation" in the Installation and Setup Guide for Server for information on how to install FUJITSU Enterprise Postgres.

Use ASCII characters in the data storage destination directory.

2. Stop the application jobs

Stop the application jobs to be connected to the primary server.

3. Change the primary server settings

To allow connections from the server to be started as the standby server, configure the settings in step 2 and thereafter of "[3.3.2 Creating, Setting, and Registering the Primary Server Instance](#)" on the primary server.

4. Set up database multiplexing mode on the standby server

Refer to "[3.4.1 Setting up Database Multiplexing Mode on the Standby Server](#)" for details.

5. Create the standby server instance and start it

Refer to "[3.4.2 Creating, Setting, and Registering the Standby Server Instance](#)" for details.

After the above steps are completed, refer to the remaining explanations in "[Chapter 3 Setting up Database Multiplexing Mode](#)" and ensure that the required settings and operations are completed.

## 4.7.3 Changing from Database Multiplexing Mode to Single Server Mode

The procedure for stopping database multiplexing mode and changing to single server mode is explained below.

1. Determine the server for which the instance is to be stopped, and switch this server

Determine the server that is to be excluded as the database multiplexing mode target, and for which the instance is to be stopped.

If the server for which the instance is to be stopped is the primary server, execute the mc\_ctl command in the switch mode to switch the standby server to the primary server.

The standby server after the switch is complete will be the server for which the instance is to be stopped.

If the server for which the instance is to be stopped is the standby server, there is no need to perform the switch operation.

Example)

```
> mc_ctl switch -M D:\mcdire\inst1
```

2. Stop Mirroring Controller and the instance.

On the server that was determined in step 1, execute the mc\_ctl command in the stop mode to stop Mirroring Controller and the instance.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1
```

3. Unregister Mirroring Controller from the Windows service.

Execute the mc\_ctl command in unregister mode to unregister Mirroring Controller from the Windows service.

Example)

```
> mc_ctl unregister -M D:\mcdire\inst1
```

4. Delete registries related to the event log

If error logs are output to the event log in "3.2.2 Preparatory Tasks for the Output of Error Logs to the Event Log", delete the registered event source name for each instance.

Example)

```
> regsvr32 /u /i:"Mirroring Controller inst1" "c:\Program Files\Fujitsu\fssepv<xy>server64\lib\mcevent.dll"
```

5. Delete the file resources

Delete the following file resources:

- Data storage destination directory
- Mirroring Controller management directory

Example)

```
> rmdir /S /Q D:\database\inst1
> rmdir /S /Q D:\mcdir\inst1
```

Refer "Security-Related Notes" in the Operation Guide for information on deleting the data securely.

6. Stop Mirroring Controller and the instance on the primary server

Execute the mc\_ctl command in stop mode on the primary server.

Example)

```
> mc_ctl stop -M D:\mcdir\inst1
```

7. Unregister Mirroring Controller from the Windows service on the primary server

Execute the mc\_ctl command in unregister mode to unregister Mirroring Controller from the Windows service.

Example)

```
> mc_ctl unregister -M D:\mcdir\inst1
```

8. Delete registries related to the event log on the primary server

If error logs are output to the event log in "3.2.2 Preparatory Tasks for the Output of Error Logs to the Event Log", delete the registered event source name for each instance.

Example)

```
> regsvr32 /u /i:"Mirroring Controller inst1" "c:\Program Files\Fujitsu\fssepv<xy>server64\lib\mcevent.dll"
```

9. Delete the database multiplexing mode settings that were configured for the primary server instance.

Take the appropriate action for each parameter and resource by editing postgresql.conf as shown below. Also, delete recovery.conf or change its name to recovery.done for example.

| File            | Parameter                 | Action   |
|-----------------|---------------------------|--|
| postgresql.conf | wal_level                 | Delete the "hot_standby" value that was specified.                         |
|                 | max_wal_senders           | Revert the value to the one set before database multiplexing mode was set. |
|                 | synchronous_standby_names | Delete.  |

| File | Parameter                 | Action   |
|------|---------------------------|--|
|      | wal_sender_timeout        |  |
|      | listen_addresses          | Revert the value to the one set before database multiplexing mode was set. |
|      | max_connections           |  |
|      | synchronous_standby_names | Delete.  |
|      | hot_standby               |  |

- Mirroring Controller management directory

Additionally, if the backup operation was performed, delete the following resources:

- Mirroring Controller management directory backup data obtained in database multiplexing mode
- Instance backup data obtained in database multiplexing mode

After these actions are performed, ensure that the backup data is collected when starting the single operation.

- Refer to "Security-Related Notes" in the Operation Guide for details on deleting the data securely.
- Refer to "3.10 Backup Operation" for details on the backup operation.
- Refer to "Appendix A Parameters" for details on the postgresql.conf file parameters.

## 4.7.4 Uninstalling in Database Multiplexing Mode

This section explains how to uninstall FUJITSU Enterprise Postgres on a server using database multiplexing mode.

You must delete the Mirroring Controller settings from both the primary server and standby server before uninstalling FUJITSU Enterprise Postgres.

1. Stop the multiplexed instances and Mirroring Controller

Refer to "4.1 Starting and Stopping Instances" for information on how to stop the instance.

2. Unregister Mirroring Controller from the Windows service

Execute the mc\_ctl command in unregister mode to unregister Mirroring Controller from the Windows service.

Example)

```
> mc_ctl unregister -M D:\mcdire\inst1
```

3. Delete registries related to the event log

If messages are output to the event log, DLLs are registered in accordance with "3.2.2 Preparatory Tasks for the Output of Error Logs to the Event Log". Delete these registries so that no unnecessary issues occur.

Example)

The following is an example in which the DLL of a 64-bit product that is registered under the default event source name is deleted.

```
> regsvr32 /u "c:\Program Files\Fujitsu\fsepv<xy>server64\lib\mcevent.dll"
```

- Delete the registered DLL for each instance

DLL registration is performed so that messages output to the event log are identified by each instance, and are output to any event source named by the user.

Accordingly, it is necessary to delete the DLL registry for each instance. Delete the DLL registry for each event source name.

Example)

The following is an example in which the DLL of a 64-bit product that is registered under the event source name "Mirroring Controller inst1" is deleted.

```
> regsvr32 /u /i:"Mirroring Controller inst1" "c:\Program Files\Fujitsu\fsepv<XY>server64\lib\ncevent.dll"
```

- If installing multiple versions

If the database multiplexing system you set up using the FUJITSU Enterprise Postgres package has been set to output error logs to the event log, use the DLL path name that you took note of previously as explained in "[3.2.2 Preparatory Tasks for the Output of Error Logs to the Event Log](#)" to reregister the default event source name.

## Note

Ensure that you delete the DLLs before the uninstallation. If you perform the uninstallation without doing so, you may not be able to delete the DLLs at a later time.

## 4. Uninstall FUJITSU Enterprise Postgres

Refer to "Uninstallation" in the Installation and Setup Guide for Server for information on how to uninstall FUJITSU Enterprise Postgres.

# Chapter 5 Action Required when an Error Occurs in Database Multiplexing Mode

This chapter describes the action required if an error occurs in database multiplexing mode.

In database multiplexing mode, when an error is detected, the switch or disconnection of the standby server is performed automatically, so that only the primary server starts degrading. In this case, the recovery tasks will be required for the standby server on which the switch or disconnection was performed.

Other possible cases are as follows:

- When automatic switch fails
- When automatic disconnection fails
- When all servers or instances were stopped

## 5.1 Action Required when Server Degradation Occurs

If the server has started degrading, the recovery tasks will vary depending on whether the cause was the switch (failover or switchover), or the disconnection.

Execute the `mc_ctl` command in status mode, or refer to the event log, and check if the cause of the server to start degrading was the switch or the disconnection.

In the example below, the `mc_ctl` command is executed in status mode.

If a switch has occurred, "switched" (the switch is complete and the server is in a degrading state) is displayed for "mirroring status".

Example)

```
> mc_ctl status -M D:\mcdire\inst1
mirroring status
-----
switched
:
```

If a disconnection has occurred, "not-switchable" (disconnection was performed so the server cannot be switched) is displayed for "mirroring status".

Example)

```
> mc_ctl status -M D:\mcdire\inst1
mirroring status
-----
not-switchable
:
```

If Mirroring Controller detects any errors on the server on which operations are continuing during recovery to database multiplexing mode from a degrading operation state, perform the procedure in "5.1.3 Addressing Errors During Degrading Operation", and then recover to database multiplexing mode.

### 5.1.1 Operations when the Server has Started Degrading after a Switch has Occurred

This section explains the operations when the server has started degrading after a switch has occurred.

## Note

---

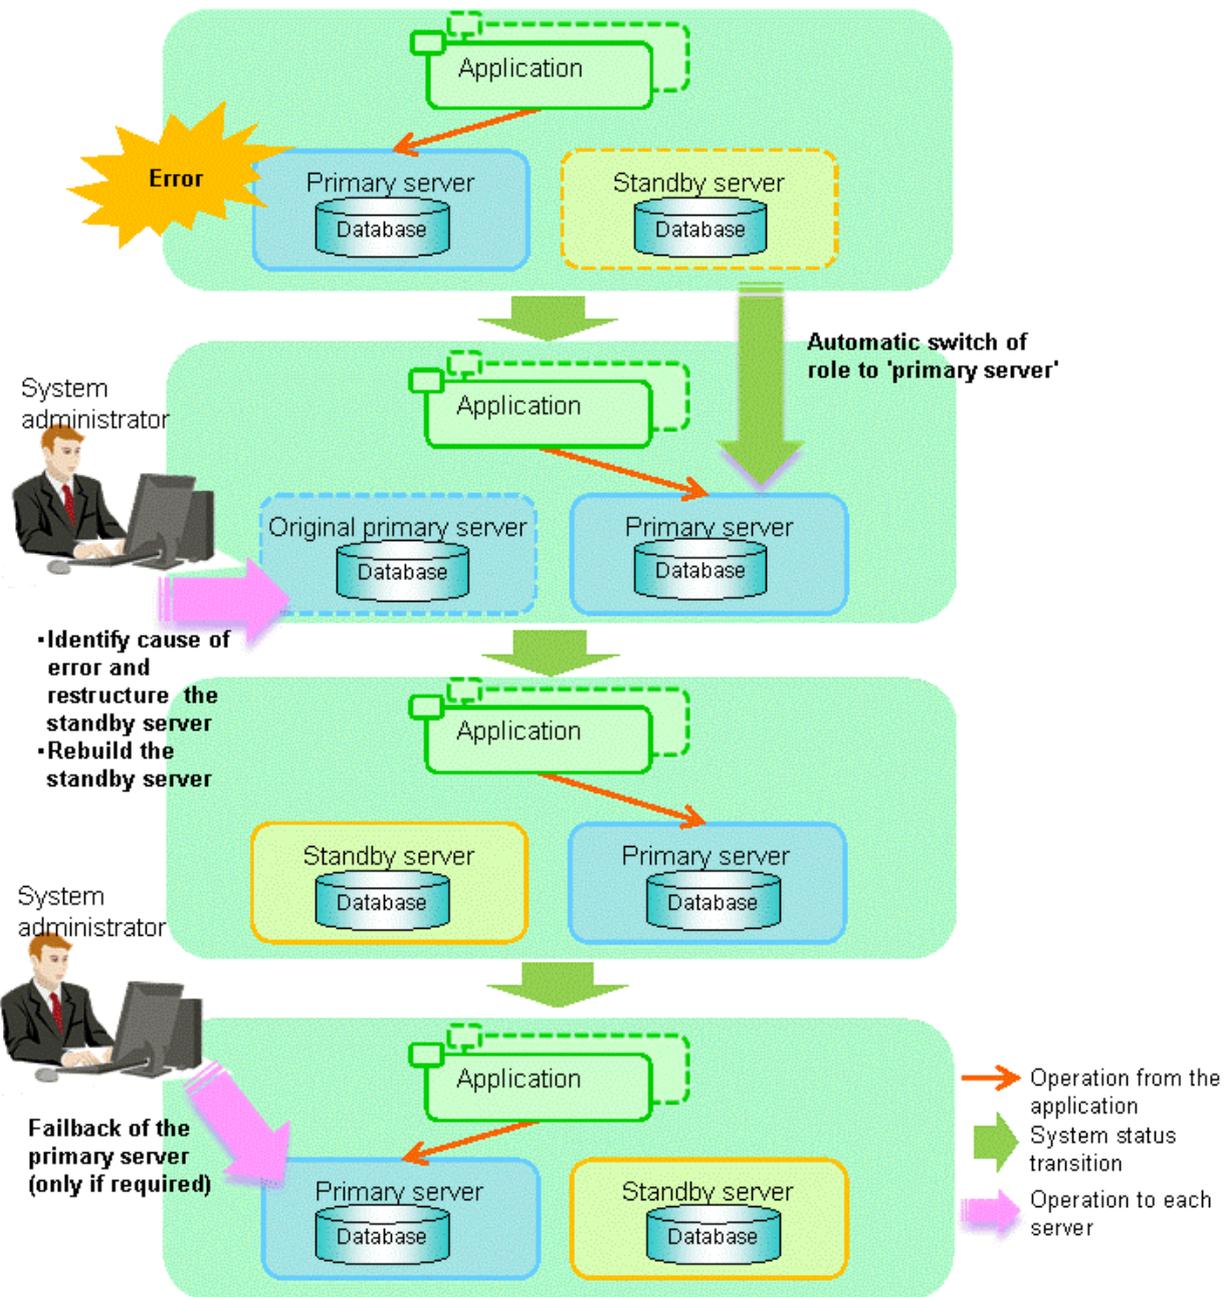

- After a switch has occurred as a result of an abnormality on the primary server, the database will not have a multiplexed configuration until the standby server is rebuilt. Remove the cause of the error as quickly as possible, and then rebuild the standby server.
  - If the reference job was executed on the standby server, and the servers are switched because an error occurred on the primary server, the load is concentrated on the new primary server. Accordingly, pause the reference job on the original standby server, rebuild the original primary server as the new standby server, and then resume the reference job for the new standby server.
  - If the instance on the new primary server is stopped before the original primary server where the error occurred is rebuilt as the new standby server, a split brain occurs at startup from the instance on the original primary server. Therefore, start the instance on the new primary server before rebuilding the standby server.
- 

If the switch occurred and the server has started degrading, perform the following operations to recover the standby server and revert it to its original state:

- [Identify Cause of Error and Restore the Standby Server](#)
- [Rebuild the Standby Server](#)
- [Failback of the Primary Server](#) (only if required)

The flow of these operations is shown in the figure below.

Figure 5.1 Flow of operations

### 5.1.1.1 Identify Cause of Error and Restore the Standby Server

Perform the recovery according to the following procedure:

1. [Stop Mirroring Controller](#)
2. [Recovery of the Mirroring Controller management directory](#)
3. [Identify cause of error and perform recovery](#)

#### 5.1.1.1.1 Stop Mirroring Controller

Execute the `mc_ctl` command in stop mode for the original primary server on which the error occurred.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1
```

This also stops the instance that is required to perform the recovery.

If the instance does not stop, refer to "Actions in Response to Failure to Stop an Instance" in the Operation Guide, and then stop the instance.

Then, specify the `-e` option in the above command to forcibly stop Mirroring Controller.

### 5.1.1.1.2 Recovery of the Mirroring Controller management directory

Copy the files in the Mirroring Controller management directory from the backup data, and then perform the recovery.

### 5.1.1.1.3 Identify cause of error and perform recovery

Refer to the event log of the primary server and the standby server to identify the cause of the error, and then perform recovery.

The following commands can be used to recover a standby server:

- `pg_basebackup`

Creates a copy of all resources of the primary server instance. This command is used for example when creating the first instance on the standby server.

- `pg_rewind`

Creates a copy of only the updated files on the new primary server. For this reason, if this command is used to incorporate a new standby server, recovery time can be shortened. To use this command to build the original primary server as a new standby server, at least one of the following must be met:

- a. Checksums were enabled when an instance was created and the original primary server was stopped normally, or
- b. The original primary server was stopped normally and the `wal_log_hints` parameter of `postgresql.conf` was enabled when an instance was started.

Additionally, `full_page_writes` must be enabled, which is its default value.

If it is required to start the original primary server again to then stop it normally, both servers will temporarily operate as primary servers. If data is updated on the original primary server, data corruption will occur, so take measures such as changing settings in `pg_hba.conf` to disallow client connections.

Refer to "pg\_rewind" under "Reference" in the PostgreSQL Documentation for information on the `pg_rewind` command.

The example below executes the `pg_rewind` command to perform recovery by synchronizing data on the original primary server with the new primary server.

1. Use the `pg_ctl` command to start the original primary server instance.

Example)

```
> pg_ctl start -w -D D:\mcdire\inst1
```

2. Use the `pg_ctl` command to stop the original primary server instance.

Example)

```
> pg_ctl stop -D D:\mcdire\inst1
```

3. Create a copy of the new primary server instance in the original primary server (new standby server).

Execute the `pg_rewind` command to synchronize the new standby server data with the new primary server.

Example)

```
> pg_rewind -D db1 --source-server='user=userName host=newPrimaryServerHostName
port=newPrimaryServerPortNumber'
```

### 5.1.1.2 Rebuild the Standby Server

The starting of the recovered original primary server as the standby server is referred to as the "standby server rebuild".

On the original primary server, start Mirroring Controller and the instance.

#### Enabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode with the `-f` option specified. This enables automatic switch/disconnection.

If you start Mirroring Controller and the instance without specifying the `-f` option, automatic switch/disconnection will not be enabled. To enable both, start Mirroring Controller and then execute the `mc_ctl` command in enable-failover mode, or restart Mirroring Controller with the `-f` option specified.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w -f
```

#### Disabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w
```

### 5.1.1.3 Failback of the Primary Server

To revert the primary server and standby server to the original server configuration after rebuilding the standby server, perform failback for the primary server.

Do this to execute the main job on the previous primary server.

Perform the following procedure:

1. Failback of the primary server

Execute the `mc_ctl` command in switch mode on the primary server or the standby server.

Example)

```
> mc_ctl switch -M D:\mcdire\inst1
```

After executing the `mc_ctl` command in switch mode, the status will be as follows:

Example)

```
> mc_ctl status -M D:\mcdire\inst1
mirroring status
-----
switched
server_id  host_role                host          host_status  db_proc_status  disk_status
-----
nd1        primary                  192.0.2.100  normal      abnormal(postmaster) normal
nd2        none(inactivated primary) 192.0.2.110  normal      abnormal(postmaster) normal
```

## 2. Stop the original primary server

On the original primary server, execute the `mc_ctl` command in stop mode to stop Mirroring Controller and the instance.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1
```

## 3. Create a copy of the new primary server instance in the original primary server (new standby server)

Execute the `pg_basebackup` command to create data in the new standby server by synchronizing with the new primary server.

Example)

```
> pg_basebackup -D D:\mcdire\inst1 --xlog --progress --verbose -R --  
dbname='application_name=standbyServerName' -h primaryServerHostName -p primaryServerPortNumber
```

The procedure for copying the new primary server instance to the new standby server is the same as the procedure for setting up the new standby server.

Refer to "3.4.2 Creating, Setting, and Registering the Standby Server Instance", and then perform the recovery.

## 4. Rebuild the standby server

On the standby server, start Mirroring Controller and the instance.

### Enabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode with the `-w` and `-f` options specified. This enables automatic switch/disconnection.

If you start Mirroring Controller and the instance without specifying the `-f` option, automatic switch/disconnection will not be enabled. To enable both, start Mirroring Controller and then execute the `mc_ctl` command in enable-failover mode, or restart Mirroring Controller with the `-f` option specified.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w -f
```

### Disabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode with the `-w` option specified.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w
```

## 5.1.2 Operations when the Server has Started Degrading after a Disconnection has Occurred

This section explains the operations when the server has started degrading after a disconnection has occurred.

After a disconnection has occurred as a result of an abnormality on the standby server, the database will not have a multiplexed configuration until the standby server is rebuilt. Remove the cause of the error as quickly as possible, and then rebuild the standby server.

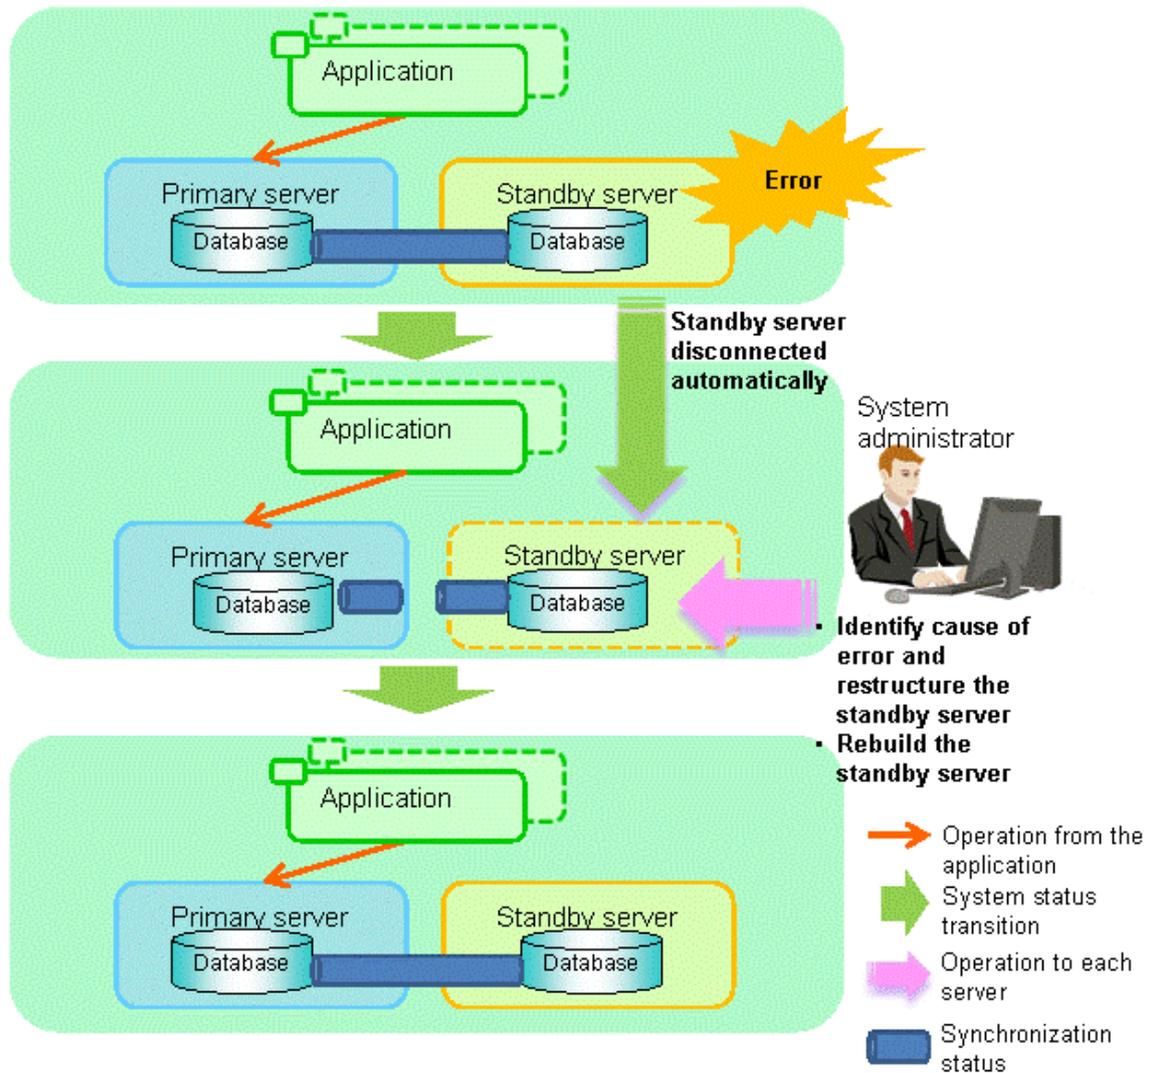

If the disconnection occurred and the server has started degrading, perform the following operations to recover the standby server and revert it to its original state:

- [Identify Cause of Error and Restore the Standby Server](#)

- [Rebuild the Standby Server](#)

The flow of these operations is shown in the figure below.

Figure 5.2 Flow of operations

### 5.1.2.1 Identify Cause of Error and Restore the Standby Server

Perform the recovery according to the following procedure:

1. [Stop Mirroring Controller](#)
2. [Recovery of the Mirroring Controller management directory](#)
3. [Identify cause of error and perform recovery](#)

#### 5.1.2.1.1 Stop Mirroring Controller

Execute the `mc_ctl` command in stop mode for the standby server on which the error occurred.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1
```

This also stops the instance that is required to perform the recovery.

## Note

If the instance does not stop, refer to "Actions in Response to Failure to Stop an Instance" in the Operation Guide, and then stop the instance.

Then, specify the `-e` option in the above command to forcibly stop Mirroring Controller.

### 5.1.2.1.2 Recovery of the Mirroring Controller management directory

Copy the files in the Mirroring Controller management directory from the backup data, and then perform the recovery.

### 5.1.2.1.3 Identify cause of error and perform recovery

Refer to the event log of the primary server and the standby server to identify the cause of the error, and then perform recovery.

Execute the `pg_basebackup` command to perform recovery by synchronizing data in the primary server with the standby server.

Example)

```
> pg_basebackup -D D:\mcdir\inst1 --xlog --progress --verbose -R --  
dbname='application_name=standbyServerName' -h primaryServerHostName -p primaryServerPortNumber
```

## See

This recovery procedure is the same as the procedure for setting up the standby server.

Refer to "3.4.2 Creating, Setting, and Registering the Standby Server Instance", and then perform the recovery.

### 5.1.2.2 Rebuild the Standby Server

Start the Mirroring Controller and the instance of the standby server, and rebuild the standby server.

#### Enabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode with the `-f` option specified. This enables automatic switch/disconnection.

If you start Mirroring Controller and the instance without specifying the `-f` option, automatic switch/disconnection will not be enabled. To enable both, start Mirroring Controller and then execute the `mc_ctl` command in enable-failover mode, or restart Mirroring Controller with the `-f` option specified.

Example)

```
> mc_ctl start -M D:\mcdir\inst1 -w -f
```

#### Disabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode.

Example)

```
> mc_ctl start -M D:\mcdir\inst1 -w
```

## 5.1.3 Addressing Errors During Degrading Operation

This section explains how to address errors that may occur on the server on which operation is continuing during degrading operation triggered by a switch or disconnection.

### If needing to recover from backup data

If it is necessary to recover the database using backup data due to data becoming corrupted from disk failure or user operation error, refer to the following for information on recovery to database multiplexing mode:

- [Action Required when All Servers or Instances Stopped](#)
- [Recovering from an Incorrect User Operation](#)

### If a temporary error occurs

If a temporary error occurs, such as due to a high load on the server or insufficient system resources, remove the cause of the error and restart Mirroring Controller, and then refer to the following for details on recovery to database multiplexing mode:

- [Operations when the Server has Started Degrading after a Switch has Occurred](#)
- [Operations when the Server has Started Degrading after a Disconnection has Occurred](#)

See

Refer to "4.1.1 Starting Mirroring Controller" and "4.1.2 Stopping Mirroring Controller" for information on restarting Mirroring Controller.

## 5.2 Action Required when Automatic Switch Fails

If the system behavior is unstable, for example there are insufficient temporary system resources, the Mirroring Controller automatic switch may fail.

Perform the switch manually using one of the following methods:

- Execute the mc\_ctl command in switch mode

Execute the mc\_ctl command in switch mode on the primary server or the standby server.

Example )

```
> mc_ctl switch -M D:\mcdire\inst1
```

Note

If the server fails during execution of the mc\_ctl command, automatic switch, or automatic disconnection, or if communication between the primary server and the standby server is lost, a message indicating that the mc\_ctl command is being executed may be output even though the command is not running elsewhere, and the command may end abnormally.

In this case, switch the server in accordance with the "Execute the mc\_ctl command in stop mode" procedure below.

- Execute the mc\_ctl command in stop mode

Execute the mc\_ctl command in stop mode on the server on which the error occurred.

Example )

```
> mc_ctl stop -M D:\mcdire\inst1
```

If the instance does not stop, refer to "Actions in Response to Failure to Stop an Instance" in the Operation Guide, and then stop the instance.

Then, specify the -e option in the mc\_ctl command to forcibly stop Mirroring Controller.

Example )

```
> mc_ctl stop -M D:\mcdire\inst1 -e
```

See

**Recovery to database multiplexing mode**

Refer to "5.1.1.2 Rebuild the Standby Server" and "5.1.1.3 Failback of the Primary Server" for information on recovery to database multiplexing mode.

---

## 5.3 Action Required when Automatic Disconnection Fails

If the system behavior is unstable, for example there are insufficient system resources such as available memory or free disk space, automatic disconnection using Mirroring Controller may not be possible.

In this case, perform the following procedure to disconnect the primary server manually.

1. On the standby server, execute the mc\_ctl command in stop mode with the -e option specified.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1 -e
```

2. On the primary server, comment out the synchronous\_standby\_names parameter in the postgresql.conf file.

Example)

```
:  
# synchronous_standby_names = 'standby1 '
```

3. Execute the pg\_ctl command in reload mode on the primary server.

Example)

```
> pg_ctl reload -D D:\database\inst1
```

 See

Refer to "pg\_ctl" in Reference for information on the command.

 See

### Recovery to database multiplexing mode

Refer to "5.1.2.2 Rebuild the Standby Server" for information on recovery to database multiplexing mode.

---

## 5.4 Action Required when All Servers or Instances Stopped

This section explains what happens when all servers or instances on the server have stopped, so jobs cannot continue.

 See

### Recovery to database multiplexing mode

Refer to "5.1.1.2 Rebuild the Standby Server" and "5.1.1.3 Failback of the Primary Server" for information on recovery to database multiplexing mode.

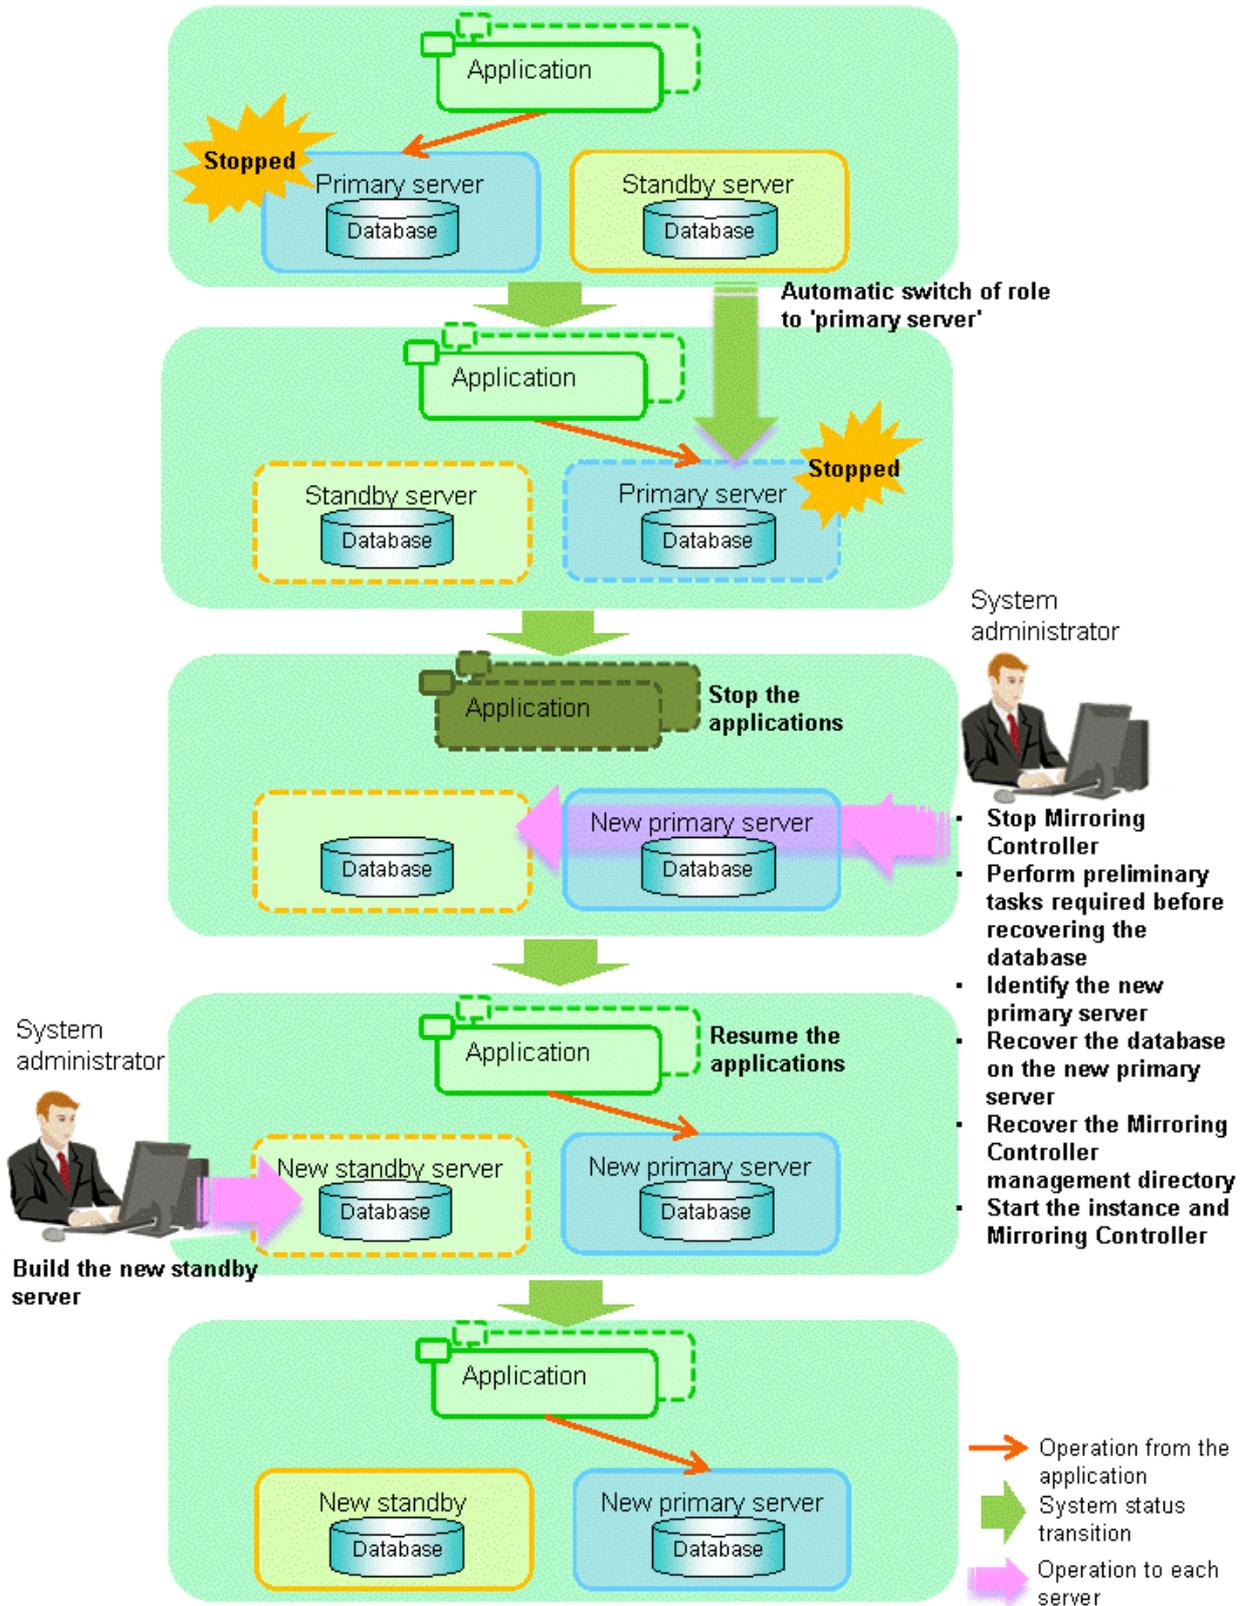

### Overview of recovery operations

After recovering the database to the state immediately prior to the failure on a specific server comprising the database multiplexing system, restore the system.

In other words, after specifying the server on which the database is to be recovered and then recovering it as the new primary server, configure all other servers as new standby servers.

The flow of these recovery operations is shown in the figure below.

Figure 5.3 Flow of recovery operations

Perform the following procedure.

### 1. Stop applications

Stop running applications.

### 2. Stop Mirroring Controller

Execute the mc\_ctl command in stop mode on all servers that comprise the database multiplexing system.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1
```

#### Forcibly stop Mirroring Controller

If Mirroring Controller does not stop, execute the mc\_ctl command in stop mode with the -e option specified.

Example)

```
> mc_ctl stop -M D:\mcdire\inst1 -e
```

### 3. Perform prerequisite tasks before recovering the database

First, refer to "Actions when an Error Occurs" in the Operation Guide, and then identify the cause of the error and perform recovery of the disk on which the failure occurred, etc.

### 4. Identify the new primary server

Perform the following operations on all servers comprising the database multiplexing system, and check the server containing the backup data that shows the latest date. This server will become the new primary server, on which the database is to be recovered.

Example)

In the example below, the pgx\_rcvall command is executed with the -l option specified and the backup data that shows the latest date is identified.

```
> pgx_rcvall -l -D D:\database\inst1
Date                Status          Dir
2013-07-01 13:30:40 COMPLETE       E:\backup\inst1\2013-07-01_13-30-40
```

### 5. Recover the database on the new primary server

Recover the database using the recovery method that uses the pgx\_rcvall command based on the backup data.

- a. Perform the following operations on all servers comprising the database multiplexing system, and check the server containing the archive log and mirrored transaction log that show the latest date.

Example)

In the example below, the archive log and mirrored transaction log that show the latest date are identified.

```
> dir /OD <backupDataStorageDir>\*_xlog
```

- b. If the server containing the latest archive log and mirrored transaction log is different to the new primary server identified in step 4, all files and directories under the directory shown below are copied and written to the backup storage destination directory on the new primary server.

Deployment destination directory of the archive log and mirrored transaction log

```
<backupDataStorageDir>\*_xlog
```

- c. Execute the `pgx_rcvall` command on the new primary server, specifying the backup storage destination directory you used in step b.

Example)

In the example below, the `pgx_rcvall` command is executed with the `-B` option specified.

```
> pgx_rcvall -B E:\backup\inst1 -D D:\database\inst1
```

See

Refer to "Actions when an Error Occurs" in the Operation Guide for information on the `pgx_rcvall` command.

6. Recover the Mirroring Controller management directory

Copy the files in the Mirroring Controller management directory from the backup data on the new primary server, and then perform the recovery.

7. Start the instance and Mirroring Controller

Start the instance and Mirroring Controller on the new primary server.

#### Enabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode with the `-f` option specified. This enables automatic switch/disconnection.

If you start Mirroring Controller and the instance without specifying the `-f` option, automatic switch/disconnection will not be enabled. To enable both, start Mirroring Controller and then execute the `mc_ctl` command in enable-failover mode, or restart Mirroring Controller with the `-f` option specified.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w -f
```

#### Disabling automatic switch/disconnection

As the instance administrator user, execute the `mc_ctl` command in start mode.

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w
```

8. Resume applications

Resume execution of applications.

9. Build the new standby server

Refer to "3.4 Setting up the Standby Server" for information on building (setting up) a standby server from the primary server.

Point

It is not necessary to repeat steps that have already been performed, such as registering to Windows services.

## 5.5 Recovering from an Incorrect User Operation

This section describes how to recover an instance when data has been corrupted due to incorrect user operation.

For example, when data has been corrupted due to incorrect user operation, such as data being unintentionally changed or deleted by an application or command, it is necessary to restore the original data on the primary server and resynchronize with the standby server.

Use the following procedure to perform recovery.

1. Identify the primary server

Execute the mc\_ctl command in status mode on each server, and search for a server for which "primary" or "none(inactivated primary)" is displayed.

2. Stop the applications and commands that caused the incorrect operation to occur

Stop applications and commands that are running on the primary server. This will minimize the impact caused by the incorrect data.

Also, if any applications used for reference by the standby server are running, stop them too.

3. Stop the instance and Mirroring Controller

Stop the instance and Mirroring Controller on both the primary server and standby server.

Example )

```
$ mc_ctl stop -a -M D:\mcdire\inst1
```

4. Recover the database on the primary server

Recover the database using the recovery method in which the pgx\_rcvall command uses the backup data to recover the database to a restore point prior to the time when the incorrect operation was performed.

See

Refer to "Recovering from an Incorrect User Operation" in the Operation Guide for information on using the pgx\_rcvall command to recover the database to a restore point, and then perform only the database recovery procedure while the instance is in a stop state.

5. Start the instance and Mirroring Controller

Start the instance and Mirroring Controller on the primary server.

Enabling automatic switch/disconnection

As the instance administrator user, execute the mc\_ctl command in start mode with the -f option specified. This enables automatic switch/disconnection.

If you start Mirroring Controller and the instance without specifying the -f option, automatic switch/disconnection will not be enabled. To enable both, start Mirroring Controller and then execute the mc\_ctl command in enable-failover mode, or restart Mirroring Controller with the -f option specified.

Example )

```
> mc_ctl start -M D:\mcdire\inst1 -w -f
```

Disabling automatic switch/disconnection

As the instance administrator user, execute the mc\_ctl command in start mode.

Example )

```
> mc_ctl start -M D:\mcdire\inst1 -w
```

6. Build the new standby server

Refer to "3.4 Setting up the Standby Server" for information on building (setting up) a standby server from the primary server.

Point

It is not necessary to repeat steps that have already been performed, such as registering to Windows services.

# Chapter 6 Managing Mirroring Controller Using WebAdmin

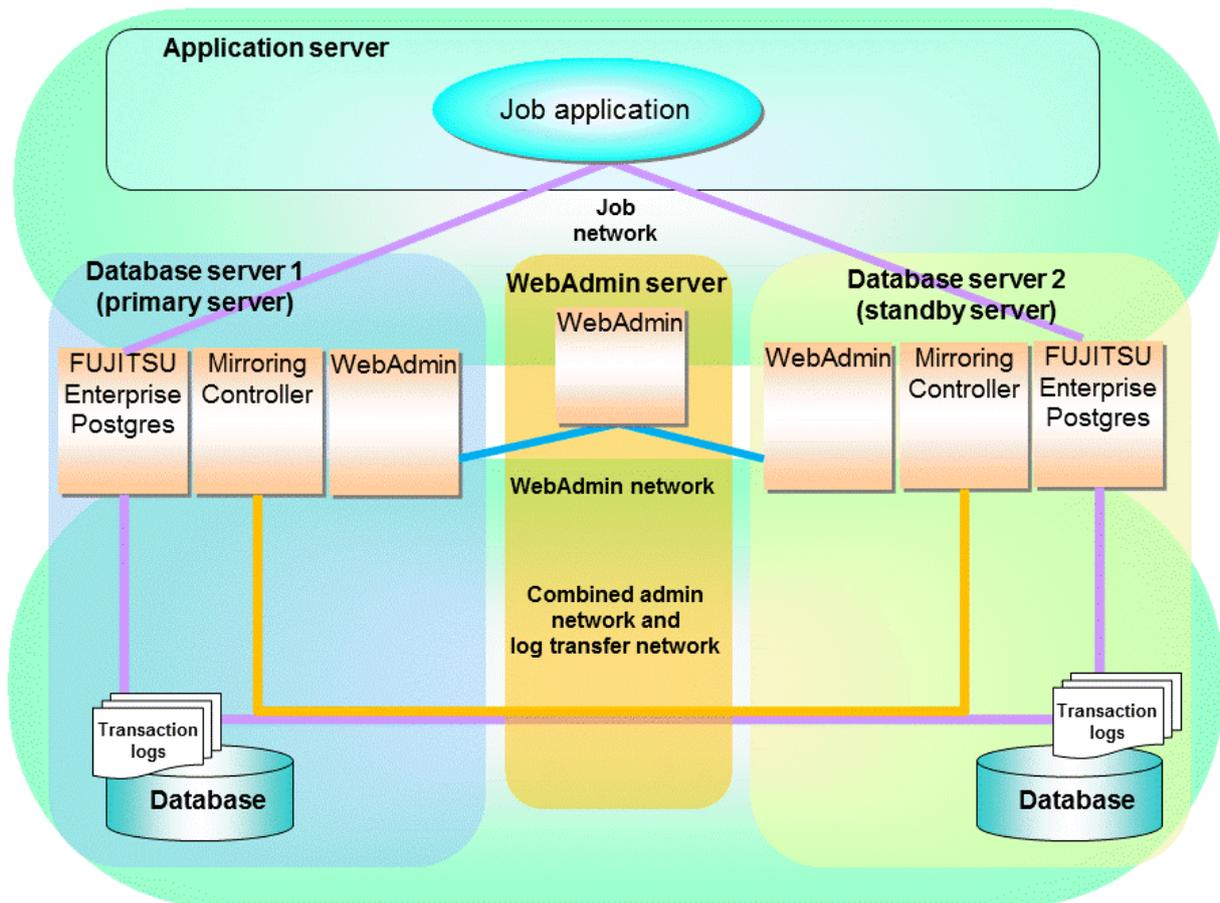

This chapter describes how to set up and manage Mirroring Controller in a streaming replication cluster using WebAdmin.

Mirroring Controller can be used to monitor a streaming replication cluster and perform automatic switching or disconnect synchronous replication when there is an error.

WebAdmin can be used to set up Mirroring Controller in an existing replication cluster having master and synchronous standby instances.

The configuration of the database multiplexing system built using WebAdmin is shown below:

Figure 6.1 Configuration of database multiplexing operation system using WebAdmin

## Point

- If Mirroring Controller is set up to the replication cluster using WebAdmin, the network with the host name (or IP address) specified in [Host name] will be used as the admin network and the log transfer network.
- To use a network other than the job network as the log transfer network, before building the replication cluster specify a host name other than the job network one in [Host name].

## 6.1 Mirroring Controller Setup

Perform the following procedure to setup Mirroring Controller in a streaming replication cluster. The option for this setup is accessible only in synchronous standby instance.

1. In the [Instances] tab, select the synchronous standby instance on which Mirroring Controller needs to be set up.
2. Click .

3. Enter the information for the Mirroring Controller to be setup.

In the example below, Mirroring Controller is being setup for the replication cluster having master instance "inst1" and standby instance "inst1s".

The screenshot displays the 'Mirroring Controller setup' page in the Fujitsu Enterprise Postgres administration console. The page is divided into two main sections: 'Mirroring Controller setup for master instance' and 'Mirroring Controller setup for standby instance'. Each section contains a table of configuration parameters. The 'Enable automatic switch over' option is set to 'Yes'. The master instance (inst1) is configured with port 27500 and localhost, while the standby instance (inst1s) is configured with port 27502 and FASTDEVVMS. Both instances share the same Mirroring Controller port (27505) and management directory (c:\temp\mcdir\inst1/inst1s). Heartbeat settings are consistent for both instances: 800ms interval, 1s timeout, and 2 retries.

| Mirroring Controller setup for master instance |                     |
|--|---------------------|
| Instance name                                  | inst1               |
| Instance port                                  | 27500               |
| Instance host                                  | localhost           |
| Mirroring Controller port *                    | 27505               |
| Mirroring Controller management directory *    | c:\temp\mcdir\inst1 |
| Heartbeat interval (in milliseconds) *         | 800                 |
| Heartbeat timeout (in seconds) *               | 1                   |
| Heartbeat retry *                              | 2                   |

| Mirroring Controller setup for standby instance |                      |
|---|----------------------|
| Instance name                                   | inst1s               |
| Instance port                                   | 27502                |
| Instance host                                   | FASTDEVVMS           |
| Mirroring Controller port *                     | 27505                |
| Mirroring Controller management directory *     | c:\temp\mcdir\inst1s |
| Heartbeat interval (in milliseconds) *          | 800                  |
| Heartbeat timeout (in seconds) *                | 1                    |
| Heartbeat retry *                               | 2                    |

The instance name, host address and port of the master and standby instances are displayed for easy reference.

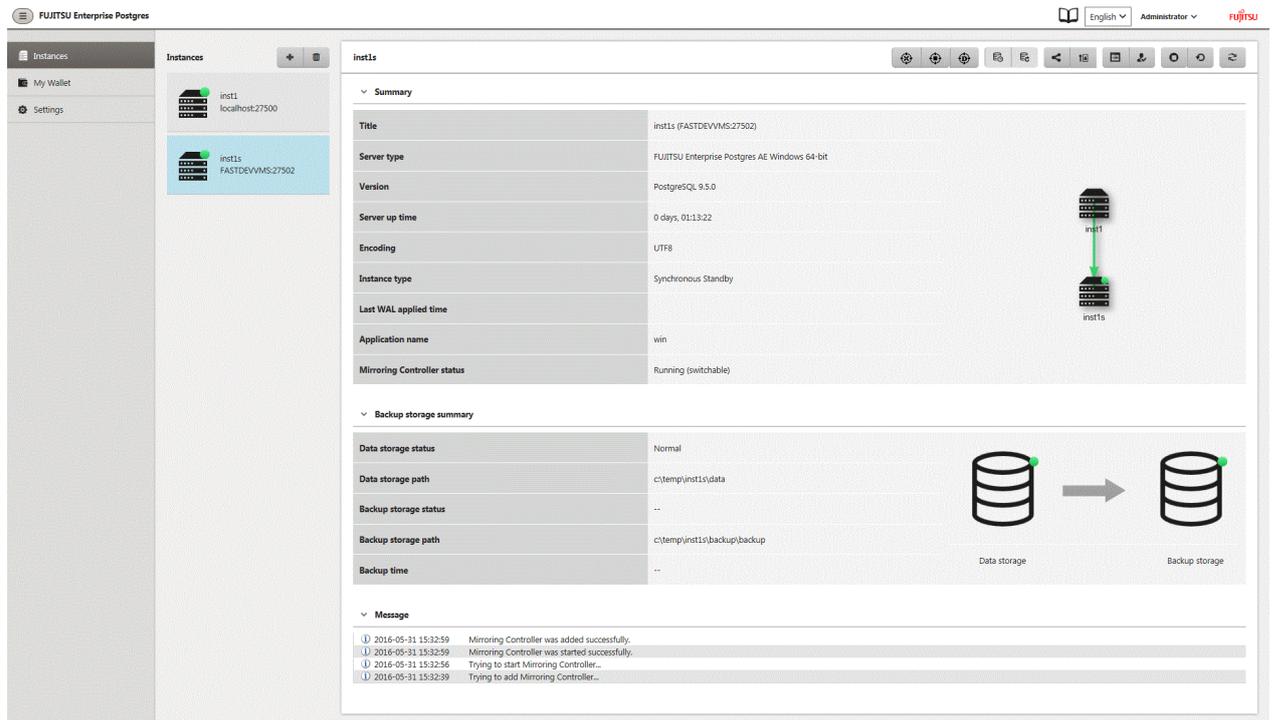

Enter the following items on master instance and on standby instance fields for Mirroring Controller setup, as shown in the above screenshot:

- [Enable automatic switch over]: Toggles the automatic switch/disconnection functionality. Select "Yes". The default is "No".
- [Mirroring Controller port]: Port number of Mirroring Controller.
- [Mirroring Controller management directory]: Directory where the Mirroring Controller configuration files will be stored.
- [Heartbeat interval (in milliseconds)]: Number of milliseconds between two consecutive heartbeat checks. The default is "800".
- [Heartbeat timeout (in seconds)]: Number of seconds for the heartbeat timeout. The default is "1".
- [Heartbeat retry]: Number of retries for heartbeat monitoring, before failover occurs. The default is "2".

4. Click  to setup Mirroring Controller.

5. Upon successful completion, Mirroring Controller will be started on master and standby instances.

In the [Instances] tab, select "inst1s". The following page will be displayed, with the Mirroring Controller status:

## 6.2 Stopping Mirroring Controller

Mirroring Controller can be stopped either in master instance or in standby instance using WebAdmin.

Perform the following procedure to stop Mirroring Controller.

1. In the [Instances] tab, select the instance where to stop Mirroring Controller.
2. Click .
3. In the confirmation dialog box, click [Yes].

Mirroring Controller will be stopped on the selected instance. The Mirroring Controller status will be updated, and a confirmation message entry will be displayed in the [Message] section.

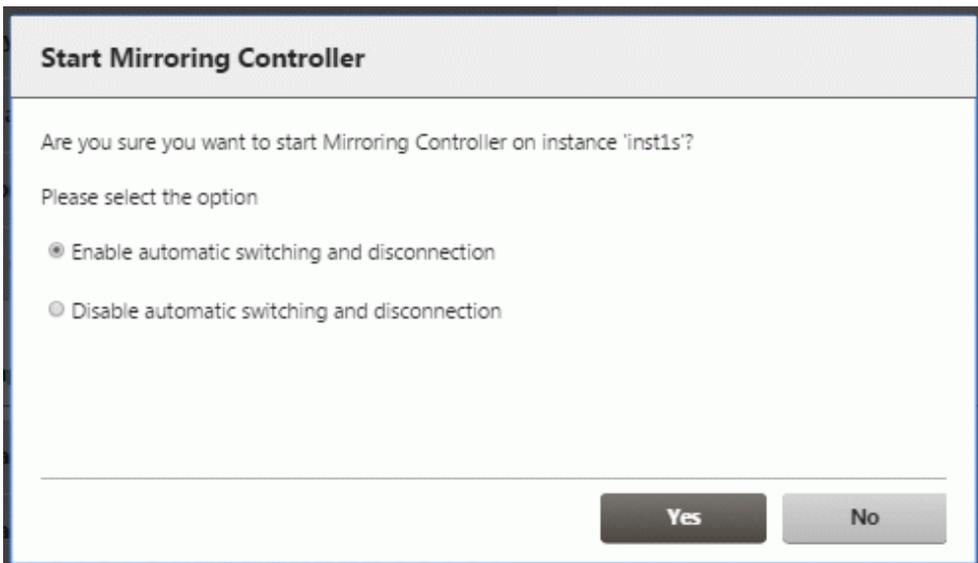

## 6.3 Starting Mirroring Controller

Mirroring Controller can be started either in master instance or in standby instance using WebAdmin.

Perform the following procedure to start Mirroring Controller.

1. In the [Instances] tab, select the instance where to start Mirroring Controller.
2. Click .

3. In the confirmation dialog box, select the desired failover mode.

4. In the confirmation dialog box, click [Yes].

Mirroring Controller will be started on the selected instance. The Mirroring Controller status will be updated, and a confirmation message entry will be displayed in the [Message] section.

## 6.4 Disabling Failover Mode

---

Disabling failover mode in Mirroring Controller disables automatic switch/disconnection between master and standby instances.

Perform the following procedure to disable failover mode.

1. In the [Instances] tab, select the instance.
2. Click .
3. In the confirmation dialog box, click [Yes].

Failover mode will be disabled in Mirroring Controller. The Mirroring Controller status will be updated and a confirmation message entry will be displayed in the [Message] section.

## 6.5 Enabling Failover Mode

---

Enabling failover mode in Mirroring Controller enables automatic switch/disconnection between master and standby instances.

Perform the following procedure to enable failover.

1. In the [Instances] tab, select the instance.
2. Click .
3. In the confirmation dialog box, click [Yes].

Failover mode will be enabled in Mirroring Controller. The Mirroring Controller status will be updated and a confirmation message entry will be displayed in the [Message] section.

## 6.6 Deleting Mirroring Controller Setup

---

Deleting Mirroring Controller setup removes its setup from master and standby instances.

1. In the [Instances] tab, select the instance.

2. Click .
3. In the confirmation dialog box, click [Yes].

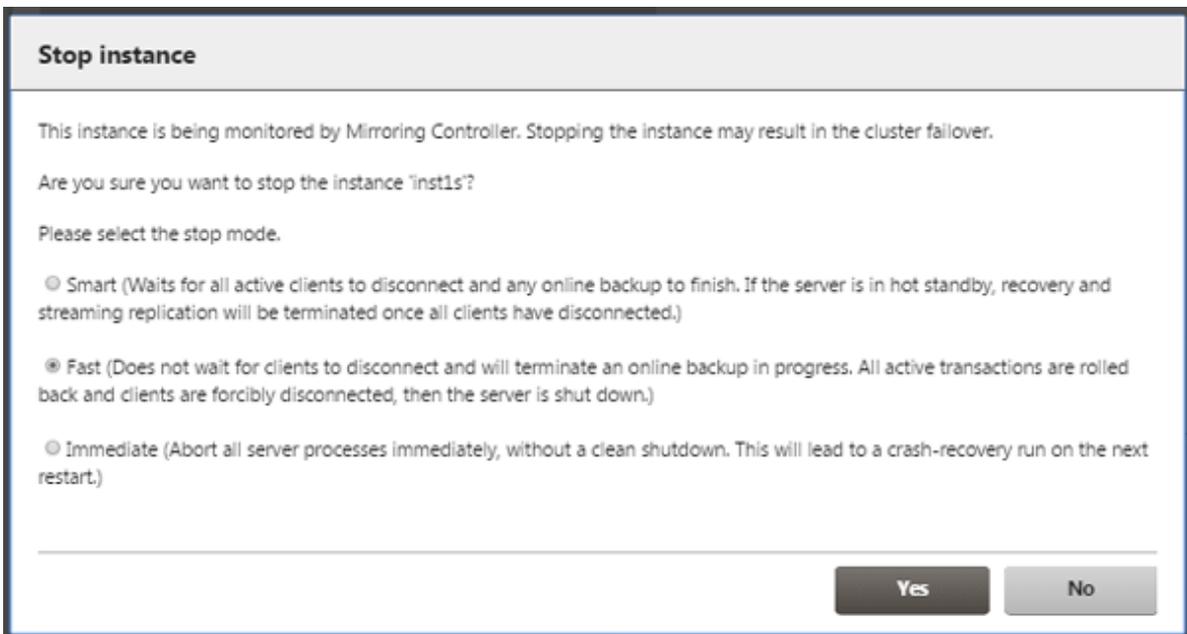

Mirroring Controller setup will be removed from the cluster. The cluster status will be updated and a confirmation message entry will be displayed in the [Message] section.

## 6.7 Status Update after Failover

When Mirroring Controller performs a failover, standby instance will be promoted to standalone instance. The Mirroring Controller setup will be removed from both standby and master instances.

The following scenario describes one of the ways in which failover can be triggered, and the results achieved by the use of Mirroring Controller in WebAdmin.

1. In the [Instances] tab, select the master instance "inst1".
2. Click .
3. In the confirmation dialog box, the warning "This instance is being monitored by Mirroring Controller. Stopping the instance may result in the cluster failover." is displayed.

4. Choose the stop mode and click [Yes].  
In the server, the following takes place:
  - a. The master instance is stopped.
  - b. Failover is triggered in Mirroring Controller.
  - c. The Mirroring Controller setup is removed from both master and standby instances
  - d. Standby instance is promoted to standalone.
5. When the instance is refreshed in WebAdmin, the latest status of the instances will be displayed.

## 6.8 Action Required when an Error Occurs in the Combined Admin Network and Log Transfer Network

---

Communication errors may temporarily occur in the network used as the admin network and log transfer network due to reasons such as high load on the server or insufficient system resources. Because of this, there is a risk of causing a split-brain situation by mistake even though the server has no issues.

Split brain refers to a situation where data update is performed on both servers because they both work as a primary server temporarily.

### How to detect split brain using WebAdmin

If the conditions below are met, split brain may occur. Refer to "[Split-brain detection method](#)" and "[How to recover from a split-brain](#)" in "[3.8.4 Tuning for Optimization of Degrading Operation Using Abnormality Monitoring](#)" and take the actions described.

1. A standby instance is selected in the [Instances] tab, and
2. "Standalone" is displayed in [Instance type], and
3. A primary instance is selected in the [Instances] tab, and
4. "Standalone" is displayed in "Standalone".

The admin network is important because Mirroring Controllers use it to confirm the status of each server.

The log transfer network is also important to maintain the data freshness.

Therefore, use network configurations resistant to faults for these networks by using the network redundancy channel bonding feature provided by the operating system or network driver vendor.

---

# Appendix A Parameters

This appendix describes the configuration files and parameters required by the database multiplexing mode.

See

Refer to "Server Configuration" in the PostgreSQL Documentation for information on the postgresql.conf file.

## A.1 Parameters Set on the Primary Server

The content for the parameters set in the postgresql.conf file of the primary server is shown in the table below.

Table A.1 postgresql.conf file

| Parameter                 | Value set                     | Explanation   |
|---------------------------|-------------------------------|---|
| wal_level                 | Literal "hot_standby"         | Specify the output level for the transaction log.<br>Specify "hot_standby".   |
| max_wal_senders           | Number of standby servers + 1 | Specify the number of standby servers + 1.<br>In FUJITSU Enterprise Postgres, 1:1 standby is used, so specify 2.  |
| synchronous_standby_names | ' <i>standbyServerName</i> '  | Use single quotation marks (') to enclose the name that will identify the standby server. Any name can be specified.<br>Do not change this parameter while Mirroring Controller is running.   |
| hot_standby               | on                            | Specify whether queries can be run on the standby server.<br>Specify this to execute reference jobs on the standby server. (*1)   |
| wal_keep_segments         | Number of file segments       | If a delay exceeding the value set in this parameter occurs, the WAL segment required later by the primary server may be deleted.<br>Additionally, if you stop a standby server (for maintenance, for example), consider the stop time and set a value that will not cause the WAL segment to be deleted.<br>Setting this parameter requires consideration regarding stabilization of the database multiplexing mode (refer to " <a href="#">3.8.1 Tuning to Stabilize the Database Multiplexing Mode</a> " for details).<br>Refer to "Estimating Transaction Log Space Requirements" in the Installation and Setup Guide for Server for information on estimating the WAL segment. |
| wal_sender_timeout        | Timeout (milliseconds)        | Specify the time period after which it is determined that the receiver process (walreceiver) of the transaction log is in an abnormal state on the primary server.<br>The specified value must be larger than the value set for the wal_receiver_status_interval parameter set in the postgresql.conf file of the standby server.<br>By aligning this value with the value of $(\text{heartbeat\_interval} + \text{heartbeat\_timeout}/1000) \times (\text{heartbeat\_retry} + 1)$ of the <i>serverIdentifier.conf</i> file, you  |

| Parameter          | Value set   | Explanation  |
|--------------------|---|--|
|                    |   | can unify the time after which it is determined that an error has occurred.  |
| archive_mode       | on  | Specify the archive log mode.  |
| archive_command    | 'cmd /c ""installDir\bin\<br>\pgx_xlogcopy.cmd" "%p"<br>"backupDataStorageDestinationDir<br>\archived_xlog\%f"'   | Specify the command and storage destination to save the transaction log.   |
| backup_destination | Backup data storage destination directory   | Specify the name of directory where to store the backup data.<br><br>Set the permissions so that only the instance administrator user can access the specified directory.<br><br>Specify the same full path on all servers, so that the backup data of other servers can be used to perform recovery.  |
| listen_addresses   | Primary server IP address, host name, or "*"  | Specify the IP address or host name of the primary server. Specify the IP address or corresponding host name that will be used to connect to the log transfer network.<br><br>The content specified is also used to allow connections from client applications.<br><br>To receive the connection and the transaction log from any client or standby server, specify "*".<br><br>Refer to "Connections and Authentication" in the PostgreSQL Documentation for details. |
| max_connections    | The limit value for the number of standby server connections + number of simultaneous executions of mc_ctl status (*2) + 2 + number of simultaneous client connections to the instance + superuser_reserved_connections value | The value specified is also used to restrict the number of connections from client applications and the number of connections for the management of instances.<br><br>Refer to "When an Instance was Created with the initdb Command" in the Installation and Setup Guide for Server, and "Connections and Authentication" in the PostgreSQL Documentation, for details.   |

\*1: Mandatory to use the Mirroring Controller.

\*2: Number of simultaneous executions of the mc\_ctl command in the status mode.

## A.2 Parameters Set on the Standby Server

This section explains the content of the file and parameters set on the standby server. After editing postgresql.conf file, start the instance.

The content for the parameters specified in postgresql.conf file is shown in the table below.

Table A.2 postgresql.conf file

| Parameter                 | Value set           | Explanation   |
|---------------------------|---------------------|---|
| synchronous_standby_names | 'primaryServerName' | Use single quotation marks (') to enclose the name that will identify the primary server. Any name can be specified.<br><br>This name will be required to rebuild the original primary server as the new standby server after the primary server was switched.<br><br>Do not change this parameter while Mirroring Controller is running. |

| Parameter            | Value set   | Explanation   |
|----------------------|---|---|
| backup_destination   | Backup data storage destination directory   | Specify the name of the backup data storage directory.<br><br>Set the permissions so that only the instance administrator user can access the specified directory.<br><br>Specify the same full path on all servers so that the backup data of other servers can be used to perform recovery.   |
| archive_command      | 'cmd /c ""installDir\bin\<br>\pgx_xlogcopy.cmd" "%p"<br>"backupDataStorageDestinationD<br>ir\archived_xlog\%f"' | Specify the command and storage destination to save the transaction log.  |
| wal_receiver_timeout | Timeout (milliseconds)  | Specify the time period after which it is determined that an error has occurred in the transaction log transfer on the standby server.<br><br>By aligning this value with the value of (heartbeat_interval + heartbeat_timeout) x heartbeat_retry of the <i>serverIdentifier.conf</i> file, you can unify the time after which it is determined that an error has occurred. |

## A.3 Network Configuration File

Define the network configuration that will link the Mirroring Controller processes in the network configuration file (network.conf file).

Define the same content on the primary server and standby server.

Table A.3 network.conf file

| Format specified   | Explanation  |
|--|--|
| <i>serverIdentifier hostName portNumber</i><br><i>Or</i><br><i>serverIdentifier ipAddress portNumber</i> | Specify any identifier (*1) for the server, a host name (or IP address), and port number (*2), using a space as the separator.<br><br>Specify the IP address or corresponding host name (*3) that will be used to connect to the admin network.<br><br>Define the same content on the primary server and standby server.<br><br>Example)<br><br>The literal <i>&lt;space&gt;</i> represents a space.<br><br>[For IPv4]<br><br>server1 <i>&lt;space&gt;</i> 192.0.2.100 <i>&lt;space&gt;</i> 27540<br><br>server2 <i>&lt;space&gt;</i> 192.0.2.110 <i>&lt;space&gt;</i> 27540<br><br>[For IPv6]<br><br>server1 2001:258:8404:1217:250:56ff:fea7:559f 27000<br><br>server2 2001:258:8404:1217:250:56ff:fea7:55a0 27100 |

\*1: The maximum length of the server identifier is 64 bytes. Use ASCII characters excluding spaces to specify this parameter.

\*2: The port number must be 0 to 65535. Ensure that the port number does not conflict with other software. Do not specify an ephemeral port that may temporarily be assigned by another program. Note that the value specified in this parameter must also be set in the services file.

\*3: Use ASCII characters excluding spaces to specify the host name.

## A.4 Server Configuration File

Define the information related to Mirroring Controller monitoring and control in the serverIdentifier.conf file. The maximum length of the server identifier is 64 bytes. Use ASCII characters excluding spaces to specify this parameter.

If the primary server and standby server environments are different, define content that is different, according to the environment.

Table A.4 serverIdentifier.conf file

| Parameter                | Value set   | Explanation   |
|--------------------------|---|---|
| db_instance              | <i>'dataStorageDestinationDir'</i><br>[Example]<br>db_instance = 'D:\\database1\\inst1' | Use halfwidth single quotation marks (') to enclose the data storage destination directory that will identify the monitoring target instance.<br><br>Use ASCII characters, and specify "\\" as the path delimiter.  |
| db_instance_service_name | <i>'registeredServiceNameOfFujitsuEnterprisePostgresInstance'</i>                       | Specify the registered service name of the FUJITSU Enterprise Postgres instance in the Windows service.<br><br>Use ASCII characters to specify this parameter.  |
| db_instance_password     | <i>'passwordOfInstanceAdminUser'</i>  | Specify the password used when Mirroring Controller connects to a database instance. Use ASCII characters to specify this parameter.<br><br>If password authentication is performed, you must specify this parameter in the settings used when Mirroring Controller connects to a database instance.<br><br>If you specify this parameter when password authentication is not performed, the parameter will be ignored. |
| remote_call_timeout      | Admin communication timeout   | Specify the timeout value (milliseconds) of the Mirroring Controller agent process for communication between servers.<br><br>Specify a value between 0 and 2147483647.<br><br>The value 0 indicates that there is no timeout limit.<br><br>The default is 70000 milliseconds (70 seconds).  |
| core_file_path           | <i>coreFileOutputDir</i>  | Specify the directory to which the core file is to be output. Use ASCII characters, and specify "\\" as the path delimiter.<br><br>If this parameter is omitted, it will be assumed that the Mirroring Controller management directory was specified.   |
| mc_service_name          | <i>'registeredServiceNameOfMirroringController'</i>                                     | Specify the Mirroring Controller service name registered in the Windows service. Use ASCII characters excluding forward slash (/) and backslash (\) to specify this parameter.<br><br>The maximum length of the service name is 124 bytes.<br><br>The default is 'MirroringControllerOpen'.   |
| event_source(*1)         | <i>'eventSourceName'</i>  | Specify the event source name to be used to identify the Mirroring Controller message in the event log. Use ASCII characters to specify this parameter.<br><br>The maximum length of the event source name is 255 bytes.<br><br>The default is 'MirroringControllerOpen'.   |

| Parameter          | Value set   | Explanation   |
|--------------------|---|---|
| heartbeat_interval | Interval time for operating system/server and process heartbeat monitoring, and disk abnormality monitoring (milliseconds)        | Contact between servers, and abnormality monitoring, will be performed at the specified interval.<br>Specify a value between 1 and 2147483647.<br>The default is 800 milliseconds.  |
| heartbeat_timeout  | Timeout time for operating system/server and process heartbeat monitoring, and disk abnormality monitoring (seconds)              | If there is no response for at least the number of seconds specified, it will be assumed that an error has occurred that requires the primary server to be switched, or the standby server to be disconnected.<br>Specify a value between 1 and 2147483647.<br>The default is 1 second.   |
| heartbeat_retry    | Number of retries for operating system/server and process heartbeat monitoring, and disk abnormality monitoring (number of times) | Specify the number of retries when an error has been detected that requires the primary server to be switched, or the standby server to be disconnected.<br>If an error is detected in succession more than the specified number of times, switch or disconnection will be performed.<br>Specify a value between 0 and 2147483647.<br>The default is 2 times. |

\*1: By using an event source name that is similar to the specified event\_source parameter of the postgresql.conf file, the Mirroring Controller output content can be referenced transparently, so log reference is easy.

# Appendix B Supplementary Information on Building the Primary Server and Standby Server on the Same Server

The primary server and standby server can be pseudo-configured on the same server for system testing, for example. Out of consideration for performance and reliability, do not use this type of configuration for any other purposes. For this reason, do not use this type of configuration in a production environment.

Note that the setup and operations is the same as if the primary and standby servers are built on different servers.

This appendix provides supplementary information explaining how to configure the primary server and standby server on the same server.

## B.1 Backup Data Storage Destination Directory

It is not a problem if the same backup data storage destination directory is used on the primary server and standby server.

## B.2 Registering Service Names and Event Source Names in the Windows Service

Ensure that the following names of resources to be registered on the operating system by FUJITSU Enterprise Postgres and Mirroring Controller are not duplicated between the primary server and standby server:

- Service name registered in the Windows service
- Event source name

## B.3 How to Execute the mc\_ctl Command

When executing the mc\_ctl command, specify the server identifier in the --local-server option in order to identify the operation destination server.

Below is an example of starting Mirroring Controller of the server "server1" defined in the network.conf file. For mc\_ctl command operations using another mode, also specify the --local-server option.

Define two server identifiers for the same IP address with different port numbers in the network.conf file.

Example)

```
server1 192.0.2.100 27540
server2 192.0.2.100 27541
```

Ensure that the port numbers of both primary server and standby server do not conflict with any other software.

Enabling automatic swith/disconnection

Start Mirroring Controller of the server "server1":

Example)

```
> mc_ctl start -M D:\mcdire\inst1 -w -f --local-server server1
```

Stop Mirroring Controller of the server "server1":

Example)

```
> mc_ctl stop -M D:\mcdire\inst1 --local-server server1
```

Disabling automatic swith/disconnection

Start Mirroring Controller of the server "server1":

Example)

```
> mc_ctl start -M D:\mdir\inst1 -w --local-server server1
```

Stop Mirroring Controller of the server "server1":

Example)

```
> mc_ctl stop -M D:\mdir\inst1 --local-server server1
```

## Note

To specify the mc\_ctl command with register mode, for registering to the Windows service, and the mc\_ctl command with unregister mode, for unregistering from the Windows service, add the --local-server option.

# Appendix C Supplementary Procedure on Configuring for Operation in Database Multiplexing Mode

This appendix explains a supplementary procedure on the configuration required for operation in database multiplexing mode.

## C.1 Security Policy Settings

---

This section explains how to configure the security settings to enable an operating system user account designated as an instance administrator user to log on as a service.

### 1. Displaying the [Local Security Policy] window

In Windows, select [Administrative Tools], and then click [Local Security Policy].

### 2. Setting up security

1. In the [Local Security Policy] window, select [Security Settings], select [Local Policies], and then click [User Rights Assignment].
2. Under [Policy] in the [User Rights Assignment] window, double-click [Log on as a service].
3. In the [Log on as a service Properties] window, set the following:
  - a. Select the [Local Security Setting] tab.
  - b. On the [Local Security Setting] tab, click [Add User or Group].
  - c. In the [Select Users or Groups] window, enter the operating system user account of the instance administrator user in [Enter the object names to select].
  - d. Click [OK].
4. In the [Log on as a service Properties] window, click [OK].
5. From the [Local Security Policy] tree, click [Local Policies], and then double-click [Security Options].
6. Scroll down and double-click [User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode].
7. From the drop-down menu, select the "Elevate without prompting" in the [Local Security Setting] tab.
8. Click [OK].

## C.2 Windows Firewall Settings

---

This section explains how to enable the port number used by Mirroring Controller, if the Windows firewall feature is enabled.

### Windows Server(R) 2008:

1. In the [Start] menu, click [Control Panel].
2. Click [Security] and then click [Windows Firewall].
3. In the [Windows Firewall] window, click [Change settings].
4. On the [Exceptions] tab, click [Add port].
5. In the [Add a Port] window, set the following:
  - a. In [Name], specify any name.
  - b. In [Port number], specify the port number defined in the network definition file.
  - c. Select [TCP].
6. Click [OK].
7. On the [Exceptions] tab, in the [Program or port] list, check if the added port is enabled.

8. In the [Windows Firewall] window, click [OK].

### **Windows Server (R) 2008 R2:**

1. In the [Start] menu, click [Control Panel].
2. Click [System and Security], and then click [Windows Firewall].
3. In the [Windows Firewall] window, click [Advanced settings] on the left side of the window.
4. In the [Windows Firewall with Advanced Security] window, click [Inbound Rules] on the left side of the window.
5. Click [New Rule] on the right side of the window.
6. In the [New Inbound Rule Wizard] window, select [Port], and then click [Next].
7. Select [TCP] and [Specific local ports], then specify the port number defined in the network definition file, and then click [Next].
8. Select [Allow the connection], and then click [Next].
9. Select the profiles for which this rule applies, and then click [Next].
10. In [Name], specify any name, and then click [Finish].
11. In the [Windows Firewall with Advanced Security] window, check if the added rule is enabled under [Inbound Rules] in the center of the window.

### **Windows Server(R) 2012 or Windows Server(R) 2012 R2:**

1. Right-click the [Start] window, and then click [All apps] that is displayed at the bottom-right of the window. In the [Apps] window, click [Control Panel].
2. Click [Windows Firewall].
3. In the [Windows Firewall] window, click [Advanced settings] on the left side of the window.
4. In the [Windows Firewall with Advanced Security] window, click [Inbound Rules] on the left side of the window.
5. Click [New Rule] on the right side of the window.
6. In the [New Inbound Rule Wizard] window, select [Port], and then click [Next].
7. Select [TCP] and [Specific local ports], then specify the port number defined in the network definition file, and then click [Next].
8. Select [Allow the connection], and then click [Next].
9. Select the profiles for which this rule applies, and then click [Next].
10. In [Name], specify any name, and then click [Finish].
11. In the [Windows Firewall with Advanced Security] window, check if the added rule is enabled under [Inbound Rules] in the center of the window.

# Glossary

---

## Archive log

Contains the history of updates made to the database, and is used during recovery.

## Backup data storage destination

The directory that stores the backup data.

## Client command

A command that is executed from the client machine and used. Also known as a client application.

## Data storage destination

The directory that stores the database clusters.

## Database cluster

The database storage area on the database storage disk. Database clusters are a collection of databases managed by an instance.

## Data masking

A feature that can change the returned data for queries generated by applications, to prevent exposing actual data.

## Database multiplexing

Mechanism in which a database is made redundant on multiple servers, by transferring transaction logs (WAL) via the network to enable application jobs to be continued.

## Database superuser

A user defined in the database with access privileges for all database objects.

## Encoding

Indicates the character set.

## Instance

A series of server processes for managing database clusters.

## Instance administrator

The OS user account that owns the database cluster files and operates the database server processes.

## Instance name

Indicates the instance name.

## Masking policy

A method of changing data under specific conditions when it is returned for a query from an application. You can configure masking target, masking type, masking condition and masking format.

## Mirrored transaction log

The log that mirrors the transaction log at the backup data storage destination.

## Primary server

The server that processes the main database jobs during multiplexed database operation.

---

## Server command

A command used on the database server. Also known as a server application.

---

## Standby server

A server that generates a replicated database synchronized with the primary server, and that can run as an alternative server in case the primary server fails during multiplexed database operation.

---

## Transaction log

Contains the history of updates made to the database by transactions. Also known as the WAL (Write-Ahead Log).

---

## Transaction log storage destination

The directory that stores the transaction log.

---

## VCI (Vertical Columnar Index)

An index with columnar data structure suitable for aggregation.

---

## WAL (Write-Ahead Log)

Has the same meaning as 'transaction log'.

---

# FUJITSU Enterprise Postgres 9.5

## Reference Guide

Windows/Linux

J2UL-2120-01ENZO(00)  
June 2016

# Preface

---

## Purpose of This Document

This document is a command reference, and explains FUJITSU Enterprise Postgres commands and options with features expanded on from PostgreSQL.

## Intended Readers

This document is aimed at people who manage and operate FUJITSU Enterprise Postgres. Readers of this document are also assumed to have general knowledge of:

- PostgreSQL
- SQL
- Linux
- Windows

L

W

## Structure of This Document

This document is structured as follows:

### [Chapter 1 Command List and Specification Format](#)

Lists commands and describes their specification format.

### [Chapter 2 Client Commands](#)

Explains options not listed in "PostgreSQL Client Applications" in the PostgreSQL Documentation.

### [Chapter 3 Server Commands](#)

Explains commands and options not listed in "PostgreSQL Server Applications" in the PostgreSQL Documentation.

### [Chapter 4 Mirroring Controller Commands](#)

Explains the Mirroring Controller commands

### [Chapter 5 PL/extJava Commands](#)

Explains the PL/extJava commands.

## How to Read This Document

Examples in this document are predominantly for UNIX/Linux.

For Windows, replace values (such as paths in the examples) as appropriate.

## Export Restrictions

If this document is to be exported or provided overseas, confirm legal requirements for the Foreign Exchange and Foreign Trade Act as well as other laws and regulations, including U.S. Export Administration Regulations, and follow the required procedures.

## Issue Date and Version

# Chapter 1 Command List and Specification Format

This chapter lists commands and describes their specification format.

## 1.1 Command List

This chapter lists commands and options not explained in "PostgreSQL Client Applications" or in "PostgreSQL Server Applications" in the PostgreSQL Documentation.

### 1.1.1 Client Commands

The commands below have options not explained in "PostgreSQL Client Applications" in the PostgreSQL Documentation.

| Command                    | Functional overview                                      |
|----------------------------|--|
| <a href="#">pg_dumpall</a> | Extract a PostgreSQL database cluster into a script file |

### 1.1.2 Server Commands

The commands below have options not explained in "PostgreSQL Server Applications" in the PostgreSQL Documentation.

| Command                  | Functional overview                                     |
|--------------------------|---|
| <a href="#">pg_ctl</a>   | Initialize, start, stop, or control a PostgreSQL server |
| <a href="#">postgres</a> | PostgreSQL database server                              |

The commands below are not explained in "PostgreSQL Server Applications" in the PostgreSQL Documentation.

| Command  | Functional overview  |
|--|--|
| <a href="#">pgx_dmpall</a>   | Backs up the data directory, tablespaces, and configuration files.   |
| <a href="#">pgx_keystore</a>   | Manages keystore   |
|  <a href="#">pgx_pclrsc</a> | Register, unregister, or display FUJITSU Enterprise Postgres database cluster with PRIMECLUSTER as resource of PRIMECLUSTER. |
| <a href="#">pgx_rcvall</a>   | Recovers the data directory, tablespaces, and configuration files.   |

### 1.1.3 Mirroring Controller Commands

Mirroring Controller has the following commands:

| Command                | Functional overview  |
|------------------------|--|
| <a href="#">mc_ctl</a> | Start and stop Mirroring Controller, switch/disconnect the server, display the server status, build the standby server, or register and unregister from the Windows services |

### 1.1.4 PL/extJava Commands

PL/extJava has the following commands:

| Command                    | Functional overview                |
|----------------------------|------------------------------------|
| <a href="#">pgx_jadmin</a> | Setup and operation of PL/extJava. |

## 1.2 Command Specification Format

---

The table below shows the command specification format.

| Item | Explanation  |
|------|--|
| [ ]  | Indicates optional element.                          |
| ...  | Indicates that the item can be specified repeatedly. |

# Chapter 2 Client Commands

This chapter explains options not listed in "PostgreSQL Client Applications" in the PostgreSQL Documentation.

## 2.1 pg\_dumpall

---

### Name

`pg_dumpall` -- Extract a PostgreSQL database cluster into a script file

### Synopsis

`pg_dumpall` [*connecti onOpti on...*] [*opti on...*]

### Options

`--no-tablespace-encryption`

Do not output commands to encrypt tablespaces. Running the generated SQL script will restore the originally encrypted data without being encrypted.

### See

Refer to "pg\_dumpall" in the PostgreSQL Documentation for details.

## Chapter 3 Server Commands

This chapter explains commands and options not listed in "PostgreSQL Server Applications" in the PostgreSQL Documentation.

### 3.1 pg\_ctl

---

#### Name

pg\_ctl -- Initialize, start, stop, or control a PostgreSQL server

#### Synopsis

```
pg_ctl start [-w] [-t seconds] [-s] [-D datadir] [-l filename]
           [-o options] [-p path] [-c] [--keystore-passphrase]

pg_ctl restart [-w] [-t seconds] [-s] [-D datadir] [-c]
              [-m s[mart] | f[ast] | i[mmediate]] [-o options]
              [--keystore-passphrase]
```

#### Options

--keystore-passphrase

Prompt for the passphrase to open the keystore.

#### See

Refer to "pg\_ctl" in the PostgreSQL Documentation for details.

### 3.2 pgx\_dmpall

---

#### Name

pgx\_dmpall - Backs up the data directory, tablespaces, and configuration files.

#### Synopsis

```
pgx_dmpall [option...]
```

#### Description

The pgx\_dmpall command backs up the data directory, tablespaces, and configuration files. The backup data is stored in the directory specified by backup\_destination parameter of postgresql.conf. pgx\_dmpall command also deletes archived Write Ahead Logs (WAL) that are no longer necessary for recovery when the backup completes successfully.

#### Options

-c

This option only backs up configuration files. The configuration files are as follows:

- postgresql.conf (postgresql.conf)
- File for host-based authentication (pg\_hba.conf)
- Configuration file for ident authentication (pg\_ident.conf)

If an external reference, such as 'include' in postgresql.conf, is set, the reference destination files are also backed up.

**-C fast|spread**

**--checkpoint=fast|spread**

Sets checkpoint mode to fast or spread (default).

If fast is specified, the checkpoint processing at the start of backup becomes quick, but the impact on performance of running applications gets larger due to intense I/O. In spread mode, the impact on applications is smaller but the backup takes longer, because the checkpoint is performed slowly.

**-D *datadir***

Specify the data directory. If this option is omitted, the value of the environment variable PGDATA is used.

**-f *configFile***

Specify the postgresql.conf configuration file. This option is set if the data directory and the configuration file set in the 'data\_directory' parameter of the postgresql.conf file are running in separate directories.

**-U *username***

**--username=*username***

Specify the user name of the database superuser. This defaults to the name of the effective user running pgx\_dmpall.

**-w**

**--no-password**

Never issue a password prompt. If the server requires password authentication and a password is not available by other means such as a .pgpass file, the connection attempt will fail. This option can be useful in batch jobs and scripts where no user is present to enter a password.

**-W**

**--password**

Force pgx\_dmpall to prompt for a password before connecting to a database.

This option is never essential, since pgx\_dmpall will automatically prompt for a password if the server demands password authentication. However, pgx\_dmpall will waste a connection attempt finding out that the server wants a password. In some cases it is worth typing -W to avoid the extra connection attempt.

**--maintenance-db=*dbname***

Specifies the name of the database to connect to. If not specified, the postgres database will be used; if that does not exist, template1 will be used.

## Environment

PGDATA

Specify the data directory. You can overwrite using the -D option.

## Diagnostics

0: Normal exit

Other than 0: Abnormal exit

## Notes

This command can only be executed when the database server is running.

Execute this command as a PostgreSQL user account.

Do not update or delete files in the backup storage directory. Otherwise, you may not be able to recover the database.

Do not store other files in the backup storage directory.

This command uses one database connection. To establish a connection, this command uses the IPv4 loopback address 127.0.0.1 on Windows, and the UNIX domain socket on other operating systems. Therefore, permit these connections in pg\_hba.conf.

This command cannot be executed on the standby server.

## Example

In the following example, the data directory, tablespaces, and configuration files are backed up. At this time, stored WALs are no longer necessary because the backups are destroyed.

```
$ pgx_dmpall
```

## Related item

`pgx_rcvall`

## 3.3 pgx\_keystore

---

### Name

`pgx_keystore --` Manages keystore

### Synopsis

```
pgx_keystore [option... ] keystore_location
```

### Description

`pgx_keystore` enables auto-open of a keystore.

### Options

`-a`

`--enable-auto-open`

Enables auto-open of a keystore. This allows the keystore to open automatically without entering the passphrase when the database server starts.

When auto-open is enabled, an obfuscated copy `keystore.aks` is created in the same directory where the keystore file `keystore.ks` is stored. To disable auto-open, delete `keystore.aks`.

`-P passphrase`

`--passphrase=passphrase`

Specify the passphrase to open the keystore. If this option is omitted, the prompt to enter the passphrase is displayed.

*keystore\_location*

Specify the absolute or relative path of the keystore file.

### Diagnostics

0: Normal exit

Other than 0: Abnormal exit

### Notes

This command can be executed whether the database server is running or stopped. It does not connect to the database server.

### Example

Enables auto-open of a keystore.

```
$ pgx_keystore -a /key/store/location/keystore.ks
```

## 3.4 pgx\_pclrsc

---

## Name

`pgx_pclrsc` -- Register, unregister, or display FUJITSU Enterprise Postgres database cluster with PRIMECLUSTER as resource of PRIMECLUSTER.

## Synopsis

```
pgx_pclrsc -a -c name -u osuser -D directory -w directory
           -n nodes [options...]
pgx_pclrsc -d -c name
pgx_pclrsc -p [-c name]
```

## Description

`pgx_pclrsc` is an utility for registering or unregistering FUJITSU Enterprise Postgres database cluster with PRIMECLUSTER, or displaying settings of FUJITSU Enterprise Postgres database cluster registered with PRIMECLUSTER. Execute the command on a member node of the cluster. Only the super user(root) can execute this command.

## Options

`-a`

`--add`

Register the specified database cluster with PRIMECLUSTER. If the specified database cluster has already been registered with PRIMECLUSTER, then terminate abnormally.

`-c name`

`--db-cluster-name=name`

Specify database cluster name. *name* is case-sensitive, and must be within 16 bytes, and an initial letter must be ascii alphabet, and following letters must be ascii alphabet or ascii digit or underscore(\_).

`-d`

`--delete`

Unregister the specified database cluster from PRIMECLUSTER.

`-D directory`

`--pgdata=directory`

Specify an absolute path of data directory.

`--db-user=name`

Specify a database super user. Default is the user specified with '-u'.

`-n nodes`

`--member-nodes=nodes`

Specify names of all member nodes of the cluster. Specify a cluster node name with suffix "RMS" to the name. Separate names with comma(.). (e.g. `-n node1RMS,node2RMS`)

`-p`

`--print`

Print a list of database clusters registered with PRIMECLUSTER. If `-c` option is specified, then print settings of the database cluster.

`--response-timeout=seconds`

Specify timeout of the query for health check. It's used with a count specified with '--timeout-retry-num'. The query is "SELECT 1" to the database "template1". If '0', wait infinitely. (default: '0')

`--timeout-retry-count=count`

Specify a limit count of retrying query when timeout is occurred. If retry counter is over the limit, then PRIMECLUSTER considers status of the database server as FAULT. If a query doesn't timeout once, retry counter is reset. (default: '6')

`--trace-max-file-size=size`

Specify max size(KB) of trace file. (default: '10240')

`-u osuser`

`--os-user=osuser`

Specify an OS user who can start/stop FUJITSU Enterprise Postgres database server.

`-w directory`

`--work-dir=directory`

Specify a directory for temporary data and trace files. It's used for starting, stopping or checking FUJITSU Enterprise Postgres database server. If the directory doesn't exist, then create it. Owner of the directory created by the command is set to the user specified with '-u'. Permission of the directory created by the command is set to 0700.

`--watch-interval=seconds`

Specify an interval. It's used for the amount of time between health checks. (default: '3')

## Diagnostics

0 : On success

otherwise : On error

## Notes

Before unregistering a resource, stop RMS of PRIMECLUSTER.

## Example

The simplest example of registering a resource.

```
# pgx_pclrsc -a -c dbcluster1 -u postgres -D /mnt/swdsk1/pgdata -w /var/tmp/work -n  
node1RMS,node2RMS
```

# 3.5 pgx\_rcvall

---

## Name

`pgx_rcvall` - Recovers the data directory, tablespaces, and configuration files.

## Synopsis

```
pgx_rcvall [option...]
```

## Description

The `pgx_rcvall` command recovers the data directory, tablespaces, and configuration files using the data that was backed up with `pgx_dmpall` command and archived Write-Ahead-Log (WAL). If none of the options that indicate the recovery point is specified, all archived WAL are applied and the data will be recovered to the latest point.

## Options

`-B backupdir`

Specify the backup storage directory. If the data directory is damaged, this option cannot be omitted.

`-D datadir`

Specify the data directory. If this option is omitted, the value of the environment variable PGDATA is used.

`-e targetTime`

Specify this option to recover the data as of the specified date and time.

targetTime

Specify the time at which the data is recovered. The format is as follows:

"YYYY-MM-DD HH:MM:SS"

-l

This option displays a list of the backup data information in the backup storage directory that was obtained using the `pgx_dmpall` command. This cannot be specified together with `-p`, `-e` or `-n` option.

-n *restorePoint*

Specify this option to recover the data to the specified restore point. Restore points are created with SQL function `pg_create_restore_point`. If multiple restore points with the same names were created, the first one after the backup was taken is used for recovery. If the specified restore point does not exist, all archived WAL are applied. This cannot be specified together with `-e` or `-p` option.

-p

Specify this option to recover the data as of the time when the last backup completed. This cannot be specified together with `-e` or `-n` option.

-s *connectionString*

Construct a standby server from the backup created by `pgx_dmpall`. Specify as an argument a connection string for connecting to the primary server. This is the same as `primary_conninfo` parameter in `recovery.conf`. This option can only be specified together with `-D` and `-B`.

-x

Specify this option if you do not want to include transactions committed at the time specified in the `-e` option as part of the recovery.

--keystore-passphrase

Prompt for the passphrase to open the keystore.

## Environment

PGDATA

Specify the data directory. You can overwrite using the `-D` option.

PGPORT

Specify the port number for connecting to the database.

PGUSER

Specify the user name of the database superuser. This defaults to the name of the effective user running `pgx_dmpall`.

## Diagnosis

0: Normal exit

Other than 0: Abnormal exit

## Backup data information

Date

Date the backup data was created using the `pgx_dmpall` command.

Dir

This is the name of the directory in the backup storage directory that is used to store the backup data.  
Directory naming format: Time format (YYYY-MM-DD\_HH-MM-SS)

Status

This is the status of the `pgx_dmpall` command backup data.

COMPLETE: Complete

INCOMPLETE: Incomplete

## Notes

This command can only be executed when the database server is stopped, except when it is executed with `-l` option.

Execute this command as a PostgreSQL user account.

Use backup data that was taken from the recovery target data directory.

Before executing this command, disconnect all application database connections. Additionally, do not connect to the database during recovery.

Hash indexes cannot be recovered correctly in this command. If you are using the hash index, execute `REINDEX` for the corresponding index after this command finishes.

The configuration files are restored from those files that were taken by the last `pgx_dmpall` (including `-c` option).

This command connects to the database to determine whether the recovery has completed. So ensure that you set the port number with `PGPORT` environment variable in the environment where multiple instances exist.

Match the OS timezone setting when running `pgx_dmpall/pgx_rcvall` to the timezone specified by `timezone` parameter in `postgresql.conf`.

Otherwise, data might be recovered to an unexpected time when `-e` or `-p` is specified.

If you recover to a past point, a new timeline (history of database updates) begins at that point. That recovery point is the latest point in the new timeline when the recovery is completed. If you subsequently recover to the latest point, the database updates in the new timeline will be replayed.

Valid restore points are the ones that were created in the timeline where the backup had been taken. That means that if you recover to a past point, those restore points created thereafter are unavailable. Therefore, take a backup when you have restored the past data desired.

## Example

In the following example, the data directory, tablespaces, and configuration files are recovered.

```
$ pgx_rcvall -B /home/pgsql/Backupdir
```

In the following example, the data directory and tablespaces are recovered at 10:00:00 on 01-05-2015. The configuration files are recovered at the point at which the last of the data is obtained.

```
$ pgx_rcvall -B /home/pgsql/Backupdir -e "2015-05-01 10:00:00"
```

In the following example, the data directory and tablespaces are recovered upto the time of restore point "before\_match\_20150510\_1". The configuration files are restored from the latest backup.

```
$ pgx_rcvall -B /home/pgsql/Backupdir -n before_match_20150510_1
```

In the following example, the obtained backup data information in the backup storage directory is displayed in a list.

```
$ pgx_rcvall -l
```

## Related item

`pgx_dmpall`

## 3.6 postgres

---

### Name

`postgres` -- PostgreSQL database server

## Synopsis

`postgres [option...]`

## Options

`-K`

Prompt for the passphrase to open the keystore.

## See

Refer to "postgres" in the PostgreSQL Documentation for details.

# Chapter 4 Mirroring Controller Commands

This chapter explains the Mirroring Controller commands.

## 4.1 mc\_ctl

### Name

L

`mc_ctl` - Start and stop Mirroring Controller, switch/disconnect the server, or display the server status.

W

`mc_ctl` - Start and stop Mirroring Controller, switch/disconnect the server, display the server status, or register and unregister from the Windows services.

### Overview

```
mc_ctl start [-M mcdi r] [-w] [-f] [--mc-only] [--local-server server_id]
```

```
mc_ctl stop [-M mcdi r] [[-a] [--mc-only] | [-e][--local-server server_id]]
```

```
mc_ctl status [-M mcdi r] [--local-server server_id]
```

```
mc_ctl switch [-M mcdi r] [--local-server server_id]
```

```
mc_ctl enable-failover [-M mcdi r] [--local-server server_id]
```

```
mc_ctl disable-failover [-M mcdi r] [--local-server server_id]
```

W

```
mc_ctl register [-M mcdi r] [-w] [-f] [--mc-only] -P password  
[-S a[uto] | d[emand]] [--local-server server_id]
```

```
mc_ctl unregister [-M mcdi r] [--local-server server_id]
```

### Description

L

`mc_ctl` starts and stops Mirroring Controller, switches/disconnects the server, or displays the server status.

W

`mc_ctl` starts and stops Mirroring Controller, switches/disconnects the server, displays the server status, or registers and unregisters from the Windows services.

The start mode starts Mirroring Controller. If the `--mc-only` option is omitted, the command starts a database instance. Specify the `-w` option to get the status of this command.

The stop mode stops Mirroring Controller. If the `--mc-only` option is omitted, the database instance is stopped. If `--mc-only` option is not specified, database instance is also stopped. When executes on standby server without `--mc-only`, standby server will be detached from primary server.

The status mode displays the status of the servers, database instance processes, and disks monitored by Mirroring Controller.

The switch mode switches the primary server. When the server is switched, the database instance on the primary server stops, and the database instance on the standby server is upgraded to primary server and begins degrading operation.

The enable-failover mode enables automatic switching and disconnection. You can use this mode after installing the Mirroring Controller option.

The disable-failover mode disables automatic switching and disconnection. You can use this mode after installing the Mirroring Controller option.

W

The register mode registers Mirroring Controller in the Windows service. The `-w`, `-f`, `--mc-only`, and `--local-server` options are used when Mirroring Controller is started and stopped from the Windows services. If the `mc_ctl` command is used to start and stop Mirroring Controller, the option specified in the command will be valid.

The unregister mode unregisters Mirroring Controller from the Windows service.

L

If Mirroring Controller has not been started on the server that executes the command, commands for any mode other than the start mode, and status mode.

Execute this command as an instance administrator.

W

If Mirroring Controller has not been started on the server that executes the command, commands for any mode other than the start mode, status mode, register mode, and unregister mode terminate with an error.

Execute this command as an instance administrator user with the "Administrator" privilege (operating system user ID that belongs to the Administrator group).

Until you start Mirroring Controller of standby server after starting Mirroring Controller of the primary server, disconnect of the standby server occurs operation to be able to continue with only the primary server. Standby server is incorporated when you start the Mirroring Controller of standby server, and you should be able to operate in the multiplexing configuration.

## Options

-a

Specify this option to stop Mirroring Controller on all servers.

-e

Specify this option to forcibly stop Mirroring Controller on the active server.

-f

Specify this option to enable automatic switching and disconnection of Mirroring Controller immediately after startup.

This option is available only if you install the Mirroring Controller options.

--local-server *server\_id*

If you run a simulation build of the primary and standby servers in a single server (for system testing, for example), specify this option to identify the server to be operated.

For *server\_id*, specify the server identifier specified in the network.conf file. ASCII characters other than single-byte space can be specified in the server identifier. The operations will be executed as if the user has logged in to *server\_id*.

--mc-only

Specify this option to start and stop only Mirroring Controller processes. At the start mode, this option can be specified only while the database instance is running. If this option is omitted, the database instance is simultaneously started and stopped.

-M *mcdir*

Specify the Mirroring Controller management directory.

L

ASCII characters other than halfwidth spaces can be specified in the directory path.

W

ASCII characters can be specified in the directory path.

If this option is omitted, the value of the environment variable MCONTROLDIR is used.

-P *password*

W

For the register mode, specify the password for the user who executed the command.

W

-S *a[uto] | d[emand]*

Specify the start type for the Windows service to be registered. You can choose auto or demand as the start type by specifying the entire word or just its first letter. The default is auto.

-w

Waits for operations to finish.

## Environment variable

### MCCONTROLDIR

Specifies the Mirroring Controller management directory.

**L**

ASCII characters other than halfwidth spaces can be specified in the directory path.

**W**

ASCII characters can be specified in the directory path.

You can specify the -M option to override this value.

## Diagnostics

0: Normal end

Other: Abnormal end

## Notes

The message under execution might be output though the mc\_ctl command is not being executed and, besides, it terminate abnormally when the server is downed while processing execution of this command, an automatic switch, and an automatic separation, and the communication between a primary server and the standby server is cut off. Besides, please reactivate Mirroring Controller to solve this problem after confirming nobody is operating the mc\_ctl command. Afterwards, please execute a necessary operation.

If a time-out error occurs when the mc\_ctl command is in progress, the messages may be different from the processes. Take the actions described in the "Action" section of the message.

Automatic switching and disconnection by the enable-failover mode, the disable-failover mode, and the -f option of the start mode is effective only while Mirroring Controller is running. Therefore, please activate each time you start the Mirroring Controller if you want to enable automatic switching and disconnection.

**W**

Use the start mode and stop mode to start and stop the Windows services. To do this, use the register mode to register Mirroring Controller in the Windows services in advance.

In case of postgresql.conf has any incorrect parameter when this command is executed, this command will be abnormally terminated. If this is the case, please re-execute it again after correct the parameter in postgresql.conf.

**W**

In Windows Server(R) 2008, Windows Server(R) 2008 R2, Windows Server(R) 2012 or Windows Server(R) 2012 R2, the mc\_ctl command must be executed from "Administrator: Command Prompt". Right-click [Command Prompt], and then select [Run as administrator] from the menu to display the [Administrator: Command Prompt] window.

## Example

**L**

To start Mirroring Controller:

```
$ mc_ctl start -M /mdir/inst1
```

**W**

To start Mirroring Controller:

```
> mc_ctl start -M D:\mdir\inst1
```

Display details of mc\_ctl status

```
mirroring status
-----
(1)
server_id  host_role      host          host_status  db_proc_status  disk_status

unknown : Unknown (*1)

```

\*1: Displayed when Mirroring Controller is stop state, the management network is abnormal, or Mirroring Controller has failed or is unresponsive.

\*2: The names of the DBMS processes in which the abnormality was detected are output separated by a comma. The name has the following meaning:

- postmaster: Process (postmaster) that accepts application connections
- wal\_sender or wal\_receiver: Process (WAL sender or WAL receiver) that sends and receives transaction logs

\*3: The types of disks where the abnormality was detected are output separated by a comma. The type has the following meaning:

- data: Data storage disk
- tran\_log: Transaction log storage disk
- tablespace: Tablespace storage disk

# Chapter 5 PL/extJava Commands

This chapter explains the PL/extJava commands.

## 5.1 pgx\_jadmin

### Name

pgx\_jadmin -- Setup and operation of PL/extJava

### Synopsis

```
pgx_jadmin init-domain --sharedir directory [--domainport port1, port2, port3]
                    --dbadminuser username
                    [--pgdata directory | -D directory]
                    [--cluster-standbynode]

pgx_jadmin delete-domain [-y] [--force] [--cluster-standbynode]

pgx_jadmin list-domain

pgx_jadmin modify-domain-port --domainport port1, port2, port3
                    [--cluster-standbynode]

pgx_jadmin create-container --dbname database_name [--instanceport port1, port2]
                    [--dbport port] --dbuser username
                    --dbpassword password
                    [--cluster-standbynode]

pgx_jadmin delete-container --dbname database_name [--cluster-standbynode]

pgx_jadmin list-container --dbname database_name

pgx_jadmin add-instance --dbname database_name
                    --instanceport port1, port2 [--cluster-standbynode]

pgx_jadmin delete-instance --dbname database_name [--cluster-standbynode]

pgx_jadmin modify-instance-port --instance name
                    --instanceport port1, port2 [--cluster-standbynode]

pgx_jadmin modify-container-db --dbname database_name [--dbport port]
                    [--dbuser username] [--dbpassword password]

pgx_jadmin list-jvm-options --dbname database_name

pgx_jadmin modify-jvm-options --dbname database_name [--heapsize size]
                    [--permsize size]

pgx_jadmin backup --backupdir directory

pgx_jadmin restore --backupdir directory [--cluster-standbynode]
```

### Description

The pgx\_jadmin unified command is used in FUJITSU Enterprise Postgres Java Application Server, which incorporates the PL/extJava environment into FUJITSU Enterprise Postgres. The pgx\_jadmin command consists of several subcommands. Each subcommand corresponds to an operation in the PL/extJava environment.

In init-domain subcommand, creates a domain for using the PL/extJava environment. This command creates a domain only once after FUJITSU Enterprise Postgres is installed.

In delete-domain subcommand, deletes the domain for using the PL/extJava environment.

In list-domain subcommand, displays domain information.

In modify-domain-port subcommand, modifies the domain management port numbers.

In create-container subcommand, creates a container in a domain. When you create a container, a server instance (JavaVM) is simultaneously created in the container. Create one container per database within an instance. To use Java functions in multiple databases, create a container for each one.

In delete-container subcommand, deletes a container from a domain.

In list-container subcommand, displays container information.

In add-instance subcommand, add a server instance (JavaVM) to a container.

In delete-instance subcommand, deletes a server instance (JavaVM) from a container. If multiple server instances (JavaVM) have been created in a container, this command deletes the one that was added last.

In modify-instance-port subcommand, modifies the server instance management port numbers.

In modify-container-db subcommand, modifies the database connection information of a container.

In list-jvm-options subcommand, displays JavaVM option information of a container.

In modify-jvm-options subcommand, modifies the JavaVM settings of a container.

In backup subcommand, backup the PL/extJava.

In restore subcommand, restore the PL/extJava.

## Options

--backupdir *directory*

Specify a backup storage directory for PL/extJava, using an absolute path.

W

Specify the directory name in up to 64 bytes.

L

Specify the directory name in up to 120 bytes.

You can use the following characters in the directory name:

- Alphanumeric characters
- Spaces
- Underscores "\_"
- Hyphens "-"
- Parentheses "()"

Do not specify the following directories:

- Same directory as the instance data storage directory, the backup storage directory and the domain root directory
- Directory in the instance data storage directory, the backup storage directory and the domain root directory
- Directory that exists under the instance data storage directory, the backup storage directory and the domain root directory is under the backup storage directory for PL/extJava

--cluster-standbynode

Specify this option to execute the command for the standby node in a cluster environment.

-D *directory*

--pgdata *directory*

Specify the absolute path of the data storage destination of the instance.

If you omit this option, the command references the environment variable (PGDATA).

**W****--dbadminuser *username***

Specify the name of the instance administrator.

Specify the user name in up to 20 bytes.

If you are specifying the domain user, use the "domainName\userName" format. Specify the domain name in up to 250 bytes.

After creating a domain, you cannot change the instance administrator set during creation of the domain.

**L****--dbadminuser *username***

Specify the name of the instance administrator. Refer to "User of PL/extJava" in "Setting up and Operating PL/extJava" of the Operation Guide for information on the instance administrator. Specify the user name in up to 8 bytes. After creating a domain, you cannot change the instance administrator set during creation of the domain.

**--dbname *database\_name***

Specify the database name using 1 to 28 bytes of the database corresponding to the container. You can use the following characters in the database name:

- Alphanumeric characters
- Underscores "\_"

You cannot specify an underscore as either the leading or trailing character. You cannot specify a database name already registered, even if you change name capitalization. For example, if the database name "database001" has already been registered, you cannot create a container with the database name "DATABASE001". You cannot specify the following as a database name:

- domain
- default
- server
- resources

The database name to the instance is not revokable. Recreate the container when you change the database name.

**W**

Windows operating system reserved words cannot be specified.

**--dbpassword *password***

Specify the password of the user who will connect to the database.

Ensure that it matches the password of the user registered in the instance.

Specify --dbpassword option or --dbuser option when you modify the database connection information.

**--dbport *port***

Specify the port number of the instance.

If you omit the port number, the default value of 27500 for the instance is used.

**--dbuser *username***

Specify a user name for connecting to the database. You must register the user in the instance in advance.

Specify --dbuser option or --dbpassword option when you modify the database connection information.

**--domainport *port1,port2,port3***

Specify the domain management port numbers separated with a comma. Three port numbers are required. If you omit the port numbers, the default values are used. Refer to "Preparation for portnumber" in "Setting up and Operating PL/extJava" of the Operation Guide for information on port numbers. Specify the portnumber not changed in order of specification for the init-domain subcommand when specifying it for the modify-domain-port subcommand.

**--force**

Specify this option to forcibly delete the domain even if it has containers.If you omit this option, the domain will fail to be deleted if it has containers.

**--heapsize *size***

Specify the size of the heap area in megabytes.Specify a value of 64 or greater for the size of the heap area.

Specify **--heapsize** option or **--permsize** option when you modify the JavaVM settings.

**--instance *name***

Specify the server instance name(JavaVM).

You can check the names of server instances(JavaVM). registered in a container by using the list-container subcommand.

**--instanceport *port1,port2***

Specify the server instance management port numbers separated with a comma. two port numbers are required. If you omit the port numbers, the default values are used. Refer to "Preparation for portnumber" in "Setting up and Operating PL/extJava" of the Operation Guide for information on port numbers.

For the port numbers you are not going to change, you must specify them in the same order for the create-container subcommand or add-instance subcommand when specifying them for the modify-instance-port subcommand.

**--permsize *size***

Specify the size of the Perm area in megabytes.Specify a value of 64 or greater for the size of the Perm area.

Specify **--permsize** option or **--heapsize** option when you modify the JavaVM settings.

**--shareddir *directory***

Specify the absolute path of the directory (domain root) that will store the domain resources.

**W**

Specify the directory that does not exist in the directory name in up to 64 bytes.

When specifying **--cluster-standbynode**, however, you must specify an existing directory for the directory name.

Specify the directory that there is a writing authority of the user who has the administrator authority in the parent directory of the domain root.

**L**

Specify the directory that does not exist in the directory name in up to 255 bytes.

Specify the directory that there is a writing authority of the user who has the instance administrator authority in the parent directory of the domain root.

You can use the following characters in the directory name:

- Alphanumeric characters
- Spaces
- Underscores "\_"
- Hyphens "-"
- Parentheses "()"

Do not specify the following directories for the domain root:

- Same directory as the instance data storage directory
- Directory in the instance data storage directory
- Directory for which the instance data storage directory is under the domain

**-y**

Specify this option to skip the message prompting you to confirm deletion of the domain.

If you omit this option, a message prompting you to confirm deletion of the domain will be displayed.

## Environment

PGDATA

Specify the absolute path of the data storage destination of the instance. If the `pgx_jadmin` command with the `-D` option or `--pgdata` is specified, then that will be used.

## Diagnostics

0 : On success

otherwise : On error

## Notes

The Executing of this command cannot be done at the same time.

## Using an escape character

To use any of the following characters as the value of an option or operand in the command, you must escape it with `"\"`. However, do not specify escape character when you specify `--dbuser` and `--dbpassword` excluding the metacharacter for the `modify-container-db` subcommand.

### W

#### Windows

| Character type   | Description  | Characters           |
|--|--|----------------------|
| Java escape sequence                                     | Character used as an escape character in Java                            | <code>"\"</code> etc |
| Special character of the <code>pgx_jadmin</code> command | Special character used as a delimiter or escape character in subcommands | <code>.-:=</code>    |

### L

#### Linux

| Character type   | Description  | Characters  |
|--|--|---|
| Metacharacter  | Character used as a metacharacter  | <code>;&amp;() &gt;&lt;?*?[]~+-@!"\"`\${}^(*1)</code> |
| Java escape sequence                                     | Character used as an escape character in Java                            | <code>"\"</code>                                      |
| Special character of the <code>pgx_jadmin</code> command | Special character used as a delimiter or escape character in subcommands | <code>.-:=</code>                                     |

\*1: The characters treated as metacharacters vary depending on the type of shell being used.

To set the password of the user who will connect to the instance to `"pass\word!"`:

### W

```
pgx_jadmin create-container --dbname db01 --dbuser user1 --dbpassword pass\\word\!
```

### L

```
pgx_jadmin create-container --dbname db01 --dbuser user1 --dbpassword pass\\\\word\!
```

## Stop of instance

The following subcommand can only be executed when the database server is stopping.

- `init-domain`
- `create-container`
- `add-instance`

- delete-instance
- modify-domain-port
- modify-instance-port
- modify-container-db
- modify-jvm-options
- delete-container
- delete-domain
- backup
- restore

### Start the instance

The following subcommand can only be executed when the instance is being started:

- list-jvm-options

### Command executing user

**W**

The all subcommand execute this command as:

- User with administrator privileges on the operating system

**L**

The init-domain subcommand and the delete-domain subcommand and the backup subcommand and the restore subcommand execute this command as:

- Operating system administrator

The others subcommand execute this command as:

- instance administrator

The list-domain subcommand is the Executing by the above-mentioned user.

**W**

### Create the domain

Register the instance in the Windows services before creating the domain.

### Deletion of domain

Delete of domain before uninstalling FUJITSU Enterprise Postgres. Deleting a domain deletes the domain root directory. Back up the required directories and files before executing this command.

### Backup storage directory of PL/extJava

Do not update or delete files in the backup storage directory of PL/extJava. Otherwise, you may not be able to recover the PL/extJava.

Do not store other files in the backup storage directory of PL/extJava.

## Examples

### Create a domain

The following example omits the domain management port numbers and the instance data storage directory.

**W**

```
pgx_jadmin init-domain --shreddir C:\database\domain --dbadminuser dbadmin1
```

**L**

```
pgx_jadmin init-domain --shreddir /database/domain --dbadminuser dbadmin1
```

The following example specifies the domain management port numbers and the instance data storage directory.

**W**

```
pgx_jadmin init-domain --sharedir C:\database\domain --dbadminuser dbadmin1
--domainport 27530,27521,27522 --pgdata C:\database\inst1
```

**L**

```
pgx_jadmin init-domain --sharedir /database/domain --dbadminuser dbadmin1
--domainport 27530,27521,27522 --pgdata /database/inst1
```

### Delete a domain

The following example shows the command when the domain has no containers.

```
pgx_jadmin delete-domain
```

The following example forcibly deletes the containers in the domain.

```
pgx_jadmin delete-domain --force
```

### Display domain information

To display the domain information:

```
pgx_jadmin list-domain
```

#### Contents of list-domain

```
domain status: (1)
sharedir:      (2)
domainport:    (3)
dbadminuser:   (4)
datadir:       (5)
```

- (1) Domain status
  - running : Start state
  - not running : Stop state
- (2) Directory (domain root) that will store the domain resources
- (3) Domain management port number (x 3)
- (4) Instance (database) administrator
- (5) Instance data storage directory

**W**

### Display example

```
domain status: running
sharedir: C:\database\domain
domainport: 27530,27521,27522
dbadminuser: dbadmin1
datadir: C:\database\inst1
```

**L**

### Display example

```
domain status: running
sharedir: /database/domain
domainport: 27530,27521,27522
dbadminuser: dbadmin1
datadir: /database/inst1
```

### Modify the domain management port numbers

To modify the domain management ports:

```
pgx_jadmin modify-domain-port --domainport 27600,27601,27602
```

### Create a container

The following example omits the port number of the instance and the port number of the server instance.

```
pgx_jadmin create-container --dbname db01 --dbuser user1 --dbpassword password1
```

The following example specifies the port number of the instance and the port number of the server instance.

```
pgx_jadmin create-container --dbname db01 --dbuser user1 --dbpassword password1
--dbport 27011 --instanceport 27531,27532
```

### Delete a container

To delete a container:

```
pgx_jadmin delete-container --dbname db01
```

### Display container information

To display container information:

```
pgx_jadmin list-container --dbname db01
```

### Contents of list-container display

```
container status: (1)
dbname:           (2)
instance:         (3) (4)
dbport:           (5)
dbuser:           (6)
```

- (1) Container status
  - running : Start state (all server instances are started)
  - partially running : Degrading start (some server instances are stopped)
  - not running : Stop state (all server instances are stopped)
- (2) Database name
- (3) Server instance name
- (4) Server instance management port number (x 2)
- (5) Instance port number
- (6) User name for connecting to the instance

### Display example

```
container status: running
dbname: db01
instance: db01-1 27531,27532
instance: db01-2 27801,27802
dbport: 27011
dbuser: user1
```

### Add a server instance(JavaVM)

To add a server instance(JavaVM):

```
pgx_jadmin add-instance --dbname db01 --instanceport 27801,27802
```

### Delete a server instance(JavaVM)

To delete a server instance(JavaVM):

```
pgx_jadmin delete-instance --dbname db01
```

### Modify the server instance(JavaVM) management port numbers

To modify the server instance(JavaVM) management port numbers:

```
pgx_jadmin modify-instance-port --instance db01-1 --instanceport 27701,27702
```

### Modify the instance connection information

To modify the user name and password used for connecting to the database:

```
pgx_jadmin modify-container-db --dbname db01 --dbuser user02 --dbpassword passwd2
```

## Display JavaVM option information of a container

To display the JavaVM options of a container:

```
pgx_jadmin list-jvm-options --dbname db01
```

## Modify the JavaVM settings

To modify the JavaVM heap area size and the Perm area size:

```
pgx_jadmin modify-jvm-options --dbname db01 --heapsize 1024 --permsize 384
```

## Backup the PL/extJava

To backup the PL/extJava:

**W**

```
pgx_jadmin backup --backupdir D:\backup
```

**L**

```
pgx_jadmin backup --backupdir /backup
```

## Restore the PL/extJava

To restore the PL/extJava:

**W**

```
pgx_jadmin restore --backupdir D:\backup
```

**L**

```
pgx_jadmin restore --backupdir /backup
```

# FUJITSU Enterprise Postgres 9.5

## Message Guide

Windows/Linux

J2UL-2113-02ENZO(00)  
June 2016

# Preface

---

## Purpose of this document

This document explains the messages output by FUJITSU Enterprise Postgres.

## Intended readers

This document is intended for the following readers:

- Persons using FUJITSU Enterprise Postgres

## Prerequisites

Knowledge of the following topics is required to read this document:

- A general understanding of computers
- Jobs
- PostgreSQL
- Linux
- Windows

L

W

## Structure of this document

This document is structured as follows:

### [Chapter 1 Overview of Messages](#)

This chapter explains the format in which messages are output.

### [Chapter 2 FUJITSU Enterprise Postgres Messages](#)

This chapter explains the messages that are output and the actions to take based on the message information.

### [Chapter 3 Mirroring Controller Messages](#)

This chapter explains messages output by the Mirroring Controller.

## Export Restrictions

Exportation/release of this document may require necessary procedures in accordance with the regulations of your resident country and/or US export control laws.

## Issue Date and Version

# Chapter 1 Overview of Messages

This chapter explains the format of messages.

## 1.1 Message Format

This section explains the format of messages.

- Output format
- Components

### 1.1.1 Output Format

The message output format is as follows:

#### Format of messages returned to an application

```
msgType: msgText (msgNumber)
```

#### Format of messages output to the server message log

```
SQLSTATE: date [processID]: [internalCode-1] user = userName, db = dbName, remote =  
clientIpAddress(portNumber) app = appName msgType: msgText (msgNumber)
```

See

Refer to "PostgreSQL Error Codes" under "Appendixes" in the PostgreSQL Documentation for information on SQLSTATE.

Note

- Notes on monitoring messages output to the server message log

Use SQLSTATE to monitor server messages, noting the following:

- Configuration method
  - Refer to "Error Log Settings" under "Setup" in the Installation and Setup Guide for Server for details.
- Notes
  - The user name, client IP address (port number), and application name may sometimes be blank.
  - Multiple message numbers may be output.
- Notes on monitoring messages returned to an application

You can output SQLSTATE to a message to be returned to an application. The following explains how to configure the settings for outputting SQLSTATE and gives cautions to be observed when doing so.

- How to configure the settings:
  - In the SET statement, set the log\_error\_verbosity parameter to VERBOSE.
  - For an application that uses the C language library, use the PQsetErrorVerbosity function to set message redundancy to PQERRORS\_VERBOSE.
- Cautions
  - SQLSTATE is output only to messages to be returned to applications that use the C language library.

- In some cases, *userName*, *clientIpAddress(portNumber)*, and *applicationName* may be blank.
- Multiple message numbers may be output.
- If the email address "pgsql-bugs@postgresql.org" is output to the message and the cause of the error cannot be identified, contact Fujitsu technical support.

## Example

### Message output to the server message log

```
3D000: 2015-07-10 19:41:05 JST [13899]: [1-1] user = fepuser,db = fep,remote =
127.0.0.1(51902) app = [unknown] FATAL: database "fep" does not exist (10571)
```

## 1.1.2 Components

This section explains the components of a message.

### Message type

The message type indicates the type of error denoted in the message.

The message type will be one of the following:

- Information (INFO, NOTICE, LOG, DEBUG)

This message type denotes a notification from the system, not an error. There is no need to take action.

- Warning (WARNING)

This message type denotes that no error occurred but confirmation or action is required by the user. Take the actions described in the "Action" section of the message.

- Error (ERROR, FATAL, PANIC)

This message type denotes that an error has occurred. Take the actions described in the "Action" section of the message.

- Supplementary information (DETAIL, HINT, QUERY, CONTEXT, LOCATION, STATEMENT)

This message type denotes supplementary information relating to the previous message. If the message was output in English, the message type will also be in English. (Detail, hint, query, context, location, statement)

### Message text

The text of the message reports the status of the system or an error in the system.

The notation "@numeric character@" that appears in "[Chapter 2 FUJITSU Enterprise Postgres Messages](#)" indicates an embedded character string. A character string is output to a message that is actually output.

If a message locale other than 'ja' is specified, messages added by FUJITSU Enterprise Postgres will be output in English.

For other message locales, the messages are output in English.

However, messages output by the `pgx_jadmin` command will always be displayed in English regardless of the message locale.

### Message number

The message number uniquely identifies each message. It is output as a string of five single-byte numeric characters. Use the message number that is output to find the explanation of the corresponding message in this document. The message numbers may change, so do not use them as keywords for monitoring.

No message number is assigned to messages output by a PL/pgSQL RAISE statement.

The message number is only output if the message locale is 'ja' or 'en'. For other message locales, the message number is not output.

## 1.2 Mirroring Controller Message Format

This section explains the format of messages output by the Mirroring Controller.

Mirroring Controller messages are output to the following locations:

**L**

- System log

**W**

- Event log

### Output format

```
programName[processId]: msgType: msgText (msgNumber)
```

For *programName*, use the value of the `syslog_ident` parameter or `event_source` parameter defined in the `serverIdentifier.conf` file.

**L**

The message types output by Mirroring Controller, their severity, and their corresponding value in the system log are shown in the table below.

**L**

Table 1.1 Message type, severity, and corresponding value in the system log

| Message type | Severity    | Meaning  | System log |
|--------------|-------------|--|------------|
| INFO         | Information | Provides information not categorized as LOG or NOTICE.   | INFO       |
| LOG          |             | Provides information recognized as a particularly important event in tracing the operation history.<br><br>(Example: Automatic switch is complete)                   |            |
| NOTICE       | Notice      | Outputs information that takes into account the user instructions within the program in response to an executed or automatically executed process.                   | NOTICE     |
| WARNING      | Warning     | Provides a warning, for example it will soon be impossible to maintain multiplexing capabilities.  | WARNING    |
| ERROR        | Error       | Reports that an error other than FATAL or PANIC has occurred.  | ERROR      |
| FATAL        |             | Reports that an error has been detected requiring system recovery in one of the multiplexed database systems. It also reports the content and cause of the error.    | CRIT       |
| PANIC        |             | Reports that an error has been detected requiring immediate system recovery in all multiplexed database systems. It also reports the content and cause of the error. | ALERT      |

**W**

The message types output by Mirroring Controller, their severity, and their corresponding value in the event log are shown in the table below.

Table 1.2 Message type, severity, and corresponding value in the event log

| Message type | Severity    | Meaning  | Event log   |
|--------------|-------------|--|-------------|
| INFO         | Information | Provides information not categorized as LOG or NOTICE.   | INFORMATION |
| LOG          |             | Provides information recognized as a particularly important event in tracing the operation history.<br><br>(Example: Automatic switch is complete)                   |             |
| NOTICE       | Notice      | Outputs information that takes into account the user instructions within the program in response to an executed or automatically executed process.                   |             |
| WARNING      | Warning     | Provides a warning, for example it will soon be impossible to maintain multiplexing capabilities.  | WARNING     |
| ERROR        | Error       | Reports that an error other than FATAL or PANIC has occurred.  | ERROR       |
| FATAL        |             | Reports that an error has been detected requiring system recovery in one of the multiplexed database systems. It also reports the content and cause of the error.    |             |
| PANIC        |             | Reports that an error has been detected requiring immediate system recovery in all multiplexed database systems. It also reports the content and cause of the error. |             |

The message severity has the following meanings:

- Information

Informational status. A message that was reported by the system is displayed. No action is required.

- Notice

Informational status, but a message that should be noted is displayed. If necessary, take the actions described in the "Action" section of the message.

- Warning

No error has occurred, but the user is requested to check, and take action. Take the actions described in the "Action" section of the message.

- Error

An error has occurred. Take the actions described in the "Action" section of the message.

## Chapter 2 FUJITSU Enterprise Postgres Messages

This chapter explains messages output by FUJITSU Enterprise Postgres.

### 2.1 Message Numbers Beginning with 10000

---

#### 2.1.1 10001

---

**no Snowball stemmer available for language "@1@" and encoding "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.1.2 10002

---

**multiple StopWords parameters**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.1.3 10003

---

**multiple Language parameters**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.1.4 10004

---

**unrecognized Snowball parameter: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.5 10005

---

### missing Language parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.6 10006

---

### could not determine which collation to use for index expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.7 10007

---

### old GIN indexes do not support whole-index scans nor searches for nulls

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.8 10008

---

### index row size @1@ exceeds maximum @2@ for index "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.9 10009

---

**"@1@" is an index**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.10 10010

---

**could not create archive status file "@1@": @2@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.1.11 10011

---

**could not write archive status file "@1@": @2@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.1.12 10012

---

**could not seek in log segment @1@ to offset @2@: @3@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.13 10013

---

**could not write to log file @1@ at offset @2@, length @3@: @4@**

### [Description]

There are the following cases:

- failed to write transaction log file
- failed to write transaction log file on backup data storage destination

### [System Processing]

Processing will be aborted.

### [Action]

Lack of storage space or malfunction of storage allocating the file shown in this message is considered.

If it's true, recover the database system according to "Actions when an Error Occurs" of "Operation Guide" or "Cluster Operation Guide".

If it's not true, identify the cause according to the informations in this message such as errno, and work around.

The following major causes are considered.

- the file has no permission or the permission has been changed
- power of the storage allocating the file has been turned off
- unmounted the storage allocating the file
- another process or human operated the file
- the storage allocating the file has crashed

## 2.1.14 10014

---

**updated min recovery point to @1@/@2@ on timeline @3@**

### [Description]

Terminated normally.

### [System Processing]

Continues processing.

### [Action]

No action required.

## 2.1.15 10015

---

**could not open file "@1@": @2@**

### [Description]

An error occurred during I/O processing in the database server.

### [System Processing]

Processing will be aborted.

### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.16 10016

---

### could not create file "@1@": @2@

#### [Description]

There was insufficient free space in the disk of the database server during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Delete user data stored in the database server to free up space on the disk.

## 2.1.17 10017

---

### could not write to file "@1@": @2@

#### [Description]

There was insufficient free space in the disk of the database server during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Delete user data stored in the database server to free up space on the disk.

## 2.1.18 10018

---

### could not fsync file "@1@": @2@

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.19 10019

---

### could not close file "@1@": @2@

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.20 10022

---

---

**not enough data in file "@1@"****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.21 10023**

---

**could not link file "@1@" to "@2@" (initialization of log file): @3@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.22 10024**

---

**could not rename file "@1@" to "@2@" (initialization of log file): @3@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.23 10025**

---

**could not close log file @1@: @2@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.24 10026**

---

**could not read file "@1@" : @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.25 10027

---

### could not remove file "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.1.26 10028

---

### archive file "@1@" has wrong size: @2@ instead of @3@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.27 10029

---

### restored log file "@1@" from archive

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.1.28 10030

---

### could not restore file "@1@" from archive: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.29 10032

---

### could not open transaction log directory "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.30 10033

---

### recycled transaction log file "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.1.31 10034

---

### removing transaction log file "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.1.32 10035

---

### could not rename old transaction log file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.1.33 10036

---

**could not remove old transaction log file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.1.34 10037

---

**required WAL directory "@1@" does not exist**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.1.35 10038

---

**creating missing WAL directory "@1@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

### 2.1.36 10039

---

**could not create missing directory "@1@": @2@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.1.37 10040

---

### removing transaction log backup history file "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.1.38 10043

---

### incorrect resource manager data checksum in record at @1@/@2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.39 10044

---

### invalid record offset at @1@/@2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.40 10045

---

### contrecord is requested by @1@/@2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.41 10048

---

### invalid record length at @1@/@2@

#### [Description]

invalid record length was found on archive log or transaction log data.

#### [System Processing]

The following causes could be considered.

- if the log level is information(INFO, NOTICE, LOG, DEBUG)

Continue processing.

- if the log level is error(ERROR, FATAL, PANIC)

Processing will be aborted.

#### [Action]

If the log level is information(INFO, NOTICE, LOG, DEBUG), no action is required.

When the log level is error(ERROR, FATAL, PANIC), take either of the following actions.

- if this message is output during starting instance

Please restore according to "Deal at the time of abnormality" of "Operation Guide" or "Cluster Operation Guide".

- if this message is output during recovering

Cannot continue to recover with the current backup data because an archive log in the backup has an error.

Recover from the other backup data.

## 2.1.42 10049

---

### invalid resource manager ID @1@ at @2@/@3@

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.43 10050

---

### record with incorrect prev-link @1@/@2@ at @3@/@4@

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.44 10051

---

**record length @1@ at @2@/@3@ too long**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.45 10052

---

**there is no contrecord flag at @1@/@2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.46 10053

---

**invalid contrecord length @1@ at @2@/@3@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.47 10054

---

**invalid magic number @1@ in log segment @2@, offset @3@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.48 10055

---

---

**invalid info bits @1@ in log segment @2@, offset @3@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.49 10056**

---

**WAL file is from different database system: WAL file database system identifier is @1@, pg\_control database system identifier is @2@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.50 10057**

---

**unexpected pageaddr @1@/@2@ in log segment @3@, offset @4@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.51 10058**

---

**unexpected timeline ID @1@ in log segment @2@, offset @3@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.52 10059**

---

**out-of-sequence timeline ID @1@ (after @2@) in log segment @3@, offset @4@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.53 10060

---

**syntax error in history file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.54 10061

---

**invalid data in history file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.55 10062

---

**invalid data in history file "@1@"**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.56 10063

---

**new timeline @1@ is not a child of database system timeline @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.57 10064

---

**new target timeline is @1@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.1.58 10065

---

**could not rename file "@1@" to "@2@" : @3@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.59 10066

---

**could not link file "@1@" to "@2@" : @3@**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.1.60 10067

---

**could not create control file "@1@" : @2@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.1.61 10068

---

**could not write to control file: @1@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.1.62 10069

---

**could not fsync control file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.63 10070

---

**could not close control file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.64 10071

---

**could not open control file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.65 10072

---

### could not read from control file: @1@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.66 10073

---

### database files are incompatible with server

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.67 10074

---

### incorrect checksum in control file

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.68 10075

---

### could not write bootstrap transaction log file: @1@

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.1.69 10076

---

**could not fsync bootstrap transaction log file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.70 10077

---

**could not close bootstrap transaction log file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.71 10078

---

**could not open recovery command file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.72 10079

---

**parameter "@1@" requires a Boolean value**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.73 10080

---

---

**recovery\_target\_timeline is not a valid number: "@1@"****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.74 10081**

---

**recovery\_target\_xid is not a valid number: "@1@"****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.1.75 10082**

---

**recovery\_target\_name is too long (maximum @1@ characters)****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.1.76 10083**

---

**unrecognized recovery parameter "@1@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.1.77 10084**

---

**recovery command file "@1@" specified neither primary\_conninfo nor restore\_command**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.1.78 10085

---

### recovery command file "@1@" must specify restore\_command when standby mode is not enabled

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.79 10086

---

### recovery target timeline @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.80 10087

---

### archive recovery complete

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.1.81 10088

---

### recovery stopping after commit of transaction @1@, time @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.82 10089

---

### recovery stopping before commit of transaction @1@, time @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.83 10090

---

### recovery stopping after abort of transaction @1@, time @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.84 10091

---

### recovery stopping before abort of transaction @1@, time @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.85 10092

---

### recovery stopping at restore point "@1@", time @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.1.86 10093

---

**recovery has paused**

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.1.87 10094

---

**must be superuser to control recovery**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.88 10095

---

**recovery is in progress**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.89 10096

---

**hot standby is not possible because @1@ = @2@ is a lower setting than on the master server (its value was @3@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.90 10097

---

**WAL was generated with wal\_level=minimal, data may be missing**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.1.91 10098

---

**hot standby is not possible because wal\_level was not set to "hot\_standby" or higher on the master server**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.1.92 10099

---

**control file contains invalid data**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2 Message Numbers Beginning with 10100

---

### 2.2.1 10100

---

**database system was shut down at @1@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.2 10101

---

### database system was shut down in recovery at @1@

[Description]

Displaying the date and time that the standby server is shut down last time.

[System Processing]

Continues processing.

[Action]

No action is required.

## 2.2.3 10102

---

### database system shutdown was interrupted; last known up at @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.4 10103

---

### database system was interrupted while in recovery at @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.5 10104

---

### database system was interrupted while in recovery at log time @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.6 10105

---

### database system was interrupted; last known up at @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.7 10106

---

### requested timeline @1@ is not a child of this server's history

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.8 10107

---

### entering standby mode

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.9 10108

---

### starting point-in-time recovery to XID @1@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.10 10109

---

**starting point-in-time recovery to @1@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.11 10110

---

**starting point-in-time recovery to "@1@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.12 10111

---

**starting archive recovery**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.13 10112

---

**checkpoint record is at @1@/@2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.14 10113

---

### could not find redo location referenced by checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.15 10114

---

### could not locate required checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.16 10115

---

### could not locate a valid checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.17 10116

---

### using previous checkpoint record at @1 @/@2 @

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.18 10121

---

---

### invalid next transaction ID

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.2.19 10122

---

### invalid redo in checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.2.20 10123

---

### invalid redo record in shutdown checkpoint

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.2.21 10124

---

### database system was not properly shut down; automatic recovery in progress

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.2.22 10125

---

### initializing for hot standby

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.23 10126

---

**redo starts at @1 @/@2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.24 10127

---

**redo done at @1 @/@2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.25 10128

---

**last completed transaction was at log time @1@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.26 10129

---

**redo is not required**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.2.27 10130

---

### requested recovery stop point is before consistent recovery point

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.28 10131

---

### WAL ends before end of online backup

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.29 10132

---

### WAL ends before consistent recovery point

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.30 10133

---

### selected new timeline ID: @1@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.31 10134

---

**consistent recovery state reached at @1@/@2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.32 10135

---

**invalid primary checkpoint link in control file**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.33 10136

---

**invalid secondary checkpoint link in control file**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.34 10137

---

**invalid checkpoint link in backup\_label file**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.35 10138

---

### invalid primary checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.36 10139

---

### invalid secondary checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.37 10140

---

### invalid checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.38 10141

---

### invalid resource manager ID in primary checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.39 10142

---

### invalid resource manager ID in secondary checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.40 10143

---

### invalid resource manager ID in checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.41 10144

---

### invalid xl\_info in primary checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.42 10145

---

### invalid xl\_info in secondary checkpoint record

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.43 10146

---

---

### invalid xl\_info in checkpoint record

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.2.44 10147

---

### invalid length of primary checkpoint record

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.2.45 10148

---

### invalid length of secondary checkpoint record

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.2.46 10149

---

### invalid length of checkpoint record

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.2.47 10150

---

### shutting down

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.48 10151

---

### database system is shut down

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.49 10152

---

### concurrent transaction log activity while database system is shutting down

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.50 10153

---

### skipping restartpoint, recovery has already ended

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.51 10154

---

### skipping restartpoint, already performed at @1@/@2@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.52 10155

---

**recovery restart point at @1 @/ @2 @**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.53 10156

---

**restore point "@1 @" created at @2 @/ @3 @**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.54 10157

---

**unexpected timeline ID @1 @ (after @2 @) in checkpoint record**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.55 10158

---

**unexpected timeline ID @1 @ (should be @2 @) in checkpoint record**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.56 10159

---

### could not fsync log segment @1@: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.57 10160

---

### could not fsync write-through log file @1@: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.58 10161

---

### could not fdatsync log file @1@: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.59 10162

---

### must be superuser or replication role to run a backup

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.60 10163

---

### recovery is not in progress

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.61 10164

---

### WAL level not sufficient for making an online backup

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.62 10165

---

### backup label too long (max @1@ bytes)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.63 10166

---

### a backup is already in progress

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.64 10167

---

---

**could not stat file "@1@": @2@****[Description]**

There was insufficient free space in the disk of the database server during execution of the application.

**[System Processing]**

Processing will be aborted.

**[Action]**

Delete user data stored in the database server to free up space on the disk.

---

**2.2.65 10168**

---

**a backup is not in progress****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.2.66 10169**

---

**invalid data in file "@1@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.2.67 10170**

---

**pg\_stop\_backup cleanup done, waiting for required WAL segments to be archived****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.2.68 10171**

---

**pg\_stop\_backup still waiting for all required WAL segments to be archived (@1@ seconds elapsed)**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.2.69 10172

---

### **pg\_stop\_backup complete, all required WAL segments have been archived**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.70 10173

---

### **WAL archiving is not enabled; you must ensure that all required WAL segments are copied through other means to complete the backup**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.71 10174

---

### **must be superuser to switch transaction log files**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.72 10175

---

### **must be superuser to create a restore point**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.73 10176

---

### WAL level not sufficient for creating a restore point

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.74 10177

---

### value too long for restore point (maximum @1@ characters)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.75 10179

---

### could not read from log segment @1@, offset @2@: @3@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.76 10180

---

### received promote request

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.77 10181

---

**trigger file found: @1@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.78 10182

---

**database is not accepting commands to avoid wraparound data loss in database "@1@"**

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.2.79 10183

---

**database is not accepting commands to avoid wraparound data loss in database with OID @1@**

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.2.80 10184

---

**database "@1@" must be vacuumed within @2@ transactions**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.2.81 10185

---

**database with OID @1@ must be vacuumed within @2@ transactions**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.2.82 10186

---

**transaction ID wrap limit is @1@, limited by database with OID @2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.2.83 10187

---

**transaction identifier "@1@" is too long**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.84 10188

---

**prepared transactions are disabled**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.85 10189

---

**transaction identifier "@1@" is already in use**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.86 10190

---

**maximum number of prepared transactions reached**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.87 10191

---

**prepared transaction with identifier "@1@" is busy**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.88 10192

---

**permission denied to finish prepared transaction**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.89 10193

---

### prepared transaction belongs to another database

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.90 10194

---

### prepared transaction with identifier "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.91 10195

---

### two-phase state file maximum length exceeded

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.2.92 10196

---

### could not create two-phase state file "@1@": @2@

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.2.93 10197

---

**could not write two-phase state file: @1@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.2.94 10198

---

**could not seek in two-phase state file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.2.95 10199

---

**could not close two-phase state file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3 Message Numbers Beginning with 10200

---

### 2.3.1 10200

---

**could not open two-phase state file "@1@": @2@**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.3.2 10201

---

### could not stat two-phase state file "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.3.3 10202

---

### could not read two-phase state file "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.3.4 10203

---

### two-phase state file for transaction @1@ is corrupt

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3.5 10204

---

### could not remove two-phase state file "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.3.6 10205

---

### could not recreate two-phase state file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3.7 10206

---

### could not fsync two-phase state file: @1@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3.8 10207

---

### could not fsync two-phase state file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3.9 10208

---

### could not close two-phase state file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3.10 10209

---

### removing future two-phase state file "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.3.11 10210

---

### removing corrupt two-phase state file "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.3.12 10211

---

### removing stale two-phase state file "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.3.13 10212

---

### recovering prepared transaction @1@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

### 2.3.14 10213

---

**file "@1@" doesn't exist, reading as zeroes**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

### 2.3.15 10214

---

**could not access status of transaction @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.3.16 10215

---

**could not truncate directory "@1@": apparent wraparound**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

### 2.3.17 10216

---

**removing file "@1@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

### 2.3.18 10217

---

**cannot have more than 2<sup>32</sup>-2 commands in a transaction**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.19 10218

---

**maximum number of committed subtransactions (@1@) exceeded**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.20 10219

---

**cannot PREPARE a transaction that has operated on temporary tables**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.21 10220

---

**@1@ cannot run inside a transaction block**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.22 10221

---

### @1@ cannot run inside a subtransaction

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.23 10222

---

### @1@ cannot be executed from a function or multi-command string

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.24 10223

---

### @1@ can only be used in transaction blocks

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.25 10224

---

### there is already a transaction in progress

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.3.26 10225

---

### there is no transaction in progress

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.3.27 10226

---

### no such savepoint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.28 10227

---

### cannot have more than 2<sup>32</sup>-1 subtransactions in a transaction

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.29 10228

---

### index "@1@" is not a btree

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.3.30 10229

---

**version mismatch in index "@1@": file version @2@, code version @3@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.3.31 10230

---

**index "@1@" contains unexpected zero page at block @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.3.32 10231

---

**index "@1@" contains corrupted page at block @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.3.33 10232

---

**duplicate key value violates unique constraint "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.34 10233

---

---

### failed to re-find tuple within index "@1@"

#### [Description]

An unexpected error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

Contact Fujitsu technical support.

---

## 2.3.35 10234

---

### row is too big: size @1@, maximum size @2@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.36 10235

---

### "@1@" is not an index

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.37 10236

---

### "@1@" is a composite type

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.38 10237

---

### could not obtain lock on row in relation "@1@"

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.3.39 10238

---

### hash indexes do not support whole-index scans

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.40 10239

---

### index "@1@" is not a hash index

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3.41 10240

---

### index "@1@" has wrong hash version

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3.42 10241

---

### out of overflow pages in hash index "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.43 10242

---

**index row size @1@ exceeds hash maximum @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.44 10243

---

**column "@1@" cannot be declared SETOF**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.45 10244

---

**number of columns (@1@) exceeds limit (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.46 10245

---

**user-defined relation parameter types limit exceeded**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.3.47 10246

---

#### RESET must not include values for parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.3.48 10247

---

#### unrecognized parameter namespace "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.3.49 10248

---

#### unrecognized parameter "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.3.50 10249

---

#### parameter "@1@" specified more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.51 10250

---

**invalid value for boolean option "@1@": @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.52 10251

---

**invalid value for integer option "@1@": @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.53 10252

---

**value @1@ out of bounds for option "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.54 10253

---

**invalid value for floating point option "@1@": @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.55 10254

---

**unsupported format code: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.56 10255

---

**number of index columns (@1@) exceeds limit (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.57 10256

---

**index row requires @1@ bytes, maximum size is @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.58 10257

---

**picksplit method for column @1@ of index "@2@" failed**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.3.59 10259

---

---

### **index "@1@" contains an inner tuple marked as invalid**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.3.60 10260**

---

### **aggregate @1@ needs to have compatible input type and transition type**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.3.61 10261**

---

### **could not create exclusion constraint "@1@"**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.3.62 10262**

---

### **conflicting key value violates exclusion constraint "@1@"**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.3.63 10263**

---

### **RIGHT JOIN is only supported with merge-joinable join conditions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.64 10264

---

### **FULL JOIN is only supported with merge-joinable join conditions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.65 10265

---

### **could not determine actual type of argument declared @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.66 10266

---

### **@1@ is not allowed in a SQL function**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.67 10267

---

### **@1@ is not allowed in a non-volatile function**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.68 10268

---

#### could not determine actual result type for function declared to return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.69 10269

---

#### set-valued function called in context that cannot accept a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.70 10270

---

#### return type mismatch in function declared to return @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.71 10271

---

#### return type @1@ is not supported for SQL functions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.72 10272

---

**cannot change sequence "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.73 10273

---

**cannot change TOAST relation "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.74 10274

---

**cannot insert into view "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.75 10275

---

**cannot update view "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.76 10276

---

### cannot copy from view "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.77 10278

---

### cannot change relation "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.78 10279

---

### cannot lock rows in sequence "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.79 10280

---

### cannot lock rows in TOAST relation "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.80 10281

---

---

### cannot lock rows in view "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.81 10282

---

### cannot lock rows in foreign table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.82 10283

---

### cannot lock rows in relation "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.83 10284

---

### null value in column "@1@" violates not-null constraint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.3.84 10285

---

### new row for relation "@1@" violates check constraint "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.3.85 10286

---

#### could not serialize access due to concurrent update

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.3.86 10287

---

#### ON COMMIT can only be used on temporary tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.3.87 10288

---

#### cannot create temporary table within security-restricted operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.3.88 10289

---

#### could not rewind hash-join temporary file: @1@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3.89 10290

---

**could not write to hash-join temporary file: @1@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.3.90 10291

---

**could not read from hash-join temporary file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.3.91 10292

---

**relation "@1@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.92 10293

---

**cursor "@1@" is not a SELECT query**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.93 10294

---

**cursor "@1@" is held from a previous transaction**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.94 10295

---

**cursor "@1@" has multiple FOR UPDATE/SHARE references to table "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.95 10296

---

**cursor "@1@" does not have a FOR UPDATE/SHARE reference to table "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.96 10297

---

**cursor "@1@" is not positioned on a row**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.97 10298

---

### cursor "@1@" is not a simply updatable scan of table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.3.98 10299

---

### type of parameter @1@ (@2@) does not match that when preparing the plan (@3@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4 Message Numbers Beginning with 10300

---

### 2.4.1 10300

---

#### no value found for parameter @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.4.2 10301

---

#### more than one row returned by a subquery used as an expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.4.3 10302

---

#### frame starting offset must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.4.4 10303

---

#### frame starting offset must not be negative

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.4.5 10304

---

#### frame ending offset must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.4.6 10305

---

#### frame ending offset must not be negative

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.4.7 10306

---

---

### transaction left non-empty SPI stack

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.4.8 10307

---

### subtransaction left non-empty SPI stack

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.4.9 10308

---

### cannot open multi-query plan as cursor

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.4.10 10309

---

### cannot open @1@ query as cursor

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.4.11 10310

---

### **DECLARE SCROLL CURSOR ... FOR UPDATE/SHARE is not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.4.12 10311**

---

#### **number of array dimensions (@1@) exceeds the maximum allowed (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.4.13 10312**

---

#### **array subscript in assignment must not be null**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.4.14 10313**

---

#### **attribute @1@ has wrong type**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.4.15 10314**

---

#### **table row type and query-specified row type do not match**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.16 10315

---

**cannot pass more than @1@ argument to a function  
cannot pass more than @2@ arguments to a function**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.17 10316

---

**functions and operators can take at most one set argument**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.18 10317

---

**function returning setof record called in context that cannot accept type record**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.19 10318

---

**function return row and query-specified return row do not match**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.20 10319

---

### table-function protocol for materialize mode was not followed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.21 10320

---

### unrecognized table-function returnMode: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.22 10321

---

### function returning set of rows cannot return null value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.23 10322

---

### rows returned by function are not all of the same row type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.24 10323

---

### IS DISTINCT FROM does not support set arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.25 10324

---

### op ANY/ALL (array) does not support set arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.26 10325

---

### cannot merge incompatible arrays

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.27 10326

---

### multidimensional arrays must have array expressions with matching dimensions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.28 10327

---

### NULLIF does not support set arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.29 10328

---

### domain @1@ does not allow null values

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.30 10329

---

### value for domain @1@ violates check constraint "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.31 10330

---

### aggregate function calls cannot be nested

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.32 10331

---

### window function calls cannot be nested

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.33 10332

---

### target type is not an array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.34 10333

---

### ROW() column has type @1@ instead of type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.35 10334

---

### could not identify a comparison function for type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.36 10335

---

---

### OFFSET must not be negative

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.4.37 10336

---

### LIMIT must not be negative

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.4.38 10337

---

### @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.4.39 10338

---

### could not find array type for data type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.4.40 10339

---

### cannot assign to system column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.41 10340

---

### cannot set an array element to DEFAULT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.42 10341

---

### cannot set a subfield to DEFAULT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.43 10342

---

### column "@1@" is of type @2@ but default expression is of type @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.44 10343

---

### row expansion via "\*" is not supported here

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.45 10344

---

**cannot assign to field "@1@" of column "@2@" because its type @3@ is not a composite type**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.46 10345

---

**cannot assign to field "@1@" of column "@2@" because there is no such column in data type @3@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.47 10346

---

**array assignment requires type @1@ but expression is of type @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.48 10347

---

**column "@1@" is of type @2@ but expression is of type @3@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.49 10348

---

### cannot cast type @1@ to @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.50 10349

---

### column "@1@" of relation "@2@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.51 10350

---

### column name "@1@" specified more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.52 10351

---

### column reference "@1@" is ambiguous

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.53 10352

---

**cross-database references are not implemented: "@1@.@2@.@3@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.54 10353

---

**improper qualified name (too many dotted names): @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.55 10354

---

**SELECT \* with no tables specified is not valid**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.56 10355

---

**there is no parameter \$@1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.57 10356

---

### inconsistent types deduced for parameter \$@1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.58 10357

---

### could not determine data type of parameter \$@1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.59 10358

---

### identifier "@1@" will be truncated to "@2@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.4.60 10363

---

### aggregate functions are not allowed in DEFAULT expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.61 10365

---

### column name "@1@" appears more than once in USING clause

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.62 10366

---

### common column name "@1@" appears more than once in left table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.63 10367

---

### column "@1@" specified in USING clause does not exist in left table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.64 10368

---

### common column name "@1@" appears more than once in right table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.65 10369

---

---

### **column "@1@" specified in USING clause does not exist in right table**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.4.66 10370**

---

### **column alias list for "@1@" has too many entries**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.4.67 10371**

---

### **argument of @1@ must not contain variables**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.4.68 10372**

---

### **aggregate functions are not allowed in @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.4.69 10374**

---

### **@1@ "@2@" is ambiguous**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.70 10375

---

### non-integer constant in @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.71 10376

---

### @1@ position @2@ is not in select list

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.72 10377

---

### window "@1@" is already defined

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.73 10378

---

### schema "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.74 10379

---

**cannot override PARTITION BY clause of window "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.75 10380

---

**cannot override ORDER BY clause of window "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.76 10382

---

**in an aggregate with DISTINCT, ORDER BY expressions must appear in argument list**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.77 10383

---

**for SELECT DISTINCT, ORDER BY expressions must appear in select list**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.78 10384

---

### **SELECT DISTINCT ON expressions must match initial ORDER BY expressions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.79 10385

---

### **"@1@" is not a valid operator name**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.80 10386

---

### **extension "@1@" already exists, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.4.81 10387

---

### **array of serial is not implemented**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.82 10388

---

**@1@ will create implicit sequence "@2@" for serial column "@3@.@4@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.4.83 10389

---

**conflicting NULL/NOT NULL declarations for column "@1@" of table "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.84 10390

---

**multiple default values specified for column "@1@" of table "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.85 10391

---

**referenced relation "@1@" is not a table**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.86 10392

---

### multiple primary keys for table "@1@" are not allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.87 10393

---

### cannot use an existing index in CREATE TABLE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.88 10394

---

### conversion "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.89 10395

---

### index "@1@" is already associated with a constraint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.4.90 10396

---

---

### **index "@1@" does not belong to table "@2@"**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.4.91 10397**

---

### **index "@1@" is not valid**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.4.92 10399**

---

### **"@1@" is not a unique index**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5 Message Numbers Beginning with 10400**

---

### **2.5.1 10400**

---

#### **index "@1@" contains expressions**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.2 10401

---

### "@1@" is a partial index

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.3 10402

---

### "@1@" is a deferrable index

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.4 10403

---

### index "@1@" does not have default sorting behavior

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.5 10404

---

### column "@1@" named in key does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.6 10405

---

---

### **column "@1@" appears twice in primary key constraint**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.7 10406**

---

### **column "@1@" appears twice in unique constraint**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.8 10407**

---

### **index expression cannot return a set**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.9 10408**

---

### **index expressions and predicates can refer only to the table being indexed**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.10 10409**

---

### **rule WHERE condition cannot contain references to other relations**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.11 10412

---

### rules with WHERE conditions can only have SELECT, INSERT, UPDATE, or DELETE actions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.12 10413

---

### conditional UNION/INTERSECT/EXCEPT statements are not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.13 10414

---

### ON SELECT rule cannot use OLD

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.14 10415

---

### ON SELECT rule cannot use NEW

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.15 10416

---

### ON INSERT rule cannot use OLD

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.16 10417

---

### ON DELETE rule cannot use NEW

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.17 10418

---

### cannot refer to OLD within WITH query

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.18 10419

---

### cannot refer to NEW within WITH query

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.19 10420

---

### **misplaced DEFERRABLE clause**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.20 10421

---

### **multiple DEFERRABLE/NOT DEFERRABLE clauses not allowed**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.21 10422

---

### **misplaced NOT DEFERRABLE clause**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.22 10423

---

### **constraint declared INITIALLY DEFERRED must be DEFERRABLE**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.23 10424

---

### **misplaced INITIALLY DEFERRED clause**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.24 10425

---

### **multiple INITIALLY IMMEDIATE/DEFERRED clauses not allowed**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.25 10426

---

### **misplaced INITIALLY IMMEDIATE clause**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.26 10427

---

### **collations are not supported by type @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.27 10428

---

---

### **CREATE specifies a schema (@1@) different from the one being created (@2@)**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.28 10429**

---

### **table reference "@1@" is ambiguous**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.29 10430**

---

### **table reference @1@ is ambiguous**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.30 10431**

---

### **table name "@1@" specified more than once**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.31 10432**

---

### **WITH query "@1@" has @2@ columns available but @3@ columns specified**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.32 10434

---

### **relation "@1@.@2@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.33 10435

---

### **type "@1@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.34 10436

---

### **a column definition list is only allowed for functions returning "record"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.35 10437

---

### **a column definition list is required for functions returning "record"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.36 10438

---

### function "@1@" in FROM has unsupported return type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.37 10439

---

### VALUES lists "@1@" have @2@ columns available but @3@ columns specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.38 10440

---

### tables can have at most @1@ columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.39 10441

---

### WITH query "@1@" does not have a RETURNING clause

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.40 10442

---

**column @1@ of relation "@2@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.41 10443

---

**invalid reference to FROM-clause entry for table "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.42 10444

---

**missing FROM-clause entry for table "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.43 10445

---

**unrecognized role option "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.44 10446

---

### current database cannot be renamed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.45 10447

---

### time zone interval must be HOUR or HOUR TO MINUTE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.46 10449

---

### MATCH PARTIAL not yet implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.47 10451

---

### CREATE ASSERTION is not yet implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.48 10452

---

---

### **DROP ASSERTION is not yet implemented**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.49 10453**

---

### **RECHECK is no longer required**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.50 10454**

---

### **missing argument**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.51 10457**

---

### **number of columns does not match number of values**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.5.52 10458**

---

### **LIMIT #,# syntax is not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.53 10459

---

### VALUES in FROM must have an alias

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.54 10460

---

### subquery in FROM must have an alias

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.5.55 10461

---

### precision for type float must be at least 1 bit

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.56 10462

---

### precision for type float must be less than 54 bits

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.57 10463

---

### UNIQUE predicate is not yet implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.58 10464

---

### RANGE PRECEDING is only supported with UNBOUNDED

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.59 10465

---

### RANGE FOLLOWING is only supported with UNBOUNDED

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.60 10466

---

### frame start cannot be UNBOUNDED FOLLOWING

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.61 10467

---

### frame starting from following row cannot end with current row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.62 10468

---

### frame end cannot be UNBOUNDED PRECEDING

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.63 10469

---

### frame starting from current row cannot have preceding rows

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.64 10470

---

### frame starting from following row cannot have preceding rows

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.65 10471

---

### type modifier cannot have parameter name

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.66 10472

---

### wrong number of parameters on left side of OVERLAPS expression

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.67 10473

---

### wrong number of parameters on right side of OVERLAPS expression

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.68 10474

---

### syntax error

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.69 10475

---

---

### multiple ORDER BY clauses not allowed

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.70 10476

---

### multiple OFFSET clauses not allowed

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.71 10477

---

### multiple LIMIT clauses not allowed

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.72 10478

---

### multiple WITH clauses not allowed

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.73 10479

---

### OUT and INOUT arguments aren't allowed in TABLE functions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.74 10480

---

### multiple COLLATE clauses not allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.75 10481

---

### operator does not exist: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.76 10482

---

### could not identify an ordering operator for type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.5.77 10483

---

### could not identify an equality operator for type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.78 10484

---

**operator requires run-time type coercion: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.79 10485

---

**operator @1@ is not commutative**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.80 10486

---

**operator is only a shell: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.81 10487

---

**op ANY/ALL (array) requires array on right side**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.82 10488

---

### op ANY/ALL (array) requires operator to yield boolean

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.83 10489

---

### op ANY/ALL (array) requires operator not to return a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.84 10490

---

### column "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.85 10491

---

### column "@1@" not found in data type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.86 10492

---

### could not identify column "@1@" in record data type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.87 10493

---

### column notation .@1@ applied to type @2@, which is not a composite type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.88 10494

---

### function @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.89 10495

---

### NULLIF requires = operator to yield boolean

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.5.90 10498

---

---

### subquery must return only one column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6 Message Numbers Beginning with 10500

---

### 2.6.1 10500

---

#### subquery has too many columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.6.2 10501

---

#### subquery has too few columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.6.3 10502

---

#### cannot determine type of empty array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.4 10503

---

### could not find range type for data type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.5 10504

---

### unnamed XML attribute value must be a column reference

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.6 10505

---

### unnamed XML element value must be a column reference

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.7 10506

---

### XML attribute name "@1@" appears more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.8 10507

---

---

### cannot cast XMLSERIALIZE result to @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.9 10508

---

### unequal number of entries in row expressions

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.10 10509

---

### cannot compare rows of zero length

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.11 10510

---

### row comparison operator must yield type boolean, not type @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.12 10511

---

### row comparison operator must not return a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.13 10512

---

### could not determine interpretation of row comparison operator @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.14 10513

---

### IS DISTINCT FROM requires = operator to yield boolean

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.15 10515

---

### VALUES lists must all be the same length

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.16 10520

---

### INSERT has more expressions than target columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.17 10521

---

### INSERT has more target columns than expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.18 10522

---

### DEFAULT can only appear in a VALUES list within INSERT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.19 10525

---

### invalid UNION/INTERSECT/EXCEPT ORDER BY clause

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.20 10526

---

### INTO is only allowed on first SELECT of UNION/INTERSECT/EXCEPT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.21 10527

---

**UNION/INTERSECT/EXCEPT member statement cannot refer to other relations of same query level**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.22 10528

---

**each @1@ query must have the same number of columns**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.23 10535

---

**cannot specify both SCROLL and NO SCROLL**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.24 10537

---

**DECLARE CURSOR must not contain data-modifying statements in WITH**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.25 10538

---

### **DECLARE CURSOR WITH HOLD ... @1@ is not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.26 10539

---

### **DECLARE INSENSITIVE CURSOR ... @1@ is not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.27 10552

---

### **aggregate function calls cannot contain window function calls**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.28 10558

---

### **window functions are not allowed in JOIN conditions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.29 10562

---

### column "@1@.@2@" must appear in the GROUP BY clause or be used in an aggregate function

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.30 10563

---

### subquery uses ungrouped column "@1@.@2@" from outer query

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.31 10564

---

### parameter name "@1@" used more than once

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.32 10565

---

### positional argument cannot follow named argument

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.6.33 10566

---

#### @1@(\*) specified, but @2@ is not an aggregate function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.6.34 10567

---

#### DISTINCT specified, but @1@ is not an aggregate function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.6.35 10568

---

#### ORDER BY specified, but @1@ is not an aggregate function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.6.36 10569

---

#### OVER specified, but @1@ is not a window function nor an aggregate function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.6.37 10570

---

---

### **function @1@ is not unique**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.6.38 10571**

---

### **database "@1@" does not exist**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.6.39 10572**

---

### **@1@(\*) must be used to call a parameterless aggregate function**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.6.40 10573**

---

### **aggregates cannot return sets**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.6.41 10574**

---

### **aggregates cannot use named arguments**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.42 10576

---

### **DISTINCT is not implemented for window functions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.43 10577

---

### **aggregate ORDER BY is not implemented for window functions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.44 10578

---

### **window functions cannot return sets**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.45 10580

---

### **extension "@1@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.46 10582

---

### aggregate @1@(\*) does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.47 10583

---

### server "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.48 10584

---

### function "@1@" is an aggregate function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.49 10585

---

### argument of @1@ must be a type name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.50 10586

---

**argument of @1@ must not return a set**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.51 10587

---

**argument of @1@ must be type boolean, not type @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.52 10588

---

**@1@ types @2@ and @3@ cannot be matched**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.53 10589

---

**@1@ could not convert type @2@ to @3@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.54 10590

---

### arguments declared "anyelement" are not all alike

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.55 10591

---

### arguments declared "anyarray" are not all alike

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.56 10592

---

### argument declared "anyarray" is not an array but type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.57 10593

---

### argument declared "anyarray" is not consistent with argument declared "anyelement"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.58 10594

---

---

### could not determine polymorphic type because input has type "unknown"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.59 10595

---

### type matched to anynonarray is an array type: @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.60 10596

---

### type matched to anyenum is not an enum type: @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.61 10597

---

### recursive reference to query "@1@" must not appear within its non-recursive term

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.6.62 10598

---

### recursive reference to query "@1@" must not appear within a subquery

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.6.63 10599

---

### **recursive reference to query "@1@" must not appear within an outer join**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7 Message Numbers Beginning with 10600

---

### 2.7.1 10600

---

#### **recursive reference to query "@1@" must not appear within INTERSECT**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.7.2 10601

---

#### **recursive reference to query "@1@" must not appear within EXCEPT**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.7.3 10602

---

#### **WITH query name "@1@" specified more than once**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.4 10604

---

### **WITH clause containing a data-modifying statement must be at the top level**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.5 10605

---

### **recursive query "@1@" column @2@ has type @3@ in non-recursive term but type @4@ overall**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.6 10606

---

### **recursive query "@1@" column @2@ has collation "@3@" in non-recursive term but collation "@4@" overall**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.7 10607

---

### **table "@1@" has @2@ columns available but @3@ columns specified**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.8 10608

---

### mutual recursion between WITH items is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.9 10609

---

### recursive query "@1@" must not contain data-modifying statements

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.10 10610

---

### recursive query "@1@" does not have the form non-recursive-term UNION [ALL] recursive-term

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.11 10611

---

### ORDER BY in a recursive query is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.12 10612

---

### OFFSET in a recursive query is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.13 10613

---

### LIMIT in a recursive query is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.14 10614

---

### FOR UPDATE/SHARE in a recursive query is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.15 10615

---

### recursive reference to query "@1@" must not appear more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.16 10616

---

### unsafe use of string constant with Unicode escapes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.17 10617

---

### invalid Unicode escape

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.18 10618

---

### unsafe use of \\' in a string literal

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.19 10619

---

### @1@ at end of input

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.20 10620

---

[@1@ at or near "@2@"](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.21 10621

---

[nonstandard use of \\' in a string literal](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.22 10622

---

[nonstandard use of \\\ in a string literal](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.23 10623

---

[nonstandard use of escape in a string literal](#)

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.7.24 10624

---

### collation mismatch between implicit collations "@1@" and "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.25 10625

---

### collation mismatch between explicit collations "@1@" and "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.26 10626

---

### target lists can have at most @1@ entries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.27 10627

---

### cannot subscript type @1@ because it is not an array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.28 10628

---

### array subscript must have type integer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.29 10629

---

### array assignment to "@1@" requires type @2@ but expression is of type @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.30 10630

---

### improper @1@TYPE reference (too few dotted names): @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.31 10631

---

### improper @1@TYPE reference (too many dotted names): @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.32 10632

---

### type reference @1@ converted to @2@

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.7.33 10633

---

### return type @1@ is only a shell

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.34 10634

---

### type modifier cannot be specified for shell type "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.35 10635

---

### type modifier is not allowed for type "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.36 10636

---

### type modifiers must be simple constants or identifiers

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.37 10637

---

### invalid type name "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.38 10638

---

### canceling the wait for synchronous replication and terminating connection due to administrator command

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.7.39 10639

---

### canceling wait for synchronous replication due to user request

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.7.40 10640

---

**standby "@1@" now has synchronous standby priority @2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.7.41 10641

---

**standby "@1@" is now the synchronous standby with priority @2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.7.42 10642

---

**could not connect to the primary server: @1@**

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
- b) If the total number of update records in a single transaction is high, split it into short transactions.
- c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

- a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.7.43 10643

---

### could not receive database system identifier and timeline ID from the primary server: @1@

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.7.44 10644

---

### invalid response from primary server

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.7.45 10645

---

### database system identifier differs between the primary and standby

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.46 10646

---

### highest timeline @1@ of the primary is behind recovery timeline @2@

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.7.47 10647

---

### could not start WAL streaming: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.7.48 10649

---

### socket not open

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.7.49 10650

---

### select() failed: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.7.50 10651

---

### could not receive data from WAL stream: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.7.51 10652

---

---

### replication terminated by primary server

[Description]

Primary server has stopped.

[System Processing]

Processing will be aborted.

[Action]

No action is required.

---

## 2.7.52 10653

---

### could not send data to WAL stream: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.7.53 10654

---

### syntax error: unexpected character "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.7.54 10655

---

### base backup could not send data, aborting backup

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.7.55 10656

---

### duplicate option "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.56 10658

---

### could not stat file or directory "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.7.57 10659

---

### could not remove symbolic link "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.7.58 10660

---

### skipping special file "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.7.59 10663

---

### unexpected EOF on standby connection

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.7.60 10664

---

### invalid standby message type "@1@"

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.7.61 10667

---

### terminating walsender process due to replication timeout

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.7.62 10668

---

### standby "@1@" has now caught up with primary

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.7.63 10669

---

### number of requested standby connections exceeds max\_wal\_senders (currently @1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.64 10670

---

### requested WAL segment @1@ has already been removed

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.7.65 10671

---

### could not read from log segment @1@, offset @2@, length @3@: @4@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.7.66 10672

---

### materialize mode required, but it is not allowed in this context

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.67 10673

---

### terminating walreceiver process due to administrator command

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.7.68 10674

---

**cannot continue WAL streaming, recovery has already ended**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.7.69 10675

---

**authentication failed for user "@1@": host rejected**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.70 10677

---

**"trust" authentication failed for user "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.71 10678

---

**Ident authentication failed for user "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.72 10679

---

### Peer authentication failed for user "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.73 10680

---

### password authentication failed for user "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.74 10681

---

### GSSAPI authentication failed for user "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.75 10682

---

### SSPI authentication failed for user "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.76 10683

---

### PAM authentication failed for user "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.77 10684

---

### LDAP authentication failed for user "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.78 10685

---

### certificate authentication failed for user "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.79 10686

---

### RADIUS authentication failed for user "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.80 10687

---

---

**authentication failed for user "@1@": invalid authentication method****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.7.81 10689**

---

**connection requires a valid client certificate****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.7.82 10690**

---

**pg\_hba.conf rejects replication connection for host "@1@", user "@2@", @3@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.7.83 10691**

---

**pg\_hba.conf rejects replication connection for host "@1@", user "@2@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.7.84 10692**

---

**pg\_hba.conf rejects connection for host "@1@", user "@2@", database "@3@", @4@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.85 10693

---

### **pg\_hba.conf rejects connection for host "@1@", user "@2@", database "@3@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.86 10694

---

### **no pg\_hba.conf entry for replication connection from host "@1@", user "@2@", @3@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.87 10695

---

### **no pg\_hba.conf entry for replication connection from host "@1@", user "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.88 10696

---

### **no pg\_hba.conf entry for host "@1@", user "@2@", database "@3@", @4@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.89 10697

---

**no pg\_hba.conf entry for host "@1@", user "@2@", database "@3@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.90 10698

---

**MD5 authentication is not supported when "db\_user\_namespace" is enabled**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.7.91 10699

---

**expected password response, got message type @1@**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8 Message Numbers Beginning with 10700

---

### 2.8.1 10700

---

**invalid password packet size**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.2 10707

---

### GSSAPI is not supported in protocol version 2

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.3 10708

---

### out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.8.4 10709

---

### expected GSS response, got message type @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.5 10710

---

### SSPI is not supported in protocol version 2

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.6 10711

---

### expected SSPI response, got message type @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.7 10712

---

### could not create socket for Ident connection: @1@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.8 10713

---

### could not bind to local address "@1@": @2@

#### [Description]

The database server was disconnected during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.9 10714

---

### could not connect to Ident server at address "@1@", port @2@: @3@

#### [Description]

The database server was disconnected during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.10 10715

---

**could not send query to Ident server at address "@1@", port @2@: @3@**

### [Description]

The database server was disconnected during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
  - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.11 10716

---

**could not receive response from Ident server at address "@1@", port @2@: @3@**

### [Description]

The database server was disconnected during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
- b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.12 10717

---

### invalidly formatted response from Ident server: "@1@"

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.13 10718

---

### peer authentication is not supported on this platform

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.14 10719

---

### could not get peer credentials: @1@

#### [Description]

The database server was disconnected during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.

- b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
  - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.15 10720

---

### could not look up local user ID @1@: @2@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.16 10721

---

### empty password returned by client

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.17 10722

---

### error from underlying PAM layer: @1@

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.18 10723

---

### could not create PAM authenticator: @1@

#### [Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.8.19 10724

---

**pam\_set\_item(PAM\_USER) failed: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.8.20 10725

---

**pam\_set\_item(PAM\_CONV) failed: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.8.21 10726

---

**pam\_authenticate failed: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.8.22 10727

---

**pam\_acct\_mgmt failed: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.23 10728

---

### could not release PAM authenticator: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.24 10729

---

### could not initialize LDAP: error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.25 10730

---

### could not set LDAP protocol version: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.26 10731

---

### could not load wldap32.dll

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.27 10732

---

### could not load function \_ldap\_start\_tls\_sA in wldap32.dll

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.28 10733

---

### could not start LDAP TLS session: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.29 10734

---

### LDAP server not specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.30 10735

---

### invalid character in user name for LDAP authentication

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.31 10736

---

---

**could not perform initial LDAP bind for ldapbinddn "@1@" on server "@2@" : @3@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.8.32 10737**

---

**could not search LDAP for filter "@1@" on server "@2@" : @3@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.8.33 10738**

---

**LDAP search for filter "@1@" on server "@2@" returned no entries.****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.8.34 10740**

---

**could not get dn for the first entry matching "@1@" on server "@2@" : @3@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.8.35 10741**

---

**could not unbind after searching for user "@1@" on server "@2@" : @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.36 10742

---

### LDAP login failed for user "@1@" on server "@2@" : @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.37 10743

---

### certificate authentication failed for user "@1@" : client certificate contains no user name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.38 10744

---

### RADIUS server not specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.39 10745

---

### RADIUS secret not specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.40 10746

---

### could not translate RADIUS server name "@1@" to address: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.41 10747

---

### RADIUS authentication does not support passwords longer than 16 characters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.42 10748

---

### could not generate random encryption vector

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.43 10749

---

### could not perform MD5 encryption of password

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.44 10750

---

### could not create RADIUS socket: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.45 10751

---

### could not bind local RADIUS socket: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.46 10752

---

### could not send RADIUS packet: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.47 10753

---

### timeout waiting for RADIUS response

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.48 10754

---

**could not check status on RADIUS socket: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.49 10755

---

**could not read RADIUS response: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.50 10756

---

**RADIUS response was sent from incorrect port: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.51 10757

---

**RADIUS response too short: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.52 10759

---

---

**RADIUS response is to a different request: @1@ (should be @2@)****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.8.53 10760**

---

**could not perform MD5 encryption of received packet****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.8.54 10761**

---

**RADIUS response has incorrect MD5 signature****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.8.55 10762**

---

**RADIUS response has invalid code (@1@) for user "@2@"****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.8.56 10763**

---

**SSL error: @1@**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.57 10764

---

### unrecognized SSL error code: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.58 10767

---

### could not create SSL context: @1@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.59 10768

---

### could not load server certificate file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.60 10769

---

### could not access private key file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.61 10770

---

### private key file "@1@" has group or world access

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.62 10771

---

### could not load private key file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.63 10772

---

### check of private key failed: @1@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.64 10774

---

### could not load root certificate file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.65 10775

---

### SSL certificate revocation list file "@1@" ignored

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.8.66 10776

---

### could not load SSL certificate revocation list file "@1@" : @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.8.67 10777

---

### could not initialize SSL connection: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.68 10778

---

### could not set SSL socket: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.69 10779

---

### could not accept SSL connection: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.70 10780

---

### could not accept SSL connection: EOF detected

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.71 10781

---

### could not accept SSL connection: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.72 10782

---

### SSL certificate's common name contains embedded null

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.8.73 10783

---

### SSL connection from "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.8.74 10784

---

### could not translate host name "@1@", service "@2@" to address: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.75 10785

---

### could not translate service "@1@" to address: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.76 10786

---

### could not bind to all requested addresses: MAXLISTEN (@1@) exceeded

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.77 10787

---

---

**could not create @1@ socket: @2@**

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.78 10788

---

**setsockopt(SO\_REUSEADDR) failed: @1@**

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:

- a) Confirm that the database server has not stopped.
- b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.79 10789

---

**setsockopt(IPV6\_V6ONLY) failed: @1 @**

### [Description]

The database server was disconnected during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.80 10790

---

**could not bind @1@ socket: @2@**

### [Description]

The database server was disconnected during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.

- b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
  - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.81 10791

---

**could not listen on @1@ socket: @2@**

### [Description]

The database server was disconnected during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
  - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.82 10792

---

**type @1@ does not exist**

### [Description]

An error occurred during execution of the application or command.

### [System Processing]

Processing will be aborted.

### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.8.83 10793

---

**could not set group of file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.84 10794

---

### could not set permissions of file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.8.85 10795

---

### could not accept new connection: @1@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
- b) If the total number of update records in a single transaction is high, split it into short transactions.
- c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

- a) Confirm that the database server has not stopped.
- b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.8.86 10796

---

---

**could not set socket to nonblocking mode: @1@****[Description]**

An error occurred during communication between the application and the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

**2.8.87 10798**

---

**could not receive data from client: @1@****[Description]**

An error occurred during communication between the application and the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

**2.8.88 10799**

---

**unexpected EOF within message length word****[Description]**

An error occurred during communication between the application and the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

**2.9 Message Numbers Beginning with 10800**

---

**2.9.1 10800**

---

**invalid message length****[Description]**

An error occurred during communication between the application and the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.9.2 10801

---

### incomplete message from client

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.9.3 10802

---

### could not send data to client: @1@

[Description]

[System Processing]

[Action]

10803

authentication file token too long, skipping: "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.9.4 10804

---

### could not open secondary authentication file "@@1@" as "@2@": @3@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.9.5 10806

---

### authentication option "@1@" is only valid for authentication methods @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.9.6 10807

---

### authentication method "@1@" requires argument "@2@" to be set

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.9.7 10808

---

### local connections are not supported by this build

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.9.8 10809

---

### hostssl requires SSL to be turned on

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.9 10810

---

### hostssl is not supported by this build

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.9.10 10811

---

### invalid connection type "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.11 10812

---

### end-of-line before database specification

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.12 10813

---

### end-of-line before role specification

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.13 10814

---

### end-of-line before IP address specification

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.14 10815

---

### invalid IP address "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.15 10816

---

### specifying both host name and CIDR mask is invalid: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.16 10817

---

### invalid CIDR mask in address "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.17 10818

---

### end-of-line before netmask specification

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.18 10819

---

---

### invalid IP mask "@1@": @2@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.9.19 10820

---

### IP address and mask do not match

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.9.20 10821

---

### end-of-line before authentication method

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.9.21 10822

---

### invalid authentication method "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.9.22 10823

---

### invalid authentication method "@1@": not supported by this build

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.9.23 10825

---

### **gssapi authentication is not supported on local sockets**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.24 10826

---

### **peer authentication is only supported on local sockets**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.25 10827

---

### **cert authentication is only supported on hostssl connections**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.26 10828

---

### **authentication option not in name=value format: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.27 10829

---

### clientcert can only be configured for "hostssl" rows

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.28 10830

---

### client certificates can only be checked if a root certificate store is available

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.9.29 10831

---

### clientcert can not be set to 0 when using "cert" authentication

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.30 10832

---

### invalid LDAP port number: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.31 10833

---

### invalid RADIUS port number: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.32 10834

---

### unrecognized authentication option name: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.33 10835

---

### cannot use ldapbasedn, ldapbinddn, ldapbindpasswd, ldapsearchattribute, or ldapurl together with ldapprefix

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.34 10836

---

### authentication method "ldap" requires argument "ldapbasedn", "ldapprefix", or "ldapsuffix" to be set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.35 10837

---

### could not open configuration file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.9.36 10838

---

### invalid regular expression "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.37 10839

---

### regular expression match for "@1@" failed: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.38 10840

---

### regular expression "@1@" has no subexpressions as requested by backreference in "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.39 10841

---

### missing entry in file "@1@" at end of line @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.40 10842

---

### provided user name (@1@) and authenticated user name (@2@) do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.41 10843

---

### no match in usermap "@1@" for user "@2@" authenticated as "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.42 10844

---

### could not open server file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.9.43 10845

---

### invalid large-object descriptor: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.44 10846

---

### permission denied for large object @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.45 10847

---

### large object descriptor @1@ was not opened for writing

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.46 10848

---

### must be owner of large object @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.47 10849

---

---

**must be superuser to use server-side lo\_import()****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.9.48 10850**

---

**could not read server file "@1@": @2@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.9.49 10851**

---

**could not create server file "@1@": @2@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.9.50 10852**

---

**must be superuser to use server-side lo\_export()****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.9.51 10853**

---

**could not write server file "@1@": @2@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.9.52 10854

---

### could not write file "@1@": @2@

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.9.53 10855

---

### no data left in message

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.9.54 10856

---

### insufficient data left in message

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.55 10857

---

### invalid string in message

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.9.56 10858

---

### invalid message format

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.9.57 10859

---

### "@1@" is not a sequence

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.58 10860

---

### shared tables cannot be toasted after initdb

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.59 10861

---

### cannot drop @1@ because it is required by the database system

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.60 10862

---

### **role @1@ was concurrently dropped**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.61 10863

---

### **tablespace @1@ was concurrently dropped**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.62 10864

---

### **database @1@ was concurrently dropped**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.63 10865

---

### **cannot drop objects owned by @1@ because they are required by the database system**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.64 10866

---

### permission denied to create "@1@.@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.65 10867

---

### joins can have at most @1@ columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.66 10868

---

### column name "@1@" conflicts with a system column name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.67 10869

---

### column "@1@" specified more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.68 10870

---

---

**column "@1@" has type "unknown"****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.9.69 10871**

---

**column "@1@" has pseudo-type @2@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.9.70 10872**

---

**composite type @1@ cannot be made a member of itself****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.9.71 10873**

---

**no collation was derived for column "@1@" with collatable type @2@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.9.72 10874**

---

**relation "@1@" already exists**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.73 10875

---

### type "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.74 10876

---

### check constraint "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.75 10877

---

### constraint "@1@" for relation "@2@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.76 10878

---

### merging constraint "@1@" with inherited definition

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.9.77 10879

---

### cannot use column references in default expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.78 10880

---

### default expression must not return a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.79 10881

---

### cannot use subquery in DEFAULT expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.80 10882

---

### aggregate functions are not allowed in index expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.81 10883

---

### aggregate functions are not allowed in transform expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.82 10884

---

### subfield "@1@" is of type @2@ but expression is of type @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.83 10885

---

### only table "@1@" can be referenced in check constraint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.84 10886

---

### cannot use subquery in check constraint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.85 10887

---

### aggregate functions are not allowed in check constraints

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.86 10888

---

### window functions are not allowed in check constraints

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.87 10889

---

### unsupported ON COMMIT and foreign key combination

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.88 10890

---

### cannot truncate a table referenced in a foreign key constraint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.89 10891

---

---

### invalid type internal size @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.9.90 10892

---

### alignment "@1@" is invalid for passed-by-value type of size @2@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.9.91 10893

---

### internal size @1@ is invalid for passed-by-value type

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.9.92 10894

---

### alignment "@1@" is invalid for variable-length type

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.9.93 10895

---

### fixed-size types must have storage PLAIN

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.94 10896

---

### could not form array type name for type "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.95 10897

---

### cannot determine transition data type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.96 10898

---

### return type of transition function @1@ is not @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.9.97 10899

---

### must not omit initial value when transition function is strict and transition type is not compatible with input type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10 Message Numbers Beginning with 10900

---

### 2.10.1 10900

---

#### cannot determine result data type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.10.2 10901

---

#### unsafe use of pseudo-type "internal"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.10.3 10902

---

#### sort operator can only be specified for single-argument aggregates

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.10.4 10903

---

#### function @1@ returns a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.5 10904

---

### **function @1 @ requires run-time type coercion**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.6 10905

---

### **large object @1 @ does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.7 10906

---

### **primary keys cannot be expressions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.8 10907

---

### **user-defined indexes on system catalog tables are not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.9 10908

---

### concurrent index creation on system catalog tables is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.10 10909

---

### shared indexes cannot be created after initdb

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.11 10910

---

### building index "@1@" on table "@2@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.10.12 10911

---

### cannot reindex temporary tables of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.13 10912

---

**invalid enum label "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.14 10913

---

**"@1@" is not an existing enum label**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.15 10914

---

**ALTER TYPE ADD BEFORE/AFTER is incompatible with binary upgrade**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.16 10915

---

**"@1@" is already an attribute of type @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.17 10916

---

### function "@1@" already exists with same argument types

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.18 10917

---

### cannot change return type of existing function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.19 10918

---

### cannot change name of input parameter "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.20 10919

---

### cannot remove parameter defaults from existing function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.21 10920

---

---

### cannot change data type of existing parameter default value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.10.22 10921

---

### function "@1@" is not an aggregate function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.10.23 10922

---

### "@1@" is an aggregate function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.10.24 10923

---

### function "@1@" is a window function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.10.25 10924

---

### function "@1@" is not a window function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.26 10925

---

### there is no built-in function named "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.27 10926

---

### SQL functions cannot return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.28 10927

---

### SQL functions cannot have arguments of type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.29 10928

---

### invalid fork name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.30 10929

---

### cannot drop @1@ because @2@ requires it

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.31 10930

---

### drop auto-cascades to @1@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.10.32 10931

---

### cannot drop @1@ because other objects depend on it

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.33 10932

---

### cannot drop desired object(s) because other objects depend on them

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.34 10934

---

**constraint "@1@" for domain @2@ already exists**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.35 10935

---

**table "@1@" has multiple constraints named "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.36 10936

---

**constraint "@1@" for table "@2@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.37 10937

---

**grant options can only be granted to roles**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.38 10938

---

**no privileges were granted for column "@1@" of relation "@2@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.39 10939

---

**no privileges were granted for "@1@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.40 10940

---

**not all privileges were granted for column "@1@" of relation "@2@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.41 10941

---

**not all privileges were granted for "@1@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.42 10942

---

**no privileges could be revoked for column "@1@" of relation "@2@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.43 10943

---

**no privileges could be revoked for "@1@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.44 10944

---

**not all privileges could be revoked for column "@1@" of relation "@2@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.45 10945

---

**not all privileges could be revoked for "@1@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.46 10946

---

### invalid privilege type @1 @ for relation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.47 10947

---

### invalid privilege type @1 @ for sequence

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.48 10948

---

### invalid privilege type @1 @ for database

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.49 10949

---

### invalid privilege type @1 @ for domain

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.50 10950

---

### invalid privilege type @1@ for function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.51 10951

---

### invalid privilege type @1@ for large object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.52 10952

---

### invalid privilege type @1@ for language

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.53 10953

---

### invalid privilege type @1@ for schema

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.54 10954

---

### invalid privilege type @1 @ for foreign-data wrapper

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.55 10955

---

### invalid privilege type @1 @ for foreign server

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.56 10956

---

### column privileges are only valid for relations

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.57 10957

---

### conflicting or redundant options

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.58 10958

---

### default privileges cannot be set for columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.59 10959

---

### "@1@" is not a domain

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.60 10960

---

### sequence "@1@" only supports USAGE, SELECT, and UPDATE privileges

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.61 10961

---

### invalid privilege type USAGE for table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.62 10962

---

### invalid privilege type @1 @ for tablespace

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.63 10963

---

### sequence "@1@" only supports SELECT column privileges

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.10.64 10964

---

### language "@1@" is not trusted

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.65 10965

---

### unrecognized privilege type "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.66 10966

---

### permission denied for column @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.67 10967

---

### permission denied for relation @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.68 10968

---

### permission denied for sequence @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.69 10969

---

### permission denied for database @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.70 10970

---

---

### permission denied for function @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.10.71 10971

---

### permission denied for operator @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.10.72 10972

---

### permission denied for type @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.10.73 10973

---

### permission denied for language @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.10.74 10974

---

### permission denied for large object @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.75 10975

---

### [permission denied for schema @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.76 10976

---

### [permission denied for operator class @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.77 10977

---

### [permission denied for operator family @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.78 10978

---

### [permission denied for collation @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.79 10979

---

### permission denied for conversion @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.80 10980

---

### permission denied for tablespace @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.81 10981

---

### permission denied for text search dictionary @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.82 10982

---

### permission denied for text search configuration @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.83 10983

---

[permission denied for foreign-data wrapper @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.84 10984

---

[permission denied for foreign server @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.85 10985

---

[permission denied for extension @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.86 10986

---

[must be owner of relation @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.87 10987

---

**must be owner of sequence @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.88 10988

---

**must be owner of database @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.89 10989

---

**must be owner of function @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.90 10990

---

**must be owner of operator @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.91 10991

---

---

**must be owner of type @1@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.10.92 10992**

---

**must be owner of language @1@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.10.93 10993**

---

**must be owner of large object @1@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.10.94 10994**

---

**must be owner of schema @1@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.10.95 10995**

---

**must be owner of operator class @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.96 10996

---

### must be owner of operator family @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.97 10997

---

### must be owner of collation @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.98 10998

---

### must be owner of conversion @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.10.99 10999

---

### must be owner of tablespace @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11 Message Numbers Beginning with 11000

---

### 2.11.1 11000

---

**must be owner of text search dictionary @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.11.2 11001

---

**must be owner of text search configuration @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.11.3 11002

---

**must be owner of foreign-data wrapper @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.11.4 11003

---

**must be owner of foreign server @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.5 11004

---

### **must be owner of extension @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.6 11005

---

### **permission denied for column "@1@" of relation "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.7 11007

---

### **attribute @1@ of relation with OID @2@ does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.8 11008

---

### **relation with OID @1@ does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.9 11009

---

### database with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.10 11010

---

### function with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.11 11011

---

### language with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.12 11012

---

### schema with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.13 11013

---

### tablespace with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.14 11014

---

### foreign-data wrapper with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.15 11015

---

### foreign server with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.16 11016

---

### type with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.17 11017

---

---

**operator with OID @1@ does not exist****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.11.18 11018**

---

**operator class with OID @1@ does not exist****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.11.19 11019**

---

**operator family with OID @1@ does not exist****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.11.20 11020**

---

**text search dictionary with OID @1@ does not exist****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.11.21 11021**

---

**text search configuration with OID @1@ does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.22 11022

---

### collation with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.23 11023

---

### conversion with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.24 11024

---

### extension with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.25 11025

---

### conversion "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.26 11026

---

### default conversion for @1@ to @2@ already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.27 11027

---

### cross-database references are not implemented: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.28 11028

---

### temporary tables cannot specify a schema name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.29 11029

---

### no schema has been selected to create in

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.30 11030

---

### text search parser "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.31 11031

---

### text search dictionary "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.32 11032

---

### text search template "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.33 11033

---

### text search configuration "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.34 11034

---

### @1@ is already in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.35 11035

---

### cannot move objects into or out of temporary schemas

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.36 11036

---

### cannot move objects into or out of TOAST schema

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.37 11037

---

### language "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.38 11038

---

---

### **improper relation name (too many dotted names): @1@**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.11.39 11039**

---

### **collation "@1@" for encoding "@2@" does not exist**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.11.40 11040**

---

### **cursor "@1@" does not exist**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.11.41 11041**

---

### **permission denied to create temporary tables in database "@1@"**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.11.42 11042**

---

### **cannot create temporary tables during recovery**

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.11.43 11043

---

### database name cannot be qualified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.44 11044

---

### extension name cannot be qualified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.45 11045

---

### "@1@" is not a table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.46 11046

---

### "@1@" is not a foreign table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.47 11047

---

**must be owner of type @1@ or type @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.48 11048

---

**must be superuser**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.49 11049

---

**must have CREATEROLE privilege**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.50 11050

---

**schema "@1@" already exists**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.51 11051

---

### @1@ is not a valid encoding name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.52 11052

---

### only binary operators can have commutators

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.53 11053

---

### only binary operators can have join selectivity

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.54 11054

---

### only binary operators can merge join

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.55 11055

---

### only binary operators can hash

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.56 11056

---

### only boolean operators can have negators

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.57 11057

---

### only boolean operators can have restriction selectivity

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.58 11058

---

### only boolean operators can have join selectivity

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.59 11059

---

### only boolean operators can merge join

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.60 11060

---

### only boolean operators can hash

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.61 11061

---

### operator @1@ already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.62 11062

---

### operator cannot be its own negator or sort operator

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.63 11063

---

---

### cannot remove dependency on @1@ because it is a system object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.64 11064

---

### collation "@1@" for encoding "@2@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.65 11065

---

### collation "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.66 11066

---

### cannot access temporary or unlogged relations during recovery

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.67 11068

---

### could not implement GROUP BY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.68 11069

---

### could not implement DISTINCT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.69 11070

---

### could not implement window PARTITION BY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.70 11071

---

### could not implement window ORDER BY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.71 11072

---

### could not implement recursive UNION

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.72 11073

---

### could not implement @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.73 11074

---

### FULL JOIN is only supported with merge-joinable or hash-joinable join conditions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.74 11075

---

### unexpected EOF on client connection

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.11.75 11076

---

### invalid frontend message type @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.11.76 11077

---

**statement:** @1@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.11.77 11078

---

**current transaction is aborted, commands ignored until end of transaction block**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.78 11079

---

**duration:** @1@ ms

[Description]

Terminated normally.

[System Processing]

No action required.

## 2.11.81 11082

---

**cannot insert multiple commands into a prepared statement**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.11.82 11083

---

**duration: @1@ ms parse @2@: @3@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.11.83 11084

---

**bind @1@ to @2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.11.84 11085

---

---

### prepared statement "@1@" does not exist

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.85 11086

---

### bind message has @1@ parameter formats but @2@ parameters

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

## 2.11.86 11087

---

### bind message supplies @1@ parameters, but prepared statement "@2@" requires @3@

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

## 2.11.87 11088

---

### incorrect binary data format in bind parameter @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.11.88 11089

---

### duration: @1@ ms bind @2@@3@@4@: @5@

[Description]

## 2.11.96 11098

---

### canceling authentication due to timeout

[Description]

Timeout occurred during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance\_work\_mem.

## 2.11.97 11099

---

### canceling statement due to statement timeout

#### [Description]

Timeout occurred during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance\_work\_mem.

## 2.12 Message Numbers Beginning with 11100

---

### 2.12.1 11100

---

#### canceling autovacuum task

#### [Description]

Processing was canceled.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text.

## 2.12.2 11101

---

### canceling statement due to conflict with recovery

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.12.3 11102

---

### canceling statement due to user request

[Description]

Processing was canceled.

[System Processing]

Processing will be aborted.

[Action]

Check the message text.

## 2.12.4 11103

---

### stack depth limit exceeded

[Description]

The depth of the execution stack exceeded the allowable value during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

If executing a complex SQL, modify it to a simple SQL.

## 2.12.5 11104

---

### --@1@ requires a value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.6 11105

---

### **-c @1@ requires a value**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.7 11107

---

### **@1@: invalid command-line arguments**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.8 11108

---

### **@1@: no database nor user name specified**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.9 11109

---

### **invalid CLOSE message subtype @1@**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.10 11110

---

---

### invalid DESCRIBE message subtype @1@

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

## 2.12.11 11111

---

### disconnection: session time: @1@: @2@: @3@. @4@ user=@5@ database=@6@ host=@7@@8@@9@

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

## 2.12.12 11112

---

### permission denied: "@1@" is a system catalog

#### [Description]

Terminated normally.

#### [System Processing]

Continues processing.

#### [Action]

No action required.

---

## 2.12.13 11113

---

### cannot execute @1@ in a read-only transaction

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.14 11114

---

### cannot execute @1@ during recovery

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.15 11115

---

### cannot execute @1@ within security-restricted operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.16 11116

---

### must be superuser to do CHECKPOINT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.17 11117

---

### invalid argument size @1@ in function call message

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.12.18 11118

---

### fastpath function call: "@1@" (OID @2@)

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.12.19 11119

---

**duration: @1@ ms fastpath function call: "@2@" (OID @3@)**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.12.20 11120

---

**function call message contains @1@ arguments but function requires @2@**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.12.21 11121

---

**function call message contains @1@ argument formats but @2@ arguments**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.12.22 11122

---

**incorrect binary data format in function argument @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.23 11123

---

**bind message has @1@ result formats but query has @2@ columns**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.12.24 11124

---

**portal "@1@" cannot be run**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.25 11125

---

**cursor can only scan forward**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.26 11126

---

**could not open usermap file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.12.27 11127

---

### unexpected delimiter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.28 11128

---

### unexpected end of line or lexeme

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.29 11129

---

### unexpected end of line

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.30 11130

---

### thesaurus sample word "@1@" isn't recognized by subdictionary (rule @2@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.31 11131

---

---

**thesaurus sample word "@1@" is a stop word (rule @2@)****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.12.32 11132**

---

**thesaurus substitute word "@1@" is a stop word (rule @2@)****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.12.33 11133**

---

**thesaurus substitute word "@1@" isn't recognized by subdictionary (rule @2@)****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.12.34 11134**

---

**thesaurus substitute phrase is empty (rule @1@)****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.12.35 11135**

---

**multiple DictFile parameters**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.36 11136

---

### multiple Dictionary parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.37 11137

---

### unrecognized Thesaurus parameter: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.38 11138

---

### missing DictFile parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.39 11139

---

### missing Dictionary parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.40 11140

---

### invalid text search configuration file name "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.41 11141

---

### could not open statistics file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.12.42 11142

---

### unrecognized headline parameter: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.43 11143

---

### MinWords should be less than MaxWords

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.44 11144

---

### MinWords should be positive

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.45 11145

---

### ShortWord should be >= 0

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.46 11146

---

### MaxFragments should be >= 0

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.47 11147

---

### string is too long for tsvector (@1@ bytes, max @2@ bytes)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.48 11148

---

### multiple Accept parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.49 11149

---

### unrecognized simple dictionary parameter: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.50 11150

---

### could not open log file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.12.51 11151

---

### invalid regular expression: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.52 11152

---

---

### **multibyte flag character is not allowed**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.12.53 11153**

---

### **could not open synonym file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.12.54 11154**

---

### **ispell dictionary supports only default flag value**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.12.55 11155**

---

### **affix file contains both old-style and new-style commands**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.12.56 11156**

---

### **unrecognized synonym parameter: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.57 11157

---

### missing Synonyms parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.58 11158

---

### could not open thesaurus file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.12.59 11159

---

### word is too long to be indexed

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.12.60 11160

---

### conversion from wchar\_t to server encoding failed: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.61 11161

---

### text search parser does not support headline creation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.62 11162

---

### multiple AffFile parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.63 11163

---

### unrecognized Ispell parameter: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.12.64 11164

---

### missing AffFile parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.65 11166

---

### WAL streaming (max\_wal\_senders > 0) requires wal\_level "archive", "hot\_standby", or "logical"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.66 11167

---

### invalid list syntax in parameter "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.67 11168

---

### could not create listen socket for "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.12.68 11169

---

### could not create any TCP/IP sockets

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.12.69 11170

---

**could not create Unix-domain socket in directory "@1@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.12.70 11171

---

**no socket created for listening**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.12.71 11172

---

**could not create I/O completion port for child queue**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.12.72 11173

---

**could not load pg\_hba.conf**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.12.73 11174

---

### @1@: could not locate matching postgres executable

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.12.74 11175

---

### could not open directory "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.12.75 11176

---

### directory "@1@" does not exist

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.12.76 11177

---

### could not read permissions of directory "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.12.77 11178

---

### specified data directory "@1@" is not a directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.78 11179

---

### data directory "@1@" has wrong ownership

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.79 11180

---

### data directory "@1@" has group or world access

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.80 11181

---

### select() failed in postmaster: @1@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
- b) If the total number of update records in a single transaction is high, split it into short transactions.
- c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

- a) Confirm that the database server has not stopped.
- b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.12.81 11182

---

### incomplete startup packet

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.12.82 11183

---

### invalid length of startup packet

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.12.83 11184

---

### failed to send SSL negotiation response: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.12.84 11185

---

### unsupported frontend protocol @1@.@2@: server supports @3@.0 to @4@.@5@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.85 11186

---

### invalid value for boolean option "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.86 11187

---

### invalid startup packet layout: expected terminator as last byte

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.12.87 11188

---

### no PostgreSQL user name specified in startup packet

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.88 11189

---

### the database system is starting up

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.12.89 11190

---

### the database system is shutting down

[Description]

The database system is shutting down.

[System Processing]

Processing will be aborted.

[Action]

Retry any necessary applications or commands after restarting the database system.

## 2.12.90 11191

---

### the database system is in recovery mode

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.12.91 11192

---

### sorry, too many clients already

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.12.92 11193

---

**wrong key in cancel request for process @1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.12.93 11194

---

**PID @1@ in cancel request did not match any process**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.12.94 11195

---

**received SIGHUP, reloading configuration files**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.12.95 11196

---

**pg\_hba.conf not reloaded**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.12.96 11197

---

### received smart shutdown request

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.12.97 11198

---

### received fast shutdown request

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.12.98 11199

---

### aborting any active transactions

[Description]

Rollback any active transactions because the database system is being requested to shut down.

[System Processing]

Continues processing.

[Action]

Retry any necessary applications or commands after restarting the database system.

## 2.13 Message Numbers Beginning with 11200

## 2.13.22 11221

---

**could not duplicate socket @1@ for use in backend: error code @2@**

[Description]

The database server was disconnected during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
  - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.13.23 11223

---

### transaction log switch forced (archive\_timeout=@1 @)

#### [Description]

Terminated normally.

#### [System Processing]

Continues processing.

#### [Action]

No action required.

## 2.13.24 11224

---

### checkpoint request failed

#### [Description]

An unexpected error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

Contact Fujitsu technical support.

## 2.13.25 11225

---

### compacted fsync request queue from @1 @ entries to @2 @ entries

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.13.26 11226

---

### could not resolve "localhost": @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.13.27 11227

---

### trying another address for the statistics collector

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.13.28 11228

---

### could not create socket for statistics collector: @1@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.13.72 11274

---

### autovacuum: processing database "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.13.73 11275

---

### autovacuum: dropping orphan temp table "@1@". "@2@" in database "@3@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.13.74 11276

---

### autovacuum: found orphan temp table "@1@". "@2@" in database "@3@"

[Description]

Uncollected garbage of the temporary table was found during automatic vacuuming

[System Processing]

Continues processing.

[Action]

No action required. The garbage of the temporary table will be collected automatically later.

If you want to collect it and obtain the storage space immediately,

drop the schema derived from @1 with the database user having superuser permission.

## 2.13.75 11277

---

---

### autovacuum not started because of misconfiguration

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.13.76 11278

---

### no empty local buffer available

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

---

## 2.13.77 11279

---

### cannot cluster temporary tables of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.13.78 11280

---

### unexpected data beyond EOF in block @1@ of relation @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.13.79 11281

---

### Continues processing past damaged page headers.

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.13.80 11283

---

### could not write block @1@ of @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.13.81 11284

---

### could not truncate file "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.13.82 11285

---

### cannot extend file "@1@" beyond @2@ blocks

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.13.83 11286

---

### could not seek to block @1@ in file "@2@": @3@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.13.84 11287

---

**could not extend file "@1@": @2@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.13.85 11288

---

**could not extend file "@1@": wrote only @2@ of @3@ bytes at block @4@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.13.86 11289

---

**could not read block @1@ in file "@2@": @3@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.13.87 11290

---

**could not read block @1@ in file "@2@": read only @3@ of @4@ bytes**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.13.88 11291

---

**could not write block @1@ in file "@2@": @3@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.13.89 11292

---

**could not write block @1@ in file "@2@": wrote only @3@ of @4@ bytes**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.13.90 11293

---

**could not truncate file "@1@" to @2@ blocks: it's only @3@ blocks now**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.13.91 11294

---

**could not truncate file "@1@" to @2@ blocks: @3@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.13.92 11295

---

### could not fsync file "@1@" but retrying: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.13.93 11296

---

### could not forward fsync request because request queue is full

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.13.94 11297

---

### could not open file "@1@" (target block @2@): @3@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.13.95 11298

---

### could not seek to end of file "@1@" : @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.13.96 11299

---

### memory for serializable conflict tracking is nearly exhausted

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14 Message Numbers Beginning with 11300

---

### 2.14.1 11300

---

#### not enough shared memory for data structure "@1@" (@2@ bytes requested)

#### [Description]

There was insufficient free space in the database server's shared memory during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

### 2.14.2 11301

---

#### deferrable snapshot was unsafe; trying a new one

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

### 2.14.3 11302

---

#### out of shared memory

#### [Description]

There was insufficient free space in the database server's shared memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.14.4 11303

---

### could not serialize access due to read/write dependencies among transactions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.5 11304

---

### deadlock detected

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.14.6 11305

---

### cannot acquire lock mode @1@ on database objects while recovery is in progress

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.7 11306

---

### could not send signal to process @1@: @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.8 11307

---

**process @1@ avoided deadlock for @2@ on @3@ by rearranging queue order after @4@.@5@ ms**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.9 11308

---

**process @1@ detected deadlock while waiting for @2@ on @3@ after @4@.@5@ ms**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.10 11309

---

**process @1@ still waiting for @2@ on @3@ after @4@.@5@ ms**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.11 11310

---

**process @1@ acquired @2@ on @3@ after @4@.@5@ ms**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.14.12 11311

---

**process @1@ failed to acquire @2@ on @3@ after @4@.@5@ ms**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.13 11314

---

**getrlimit failed: @1@**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.14 11315

---

**insufficient file descriptors available to start server process**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.14.15 11316

---

**out of file descriptors: @1 @; release and retry**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.14.16 11317

---

**temporary file: path "@1@", size @2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.14.17 11318

---

**could not read directory "@1@": @2@**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.18 11320

---

**could not create directory "@1@": @2@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.14.19 11321

---

### not enough shared memory for elements of data structure "@1@" (@2@ bytes requested)

#### [Description]

There was insufficient free space in the database server's shared memory during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.14.20 11322

---

### could not create ShmemIndex entry for data structure "@1@"

#### [Description]

There was insufficient free space in the database server's shared memory during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.14.21 11323

---

### ShmemIndex entry size is wrong for data structure "@1@" : expected @2@, actual @3@

#### [Description]

An unexpected error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

Contact Fujitsu technical support.

## 2.14.22 11324

---

### requested shared memory size overflows size\_t

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.23 11325

---

**corrupted page pointers: lower = @1@, upper = @2@, special = @3@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.24 11326

---

**corrupted item pointer: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.25 11327

---

**corrupted item lengths: total @1@, available space @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.26 11328

---

**corrupted item pointer: offset = @1@, size = @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.27 11329

---

### could not write block @1@ of temporary file: @2@

#### [Description]

There was insufficient free space in the disk of the database server during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Delete user data stored in the database server to free up space on the disk.

## 2.14.28 11330

---

### could not read block @1@ of temporary file: @2@

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.29 11331

---

### could not create unique index "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.30 11332

---

### could not find function "@1@" in file "@2@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.31 11333

---

---

**could not access file "@1@": @2@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.14.32 11334**

---

**could not load library "@1@": @2@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.14.33 11335**

---

**incompatible library "@1@": missing magic block****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.14.34 11336**

---

**incompatible library "@1@": version mismatch****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.14.35 11337**

---

**incompatible library "@1@": magic block mismatch**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.36 11338

---

### access to library "@1@" is not allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.37 11339

---

### invalid macro name in dynamic library path: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.38 11340

---

### zero-length component in parameter "dynamic\_library\_path"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.39 11341

---

### component in parameter "dynamic\_library\_path" is not an absolute path

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.40 11342

---

### could not determine actual result type for function "@1@" declared to return type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.41 11343

---

### number of aliases does not match number of columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.42 11344

---

### no column alias was provided

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.43 11345

---

### could not determine row description for function returning record

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.44 11346

---

### internal function "@1@" is not in internal lookup table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.45 11347

---

### unrecognized API version @1@ reported by info function "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.46 11348

---

### function @1@ has too many arguments (@2@, maximum is @3@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.47 11349

---

### cached plan must not change result type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.48 11350

---

### "@1@" is not a type

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.49 11351

---

### record type has not been registered

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.50 11352

---

### @1@ is not an enum

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.51 11353

---

### could not create relation-cache initialization file "@1@": @2@

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.52 11354

---

### cannot PREPARE a transaction that modified relation mapping

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.53 11355

---

### could not open relation mapping file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.54 11356

---

### could not read relation mapping file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.55 11357

---

### relation mapping file "@1@" contains invalid data

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.56 11358

---

---

### relation mapping file "@1@" contains incorrect checksum

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.14.57 11359

---

### could not write to relation mapping file "@1@": @2@

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

---

## 2.14.58 11360

---

### could not fsync relation mapping file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.14.59 11361

---

### could not close relation mapping file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.14.60 11362

---

### argument type @1@ is only a shell

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.14.61 11363

---

**no binary input function available for type @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.14.62 11364

---

**no binary output function available for type @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.14.63 11365

---

**no input function available for type @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.14.64 11366

---

**no output function available for type @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.65 11367

---

**could not reopen file "@1@" as stderr: @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.66 11368

---

**could not reopen file "@1@" as stdout: @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.14.67 11369

---

**cursor "@1@" already exists**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.68 11370

---

**closing existing cursor "@1@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.69 11371

---

### cannot drop active portal "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.70 11372

---

### cannot PREPARE a transaction that has created a cursor WITH HOLD

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.71 11373

---

### word is too long (@1@ bytes, max @2@ bytes)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.72 11374

---

### string is too long for tsvector (@1@ bytes, max @2@ bytes)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.73 11375

---

### argument of ntile must be greater than zero

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.74 11376

---

### argument of nth\_value must be greater than zero

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.75 11379

---

### integer out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.76 11380

---

### argument must be empty or one-dimensional array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.77 11381

---

### cannot concatenate incompatible arrays

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.78 11382

---

### invalid number of dimensions: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.79 11383

---

### could not determine input data type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.80 11384

---

### invalid input syntax for type boolean: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.81 11385

---

---

### division by zero

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.14.82 11386

---

### invalid time zone name: "@1@"

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.14.83 11387

---

### timestamp out of range

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.14.84 11388

---

### cannot convert abstime "invalid" to timestamp

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.14.85 11389

---

### invalid status in external "tinterval" value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.86 11390

---

### cannot convert retime "invalid" to interval

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.87 11391

---

### invalid input syntax for type money: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.88 11393

---

### PID @1@ is not a PostgreSQL server process

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.89 11394

---

### must be superuser to signal the postmaster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.90 11395

---

### failed to send signal to postmaster: @1@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.91 11396

---

### must be superuser to rotate log files

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.14.92 11397

---

### rotation not possible because log collection not active

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.93 11398

---

### global tablespace never has databases

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.14.94 11399

---

### @1@ is not a tablespace OID

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.15 Message Numbers Beginning with 11400

---

### 2.15.1 11400

---

#### invalid input syntax for integer: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.2 11401

---

#### syntax error in tsquery: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.3 11402

---

#### **syntax error in tsvector: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.4 11403

---

#### **there is no escaped character: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.5 11404

---

#### **wrong position info in tsvector: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.6 11405

---

#### **sequence "@1@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.7 11406

---

---

### more than one function named "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.8 11407

---

### more than one operator named @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.9 11408

---

### too many arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.10 11409

---

### invalid name syntax

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.11 11410

---

### expected a left parenthesis

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.12 11411

---

### expected a right parenthesis

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.13 11412

---

### expected a type name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.14 11413

---

### improper type name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.15 11414

---

### invalid type modifier

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.16 11415

---

### TIME(@1 @)@2@ precision must not be negative

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.17 11416

---

### TIME(@1 @)@2@ precision reduced to maximum allowed, @3@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.15.18 11417

---

### date out of range: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.19 11418

---

### date/time value "current" is no longer supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.20 11419

---

### timestamp cannot be NaN

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.21 11420

---

### timestamp(@1@) precision must be between @2@ and @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.22 11421

---

### interval out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.23 11422

---

### invalid INTERVAL type modifier

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.24 11423

---

**TIMESTAMP(@1 @)@2@ precision must not be negative**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.25 11424

---

**TIMESTAMP(@1 @)@2@ precision reduced to maximum allowed, @3@**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.15.26 11425

---

**interval(@1 @) precision must be between @2@ and @3@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.27 11426

---

**cannot subtract infinite timestamps**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.28 11427

---

### timestamp units "@1@" not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.29 11428

---

### "time" units "@1@" not recognized

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.30 11429

---

### timestamp with time zone units "@1@" not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.31 11430

---

### "time with time zone" units "@1@" not recognized

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.32 11431

---

### interval units "@1@" not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.33 11432

---

### timestamp units "@1@" not recognized

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.34 11433

---

### could not convert to time zone "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.35 11434

---

### time zone "@1@" not recognized

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.36 11435

---

---

**interval time zone "@1@" must not include months or days****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.15.37 11436**

---

**step size cannot equal zero****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.15.38 11437**

---

**invalid input syntax for uuid: "@1@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.15.39 11438**

---

**value "@1@" is out of range for type bigint****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.15.40 11439**

---

**bigint out of range**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.41 11440

---

### smallint out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.42 11441

---

### OID out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.43 11442

---

### input of anonymous composite types is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.44 11443

---

### malformed record literal: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.45 11444

---

**wrong number of columns: @1@, expected @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.46 11445

---

**wrong data type: @1@, expected @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.47 11446

---

**improper binary format in record column @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.48 11447

---

**cannot compare dissimilar column types @1@ and @2@ at record column @3@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.49 11448

---

### cannot compare record types with different numbers of columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.50 11449

---

### int2vector has too many elements

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.51 11450

---

### invalid int2vector data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.52 11451

---

### oidvector has too many elements

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.53 11452

---

### invalid input syntax for type @1@: "@2@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.54 11453

---

### invalid cidr value: "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.55 11454

---

### could not format inet value: @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.56 11455

---

### invalid address family in external "@1@" value

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.57 11456

---

---

### invalid bits in external "@1@" value

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.58 11457

---

### invalid length in external "@1@" value

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.59 11458

---

### invalid external "cidr" value

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.60 11459

---

### invalid mask length: @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.61 11460

---

### could not format cidr value: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.62 11461

---

### cannot AND inet values of different sizes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.63 11462

---

### cannot OR inet values of different sizes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.64 11463

---

### input is out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.65 11464

---

### cannot subtract inet values of different sizes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.66 11465

---

### invalid Datum pointer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.67 11466

---

### dimension values cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.68 11467

---

### "[" must introduce explicitly-specified array dimensions.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.69 11468

---

### upper bound cannot be less than lower bound

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.70 11469

---

**Array value must start with "{" or dimension information.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.71 11471

---

**Specified array dimensions do not match array contents.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.72 11472

---

**malformed array literal: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.73 11473

---

**array size exceeds the maximum allowed (@1@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.74 11474

---

### invalid array flags

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.75 11475

---

### wrong element type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.76 11476

---

### improper binary format in array element @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.77 11477

---

### slices of fixed-length arrays not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.78 11478

---

---

### wrong number of array subscripts

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.79 11479

---

### array subscript out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.80 11480

---

### cannot assign null value to an element of a fixed-length array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.81 11481

---

### updates on slices of fixed-length arrays not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.82 11482

---

### source array too small

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.83 11483

---

### null array element not allowed in this context

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.84 11484

---

### cannot compare arrays of different element types

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.85 11485

---

### could not identify a hash function for type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.86 11486

---

### dimension array or low bound array cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.87 11487

---

### wrong range of array subscripts

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.88 11489

---

### value out of range: overflow

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.89 11490

---

### value out of range: underflow

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.15.90 11491

---

### invalid input syntax for type real: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.91 11492

---

**"@1@" is out of range for type real**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.92 11493

---

**invalid input syntax for type double precision: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.93 11494

---

**"@1@" is out of range for type double precision**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.94 11495

---

**cannot take square root of a negative number**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.95 11496

---

### zero raised to a negative power is undefined

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.96 11497

---

### a negative number raised to a non-integer power yields a complex result

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.97 11498

---

### cannot take logarithm of zero

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.15.98 11499

---

### cannot take logarithm of a negative number

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16 Message Numbers Beginning with 11500

---

### 2.16.1 11500

---

#### result is out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.16.2 11501

---

#### count must be greater than zero

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.16.3 11502

---

#### operand, lower bound, and upper bound cannot be NaN

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.16.4 11503

---

#### lower and upper bounds must be finite

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.5 11504

---

### lower bound cannot equal upper bound

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.6 11505

---

### requested length too large

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.7 11506

---

### requested character too large

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.8 11507

---

### requested character too large for encoding: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.9 11508

---

---

### **null character not permitted**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.16.10 11509**

---

### **typmod array must be typecstring[]**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.16.11 11510**

---

### **typmod array must be one-dimensional**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.16.12 11511**

---

### **typmod array must not contain nulls**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.16.13 11512**

---

### **suppress\_redundant\_updates\_trigger: must be called as trigger**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.14 11513

---

### [suppress\\_redundant\\_updates\\_trigger: must be called on update](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.15 11514

---

### [suppress\\_redundant\\_updates\\_trigger: must be called before update](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.16 11515

---

### [suppress\\_redundant\\_updates\\_trigger: must be called for each row](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.17 11516

---

### [invalid input syntax for type box: "@1@"](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.18 11517

---

### value "@1@" is out of range for type integer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.19 11518

---

### invalid oidvector data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.20 11519

---

### invalid input syntax for type line: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.21 11520

---

### date/time value "@1@" is no longer supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.22 11521

---

**date/time field value out of range: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.23 11522

---

**interval field value out of range: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.24 11523

---

**time zone displacement out of range: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.25 11524

---

**unrecognized encoding: "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.26 11525

---

### invalid hexadecimal digit: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.27 11526

---

### invalid hexadecimal data: odd number of digits

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.28 11527

---

### unexpected "=" while decoding base64 sequence

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.29 11528

---

### invalid symbol "@1@" while decoding base64 sequence

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.30 11529

---

---

### invalid base64 end sequence

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.31 11530

---

### invalid input syntax for type bytea

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.32 11531

---

### ts\_stat query must return one tsvector column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.33 11532

---

### tsvector column "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.34 11533

---

### column "@1@" is not of tsvector type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.35 11534

---

### configuration column "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.36 11535

---

### column "@1@" is not of regconfig type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.37 11536

---

### configuration column "@1@" must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.38 11537

---

### text search configuration name "@1@" must be schema-qualified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.39 11538

---

### column "@1@" is not of a character type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.40 11539

---

### ts\_rewrite query must return two tsquery columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.41 11540

---

### encoding conversion from @1@ to ASCII not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.42 11541

---

### "@1@" is not a valid encoding name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.43 11542

---

### @1@ is not a valid encoding code

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.44 11543

---

### insert or update on table "@1@" violates foreign key constraint "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.45 11544

---

### function "@1@" was not called by trigger manager

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.46 11545

---

### function "@1@" must be fired AFTER ROW

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.47 11546

---

### function "@1@" must be fired for INSERT

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.48 11547

---

### function "@1@" must be fired for UPDATE

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.49 11548

---

### function "@1@" must be fired for INSERT or UPDATE

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.50 11549

---

### function "@1@" must be fired for DELETE

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.51 11550

---

---

### no pg\_constraint entry for trigger "@1@" on table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.52 11551

---

### referential integrity query on "@1@" from constraint "@2@" on "@3@" gave unexpected result

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.16.53 11552

---

### update or delete on table "@1@" violates foreign key constraint "@2@" on table "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.54 11553

---

### invalid input value for enum @1@: "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.55 11554

---

### invalid internal value for enum: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.56 11555

---

### could not determine actual enum type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.57 11556

---

### enum @1@ contains no values

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.58 11557

---

### invalid format specification for an interval value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.59 11558

---

### "EEEE" must be the last pattern used

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.60 11559

---

### "9" must be ahead of "PR"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.61 11560

---

### "0" must be ahead of "PR"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.62 11561

---

### multiple decimal points

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.63 11562

---

### cannot use "V" and decimal point together

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.64 11563

---

**cannot use "S" twice**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.65 11564

---

**cannot use "S" and "PL"/"MI"/"SG"/"PR" together**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.66 11565

---

**cannot use "S" and "MI" together**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.67 11566

---

**cannot use "S" and "PL" together**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.68 11567

---

### cannot use "S" and "SG" together

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.69 11568

---

### cannot use "PR" and "S"/"PL"/"MI"/"SG" together

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.70 11569

---

### cannot use "EEEE" twice

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.71 11570

---

### "EEEE" is incompatible with other formats

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.72 11571

---

---

### "@1@" is not a view

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.73 11572

---

### could not determine which collation to use for regular expression

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.74 11573

---

### could not determine which collation to use for lower() function

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.75 11574

---

### could not determine which collation to use for upper() function

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.76 11575

---

### invalid combination of date conventions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.77 11576

---

### conflicting values for "@1@" field in formatting string

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.78 11577

---

### source string too short for "@1@" formatting field

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.79 11578

---

### invalid argument for @1@: "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.80 11579

---

### value for "@1@" in source string is out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.81 11580

---

### "TZ"/"tz"/"OF" format patterns are not supported in to\_date

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.82 11581

---

### invalid input string for "Y,YYY"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.83 11582

---

### hour "@1@" is invalid for the 12-hour clock

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.84 11584

---

### cannot calculate day of year without year information

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.85 11585

---

### "EEEE" not supported for input

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.86 11586

---

### "RN" not supported for input

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.87 11587

---

### could not open directory "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.88 11588

---

### array of weight must be one-dimensional

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.89 11589

---

### array of weight is too short

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.90 11590

---

### array of weight must not contain nulls

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.91 11591

---

### weight out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.92 11592

---

### regular expression failed: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.16.93 11593

---

---

### invalid regexp option: "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.94 11594

---

### invalid escape string

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.95 11595

---

### regexp\_split does not support the global option

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.96 11596

---

### unsupported XML feature

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.97 11597

---

### invalid encoding name "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.98 11598

---

### invalid XML comment

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.16.99 11599

---

### not an XML document

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17 Message Numbers Beginning with 11600

---

---

### 2.17.1 11600

---

#### invalid XML processing instruction

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.17.2 11601

---

#### xmlvalidate is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.17.3 11602

---

#### could not initialize XML library

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.17.4 11603

---

#### date out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.17.5 11604

---

#### invalid query

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.17.6 11605

---

#### invalid array for XML namespace mapping

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.7 11606

---

### empty XPath expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.8 11607

---

### neither namespace name nor URI may be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.9 11608

---

### could not register XML namespace with name "@1@" and URI "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.10 11609

---

### value "@1@" is out of range for type smallint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.11 11610

---

### value "@1@" is out of range for type oid

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.12 11611

---

### value "@1@" is out of range for 8-bit integer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.13 11612

---

### gtsvector\_in not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.14 11613

---

### identifier too long

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.15 11614

---

### invalid input syntax for type path: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.16 11615

---

### no operand in tsquery: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.17 11616

---

### value is too big in tsquery: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.18 11617

---

### operand is too long in tsquery: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.19 11618

---

---

**word is too long in tsquery: "@1@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.17.20 11619**

---

**text-search query doesn't contain lexemes: "@1@"****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.17.21 11620**

---

**length for type @1@ must be at least 1****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.17.22 11621**

---

**length for type @1@ cannot exceed @2@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.17.23 11622**

---

**value too long for type character(@1@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.24 11623

---

### value too long for type character varying(@1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.25 11624

---

### reference to parent directory ("..") not allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.26 11625

---

### absolute path not allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.27 11626

---

### path must be in or below the current directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.28 11627

---

### could not open file "@1@" for writing: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.17.29 11628

---

### could not seek in file "@1@" : @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.17.30 11629

---

### must be superuser to read files

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.31 11630

---

### requested length cannot be negative

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.32 11631

---

### must be superuser to get file information

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.33 11632

---

### must be superuser to get directory listings

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.34 11633

---

### too many points requested

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.35 11634

---

### could not format "path" value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.36 11635

---

### invalid input syntax for type point: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.37 11636

---

### invalid input syntax for type lseg: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.38 11638

---

### invalid input syntax for type polygon: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.39 11639

---

### invalid number of points in external "path" value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.40 11640

---

---

### invalid input syntax for type circle: "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.41 11641

---

### invalid input syntax for type macaddr: "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.42 11642

---

### function "dist\_lb" not implemented

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.43 11643

---

### function "close\_lb" not implemented

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.44 11644

---

### cannot create bounding box for empty polygon

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.45 11645

---

### invalid input syntax for type tinterval: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.46 11646

---

### invalid number of points in external "polygon" value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.47 11647

---

### function "poly\_distance" not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.48 11648

---

### function "path\_center" not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.49 11649

---

### open path cannot be converted to polygon

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.50 11650

---

### invalid input syntax for type numeric: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.51 11651

---

### could not format "circle" value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.52 11652

---

### invalid radius in external "circle" value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.53 11653

---

### cannot convert circle with radius zero to polygon

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.54 11654

---

### must request at least 2 points

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.55 11655

---

### cannot convert empty polygon to circle

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.56 11656

---

### bit string length @1 @ does not match type bit(@2@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.57 11657

---

### "@1@" is not a valid binary digit

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.58 11658

---

### "@1@" is not a valid hexadecimal digit

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.59 11659

---

### invalid length in external bit string

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.60 11660

---

### bit string too long for type bit varying(@1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.61 11661

---

---

### negative substring length not allowed

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.62 11662

---

### cannot AND bit strings of different sizes

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.63 11663

---

### cannot OR bit strings of different sizes

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.64 11664

---

### cannot XOR bit strings of different sizes

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.65 11665

---

### bit index @1@ out of valid range (0..@2@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.66 11666

---

### new bit must be 0 or 1

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.67 11667

---

### unrecognized key word: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.68 11668

---

### missing name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.69 11669

---

### missing "=" sign

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.70 11670

---

**invalid mode character: must be one of "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.71 11671

---

**a name must follow the "/" sign**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.72 11672

---

**defaulting grantor to user ID @1@**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.17.73 11673

---

**ACL array contains wrong data type**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.74 11674

---

### ACL arrays must be one-dimensional

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.75 11675

---

### ACL arrays must not contain null values

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.76 11676

---

### extra garbage at the end of the ACL specification

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.77 11677

---

### grant options cannot be granted back to your own grantor

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.78 11678

---

### dependent privileges exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.79 11679

---

### aclinsert is no longer supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.80 11680

---

### aclremove is no longer supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.81 11681

---

### unrecognized privilege type: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.82 11682

---

### must be member of role "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.83 11683

---

### view "@1@" does not exist

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.84 11684

---

### INTERVAL(@1@) precision must not be negative

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.85 11685

---

### INTERVAL(@1@) precision reduced to maximum allowed, @2@

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.17.86 11686

---

### timestamp out of range: "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.87 11687

---

### cannot subtract infinite dates

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.88 11688

---

### date out of range for timestamp

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.89 11689

---

### cannot convert reserved abstime value to date

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.17.90 11690

---

---

### **time out of range**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.17.91 11691**

---

### **interval units "@1@" not recognized**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.17.92 11692**

---

### **time zone displacement out of range**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.17.93 11693**

---

### **timestamp with time zone units "@1@" not recognized**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.17.94 11695**

---

### **"@1@" is not a composite type**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.95 11696

---

### invalid input syntax for type oid: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.96 11697

---

### invalid octet value in "macaddr" value: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.97 11698

---

### could not determine which collation to use for initcap() function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.17.98 11699

---

### could not convert string to UTF-16: error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18 Message Numbers Beginning with 11700

---

### 2.18.1 11700

---

**could not compare Unicode strings: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.18.2 11701

---

**index @1@ out of valid range, 0..@2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.18.3 11702

---

**field position must be greater than zero**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.18.4 11703

---

**unrecognized conversion type specifier "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.5 11705

---

### **format specifies argument 0, but arguments are numbered from 1**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.6 11706

---

### **could not create locale "@1@": @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.7 11707

---

### **collations with different collate and ctype values are not supported on this platform**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.8 11708

---

### **nondefault collations are not supported on this platform**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.9 11709

---

### invalid multibyte character for locale

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.10 11710

---

### could not determine which collation to use for ILIKE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.11 11711

---

### text-search query contains only stop words or doesn't contain lexemes, ignored

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.18.12 11712

---

### invalid input syntax for type tid: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.13 11713

---

### invalid length in external "numeric" value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.14 11714

---

### invalid sign in external "numeric" value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.15 11715

---

### invalid digit in external "numeric" value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.16 11716

---

### NUMERIC precision @1@ must be between 1 and @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.17 11717

---

---

**NUMERIC scale @1@ must be between 0 and precision @2@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.18.18 11718**

---

**invalid NUMERIC type modifier****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.18.19 11719**

---

**value overflows numeric format****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.18.20 11720**

---

**cannot convert NaN to integer****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.18.21 11721**

---

**cannot convert NaN to bigint**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.22 11722

---

### cannot convert NaN to smallint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.23 11723

---

### numeric field overflow

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.24 11724

---

### argument for function "exp" too big

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.25 11725

---

### cannot accept a value of type any

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.26 11726

---

### cannot display a value of type any

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.27 11727

---

### cannot accept a value of type anyarray

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.28 11728

---

### cannot accept a value of type anyenum

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.29 11729

---

### cannot accept a value of type anyrange

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.30 11730

---

### cannot accept a value of type trigger

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.31 11731

---

### cannot accept a value of type language\_handler

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.32 11732

---

### cannot display a value of type trigger

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.33 11733

---

### cannot accept a value of type fdw\_handler

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.34 11734

---

### cannot display a value of type language\_handler

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.35 11735

---

### cannot accept a value of type internal

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.36 11736

---

### cannot display a value of type fdw\_handler

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.37 11737

---

### cannot accept a value of type opaque

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.38 11738

---

---

### cannot display a value of type internal

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.39 11739

---

### cannot accept a value of type anyelement

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.40 11740

---

### cannot display a value of type opaque

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.41 11741

---

### cannot accept a value of type anynonarray

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.42 11742

---

### cannot display a value of type anyelement

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.43 11743

---

### cannot accept a value of a shell type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.44 11744

---

### cannot display a value of type anynonarray

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.45 11745

---

### cannot accept a value of type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.46 11746

---

### "char" out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.47 11747

---

### LIKE pattern must not end with escape character

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.48 11748

---

### case insensitive matching not supported on type bytea

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.49 11749

---

### regular-expression matching not supported on type bytea

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.50 11750

---

### function @1@ is not an aggregate

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.51 11751

---

**rule "@1@" has unsupported event type @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.52 11752

---

**replication connection authorized: user=@1@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.18.53 11753

---

**connection authorized: user=@1@ database=@2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.18.54 11754

---

**database "@1@" has disappeared from pg\_database**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.55 11755

---

### database "@1@" is not currently accepting connections

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.56 11756

---

### permission denied for database "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.57 11757

---

### too many connections for role "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.58 11758

---

### database locale is incompatible with operating system

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.59 11759

---

---

**no roles are defined in this database system****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.18.60 11760**

---

**new replication connections are not allowed during database shutdown****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.18.61 11761**

---

**must be superuser to connect during database shutdown****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.18.62 11762**

---

**must be superuser to connect in binary upgrade mode****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.18.63 11763**

---

**remaining connection slots are reserved for non-replication superuser connections**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.64 11765

---

### template database "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.65 11766

---

### database @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.18.66 11767

---

### could not stat directory "@1@" : @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.18.67 11768

---

### could not change directory to "@1@" : @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.18.68 11769

---

### cannot set parameter "@1@" within security-restricted operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.69 11770

---

### role "@1@" is not permitted to log in

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.70 11771

---

### too many connections for database "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.71 11772

---

### permission denied to set session authorization

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.72 11773

---

**invalid role OID: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.73 11774

---

**could not create lock file "@1@": @2@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.18.74 11775

---

**could not open stop-word file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.18.75 11776

---

**could not open lock file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.18.76 11777

---

### lock file "@1@" already exists

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.18.77 11778

---

### pre-existing shared memory block (key @1@, ID @2@) is still in use

#### [Description]

An error occurred because execution is temporarily impossible.

#### [System Processing]

Processing will be aborted.

#### [Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.18.78 11779

---

### could not remove old lock file "@1@" : @2@

#### [Description]

An error occurred during I/O processing in the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.18.79 11780

---

### could not read lock file "@1@" : @2@

#### [Description]

There was insufficient free space in the disk of the database server during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Delete user data stored in the database server to free up space on the disk.

## 2.18.80 11781

---

### could not read from file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.18.81 11782

---

### "@1@" is not a valid data directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.82 11784

---

### loaded library "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.18.83 11785

---

### unexpected encoding ID @1@ for WIN character sets

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.18.84 11786

---

---

**unexpected encoding ID @1@ for ISO 8859 character sets****[Description]**

An unexpected error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

Contact Fujitsu technical support.

---

**2.18.85 11787**

---

**conversion between @1@ and @2@ is not supported****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.18.86 11788**

---

**default conversion function for encoding "@1@" to "@2@" does not exist****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.18.87 11789**

---

**invalid source encoding name "@1@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.18.88 11790**

---

**invalid destination encoding name "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.89 11791

---

### invalid byte value for encoding "@1@": 0x@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.90 11792

---

### encoding name too long

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.91 11793

---

### invalid byte sequence for encoding "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.92 11795

---

### invalid encoding number: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.93 11796

---

### unrecognized configuration parameter "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.94 11797

---

### parameter "@1@" cannot be changed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.95 11798

---

### parameter "@1@" cannot be changed without restarting the server

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.18.96 11799

---

### parameter "@1@" cannot be changed now

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19 Message Numbers Beginning with 11800

---

### 2.19.1 11800

---

**parameter "@1@" cannot be set after connection start**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.19.2 11801

---

**permission denied to set role "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.19.3 11802

---

**cannot set parameter "@1@" within security-definer function**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.19.4 11803

---

**invalid value for parameter "@1@": "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.5 11804

---

**@1@ is outside the valid range for parameter "@2@" (@3@ .. @4@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.6 11805

---

**@1@ requires a numeric value**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.7 11806

---

**@1@ is outside the valid range for parameter "@2@" (@3@ .. @4@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.8 11807

---

**must be superuser to examine "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.9 11808

---

### SET @1@ takes only one argument

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.10 11809

---

### SET requires parameter name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.11 11810

---

### attempt to redefine parameter "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.19.12 11811

---

### could not parse setting for parameter "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.13 11812

---

### invalid value for parameter "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.14 11813

---

### invalid value for parameter "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.15 11814

---

### parameter "@1@" removed from configuration file, reset to default

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.16 11815

---

### parameter "@1@" changed to "@2@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.17 11816

---

### could not open configuration file "@1@": maximum nesting depth exceeded

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.18 11817

---

### syntax error in file "@1@" line @2@, near end of line

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.19 11818

---

### syntax error in file "@1@" line @2@, near token "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.20 11819

---

### user mapping not found for "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.21 11820

---

---

### foreign-data wrapper "@1@" has no handler

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.22 11821

---

### invalid option "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.23 11822

---

### foreign-data wrapper "@1@" does not exist

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.24 11823

---

### index "@1@" does not exist

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.25 11824

---

### could not create shared memory segment: @1@

[Description]

There was insufficient free space in the database server's shared memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.19.26 11825

---

### could not stat data directory "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.19.27 11826

---

### could not create semaphore: error code @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.19.28 11827

---

### could not lock semaphore: error code @1@

[Description]

An error occurred because execution is temporarily impossible.

[System Processing]

Processing will be aborted.

[Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.19.29 11828

---

---

**could not unlock semaphore: error code @1@****[Description]**

An unexpected error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

Contact Fujitsu technical support.

---

**2.19.30 11829**

---

**could not try-lock semaphore: error code @1@****[Description]**

An error occurred because execution is temporarily impossible.

**[System Processing]**

Processing will be aborted.

**[Action]**

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

---

**2.19.31 11830**

---

**could not create semaphores: @1@****[Description]**

An unexpected error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

Contact Fujitsu technical support.

---

**2.19.32 11832**

---

**pre-existing shared memory block is still in use****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.19.33 11833**

---

**oldest xmin is far in the past**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.34 11834

---

### some databases have not been vacuumed in over 2 billion transactions

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.35 11835

---

### skipping analyze of "@1@" --- lock not available

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.36 11836

---

### skipping "@1@" --- only superuser can analyze it

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.37 11837

---

---

**skipping "@1@" --- only superuser or database owner can analyze it****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.19.38 11838**

---

**skipping "@1@" --- only table or database owner can analyze it****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.19.39 11839**

---

**skipping "@1@" --- cannot analyze non-tables or special system tables****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.19.40 11840**

---

**operator class "@1@" does not exist for access method "@2@", skipping****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.41 11841

---

### operator family "@1@" does not exist for access method "@2@", skipping

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.42 11842

---

### operator family "@1@" for access method "@2@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.43 11843

---

### access method "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.44 11844

---

### must be superuser to create an operator class

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.45 11845

---

---

**invalid operator number @1@, must be between 1 and @2@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.46 11846**

---

**invalid procedure number @1@, must be between 1 and @2@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.47 11847**

---

**storage type specified more than once****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.48 11848**

---

**storage type cannot be different from data type for access method "@1@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.49 11849**

---

**operator class "@1@" for access method "@2@" already exists**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.50 11850

---

### could not make operator class "@1@" be default for type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.51 11851

---

### must be superuser to create an operator family

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.52 11852

---

### must be superuser to alter an operator family

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.53 11853

---

### operator argument types must be specified in ALTER OPERATOR FAMILY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.54 11854

---

### STORAGE cannot be specified in ALTER OPERATOR FAMILY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.55 11855

---

### one or two argument types must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.56 11856

---

### index operators must be binary

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.19.57 11857

---

### access method "@1@" does not support ordering operators

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.58 11858

---

### index search operators must return boolean

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.59 11859

---

### btree comparison procedures must have two arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.60 11860

---

### btree comparison procedures must return integer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.61 11861

---

### hash procedures must have one argument

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.62 11862

---

### hash procedures must return integer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.63 11863

---

### associated data types must be specified for index support procedure

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.64 11864

---

### procedure number @1@ for (@2@, @3@) appears more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.65 11865

---

### operator number @1@ for (@2@, @3@) appears more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.66 11866

---

---

**operator @1@(@2@,@3@) already exists in operator family "@4@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.67 11867**

---

**function @1@(@2@,@3@) already exists in operator family "@4@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.68 11868**

---

**operator @1@(@2@,@3@) does not exist in operator family "@4@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.69 11869**

---

**function @1@(@2@,@3@) does not exist in operator family "@4@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.70 11870**

---

**operator class "@1@" for access method "@2@" already exists in schema "@3@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.71 11871

---

### **operator family "@1@" for access method "@2@" already exists in schema "@3@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.72 11872

---

### **no security label providers have been loaded**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.73 11873

---

### **must specify provider when multiple security label providers have been loaded**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.74 11874

---

### **security label provider "@1@" is not loaded**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.75 11875

---

### **"@1@" is not a table, view, materialized view, composite type, or foreign table**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.76 11876

---

### **aggregate attribute "@1@" not recognized**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.77 11877

---

### **parameter "lc\_collate" must be specified**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.78 11878

---

### **database "@1@" does not exist, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.79 11879

---

### collation "@1@" for encoding "@2@" already exists in schema "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.80 11880

---

### function @1@ already exists in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.81 11881

---

### unrecognized value for EXPLAIN option "@1@": "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.82 11882

---

### unrecognized EXPLAIN option "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.83 11883

---

### **EXPLAIN option BUFFERS requires ANALYZE**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.84 11884

---

### **type "@1@" already exists in schema "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.85 11885

---

### **collation attribute "@1@" not recognized**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.86 11886

---

### **aggregate stype must be specified**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.87 11887

---

### aggregate sfunc must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.88 11888

---

### aggregate input type must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.89 11889

---

### basetype is redundant with aggregate input type specification

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.90 11890

---

### aggregate transition data type cannot be @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.91 11891

---

**function @1 @(@2@) does not exist, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.92 11892

---

**collation "@1@" already exists in schema "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.19.93 11894

---

**vacuuming "@1@.@2@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.19.94 11895

---

**relation "@1@" page @2@ is uninitialized --- fixing**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.95 11896

---

**"@1@": removed @2@ row versions in @3@ pages**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.19.96 11897

---

**"@1@": found @2@ removable, @3@ nonremovable row versions in @4@ pages**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.19.97 11898

---

**"@1@": removed @2@ row versions in @3@ pages**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.19.98 11899

---

**scanned index "@1@" to remove @2@ row versions**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.20 Message Numbers Beginning with 11900

---

### 2.20.1 11900

---

**index "@1@" now contains @2@ row versions in @3@ pages**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

### 2.20.2 11901

---

**"@1@": truncated @2@ to @3@ pages**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

### 2.20.3 11902

---

**option "@1@" not found**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.20.4 11903

---

**option "@1@" provided more than once**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.5 11904

---

### permission denied to change owner of foreign-data wrapper "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.6 11905

---

### function @1@ must return type "fdw\_handler"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.7 11906

---

### permission denied to create foreign-data wrapper "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.8 11907

---

### foreign-data wrapper "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.9 11908

---

---

### permission denied to alter foreign-data wrapper "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.10 11909

---

### changing the foreign-data wrapper handler can change behavior of existing foreign tables

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.20.11 11910

---

### changing the foreign-data wrapper validator can cause the options for dependent objects to become invalid

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.20.12 11912

---

### foreign-data wrapper "@1@" does not exist, skipping

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.13 11913

---

### server "@1@" already exists

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.14 11914

---

### type "@1@" does not exist, skipping

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.15 11915

---

### user mapping "@1@" already exists for server @2@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.16 11916

---

### user mapping "@1@" does not exist for the server

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.17 11917

---

### server "@1@" does not exist, skipping

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.18 11918

---

### user mapping "@1@" does not exist for the server, skipping

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.19 11919

---

### foreign table "@1@" does not exist

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.20 11920

---

### collation "@1@" does not exist, skipping

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.21 11921

---

### tablespace "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.22 11922

---

### conversion "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.23 11923

---

### constraint "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.24 11924

---

### schema "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.25 11925

---

### extension "@1@" does not exist, skipping

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.26 11926

---

### operator @1@ does not exist, skipping

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.27 11927

---

### @1@ is not a domain

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.28 11929

---

### table "@1@" does not exist, skipping

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.29 11931

---

### only shared relations can be placed in pg\_global tablespace

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.30 11933

---

### truncate cascades to table "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.20.31 11934

---

### cannot vacuum temporary tables of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.32 11935

---

### cannot inherit from temporary relation "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.33 11936

---

---

### relation "@1@" would be inherited from more than once

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.34 11937

---

### merging multiple inherited definitions of column "@1@"

#### [Description]

Terminated normally.

#### [System Processing]

Continues processing.

#### [Action]

No action required.

---

## 2.20.35 11938

---

### inherited column "@1@" has a type conflict

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.36 11939

---

### inherited column "@1@" has a collation conflict

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.37 11940

---

### inherited column "@1@" has a storage parameter conflict

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.38 11941

---

### merging column "@1@" with inherited definition

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.20.39 11942

---

### column "@1@" has a type conflict

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.40 11943

---

### column "@1@" has a collation conflict

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.41 11944

---

### column "@1@" has a storage parameter conflict

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.42 11945

---

### column "@1@" inherits conflicting default values

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.43 11946

---

### check constraint name "@1@" appears multiple times but with different expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.44 11947

---

### cannot rename column of typed table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.45 11948

---

### "@1@" is not a table, view, materialized view, composite type, index, or foreign table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.46 11949

---

### **inherited column "@1@" must be renamed in child tables too**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.47 11950

---

### **cannot rename system column "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.48 11951

---

### **cannot rename inherited column "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.49 11952

---

### **column "@1@" of relation "@2@" already exists**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.50 11953

---

### cannot @1@ "@2@" because it is being used by active queries in this session

#### [Description]

An error occurred because execution is temporarily impossible.

#### [System Processing]

Processing will be aborted.

#### [Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.20.51 11954

---

### cannot @1@ "@2@" because it has pending trigger events

#### [Description]

An error occurred because execution is temporarily impossible.

#### [System Processing]

Processing will be aborted.

#### [Action]

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

## 2.20.52 11955

---

### type @1@ is not a composite type

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.53 11956

---

### cannot rewrite system relation "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.54 11957

---

### cannot truncate temporary tables of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.55 11958

---

### rewriting table "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.20.56 11959

---

### verifying table "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.20.57 11960

---

### column "@1@" contains null values

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.58 11961

---

---

**check constraint "@1@" is violated by some row****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.20.59 11962**

---

**"@1@" is not a table, materialized view, or index****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.20.60 11963**

---

**"@1@" is not a table or view****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.20.61 11964**

---

**"@1@" is not a table or foreign table****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.20.62 11965**

---

**"@1@" is not a table, composite type, or foreign table**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.63 11966

---

### "@1@" is of the wrong type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.64 11967

---

### cannot alter type "@1@" because it is the type of a typed table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.65 11968

---

### type @1@ is not a domain

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.66 11969

---

### cannot add column to typed table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.67 11970

---

### **child table "@1@" has different type for column "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.68 11971

---

### **child table "@1@" has different collation for column "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.69 11972

---

### **child table "@1@" has a conflicting "@2@" column**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.70 11973

---

### **merging definition of column "@1@" for child "@2@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.20.71 11974

---

### column must be added to child tables too

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.72 11975

---

### cannot alter system column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.73 11976

---

### column "@1@" is in a primary key

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.74 11977

---

### statistics target @1@ is too low

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.75 11978

---

### lowering statistics target to @1@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.76 11979

---

### invalid storage type "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.77 11980

---

### column data type @1@ can only have storage PLAIN

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.78 11981

---

### cannot drop column from typed table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.79 11982

---

### column "@1@" of relation "@2@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.20.80 11983

---

### cannot drop system column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.81 11984

---

### cannot drop inherited column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.82 11985

---

### ALTER TABLE / ADD CONSTRAINT USING INDEX will rename index "@1@" to "@2@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.20.83 11986

---

### constraint must be added to child tables too

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.84 11987

---

### inherited relation "@1@" is not a table or foreign table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.85 11988

---

### constraints on permanent tables may reference only permanent tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.86 11989

---

### constraints on unlogged tables may reference only permanent or unlogged tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.87 11990

---

---

### constraints on temporary tables may reference only temporary tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.88 11991

---

### number of referencing and referenced columns for foreign key disagree

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.89 11992

---

### foreign key constraint "@1@" cannot be implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.90 11993

---

### constraint "@1@" of relation "@2@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.20.91 11994

---

### column "@1@" referenced in foreign key constraint does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.92 11995

---

### cannot have more than @1@ keys in a foreign key

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.93 11996

---

### cannot use a deferrable primary key for referenced table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.94 11997

---

### there is no primary key for referenced table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.95 11998

---

### cannot use a deferrable unique constraint for referenced table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.20.96 11999

---

**there is no unique constraint matching given keys for referenced table "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21 Message Numbers Beginning with 12000

---

### 2.21.1 12000

---

**validating foreign key constraint "@1@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

### 2.21.2 12001

---

**cannot drop inherited constraint "@1@" of relation "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.21.3 12002

---

**constraint "@1@" of domain "@2@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.4 12003

---

**constraint "@1@" of relation "@2@" does not exist, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.21.5 12004

---

**cannot alter column type of typed table**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.6 12005

---

**cannot alter inherited column "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.7 12006

---

**transform expression must not return a set**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.8 12007

---

### cannot use subquery in index expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.9 12010

---

### column "@1@" cannot be cast automatically to type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.10 12011

---

### type of inherited column "@1@" must be changed in child tables too

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.11 12012

---

### cannot alter type of column "@1@" twice

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.12 12013

---

### default for column "@1@" cannot be cast automatically to type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.13 12014

---

### cannot alter type of a column used by a view or rule

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.14 12015

---

### cannot alter type of a column used in a trigger definition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.15 12016

---

### cannot change owner of index "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.21.16 12017

---

### cannot change owner of sequence "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.17 12018

---

### "@1@" is not a table, materialized view, index, or foreign table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.18 12019

---

### index "@1@" for table "@2@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.19 12020

---

### cannot have multiple SET TABLESPACE subcommands

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.20 12021

---

### "@1@" is not a table, view, materialized view, index, or TOAST table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.21 12022

---

### cannot move system relation "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.22 12023

---

### cannot rewrite temporary tables of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.23 12024

---

### cannot change inheritance of typed table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.24 12025

---

### **circular inheritance not allowed**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.25 12026

---

### **table "@1@" without OIDs cannot inherit from table "@2@" with OIDs**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.26 12027

---

### **column "@1@" in child table must be marked NOT NULL**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.27 12028

---

### **child table is missing column "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.28 12029

---

---

**child table "@1@" has different definition for check constraint "@2@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.21.29 12030**

---

**child table is missing constraint "@1@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.21.30 12031**

---

**relation "@1@" is not a parent of relation "@2@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.21.31 12032**

---

**typed tables cannot inherit****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.21.32 12033**

---

**table is missing column "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.33 12034

---

**table has column "@1@" where type requires "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.34 12035

---

**table "@1@" has different type for column "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.35 12036

---

**table has extra column "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.36 12037

---

**"@1@" is not a typed table**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.37 12038

---

### cannot move an owned sequence into another schema

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.38 12039

---

### conversion "@1@" already exists in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.39 12040

---

### unlogged sequences are not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.40 12041

---

### nextval: reached maximum value of sequence "@1@" (@2@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.41 12042

---

**nextval: reached minimum value of sequence "@1@" (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.42 12043

---

**currvl of sequence "@1@" is not yet defined in this session**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.43 12044

---

**lastval is not yet defined in this session**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.44 12045

---

**setval: value @1@ is out of bounds for sequence "@2@" (@3@..@4@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.45 12046

---

### **INCREMENT must not be zero**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.46 12047

---

### **MINVALUE (@1@) must be less than MAXVALUE (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.47 12048

---

### **START value (@1@) cannot be less than MINVALUE (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.48 12049

---

### **START value (@1@) cannot be greater than MAXVALUE (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.49 12050

---

---

**RESTART value (@1@) cannot be less than MINVALUE (@2@)****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.21.50 12051**

---

**RESTART value (@1@) cannot be greater than MAXVALUE (@2@)****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.21.51 12052**

---

**CACHE (@1@) must be greater than zero****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.21.52 12053**

---

**invalid OWNED BY option****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.21.53 12054**

---

**sequence must have same owner as table it is linked to**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.54 12055

---

### sequence must be in same schema as table it is linked to

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.55 12056

---

### invalid cursor name: must not be empty

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.56 12057

---

### utility statements cannot be prepared

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.57 12058

---

### prepared statement is not a SELECT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.58 12059

---

### wrong number of parameters for prepared statement "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.59 12060

---

### cannot use subquery in EXECUTE parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.60 12061

---

### aggregate functions are not allowed in EXECUTE parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.61 12062

---

### window functions are not allowed in EXECUTE parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.62 12063

---

**parameter \$@1@ of type @2@ cannot be coerced to the expected type @3@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.63 12064

---

**prepared statement "@1@" already exists**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.64 12065

---

**unnamed prepared statement does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.65 12066

---

**skipping vacuum of "@1@" --- lock not available**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.21.66 12067

---

**skipping "@1@" --- only superuser can vacuum it**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.21.67 12068

---

**skipping "@1@" --- only superuser or database owner can vacuum it**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.21.68 12069

---

**skipping "@1@" --- only table or database owner can vacuum it**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.21.69 12070

---

**skipping "@1@" --- cannot vacuum non-tables or special system tables**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.21.70 12071

---

**analyzing "@1@.@2@" inheritance tree**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.21.71 12072

---

**analyzing "@1@.@2@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.21.72 12073

---

**automatic analyze of table "@1@.@2@.@3@" system usage: @4@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.21.73 12074

---

**"@1@": scanned @2@ of @3@ pages, containing @4@ live rows and @5@ dead rows; @6@ rows in sample, @7@ estimated total rows**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.21.74 12075

---

### cannot move temporary tables of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.75 12076

---

### there is no previously clustered index for table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.76 12077

---

### cannot cluster a shared catalog

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.77 12078

---

### cannot access temporary tables of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.78 12079

---

**"@1@" is not an index for table "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.79 12080

---

**cannot cluster on index "@1@" because access method does not support clustering**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.80 12081

---

**cannot cluster on partial index "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.81 12082

---

**cannot cluster on invalid index "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.82 12083

---

### clustering "@1@.@2@" using index scan on "@3@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.21.83 12084

---

### clustering "@1@.@2@" using sequential scan and sort

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.21.84 12086

---

### invalid statement name: must not be empty

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.85 12087

---

### could not reposition held cursor

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.86 12088

---

---

### SQL function cannot return shell type @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.21.87 12089

---

### type "@1@" is only a shell

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.21.88 12090

---

### type "@1@" is not yet defined

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.21.89 12091

---

### SQL function cannot accept shell type @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.21.90 12092

---

### type @1@ is only a shell

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.21.91 12093

---

### **token type "@1@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.92 12094

---

### **functions cannot accept set arguments**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.93 12095

---

### **VARIADIC parameter must be the last input parameter**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.21.94 12096

---

### **VARIADIC parameter must be an array**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.21.95 12097

---

### argument name "@1@" used more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.21.96 12098

---

### only input parameters can have default values

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.21.97 12099

---

### cannot use table references in parameter default value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22 Message Numbers Beginning with 12100

---

---

### 2.22.1 12103

---

#### input parameters after one with a default value must also have defaults

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.2 12104

---

### no function body specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.3 12105

---

### no language specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.4 12106

---

### COST must be positive

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.5 12107

---

### ROWS must be positive

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.6 12108

---

**unrecognized function attribute "@1@" ignored**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.22.7 12109

---

**only one AS item needed for language "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.8 12110

---

**role "@1@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.9 12111

---

**function result type must be @1@ because of OUT parameters**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.10 12112

---

**function result type must be specified**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.11 12113

---

**ROWS is not applicable when function does not return a set**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.12 12114

---

**aggregate @1@(@2@) does not exist, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.22.13 12116

---

**source data type @1@ is a pseudo-type**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.14 12117

---

### target data type @1 @ is a pseudo-type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.15 12118

---

### cast function must take one to three arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.16 12119

---

### argument of cast function must match or be binary-coercible from source data type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.17 12120

---

### second argument of cast function must be type integer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.18 12121

---

### third argument of cast function must be type boolean

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.19 12122

---

### return data type of cast function must match or be binary-coercible to target data type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.20 12123

---

### cast function must not be volatile

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.21 12124

---

### cast function must not be an aggregate function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.22 12125

---

### cast function must not be a window function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.23 12126

---

### cast function must not return a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.24 12127

---

### must be superuser to create a cast WITHOUT FUNCTION

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.25 12128

---

### source and target data types are not physically compatible

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.26 12129

---

---

### **composite data types are not binary-compatible**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.22.27 12130**

---

### **enum data types are not binary-compatible**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.22.28 12131**

---

### **array data types are not binary-compatible**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.22.29 12132**

---

### **domain data types must not be marked binary-compatible**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.22.30 12133**

---

### **source data type and target data type are the same**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.31 12134

---

### cast from type @1@ to type @2@ already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.32 12135

---

### cast from type @1@ to type @2@ does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.22.33 12136

---

### cast from type @1@ to type @2@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.34 12138

---

### no inline code specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.35 12139

---

### language "@1@" does not support inline code execution

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.36 12140

---

### channel name cannot be empty

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.37 12141

---

### channel name too long

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.38 12142

---

### payload string too long

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.39 12143

---

### cannot PREPARE a transaction that has executed LISTEN, UNLISTEN, or NOTIFY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.40 12144

---

### too many notifications in the NOTIFY queue

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.41 12145

---

### NOTIFY queue is @1@@2@ full

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.22.42 12146

---

### function @1@ must return type "language\_handler"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.43 12147

---

### must be superuser to create text search parsers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.44 12148

---

### text search parser parameter "@1@" not recognized

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.45 12149

---

### text search parser start method is required

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.46 12150

---

### text search parser gettoken method is required

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.47 12151

---

**text search parser end method is required**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.48 12152

---

**text search parser lextypes method is required**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.49 12153

---

**must be superuser to rename @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.50 12154

---

**text search parser "@1@" does not exist, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.22.51 12156

---

### text search parser "@1@" already exists in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.52 12157

---

### text search template "@1@" does not accept options

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.53 12158

---

### text search template is required

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.54 12159

---

### text search dictionary "@1@" already exists in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.55 12160

---

### text search dictionary "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.22.56 12161

---

### must be superuser to create text search templates

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.57 12162

---

### text search template parameter "@1@" not recognized

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.58 12163

---

### text search template lexize method is required

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.59 12165

---

### text search template "@1@" already exists in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.60 12167

---

### text search template "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.22.61 12168

---

### text search configuration parameter "@1@" not recognized

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.62 12169

---

### cannot specify both PARSER and COPY options

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.63 12170

---

### text search parser is required

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.64 12171

---

### text search configuration "@1@" already exists in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.65 12172

---

### text search configuration "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.22.66 12174

---

### mapping for token type "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.67 12175

---

### mapping for token type "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.22.68 12176

---

### invalid parameter list format: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.69 12177

---

### group "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.70 12178

---

### invalid extension name: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.71 12179

---

### invalid extension version name: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.72 12180

---

### could not open extension control file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.22.73 12181

---

### parameter "@1@" cannot be set in a secondary extension control file

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.74 12183

---

### parameter "@1@" must be a list of extension names

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.75 12184

---

### unrecognized parameter "@1@" in file "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.76 12185

---

### parameter "schema" cannot be specified when "relocatable" is true

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.77 12186

---

### transaction control statements are not allowed within an extension script

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.78 12187

---

### permission denied to create extension "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.22.79 12188

---

---

**permission denied to update extension "@1@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.22.80 12189**

---

**extension "@1@" has no update path from version "@2@" to version "@3@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.22.81 12190**

---

**relation "@1@" already exists, skipping****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.22.82 12191**

---

**extension "@1@" already exists****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.22.83 12192**

---

**nested CREATE EXTENSION is not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.84 12193

---

### version to install must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.85 12194

---

### FROM version must be different from installation target version "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.86 12195

---

### extension "@1@" must be installed in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.87 12196

---

### required extension "@1@" is not installed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.88 12197

---

**language "@1@" does not exist, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.22.89 12198

---

**OID @1@ does not refer to a table**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.22.90 12199

---

**table "@1@" is not a member of the extension being created**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23 Message Numbers Beginning with 12200

---

---

### 2.23.1 12200

---

**extension "@1@" does not support SET SCHEMA**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.2 12201

---

### **nested ALTER EXTENSION is not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.3 12202

---

### **version "@1@" of extension "@2@" is already installed**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.23.4 12203

---

### **@1@ is already a member of extension "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.5 12204

---

### **@1@ is not a member of extension "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.6 12205

---

### using pg\_pltemplate information instead of CREATE LANGUAGE parameters

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.23.7 12206

---

### must be superuser to create procedural language "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.8 12207

---

### function @1@ must return type "trigger"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.9 12208

---

### unsupported language "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.10 12209

---

### must be superuser to create custom procedural language

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.11 12210

---

### changing return type of function @1@ from "opaque" to "language\_handler"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.12 12211

---

### language "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.13 12212

---

### relation "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.14 12213

---

### unacceptable schema name "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.15 12214

---

### sequence "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.16 12215

---

### source encoding "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.17 12216

---

### destination encoding "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.18 12217

---

### encoding conversion function @1@ must return type "void"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.19 12218

---

### view "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.20 12219

---

### relation "@1@" already exists in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.21 12220

---

### could not remove directory "@1@" : @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.23.22 12221

---

### "@1@" exists but is not a directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.23 12222

---

### permission denied to create tablespace "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.24 12223

---

### tablespace location cannot contain single quotes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.25 12224

---

### tablespace location must be an absolute path

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.26 12225

---

### tablespace location "@1@" is too long

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.27 12226

---

### unacceptable tablespace name "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.28 12227

---

### tablespace "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.29 12228

---

### tablespaces are not supported on this platform

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.30 12229

---

### window "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.31 12230

---

### index "@1@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.32 12231

---

### tablespace "@1@" is not empty

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.33 12232

---

### aggregate @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.34 12233

---

### could not set permissions on directory "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.23.35 12234

---

### some useless files may be left behind in old database directory "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.36 12235

---

### directory "@1@" already in use as a tablespace

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.37 12236

---

### could not create symbolic link "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.23.38 12237

---

### could not read symbolic link "@1@": @2@

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.23.39 12238

---

### could not read directory "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.23.40 12239

---

### "@1@" is a foreign table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.41 12240

---

### "@1@" is a view

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.42 12241

---

---

### **TRUNCATE FOR EACH ROW triggers are not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.23.43 12242**

---

#### **INSTEAD OF triggers must be FOR EACH ROW**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.23.44 12243**

---

#### **INSTEAD OF triggers cannot have WHEN conditions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.23.45 12244**

---

#### **INSTEAD OF triggers cannot have column lists**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.23.46 12245**

---

#### **cannot use subquery in trigger WHEN condition**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.47 12246

---

### aggregate functions are not allowed in trigger WHEN conditions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.48 12247

---

### window functions are not allowed in trigger WHEN conditions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.49 12248

---

### statement trigger's WHEN condition cannot reference column values

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.50 12249

---

### INSERT trigger's WHEN condition cannot reference OLD values

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.51 12250

---

### DELETE trigger's WHEN condition cannot reference NEW values

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.52 12251

---

### BEFORE trigger's WHEN condition cannot reference NEW system columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.53 12252

---

### changing return type of function @1@ from "opaque" to "trigger"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.23.54 12254

---

### trigger "@1@" for relation "@2@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.55 12255

---

**ignoring incomplete trigger group for constraint "@1@" @2@**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.56 12256

---

**converting trigger group into constraint "@1@" @2@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.23.57 12257

---

**trigger "@1@" for relation "@2@" does not exist, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.58 12258

---

**trigger "@1@" for table "@2@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.59 12259

---

**permission denied: "@1@" is a system trigger**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.60 12260

---

**trigger function @1@ returned null value**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.61 12261

---

**BEFORE STATEMENT trigger cannot return a value**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.62 12262

---

**constraint "@1@" is not deferrable**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.63 12263

---

**rule "@1@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.64 12264

---

**SYSID can no longer be specified**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.65 12265

---

**invalid connection limit: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.66 12266

---

**must be superuser to create superusers**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.67 12267

---

### must be superuser to create replication users

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.68 12268

---

### permission denied to create database

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.69 12269

---

### role name "@1@" is reserved

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.70 12270

---

### role "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.71 12271

---

---

### **must be superuser to alter superusers**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.23.72 12272**

---

### **must be superuser to alter replication users**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.23.73 12273**

---

### **permission denied**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.23.74 12274**

---

### **permission denied to create role**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.23.75 12275**

---

### **tablespace "@1@" does not exist, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.23.76 12276

---

### current user cannot be dropped

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.77 12277

---

### session user cannot be dropped

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.78 12278

---

### must be superuser to drop superusers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.79 12279

---

### role "@1@" cannot be dropped because some objects depend on it

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.80 12280

---

### session user cannot be renamed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.81 12281

---

### current user cannot be renamed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.82 12282

---

### must be superuser to rename superusers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.83 12283

---

### permission denied to rename database

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.84 12284

---

### MD5 password cleared because of role rename

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.23.85 12285

---

### column names cannot be included in GRANT/REVOKE ROLE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.86 12286

---

### permission denied to drop role

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.87 12287

---

### permission denied to drop objects

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.88 12288

---

**must have admin option on role "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.89 12289

---

**must be superuser to set grantor**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.90 12290

---

**role "@1@" is a member of role "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.23.91 12291

---

**role "@1@" is already a member of role "@2@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.23.92 12292

---

**role "@1@" is not a member of role "@2@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.23.93 12293

---

**COPY BINARY is not supported to stdout or from stdin**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.23.94 12294

---

**could not write to COPY file: @1@**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

## 2.23.95 12295

---

**connection lost during COPY to stdout**

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- If the COMMIT process is not executed after update, add the COMMIT process.
  - If the total number of update records in a single transaction is high, split it into short transactions.
  - If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - Confirm that the database server has not stopped.
    - If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.23.96 12296

---

**could not read from COPY file: @1@**

### [Description]

An error occurred during I/O processing in the database server.

### [System Processing]

Processing will be aborted.

### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.23.97 12297

---

**COPY from stdin failed: @1@**

### [Description]

Processing was canceled.

### [System Processing]

Processing will be aborted.

### [Action]

Check the message text.

## 2.23.98 12298

---

**unexpected message type 0x@1@ during COPY from stdin**

### [Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.23.99 12299

---

**must be superuser to COPY to or from a file**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24 Message Numbers Beginning with 12300

---

### 2.24.1 12300

---

**COPY format "@1@" not recognized**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.24.2 12301

---

**argument to option "@1@" must be a list of column names**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.24.3 12302

---

**argument to option "@1@" must be a valid encoding name**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.4 12303

---

### option "@1@" not recognized

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.24.5 12304

---

### cannot specify DELIMITER in BINARY mode

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.6 12305

---

### cannot specify NULL in BINARY mode

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.7 12306

---

### COPY delimiter must be a single one-byte character

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.8 12307

---

### **COPY delimiter cannot be newline or carriage return**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.9 12308

---

### **COPY null representation cannot use newline or carriage return**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.10 12309

---

### **COPY delimiter cannot be "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.11 12310

---

### **COPY HEADER available only in CSV mode**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.12 12311

---

### **COPY quote available only in CSV mode**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.13 12312

---

### **COPY quote must be a single one-byte character**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.14 12313

---

### **COPY delimiter and quote must be different**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.15 12314

---

### **COPY escape available only in CSV mode**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.16 12315

---

---

### **COPY escape must be a single one-byte character**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.24.17 12316**

---

### **COPY force quote available only in CSV mode**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.24.18 12317**

---

### **COPY force quote only available using COPY TO**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.24.19 12318**

---

### **COPY force not null available only in CSV mode**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.24.20 12319**

---

### **COPY force not null only available using COPY FROM**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.21 12320

---

### **COPY delimiter must not appear in the NULL specification**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.22 12321

---

### **CSV quote character must not appear in the NULL specification**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.23 12322

---

### **table "@1@" does not have OIDs**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.24 12323

---

### **COPY (SELECT) WITH OIDS is not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.25 12324

---

### **COPY (SELECT INTO) is not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.26 12325

---

### **FORCE QUOTE column "@1@" not referenced by COPY**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.27 12326

---

### **FORCE NOT NULL column "@1@" not referenced by COPY**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.28 12327

---

### **cannot copy from sequence "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.29 12328

---

### cannot copy from foreign table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.30 12329

---

### cannot copy to sequence "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.31 12330

---

### cannot copy from non-table relation "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.32 12331

---

### relative path not allowed for COPY to file

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.33 12332

---

### could not open file "@1@" for reading: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.24.34 12333

---

### "@1@" is a directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.35 12334

---

### cannot copy to view "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.36 12335

---

### cannot copy to foreign table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.37 12337

---

---

### cannot copy to non-table relation "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.24.38 12338

---

### COPY file signature not recognized

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.24.39 12339

---

### invalid COPY file header (missing flags)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.24.40 12340

---

### unrecognized critical flags in COPY file header

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.24.41 12341

---

### invalid COPY file header (missing length)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.42 12342

---

### invalid COPY file header (wrong length)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.43 12343

---

### extra data after last expected column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.44 12344

---

### missing data for OID column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.45 12345

---

### null OID in COPY data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.46 12346

---

### invalid OID in COPY data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.47 12347

---

### missing data for column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.48 12348

---

### received copy data after EOF marker

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.49 12349

---

### row field count is @1@, expected @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.50 12350

---

### literal carriage return found in data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.51 12351

---

### unquoted carriage return found in data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.52 12352

---

### literal newline found in data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.53 12353

---

### unquoted newline found in data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.54 12354

---

### end-of-copy marker does not match previous newline style

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.55 12355

---

### end-of-copy marker corrupt

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.56 12356

---

### unterminated CSV quoted field

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.57 12357

---

### unexpected EOF in COPY data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.58 12358

---

---

### invalid field size

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.24.59 12359

---

### incorrect binary data format

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.24.60 12360

---

### must specify at least one column

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.24.61 12361

---

### cannot use more than @1@ columns in an index

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.24.62 12362

---

### cannot create index on foreign table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.63 12363

---

### cannot create indexes on temporary tables of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.64 12364

---

### substituting access method "gist" for obsolete method "rtree"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.24.65 12365

---

### access method "@1@" does not support unique indexes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.66 12366

---

### access method "@1@" does not support multicolumn indexes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.67 12367

---

### access method "@1@" does not support exclusion constraints

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.68 12368

---

### @1@ @2@ will create implicit index "@3@" for table "@4@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.24.69 12369

---

### cannot use subquery in index predicate

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.70 12370

---

### aggregate functions are not allowed in index predicates

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.71 12371

---

### functions in index predicate must be marked IMMUTABLE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.72 12372

---

### cannot use subquery in transform expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.73 12374

---

### functions in index expression must be marked IMMUTABLE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.74 12375

---

### could not determine which collation to use for string comparison

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.75 12376

---

### **operator is not unique: @1@**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.76 12377

---

### **operator @1@ is not a member of operator family "@2@"**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.77 12378

---

### **access method "@1@" does not support ASC/DESC options**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.78 12379

---

### **access method "@1@" does not support NULLS FIRST/LAST options**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.79 12380

---

---

**data type @1@ has no default operator class for access method "@2@"****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.24.80 12381**

---

**operator class "@1@" does not accept data type @2@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.24.81 12382**

---

**there are multiple default operator classes for data type @1@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.24.82 12383**

---

**table "@1@" has no indexes****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.24.83 12384**

---

**can only reindex the currently open database**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.84 12385

---

### table "@1@.@2@" was reindexed

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.24.85 12386

---

### @1@ requires a parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.86 12387

---

### @1@ requires a Boolean value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.87 12389

---

### argument of @1@ must be a name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.88 12391

---

### @1@ requires an integer value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.89 12393

---

### LOCATION is not supported anymore

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.24.90 12396

---

### permission denied to copy database "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.91 12397

---

### invalid server encoding @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.24.92 12399

---

**new encoding (@1@) is incompatible with the encoding of the template database (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25 Message Numbers Beginning with 12400

---

### 2.25.1 12400

---

**new collation (@1@) is incompatible with the collation of the template database (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.25.2 12401

---

**new LC\_CTYPE (@1@) is incompatible with the LC\_CTYPE of the template database (@2@)**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.25.3 12402

---

**pg\_global cannot be used as default tablespace**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.4 12403

---

### cannot assign new default tablespace "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.5 12404

---

### database "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.6 12405

---

### source database "@1@" is being accessed by other users

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.7 12406

---

### encoding "@1@" does not match locale "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.8 12407

---

**role "@1@" does not exist, skipping**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.25.9 12408

---

**cannot drop a template database**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.10 12409

---

**cannot drop the currently open database**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.11 12410

---

**database "@1@" is being accessed by other users**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.12 12411

---

### permission denied to rename role

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.13 12412

---

### current database cannot be changed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.14 12413

---

### cannot change the tablespace of the currently open database

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.15 12414

---

### some relations of database "@1@" are already in tablespace "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.16 12415

---

### permission denied to change owner of database

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.17 12417

---

### SETOF type not allowed for operator argument

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.18 12418

---

### operator attribute "@1@" not recognized

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.25.19 12419

---

### operator procedure must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.20 12420

---

### at least one of leftarg or rightarg must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.21 12421

---

### restriction estimator function @1@ must return type "float8"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.22 12422

---

### join estimator function @1@ must return type "float8"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.23 12424

---

### must be superuser to create a base type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.24 12425

---

---

### type attribute "@1@" not recognized

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.25.25 12426

---

### invalid type category "@1@": must be simple ASCII

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.26 12427

---

### array element type cannot be @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.27 12428

---

### alignment "@1@" not recognized

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.28 12429

---

### storage "@1@" not recognized

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.29 12430

---

### type input function must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.30 12431

---

### type output function must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.31 12432

---

### type modifier output function is useless without a type modifier input function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.32 12433

---

### changing return type of function @1@ from "opaque" to @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.25.33 12434

---

**type input function @1@ must return type @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.34 12435

---

**changing return type of function @1@ from "opaque" to "cstring"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.25.35 12436

---

**type output function @1@ must return type "cstring"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.36 12437

---

**type receive function @1@ must return type @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.37 12438

---

**type send function @1@ must return type "bytea"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.38 12439

---

**"@1@" is not a number**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.39 12440

---

**"@1@" is not a valid base type for a domain**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.40 12441

---

**multiple default expressions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.41 12442

---

### conflicting NULL/NOT NULL constraints

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.42 12443

---

### unique constraints not possible for domains

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.43 12444

---

### primary key constraints not possible for domains

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.44 12445

---

### exclusion constraints not possible for domains

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.45 12446

---

### foreign key constraints not possible for domains

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.46 12447

---

### specifying constraint deferrability not supported for domains

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.47 12448

---

### changing argument type of function @1@ from "opaque" to "cstring"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.25.48 12449

---

### changing argument type of function @1@ from "opaque" to @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.25.49 12450

---

### **typmod\_in function @1@ must return type "integer"**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.50 12451

---

### **typmod\_out function @1@ must return type "cstring"**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.51 12452

---

### **type analyze function @1@ must return type "boolean"**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.52 12453

---

### **column "@1@" of table "@2@" contains null values**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.53 12454

---

---

**column "@1@" of table "@2@" contains values that violate the new constraint****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.25.54 12456**

---

**cannot use table references in domain check constraint****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.25.55 12457**

---

**@1@ is a table's row type****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.25.56 12458**

---

**cannot alter array type @1@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.25.57 12460**

---

**could not obtain lock on relation "@1@.@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.58 12462

---

### could not determine which collation to use for view column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.59 12463

---

### view must have at least one column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.60 12464

---

### cannot drop columns from view

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.61 12465

---

### cannot change name of view column "@1@" to "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.62 12466

---

**cannot change data type of view column "@1@" from @2@ to @3@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.63 12467

---

**views must not contain SELECT INTO**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.64 12468

---

**views must not contain data-modifying statements in WITH**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.65 12469

---

**CREATE VIEW specifies more column names than columns**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.66 12470

---

**view "@1@" will be a temporary view**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.25.67 12471

---

**views cannot be unlogged because they do not have storage**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.68 12472

---

**rule "@1@" for relation "@2@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.69 12473

---

**portal "@1@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.70 12474

---

### there are multiple rules named "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.71 12475

---

### rule "@1@" for relation "@2@" does not exist, skipping

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.25.72 12476

---

### WITH query name "@1@" appears in both a rule action and the query being rewritten

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.73 12477

---

### cannot have RETURNING lists in multiple rules

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.74 12478

---

### multiple assignments to same column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.75 12479

---

### infinite recursion detected in rules for relation "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.76 12480

---

### DO INSTEAD NOTHING rules are not supported for data-modifying statements in WITH

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.77 12481

---

### conditional DO INSTEAD rules are not supported for data-modifying statements in WITH

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.78 12482

---

---

### **DO ALSO rules are not supported for data-modifying statements in WITH**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.25.79 12483**

---

#### **multi-statement DO INSTEAD rules are not supported for data-modifying statements in WITH**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.25.80 12484**

---

#### **cannot perform INSERT RETURNING on relation "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.25.81 12485**

---

#### **cannot perform UPDATE RETURNING on relation "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.25.82 12486**

---

#### **cannot perform DELETE RETURNING on relation "@1@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.83 12487

---

### WITH cannot be used in a query that is rewritten by rules into multiple queries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.84 12488

---

### conditional utility statements are not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.85 12489

---

### WHERE CURRENT OF on a view is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.86 12490

---

### rule "@1@" for relation "@2@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.87 12491

---

### rule actions on OLD are not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.88 12492

---

### rule actions on NEW are not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.89 12493

---

### INSTEAD NOTHING rules on SELECT are not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.25.90 12494

---

### multiple actions for rules on SELECT are not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.91 12495

---

### rules on SELECT must have action INSTEAD SELECT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.92 12496

---

### rules on SELECT must not contain data-modifying statements in WITH

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.93 12497

---

### event qualifications are not implemented for rules on SELECT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.94 12498

---

### "@1@" is already a view

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.25.95 12499

---

### view rule "@1@" must be named "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26 Message Numbers Beginning with 12500

---

### 2.26.1 12500

---

#### could not convert table "@1@" to a view because it is not empty

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.26.2 12501

---

#### could not convert table "@1@" to a view because it has triggers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.26.3 12502

---

#### could not convert table "@1@" to a view because it has indexes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.4 12503

---

### could not convert table "@1@" to a view because it has child tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.5 12504

---

### cannot have multiple RETURNING lists in a rule

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.6 12505

---

### RETURNING lists are not supported in conditional rules

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.7 12506

---

### RETURNING lists are not supported in non-INSTEAD rules

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.8 12507

---

---

### **SELECT rule's target list has too many entries**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.26.9 12508**

---

### **RETURNING list has too many entries**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.26.10 12509**

---

### **cannot convert relation containing dropped columns to view**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.26.11 12510**

---

### **SELECT rule's target entry @1@ has different column name from column "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.26.12 12511**

---

### **SELECT rule's target entry @1@ has different type from column "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.13 12512

---

### RETURNING list's entry @1@ has different type from column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.14 12513

---

### SELECT rule's target entry @1@ has different size from column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.15 12514

---

### RETURNING list's entry @1@ has different size from column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.16 12515

---

### SELECT rule's target list has too few entries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.17 12516

---

### RETURNING list has too few entries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.18 12517

---

### @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.19 12518

---

### Perl hash contains nonexistent column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.20 12519

---

### number of array dimensions (@1@) exceeds the maximum allowed (@2@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.21 12520

---

### **multidimensional arrays must have array expressions with matching dimensions**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.22 12521

---

### **PL/Perl function must return reference to hash or array**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.23 12522

---

### **\$\_TD->{new} does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.24 12523

---

### **\$\_TD->{new} is not a hash reference**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.25 12524

---

### PL/Perl functions cannot return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.26 12525

---

### PL/Perl functions cannot accept type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.27 12526

---

### didn't get a CODE reference from compiling function "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.26.28 12527

---

### set-valued function called in context that cannot accept a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.29 12528

---

---

### set-returning PL/Perl function must return reference to array or use return\_next

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.30 12529

---

### function returning record called in context that cannot accept type record

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.31 12530

---

### ignoring modified row in DELETE trigger

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.26.32 12531

---

### result of PL/Perl trigger function must be undef, "SKIP", or "MODIFY"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.33 12532

---

### out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.26.34 12533

---

### trigger functions can only be called as triggers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.35 12534

---

### cannot use return\_next in a non-SETOF function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.36 12535

---

### SETOF-composite-returning PL/Perl function must call return\_next with reference to hash

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.37 12536

---

### PL/pgSQL functions cannot accept type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.38 12537

---

### could not determine actual return type for polymorphic function "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.39 12538

---

### trigger functions can only be called as triggers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.40 12539

---

### PL/pgSQL functions cannot return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.41 12540

---

### trigger functions cannot have declared arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.42 12541

---

### parameter name "@1@" used more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.43 12542

---

### column reference "@1@" is ambiguous

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.44 12543

---

### record "@1@" has no field "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.45 12544

---

### variable "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.46 12545

---

**relation "@1@" does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.47 12546

---

**variable "@1@" has pseudo-type @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.48 12547

---

**relation "@1@" is not a table**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.49 12548

---

**type "@1@" is only a shell**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.50 12549

---

### unrecognized exception condition "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.51 12550

---

### could not determine actual argument type for polymorphic function "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.52 12551

---

### CONTINUE cannot be used outside a loop

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.53 12552

---

### control reached end of function without RETURN

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.54 12553

---

---

### set-valued function called in context that cannot accept a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.55 12554

---

### control reached end of trigger procedure without RETURN

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.56 12555

---

### trigger procedure cannot return a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.57 12556

---

### variable "@1@" declared NOT NULL cannot default to NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.58 12557

---

### case not found

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.59 12558

---

### lower bound of FOR loop cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.60 12559

---

### upper bound of FOR loop cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.61 12560

---

### BY value of FOR loop cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.62 12561

---

### BY value of FOR loop must be greater than zero

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.63 12562

---

### cursor "@1@" already in use

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.64 12563

---

### arguments given for cursor without arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.65 12564

---

### arguments required for cursor

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.66 12565

---

### FOREACH expression must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.67 12566

---

### **FOREACH expression must yield an array, not type @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.68 12567

---

### **slice dimension (@1@) is out of the valid range 0..@2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.69 12568

---

### **FOREACH ... SLICE loop variable must be of an array type**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.70 12569

---

### **FOREACH loop variable must not be of an array type**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.71 12570

---

### cannot use RETURN NEXT in a non-SETOF function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.72 12571

---

### wrong result type supplied in RETURN NEXT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.73 12572

---

### record "@1@" is not assigned yet

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.74 12573

---

### wrong record type supplied in RETURN NEXT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.75 12574

---

---

### **RETURN NEXT must have a parameter**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.26.76 12575**

---

### **cannot use RETURN QUERY in a non-SETOF function**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.26.77 12576**

---

### **RAISE without parameters cannot be used outside an exception handler**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.26.78 12577**

---

### **too few parameters specified for RAISE**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.26.79 12578**

---

### **too many parameters specified for RAISE**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.80 12579

---

### RAISE statement option cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.81 12580

---

### RAISE option already specified: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.82 12581

---

### cannot COPY to/from client in PL/pgSQL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.83 12582

---

### cannot begin/end transactions in PL/pgSQL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.84 12583

---

### INTO used with a command that cannot return data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.85 12584

---

### query returned no rows

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.86 12585

---

### query returned more than one row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.26.87 12586

---

### query has no destination for result data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.88 12587

---

### query string argument of EXECUTE is null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.89 12588

---

### EXECUTE of SELECT ... INTO is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.90 12589

---

### cursor variable "@1@" is null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.91 12590

---

### cursor "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.92 12591

---

### relative or absolute cursor position is null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.93 12592

---

### null value cannot be assigned to variable "@1@" declared NOT NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.94 12593

---

### cannot assign non-composite value to a row variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.95 12594

---

### cannot assign non-composite value to a record variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.26.96 12595

---

---

**number of array dimensions (@1@) exceeds the maximum allowed (@2@)****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.26.97 12596**

---

**subscripted object is not an array****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.26.98 12597**

---

**array subscript in assignment must not be null****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.26.99 12598**

---

**query "@1@" did not return data****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27 Message Numbers Beginning with 12600

---

### 2.27.1 12600

---

#### row or record variable cannot be NOT NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.27.2 12601

---

#### default value for row or record variable is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.27.3 12603

---

#### "@1@" is not a scalar variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.27.4 12604

---

#### loop variable of loop over rows must be a record or row variable or list of scalar variables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.5 12605

---

### cursor FOR loop must have only one target variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.6 12606

---

### cursor FOR loop must use a bound cursor variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.7 12607

---

### integer FOR loop must have only one target variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.8 12608

---

### cannot specify REVERSE in query FOR loop

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.9 12609

---

---

### **loop variable of FOREACH must be a known variable or list of variables**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.27.10 12610**

---

### **FETCH statement cannot return multiple rows**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.27.11 12611**

---

### **cursor variable must be a simple variable**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.27.12 12612**

---

### **variable "@1@" must be of type cursor or refcursor**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.27.13 12613**

---

### **"@1@" is not a known variable**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.14 12614

---

### missing "@1@" at end of SQL expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.15 12615

---

### missing "@1@" at end of SQL statement

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.16 12616

---

### RETURN cannot have a parameter in function returning set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.17 12617

---

### RETURN cannot have a parameter in function with OUT parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.18 12618

---

### **RETURN cannot have a parameter in function returning void**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.19 12620

---

### **RETURN NEXT cannot have a parameter in function with OUT parameters**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.20 12622

---

### **"@1@" is declared CONSTANT**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.21 12623

---

### **record or row variable cannot be part of multiple-item INTO list**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.22 12624

---

### too many INTO variables specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.23 12625

---

### end label "@1@" specified for unlabelled block

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.24 12626

---

### end label "@1@" differs from block's label "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.25 12627

---

### cursor "@1@" has no arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.26 12628

---

### cursor "@1@" has arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.27 12629

---

### @1@ at end of input

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.28 12630

---

### unexpected return value from trigger procedure

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.29 12631

---

### PL/Python trigger function returned "MODIFY" in a DELETE trigger -- ignored

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.27.30 12632

---

### TD["new"] deleted, cannot modify row

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.31 12633

---

### TD["new"] is not a dictionary

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.32 12634

---

### TD["new"] dictionary key at ordinal position @1@ is not a string

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.33 12635

---

### key "@1@" found in TD["new"] does not exist as a column in the triggering row

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.34 12636

---

---

### unsupported set function return mode

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.35 12637

---

### returned object cannot be iterated

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.36 12638

---

### PL/Python function with return type "void" did not return None

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.37 12639

---

### forcibly aborting a subtransaction that has not been exited

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.27.38 12640

---

### function returning record called in context that cannot accept type record

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.39 12641

---

### trigger functions can only be called as triggers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.40 12642

---

### PL/Python functions cannot return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.41 12643

---

### PL/Python functions cannot accept type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.42 12644

---

### cannot convert multidimensional array to Python list

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.43 12645

---

### could not convert Python object into cstring: Python string representation appears to contain null bytes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.44 12646

---

### key "@1@" not found in mapping

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.45 12647

---

### length of returned sequence did not match number of columns in row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.46 12648

---

### attribute "@1@" does not exist in Python object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.47 12649

---

**plpy.prepare: type name at ordinal position @1@ is not a string**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.48 12651

---

**Python major version mismatch in session**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.49 12652

---

**@1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.27.50 12653

---

**@1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.51 12654

---

### out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.27.52 12655

---

### trigger functions can only be called as triggers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.53 12656

---

### PL/Tcl functions cannot return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.27.54 12657

---

### PL/Tcl functions cannot return composite types

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.28 Message Numbers Beginning with 12700

---

### 2.28.1 12704

---

**function "@1@" does not exist**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

### 2.28.2 12725

---

**operator @1@ is not a valid ordering operator**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.29 Message Numbers Beginning with 12900

---

### 2.29.1 12908

---

**could not remove cache file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.29.2 12909

---

**could not open tablespace directory "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.30 Message Numbers Beginning with 13000**

---

### **2.30.1 13092**

---

**too few arguments for format**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### **2.30.2 13094**

---

**null values cannot be formatted as an SQL identifier**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## **2.31 Message Numbers Beginning with 13300**

---

### **2.31.1 13359**

---

**online backup was canceled, recovery cannot continue**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

### **2.31.2 13362**

---

---

### online backup mode canceled

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.31.3 13363

---

### online backup mode was not canceled

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.32 Message Numbers Beginning with 13400

---

### 2.32.1 13449

---

#### cannot convert whole-row table reference

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### 2.32.2 13452

---

#### cannot alter type "@1@" because column "@2@.@3@" uses it

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.32.3 13453

---

#### cannot alter foreign table "@1@" because column "@2@.@3@" uses its row type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.32.4 13454

---

#### cannot alter table "@1@" because column "@2@.@3@" uses its row type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.32.5 13478

---

#### parameter "lc\_ctype" must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.32.6 13481

---

#### operator family "@1@" does not exist for access method "@2@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.32.7 13490

---

### directories for tablespace @1@ could not be removed

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.32.8 13497

---

### cannot drop extension "@1@" because it is being modified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.32.9 13499

---

### pg\_extension\_config\_dump() can only be called from an SQL script executed by CREATE EXTENSION

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.33 Message Numbers Beginning with 13500

---

### 2.33.1 13508

---

#### must be superuser to set schema of @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.33.2 13580

---

### cannot PREPARE while holding both session-level and transaction-level locks on the same object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.33.3 13589

---

### sending cancel to blocking autovacuum PID @1@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.33.4 13597

---

### not enough elements in RWConflictPool to record a read/write conflict

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.33.5 13598

---

### not enough elements in RWConflictPool to record a potential read/write conflict

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.34 Message Numbers Beginning with 13700

---

### 2.34.1 13761

---

**cannot move extension "@1@" into schema "@2@" because the extension contains the schema**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.35 Message Numbers Beginning with 13800

---

### 2.35.1 13833

---

**column @1@**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

### 2.35.2 13860

---

**symbolic link "@1@" target is too long**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

### 2.35.3 13864

---

#### unexpected message type "@1@"

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

### 2.35.4 13884

---

#### could not create signal listener pipe for PID @1@: error code @2@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.36 Message Numbers Beginning with 13900

---

### 2.36.1 13922

---

#### could not close handle to backend parameter variables: error code @1@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

### 2.36.2 13941

---

#### conflicting constraint properties

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.36.3 13943

---

#### @1@ constraints cannot be marked DEFERRABLE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.36.4 13944

---

#### @1@ constraints cannot be marked NOT VALID

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.37 Message Numbers Beginning with 14000

---

### 2.37.1 14024

---

#### column name must be qualified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.37.2 14028

---

#### cannot create relations in temporary schemas of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.37.3 14029

---

#### cannot create temporary relation in non-temporary schema

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.37.4 14030

---

#### only temporary relations may be created in temporary schemas

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.37.5 14042

---

#### cannot reassign ownership of objects owned by @1@ because they are required by the database system

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.38 Message Numbers Beginning with 14100

---

### 2.38.1 14104

---

#### cannot convert Perl array to non-array type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.38.2 14105

---

**cannot convert Perl hash to non-composite type @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.39 Message Numbers Beginning with 14200

---

### 2.39.1 14211

---

**PL/Tcl functions cannot accept type @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.39.2 14218

---

**"@1@" is a table**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.39.3 14282

---

**cannot add schema "@1@" to extension "@2@" because the schema contains the extension**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.39.4 14284

---

### could not identify current directory: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.5 14285

---

### invalid binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.6 14286

---

### could not read binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.7 14287

---

### could not find a "@1@" to execute

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.8 14289

---

**could not read symbolic link "@1@"**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.9 14290

---

**child process exited with exit code @1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.10 14291

---

**child process was terminated by exception 0x@1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.11 14292

---

**child process was terminated by signal @1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.12 14293

---

### child process was terminated by signal @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.13 14294

---

### child process exited with unrecognized status @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.14 14295

---

### could not identify current directory: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.15 14296

---

### invalid binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.39.16 14297

---

---

### could not read binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.39.17 14298

---

### could not find a "@1@" to execute

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.39.18 14299

---

### could not change directory to "@1@": @2@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40 Message Numbers Beginning with 14300

---

### 2.40.1 14300

---

#### could not read symbolic link "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.2 14301

---

### child process exited with exit code @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.3 14302

---

### child process was terminated by exception 0x@1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.4 14303

---

### child process was terminated by signal @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.5 14304

---

### child process was terminated by signal @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.6 14305

---

---

### child process exited with unrecognized status @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.7 14306

---

### could not identify current directory: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.8 14307

---

### invalid binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.9 14308

---

### could not read binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.10 14309

---

### could not find a "@1@" to execute

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.11 14310

---

### could not change directory to "@1@": @2@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.12 14311

---

### could not read symbolic link "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.13 14318

---

### could not identify current directory: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.14 14319

---

### invalid binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.15 14320

---

**could not read binary "@1@"**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.16 14321

---

**could not find a "@1@" to execute**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.17 14322

---

**could not change directory to "@1@": @2@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.18 14323

---

**could not read symbolic link "@1@"**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.19 14324

---

### child process exited with exit code @1 @

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.20 14325

---

### child process was terminated by exception 0x@1 @

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.21 14326

---

### child process was terminated by signal @1 @

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.22 14327

---

### child process was terminated by signal @1 @

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.23 14328

---

### auto-open of the keystore has been enabled

[Description]

Enabled automatic opening of the keystore.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.40.24 14329

---

### could not identify current directory: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.25 14330

---

### invalid binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.26 14331

---

### could not read binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.27 14332

---

---

### could not find a "@1@" to execute

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.28 14333

---

### could not change directory to "@1@": @2@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.29 14334

---

### could not read symbolic link "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.30 14335

---

### child process exited with exit code @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.31 14336

---

### child process was terminated by exception 0x@1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.32 14337

---

**child process was terminated by signal @1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.33 14338

---

**child process was terminated by signal @1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.34 14339

---

**@1@: no database directory specified and environment variable PGDATA unset**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.40.35 14340

---

**could not identify current directory: @1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.36 14341

---

### invalid binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.37 14342

---

### could not read binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.38 14343

---

### could not find a "@1@" to execute

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.39 14344

---

### could not change directory to "@1@" : @2@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.40 14345

---

**could not read symbolic link "@1@"**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.41 14346

---

**child process exited with exit code @1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.42 14347

---

**child process was terminated by exception 0x@1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.43 14348

---

**child process was terminated by signal @1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.44 14349

---

### child process was terminated by signal @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.40.45 14351

---

### could not access directory for core file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.40.46 14352

---

### path specified by configuration parameter "@1@" is invalid: "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.40.47 14353

---

### WAL archiving is not active

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.40.48 14354

---

---

**could not set permissions on path specified by configuration parameter "@1@": "@2@": @3@****[Description]**

An error occurred during I/O processing in the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.40.49 14359**

---

**could not extend file "@1@", but retrying: @2@****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.40.50 14360**

---

**could not read block @1@ in file "@2@", but retrying: @3@****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.40.51 14361**

---

**could not write block @1@ in file "@2@", but retrying: @3@****[Description]**

Terminated normally but a warning was output.

**[System Processing]**

Continues processing.

**[Action]**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.40.52 14366

---

### a failure has occurred while multiplexing transaction log files

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.40.53 14367

---

### multiplexing of transaction log files has been stopped

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.40.54 14368

---

### must be superuser to control WAL multiplexing

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.40.55 14369

---

### WAL multiplexing is not configured

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.40.56 14370

---

---

### WAL multiplexing is already paused

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.40.57 14371

---

### WAL multiplexing is not paused

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.40.58 14372

---

### could not fork XLog multiplexer process: @1 @

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.40.59 14373

---

### could not set junction for "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.40.60 14374

---

### could not set junction for "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.40.61 14375

---

### could not remove file or directory "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.40.62 14376

---

### could not remove file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.40.63 14377

---

### could not set junction for "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.40.64 14378

---

### could not get junction for "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.40.65 14379

---

### could not open directory "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.40.66 14380

---

### could not read directory "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.40.67 14381

---

### could not stat file or directory "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.40.68 14384

---

### could not determine encoding for locale "@1@": codeset is "@2@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.40.69 14385

---

### could not remove file or directory "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.40.70 14388

---

### @1@ at or near "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.40.71 14390

---

### query "@1@" returned more than one row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.40.72 14391

---

### query "@1@" is not a SELECT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.40.73 14392

---

### block label must be placed before DECLARE, not after

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.40.74 14393

---

### collations are not supported by type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.40.75 14394

---

### row or record variable cannot be CONSTANT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.40.76 14395

---

### cannot use serializable mode in a hot standby

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.41 Message Numbers Beginning with 14400

---

### 2.41.1 14419

---

**could not write lock file "@1@": @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.41.2 14421

---

**Expected 1 tuple with 2 fields, got @1@ tuples with @2@ fields.**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

### 2.41.3 14422

---

**The primary's identifier is @1@, the standby's identifier is @2@.**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.41.4 14423

---

**The transaction has already committed locally, but might not have been replicated to the standby.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.5 14424

---

**You can choose the collation by applying the COLLATE clause to one or both expressions.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.6 14425

---

**Query has too few columns.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.7 14426

---

**Cannot cast type @1@ to @2@ in column @3@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.8 14427

---

**Query has too many columns.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.9 14430

---

**No aggregate function matches the given name and argument types. Perhaps you misplaced ORDER BY; ORDER BY must appear after all regular arguments of the aggregate.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.10 14431

---

**No function matches the given name and argument types. You might need to add explicit type casts.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.11 14432

---

**There is a WITH item named "@1@", but it cannot be referenced from this part of the query.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.12 14433

---

**Use WITH RECURSIVE, or re-order the WITH items to remove forward references.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.13 14434

---

**Perhaps you meant to reference the table alias "@1@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.14 14435

---

**There is an entry for table "@1@", but it cannot be referenced from this part of the query.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.15 14436

---

**String constants with Unicode escapes cannot be used when `standard_conforming_strings` is off.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.16 14437

---

**Unicode escapes must be `\uXXXX` or `\UXXXXXXXX`.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.17 14438

---

**Use " to write quotes in strings. \\' is insecure in client-only encodings.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.18 14439

---

**Use " to write quotes in strings, or use the escape string syntax (E'...').**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.19 14440

---

**Use the escape string syntax for backslashes, e.g., E'\\'.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.20 14441

---

**Use the escape string syntax for escapes, e.g., E'\\r\\n'.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.21 14442

---

**Cast the output of the non-recursive term to the correct type.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.22 14443

---

**Use the COLLATE clause to set the collation of the non-recursive term.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.23 14444

---

**Explicitly cast to the desired type, for example ARRAY[]::integer[].**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.24 14445

---

**Row comparison operators must be associated with btree operator families.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.25 14446

---

**There are multiple equally-plausible candidates.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.26 14447

---

**You will need to rewrite or cast the expression.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.27 14448

---

**Use an explicit ordering operator or modify the query.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.28 14449

---

**Could not choose a best candidate operator. You might need to add explicit type casts.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.29 14450

---

---

**No operator matches the given name and argument type(s). You might need to add explicit type casts.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.41.30 14451

---

**Aggregates with DISTINCT must be able to sort their inputs.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.41.31 14452

---

**Constraint "@1@" contains a whole-row reference to table "@2@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.41.32 14453

---

**Index "@1@" contains a whole-row table reference.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.41.33 14454

---

**Cannot create a primary key or unique constraint using such an index.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.34 14455

---

### Cannot create a non-deferrable constraint using a deferrable index.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.35 14456

---

### Ordering operators must be "<" or ">" members of btree operator families.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.36 14457

---

### Update your data type.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.37 14458

---

### Use NONE to denote the missing argument of a unary operator.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.38 14459

---

**Use separate LIMIT and OFFSET clauses.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.39 14460

---

**For example, FROM (VALUES ...) [AS] foo.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.40 14461

---

**For example, FROM (SELECT ...) [AS] foo.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.41 14463

---

**The insertion source is a row expression containing the same number of columns expected by the INSERT. Did you accidentally use extra parentheses?**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.42 14464

---

**Only result column names can be used, not expressions or functions.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.43 14465

---

**Add the expression/function to every SELECT, or move the UNION into a FROM clause.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.44 14466

---

**Scrollable cursors must be READ ONLY.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.45 14467

---

**Holdable cursors must be READ ONLY.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.46 14468

---

**Insensitive cursors must be READ ONLY.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.47 14469

---

**Valid options in this context are: @1@**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.48 14470

---

**Specify OWNED BY table.column or OWNED BY NONE.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.49 14471

---

**Extension names must not be empty.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.50 14472

---

### Extension names must not contain "--".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.51 14473

---

### Extension names must not begin or end with "-".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.52 14474

---

### Extension names must not contain directory separator characters.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.53 14475

---

### Version names must not be empty.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.54 14476

---

---

**Version names must not contain "--".****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

---

**2.41.55 14477**

---

**Version names must not begin or end with "-".****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

---

**2.41.56 14478**

---

**Version names must not contain directory separator characters.****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

---

**2.41.57 14479**

---

**Must be superuser to create this extension.****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

---

**2.41.58 14480**

---

**Must be superuser to update this extension.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.59 14481

---

[@1@ is not in the extension's schema "@2@"](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.60 14482

---

[Consider using tablespaces instead.](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.61 14483

---

[Use the same encoding as in the template database, or use template0 as template.](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.62 14484

---

[Use the same collation as in the template database, or use template0 as template.](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.63 14485

---

**Use the same LC\_CTYPE as in the template database, or use template0 as template.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.64 14486

---

**There is a conflict because database "@1@" already has some tables in this tablespace.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.65 14487

---

**The chosen LC\_CTYPE setting requires encoding "@1@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.41.66 14488

---

**The chosen LC\_COLLATE setting requires encoding "@1@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.67 14489

---

**You must move them back to the database's default tablespace before using this command.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.68 14490

---

**There are @1@ other session(s) and @2@ prepared transaction(s) using the database.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.69 14493

---

**@1@ dead row versions cannot be removed yet. @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.70 14494

---

**The prefix "pg\_" is reserved for system schemas.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.71 14496

---

**The server process with PID @1@ is among those with the oldest transactions.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.72 14497

---

**The NOTIFY queue cannot be emptied until that process ends its current transaction.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.73 14498

---

**Use the COLLATE clause to set the collation explicitly.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.41.74 14499

---

**The supported languages are listed in the pg\_pltemplate system catalog.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42 Message Numbers Beginning with 14500

---

### 2.42.1 14500

---

**Anyone can COPY to stdout or from stdin. psql's \copy command also works for anyone.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.42.2 14501

---

**Try the COPY (SELECT ...) TO variant.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.42.3 14502

---

**COPY @1@, line @2@, column @3@**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.42.4 14503

---

**COPY @1@, line @2@**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.5 14504

---

**COPY @1@, line @2@, column @3@: "@4@"**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.6 14505

---

**COPY @1@, line @2@, column @3@: null input**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.7 14506

---

**COPY @1@, line @2@: "@3@"**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.8 14507

---

**Use "\r" to represent carriage return.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.9 14508

---

---

**Use quoted CSV field to represent carriage return.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.10 14509

---

**Use "\n" to represent newline.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.11 14510

---

**Use quoted CSV field to represent newline.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.12 14512

---

**@1@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.13 14513

---

**@1@ index row versions were removed. @2@ index pages have been deleted, @3@ are currently reusable. @4@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.14 14514

---

**Operator class "@1@" already is the default.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.15 14515

---

**Must be superuser to change owner of a foreign-data wrapper.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.16 14516

---

**The owner of a foreign-data wrapper must be a superuser.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.17 14517

---

**Must be superuser to create a foreign-data wrapper.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.18 14518

---

**Must be superuser to alter a foreign-data wrapper.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.19 14520

---

**Expected @1@ parameters but got @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.20 14521

---

**Close open transactions soon to avoid wraparound problems.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.21 14522

---

**You might have already suffered transaction-wraparound data loss.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.22 14523

---

**Must be superuser to create a tablespace.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.23 14524

---

**The prefix "pg\_" is reserved for system tablespaces.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.24 14525

---

**Create this directory for the tablespace before restarting the server.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.25 14526

---

**You can remove the directories manually if necessary.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.26 14528

---

**You can alter type @1@, which will alter the array type as well.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.27 14529

---

**Tables cannot have INSTEAD OF triggers.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.28 14530

---

**Views cannot have row-level BEFORE or AFTER triggers.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.29 14531

---

**Views cannot have TRUNCATE triggers.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.30 14532

---

---

### "@1@" versus "@2@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.31 14533

---

### To resolve the conflict, specify a default explicitly.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.32 14534

---

### Use ALTER TYPE instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.33 14535

---

### Use ALTER ... CASCADE to alter the typed tables too.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.34 14536

---

### Key columns "@1@" and "@2@" are of incompatible types: @3@ and @4@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.35 14537

---

[@1@ depends on @2@](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.36 14538

---

[Change the ownership of the index's table, instead.](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.37 14539

---

[Sequence "@1@" is linked to table "@2@".](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.38 14540

---

["@1@" is already a child of "@2@".](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.39 14541

---

**Only commutative operators can be used in exclusion constraints.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.40 14542

---

**The exclusion operator must be related to the index operator class for the constraint.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.41 14543

---

**You must specify an operator class for the index or define a default operator class for the data type.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.42 14544

---

**Creating a shell type definition.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.43 14545

---

**Use CREATE LANGUAGE to load the language into the database.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.44 14546

---

**Use DROP AGGREGATE to drop aggregate functions.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.45 14549

---

**Key @1@ is duplicated.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.46 14551

---

**Perhaps you need a different "datestyle" setting.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.47 14552

---

**The operating system could not find any locale data for the locale name "@1@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.48 14553

---

**The server's LC\_CTYPE locale is probably incompatible with the database encoding.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.49 14554

---

**Provide two argument types for operator.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.50 14555

---

**Missing left parenthesis.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.51 14556

---

### Too few columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.52 14557

---

### Unexpected end of input.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.53 14558

---

### Too many columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.54 14559

---

### Junk after right parenthesis.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.55 14560

---

---

**Intervals are not tied to specific calendar dates.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.56 14561

---

**"EEEE" may only be used together with digit and decimal point patterns.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.57 14562

---

**Do not mix Gregorian and ISO week date conventions in a formatting template.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.58 14563

---

**This value contradicts a previous setting for the same field type.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.59 14564

---

**Field requires @1@ characters, but only @2@ remain.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.60 14565

---

**If your source string is not fixed-width, try using the "FM" modifier.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.61 14566

---

**Field requires @1@ characters, but only @2@ could be parsed.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.62 14567

---

**Value must be an integer.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.63 14568

---

**Value must be in the range @1@ to @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.64 14569

---

**The given value did not match any of the allowed values for this field.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.65 14570

---

**Use the 24-hour clock, or give an hour between 1 and 12.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.66 14571

---

**Escape string must be empty or one character.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.67 14572

---

**Value has bits set to right of mask.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.68 14573

---

**Target must be "archiver" or "bgwriter".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.69 14574

---

**Identifier must be less than @1@ characters.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.70 14575

---

**This functionality requires the server to be built with libxml support.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.71 14576

---

**You need to rebuild PostgreSQL using --with-libxml.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.72 14577

---

**XML processing instruction target name cannot be "@1@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.73 14578

---

**XML processing instruction cannot contain "?>".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.74 14579

---

**libxml2 has incompatible char type: sizeof(char)=@1@, sizeof(xmlChar)=@2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.75 14580

---

**XML does not support infinite date values.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.76 14581

---

---

**XML does not support infinite timestamp values.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.42.77 14582**

---

**The array must be two-dimensional with length of the second axis equal to 2.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.42.78 14583**

---

**ACL key word must be "group" or "user".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.42.79 14584**

---

**A name must follow the "group" or "user" key word.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.42.80 14585**

---

**Use CASCADE to revoke them too.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.81 14586

---

### Dimension array must be one dimensional.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.82 14587

---

### Lower bound of dimension array must be one.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.83 14588

---

### Low bound array has different size than dimensions array.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.42.84 14589

---

### MATCH FULL does not allow mixing of null and nonnull key values.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.85 14590

---

**Remove this referential integrity trigger and its mates, then do ALTER TABLE ADD CONSTRAINT.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.86 14591

---

**This is most likely due to a rule having rewritten the query.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.87 14593

---

**Key (@1@)=(@2@) is not present in table "@3@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.88 14594

---

**Key (@1@)=(@2@) is still referenced from table "@3@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.89 14595

---

**A field with precision @1@, scale @2@ must round to an absolute value less than @3@@4@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.90 14596

---

**Arrays with element types @1@ and @2@ are not compatible for concatenation.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.91 14597

---

**Arrays of @1@ and @2@ dimensions are not compatible for concatenation.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.92 14598

---

**Arrays with differing element dimensions are not compatible for concatenation.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.42.93 14599

---

**Arrays with differing dimensions are not compatible for concatenation.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43 Message Numbers Beginning with 14600

---

### 2.43.1 14600

---

**Is another postgres (PID @1@) running in data directory "@2@"?**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.43.2 14601

---

**Is another postmaster (PID @1@) running in data directory "@2@"?**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.43.3 14602

---

**Is another postgres (PID @1@) using socket file "@2@"?**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

#### 2.43.4 14603

---

**Is another postmaster (PID @1@) using socket file "@2@"?**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

#### 2.43.5 14604

---

**If you're sure there are no old server processes still running, remove the shared memory block or just delete the file "@1@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

#### 2.43.6 14605

---

**The file seems accidentally left over, but it could not be removed. Please remove the file by hand and try again.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

#### 2.43.7 14606

---

**File "@1@" is missing.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.8 14607

---

**File "@1@" does not contain valid data.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.9 14608

---

**You might need to initdb.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.10 14609

---

**The data directory was initialized by PostgreSQL version @1@.@2@, which is not compatible with this version @3@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.11 14610

---

**Specify an absolute path.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.12 14611

---

**Set up WAL archiving when you configure "@1@" parameter.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.13 14612

---

**Database OID @1@ now seems to belong to "@2@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.14 14613

---

**User does not have CONNECT privilege.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.15 14614

---

**The database was initialized with LC\_COLLATE "@1@", which is not recognized by setlocale().**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.16 14615

---

**Recreate the database with another locale or install the missing locale.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.17 14616

---

**The database was initialized with LC\_CTYPE "@1@", which is not recognized by setlocale().**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.18 14617

---

**You should immediately run CREATE USER "@1@" SUPERUSER;.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.19 14618

---

**It seems to have just been dropped or renamed.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.20 14619

---

---

**The database subdirectory "@1@" is missing.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.43.21 14620**

---

**String of @1@ bytes is too long for encoding conversion.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.43.22 14621**

---

**Continuing anyway, but there's something wrong.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.43.23 14622**

---

**Failed while creating memory context "@1@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.43.24 14623**

---

**Failed on request of size @1@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.25 14624

---

**Extension libraries are required to use the PG\_MODULE\_MAGIC macro.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.26 14625

---

**Server is version @1@.@2@, library is version @3@.@4@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.27 14626

---

**Specify a relation name as well as a rule name.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.28 14627

---

**You need an unconditional ON INSERT DO INSTEAD rule with a RETURNING clause.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.43.29 14628

---

**You need an unconditional ON UPDATE DO INSTEAD rule with a RETURNING clause.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.43.30 14629

---

**You need an unconditional ON DELETE DO INSTEAD rule with a RETURNING clause.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.43.31 14630

---

**Use views or triggers instead.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.43.32 14631

---

**Use triggers instead.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.43.33 14632

---

**Use views instead.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.43.34 14633

---

**In particular, the table cannot be involved in any foreign key relationships.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.43.35 14634

---

**Failed system call was shmget(key=@1 @, size=@2 @, 0@3 @).**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.43.36 14638

---

**Failed system call was CreateFileMapping(size=@1 @, name=@2 @).**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.37 14639

---

### Check if there are any old server processes still running, and terminate them.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.38 14640

---

### Failed system call was DuplicateHandle.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.39 14641

---

### Failed system call was MapViewOfFileEx.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.40 14642

---

### Failed system call was semget(@1@, @2@, 0@3@).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.41 14643

---

---

This error does *\*not\** mean that you have run out of disk space. It occurs when either the system limit for the maximum number of semaphore sets (SEMMNI), or the system wide maximum number of semaphores (SEMMNS), would be exceeded. You need to raise the respective kernel parameter. Alternatively, reduce PostgreSQL's consumption of semaphores by reducing its max\_connections parameter. The PostgreSQL documentation contains more information about configuring your system for PostgreSQL.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.42 14644

---

You possibly need to raise your kernel's SEMVMX value to be at least @1@. Look into the PostgreSQL documentation for details.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.43 14645

---

Some of the datatypes only support hashing, while others only support sorting.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.44 14646

---

Window partitioning columns must be of sortable datatypes.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.45 14647

---

### Window ordering columns must be of sortable datatypes.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.46 14648

---

### SQL function "@1@" during startup

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.47 14649

---

### All column datatypes must be hashable.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.48 14650

---

### See server log for query details.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.49 14651

---

---

**Client IP address resolved to "@1@", forward lookup matches.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.50 14652

---

**Client IP address resolved to "@1@", forward lookup not checked.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.51 14653

---

**Client IP address resolved to "@1@", forward lookup does not match.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.52 14654

---

**LDAP over SSL is not supported on this platform.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.53 14655

---

**Is another postmaster already running on port @1@? If not, remove socket file "@2@" and retry.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.54 14656

---

**Is another postmaster already running on port @1@? If not, wait a few seconds and retry.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.55 14657

---

**Anyone can use the client-side lo\_import() provided by libpq.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.56 14658

---

**Anyone can use the client-side lo\_export() provided by libpq.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.57 14659

---

**Permissions should be u=rw (0600) or less.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.58 14660

---

**SSL library does not support certificate revocation lists.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.59 14662

---

**line @1 @ of configuration file "@2@"**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.60 14663

---

**Set ssl = on in postgresql.conf.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.61 14664

---

**Compile with --with-openssl to use SSL connections.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.62 14666

---

**Cannot enlarge string buffer containing @1@ bytes by @2@ more bytes.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.63 14667

---

**Please REINDEX it.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.64 14668

---

**Values larger than 1/3 of a buffer page cannot be indexed. Consider a function index of an MD5 hash of the value, or use full text indexing.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.65 14669

---

**Key @1@ already exists.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.66 14670

---

**This may be because of a non-immutable index expression.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.67 14671

---

**To fix this, do REINDEX INDEX "@1@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.68 14672

---

**This is caused by an incomplete page split at crash recovery before upgrading to PostgreSQL 9.1.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.69 14673

---

**The index is not optimal. To optimize it, contact a developer, or try to use the column as the second one in the CREATE INDEX command.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.70 14674

---

**Could not open file "@1@": @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.71 14675

---

**Could not seek in file "@1@" to offset @2@: @3@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.72 14676

---

**Could not read from file "@1@" at offset @2@: @3@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.73 14677

---

**Could not write to file "@1@" at offset @2@: @3@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.74 14678

---

### Could not fsync file "@1@": @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.75 14679

---

### Could not close file "@1@": @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.76 14680

---

### Set max\_prepared\_transactions to a nonzero value.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.77 14681

---

### Increase max\_prepared\_transactions (currently @1@).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.78 14682

---

---

**Must be superuser or the user that prepared the transaction.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.79 14683

---

**Connect to the database where the transaction was prepared to finish it.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.80 14685

---

**WAL file is from different database system: Incorrect XLOG\_SEG\_SIZE in page header**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.81 14686

---

**WAL file is from different database system: Incorrect XLOG\_BLCKSZ in page header**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.82 14687

---

**Expected a numeric timeline ID.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.83 14688

---

**Timeline IDs must be in increasing sequence.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.84 14689

---

**Timeline IDs must be less than child timeline's ID.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.85 14690

---

**The database cluster was initialized with PG\_CONTROL\_VERSION @1@ (0x@2@), but the server was compiled with PG\_CONTROL\_VERSION @3@ (0x@4@).**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.43.86 14691

---

**This could be a problem of mismatched byte ordering. It looks like you need to initdb.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.87 14692

---

**The database cluster was initialized with PG\_CONTROL\_VERSION @1@, but the server was compiled with PG\_CONTROL\_VERSION @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.88 14693

---

**It looks like you need to initdb.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.89 14694

---

**The database cluster was initialized with CATALOG\_VERSION\_NO @1@, but the server was compiled with CATALOG\_VERSION\_NO @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.90 14695

---

**The database cluster was initialized with MAXALIGN @1@, but the server was compiled with MAXALIGN @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.91 14696

---

**The database cluster appears to use a different floating-point number format than the server executable.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.92 14697

---

**The database cluster was initialized with BLCKSZ @1@, but the server was compiled with BLCKSZ @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.93 14698

---

**It looks like you need to recompile or initdb.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.43.94 14699

---

---

The database cluster was initialized with RELSEG\_SIZE @1@, but the server was compiled with RELSEG\_SIZE @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44 Message Numbers Beginning with 14700

---

### 2.44.1 14700

---

---

The database cluster was initialized with XLOG\_BLCKSZ @1@, but the server was compiled with XLOG\_BLCKSZ @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.44.2 14701

---

---

The database cluster was initialized with XLOG\_SEG\_SIZE @1@, but the server was compiled with XLOG\_SEG\_SIZE @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

### 2.44.3 14702

---

---

The database cluster was initialized with NAMEDATALEN @1@, but the server was compiled with NAMEDATALEN @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

#### 2.44.4 14703

---

**The database cluster was initialized with INDEX\_MAX\_KEYS @1@, but the server was compiled with INDEX\_MAX\_KEYS @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

#### 2.44.5 14704

---

**The database cluster was initialized with TOAST\_MAX\_CHUNK\_SIZE @1@, but the server was compiled with TOAST\_MAX\_CHUNK\_SIZE @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

#### 2.44.6 14705

---

**The database cluster was initialized without HAVE\_INT64\_TIMESTAMP but the server was compiled with HAVE\_INT64\_TIMESTAMP.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

#### 2.44.7 14706

---

**The database cluster was initialized with HAVE\_INT64\_TIMESTAMP but the server was compiled without HAVE\_INT64\_TIMESTAMP.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.8 14707

---

**The database cluster was initialized without USE\_FLOAT4\_BYVAL but the server was compiled with USE\_FLOAT4\_BYVAL.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.9 14708

---

**The database cluster was initialized with USE\_FLOAT4\_BYVAL but the server was compiled without USE\_FLOAT4\_BYVAL.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.10 14709

---

**The database cluster was initialized without USE\_FLOAT8\_BYVAL but the server was compiled with USE\_FLOAT8\_BYVAL.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.11 14710

---

**The database cluster was initialized with USE\_FLOAT8\_BYVAL but the server was compiled without USE\_FLOAT8\_BYVAL.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.12 14711

---

**The database server will regularly poll the `pg_xlog` subdirectory to check for files placed there.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.13 14712

---

**Execute `pg_xlog_replay_resume()` to continue.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.14 14713

---

**Recovery control functions can only be executed during recovery.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.15 14714

---

**This happens if you temporarily set `wal_level=minimal` without taking a new base backup.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.16 14715

---

**Either set wal\_level to "hot\_standby" on the master, or turn off hot\_standby here.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.17 14716

---

**This probably means that some data is corrupted and you will have to use the last backup for recovery.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.18 14717

---

**If this has occurred more than once some data might be corrupted and you might need to choose an earlier recovery target.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.19 14718

---

**If you are not restoring from a backup, try removing the file "@1@/backup\_label".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.20 14719

---

**Online backup started with `pg_start_backup()` must be ended with `pg_stop_backup()`, and all WAL up to that point must be available at recovery.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.21 14720

---

**WAL control functions cannot be executed during recovery.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.22 14721

---

**`wal_level` must be set to "archive", "hot\_standby", or "logical" at server start.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.23 14722

---

**Run `pg_stop_backup()` and try again.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.24 14723

---

**If you're sure there is no backup in progress, remove file "@1@" and try again.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.25 14724

---

**Check that your archive\_command is executing properly. pg\_stop\_backup can be canceled safely, but the database backup will not be usable without all the WAL segments.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.26 14725

---

**pg\_xlogfile\_name\_offset() cannot be executed during recovery.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.27 14726

---

**pg\_xlogfile\_name() cannot be executed during recovery.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.28 14727

---

**xlog redo @1@**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.29 14731

---

**To avoid a database shutdown, execute a database-wide VACUUM in that database. You might also need to commit or roll back old prepared transactions.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.30 14732

---

**Values larger than a buffer page cannot be indexed.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.31 14733

---

**Valid values are between "@1@" and "@2@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.32 14734

---

**Valid values are between "@1@" and "@2@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.33 14735

---

**Returned type @1@ does not match expected type @2@ in column @3@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.34 14736

---

**Number of returned columns (@1@) does not match expected column count (@2@).**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.35 14737

---

**Attribute "@1@" of type @2@ does not match corresponding attribute of type @3@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.36 14738

---

**Attribute "@1@" of type @2@ does not exist in type @3@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.37 14739

---

**To enable inserting into the view, provide an INSTEAD OF INSERT trigger or an unconditional ON INSERT DO INSTEAD rule.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.38 14740

---

**To enable updating the view, provide an INSTEAD OF UPDATE trigger or an unconditional ON UPDATE DO INSTEAD rule.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.39 14741

---

**To enable deleting from the view, provide an INSTEAD OF DELETE trigger or an unconditional ON DELETE DO INSTEAD rule.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.40 14742

---

**SQL function "@1@" statement @2@**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.41 14743

---

**SQL function "@1@"**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.42 14744

---

**SQL function "@1@" during inlining**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.43 14745

---

**Function's final statement must be SELECT or INSERT/UPDATE/DELETE RETURNING.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.44 14746

---

### Final statement must return exactly one column.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.45 14747

---

### Actual return type is @1@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.46 14748

---

### Final statement returns too many columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.47 14749

---

### Final statement returns @1@ instead of @2@ at column @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.48 14750

---

---

**Final statement returns too few columns.****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

---

**2.44.49 14751**

---

**Input has too many columns.****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

---

**2.44.50 14752**

---

**Table has type @1@ at ordinal position @2@, but query expects @3@.****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

---

**2.44.51 14753**

---

**Query provides a value for a dropped column at ordinal position @1@.****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

---

**2.44.52 14754**

---

**Input has too few columns.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.53 14755

---

### Check for missing "SPI\_finish" calls.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.54 14756

---

### SQL statement "@1@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.55 14757

---

### Table has type @1@, but query expects @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.56 14758

---

### Table row contains @1@ attribute, but query expects @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.57 14759

---

**Physical storage mismatch on dropped attribute at ordinal position @1@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.58 14760

---

**Returned row contains @1@ attribute, but query expects @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.59 14761

---

**Returned type @1@ at ordinal position @2@, but query expects @3@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.60 14762

---

**Array with element type @1@ cannot be included in ARRAY construct with element type @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.61 14763

---

**Key @1@ conflicts with key @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.62 14764

---

**Key @1@ conflicts with existing key @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.63 14765

---

**This has been seen to occur with buggy kernels; consider updating your system.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.64 14766

---

**Multiple failures --- write error might be permanent.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.65 14767

---

### writing block @1@ of relation @2@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.66 14768

---

### Only RowExclusiveLock or less can be acquired on database objects during recovery.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.67 14769

---

### You might need to increase max\_locks\_per\_transaction.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.68 14771

---

### You might need to run fewer transactions at a time or increase max\_connections.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.69 14772

---

---

**There might be an idle transaction or a forgotten prepared transaction causing this.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## **2.44.70 14773**

---

**"default\_transaction\_isolation" is set to "serializable".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## **2.44.71 14774**

---

**You can use "SET default\_transaction\_isolation = 'repeatable read'" to change the default.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## **2.44.72 14775**

---

**You might need to increase max\_pred\_locks\_per\_transaction.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## **2.44.73 14776**

---

**The transaction might succeed if retried.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.74 14778

---

### User transaction caused buffer deadlock with recovery.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.75 14779

---

### System allows @1 @, we need at least @2 @.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.76 14782

---

### Check free disk space.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.77 14783

---

### Consider increasing the configuration parameter "max\_wal\_size".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.78 14784

---

**Consult recent messages in the server log for details.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.79 14785

---

**This may indicate an incomplete PostgreSQL installation, or that the file "@1@" has been moved away from its proper location.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.80 14786

---

**The server must be started by the user that owns the data directory.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.81 14787

---

**Permissions should be u=rwx (0700).**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.82 14788

---

[See C include file "ntstatus.h" for a description of the hexadecimal value.](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.83 14789

---

[automatic vacuum of table "@1@.@2@.@3@"](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.84 14790

---

[automatic analyze of table "@1@.@2@.@3@"](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.85 14791

---

[Enable the "track\\_counts" option.](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.86 14792

---

**The failed archive command was: @1@**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.87 14793

---

**Some of the transaction logs were lost that are necessary to recover the database completely.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.88 14794

---

**Fix the problem by referring to the messages prior to this one. Then take a full backup of the database.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.44.89 14795

---

**line @1@ of configuration file "@2@": "@3@"**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.90 14796

---

**Words longer than @1@ characters are ignored.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.91 14797

---

**Use "?" to represent a stop word within a sample phrase.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.92 14798

---

**Declare it with SCROLL option to enable backward scan.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.44.93 14799

---

**prepare: @1@**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.45 Message Numbers Beginning with 14800

---

### 2.45.1 14800

---

**parameters:** @1@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.45.2 14801

---

**abort reason: recovery conflict**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.45.3 14802

---

**User was holding shared buffer pin for too long.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

### 2.45.4 14803

---

**User was holding a relation lock for too long.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.45.5 14804

---

### User was or might have been using tablespace that must be dropped.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.45.6 14805

---

### User query might have needed to see row versions that must be removed.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.45.7 14806

---

### User was connected to a database that must be dropped.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.45.8 14808

---

### In a moment you should be able to reconnect to the database and repeat your command.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.45.9 14809

---

---

**An invalid floating-point operation was signaled. This probably means an out-of-range result or an invalid operation, such as division by zero.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.45.10 14810

---

**Increase the configuration parameter "max\_stack\_depth" (currently @1@kB), after ensuring the platform's stack depth limit is adequate.**

[Description]

Supplementary information was output.

[System Processing]

None.

### @1@in PL/Tcl function "@2@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.45.69 14871

---

### could not translate host name "@1@" to address: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.70 14873

---

### out of memory

[Description]

There was insufficient free space in the client's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

## 2.45.71 14877

---

### host name must be specified

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.45.72 14881

---

### GSSAPI continuation error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.45.73 14882

---

### duplicate GSS authentication request

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.45.74 14883

---

### GSSAPI name import error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.45.75 14884

---

### SSPI continuation error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.45.76 14885

---

### could not acquire SSPI credentials

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.77 14886

---

### SCM\_CRED authentication method not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.78 14887

---

### Kerberos 4 authentication not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.79 14888

---

---

### **Kerberos 5 authentication not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.45.80 14889**

---

### **GSSAPI authentication not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.45.81 14890**

---

### **SSPI authentication not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.45.82 14891**

---

### **Crypt authentication not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.45.83 14892**

---

### **authentication method @1@ not supported**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.84 14893

---

### invalid sslmode value: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.85 14894

---

### sslmode value "@1@" invalid when SSL support is not compiled in

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.86 14895

---

### could not set socket to TCP no delay mode: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.87 14896

---

### could not connect to server: @1@ Is the server running locally and accepting connections on Unix domain socket "@2@"?

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.88 14897

---

**could not connect to server: @1@ Is the server running on host "@2@" (@3@) and accepting TCP/IP connections on port @4@?**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.89 14898

---

**could not connect to server: @1@ Is the server running on host "@2@" and accepting TCP/IP connections on port @3@?**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.45.90 14899

---

**setsockopt(TCP\_KEEPIIDLE) failed: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46 Message Numbers Beginning with 14900

---

### 2.46.1 14900

---

[setsockopt\(TCP\\_KEEPAIVE\) failed: @1@](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.46.2 14901

---

[setsockopt\(TCP\\_KEEPIVTL\) failed: @1@](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.46.3 14902

---

[setsockopt\(TCP\\_KEEPCNT\) failed: @1@](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.46.4 14903

---

[WSAIoctl\(SIO\\_KEEPAIVE\\_VALS\) failed: @1@i](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.5 14904

---

### invalid port number: "@1@"

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.6 14905

---

### could not find a suitable target server

#### [Description]

Could not find a suitable target server.

#### [System Processing]

Processing is aborted.

#### [Action]

Check following settings (host, IP address, port number, or targetServer):

- Connection string
- Connection service file
- Data source of JDBC or ODBC
- Environment variables for default connection parameter values(ex. PGHOST)
- Arguments of functions of libpq
- Options of command

## 2.46.7 14906

---

### could not translate Unix-domain socket path "@1@" to address: @2@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.8 14907

---

### invalid connection state, probably indicative of memory corruption

#### [Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.46.9 14908

---

**could not create socket: @1@**

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.46.10 14909

---

**could not set socket to nonblocking mode: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.11 14910

---

**could not set socket to close-on-exec mode: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.12 14911

---

**keepalives parameter must be an integer**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.13 14912

---

**setsockopt(SO\_KEEPALIVE) failed: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.14 14913

---

**could not get socket error status: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.15 14914

---

**could not get client address from socket: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.16 14915

---

**requirepeer parameter is not supported on this platform**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.17 14916

---

**could not get peer credentials: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.18 14917

---

**local user with ID @1@ does not exist**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.19 14918

---

**requirepeer specifies "@1@", but actual peer user name is "@2@"**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.20 14919

---

**could not send startup packet: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.21 14920

---

### server does not support auto connection switching

[Description]

The server does not support auto connection switching.

[System Processing]

Processing is aborted.

[Action]

Specify servers that support auto connection switching.

## 2.46.22 14921

---

### unexpected message from server during startup

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.46.23 14922

---

### could not send SSL negotiation packet: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.24 14923

---

### server does not support SSL, but SSL was required

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.25 14924

---

---

**received invalid response to SSL negotiation: @1@****[Description]**

An error occurred during communication between the application and the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

**2.46.26 14925**

---

**expected authentication request from server, but received @1@****[Description]**

An error occurred during communication between the application and the database server.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

**2.46.27 14926**

---

**out of memory allocating GSSAPI buffer (@1@)****[Description]**

There was insufficient free space in the client's memory during execution of the application.

**[System Processing]**

Processing will be aborted.

**[Action]**

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

---

**2.46.28 14927**

---

**invalid connection state @1@, probably indicative of memory corruption****[Description]**

An unexpected error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

Contact Fujitsu technical support.

---

**2.46.29 14928**

---

**PGEventProc "@1@" failed during PGEVT\_CONNRESET event**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.30 14929

---

### invalid LDAP URL "@1@": scheme must be ldap://

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.31 14930

---

### invalid LDAP URL "@1@": missing distinguished name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.32 14931

---

### invalid LDAP URL "@1@": must have exactly one attribute

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.33 14932

---

### invalid LDAP URL "@1@": must have search scope (base/one/sub)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.34 14933

---

### invalid LDAP URL "@1@": no filter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.35 14934

---

### invalid LDAP URL "@1@": invalid port number

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.36 14935

---

### could not create LDAP structure

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.46.37 14936

---

### lookup on LDAP server failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.38 14937

---

### more than one entry found on LDAP lookup

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.39 14938

---

### no entry found on LDAP lookup

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.40 14939

---

### attribute has no values on LDAP lookup

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.41 14940

---

### missing "=" after "@1@" in connection info string

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.46.42 14941

---

### invalid connection option "@1@"

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.46.43 14942

---

### unterminated quoted string in connection info string

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.46.44 14943

---

### could not get home directory to locate service definition file

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.45 14944

---

### definition of service "@1@" not found

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.46 14945

---

### service file "@1@" not found

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.46.47 14946

---

### line @1@ too long in service file "@2@"

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.46.48 14947

---

### syntax error in service file "@1@", line @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.46.49 14948

---

### connection pointer is NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.50 14951

---

### password retrieved from file "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.46.51 14952

---

### command string is a null pointer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.52 14953

---

### statement name is a null pointer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.53 14954

---

### function requires at least protocol version 3.0

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.54 14955

---

### no connection to the server

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.55 14956

---

### another command is already in progress

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.56 14957

---

### length must be given for binary parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.57 14958

---

### unexpected asyncStatus: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.46.58 14959

---

### **PGEvtProc "@1@" failed during PGEVT\_RESULTCREATE event**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.59 14960

---

### **COPY terminated by new PQexec**

[Description]

Processing was canceled.

[System Processing]

Processing will be aborted.

[Action]

Check the message text.

## 2.46.60 14961

---

### **COPY IN state must be terminated first**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.61 14962

---

### **COPY OUT state must be terminated first**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.62 14963

---

### PQexec not allowed during COPY BOTH

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.63 14964

---

### no COPY in progress

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.64 14965

---

### connection in wrong state

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.65 14966

---

### invalid ExecStatusType code

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.66 14967

---

**column number @1@ is out of range 0..@2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.67 14968

---

**row number @1@ is out of range 0..@2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.68 14969

---

**parameter number @1@ is out of range 0..@2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.69 14970

---

**could not interpret result from server: @1@**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.46.70 14971

---

---

### incomplete multibyte character

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

## 2.46.71 14972

---

### cannot determine OID of function lo\_truncate

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.72 14973

---

### cannot determine OID of function lo\_create

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.73 14974

---

### could not open file "@1@": @2@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.74 14975

---

### could not read from file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.75 14976

---

### could not write to file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.76 14977

---

### query to initialize large object functions did not return data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.77 14978

---

### cannot determine OID of function lo\_open

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.78 14979

---

### cannot determine OID of function lo\_close

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.79 14980

---

### cannot determine OID of function lo\_creat

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.80 14981

---

### cannot determine OID of function lo\_unlink

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.81 14982

---

### cannot determine OID of function lo\_lseek

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.46.82 14983

---

### cannot determine OID of function lo\_tell

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.83 14984

---

### cannot determine OID of function loread

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.84 14985

---

### cannot determine OID of function lowrite

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.85 14986

---

### integer of size @1@ not supported by pqGetInt

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.86 14987

---

### integer of size @1@ not supported by pqPutInt

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.87 14988

---

### connection not open

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.46.88 14989

---

### server closed the connection unexpectedly This probably means the server terminated abnormally before or while processing the request.

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.46.89 14990

---

### timeout expired

#### [Description]

Timeout occurred during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance\_work\_mem.

## 2.46.90 14991

---

### socket not open

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.46.91 14992

---

**select() failed: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.46.92 14993

---

**invalid setenv state @1@, probably indicative of memory corruption**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.46.93 14994

---

**invalid state @1@, probably indicative of memory corruption**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.46.94 14995

---

**message type 0x@1@ arrived from server while idle**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.46.95 14996

---

### unexpected character @1@ following empty query response ("I" message)

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.46.96 14997

---

### server sent data ("D" message) without prior row description ("T" message)

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.46.97 14998

---

### server sent binary data ("B" message) without prior row description ("T" message)

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.46.98 14999

---

### unexpected response from server; first received character was "@1@"

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.47 Message Numbers Beginning with 15000

---

### 2.47.1 15000

---

#### out of memory for query result

[Description]

There was insufficient free space in the client's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

### 2.47.2 15001

---

#### lost synchronization with server, resetting connection

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- If the COMMIT process is not executed after update, add the COMMIT process.
- If the total number of update records in a single transaction is high, split it into short transactions.
- If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

- Confirm that the database server has not stopped.
- If the database server is starting or stopping, re-execute the command after the database server starts.

### 2.47.3 15002

---

#### protocol error: id=0x@1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

### 2.47.4 15003

---

#### server sent data ("D" message) without prior row description ("T" message)

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

### 2.47.5 15004

---

#### message contents do not agree with length in message type "@1@"

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

### 2.47.6 15005

---

#### lost synchronization with server: got message type "@1@", length @2@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.47.7 15006

---

### unexpected field count in "D" message

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.47.8 15007

---

### PQgetline: not doing text COPY OUT

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.47.9 15008

---

### could not establish SSL connection: @1@

#### [Description]

The database server was disconnected during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.

    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.47.17 15016

---

### could not get server common name from server certificate

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.18 15017

---

### SSL certificate's common name contains embedded null

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.19 15018

---

### host name must be specified for a verified SSL connection

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.20 15019

---

### server common name "@1@" does not match host name "@2@"

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.21 15020

---

### could not create SSL context: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.22 15021

---

### could not open certificate file "@1@": @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.23 15022

---

### could not read certificate file "@1@": @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.24 15023

---

### could not load SSL engine "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.25 15024

---

### could not initialize SSL engine "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.26 15025

---

### could not read private SSL key "@1@" from engine "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.27 15026

---

### could not load private SSL key "@1@" from engine "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.28 15027

---

### certificate present, but not private key file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.29 15028

---

### private key file "@1@" has group or world access; permissions should be u=rw (0600) or less

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.30 15029

---

### could not load private key file "@1@": @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.31 15030

---

### certificate does not match private key file "@1@": @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.32 15031

---

### could not read root certificate file "@1@": @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.33 15032

---

### SSL library does not support CRL certificates (file "@1@")

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.47.34 15033

---

### could not get home directory to locate root certificate fileEither provide the file or change sslmode to disable server certificate verification.

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.35 15034

---

### root certificate file "@1@" does not existEither provide the file or change sslmode to disable server certificate verification.

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

## 2.47.36 15035

---

### certificate could not be obtained: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.37 15036

---

### no SSL error reported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.38 15037

---

### SSL error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.39 15038

---

### @1@: vacuuming database "@2@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.47.40 15042

---

### skipped creating .ready file for multiplexed transaction log file "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.47.41 15043

---

### skipped recycling multiplexed transaction log file "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.47.42 15044

---

### skipped removing multiplexed transaction log file "@1@"

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.47.43 15045

---

### no data found on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.44 15046

---

### out of memory on line @1@

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.47.45 15047

---

### unsupported type "@1@" on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.46 15048

---

### too many arguments on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.47 15049

---

### too few arguments on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.48 15050

---

### invalid input syntax for type int: "@1@", on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.49 15051

---

### invalid input syntax for type unsigned int: "@1@", on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.50 15052

---

### invalid input syntax for floating-point type: "@1@", on line @2@

[Description]

An error occurred.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.88 15091

---

### only superuser can define a leakproof function

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.47.89 15092

---

### cast will be ignored because the source data type is a domain

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.47.90 15093

---

### cast will be ignored because the target data type is a domain

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.47.91 15094

---

### btree sort support procedures must accept type "internal"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.47.92 15095

---

### btree sort support procedures must return void

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.47.93 15096

---

### Use DROP TABLE to remove a table.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.47.94 15097

---

**Use DROP SEQUENCE to remove a sequence.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.47.95 15098

---

**Use DROP VIEW to remove a view.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.47.96 15099

---

**Use DROP INDEX to remove an index.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48 Message Numbers Beginning with 15100

---

---

### 2.48.1 15100

---

**Use DROP TYPE to remove a type.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.2 15101

---

**Use DROP FOREIGN TABLE to remove a foreign table.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.3 15102

---

**DROP INDEX CONCURRENTLY does not support dropping multiple objects**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.4 15103

---

**DROP INDEX CONCURRENTLY does not support CASCADE**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.5 15104

---

**cannot inherit from temporary relation of another session**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.6 15105

---

### **constraints on temporary tables must involve temporary tables of this session**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.7 15106

---

### **constraint must be validated on child tables too**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.8 15107

---

### **cannot inherit to temporary relation of another session**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.9 15108

---

### **constraint "@1@" conflicts with non-inherited constraint on child table "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.10 15109

---

### Found referenced table's UPDATE trigger.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.11 15110

---

### Found referenced table's DELETE trigger.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.12 15111

---

### Found referencing table's trigger.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.13 15112

---

### @1@ constraints cannot be marked NO INHERIT

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.14 15113

---

---

**type attribute "subtype" is required****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.48.15 15114**

---

**range collation specified but subtype does not support collation****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.48.16 15115**

---

**range canonical function @1@ must be immutable****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.48.17 15116**

---

**range subtype diff function @1@ must return type double precision****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.48.18 15117**

---

**range subtype diff function @1@ must be immutable**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.19 15118

---

### **constraint "@1@" of domain "@2@" does not exist, skipping**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.20 15119

---

### **"@1@": suspending truncate due to conflicting lock request**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.21 15120

---

### **cannot set transaction read-write mode inside a read-only transaction**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.22 15121

---

### **transaction read-write mode must be set before any query**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.23 15122

---

**cannot set transaction read-write mode during recovery**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.24 15123

---

**SET TRANSACTION ISOLATION LEVEL must be called before any query**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.25 15124

---

**SET TRANSACTION ISOLATION LEVEL must not be called in a subtransaction**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.26 15125

---

**SET TRANSACTION [NOT] DEFERRABLE cannot be called within a subtransaction**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.27 15126

---

### SET TRANSACTION [NOT] DEFERRABLE must be called before any query

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.28 15127

---

### cannot delete from view "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.29 15128

---

### GLOBAL is deprecated in temporary table creation

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.30 15129

---

### duplicate trigger events specified

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.48.31 15130

---

### unrecognized configuration parameter "@1@" in file "@2@" line @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.32 15131

---

### configuration file "@1@" contains errors

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.33 15132

---

### configuration file "@1@" contains errors; unaffected changes were applied

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.34 15133

---

### configuration file "@1@" contains errors; no changes were applied

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.35 15134

---

### too many syntax errors found, abandoning file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.36 15135

---

### accepting GSS security context failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.37 15136

---

### retrieving GSS user name failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.38 15137

---

### could not acquire SSPI credentials

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.39 15138

---

### could not accept SSPI security context

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.40 15139

---

### could not get token from SSPI security context

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.41 15140

---

### multiple values in ident field

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.48.42 15141

---

### multiple values specified for connection type

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.48.43 15142

---

---

### multiple values specified for host address

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.48.44 15143

---

### multiple values specified for netmask

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.48.45 15144

---

### multiple values specified for authentication type

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.48.46 15145

---

### ident, peer, gssapi, sspi, and cert

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.48.47 15146

---

### gssapi and sspi

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.48.48 15147

---

### configuration file "@1@" contains no entries

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.49 15148

---

### Unix-domain socket path "@1@" is too long (maximum @2@ bytes)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.50 15149

---

### @1@: WSASStartup failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.51 15150

---

### @1@: real and effective user IDs must match

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.52 15151

---

**could not look up effective user ID @1@: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.53 15153

---

**too many range table entries**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.54 15154

---

**SELECT ... INTO is not allowed here**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.55 15155

---

**arguments declared "anyrange" are not all alike**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.56 15156

---

### argument declared "anyrange" is not consistent with argument declared "anyelement"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.57 15157

---

### could not load dbghelp.dll, cannot write crash dump

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.58 15158

---

### could not load required functions in dbghelp.dll, cannot write crash dump

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.59 15159

---

### could not open crash dump file "@1@" for writing: error code @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.60 15160

---

**could not write crash dump to file "@1@": error code @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.61 15161

---

**could not open process token: error code @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.62 15162

---

**could not get SID for Administrators group: error code @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.63 15163

---

**could not get SID for PowerUsers group: error code @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.64 15164

---

---

**could not create signal listener pipe: error code @1@; retrying****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.48.65 15165**

---

**could not create signal dispatch thread: error code @1@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.48.66 15166**

---

**@1@: superuser\_reserved\_connections must be less than max\_connections****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.48.67 15167**

---

**@1@: max\_wal\_senders must be less than max\_connections****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.48.68 15168**

---

**@1@: invalid datetoken tables, please fix**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.69 15169

---

**@1@: could not change permissions of external PID file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.70 15170

---

**@1@: could not write external PID file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.71 15171

---

**could not fork new process for connection:**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.72 15172

---

**could not read exit code for process**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.73 15173

---

### could not post child completion status

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.74 15174

---

### could not write to log file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.75 15175

---

### invalid streaming start location

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.76 15176

---

### unterminated quoted string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.77 15177

---

### unexpected WAL file size "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.78 15178

---

### unterminated bit string literal

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.79 15179

---

### unterminated hexadecimal string literal

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.80 15180

---

### invalid Unicode surrogate pair

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.81 15181

---

### unterminated dollar-quoted string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.82 15182

---

### zero-length delimited identifier

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.83 15183

---

### unterminated quoted identifier

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.84 15184

---

### Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.85 15185

---

### invalid Unicode escape value

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.86 15186

---

### invalid Unicode escape character

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.87 15187

---

### temporary file size exceeds temp\_file\_limit (@1@kB)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.88 15188

---

### a snapshot-importing transaction must not be READ ONLY DEFERRABLE

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.89 15189

---

---

### could not import the requested snapshot

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.90 15190

---

### connection to client lost

[Description]

[System Processing]

[Action]

15191

invalid command-line argument for server process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.91 15194

---

### range constructor flags argument must not be null

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.48.92 15195

---

### result of range difference would not be contiguous

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.93 15196

---

### result of range union would not be contiguous

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.94 15197

---

### range lower bound must be less than or equal to range upper bound

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.95 15198

---

### invalid range bound flags

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.48.96 15199

---

### could not set up XML error handler

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49 Message Numbers Beginning with 15200

---

### 2.49.1 15200

---

#### keystore\_location is not supported by this build

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.49.2 15201

---

#### keystore location is not configured

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.49.3 15202

---

#### could not encrypt or decrypt data because the keystore is not open

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.49.4 15203

---

#### keystore is already open

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.5 15204

---

### passphrase is too short or too long

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.6 15205

---

### passphrase-based key derivation failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.7 15206

---

### a new master encryption key has been set

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.8 15207

---

### passphrase of the keystore has been changed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.9 15208

---

---

### encryption or decryption of data in tablespace @1@ failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.49.10 15209

---

### encryption or decryption of data failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.49.11 15210

---

### could not open keystore "@1@": necessary master encryption key does not exist in the keystore

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.49.12 15211

---

### decryption of the auto-open keystore "@1@" failed: error code = @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.49.13 15212

---

### encryption of the auto-open keystore "@1@" failed: error code = @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.14 15213

---

**keystore "@1@" is corrupted: size = @2@ bytes, expected size = @3@ bytes**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.15 15214

---

**could not open keystore "@1@" : passphrase is wrong, or the auto-open keystore was created by another computer or user**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.16 15215

---

**keystore "@1@" is corrupted: invalid CRC**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.17 15216

---

**encryption or decryption of the keystore "@1@" failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.18 15217

---

**character with byte sequence @1@ in encoding "@2@" has no equivalent in encoding "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.19 15218

---

**Enables the planner's use of sequential-scan plans.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.20 15219

---

**Enables the planner's use of index-scan plans.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.21 15220

---

**Enables the planner's use of index-only-scan plans.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.22 15221

---

**Enables the planner's use of bitmap-scan plans.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.23 15222

---

**Enables the planner's use of TID scan plans.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.24 15223

---

**Enables the planner's use of explicit sort steps.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.25 15224

---

**Enables the planner's use of hashed aggregation plans.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.26 15225

---

**Enables the planner's use of materialization.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.27 15226

---

**Enables the planner's use of nested-loop join plans.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.28 15227

---

**Enables the planner's use of merge join plans.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.29 15228

---

**Enables the planner's use of hash join plans.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.30 15229

---

**Enables genetic query optimization.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.31 15230

---

**Shows whether the current user is a superuser.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.32 15231

---

**Enables advertising the server via Bonjour.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.33 15232

---

**Enables SSL connections.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.34 15233

---

---

**Forces synchronization of updates to disk.****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.49.35 15235**

---

**Writes full pages to WAL when first modified after a checkpoint.****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.49.36 15236**

---

**Logs each checkpoint.****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.49.37 15237**

---

**Logs each successful connection.****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.49.38 15238**

---

**Logs end of a session, including duration.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.49.39 15239

---

### Shows whether the running server has assertion checks enabled.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.49.40 15240

---

### Terminate session on any error.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.49.41 15241

---

### Restarts all server processes on WAL multiplexing errors.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.49.42 15242

---

### Enables fast WAL multiplexing.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.43 15243

---

**Enables encryption of temporary files used in large queries.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.44 15244

---

**Reinitialize server after backend crash.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.45 15245

---

**Logs the duration of each completed SQL statement.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.46 15246

---

**Logs each query's parse tree.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.47 15247

---

**Logs each query's rewritten parse tree.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.48 15248

---

**Logs each query's execution plan.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.49 15249

---

**Indents parse and plan tree displays.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.50 15250

---

**Writes parser performance statistics to the server log.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.51 15251

---

### Writes planner performance statistics to the server log.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.52 15252

---

### Writes executor performance statistics to the server log.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.53 15253

---

### Writes cumulative performance statistics to the server log.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.54 15255

---

### Collects information about executing commands.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.55 15256

---

---

**Collects statistics on database activity.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

**2.49.56 15257**

---

**Collects timing statistics for database I/O activity.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

**2.49.57 15258**

---

**Updates the process title to show the active SQL command.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

**2.49.58 15259**

---

**Starts the autovacuum subprocess.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

**2.49.59 15260**

---

**Generates debugging output for LISTEN and NOTIFY.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.60 15261

---

### Logs long lock waits.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.61 15262

---

### Logs the host name in the connection logs.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.62 15263

---

### Causes subtables to be included by default in various commands.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.63 15264

---

### Encrypt passwords.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.49.64 15265

---

**Treats "expr=NULL" as "expr IS NULL".**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.49.65 15266

---

**Enables per-database user names.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.49.66 15268

---

**Sets the default read-only status of new transactions.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.49.67 15269

---

**Sets the current transaction's read-only status.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## **2.49.68 15270**

---

**Sets the default deferrable status of new transactions.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## **2.49.69 15271**

---

**Whether to defer a read-only serializable transaction until it can be executed with no possible serialization failures.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## **2.49.70 15272**

---

**Check function bodies during CREATE FUNCTION.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## **2.49.71 15273**

---

**Enable input of NULL elements in arrays.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.49.72 15274

---

**Create new tables with OIDs by default.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.49.73 15275

---

**Start a subprocess to capture stderr output and/or csvlogs into log files.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.49.74 15276

---

**Truncate existing log files of same name during log rotation.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.49.75 15277

---

**Emit information about resource usage in sorting.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.76 15278

---

### Generate debugging output for synchronized scanning.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.77 15279

---

### Enable bounded sorting using heap sort.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.78 15280

---

### Emit WAL-related debugging output.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.79 15281

---

### Datetimes are integer based.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.80 15282

---

---

### Sets whether Kerberos and GSSAPI user names should be treated as case-insensitive.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.49.81 15283

---

### Warn about backslash escapes in ordinary string literals.

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.49.82 15284

---

### Causes '...' strings to treat backslashes literally.

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.49.83 15285

---

### Enable synchronized sequential scans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.49.84 15286

---

---

**Allows archiving of WAL files using archive\_command.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.49.85 15287**

---

**Allows connections and queries during recovery.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.49.86 15288**

---

**Allows feedback from a hot standby to the primary that will avoid query conflicts.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.49.87 15289**

---

**Allows modifications of the structure of system tables.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.49.88 15290**

---

**Disables reading from system indexes.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.89 15291

---

**Enables backward compatibility mode for privilege checks on large objects.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.90 15292

---

**When generating SQL fragments, quote all identifiers.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.91 15293

---

**Forces a switch to the next xlog file if a new file has not been started within N seconds.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.49.92 15294

---

**Waits N seconds on connection startup after authentication.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.93 15295

---

**Sets the default statistics target.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.94 15296

---

**Sets the FROM-list size beyond which subqueries are not collapsed.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.95 15297

---

**Sets the FROM-list size beyond which JOIN constructs are not flattened.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.96 15298

---

**Sets the threshold of FROM items beyond which GEQO is used.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.49.97 15299

---

**GEQO: effort is used to set the default for other GEQO parameters.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50 Message Numbers Beginning with15300

---

### 2.50.1 15300

---

**GEQO: number of individuals in the population.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

### 2.50.2 15301

---

**GEQO: number of iterations of the algorithm.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

### 2.50.3 15302

---

**Sets the time to wait on a lock before checking for deadlock.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.4 15303

---

**Sets the maximum delay before canceling queries when a hot standby server is processing archived WAL data.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.5 15304

---

**Sets the maximum delay before canceling queries when a hot standby server is processing streamed WAL data.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.6 15305

---

**Sets the maximum interval between WAL receiver status reports to the primary.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.7 15306

---

**Sets the maximum number of concurrent connections.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.8 15307

---

**Sets the number of connection slots reserved for superusers.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.9 15308

---

**Sets the number of shared memory buffers used by the server.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.10 15309

---

**Sets the maximum number of temporary buffers used by each session.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.11 15310

---

**Sets the TCP port the server listens on.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.12 15311

---

**Sets the access permissions of the Unix-domain socket.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.13 15312

---

**Sets the file permissions for log files.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.14 15313

---

**Sets the maximum memory to be used for query workspaces.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.15 15314

---

**Sets the maximum memory to be used for maintenance operations.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.16 15315

---

---

**Sets the maximum stack depth, in kilobytes.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.17 15316**

---

**Limits the total size of all temporary files used by each session.**

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

---

## **2.50.18 15317**

---

**Vacuum cost for a page found in the buffer cache.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.19 15318**

---

**Vacuum cost for a page not found in the buffer cache.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.20 15319**

---

**Vacuum cost for a page dirtied by vacuum.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.21 15320

---

### Vacuum cost amount available before napping.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.22 15321

---

### Vacuum cost delay in milliseconds.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.23 15322

---

### Vacuum cost delay in milliseconds, for autovacuum.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.24 15323

---

### Vacuum cost amount available before napping, for autovacuum.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.25 15324

---

**Sets the maximum number of simultaneously open files for each server process.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.26 15325

---

**Sets the maximum number of simultaneously prepared transactions.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.27 15326

---

**Sets the maximum allowed duration of any statement.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.28 15327

---

**Minimum age at which VACUUM should freeze a table row.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.29 15328

---

**Age at which VACUUM should scan whole table to freeze tuples.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.30 15329

---

**Number of transactions by which VACUUM and HOT cleanup should be deferred, if any.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.31 15330

---

**Sets the maximum number of locks per transaction.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.32 15331

---

**Sets the maximum number of predicate locks per transaction.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.33 15332

---

**Sets the maximum allowed time to complete client authentication.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.34 15333

---

**Waits N seconds on connection startup before authentication.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.35 15334

---

**Sets the number of WAL files held for standby servers.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.36 15336

---

**Sets the maximum time between automatic WAL checkpoints.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.37 15337

---

---

**Enables warnings if checkpoint segments are filled more frequently than this.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.38 15338**

---

**Sets the number of disk-page buffers in shared memory for WAL.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.39 15339**

---

**WAL writer sleep time between WAL flushes.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.40 15340**

---

**Sets the maximum number of simultaneously running WAL sender processes.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.41 15341**

---

**Sets the maximum time to wait for WAL replication.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.42 15342

---

**Sets the delay in microseconds between transaction commit and flushing WAL to disk.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.43 15343

---

**Sets the minimum concurrent open transactions before performing commit\_delay.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.44 15344

---

**Sets the number of digits displayed for floating-point values.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.45 15345

---

**Sets the minimum execution time above which statements will be logged.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.46 15346

---

**Sets the minimum execution time above which autovacuum actions will be logged.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.47 15347

---

**Background writer sleep time between rounds.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.48 15348

---

**Background writer maximum number of LRU pages to flush per round.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.49 15349

---

**Number of simultaneous requests that can be handled efficiently by the disk subsystem.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.50 15350

---

**Automatic log file rotation will occur after N minutes.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.51 15351

---

**Automatic log file rotation will occur after N kilobytes.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.52 15352

---

**Shows the maximum number of function arguments.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.53 15353

---

**Shows the maximum number of index keys.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.54 15354

---

**Shows the maximum identifier length.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.55 15355

---

**Shows the size of a disk block.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.56 15356

---

**Shows the number of pages per disk file.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.57 15357

---

**Shows the block size in the write ahead log.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.58 15358

---

---

**Shows the number of pages per write ahead log segment.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.59 15359**

---

**Time to sleep between autovacuum runs.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.60 15360**

---

**Minimum number of tuple updates or deletes prior to vacuum.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.61 15361**

---

**Minimum number of tuple inserts, updates, or deletes prior to analyze.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.50.62 15362**

---

**Age at which to autovacuum a table to prevent transaction ID wraparound.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.63 15363

---

**Sets the maximum number of simultaneously running autovacuum worker processes.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.64 15364

---

**Time between issuing TCP keepalives.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.65 15365

---

**Time between TCP keepalive retransmits.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.66 15366

---

**SSL renegotiation is no longer supported; this can only be 0.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.67 15367

---

**Maximum number of TCP keepalive retransmits.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.68 15368

---

**Sets the maximum allowed result for exact search by GIN.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.69 15369

---

**Sets the planner's assumption about the size of the disk cache.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.70 15370

---

**Shows the server version as an integer.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.71 15371

---

**Log the use of temporary files larger than this number of kilobytes.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.72 15372

---

**Sets the size reserved for `pg_stat_activity.query`, in bytes.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.73 15373

---

**Sets the planner's estimate of the cost of a sequentially fetched disk page.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.74 15374

---

**Sets the planner's estimate of the cost of a nonsequentially fetched disk page.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.75 15375

---

**Sets the planner's estimate of the cost of processing each tuple (row).**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.76 15376

---

**Sets the planner's estimate of the cost of processing each index entry during an index scan.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.77 15377

---

**Sets the planner's estimate of the cost of processing each operator or function call.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.78 15378

---

**Sets the planner's estimate of the fraction of a cursor's rows that will be retrieved.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.79 15379

---

---

**GEQO: selective pressure within the population.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.80 15380

---

**GEQO: seed for random path selection.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.81 15381

---

**Multiple of the average buffer usage to free per round.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.82 15382

---

**Sets the seed for random-number generation.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.50.83 15383

---

**Number of tuple updates or deletes prior to vacuum as a fraction of reltuples.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.84 15384

---

**Number of tuple inserts, updates, or deletes prior to analyze as a fraction of reltuples.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.85 15385

---

**Time spent flushing dirty buffers during checkpoint, as fraction of checkpoint interval.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.86 15386

---

**Sets the shell command that will be called to archive a WAL file.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.87 15387

---

**Sets the client's character set encoding.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.88 15388

---

**Controls information prefixed to each log line.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.89 15389

---

**Sets the time zone to use in log messages.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.90 15390

---

**Sets the display format for date and time values.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.91 15391

---

**Sets the default tablespace to create tables and indexes in.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.92 15392

---

**Sets the tablespace(s) to use for temporary tables and sort files.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.93 15393

---

**Sets the path for dynamically loadable modules.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.94 15394

---

**Sets the location of the Kerberos server key file.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.95 15396

---

**Sets the Bonjour service name.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.96 15397

---

**Shows the collation order locale.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.97 15398

---

**Shows the character classification and case conversion locale.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.50.98 15399

---

**Sets the language in which messages are displayed.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51 Message Numbers Beginning with 15400

---

### 2.51.1 15400

---

**Sets the locale for formatting monetary amounts.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.2 15401

---

**Sets the locale for formatting numbers.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.3 15402

---

**Sets the locale for formatting date and time values.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.4 15403

---

**Lists shared libraries to preload into server.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.5 15404

---

**Lists shared libraries to preload into each backend.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.6 15405

---

---

**Sets the schema search order for names that are not schema-qualified.****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.51.7 15406**

---

**Sets the server (database) character set encoding.****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.51.8 15407**

---

**Shows the server version.****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.51.9 15408**

---

**Sets the current role.****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.51.10 15409**

---

**Sets the session user name.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.11 15410

---

### Sets the destination for server log output.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.12 15411

---

### Sets the destination directory for log files.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.13 15412

---

### Sets the file name pattern for log files.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.14 15413

---

### Sets the program name used to identify PostgreSQL messages in syslog.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.15 15414

---

**Sets the application name used to identify PostgreSQL messages in the event log.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.16 15415

---

**Sets the time zone for displaying and interpreting time stamps.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.17 15416

---

**Selects a file of time zone abbreviations.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.18 15417

---

**Sets the current transaction's isolation level.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.19 15418

---

**Sets the owning group of the Unix-domain socket.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.20 15419

---

**Sets the directories where Unix-domain sockets will be created.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.21 15420

---

**Sets the host name or IP address(es) to listen to.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.22 15421

---

**Sets the server's data directory.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.23 15422

---

### Sets the server's backup directory.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.24 15423

---

### Sets the directory where multiplexed transaction log files are stored.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.25 15424

---

### Sets the directory where server's core files are dumped.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.26 15425

---

### Sets the location where the keystore is stored

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.27 15426

---

---

**Sets the server's main configuration file.****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.51.28 15427**

---

**Sets the server's "hba" configuration file.****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.51.29 15428**

---

**Sets the server's "ident" configuration file.****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.51.30 15429**

---

**Writes the postmaster PID to the specified file.****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.51.31 15430**

---

**Location of the SSL server certificate file.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.32 15431

---

### Location of the SSL server private key file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.33 15432

---

### Location of the SSL certificate authority file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.34 15433

---

### Location of the SSL certificate revocation list file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.35 15434

---

### Writes temporary statistics files to the specified directory.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.36 15435

---

**List of names of potential synchronous standbys.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.37 15436

---

**Sets default text search configuration.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.38 15437

---

**Sets the list of allowed SSL ciphers.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.39 15438

---

**Sets the application name to be reported in statistics and logs.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.40 15439

---

**Sets whether "\" is allowed in string literals.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.41 15440

---

**Sets the output format for bytea.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.42 15441

---

**Sets the message levels that are sent to the client.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.43 15442

---

**Enables the planner to use constraints to optimize queries.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.44 15443

---

**Sets the transaction isolation level of each new transaction.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.45 15444

---

**Sets the display format for interval values.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.46 15445

---

**Sets the verbosity of logged messages.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.47 15446

---

**Sets the message levels that are logged.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.48 15447

---

---

**Causes all statements generating error at or above this level to be logged.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.51.49 15448**

---

**Sets the type of statements logged.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.51.50 15449**

---

**Sets the syslog "facility" to be used when syslog enabled.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.51.51 15450**

---

**Sets the session's behavior for triggers and rewrite rules.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## **2.51.52 15451**

---

**Sets the current transaction's synchronization level.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.53 15452

---

**Enables logging of recovery-related debugging information.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.54 15453

---

**Collects function-level statistics on database activity.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.55 15454

---

**Set the level of information written to the WAL.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.56 15455

---

**Selects the method used for forcing WAL updates to disk.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.57 15456

---

**Sets how binary values are to be encoded in XML.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.58 15457

---

**Sets whether XML data in implicit parsing and serialization operations is to be considered as documents or content fragments.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.59 15458

---

**Sets what to dump in core files.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.60 15459

---

**Selects the algorithm for encrypting tablespaces.**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.51.61 15460

---

**@1@ cannot access the server configuration file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.62 15461

---

**SET LOCAL TRANSACTION SNAPSHOT is not implemented**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.63 15464

---

**Bonjour is not supported by this build**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.64 15465

---

**SSL is not supported by this build**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.65 15466

---

### internal error: unrecognized run-time parameter type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.66 15467

---

### time zone abbreviation "@1@" is too long (maximum @2@ characters) in time zone file "@3@", line @4@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.67 15468

---

### invalid number for time zone offset in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.68 15469

---

### time zone offset @1@ is out of range in time zone file "@2@", line @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.69 15470

---

### missing time zone abbreviation in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.70 15471

---

### missing time zone offset in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.71 15473

---

### invalid syntax in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.72 15474

---

### time zone abbreviation "@1@" is multiply defined

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.73 15475

---

**invalid time zone file name "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.74 15476

---

**time zone file recursion limit exceeded in file "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.75 15477

---

**line is too long in time zone file "@1@", line @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.76 15478

---

**@INCLUDE without file name in time zone file "@1@", line @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.77 15479

---

---

### cannot export a snapshot from a subtransaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.51.78 15480

---

### invalid snapshot data in file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.51.79 15481

---

### SET TRANSACTION SNAPSHOT must be called before any query

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.51.80 15482

---

### a snapshot-importing transaction must have isolation level **SERIALIZABLE** or **REPEATABLE READ**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.51.81 15483

---

### invalid snapshot identifier: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.82 15484

---

### **a serializable transaction cannot import a snapshot from a non-serializable transaction**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.83 15485

---

### **a non-read-only serializable transaction cannot import a snapshot from a read-only transaction**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.84 15486

---

### **cannot import a snapshot from a different database**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.85 15487

---

### **out of memory**

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.51.86 15488

---

@1@: could not open file "@2@" for reading: @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.87 15489

---

@1@: could not open file "@2@" for writing: @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.88 15490

---

@1@: could not write file "@2@" : @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.89 15491

---

@1@: could not execute command "@2@" : @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.90 15492

---

### @1@: removing data directory "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.91 15493

---

### @1@: failed to remove data directory

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.92 15494

---

### @1@: removing contents of data directory "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.51.93 15495

---

### @1@: failed to remove contents of data directory

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.51.94 15496

---

**@1@: removing transaction log directory "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.51.95 15497

---

**@1@: failed to remove transaction log directory**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.51.96 15498

---

**@1@: removing contents of transaction log directory "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.51.97 15499

---

**@1@: failed to remove contents of transaction log directory**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52 Message Numbers Beginning with 15500

---

### 2.52.1 15500

---

**@1@: data directory "@2@" not removed at user's request**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.52.2 15501

---

**@1@: transaction log directory "@2@" not removed at user's request**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.52.3 15503

---

**user name lookup failure: error code @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.52.4 15504

---

**@1@: "@2@" is not a valid server encoding name**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.5 15505

---

**@1 @: could not create directory "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.6 15506

---

**@1 @: file "@2@" does not exist**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.7 15507

---

**@1 @: could not access file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.8 15508

---

**@1 @: file "@2@" is not a regular file**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.9 15509

---

### **Passwords didn't match.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.10 15510

---

### **@1@: could not read password from file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.11 15511

---

### **@1@: locale name too long, skipped: "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.12 15512

---

### **@1@: locale name has non-ASCII characters, skipped: "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.13 15513

---

---

**No usable system locales were found.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.14 15514

---

**not supported on this platform**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.15 15515

---

**could not write to child process: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.16 15516

---

**ok**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.52.17 15517

---

**@1@: failed to restore old locale "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.18 15518

---

**@1@: invalid locale name "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.19 15519

---

**@1@: encoding mismatch**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.20 15525

---

**@1@ initializes a PostgreSQL database cluster.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.21 15527

---

**@1@: invalid authentication method "@2@" for "@3@" connections**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.22 15528

---

**@1@: must specify a password for the superuser to enable @2@ authentication**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.23 15529

---

**@1@: too many command-line arguments (first is "@2@")**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.24 15530

---

**@1@: password prompt and password file cannot be specified together**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.25 15533

---

**The program "postgres" is needed by @1@ but was not found in the same directory as "@2@". Check your installation.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.26 15534

---

**The program "postgres" was found by "@1@"but was not the same version as "@2@".Check your installation.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.27 15535

---

**@1@: input file location must be an absolute path**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.28 15536

---

**@1@: could not find suitable encoding for locale "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.29 15537

---

**@1@: locale "@2@" requires unsupported encoding "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.30 15538

---

**@1@: could not find suitable text search configuration for locale "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.31 15539

---

**@1@: warning: suitable text search configuration for locale "@2@" is unknown**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.52.32 15540

---

**@1@: warning: specified text search configuration "@2@" might not match locale "@3@"**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.52.33 15541

---

**The default text search configuration will be set to "@1@".**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.52.34 15542

---

**@1@: directory "@2@" exists but is not empty**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.35 15543

---

**@1@: could not access directory "@2@" : @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.36 15544

---

**@1@: transaction log directory location must be an absolute path**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.37 15545

---

**@1@: could not create symbolic link "@2@" : @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.38 15546

---

**@1@: symlinks are not supported on this platform**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.39 15547

---

**@1@: could not read from ready pipe: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.40 15548

---

**@1@: could not parse transaction log location "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.41 15549

---

**@1@: could not create pipe for background process: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.42 15550

---

**@1@: could not create background process: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.43 15551

---

**@1@: could not create background thread: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.44 15552

---

**@1@: could not create directory "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.45 15553

---

**@1@: directory "@2@" exists but is not empty**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.46 15554

---

---

**@1@: could not access directory "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.47 15555

---

**@1@s/@2@ kB (100@3@), @4@/@5@ tablespace @6@s**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.52.48 15556

---

**@1@s/@2@ kB (@3@@4@), @5@/@6@ tablespace (@7@%-\*.\*s)**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.52.49 15560

---

**@1@s/@2@ kB (@3@@4@), @5@/@6@ tablespace**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.52.50 15561

---

**@1@: could not set compression level @2@: @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.51 15562

---

**@1@: could not create compressed file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.52 15563

---

**@1@: could not create file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.53 15564

---

**@1@: could not get COPY data stream: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.54 15565

---

**@1@: could not write to compressed file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.55 15566

---

**@1@: could not write to file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.56 15567

---

**@1@: could not close compressed file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.57 15568

---

**@1@: could not close file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.58 15569

---

**@1@: could not read COPY data: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.59 15570

---

**@1@: invalid tar block header size: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.60 15573

---

**@1@: could not set permissions on directory "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.61 15574

---

**@1@: could not create symbolic link from "@2@" to "@3@": @4@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.62 15575

---

**@1@: unrecognized link indicator "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.63 15576

---

**@1@: could not set permissions on file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.64 15577

---

**@1@: COPY stream ended before last file was finished**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.65 15578

---

**@1@: could not send replication command "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.66 15579

---

**@1@: could not identify system: got @2@ rows and @3@ fields, expected @4@ rows and @5@ or more fields**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.67 15580

---

**@1@: could not initiate base backup: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.68 15581

---

**@1@: no data returned from server**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.69 15582

---

**@1@: could not get backup header: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.70 15584

---

**@1@: can only write single tablespace to stdout, database has @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.71 15585

---

---

**@1@: starting background WAL receiver****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.52.72 15586**

---

**@1@: could not get transaction log end position from server: @2@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.52.73 15587**

---

**@1@: no transaction log end position returned from server****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.52.74 15588**

---

**@1@: final receive failed: @2@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.52.75 15589**

---

**@1@: could not send command to background pipe: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.76 15590

---

**@1@: could not wait for child process: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.77 15591

---

**@1@: child @2@ died, expected @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.78 15592

---

**@1@: child process did not exit normally**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.79 15593

---

**@1@: child process exited with error @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.80 15594

---

**@1@: could not wait for child thread: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.81 15595

---

**@1@: could not get child thread exit status: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.82 15596

---

**@1@: child thread exited with error @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.52.83 15597

---

**@1@: invalid output format "@2@", must be "plain" or "tar"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.84 15598

---

### @1@: cannot specify both --xlog and --xlog-method

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.52.85 15599

---

### @1@: invalid compression level "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53 Message Numbers Beginning with 15600

---

### 2.53.1 15600

---

#### @1@: invalid checkpoint argument "@2@", must be "fast" or "spread"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.53.2 15601

---

#### @1@: invalid status interval "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.53.3 15602

---

**@1 @: too many command-line arguments (first is "@2@")**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.53.4 15603

---

**@1 @: no target directory specified**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.53.5 15604

---

**@1 @: only tar mode backups can be compressed**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.53.6 15605

---

**@1 @: WAL streaming can only be used in plain mode**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.7 15606

---

**@1@: this build does not support compression**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.8 15607

---

**@1@: finished segment at @2@/@3@ (timeline @4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.9 15608

---

**@1@: received interrupt signal, exiting**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.10 15609

---

**@1@: could not open directory "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.11 15611

---

---

**@1@: could not stat file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.12 15612

---

**@1@: segment file "@2@" has incorrect size @3@, skipping**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.13 15613

---

**@1@: starting log streaming at @2@/@3@ (timeline @4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.14 15614

---

**@1@: invalid port number "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.15 15615

---

**@1@: disconnected**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.16 15616

---

**@1@: disconnected; waiting @2@ seconds to try again**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.17 15617

---

**@1@: could not open transaction log file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.18 15618

---

**@1@: could not stat transaction log file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.19 15619

---

**@1@: transaction log file "@2@" has @3@ bytes, should be 0 or @4@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.20 15620

---

**@1@: could not pad transaction log file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.21 15621

---

**@1@: could not seek to beginning of transaction log file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.22 15622

---

**@1@: could not determine seek position in file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.23 15623

---

**@1@: could not fsync file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.24 15624

---

**@1@: could not rename file "@2@" : @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.25 15625

---

**@1@: not renaming "@2@@3@", segment is not complete**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.26 15626

---

**@1@: system identifier does not match between base backup and streaming connection**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.27 15628

---

**@1@: could not send feedback packet: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.28 15629

---

**@1@: select() failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.29 15630

---

**@1@: could not receive data from WAL stream: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.30 15632

---

**@1@: unrecognized streaming header: "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.31 15633

---

**@1@: streaming header too small: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.32 15634

---

---

**@1@: received transaction log record for offset @2@ with no file open****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.53.33 15635**

---

**@1@: got WAL data offset @2@, expected @3@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.53.34 15636**

---

**@1@: could not write @2@ bytes to WAL file "@3@": @4@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.53.35 15637**

---

**@1@: unexpected termination of replication stream: @2@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.53.36 15638**

---

**@1@: replication stream was terminated before stop point**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.37 15640

---

**@1@: could not connect to server**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.38 15642

---

**@1@: could not determine server setting for integer\_datetimes**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.39 15643

---

**@1@: integer\_datetimes compile flag does not match server**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.40 15644

---

**not recorded**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.41 15645

---

**@1@: could not find own program executable**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.42 15646

---

**@1@: invalid argument: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.43 15647

---

**@1@: no data directory specified**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.44 15648

---

**@1@: could not open file "@2@" for reading: @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.45 15649

---

**@1@: could not read file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.46 15652

---

**child process exited with unrecognized status @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.47 15653

---

**@1@: could not open PID file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.48 15654

---

**@1@: invalid data in PID file "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.49 15655

---

**@1@: -w option is not supported when starting a pre-9.1 server**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.50 15656

---

**@1@: -w option cannot use a relative socket directory specification**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.51 15658

---

**@1@: cannot set core file size limit; disallowed by hard limit**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.52 15659

---

**@1@: could not read file "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.53 15660

---

---

**@1@: option file "@2@" must have exactly one line**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### 2.53.54 15661

---

**The program "@1@" is needed by @2@ but was not found in the same directory as "@3@". Check your installation.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### 2.53.55 15662

---

**The program "@1@" was found by "@2@" but was not the same version as @3@. Check your installation.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### 2.53.56 15663

---

**@1@: database system initialization failed**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### 2.53.57 15664

---

**@1@: another server might be running; trying to start server anyway**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.58 15666

---

**@1@: could not start serverExamine the log output.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.59 15667

---

**@1@: could not wait for server because of misconfiguration**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.60 15668

---

**@1@: PID file "@2@" does not exist**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.61 15669

---

**Is server running?**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.62 15670

---

**@1@: cannot stop server; single-user server is running (PID: @2@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.63 15671

---

**@1@: could not send stop signal (PID: @2@): @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.64 15673

---

**@1@: server does not shut down**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.65 15674

---

**@1@: cannot restart server; single-user server is running (PID: @2@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.66 15675

---

**@1@: old server process (PID: @2@) seems to be gone**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.67 15676

---

**@1@: cannot reload server; single-user server is running (PID: @2@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.68 15677

---

**@1@: could not send reload signal (PID: @2@): @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.69 15678

---

**@1@: cannot promote server; single-user server is running (PID: @2@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.70 15679

---

**@1@: cannot promote server; server is not in standby mode**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.71 15680

---

**@1@: could not create promote signal file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.72 15681

---

**@1@: could not write promote signal file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.73 15682

---

**@1@: could not send promote signal (PID: @2@): @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.74 15683

---

**@1@: could not send signal @2@ (PID: @3@): @4@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.75 15684

---

**@1@: could not find own program executable**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.76 15685

---

**@1@: could not find postgres program executable**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.77 15686

---

**@1@: could not open service manager**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.53.78 15687

---

---

### **@1@: service "@2@" already registered**

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.53.79 15688**

---

### **@1@: could not register service "@2@": error code @3@**

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.53.80 15689**

---

### **@1@: service "@2@" not registered**

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.53.81 15690**

---

### **@1@: could not open service "@2@": error code @3@**

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.53.82 15691**

---

### **@1@: could not unregister service "@2@": error code @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.83 15692

---

### Timed out waiting for server startup

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.84 15693

---

### @1@: could not start service "@2@": error code @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.85 15695

---

### @1@: could not open process token: error code @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.86 15696

---

### @1@: could not allocate SIDs: error code @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.87 15697

---

**@1@: could not create restricted token: error code @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.53.88 15699

---

**@1@: unrecognized shutdown mode "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54 Message Numbers Beginning with 15700

---

---

### 2.54.1 15700

---

**@1@: unrecognized signal name "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### 2.54.2 15701

---

**@1@: unrecognized start type "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.54.3 15702

---

**@1@: could not determine the data directory using command "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.54.4 15703

---

**@1@: -S option not supported on this platform**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.54.5 15704

---

**@1@: too many command-line arguments (first is "@2@")**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.54.6 15705

---

**@1@: missing arguments for kill mode**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.7 15706

---

### @1@: unrecognized operation mode "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.8 15707

---

### @1@: no operation specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.9 15708

---

### child process exited with unrecognized status @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.10 15709

---

### failed sanity check, parent OID @1@ of table "@2@" (OID @3@) not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.11 15710

---

### could not parse numeric array "@1@": too many numbers

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.12 15711

---

### could not parse numeric array "@1@": invalid character in number

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.13 15712

---

### invalid compression code: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.14 15713

---

### not built with zlib support

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.15 15714

---

---

**could not initialize compression library: @1@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.54.16 15715**

---

**could not close compression stream: @1@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.54.17 15716**

---

**could not compress data: @1@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.54.18 15718**

---

**could not uncompress data: @1@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.54.19 15719**

---

**could not close compression library: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.20 15720

---

### cannot duplicate null pointer (internal error)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.21 15721

---

### @1@: unrecognized section name: "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.22 15722

---

### out of on\_exit\_nicely slots

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.23 15723

---

### could not close output file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.24 15725

---

**unexpected section code @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.25 15726

---

**parallel restore is not supported with this archive file format**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.26 15727

---

**parallel restore is not supported with archives made by pre-8.0 pg\_dump**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.27 15728

---

**cannot restore from compressed archive (compression not supported in this installation)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.28 15729

---

### connecting to database for restore

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.54.29 15730

---

### direct database connections are not supported in pre-1.3 archives

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.30 15731

---

### warning from original dump file: @1@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.54.31 15732

---

### internal error -- WriteData cannot be called outside the context of a DataDumper routine

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.32 15733

---

### large-object output not supported in chosen format

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.33 15734

---

### restored @1 @ large object

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.34 15736

---

### could not create large object @1@: @2@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.54.35 15737

---

### could not open large object @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.36 15738

---

### could not open TOC file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.37 15740

---

### could not find entry for ID @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.38 15741

---

### could not close TOC file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.39 15742

---

### could not open output file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.40 15743

---

---

**could not open output file: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.41 15744

---

**wrote @1@ byte of large object data (result = @2@)**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

---

## 2.54.42 15746

---

**could not write to large object (result: @1@, expected: @2@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.43 15748

---

**Error while INITIALIZING:**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.44 15749

---

**Error while PROCESSING TOC:**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.45 15750

---

### Error while FINALIZING:

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.46 15751

---

### Error from TOC entry @1@; @2@ @3@ @4@ @5@ @6@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.47 15752

---

### bad dumpld

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.48 15753

---

### bad table dumpld for TABLE DATA item

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.49 15754

---

**unexpected data offset flag @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.50 15755

---

**file offset in dump file is too large**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.51 15757

---

**directory name too long: "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.52 15758

---

**directory "@1@" does not appear to be a valid archive ("toc.dat" does not exist)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.53 15759

---

**could not open input file "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.54 15760

---

**could not open input file: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.55 15761

---

**could not read input file: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.56 15762

---

**input file is too short (read @1@, expected 5)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.57 15763

---

**input file appears to be a text format dump. Please use psql.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.58 15764

---

**input file does not appear to be a valid archive (too short?)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.59 15765

---

**input file does not appear to be a valid archive**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.60 15766

---

**could not close input file: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.61 15767

---

---

### unrecognized file format "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.62 15768

---

### entry ID @1@ out of range -- perhaps a corrupt TOC

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.63 15769

---

### read TOC entry @1@ (ID @2@) for @3@ @4@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.64 15770

---

### unrecognized encoding "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.54.65 15771

---

### invalid ENCODING item: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.66 15772

---

### invalid STDSTRINGS item: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.67 15773

---

### could not set session user to "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.68 15774

---

### could not set default\_with\_oids: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.69 15775

---

### could not set search\_path to "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.70 15776

---

### could not set default\_tablespace to @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.71 15779

---

### did not find magic string in file header

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.72 15780

---

### unsupported version (@1@.@2@) in file header

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.73 15781

---

### sanity check on integer size (@1@) failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.74 15783

---

**expected format (@1 @) differs from format found in file (@2 @)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.75 15786

---

**a worker process died unexpectedly**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.76 15787

---

**processing missed item @1 @ @2 @ @3 @**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.77 15789

---

**could not create worker process: @1 @**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.78 15791

---

### no item ready

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.79 15792

---

### could not find slot of finished worker

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.80 15793

---

### worker process failed: exit code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.81 15794

---

### transferring dependency @1@ -> @2@ to @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.54.82 15795

---

---

**table "@1@" could not be created, will not restore its data**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.54.83 15796**

---

**invalid OID for large object**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.54.84 15797**

---

**unrecognized data block type (@1@) while searching archive**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.54.85 15798**

---

**error during file seek: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.54.86 15799**

---

**could not find block ID @1@ in archive -- possibly due to out-of-order restore request, which cannot be handled due to lack of data offsets in archive**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55 Message Numbers Beginning with 15800

---

### 2.55.1 15800

---

**could not find block ID @1@ in archive -- possibly due to out-of-order restore request, which cannot be handled due to non-seekable input file**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.55.2 15801

---

**could not find block ID @1@ in archive -- possibly corrupt archive**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.55.3 15802

---

**found unexpected block ID (@1@) when reading data -- expected @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.55.4 15803

---

---

### unrecognized data block type @1@ while restoring archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.5 15804

---

### could not read from input file: end of file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.6 15805

---

### could not read from input file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.7 15807

---

### could not close archive file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.8 15808

---

### can only reopen input archives

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.9 15809

---

### parallel restore from standard input is not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.10 15810

---

### parallel restore from non-seekable file is not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.11 15811

---

### could not determine seek position in archive file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.12 15812

---

### could not set seek position in archive file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.13 15814

---

### @1@: could not parse server version "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.14 15815

---

### could not get server\_version from libpq

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.15 15816

---

### aborting because of server version mismatch

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.16 15817

---

### failed to reconnect to database

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.17 15818

---

**could not reconnect to database: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.18 15819

---

**connection needs password**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.19 15820

---

**already connected to a database**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.20 15821

---

**failed to connect to database**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.21 15822

---

**connection to database "@1@" failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.22 15823

---

**query failed: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.23 15824

---

**query was: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.24 15825

---

**@1@: @2@ Command was: @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.25 15826

---

---

### could not execute query

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.26 15827

---

### error returned by PQputCopyData: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.27 15828

---

### error returned by PQputCopyEnd: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.28 15829

---

### COPY failed for table "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.29 15830

---

### could not start database transaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.30 15831

---

### could not commit database transaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.31 15832

---

### no output directory specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.32 15833

---

### could not create directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.33 15834

---

### could not close data file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.34 15835

---

**could not open large object TOC file "@1@" for input: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.35 15836

---

**invalid line in large object TOC file "@1@": "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.36 15837

---

**error reading large object TOC file "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.37 15838

---

**could not close large object TOC file "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.38 15840

---

**could not write to blobs TOC file**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.39 15841

---

**file name too long: "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.40 15842

---

**this format cannot be read**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.41 15843

---

**could not open TOC file "@1@" for output: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.42 15844

---

### could not open TOC file for output: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.43 15845

---

### compression is not supported by tar archive format

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.44 15846

---

### could not open TOC file "@1@" for input: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.45 15847

---

### could not open TOC file for input: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.46 15848

---

---

### could not find file "@1@" in archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.47 15849

---

### could not generate temporary file name: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.48 15850

---

### could not open temporary file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.49 15851

---

### could not close tar member

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.50 15852

---

### internal error -- neither th nor fh specified in tarReadRaw()

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.51 15856

---

### invalid OID for large object (@1@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.52 15858

---

### could not close temporary file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.53 15859

---

### actual file length (@1@) does not match expected (@2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.54 15861

---

### could not find header for file "@1@" in tar archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.55 15862

---

**skipping tar member @1@**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.55.56 15863

---

**restoring data out of order is not supported in this archive format: "@1@" is required, but comes before "@2@" in the archive file.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.57 15864

---

**incomplete tar header found (@1@ byte)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.58 15866

---

**TOC Entry @1@ at @2@ (length @3@, checksum @4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.59 15867

---

**corrupt tar header found in @1@ (expected @2@, computed @3@) file position @4@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.60 15868

---

**@1@: too many command-line arguments (first is "@2@")**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.61 15869

---

**could not open output file "@1@" for writing**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.62 15870

---

**No matching schemas were found**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.63 15871

---

### No matching tables were found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.64 15872

---

### invalid client encoding "@1@" specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.65 15873

---

### invalid output format "@1@" specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.66 15874

---

### server version must be at least 7.3 to use schema selection switches

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.67 15875

---

### dumping contents of table "@1@.@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.68 15876

---

### Dumping the contents of table "@1@" failed: PQgetCopyData() failed.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.69 15877

---

### Dumping the contents of table "@1@" failed: PQgetResult() failed.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.70 15878

---

### error reading large object @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.71 15879

---

---

### could not find parent extension for @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.72 15881

---

### schema with OID @1@ does not exist

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.73 15889

---

### failed sanity check, parent table OID @1@ of pg\_rewrite entry OID @2@ not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.74 15890

---

### query produced null referenced table name for foreign key trigger "@1@" on table "@2@" (OID of table: @3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.55.75 15891

---

### invalid column numbering in table "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.76 15892

---

### invalid adnum value @1@ for table "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.77 15893

---

### expected @1@ check constraint on table "@2@" but found @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.55.78 15895

---

### (The system catalogs might be corrupted.)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56 Message Numbers Beginning with 15900

---

### 2.56.1 15902

---

#### unrecognized provolatile value for function "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.2 15907

---

### could not parse default ACL list (@1@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.3 15908

---

### could not parse ACL list (@1@) for object "@2@" (@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.4 15909

---

### query to obtain definition of view "@1@" returned no data

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.5 15910

---

### query to obtain definition of view "@1@" returned more than one definition

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.6 15911

---

**definition of view "@1@" appears to be empty (length zero)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.7 15912

---

**invalid column number @1@ for table "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.8 15913

---

**missing index for constraint "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.9 15914

---

**unrecognized constraint type: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.10 15915

---

**query to get data of sequence "@1@" returned @2@ row (expected 1)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.11 15917

---

**query to get data of sequence "@1@" returned name "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.12 15918

---

**unexpected tctype value: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.13 15919

---

**invalid argument string (@1@) for trigger "@2@" on table "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.14 15920

---

### query to get rule "@1@" for table "@2@" failed: wrong number of rows returned

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.15 15921

---

### query returned @1@ row instead of one: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.16 15923

---

### invalid dumpId @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.17 15924

---

### invalid dependency @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.18 15925

---

---

### could not identify dependency loop

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### 2.56.19 15927

---

**The program "pg\_dump" is needed by @1@ but was not found in the same directory as "@2@". Check your installation.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### 2.56.20 15928

---

**The program "pg\_dump" was found by "@1@" but was not the same version as @2@. Check your installation.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### 2.56.21 15929

---

**@1@: could not connect to database "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### 2.56.22 15930

---

---

**@1@: could not connect to databases "postgres" or "template1"Please specify an alternative database.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.23 15931

---

**@1@: could not open the output file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.24 15932

---

**@1@: could not parse ACL list (@2@) for tablespace "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.25 15933

---

**@1@: could not parse ACL list (@2@) for database "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.26 15934

---

**@1@: pg\_dump failed on database "@2@", exiting**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.27 15935

---

**@1@: could not re-open the output file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.28 15936

---

**@1@: running "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.29 15937

---

**@1@: could not connect to database "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.30 15938

---

**@1@: could not get server version**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.31 15941

---

**@1@: executing @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.32 15942

---

**@1@: query failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.33 15943

---

**@1@: query was: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.34 15944

---

**unrecognized archive format "@1@"; please specify "c", "d", or "t"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.35 15946

---

**@1 @: invalid argument for option @2 @**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.36 15947

---

**@1 @: transaction ID epoch (-e) must not be -1**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.37 15949

---

**@1 @: transaction ID (-x) must not be 0**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.38 15951

---

**@1 @: OID (-o) must not be 0**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.39 15953

---

### @1@: multitransaction ID (-m) must not be 0

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.40 15955

---

### @1@: multitransaction offset (-O) must not be -1

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.41 15957

---

### @1@: no data directory specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.42 15958

---

### @1@: cannot be executed by "root"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.43 15959

---

---

**@1@: could not change directory to "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.56.44 15960**

---

**@1@: could not open file "@2@" for reading: @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.56.45 15961**

---

**If these values seem acceptable, use -f to force reset.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.56.46 15962**

---

**Transaction log reset**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.56.47 15963**

---

**@1@: could not read file "@2@" : @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.48 15964

---

**@1@: pg\_control exists but has invalid CRC; proceed with caution**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.49 15965

---

**@1@: pg\_control exists but is broken or unknown version; ignoring it**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.50 15966

---

**@1@: internal error -- sizeof(ControlFileData) is too large ... fix PG\_CONTROL\_SIZE**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.51 15967

---

**@1@: could not create pg\_control file: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.52 15968

---

**@1@: could not write pg\_control file: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.53 15969

---

**@1@: fsync error: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.54 15970

---

**@1@: could not open directory "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.55 15971

---

**@1@: could not read directory "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.56 15972

---

**@1@: could not delete file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.57 15973

---

**@1@: could not open file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.58 15974

---

**@1@: could not write file "@2@": @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.59 15975

---

**could not create directory "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.60 15976

---

**could not open directory "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.61 15977

---

**could not stat file "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.62 15978

---

**could not read symbolic link "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.63 15979

---

**could not create symbolic link "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.64 15980

---

---

## out of memory

### [Description]

There was insufficient free space in the server's memory during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

---

## 2.56.65 15981

---

### could not open file "@1@": @2@

### [Description]

An error occurred.

### [System Processing]

Processing will be aborted.

### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.66 15982

---

### could not create file "@1@": @2@

### [Description]

An error occurred.

### [System Processing]

Processing will be aborted.

### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.67 15983

---

### could not read file "@1@": @2@

### [Description]

An error occurred.

### [System Processing]

Processing will be aborted.

### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.68 15984

---

**could not write to file "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.69 15985

---

**could not fsync file "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.70 15986

---

**could not close file "@1@": @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.71 15987

---

**@1@: could not find own program executable**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.72 15988

---

---

**@1@: invalid checkpoint argument "@2@", must be "fast" or "spread"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.73 15989

---

**@1@: invalid argument @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.74 15990

---

**@1@: option @2@ conflicts with option @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.75 15991

---

**@1@: the configured database storage directory differs from the data\_directory parameter**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.56.76 15992

---

**@1@: an invalid value was specified for the option -@2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.77 15993

---

**@1@: backup data "@2@" is lost**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.78 15994

---

**@1@: cannot be run as root**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.79 15995

---

**@1@: invalid option --@2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.80 15996

---

**@1@: invalid option -@2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.81 15997

---

**@1@: backup of the database has not yet been performed, or an incorrect backup storage directory was specified**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.82 15998

---

**@1@: the database storage directory and the \$PGDATA environment variable have not been specified**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.56.83 15999

---

**@1@: option @2@ is necessary for option @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57 Message Numbers Beginning with 16000

---

### 2.57.1 16000

---

**@1@: the requested recovery point is earlier than the date and time that the backup finished**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.2 16001

---

**@1@: the specified backup does not exist**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.3 16002

---

**@1@: the directory "@2@" for the tablespace with OID "@3@" does not exist**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.4 16003

---

**@1@: the specified backup storage directory "@2@" is not correct**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.5 16004

---

**@1@: the specified database storage directory is not correct**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.6 16005

---

**@1@: the token in the file "pg\_hba.conf" is too long and will be skipped: "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.7 16006

---

**the directory "@1@" for storing WAL does not exist**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.8 16007

---

**@1@: "@2@" is being executed by another user**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.9 16008

---

**@1@: the "@2@" parameter was not found**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.10 16009

---

**@1@: could not find the configuration file "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.11 16010

---

**@1@: could not open the configuration file "@2@" : maximum nesting depth exceeded**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.12 16011

---

**@1@: the PID file "@2@" does not exist**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.13 16012

---

**@1@: the server is running**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.14 16013

---

### @1@: the server is not running

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.15 16014

---

### @1@: caught signal @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.16 16015

---

### @1@: failed to build the absolute path "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.17 16016

---

### @1@: failed to check the completion of archiving WAL files

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.18 16017

---

---

**@1@: failed to connect to the database****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.57.19 16018**

---

**@1@: failed to get the database OID : @2@ (@3@)****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.57.20 16019**

---

**@1@: failed to remove old backup data****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.57.21 16020**

---

**@1@: failed to restore the database storage directory "@2@"****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.57.22 16021**

---

**@1@: failed to restore the tablespace directory "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.23 16022

---

**@1@: retried backup @2@ times, but failed**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.24 16023

---

**@1@: SQL command failed (@2@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.25 16024

---

**@1@: the database with OID @2@ was created during backup**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.26 16025

---

**@1@: backup control function "@2@" failed**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.27 16026

---

**@1@: command failed: "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.28 16027

---

**@1@: could not close the file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.29 16028

---

**@1@: could not close the PID file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.30 16029

---

**@1@: could not create the directory "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.31 16030

---

**@1@: could not create the file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.32 16031

---

**@1@: could not create the PID file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.33 16032

---

**@1@: could not create the symbolic link "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.34 16033

---

**@1@: could not identify the current directory: @2@ (errno=@3@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.35 16034

---

**@1@: could not open the directory "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.36 16035

---

**@1@: could not open the file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.37 16036

---

**@1@: could not open the PID file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.38 16037

---

**@1@: could not read the file "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.39 16038

---

---

**@1@: could not read the PID file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.57.40 16039**

---

**@1@: could not read the symbolic link "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.57.41 16040**

---

**@1@: could not remove the file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.57.42 16041**

---

**@1@: could not remove the PID file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.57.43 16042**

---

**@1@: could not rename the directory "@2@" to "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.44 16043

---

**@1@: could not rename the file "@2@" to "@3@": @4@ (errno=@5@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.45 16044

---

**@1@: could not write the file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.46 16045

---

**@1@: could not write the PID file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.47 16046

---

**@1@: failed to find the internal file "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.48 16047

---

**@1@: failed to parse the internal file "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.49 16048

---

**@1@: failed to parse the internal file: "@2@" (@3@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.50 16049

---

**@1@: failed to parse the configuration file "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.51 16050

---

**@1@: failed to remove archived transaction log files**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.52 16051

---

### @1 @: failed to replace the contents of the pg\_xlog directory

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.53 16052

---

### @1 @: failed to restore the configuration files

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.54 16053

---

### @1 @: invalid data in the PID file "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.55 16054

---

### @1 @: out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.57.56 16055

---

### @1@: cannot find the server process (PID: @2@)

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.57 16056

---

### @1@: an error occurred during recovery

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.58 16057

---

### @1@: could not remove the directory "@2@": @3@ (errno=@4@)

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.59 16058

---

### @1@: target "@2@" mismatch (internal error)

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.60 16059

---

**the program "@1@" is needed by @2@ but was not found in the same directory as "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.61 16060

---

**the program "@1@" was found in "@2@" but was not the same version as @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.62 16061

---

**@1@: failed to get port number (internal error)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.63 16062

---

**backup of configuration files completed successfully**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.57.64 16063

---

---

**backup of database and configuration files completed successfully****[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.57.65 16064**

---

**Confirm that the specified directory is correct. If it is correct, the backup data may be corrupted. Copy the backup data to the backup storage directory from backup media.**

**[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.57.66 16065**

---

**Check the installation.**

**[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.57.67 16066**

---

**Continue the backup.**

**[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

---

**2.57.68 16067**

---

---

**Create an empty directory "@1@" on which the database administrator has full permissions, and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.57.69 16068**

---

**Create an empty directory "@1@" on which the database administrator has full permissions.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.57.70 16069**

---

**Recover the corrupt resource.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.57.71 16070**

---

**Is the server running?**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.57.72 16071**

---

**Please check whether the backup data exists or is not in the backup storage directory.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.73 16072

---

**Please decrease the length of the path and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.74 16073

---

**Please decrease the number of digits and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.75 16074

---

**Please log in as the user that owns the server process.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.76 16075

---

**Please remove the cause of the error, and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.77 16076

---

**Please set the database storage directory "@1@" to -D option, and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.78 16077

---

**Please set the recovery point to be after the date and time that the backup finished, and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.79 16078

---

**Please set the backup storage directory to the 'backup\_destination' parameter and restart the server.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.57.80 16079

---

**Please specify the database storage directory as "@1@" and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.81 16080

---

**Please specify the database storage directory correctly and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.82 16081

---

**Please specify the port number correctly and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.83 16082

---

**Please specify an integer greater than 0, and try again.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.84 16083

---

**Please specify an integer greater than 0, or the 'all' keyword, and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.57.85 16084**

---

**Please specify an integer greater than or equal to 0, and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.57.86 16085**

---

**Please specify the backup storage directory correctly and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.57.87 16086**

---

**Please specify the time stamp using the correct length and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.57.88 16087**

---

**Please start the server and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.89 16088

---

### Please stop the server and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.90 16089

---

### Please wait for a short period and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.91 16090

---

### Recovery of database completed successfully.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.92 16091

---

### Retrying backup. (@1@ times).

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.93 16092

---

---

**Specify the backup storage directory with the -B option, and retry.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.57.94 16093**

---

**Refer to "@1@ --help" for more information.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.57.95 16094**

---

**Retry after the other process terminates.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.57.96 16095**

---

**Failed to identify backup data.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.57.97 16096**

---

**restore point name is too long (maximum @1@ bytes)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.98 16097

---

[Try "@1@ --help" for more information.](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.99 16098

---

[@1@: keystore location is not specified](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.57.100 16099

---

[@1@: too many command-line arguments \(first is "@2@"\)](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58 Message Numbers Beginning with 16100

---

### 2.58.1 16100

---

**@1@: no operation is specified**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.58.2 16101

---

**@1@: could not open file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.58.3 16102

---

**@1@: could not read file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.58.4 16103

---

**@1@: keystore "@2@" is corrupted: size = @3@ bytes, expected size = @4@ bytes**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.5 16104

---

### @1@: file "@2@" is not a keystore

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.6 16105

---

### @1@: key is too long

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.7 16106

---

### @1@: key is wrong

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.8 16107

---

### @1@: passphrase-based key derivation failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.9 16108

---

---

**@1@: decryption of the keystore failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.10 16109

---

**@1@: decryption of the keystore failed: passphrase is wrong**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.11 16110

---

**@1@: keystore "@2@" is corrupted: invalid CRC**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.12 16111

---

**@1@: encryption of the keystore failed: error code = @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.13 16112

---

**@1@: encryption of the keystore failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.14 16113

---

**@1@: could not create file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.15 16114

---

**@1@: could not write file "@2@": @3@ (errno=@4@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.16 16115

---

**child process exited with unrecognized status @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.17 16116

---

**Invalid command \@1@. Try \? for help.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.18 16117

---

**invalid command \\@1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.19 16118

---

**\\@1@: extra argument "@2@" ignored**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.20 16119

---

**could not get home directory for user ID @1@: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.21 16120

---

**\\@1@: could not change directory to "@2@" : @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.22 16121

---

**You are currently not connected to a database.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.23 16122

---

**no query buffer**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.24 16123

---

**@1@: invalid encoding name or conversion procedure not found**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.25 16124

---

**\\@1@: missing required argument**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.26 16125

---

### Passwords didn't match.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.27 16126

---

### Password encryption failed.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.28 16127

---

### \\@1@: error while setting variable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.29 16128

---

### out of memory

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.30 16129

---

---

**\\@1@: environment variable name must not contain "="****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.58.31 16130**

---

**The server (version @1@.@2@) does not support showing function source.****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.58.32 16131**

---

**function name is required****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.58.33 16132**

---

**@1@: @2@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.58.34 16137**

---

**environment variable PSQL\_EDITOR\_LINENUMBER\_ARG must be set to specify a line number**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.35 16138

---

### could not start editor "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.36 16139

---

### could not start /bin/sh

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.37 16140

---

### could not locate temporary directory: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.38 16141

---

### could not open temporary file "@1@" : @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.39 16142

---

**\pset: allowed formats are unaligned, aligned, wrapped, html, asciidoc, latex, latex-longtable, troff-ms**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.40 16143

---

**\pset: allowed line styles are ascii, old-ascii, unicode**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.41 16144

---

**\pset: unknown option: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.42 16145

---

**\!: failed**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.43 16146

---

**cannot duplicate null pointer (internal error)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.44 16147

---

**connection to server was lost**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.45 16148

---

**Failed.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

## 2.58.46 16149

---

**unexpected PQresultStatus: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.47 16150

---

**The server (version @1@.@2@) does not support savepoints for ON\_ERROR\_ROLLBACK.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.48 16151

---

**unexpected transaction status (@1@)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.49 16152

---

**\copy: arguments required**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.50 16153

---

**\copy: parse error at "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.51 16154

---

**\\copy: parse error at end of line**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.52 16155

---

**@1@: cannot copy from/to a directory**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.53 16156

---

**could not write COPY data: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.54 16158

---

**Enter data to be copied followed by a newline.End with a backslash and a period on a line by itself.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.55 16159

---

### aborted because of read failure

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.56 16160

---

### The server (version @1@.@2@) does not support tablespaces.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.57 16161

---

### \ddf only takes [antwS+] as options

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.58 16162

---

### \ddf does not take a "w" option with server version @1@.@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.59 16163

---

---

**The server (version @1@.@2@) does not support altering default privileges.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.60 16164

---

**Did not find any relation named "@1@".**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.61 16165

---

**Did not find any relation with OID @1@.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.62 16166

---

**No per-database role settings support in this server version.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.63 16167

---

**No matching settings found.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.64 16168

---

**No settings found.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.65 16169

---

**No matching relations found.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.66 16170

---

**No relations found.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.67 16171

---

**The server (version @1@.@2@) does not support collations.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.68 16172

---

### The server (version @1@.@2@) does not support full text search.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.69 16173

---

### Did not find any text search configuration named "@1@".

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.70 16174

---

### The server (version @1@.@2@) does not support foreign-data wrappers.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.71 16175

---

### The server (version @1@.@2@) does not support foreign servers.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.72 16176

---

**The server (version @1@.@2@) does not support user mappings.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.73 16177

---

**The server (version @1@.@2@) does not support foreign tables.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.74 16178

---

**The server (version @1@.@2@) does not support extensions.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.75 16179

---

**Did not find any extension named "@1@".**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.76 16180

---

### Did not find any extensions.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.77 16181

---

### user name lookup failure: error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.78 16182

---

### could not read from input file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.79 16183

---

### could not save history to file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.80 16184

---

---

### **history is not supported by this installation**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.58.81 16185**

---

### **@1@: not connected to a database**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.58.82 16186**

---

### **@1@: current transaction is aborted**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.58.83 16187**

---

### **@1@: unknown transaction status**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.58.84 16188**

---

### **Cannot add header to table content: column count of @1@ exceeded.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.85 16189

---

### Cannot add cell to table content: total cell count of @1@ exceeded.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.86 16190

---

### invalid output format (internal error): @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.87 16191

---

### skipping recursive expansion of variable "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.88 16192

---

### unterminated quoted string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.89 16193

---

### @1@: out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.58.90 16194

---

### can't escape without active connection

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.91 16195

---

### @1@: could not open log file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.58.92 16196

---

### @1@: could not set printing parameter "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.93 16197

---

**@1@: could not delete variable "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.94 16198

---

**@1@: could not set variable "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.58.95 16199

---

**@1@: warning: extra command-line argument "@2@" ignored**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59 Message Numbers Beginning with 16200

---

---

### 2.59.1 16200

---

**tab completion query failed: @1@Query was: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.2 16201

---

**unrecognized value "@1@" for "@2@"; assuming "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.3 16202

---

**Try "@1@ --help" for more information.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.4 16203

---

**@1@: too many command-line arguments (first is "@2@")**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.5 16204

---

**@1@: cannot cluster all databases and a specific one at the same time**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.6 16205

---

**@1@: cannot cluster specific table(s) in all databases**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.7 16206

---

**@1@: clustering of table "@2@" in database "@3@" failed: @4@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.8 16207

---

**@1@: clustering of database "@2@" failed: @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.9 16208

---

**@1@: clustering database "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.10 16213

---

**@1@: could not connect to database @2@: @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.11 16214

---

**@1@: query failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.12 16215

---

**cannot duplicate null pointer (internal error)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.13 16216

---

**out of memory**

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.59.14 16217

---

### Cancel request sent

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.15 16218

---

### Could not send cancel request: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.16 16219

---

### @1@: only one of --locale and --lc-ctype can be specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.17 16220

---

### @1@: only one of --locale and --lc-collate can be specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.18 16221

---

---

**@1 @: "@2@" is not a valid encoding name****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.19 16222**

---

**@1 @: database creation failed: @2@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.20 16223**

---

**@1 @: comment creation failed (database was created): @2@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.21 16224**

---

**Procedural Languages****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.22 16225**

---

**@1 @: missing required argument language name**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.23 16226

---

**@1@: language "@2@" is already installed in database "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.24 16227

---

**@1@: language installation failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.25 16228

---

**Passwords didn't match.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.26 16229

---

**Password encryption failed.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.27 16230

---

**@1@: creation of new role failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.28 16231

---

**@1@: missing required argument database name**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.29 16232

---

**Database "@1@" will be permanently removed.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.30 16233

---

**@1@: database removal failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.31 16234

---

**@1 @: language "@2@" is not installed in database "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.32 16235

---

**@1 @: language removal failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.33 16236

---

**@1 @: missing required argument role name**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.34 16237

---

**Role "@1@" will be permanently removed.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.35 16238

---

**@1@: removal of role "@2@" failed: @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.36 16239

---

**@1@: cannot reindex all databases and a specific one at the same time**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.37 16240

---

**@1@: cannot reindex all databases and system catalogs at the same time**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.38 16241

---

**@1@: cannot reindex specific table(s) in all databases**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.39 16242

---

---

**@1@: cannot reindex specific index(es) in all databases****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.40 16243**

---

**@1@: cannot reindex specific table(s) and system catalogs at the same time****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.41 16244**

---

**@1@: cannot reindex specific index(es) and system catalogs at the same time****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.42 16245**

---

**@1@: reindexing of table "@2@" in database "@3@" failed: @4@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.43 16246**

---

**@1@: reindexing of index "@2@" in database "@3@" failed: @4@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.44 16247

---

**@1@: reindexing of database "@2@" failed: @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.45 16248

---

**@1@: reindexing database "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.46 16249

---

**@1@: reindexing of system catalogs failed: @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.47 16250

---

**@1@: cannot use the "@2@" option when performing only analyze**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.48 16252

---

**@1@: cannot vacuum all databases and a specific one at the same time**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.49 16253

---

**@1@: cannot vacuum specific table(s) in all databases**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.50 16254

---

**@1@: vacuuming of table "@2@" in database "@3@" failed: @4@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.51 16255

---

**@1@: vacuuming of database "@2@" failed: @3@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.52 16256

---

**SQL error: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.53 16257

---

**variable "@1@" must have a numeric type**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.54 16258

---

**descriptor "@1@" does not exist**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.55 16259

---

**descriptor header item "@1@" does not exist**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.56 16260

---

### nullable is always 1

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.57 16261

---

### key\_member is always 0

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.58 16262

---

### descriptor item "@1@" is not implemented

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.59 16263

---

### descriptor item "@1@" cannot be set

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.60 16264

---

---

**@1@: could not open file "@2@": @3@****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.61 16265**

---

**Try "@1@ --help" for more information.****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.62 16266**

---

**@1@: parser debug support (-d) not available****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.63 16268**

---

**@1@: no input files specified****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.59.64 16269**

---

**cursor "@1@" has been declared but not opened**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.65 16270

---

### could not remove output file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.66 16272

---

### invalid bit string literal

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.67 16273

---

### unterminated bit string literal

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.68 16274

---

### unterminated hexadecimal string literal

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.69 16275

---

### unterminated quoted string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.70 16276

---

### zero-length delimited identifier

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.71 16277

---

### unterminated quoted identifier

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.72 16278

---

### missing identifier in EXEC SQL UNDEF command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.73 16279

---

### missing matching "EXEC SQL IFDEF" / "EXEC SQL IFNDEF"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.74 16280

---

### missing "EXEC SQL ENDIF;"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.75 16281

---

### more than one EXEC SQL ELSE

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.76 16282

---

### unmatched EXEC SQL ENDIF

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.77 16283

---

### too many nested EXEC SQL IFDEF conditions

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.78 16284

---

### missing identifier in EXEC SQL IFDEF command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.79 16285

---

### missing identifier in EXEC SQL DEFINE command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.80 16286

---

### syntax error in EXEC SQL INCLUDE command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.81 16287

---

---

**internal error: unreachable state; If the cause of errors cannot be found, contact the Fujitsu Systems Engineer (SE).**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause. If the cause of errors cannot be found, contact the Fujitsu Systems Engineer (SE).

## 2.59.82 16288

---

**Error: include path "@1@/@2@" is too long on line @3@, skipping**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.83 16289

---

**could not open include file "@1@" on line @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.84 16290

---

**cursor "@1@" does not exist**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.59.85 16291

---

---

### **initializer not allowed in type definition**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.59.86 16292**

---

### **type name "string" is reserved in Informix mode**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.59.87 16293**

---

### **type "@1@" is already defined**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.59.88 16294**

---

### **multidimensional arrays for simple data types are not supported**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.59.89 16295**

---

### **AT option not allowed in CLOSE DATABASE statement**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.90 16296

---

### AT option not allowed in CONNECT statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.91 16297

---

### AT option not allowed in DISCONNECT statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.92 16298

---

### AT option not allowed in SET CONNECTION statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.59.93 16299

---

### AT option not allowed in TYPE statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60 Message Numbers Beginning with 16300

---

### 2.60.1 16300

---

**AT option not allowed in VAR statement**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.60.2 16301

---

**AT option not allowed in WHENEVER statement**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.60.3 16302

---

**unsupported feature will be passed to server**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.60.4 16303

---

**SHOW ALL is not implemented**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.5 16304

---

### **COPY FROM STDIN is not implemented**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.6 16308

---

### **using variable "@1@" in different declare statements is not supported**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.7 16309

---

### **cursor "@1@" is already defined**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.8 16310

---

### **no longer supported LIMIT #,# syntax passed to server**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.9 16311

---

**subquery in FROM must have an alias**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.10 16312

---

**CREATE TABLE AS cannot specify INTO**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.11 16313

---

**expected "@", found "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.12 16314

---

**only protocols "tcp" and "unix" and database type "postgresql" are supported**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.13 16315

---

**expected "://", found "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.14 16316

---

**Unix-domain sockets only work on "localhost" but not on "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.15 16317

---

**expected "postgresql", found "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.16 16318

---

**invalid connection type: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.17 16319

---

---

### expected "@" or "://", found "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.18 16320

---

### invalid data type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.19 16321

---

### incomplete statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.20 16322

---

### unrecognized token "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.21 16323

---

### only data types numeric and decimal have precision/scale argument

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.22 16324

---

**interval specification not allowed here**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.23 16325

---

**too many levels in nested structure/union definition**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.24 16326

---

**pointers to varchar are not implemented**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.25 16327

---

**using unsupported DESCRIBE statement**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.26 16328

---

### initializer not allowed in EXEC SQL VAR command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.27 16329

---

### arrays of indicators are not allowed on input

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.28 16330

---

### @1@ at or near "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.29 16331

---

### out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.60.30 16332

---

### unrecognized variable type code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.31 16333

---

### variable "@1@" is hidden by a local variable of a different type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.32 16334

---

### variable "@1@" is hidden by a local variable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.33 16335

---

### indicator variable "@1@" is hidden by a local variable of a different type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.34 16336

---

**indicator variable "@1@" is hidden by a local variable**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.35 16337

---

**indicator for array/pointer has to be array/pointer**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.36 16338

---

**nested arrays are not supported (except strings)**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.37 16339

---

**indicator for struct has to be a struct**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.38 16340

---

### indicator for simple data type has to be simple

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.39 16341

---

### unrecognized descriptor item code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.40 16342

---

### incorrectly formed variable "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.41 16343

---

### variable "@1@" is not a pointer

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.42 16344

---

---

**variable "@1@" is not a pointer to a structure or a union****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.60.43 16345**

---

**variable "@1@" is neither a structure nor a union****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.60.44 16346**

---

**variable "@1@" is not an array****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.60.45 16347**

---

**variable "@1@" is not declared****[Description]**

An error occurred.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.60.46 16348**

---

**indicator variable must have an integer type**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.47 16349

---

### unrecognized data type name "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.48 16350

---

### multidimensional arrays are not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.49 16351

---

### multilevel pointers (more than 2 levels) are not supported; found @1@ level

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.50 16353

---

### pointer to pointer is not supported for this data type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.51 16354

---

### multidimensional arrays for structures are not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.52 16355

---

### invalid URI propagated to internal parser routine: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.53 16356

---

### end of string reached when looking for matching "]" in IPv6 host address in URI: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.54 16357

---

### IPv6 host address may not be empty in URI: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.55 16358

---

**unexpected character "@1@" at position @2@ in URI (expected ":" or "/"): "@3@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.56 16359

---

**extra key/value separator "=" in URI query parameter: "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.57 16360

---

**missing key/value separator "=" in URI query parameter: "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.58 16361

---

**invalid URI query parameter: "@1@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.59 16362

---

### invalid percent-encoded token: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.60 16363

---

### forbidden value @1@00 in percent-encoded value: "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.61 16364

---

### insufficient data in "T" message

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.62 16365

---

### extraneous data in "T" message

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.63 16366

---

---

### insufficient data in "D" message

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.64 16367

---

### extraneous data in "D" message

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.65 16368

---

### at character @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.66 16369

---

### unrecognized socket error: 0x@1@/@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.67 16370

---

### If true, trusted and untrusted Perl code will be compiled in strict mode.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.68 16371

---

### Perl initialization code to execute when a Perl interpreter is initialized.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.69 16372

---

### Perl initialization code to execute once when plperl is first used.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.70 16373

---

### Perl initialization code to execute once when plperl is first used.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.71 16374

---

### duplicate declaration

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.72 16375

---

**diagnostics item @1@ is not allowed in GET STACKED DIAGNOSTICS**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.73 16376

---

**diagnostics item @1@ is not allowed in GET CURRENT DIAGNOSTICS**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.74 16377

---

**unrecognized GET DIAGNOSTICS item**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.75 16378

---

**unexpected end of function definition**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.76 16379

---

### **syntax error**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.77 16380

---

### **invalid SQLSTATE code**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.78 16381

---

### **syntax error, expected "FOR"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.79 16382

---

### **mismatched parentheses**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.80 16383

---

### missing expression

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.81 16384

---

### missing SQL statement

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.82 16385

---

### incomplete data type declaration

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.83 16386

---

### missing data type declaration

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.60.84 16387

---

---

### **INTO specified more than once**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.60.85 16388**

---

### **expected FROM or IN**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.60.86 16389**

---

### **cursor "@1@" has no argument named "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.60.87 16390**

---

### **value for parameter "@1@" of cursor "@2@" specified more than once**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.60.88 16391**

---

### **unrecognized RAISE statement option**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.89 16392

---

### **syntax error, expected "="**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.90 16393

---

### **during initialization of execution state**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.91 16394

---

### **while storing call arguments into local variables**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.92 16395

---

### **during function entry**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.93 16396

---

**while casting return value to function's return type**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.94 16397

---

**returned record type does not match expected record type**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.95 16398

---

**during function exit**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.60.96 16399

---

**returned row structure does not match the structure of the triggering table**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61 Message Numbers Beginning with 16400

---

### 2.61.1 16400

---

#### during statement block local variable initialization

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.61.2 16401

---

#### during statement block entry

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.61.3 16402

---

#### during statement block exit

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.61.4 16403

---

#### during exception cleanup

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.5 16404

---

### structure of query does not match function result type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.6 16405

---

### query "@1@" returned @2@ column query "@3@" returned @4@ columns

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.7 16406

---

### Sets handling of conflicts between PL/pgSQL variable names and table column names.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.8 16407

---

### plpy.cursor expected a query or a plan

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.9 16408

---

### plpy.cursor takes a sequence as its second argument

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.10 16409

---

### could not execute plan

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.11 16410

---

### Expected sequence of @1@ argument, got @2@: @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.12 16412

---

### iterating a closed cursor

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.13 16413

---

### iterating a cursor in an aborted subtransaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.14 16414

---

### fetch from a closed cursor

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.15 16415

---

### closing a cursor in an aborted subtransaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.16 16416

---

### error fetching next item from iterator

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.17 16417

---

---

### **PyList\_SetItem() failed, while setting up arguments**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.61.18 16418**

---

### **PyDict\_SetItemString() failed, while setting up arguments**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.61.19 16419**

---

### **could not create new dictionary while building trigger arguments**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.61.20 16420**

---

### **untrapped error in initialization**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.61.21 16421**

---

### **could not import "\_\_main\_\_" module**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.22 16422

---

### could not create globals

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.23 16423

---

### plan.status takes no arguments

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.24 16424

---

### could not import "plpy" module

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.25 16425

---

### could not add the spiexceptions module

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.26 16426

---

### could not create the base SPI exceptions

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.27 16427

---

### could not generate SPI exceptions

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.28 16428

---

### could not unpack arguments in plpy.eleg

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.29 16429

---

### could not parse error message in plpy.eleg

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.30 16430

---

### could not compile PL/Python function "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.31 16431

---

### could not compile anonymous PL/Python code block

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.32 16432

---

### command did not produce a result set

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.33 16433

---

### second argument of plpy.prepare must be a sequence

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.34 16434

---

### **plpy.execute expected a query or a plan**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.35 16435

---

### **plpy.execute takes a sequence as its second argument**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.36 16437

---

### **this subtransaction has already been entered**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.37 16438

---

### **this subtransaction has already been exited**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.38 16439

---

---

**this subtransaction has not been entered**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.39 16440

---

**there is no subtransaction to exit from**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.40 16441

---

**could not create new dictionary**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.41 16442

---

**could not create new Python list**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.42 16443

---

**could not create bytes representation of Python object**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.43 16444

---

### could not create string representation of Python object

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.44 16445

---

### return value of function with array return type is not a Python sequence

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.45 16446

---

### could not extract bytes from encoded string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.46 16447

---

### The name: @1@ is invalid.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.47 16448

---

### **";" is not permitted in COBOL**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.48 16449

---

### **"END-EXEC" is not permitted in C**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.49 16450

---

### **missing "EXEC SQL ENDIF END-EXEC."**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.50 16451

---

### **debug line with EXEC SQL is not permitted**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.51 16452

---

### SQL string literal cannot continue multiline by COBOL syntax

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.52 16453

---

### COBOL string literal cannot continue multiline by SQL syntax

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.53 16454

---

### syntax error at or near "END-EXEC" in declare section

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.54 16455

---

### syntax error in include file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.55 16456

---

### internal error: unreachable state;

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.56 16457

---

### could not open temporary file "@1@" for continue line

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.57 16458

---

### FILLER or implicit FILLER is not available in EXEC SQL TYPE statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.58 16459

---

### VALUE clause is not available in EXEC SQL TYPE statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.59 16460

---

---

### REDEFINES clause is not available in EXEC SQL TYPE statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.60 16461

---

### FILLER or implicit FILLER is not available in EXEC SQL VAR statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.61 16462

---

### VALUE clause is not available in EXEC SQL VAR statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.62 16463

---

### syntax error in WHENEVER statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.63 16464

---

### FILLER or implicit FILLER is not available in TYPEDEF statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.64 16465

---

### VALUE clause is not available in TYPEDEF statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.65 16466

---

### REDEFINES clause is not available in TYPEDEF statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.66 16467

---

### FILLER or implicit FILLER can use only for elementary item in group item

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.67 16468

---

### USAGE clause is not available for group item name

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.68 16469

---

**SIGN clause is not available for group item name**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.69 16470

---

**VALUE clause is not available for group item name**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.70 16471

---

**more than one USAGE clause**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.71 16472

---

**more than one OCCURS clause**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.72 16473

---

### more than one VALUE clause

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.73 16474

---

### more than one SIGN clause

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.74 16475

---

### more than one REDEFINES clause

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.75 16476

---

### syntax error at or near "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.76 16477

---

### length of varchar type is not assigned

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.77 16478

---

### invalid NULL is set

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.61.78 16479

---

### you can not be set to more than 1024 bytes of the string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.61.79 16480

---

### group item is too deep

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.80 16481

---

---

### **multidimensional array is not supported**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.61.81 16482**

---

### **syntax is not available**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.61.82 16483**

---

### **there is a character code that can not be determined**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.61.83 16484**

---

### **the number of variables reached the max number 100000**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.61.84 16485**

---

### **host array variable is needed when using FOR ARRAY\_SIZE**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.85 16486

---

### unsupported datatype found at FOR statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.86 16487

---

### FOR value should be positive integer

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.87 16488

---

### SELECT..INTO returns too many rows on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.61.88 16489

---

### not prepared for charset\_conv\_convert

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

This messages is output in the case of HA Database Ready.

Contact Fujitsu technical support.

## 2.61.89 16490

---

### **iconv failed (@1@)**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

This messages is output in the case of HA Database Ready.

Contact Fujitsu technical support.

## 2.61.90 16491

---

### **@1@ failed**

[Description]

Aborted the processing of this operation because an error occurred.

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the messages shown before this message, and then work around if necessary.

## 2.61.91 16492

---

### **CREATE TRIGGER will create implicit function "@1@"."@2@"() for TRIGGER "@3@" on TABLE "@4@"**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

## 2.61.92 16493

---

### **The cursor is invalid on line @1@**

[Description]

An error occurred during execution of the command.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.61.93 16494

---

### Constraint trigger "@1@" for relation "@2@" cannot be replaced with non-constraint trigger

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.61.94 16495

---

### Trigger "@1@" for relation "@2@" cannot be replaced with constraint trigger

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.61.95 16496

---

### invalid value for targetserver: "@1@"

[Description]

value of targetserver is invalid.

[System Processing]

Processing is aborted.

[Action]

Set one of the following:

- primary
- standby
- prefer\_standby
- any(can be specified only JDBC)

## 2.61.96 16497

---

### unterminated /\*+ comment for hint of pg\_hint\_plan

[Description]

An unterminated /\*+ comment for hint of pg\_hint\_plan is detected.

[System Processing]

Processing will be aborted.

[Action]

Terminate /\*+ comment for hint of pg\_hint\_plan.

## 2.61.97 16498

---

### trigger created with EXECUTE PROCEDURE cannot be replaced by DO block

[Description]

Trigger created with EXECUTE PROCEDURE cannot be replaced by DO block.

[System Processing]

Processing is aborted.

[Action]

Please redefine it after deleting the trigger.

## 2.61.98 16499

---

### trigger created with DO block cannot be replaced by EXECUTE PROCEDURE

[Description]

Trigger created with DO block cannot be replaced by EXECUTE PROCEDURE.

[System Processing]

Processing is aborted.

[Action]

Please redefine it after deleting the trigger.

## 2.62 Message Numbers Beginning with 16500

---

### 2.62.1 16500

---

#### the connection is not the same as the connection in DECLARE STATEMENT, on line @1@

[Description]

The connection is not the same as the connection in DECLARE STATEMENT, on line @1@

[System Processing]

Processing is aborted.

[Action]

Please do not specify the connection when you use SQL statement identifier declared with DECLARE STATEMENT.

## 2.62.2 16501

---

### cannot copy window "@1@" because it has a frame clause

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.62.3 16502

---

### could not find any WAL files

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.62.4 16503

---

### exceeded maxAllocatedDescs (@1@) while trying to open file "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.62.5 16504

---

### exceeded maxAllocatedDescs (@1@) while trying to open directory "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.62.6 16505

---

---

### **tsquery is too large**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.62.7 16506**

---

### **bit string length exceeds the maximum allowed (@1@)**

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.62.8 16507**

---

### **error occurred at @1@: @2@ before error message processing is available**

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.62.9 16508**

---

### **language validation function @1@ called for language @2@ instead of @3@**

#### [Description]

An error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.62.10 16509**

---

### **could not acquire mutex: @1@**

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.62.11 16510

---

### The sslservercertcn "@1@" could not be verified

[Description]

value of sslservercertcn is different from common name in the server certificate.

[System Processing]

Processing is aborted.

[Action]

Set SSL certificate's common name to sslservercertcn.

## 2.62.12 16511

---

### @1@: must be superuser to run this command

[Description]

Must be superuser to run this command.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command by the superuser.

## 2.62.13 16512

---

### @1@: must be database super user to run this command

#### [Description]

Must be database super user to run this command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Re-execute the command by the database super user.

## 2.62.14 16513

---

### @1@: no subcommand specified

#### [Description]

No subcommand specified.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the command-line, and re-execute the command with correct options or operands.

## 2.62.15 16514

---

### @1@: unrecognized subcommand "@2@"

#### [Description]

Unknown subcommand is specified.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the command-line, and re-execute the command with correct subcommand.

## 2.62.16 16515

---

### @1@: too many command-line arguments (first is "@2@")

#### [Description]

Too many command-line arguments.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the command-line, and re-execute the command with correct options or operands.

## 2.62.17 16516

---

---

**@1@: argument to an option "@2@" must be a list of port numbers****[Description]**

Argument to the option must be a list of port numbers.

**[System Processing]**

Processing will be aborted.

**[Action]**

Specify multiple port number, separated by commas argument to an option, and re-execute the command. Specify a number from 1024 to 32767 for the port number.

---

**2.62.18 16517**

---

**@1@: invalid argument for an option "@2@"****[Description]**

Invalid argument for an option.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the options specified in command-line, and re-execute the command with correct operands.

---

**2.62.19 16518**

---

**@1@: option "@2@" is required****[Description]**

The indispensable option is not specified.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the command-line, and re-execute the command with correct options or confirm the indispensable option is being used correctly.

---

**2.62.20 16519**

---

**@1@: requires an option "@2@" or setting the "@3@" environment variable****[Description]**

Requires an option or setting the environment variable.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the command-line, and re-execute the command with correct options. Or, set a correct value to the environment variable, and re-execute the command.

## 2.62.21 16520

---

### @1@: successfully completed

#### [Description]

Command successfully completed.

#### [System Processing]

Continues processing.

#### [Action]

No action required.

## 2.62.22 16521

---

### @1@: user "@2@" does not exist

#### [Description]

The user is not registered into OS.

#### [System Processing]

Processing will be aborted.

#### [Action]

Register the user into OS, and re-execute the command. Or, re-execute the command which specified the registered user.

## 2.62.23 16522

---

### @1@: data directory "@2@" does not exist

#### [Description]

The data directory does not exist.

#### [System Processing]

Processing will be aborted.

#### [Action]

Confirm that an option "--cluster-standbypnode" is being used correctly. Or, check the command-line, and re-execute the command with existing data directory.

## 2.62.24 16523

---

### @1@: "@2@" is not a valid data directory

#### [Description]

The data directory is not valid.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the command-line, and re-execute the command with valid data directory.

## 2.62.25 16524

---

### @1@: database cluster is not stopped

#### [Description]

Database cluster is not stopped.

#### [System Processing]

Processing will be aborted.

#### [Action]

Stop the database cluster, and re-execute the command.

## 2.62.26 16525

---

### @1@: domain root "@2@" already exists

#### [Description]

The domain root already exists.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the command-line, and re-execute the command with correct domain root.

## 2.62.27 16526

---

### @1@: could not create directory "@2@"

#### [Description]

Could not create the directory.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the following and eliminate the cause of errors, and re-execute the command.

- the state of a disk and file system to creating the directory
- permission of the upper directory of specified directory

## 2.62.28 16527

---

### @1@: start of PL/extJava has timed out : @2@

#### [Description]

Timed out waiting for start of PL/extJava.

#### [System Processing]

Processing will be aborted.

#### [Action]

Re-execute the command after the load on the system has decreased.

## 2.62.29 16528

---

**@1@: stop of PL/extJava has timed out : @2@**

[Description]

Timed out waiting for stop of PL/extJava.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command after the load on the system has decreased.

## 2.62.30 16529

---

**@1@: port number "@2@" is already in use**

[Description]

The port number is already in use.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command with a port number which is not used in other processes.

## 2.62.31 16530

---

**@1@: domain name can only be specified "domain1"**

[Description]

Domain name can only be specified "domain1".

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct domain name.

## 2.62.32 16531

---

**@1@: domain "@2@" has already been created**

[Description]

The domain has already been created.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct domain name.

## 2.62.33 16532

---

---

**@1@: domain "@2@" has not been created****[Description]**

The domain has not been created.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the command-line, and re-execute the command with correct domain name.

---

**2.62.34 16533**

---

**@1@: permission denied to update file "@2@"****[Description]**

Permission denied to update the file.

**[System Processing]**

Processing will be aborted.

**[Action]**

Permit writing to the file by execution user, and re-execute the command.

---

**2.62.35 16534**

---

**@1@: container for database "@2@" does not exist****[Description]**

Container for database does not exist.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the command-line, and re-execute the command with correct database name.

---

**2.62.36 16535**

---

**@1@: container for database "@2@" already exists****[Description]**

Container for database already exists.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the command-line, and re-execute the command with correct database name.

---

**2.62.37 16536**

---

**@1@: command error occurred**

[Description]

Internal command error occurred.

[System Processing]

Processing will be aborted.

[Action]

Fix the problem by referring to the messages prior to this one.

## 2.62.38 16537

---

### @1@: the domain was not able to be deleted because there was a container

[Description]

The domain was not able to be deleted because the domain have a container.

[System Processing]

Processing will be aborted.

[Action]

Delete all containers on the domain, and re-execute the command. Or, re-execute the command with "--force" option.

## 2.62.39 16538

---

### @1@: could not access the data directory

[Description]

Could not access the data directory.

[System Processing]

Processing will be aborted.

[Action]

Confirm that an option "--cluster-standbynode" is being used correctly. Or, specify database super user in "--dbadminuser" option and re-execute the command.

## 2.62.40 16539

---

### @1@: server instance "@2@" does not exist

[Description]

Server instance does not exist.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct server instance.

## 2.62.41 16540

---

### @1@: specified database name "@2@" does not follow the naming rules

[Description]

Specified database name does not follow the naming rules.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct database name.

## 2.62.42 16541

---

**@1@: all the server instances of the container cannot be deleted**

[Description]

All the server instances of the container cannot be deleted.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct database name.

## 2.62.43 16542

---

**@1@: the mount does the shared-file system of the domain root or the data directory**

[Description]

A command executing node is not a standby node.

[System Processing]

Processing will be aborted.

[Action]

Execute the command on standby node.

## 2.62.44 16543

---

**@1@: cannot execute this subcommand on standby node**

[Description]

Cannot execute this subcommand on standby node.

[System Processing]

Processing will be aborted.

[Action]

Execute the command on primary node.

## 2.62.45 16544

---

**@1@: cannot execute this command concurrently**

[Description]

Cannot execute this command concurrently.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command after a command executing was finished.

## 2.62.46 16545

---

**@1@: domain root "@2@" does not exist**

[Description]

Domain root does not exist.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the shared-file system of the domain root is mounted. Or, restore domain root from backup and re-execute the command.

## 2.62.47 16546

---

**parameter "@1@" necessary for the PL/extJava environment was not set**

[Description]

PL/extJava environment was not set.

[System Processing]

Processing will be aborted.

[Action]

Set the PL/extJava environment.

## 2.62.48 16547

---

**mismatched parentheses**

[Description]

Missing parenthesis '(' or ')' in Java function definition.

[System Processing]

Processing will be aborted.

[Action]

Check the definition of Java function.

## 2.62.49 16548

---

**invalid format specification for Java function**

[Description]

Invalid format specification for Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the definition of Java function.

Java function definition format is [package].[class].[method].

## 2.62.50 16549

---

### Java function cannot return type @1@

[Description]

The specified data type is not supported as Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the data type of return value.

## 2.62.51 16550

---

### Java function cannot accept type @1@

[Description]

The specified data type is not supported as Java function arguments.

[System Processing]

Processing will be aborted.

[Action]

Check the data type of arguments value.

## 2.62.52 16551

---

### could not execute the Java function at the application server: HTTP status code @1@ details: "@2@"

[Description]

The application server could not execute the Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the Java function of registered in application server.

Check the details.

- The classpath is not found. (plextjava\_lib\_dir=%s2)

%s2: directory

The directory that stores the Java function is not in the application server. Check the directory and register the Java function.

- The return type is different. (%s3)

%s3: data type

The return value of the Java function is not corresponding to the CREATE FUNCTION definition. Check the data type of Java function.

- The method is not found. (%s4)

%s4: data type

The Java function to which the data type is corresponding is not found. Check the data type of Java function.

- The class is not found.(%s5)

%s5: class name

The Java function to which the class name is corresponding is not found. Check the class name of Java function.

- The method is not static modifier. (%s6)

%s6: Java function name

The Java function is not defined by "Static". Check the Java function definition.

here is no executed authority. (%s7)

%s7: Java function name

The Java function is not defined by "Public". Check the Java function definition.

- Java application throws exception(%s8).

%s8: exception

The exception was generated by the Java function. Check the Java function definition.

- no message

The following causes are thought.

-There is a possibility that the container is not made. Make the container in application server.

a) There is a possibility where the number of server instances is insufficient. Add server instance (JavaVM) to the application server.

b) There is a possibility that memory shortage occurs. Check the Java application.

c) There is a possibility that the time-out is generated. Check the Java application.

d) There is a possibility that abnormality occurs by the application server. Check the following logs.

- Event log (For Windows(R))/system log (For Solaris/Linux).

- Server log of container

- JavaVM log of container

- Trace log of Web server

- Internal log of Web server

## 2.62.53 16552

---

**could not connect to application server: @1@**

[Description]

Could not connect to application server.

[System Processing]

Processing will be aborted.

[Action]

Check the plextjava.http\_port parameter in postgresql.conf.

## 2.62.54 16553

---

### could not create socket for application server connection: @1@

[Description]

Could not create socket.

[System Processing]

Processing will be aborted.

[Action]

There is possible where an open number of files that can be used with the system is insufficient. Please confirm the total of the file that can be used with the system.

## 2.62.55 16554

---

### could not send data to application server: @1@

[Description]

The application server was disconnected during execution of the Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the message of application server.

## 2.62.56 16555

---

### could not receive data from application server

[Description]

The application server was disconnected during execution of the Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the message of application server.

## 2.62.57 16556

---

### could not receive data from application server: @1@

[Description]

The application server was disconnected during execution of the Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the message of application server.

## 2.62.58 16557

---

### could not execute PL/extJava start command

[Description]

An error occurred during executing the command specified by plextjava.start\_command parameter in postgresql.conf.

[System Processing]

Processing will be aborted.

[Action]

Check the plextjava.start\_command parameter in postgresql.conf.

## 2.62.59 16558

---

### PL/extJava start command failed with exit code @1@

[Description]

An error occurred during executing the command specified by plextjava.start\_command parameter in postgresql.conf.

[System Processing]

Processing will be aborted.

[Action]

Check the exit code and the messages that was output before this.

## 2.62.60 16559

---

### could not execute PL/extJava stop command

[Description]

An error occurred during executing the command specified by plextjava.stop\_command parameter in postgresql.conf.

[System Processing]

Processing will be aborted.

[Action]

Check the plextjava.stop\_command parameter in postgresql.conf.

## 2.62.61 16560

---

### PL/extJava stop command failed with exit code @1@

[Description]

An error occurred during executing the command specified by plextjava.stop\_command parameter in postgresql.conf.

[System Processing]

Processing will be aborted.

[Action]

Check the exit code and the messages that was output before this.

## 2.62.62 16561

---

---

### could not execute PL/extJava forcible stop command

#### [Description]

An error occurred during executing the command specified by `plextjava.forcible_stop_command` parameter in `postgresql.conf`.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the `plextjava.forcible_stop_command` parameter in `postgresql.conf`.

---

## 2.62.63 16562

---

### PL/extJava forcible stop command failed with exit code @1@

#### [Description]

An error occurred during executing the command specified by `plextjava.forcible_stop_command` parameter in `postgresql.conf`.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the exit code and the messages that was output before this.

---

## 2.62.64 16563

---

### @1@: at least one option of "@2@" must be specified

#### [Description]

Must specify at least one option.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the command-line, and re-execute the command with correct options.

---

## 2.62.65 16574

---

### @1@: could not write directory "@2@"

#### [Description]

Could not write the directory.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check that the disk of the directory has free space, and check that the abnormalities of the disk have not occurred.

---

## 2.62.66 16575

---

**@1@: cannot execute with "@2@" option in primary server****[Description]**

Do not specify the option to execute the command in primary server.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the command-line, and re-execute the command with correct options.

Restore it because PL/extJava environment may be corrupted when the server is member nodes of the cluster.

---

**2.62.67 16576**

---

**@1@: specify "@2@" option in standby server****[Description]**

Specify the option to execute the command in standby server.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the command-line, and re-execute the command with correct options.

Restore it because PL/extJava environment may be corrupted when the server is member nodes of the cluster.

---

**2.62.68 16577**

---

**Could not translate client host name "@1@" to IP address: @2@.****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

---

**2.62.69 16578**

---

**Could not resolve client IP address to a host name: @1@.****[Description]**

Supplementary information was output.

**[System Processing]**

None.

**[Action]**

Refer to this message together with the message that was output immediately beforehand.

## 2.62.70 16579

---

**SELECT target entry is named "@1@".**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.62.71 16580

---

**SELECT target entry has type @1@, but column has type @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.62.72 16581

---

**RETURNING list entry has type @1@, but column has type @2@.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

## 2.62.73 16582

---

**pg\_largeobject entry for OID @1@, page @2@ has invalid data field size @3@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.62.74 16583

---

---

### could not close directory "@1@": @2@

#### [Description]

Terminated normally but a warning was output.

#### [System Processing]

Continues processing.

#### [Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

## 2.62.75 16584

---

### could not create shared memory segment "@1@": @2@

#### [Description]

Could not create shared memory segment.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause

---

## 2.62.76 16585

---

### could not open shared memory segment "@1@": @2@

#### [Description]

Could not open shared memory segment.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause

---

## 2.62.77 16586

---

### could not map shared memory segment "@1@": @2@

#### [Description]

Could not map shared memory segment.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause

---

## 2.62.78 16587

---

### could not unmap shared memory segment "@1@": @2@

[Description]

Could not unmap shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.62.79 16588

---

### could not remove shared memory segment "@1@": @2@

[Description]

Could not remove shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.62.80 16589

---

### background worker "@1@": must attach to shared memory in order to request a database connection

[Description]

Could not register background worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.62.81 16590

---

### background worker "@1@": cannot request database access if starting at postmaster start

[Description]

Could not register background worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.62.82 16591

---

### background worker "@1@": invalid restart interval

[Description]

Could not register background worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

---

## 2.62.83 16592

---

### terminating background worker "@1@" due to administrator command

[Description]

Could not register background worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

---

## 2.62.84 16595

---

### dynamic shared memory is disabled

[Description]

dynamic shared memory is disabled.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

---

## 2.62.85 16596

---

### dynamic shared memory control segment is not valid

[Description]

dynamic shared memory control segment is not valid.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

---

## 2.62.86 16597

---

### too many dynamic shared memory segments

[Description]

Too many dynamic shared memory segments exist.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.62.87 16599

---

**could not stat shared memory segment "@1@": @2@**

[Description]

Could not get details about dynamic shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.63 Message Numbers Beginning with 16600

---

### 2.63.1 16600

---

**could not resize shared memory segment "@1@" to @2@ bytes: @3@**

[Description]

Could not resize shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

### 2.63.2 16601

---

**could not get shared memory segment: @1@**

[Description]

Could not get shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

### 2.63.3 16604

---

**cannot add more timeout reasons**

[Description]

cannot add more timeout reasons

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

---

## 2.63.4 16606

---

**aborting because lock on relation "@1@"."@2@" is not available**

[Description]

Aborting because lock on relation is not available.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.5 16607

---

**affix file contains both old-style and new-style commands**

[Description]

Affix file contains commands in both old and new format.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.6 16608

---

**aggregate cannot accept shell type @1@**

[Description]

aggregate cannot accept shell type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.7 16609

---

**aggregate functions are not allowed in a recursive query's recursive term**

[Description]

aggregate functions are not allowed in a recursive query's recursive term.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.8 16610

---

### aggregate functions are not allowed in check constraints

[Description]

aggregate functions are not allowed in check constraints.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.9 16611

---

### aggregate functions are not allowed in DEFAULT expression

[Description]

aggregate functions are not allowed in DEFAULT expressions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.10 16612

---

### aggregate functions are not allowed in EXECUTE parameters

[Description]

aggregate functions are not allowed in EXECUTE parameter.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.11 16613

---

### aggregate functions are not allowed in FROM clause of their own query level

[Description]

Should only be possible in a LATERAL subquery. aggregate functions are not allowed in FROM clause of their own query level.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.12 16614

---

### aggregate functions are not allowed in functions in FROM

[Description]

aggregate functions are not allowed in functions in FROM.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.13 16615

---

### aggregate functions are not allowed in index expression

[Description]

aggregate functions are not allowed in index expression.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.14 16616

---

### aggregate functions are not allowed in index predicates

[Description]

aggregate functions are not allowed in index predicates.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.15 16617

---

### aggregate functions are not allowed in JOIN conditions

[Description]

aggregate functions are not allowed in JOIN conditions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.16 16618

---

### aggregate functions are not allowed in @1@

#### [Description]

aggregate functions are not allowed in some kinds of expressions we are parsing such as  
EXPR\_KIND\_WHERE,EXPR\_KIND\_FILTER, EXPR\_KIND\_INSERT\_TARGET,  
EXPR\_KIND\_UPDATE\_SOURCE, EXPR\_KIND\_UPDATE\_TARGET, EXPR\_KIND\_GROUP\_BY,  
EXPR\_KIND\_LIMIT, EXPR\_KIND\_OFFSET, EXPR\_KIND\_RETURNING,EXPR\_KIND\_VALUES.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.17 16620

---

### aggregate functions are not allowed in trigger WHEN conditions

#### [Description]

aggregate functions are not allowed in trigger WHEN conditions.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.18 16621

---

### aggregate functions are not allowed in window RANGE

#### [Description]

aggregate functions are not allowed in window RANGE.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.19 16622

---

### aggregate functions are not allowed in window ROWS

#### [Description]

aggregate functions are not allowed in window ROWS.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.20 16623

---

### aggregate mfinalfunc must not be specified without mstype

[Description]

aggregate mfinalfunc must not be specified without mstype.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.21 16624

---

### aggregate minitcond must not be specified without mstype

[Description]

aggregate minitcond must not be specified without mstype.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.22 16625

---

### aggregate minvfunc must be specified when mstype is specified

[Description]

aggregate minvfunc must be specified when mstype is specified. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.23 16626

---

### aggregate minvfunc must not be specified without mstype

[Description]

aggregate minvfunc must not be specified without mstype. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.24 16627

---

### aggregate msfunc must be specified when mstype is specified

#### [Description]

aggregate msfunc must be specified when mstype is specified. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.25 16628

---

### aggregate msfunc must not be specified without mstype

#### [Description]

aggregate msfunc must not be specified without mstype. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.26 16629

---

### aggregate msspace must not be specified without mstype

#### [Description]

aggregate msspace must not be specified without mstype. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.27 16630

---

### aggregates cannot accept set arguments

#### [Description]

aggregates cannot accept set arguments.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.28 16631

---

### aggregates cannot have more than @1@ argument

#### [Description]

aggregates cannot have more than 99 argument. Aggregates can have at most `FUNC_MAX_ARGS-1` args, else the transfn and/or finalfn will be unrepresentable in `pg_proc`. We must check now to protect fixed-size arrays here and possibly in called functions.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.29 16632

---

### aggregates cannot have output arguments

#### [Description]

aggregates cannot have output arguments.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.30 16633

---

### a hypothetical-set aggregate must have direct arguments matching its aggregated arguments

#### [Description]

a hypothetical-set aggregate must have direct arguments matching its aggregated arguments.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.31 16634

---

### "All connection parameters must be supplied because no " "database connection exists"

#### [Description]

All connection parameters must be supplied because no database connection exists. We don't know the supplied connection parameters and don't want to connect to the wrong database by using defaults, so require all parameters to be specified.

#### [System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.32 16635

---

### all replication slots are in use

[Description]

all replication slots are in use.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.33 16636

---

### an aggregate with DISTINCT must have at least one argument

[Description]

an aggregate with DISTINCT must have at least one argument. Returning an empty list would cause the parsed Query to look like it didn't have DISTINCT, with results that would probably surprise the user. Note: this case is presently impossible for aggregates because of grammar restrictions, but we check anyway.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.34 16637

---

### an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type

[Description]

an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.35 16638

---

### argument declared "anyrange" is not a range type but type @1@

[Description]

argument declared \"anyrange\" is not a range type but type format type of range\_type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.36 16639

---

### argument list must have even number of elements

[Description]

argument list must have even number of elements.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.37 16640

---

### argument of lo\_read exceeds integer range

[Description]

argument of lo\_read exceeds integer range. Long ago, somebody thought it'd be a good idea to declare this function as taking size\_t ... but the underlying backend function only accepts a signed int32 length. So throw error if the given value overflows int32.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.38 16641

---

### argument of lo\_truncate exceeds integer range

[Description]

argument of lo\_truncate exceeds integer range. Long ago, somebody thought it'd be a good idea to declare this function as taking size\_t ... but the underlying backend function only accepts a signed int32 length. So throw error if the given value overflows int32. (A possible alternative is to automatically redirect the call to lo\_truncate64; but if the caller wanted to rely on that backend function being available, he could have called lo\_truncate64 for himself.)

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.39 16642

---

### argument of lo\_write exceeds integer range

[Description]

argument of `lo_write` exceeds integer range\n.Long ago, somebody thought it'd be a good idea to declare this function as taking `size_t` ... but the underlying backend function only accepts a signed `int32` length. So throw error if the given value overflows `int32`.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.40 16643

---

### argument of @1 @ must be an array of objects

[Description]

argument of `funcname` must be an array of objects.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.41 16644

---

### Array contents must start with "{"

[Description]

Array contents must start with `\{"`.intuit dimensions from brace structure -- it better match what we were given.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.42 16645

---

### array must be one-dimensional

[Description]

array must be one-dimensional.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.43 16646

---

### array must have even number of elements

[Description]

array must have even number of elements.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.44 16647

---

### array must have two columns

[Description]

array must have two columns.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.45 16648

---

### array must not contain nulls

[Description]

array must not contain nulls.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.46 16649

---

### Array value must start with "{" or dimension information

[Description]

Array value must start with "\" or dimension information. No array dimensions, so intuit dimensions from brace structure.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.47 16650

---

### authentication file line too long

[Description]

authentication file line too long. Line too long!

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.48 16651

---

### a variadic ordered-set aggregate must use VARIADIC type ANY

[Description]

a variadic ordered-set aggregate must use VARIADIC type ANY. An ordered-set aggregate that is VARIADIC must be VARIADIC ANY. In principle we could support regular variadic types, but it would make things much more complicated because we'd have to assemble the correct subsets of arguments into array values. Since no standard aggregates have use for such a case, we aren't bothering for now.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.49 16652

---

### a worker process died unexpectedly

[Description]

a worker process died unexpectedly.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.50 16653

---

### canceling statement due to lock timeout

[Description]

canceling statement due to lock timeout. If LOCK\_TIMEOUT and STATEMENT\_TIMEOUT indicators are both set, we prefer to report the former; but be sure to clear both.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.51 16654

---

---

### cannot extract elements from an object

[Description]

cannot extract elements from an object.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.52 16655

---

### cannot extract elements from a scalar

[Description]

cannot extract elements from a scalar.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.53 16656

---

### cannot get array length of a non-array

[Description]

cannot get array length of a non-array.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.54 16657

---

### cannot get array length of a scalar

[Description]

cannot get array length of a scalar.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.55 16658

---

### cannot have more than 2<sup>32</sup>-2 commands in a transaction

[Description]

cannot have more than  $2^{32}-2$  commands in a transaction.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.56 16659

---

### cannot insert into column "@1@" of view "@2@"

[Description]

cannot insert into column non\_updatable\_col of view RelationGetRelationName(view). This is a different error, caused by an attempt to update a non-updatable column in an otherwise updatable view.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.57 16660

---

### cannot insert into foreign table "@1@"

[Description]

cannot insert into foreign table RelationName of resultRel.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.58 16661

---

### cannot lock rows in materialized view "@1@"

[Description]

cannot lock rows in materialized view RelationName of provided rel. Allow referencing a matview, but not actual locking clauses.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.59 16662

---

### cannot move relations in to or out of pg\_global tablespace

[Description]

cannot move relations in to or out of pg\_global tablespace.Can't move shared relations in to or out of pg\_global. This is also checked by ATExecSetTableSpace, but nice to stop earlier.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.60 16663

---

### cannot perform FREEZE because of prior transaction activity

[Description]

cannot perform FREEZE because of prior transaction activity.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.61 16664

---

### cannot perform FREEZE because the table was not created or truncated in the current subtransaction

[Description]

cannot perform FREEZE because the table was not created or truncated in the current subtransaction.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.62 16665

---

### cannot refresh materialized view "@1@" concurrently

[Description]

cannot refresh materialized view matviewname concurrently.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.63 16666

---

### cannot rename inherited constraint "@1@"

[Description]

cannot rename inherited constraint oldconname.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.64 16667

---

### cannot return non-composite value from function returning composite type

[Description]

cannot return non-composite value from function returning composite type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.65 16668

---

### cannot rewrite table "@1@" used as a catalog table

[Description]

cannot rewrite table Relation name used as a catalog table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.66 16669

---

### cannot update column "@1@" of view "@2@"

[Description]

cannot update column non\_updatable\_col of view RelationGetRelationName(view).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.67 16670

---

### cannot update foreign table "@1@"

[Description]

cannot update foreign table resultRel relation name.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.68 16671

---

### cannot use a logical replication slot for physical replication

[Description]

Logical replication slots, similar to physical slots except that they are attached to a single database. cannot use a logical replication slot for physical replication.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.69 16672

---

### cannot use DISTINCT with WITHIN GROUP

[Description]

cannot use DISTINCT with WITHIN GROUP. The order clause for WITHIN GROUP and the one for plain-aggregate ORDER BY share a field, so we have to check here that at most one is present. We also check for DISTINCT here to give a better error location.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.70 16673

---

### cannot use expression index "@1@" as replica identity

[Description]

cannot use expression index Relation name of indexRel as replica identity. Expression indexes aren't supported.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.71 16674

---

### cannot use invalid index "@1@" as replica identity

[Description]

cannot use invalid index Relation name of indexRel as replica identity.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.72 16675

---

### cannot use ldapbasedn, ldapbinddn, ldapbindpasswd, ldapsearchattribute, or ldapurl together with ldapprefix

[Description]

cannot use ldapbasedn, ldapbinddn, ldapbindpasswd, ldapsearchattribute, or ldapurl together with ldapprefix.LDAP can operate in two modes: either with a direct bind, using ldapprefix and ldapsuffix, or using a search+bind, using ldapbasedn, ldapbinddn, ldapbindpasswd and ldapsearchattribute.Disallow mixing these parameters.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.73 16676

---

### cannot use multiple ORDER BY clauses with WITHIN GROUP

[Description]

cannot use multiple ORDER BY clauses with WITHIN GROUP.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.74 16677

---

### cannot use non-immediate index "@1@" as replica identity

[Description]

cannot use non-immediate index Relation name of indexRel as replica identity.Deferred indexes are not guaranteed to be always unique.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.75 16678

---

### cannot use non-unique index "@1@" as replica identity

[Description]

cannot use non-unique index Relation name of indexRel as replica identity. The Access Method must support uniqueness, and the index must in fact be unique.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.76 16679

---

### cannot use partial index "@1@" as replica identity

[Description]

cannot use partial index Relation name of indexRel as replica identity.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.77 16680

---

### cannot use physical replication slot for logical decoding

[Description]

cannot use physical replication slot for logical decoding.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.78 16681

---

### cannot use subquery in DEFAULT expression

[Description]

cannot use subquery in DEFAULT expression. Check to see if the sublink is in an invalid place within the query. We allow sublinks everywhere in SELECT/INSERT/UPDATE/DELETE, but generally not in utility statements.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.79 16682

---

### cannot use VARIADIC with WITHIN GROUP

[Description]

cannot use VARIADIC with WITHIN GROUP.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.80 16683

---

### check constraints for domains cannot be marked NO INHERIT

[Description]

check constraints for domains cannot be marked NO INHERIT. Check constraints are handled after domain creation, as they require the Oid of the domain; at this point we can only check that they're not marked NO INHERIT, because that would be bogus.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.81 16684

---

### CONCURRENTLY and WITH NO DATA options cannot be used together

[Description]

CONCURRENTLY and WITH NO DATA options cannot be used together. Check that conflicting options have not been specified.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.82 16685

---

### CONCURRENTLY cannot be used when the materialized view is not populated

[Description]

CONCURRENTLY cannot be used when the materialized view is not populated. Check that CONCURRENTLY is not specified if not populated.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.83 16687

---

---

### constraint "@1@" of relation "@2@" is not a foreign key or check constraint

[Description]

constraint constrName of relation RelationName(rel) is not a foreign key or check constraint.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.84 16688

---

### could not change directory to "@1@": @2@

[Description]

could not change directory to path: strerror(errno). could not change directory to orig\_wd:strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.85 16689

---

### could not close directory "@1@": @2@

[Description]

could not close directory ctx->directory and the corresponding error will be printed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.86 16690

---

### could not close log file @1@: @2@

[Description]

could not close log file XLogFileNameP(ThisTimeLineID, openLogSegNo) and the reason failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.87 16691

---

### could not close log segment @1@: @2@

[Description]

could not close log segment XLogFileNameP(recvFileTLI, recvSegNo) and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.88 16692

---

### could not close pipe to external command: @1@

[Description]

could not close pipe to external command and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.89 16693

---

### could not close pipe to external command: @1@

[Description]

could not close pipe to external command: strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.90 16694

---

### could not complete SSL handshake on renegotiation, too many failures

[Description]

could not complete SSL handshake on renegotiation, too many failures. A handshake can fail, so be prepared to retry it, but only a few times and in this case we considered maximum limit is 20 times.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.63.91 16695

---

### could not create any Unix-domain sockets

[Description]

could not create any Unix-domain sockets.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.92 16696

---

### could not create communication channels: @1@

[Description]

could not create communication channels: strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.93 16697

---

### could not create shared memory segment "@1@": @2@

[Description]

could not create shared memory segment name and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.94 16698

---

### could not create Unix-domain socket in directory "@1@"

[Description]

could not create Unix-domain socket in one of the Unix\_socket\_directories.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.63.95 16699

---

### could not determine data type for argument @1@

[Description]

could not determine data type for argument 1. since json\_object\_agg() is declared as taking type "any", the parser will not do any type conversion on unknown-type literals (that is, undecorated strings or NULLs). Such values will arrive here as type UNKNOWN, which fortunately does not matter to us, since unknownout() works fine.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64 Message Numbers Beginning with 16700

---

### 2.64.1 16700

---

**could not determine encoding for codeset "@1@"**

[Description]

could not determine encoding for codeset cp followed by the provided unsigned integer.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.64.2 16701

---

**could not duplicate handle for "@1@": @2@**

[Description]

could not duplicate handle for handle name and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.64.3 16702

---

**could not execute command "@1@": @2@**

[Description]

could not execute command filename and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.4 16703

---

### could not execute command "@1@": @2@

#### [Description]

could not execute command options->file and the strerror(errno).

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.5 16704

---

### could not fdatsync log file @1@: @2@

#### [Description]

could not fdatsync log file XLogFileNameP(ThisTimeLineID, segno) and the reason for failure also printed along with error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.6 16705

---

### could not fork worker process: @1@

#### [Description]

could not fork worker process. The reason for failure also printed along with error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.7 16706

---

### could not fsync log file @1@: @2@

#### [Description]

could not fsync log file XLogFileNameP(ThisTimeLineID, segno) and reason for failure also printed along with error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.8 16707

---

### could not fsync log segment @1@: @2@

#### [Description]

could not fsync log segment XLogFileNameP(ThisTimeLineID, openLogSegNo) and reason for failure also printed along with error. XLogFileNameP(ThisTimeLineID, openLogSegNo) currently open log segment (if any). Also, if the open flag is changing, close the log file so it will be reopened (with new flag bit) at next use.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.9 16708

---

### could not fsync write-through log file @1@: @2@

#### [Description]

could not fsync write-through log file XLogFileNameP(ThisTimeLineID, segno) and the reason for failure also printed along with error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.10 16709

---

### could not get current working directory: @1@

#### [Description]

could not get current working directory: strerror(errno).

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.11 16710

---

### could not get home directory for user ID @1@: @2@

#### [Description]

could not get home directory for user ID user\_id and strerror(errno) if errno set otherwise print \_("user does not exist").

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.12 16711

---

### could not get junction for "@1@": @2@

#### [Description]

could not get junction for path :msg.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.13 16712

---

### could not get relation name for OID @1@: @2@

#### [Description]

could not get relation name for OID te->catalogId.oid, PQerrorMessage(AH->connection).

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.14 16713

---

### could not get shared memory segment: @1@

#### [Description]

could not get shared memory segment and reason for failure also printed along with error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.15 16714

---

### Could not identify system: got @1@ rows and @2@ fields, expected @3@ rows and @4@ or more fields

#### [Description]

Could not identify system: got res->ntups rows and res->numAttributes fields, expected 3 rows and 1 or more fields.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.16 16715

---

### could not import a module for Decimal constructor

#### [Description]

could not import a module for Decimal constructor. Try to import cdecimal. If it doesn't exist, fall back to decimal.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.17 16716

---

### could not initialize LDAP: @1@

#### [Description]

could not initialize LDAP and reason for failure also printed along with error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.18 16717

---

### could not link file "@1@" to "@2@" (initialization of log file): @3@

#### [Description]

could not link file tmp path to path (initialization of log file) and reason for failure also printed along with error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.19 16719

---

### could not look up local user ID @1@: @2@

#### [Description]

could not look up local user ID geteuid() and error string for the corresponding errno will be printed or if it is unknown error it will print "Unknown error".

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.20 16720

---

### could not look up local user ID @1@: @2@

#### [Description]

could not look up local user ID (long)uid and if errno is set error string for the corresponding errno will be printed otherwise "user does not exist" will be printed.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.21 16721

---

### could not map anonymous shared memory: @1@

#### [Description]

could not map anonymous shared memory and the reason for failure will be printed along with error. If errno is ENOMEM means This error usually means that PostgreSQL's request for a shared memory segment exceeded available memory, swap space, or huge pages. To reduce the request size (currently size bytes), reduce PostgreSQL's shared memory usage, perhaps by reducing shared\_buffers or max\_connections.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.22 16722

---

### could not map shared memory segment "@1@": @2@

#### [Description]

could not map shared memory segment handle name and reason for failure also printed along with error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.23 16723

---

### could not obtain lock on relation "@1@"

#### [Description]

could not obtain lock on relation relation name. Lock relation. This will also accept any pending invalidation messages. If we got back InvalidOid, indicating not found, then there's nothing to lock, but we accept invalidation messages anyway, to flush any negative catcache entries that may be lingering.

#### [System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.24 16724

---

### could not open backend variables file "@1@": @2@

[Description]

could not open backend variables file id and stterror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.25 16725

---

### could not open configuration directory "@1@": @2@

[Description]

could not open configuration directory absolute location of includedir and the reason for failure also be printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.26 16726

---

### could not open shared memory segment "@1@": @2@

[Description]

could not open shared memory segment dsm handle name and reason for failure also printed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.27 16727

---

### could not open transaction log file "@1@": @2@

[Description]

could not open transaction log file path and reason for failure also prined along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.28 16728

---

### could not parse file name "@1@"

[Description]

could not parse file name path name. temporary filenames from SnapBuildSerialize() include the LSN and everything but are postfixed by \$.pid.tmp. We can just remove them the same as other files because there can be none that are currently being written that are older than cutoff. We just log a message if a file doesn't fit the pattern, it's probably some editors lock/state file or similar...

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.29 16729

---

### could not parse LDAP URL "@1@": @2@

[Description]

could not parse LDAP URL val and ldap\_err2string on the return value of ldap\_url\_parse.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.30 16730

---

### could not perform initial LDAP bind for ldapbinddn "@1@" on server "@2@": @3@

[Description]

could not perform initial LDAP bind for ldapbinddn port->hba->ldapbinddn on server port->hba->ldapservers and ldap\_err2string on the return value of ldap\_simple\_bind\_s. Bind with a pre-defined username/password (if available) for searching. If none is specified, this turns into an anonymous bind.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.31 16731

---

### could not read directory "@1@": @2@

[Description]

could not read directory path and strerror(errno).

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.64.32 16732

---

**could not read file "@1@", read @2@ of @3@: @4@**

#### [Description]

could not read file path, read readBytes of (int) SnapBuildOnDiskConstantSize) and the reason for failure also printed along with error. This error can occur during reading statically sized portion of snapshot or reading SnapBuild or during restore running xacts information or during restore committed xacts information.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.64.33 16733

---

**could not read file "@1@", read @2@ of @3@: @4@**

#### [Description]

could not read file , path read readBytes of (uint32) ReplicationSlotOnDiskConstantSize) and the reason for failure also printed along with the error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.64.34 16734

---

**could not read from backend variables file "@1@": @2@**

#### [Description]

could not read from backend variables file id and strerror(errno).

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.64.35 16735

---

**could not read from file "@1@": read @2@ instead of @3@ bytes**

#### [Description]

could not read from file path: read readBytes instead of (int32) sizeof(LogicalRewriteMappingData) bytes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.36 16736

---

**could not read from log segment @1@, offset @2@, length @3@: @4@**

[Description]

could not read from log segment XLogFileNameP(curFileTimeLine, sendSegNo), offset sendOff, length (unsigned long) segbytes) and the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.37 16737

---

**could not read from log segment @1@, offset @2@: @3@**

[Description]

could not read from log segment fname, offset readOff and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.38 16738

---

**could not read from reorderbuffer spill file: @1@**

[Description]

could not read from reorderbuffer spill file and the reason for failure also be printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.39 16739

---

**could not read from reorderbuffer spill file: read @1@ instead of @2@ bytes**

[Description]

could not read from reorderbuffer spill file: read readBytes instead of (uint32) sizeof(ReorderBufferDiskChange) bytes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.40 16740

---

**could not read from tuplestore temporary file: @1@**

[Description]

could not read from tuplestore temporary file and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.41 16741

---

**could not read time zone file "@1@": @2@**

[Description]

could not read time zone file filename and the reason for failure also be printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.42 16742

---

**could not receive timeline history file from "the primary server: @1@**

[Description]

could not receive timeline history file from "the primary server:PQerrorMessage(streamConn).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.43 16743

---

**could not remove directory "@1@"**

[Description]

could not remove directory tmppath.If removing the directory fails, the worst thing that will happen is that the user won't be able to create a new slot with the same name until the next server restart.we crashed while a slot was being setup or deleted, clean up.If we crashed with an ephemeral slot active, don't restore but delete it.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.44 16744

---

### could not remove shared memory segment "@1@": @2@

[Description]

could not remove shared memory segment name and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.45 16745

---

### could not link file "@1@" to "@2@" (initialization of log file): @3@

[Description]

could not link file tmpopath to path (initialization of log file) and reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.46 16746

---

### could not resize shared memory segment "@1@" to @2@ bytes: @3@

[Description]

could not resize shared memory segment name to request\_size bytes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.47 16747

---

### Could not resolve client IP address to a host name: @1@

[Description]

Could not resolve client IP address to a host name gai\_strerror(port->remote\_hostname\_errcode).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.48 16748

---

### could not restore file "@1@" from archive: @2@

[Description]

could not restore file xlogfname from archive: Returns a human-readable string explaining the reason a child process terminated by taking the argument as rc.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.49 16749

---

### could not search LDAP for filter "@1@" on server "@2@" : @3@

[Description]

could not search LDAP for filter filter on server port->hba->ldapservers: ldap\_err2string(return value of ldap\_search\_s).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.50 16750

---

### could not seek in log file @1@ to offset @2@: @3@

[Description]

could not seek in log file XLogFileNameP(ThisTimeLineID, openLogSegNo) to offset startoffset and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.51 16751

---

### could not seek in log segment @1@ to offset @2@: @3@

[Description]

could not seek in log segment fname to offset readOff: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.52 16752

---

### could not seek in tuplestore temporary file: @1@

[Description]

could not seek in tuplestore temporary file and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.53 16753

---

### could not seek to beginning of file "@1@": @2@

[Description]

could not seek to beginning of file path and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.54 16754

---

### could not send end-of-streaming message to primary: @1@

[Description]

could not send end-of-streaming message to primary: PQerrorMessage(streamConn).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.55 16755

---

### could not set LDAP protocol version: @1@

[Description]

could not set LDAP protocol version: ldap\_err2string(return value of ldap\_set\_option).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.56 16756

---

**could not set socket to nonblocking mode: @1@**

[Description]

could not set socket to nonblocking mode: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.57 16757

---

**could not set socket to nonblocking mode: @1@**

[Description]

could not set socket to nonblocking mode: SOCK\_STRERROR(SOCK\_ERRNO, sebuf, sizeof(sebuf)).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.58 16758

---

**could not set variable "@1@"**

[Description]

could not set variable varname.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.59 16759

---

**could not start LDAP TLS session: @1@**

[Description]

could not start LDAP TLS session: ldap\_err2string(return value of \_ldap\_start\_tls\_sA).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.60 16760

---

---

### could not stat control file "@1@": @2@

#### [Description]

could not stat control file XLOG\_CONTROL\_FILE and reason for failure also printed along with the error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.64.61 16761

---

### could not stat file or directory "@1@": @2@

#### [Description]

could not stat file or directory path/TABLESPACE\_VERSION\_DIRECTORY :the reason for failure printed along with the error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.64.62 16762

---

### could not stat file "@1@": @2@

#### [Description]

could not stat file options->file, strerror(errno).

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.64.63 16763

---

### could not stat shared memory segment "@1@": @2@

#### [Description]

could not stat shared memory segment name:the reason for failure also printed along with the error.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.64.64 16764

---

### could not stat trigger file "@1@": @2@

[Description]

Check to see whether the user-specified trigger file exists and whether a promote request has arrived. If either condition holds, return true.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.65 16765

---

### Could not translate client host name "@1@" to IP address: @2@

[Description]

could not translate the client host name to ip address.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.66 16766

---

### could not truncate file "@1@" to @2@: @3@

[Description]

Truncate all data that's not guaranteed to have been safely fsynced (by previous record or by the last checkpoint).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.67 16767

---

### could not unmap shared memory segment "@1@": @2@

[Description]

could not unmap shared memory segment name: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.68 16768

---

### could not write to COPY program: @1@

[Description]

could not write to COPY program: the reason for failure is printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.69 16769

---

### could not write to data file for XID @1@: @2@

[Description]

could not write to data file for XID txn->xid) and the reason for failure is also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.70 16770

---

### could not write to file "@1@", wrote @2@ of @3@: @4@

[Description]

could not write to file src->path, wrote written of len: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.71 16771

---

### could not write to log file @1@ at offset @2@, length @3@: @4@

[Description]

could not write to log file XLogFileNameP(ThisTimeLineID, openLogSegNo) at offset openLogOff length nbytes: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.72 16772

---

### could not write to log segment @1@ at offset @2@, length @3@: @4@

[Description]

if write didn't set errno, assume no disk space

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.73 16773

---

### could not write to the communication channel: @1@

[Description]

- 1.This function is executed in the worker process.It sends a message to the master on the communication channel.
- 2.This function is executed in the master process.It sends a message to a certain worker on the communication channel.If we're already aborting anyway, don't care if we succeed or not.The child might have gone already.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.74 16774

---

### could not write to tuplestore temporary file: @1@

[Description]

could not write to tuplestore temporary file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.75 16775

---

### database connection requirement not indicated during registration

[Description]

This flag means the bgworker requires a database connection. The connection is not established automatically; the worker must establish it later.It requires that BGWORKER\_SHMEM\_ACCESS was passed too.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.76 16776

---

---

**database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database "@1@"****[Description]**

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database Execute a database-wide VACUUM in that database You might also need to commit or roll back old prepared transactions

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.64.77 16777**

---

**database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database with OID****[Description]**

Execute a database-wide VACUUM in that database. You might also need to commit or roll back old prepared transactions.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.64.78 16778**

---

**database "@1@" is used by a logical replication slot****[Description]**

Check whether there are, possibly unconnected, logical slots that refer to the to-be-dropped database. The database lock we are holding prevents the creation of new slots using the database. `ReplicationSlotsCountDBSlots -- count the number of slots that refer to the passed database oid. Returns true if there are any slots referencing the database. *nslots will be set to the absolute number of slots in the database, *nactive to ones currently active.`

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.64.79 16779**

---

**date field value out of range: @1@-@2@-@3@****[Description]**

date field value out of range Note: we'll reject zero or negative year values. Perhaps negativesshould be allowed to represent BC years?

**[System Processing]**

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.80 16780

---

### **date out of range: @1@-@2@-@3@**

[Description]

date out of rangeNote: we'll reject zero or negative year values. Perhaps negativesshould be allowed to represent BC years?

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.81 16781

---

### **DECLARE CURSOR WITH HOLD ... @1@ is not supported**

[Description]

DECLARE CURSOR WITH HOLD is not supported .FOR UPDATE and WITH HOLD are not compatible

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.82 16782

---

### **DECLARE INSENSITIVE CURSOR ... @1@ is not supported**

[Description]

DECLARE INSENSITIVE CURSOR is not supportedFOR UPDATE and INSENSITIVE are not compatible

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.83 16783

---

### **DECLARE SCROLL CURSOR ... @1@ is not supported**

[Description]

DECLARE SCROLL CURSOR is not supportedFOR UPDATE and SCROLL are not compatible

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.84 16784

---

### **ECDH: could not create key**

[Description]

ECDH: could not create key

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.85 16785

---

### **ECDH: unrecognized curve name: @1@**

[Description]

ECDH: unrecognized curve name

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.86 16786

---

### **enum label "@1@" already exists**

[Description]

Check if label is already in use. The unique index on pg\_enum would catch this anyway, but we prefer a friendlier error message, and besides we need a check to support IF NOT EXISTS.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.87 16788

---

### **error processing a parallel work item**

[Description]

error processing a parallel work itemIt looks for an idle worker process and only returns if there is one.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.88 16789

---

### error reading result of streaming command: @1@

[Description]

error reading result of streaming command

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.89 16790

---

### event trigger functions cannot have declared arguments

[Description]

event trigger functions cannot have declared arguments shouldn't be any declared arguments

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.90 16791

---

### event trigger name cannot be qualified

[Description]

event trigger name cannot be qualified The types of names handled by this function are not permitted to be schema-qualified or catalog-qualified.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.91 16792

---

### event trigger "@1@" already exists

[Description]

An event trigger of same name is already exist

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.92 16793

---

### event triggers are not supported for @1@

[Description]

Validate DDL command tags.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.93 16794

---

### event trigger "@1@" does not exist

[Description]

event trigger does not exist.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.94 16795

---

### event trigger "@1@" does not exist, skipping

[Description]

Generate a NOTICE stating that the named object was not found, and is being skipped. This is only relevant when "IF EXISTS" is used; otherwise, `get_object_address()` in `RemoveObjects` would have thrown an ERROR.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.64.95 16796

---

### event trigger with OID @1@ does not exist

[Description]

event trigger with OID does not exist

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.64.96 16797

---

**exceeded maxAllocatedDescs (@1@) while trying to execute command "@2@\**

[Description]

exceeded maxAllocatedDescs while trying to execute command

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.64.97 16798

---

**Expected 1 tuple with 2 fields, got @1@ tuples with @2@ fields.**

[Description]

Expected 1 tuple with 2 fields

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.64.98 16799

---

**Expected array element or "]", but found "@1@\**

[Description]

The context of the parser is maintained by the recursive descent mechanism, but is passed explicitly to the error reporting routine for better diagnostics.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65 Message Numbers Beginning with 16800

---

---

### 2.65.1 16800

---

**Expected a transaction log switchpoint location.**

[Description]

Expected a transaction log switchpoint location.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.2 16801

---

### Expected ":", but found "@1@"

[Description]

invalid input syntax for type json The context of the parser is maintained by the recursive descent mechanism, but is passed explicitly to the error reporting routine for better diagnostics.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.3 16802

---

### extended query protocol not supported in a replication connection

[Description]

'firstchar' specifies what kind of a forbidden message was received, and is used to construct the error message.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.4 16803

---

### fastpath function calls not supported in a replication connection

[Description]

'firstchar' specifies what kind of a forbidden message was received, and is used to construct the error message.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.5 16804

---

### field name must not be null

[Description]

If function is not marked "proisstrict" in pg\_proc, it must check for null arguments using this macro. Do not try to GETARG a null argument!

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.6 16805

---

### **FILTER is not implemented for non-aggregate window functions**

[Description]

FILTER is not yet supported with true window functions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.7 16806

---

### **filters not supported in LDAP URLs.**

[Description]

filters not supported in LDAP URLs.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.8 16807

---

### **FILTER specified, but @1@ is not an aggregate function**

[Description]

FILTER specified, but the function is not an aggregate function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.9 16808

---

### **filter value "@1@" not recognized for filter variable "@2@"**

[Description]

Validate DDL command tags

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.10 16809

---

### filter variable "@1@" specified more than once

[Description]

Complain about a duplicate filter variable.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.11 16810

---

### final function with extra arguments must not be declared STRICT

[Description]

When finalfnExtraArgs is specified, the finalfn will certainly be passed at least one null argument, so complain if it's strict.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.12 16811

---

### first argument of @1@ must be a row type

[Description]

Convenience function to determine whether a type OID represents a "rowtype" type --- either RECORD or a named composite type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.13 16812

---

### FORCE NULL column "@1@" not referenced by COPY

[Description]

Convert FORCE NULL name list to per-column flags, check validity

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.14 16813

---

### foreign key referenced-columns list must not contain duplicates

[Description]

Reject duplicate appearances of columns in the referenced-columns list. Such a case is forbidden by the SQL standard, and even if we thought it useful to allow it, there would be ambiguity about how to match the list to unique indexes (in particular, it'd be unclear which index goes with which FK column).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.15 16814

---

### Foreign tables cannot have constraint triggers.

[Description]

Foreign key table does not contain constraint triggers

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.16 16815

---

### Foreign tables cannot have INSTEAD OF triggers.

[Description]

Foreign tables cannot have INSTEAD OF triggers.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.17 16816

---

### Foreign tables cannot have TRUNCATE triggers.

[Description]

Foreign tables cannot have TRUNCATE triggers.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.18 16817

---

### foreign table "@1@" does not allow deletes

[Description]

foreign table does not allow deletes

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.19 16818

---

### foreign table "@1@" does not allow inserts

[Description]

foreign table does not allow inserts

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.20 16819

---

### foreign table "@1@" does not allow updates

[Description]

foreign table \"%s\" does not allow updates

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.21 16820

---

### foreign table "@1@" does not exist, skipping

[Description]

the foreign table is not existing.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.22 16821

---

### format specifies argument 0, but arguments are numbered from 1

#### [Description]

Explicit 0 for argument index is immediately refused

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.23 16822

---

### function returning record called in context that cannot accept type record

#### [Description]

- 1.failed to determine actual type of RECORDfunction returning record called in context that cannot accept type record
- 2.get the tupdesc from the result set info - it must be a record typebecause we already checked that arg1 is a record type, or we're in ato\_record function which returns a setof record.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.24 16823

---

### function @1@ must accept VARIADIC ANY to be used in this aggregate

#### [Description]

If the agg is declared to take VARIADIC ANY, the underlying functions had better be declared that way too, else they may receive too many parameters; but func\_get\_detail would have been happy with plain ANY.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.25 16824

---

### function "@1@" must return type "event\_trigger"

#### [Description]

Find and validate the trigger function.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.26 16825

---

### hot standby is not possible because wal\_level was not set to "hot\_standby" or higher on the master server

#### [Description]

For Hot Standby, the WAL must be generated with 'hot\_standby' mode, and we must have at least as many backend slots as the primary.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.27 16826

---

### huge pages not supported on this platform

#### [Description]

huge pages not supported on this platform if the value is 1

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.28 16827

---

### huge TLB pages not supported on this platform

#### [Description]

huge pages not supported on this platform if the value is 1

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.29 16829

---

### index row size @1@ exceeds hash maximum @2@

#### [Description]

Check whether the item can fit on a hash page at all. (Eventually, we ought to try to apply TOAST methods if not.) Note that at this point, itemsz doesn't include the ItemId.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.30 16830

---

### index row size @1@ exceeds maximum @2@ for index "@3@"

#### [Description]

If the tuple would be too big to be stored, function throws a suitable error if errorTooBig is TRUE, or returns NULL if errorTooBig is FALSE.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.31 16831

---

### index "@1@" cannot be used as replica identity because column "@2@" is nullable

#### [Description]

Check index for nullable columns.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.32 16832

---

### index "@1@" contains a half-dead internal page

#### [Description]

Pre-9.4 page deletion only marked internal pages as half-dead, but now we only use that flag on leaf pages.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.33 16833

---

### interval time zone "@1@" must not include months or days

#### [Description]

##### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.34 16834

---

### interval units "@1@" not supported because months usually have fractional weeks

[Description]

default condition of the switch statement with condition val

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.35 16835

---

### invalid backup block size in record at @1 @/@2 @

[Description]

Add in the backup blocks, if any

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.36 16836

---

### invalid contrecord length @1 @ at @2 @/@3 @

[Description]

Cross-check that xlp\_rem\_len agrees with how much of the record we expect there to be left.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.37 16837

---

### invalid flags for opening a large object: @1 @

[Description]

Large object descriptor, appropriately filled in. The descriptor and subsidiary data are allocated in the specified memory context, which must be suitably long-lived for the caller's purposes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.38 16838

---

### invalid info bits @1 @ in log segment @2 @, offset @3 @

[Description]

All defined flag bits in xlp\_info (used for validity checking of header)

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.39 16839

---

### invalid input syntax for numeric time zone: "@1@"

[Description]

Note pg\_tzset happily parses numeric input that DecodeTimezone would reject. To avoid having it accept input that would otherwise be seen as invalid, it's enough to disallow having a digit in the first position of our input string.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.40 16840

---

### invalid input syntax for type json

[Description]

Per RFC4627, these characters MUST be escaped. Since \*s isn't printable, exclude it from the context string.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.41 16841

---

### invalid input syntax for type pg\_lsn: "@1@"

[Description]

Sanity check input format.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.42 16842

---

### invalid large object write request size: @1@

[Description]

the addition in the condition can't overflow because nbytes is only int32

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.43 16843

---

### invalid line number: @1@

[Description]

validating the line number.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.44 16844

---

### invalid line specification: A and B cannot both be zero

[Description]

invalid line specification: A and B cannot both be zero

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.45 16845

---

### invalid line specification: must be two distinct points

[Description]

invalid line specification: must be two distinct points

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.46 16846

---

### invalid locale name: "@1@"

[Description]

Check that the chosen locales are valid, and get canonical spellings

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.47 16847

---

**invalid magic number @1@ in log segment @2@, offset @3@**

[Description]

invalid magic number in log segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.48 16848

---

**invalid message received from worker: @1@**

[Description]

Invalid message received from worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.49 16849

---

**invalid MultiXactId: @1@**

[Description]

No work except at first MultiXactId of a page. But beware: just after wraparound, the first MultiXactId of page zero is FirstMultiXactId.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.50 16850

---

**invalid page in block @1@ of relation @2@**

[Description]

verifying the page in block of relations

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.51 16851

---

### invalid page in block @1@ of relation @2@; zeroing out page

[Description]

invalid page in block of relation, zeroing out page

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.52 16852

---

### invalid processing mode in background worker

[Description]

it had better not gotten out of "init" mode yet

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.53 16853

---

### invalid scale in external "numeric" value

[Description]

invalid scale in external

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.54 16854

---

### invalid timeline @1@

[Description]

invalid timeline

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.55 16855

---

### invalid value for "buffering" option

[Description]

Validator for "buffering" relopion on GiST indexes. Allows "on", "off"and "auto" values.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.56 16856

---

### invalid value for "check\_option" option

[Description]

Validator for "check\_option" relopion on views. The allowed values are "local" and "cascaded".

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.57 16857

---

### invalid value for parameter "replication"

[Description]

Try to interpret value as boolean value. Valid values are: true,false, yes, no, on, off, 1, 0; as well as unique prefixes thereof.If the string parses okay, return true, else false. If okay and result is not NULL, return the value in \*result.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.58 16858

---

### invalid value for recovery parameter "recovery\_target"

[Description]

the recovery parameter name should be "recovery\_target" and the recovery parameter value should be "immediate" .

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.59 16859

---

**invalid value "@1@" for "@2@"**

[Description]

1. checking if the parsed character is greater than 0 and that parsed character is less than required.
2. check if the source is equal to init
3. if the length is not valid

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.60 16860

---

**invalid whence setting: @1@**

[Description]

Note: overflow in the additions is possible, but since we will reject negative results, we don't need any extra test for that.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.61 16861

---

**JSON does not support infinite date values.**

[Description]

XSD doesn't support infinite values. Infinity and minus infinity must be the max and min values of DateADT. We could use INT\_MIN and INT\_MAX here, but seems better to not assume that int32 == int.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.62 16862

---

**JSON does not support infinite timestamp values**

[Description]

XSD doesn't support infinite values

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.63 16863

---

### Junk after closing right brace

[Description]

only whitespace is allowed after the closing brace. We used to use `isspace()` for parsing array values, but that has undesirable results: an array value might be silently interpreted differently depending on the locale setting. Now we just hard-wire the traditional ASCII definition of `isspace()`.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.64 16864

---

### Junk view columns are not updatable

[Description]

the only updatable columns we support are those that are Vars referring to user columns of the underlying base relation. The view targetlist may contain resjunk columns (e.g., a view defined like "SELECT \* FROM t ORDER BY a +b" is auto-updatable) but such columns are not auto-updatable, and in fact should never appear in the outer query's targetlist.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.65 16865

---

### large object read request is too large

[Description]

A `result_length` calculated from `loSize` may not fit in a `size_t`. Check that the size will satisfy this and subsequently-enforced size limits.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.66 16866

---

### LIKE is not supported for creating foreign tables

[Description]

we could support LIKE in many cases, but worry about it another day

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.67 16867

---

### lock file "@1@" is empty

[Description]

Either another server is starting, or the lock file is the remnant of a previous server startup crash.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.68 16868

---

### logical decoding cannot be used while in recovery

[Description]

We check shared state each time only until we leave recovery mode. We can't re-enter recovery, so there's no need to keep checking after the shared variable has once been seen false. Note: We don't need a memory barrier when we're still in recovery. We might exit recovery immediately after return, so the caller can't rely on 'true' meaning that we're still in recovery anyway.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.69 16869

---

### logical decoding requires a database connection

[Description]

Make sure the current settings & environment are capable of doing logical decoding.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.70 16870

---

### logical decoding requires wal\_level >= logical

[Description]

Make sure the current settings & environment are capable of doing logical decoding.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.71 16871

---

### [io\\_lseek result out of range for large-object descriptor @1@](#)

[Description]

guard against result overflow

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.72 16872

---

### [io\\_tell result out of range for large-object descriptor @1@](#)

[Description]

guard against result overflow

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.73 16873

---

### [malformed range literal: "@1@"](#)

[Description]

first check for the empty range and then the rest should be whitespace. and then check if the string is not null terminated

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.74 16874

---

### [materialized views may not be defined using bound parameters](#)

[Description]

A materialized view would either need to save parameters for use in maintaining/loading the data or prohibit them entirely. The latter seems safer and more sane.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.75 16875

---

### materialized views must not use data-modifying statements in WITH

[Description]

Prohibit a data-modifying CTE in the query used to create a materialized view. It's not sufficiently clear what the user would want to happen if the MV is refreshed or incrementally maintained.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.76 16876

---

### materialized views must not use temporary tables or views

[Description]

Check whether any temporary database objects are used in the creation query. It would be hard to refresh data or incrementally maintain it if a source disappeared.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.77 16877

---

### mismatched array dimensions

[Description]

take separate key and value arrays of text to construct a json object pairwise.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.78 16878

---

### Missing array dimension value

[Description]

Missing array dimension value

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.79 16879

---

### more than one row returned for \gset

[Description]

StoreQueryTuple: assuming query result is OK, save data into variables

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.80 16880

---

### moving-aggregate implementation returns type @1@, but plain implementation returns type @2@

[Description]

check if the moving-aggregate implementation returns type is not same as that of plain implementation returns type

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.81 16881

---

### moving-aggregate transition function must not return null

[Description]

Moving-aggregate transition functions must not return null, for more see `advance_windowaggregate_base()`.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.82 16882

---

### Multidimensional arrays must have sub-arrays with matching dimensions

[Description]

Multidimensional arrays must have sub-arrays with matching dimensionsArrayCount will Determines the dimensions for an array string.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.83 16883

---

### multiple column definition lists are not allowed for the same function

[Description]

check if the codelist and the range functions codelist ie., the multiple column definition list for the same function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.84 16884

---

### MultiXactId @1@ does no longer exist -- apparent wraparound

[Description]

MultiXactId does no longer exist -- apparent wraparound

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.85 16885

---

### MultiXactId @1@ has not been created yet -- apparent wraparound

[Description]

MultiXactId has not been created yet -- apparent wraparound

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.86 16886

---

### must be owner of event trigger @1@

[Description]

the MAX\_ACL\_KIND object types that can have privilege errors

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.87 16887

---

### must be superuser or replication role to start walsender

[Description]

Check replication permissions needed for walsender processes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.88 16888

---

### must be superuser or replication role to use replication slots

[Description]

must be superuser or replication role to use replication slots

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.89 16889

---

### must be superuser to alter settings globally

[Description]

Must be superuser to alter settings globally.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.65.90 16890

---

### must be superuser to COPY to or from an external program

[Description]

Disallow COPY to/from file or program except to superusers.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.91 16891

---

### Must be superuser to create an event trigger

[Description]

It would be nice to allow database owners or even regular users to do this, but there are obvious privilege escalation risks which would have to somehow be plugged first.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.92 16892

---

### must be superuser to execute ALTER SYSTEM command

[Description]

must be superuser to execute ALTER SYSTEM command

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.93 16894

---

### new data for "@1@" contains duplicate rows without any null columns

[Description]

Note that this ereport() is returning data to the user. Generally, we would want to make sure that the user has been granted access to this data. However, REFRESH MAT VIEW is only able to be run by the owner of the mat view (or a superuser) and therefore there is no need to check for access to data in the mat view.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.94 16895

---

### new row violates WITH CHECK OPTION for view "@1@"

[Description]

WITH CHECK OPTION checks are intended to ensure that the new tuple is visible in the view. If the view's qual evaluates to NULL, then the new tuple won't be included in the view. Therefore we need to tell ExecQual to return FALSE for NULL (the opposite of what we do above for CHECK constraints).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.95 16896

---

### no Decimal attribute in module

[Description]

the module is not contain any Decimal attribute.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.96 16897

---

### no matching relations in tablespace "@1@" found

[Description]

there is no matching relations in tablespace.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.97 16898

---

### no rows returned for \gset

[Description]

StoreQueryTuple: assuming query result is OK, save data into variables Returns true if successful, false otherwise.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.65.98 16899

---

### not enough arguments for cursor "@1@"

[Description]

check the syntax immediately, instead of checking the final expression that may have the arguments reordered. Trailing whitespace must not be trimmed, because otherwise input of the form (param -- comment\n, param) would be translated into a form where the second parameter is commented out.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66 Message Numbers Beginning with 16900

---

### 2.66.1 16900

---

#### not enough shared memory for data structure "@1@" (@2@ bytes requested)

[Description]

If the shmem index doesn't exist, we are bootstrapping: we must be trying to init the shmem index itself. Notice that the ShmemIndexLock is released before the shmem index has been initialized. This should be OK because no other process can be accessing shared memory yet.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.66.2 16901

---

#### not enough shared memory for elements of data structure "@1@" (@2@ bytes requested)

[Description]

not enough shared memory for elements of data structure

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.66.3 16902

---

#### null value not allowed for object key

[Description]

null value not allowed for object key

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.4 16903

---

### number is out of range

#### [Description]

check if the number is coming out of range ie.,in between 0 and 9.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.5 16904

---

### number of jsonb array elements exceeds the maximum allowed (@1@)

#### [Description]

number of jsonb array elements exceeds the maximum allowed

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.6 16905

---

### number of jsonb object pairs exceeds the maximum allowed (@1@)

#### [Description]

number of jsonb object pairs exceeds the maximum allowed

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.7 16906

---

### number of parameters must be between 0 and 65535

#### [Description]

number of parameters must be between 0 and 65535

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.8 16907

---

---

### **Numeric time zones must have "-" or "+" as first character.**

#### [Description]

The starting character of the numeric time zone should not digit.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.66.9 16908**

---

### **numeric time zone "@1@" out of range**

#### [Description]

DecodeTimezone()-Interpret string as a numeric timezone. Return 0 if okay (and set \*tzip), a DTERR code if not okay.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.66.10 16909**

---

### **Object keys should be text**

#### [Description]

If function is not marked "proisstrict" in pg\_proc, it must check for null arguments using this macro. Do not try to GETARG a null argument!

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.66.11 16910**

---

### **only ordered-set aggregates can be hypothetical**

#### [Description]

Symbolic values for aggkind column. We distinguish normal aggregates from ordered-set aggregates (which have two sets of arguments, namely direct and aggregated arguments) and from hypothetical-set aggregates (which are a subclass of ordered-set aggregates in which the last direct arguments have to match up in number and datatypes with the aggregated arguments).

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.12 16911

---

### only tables, indexes, and materialized views exist in tablespaces

[Description]

only tables, indexes, and materialized views exist in tablespaces

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.13 16912

---

### operator not allowed in variable definition

[Description]

operator not allowed in variable definition

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.14 16913

---

### option --if-exists requires option -c/--clean

[Description]

option --if-exists requires option -c/--clean

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.15 16914

---

### outer-level aggregate cannot contain a lower-level variable in its direct arguments

[Description]

Now check for vars/aggs in the direct arguments, and throw error if needed. Note that we allow a Var of the agg's semantic level, but not an Agg of that level. In principle such Aggs could probably be supported, but it would create an ordering dependency among the aggregates at execution time. Since the case appears neither to be required by spec nor particularly useful, we just treat it as a nested-aggregate situation.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.16 16915

---

### out-of-sequence timeline ID @1@ (after @2@) in log segment @3@, offset @4@

#### [Description]

Since child timelines are always assigned a TLI greater than their immediate parent's TLI, we should never see TLI go backwards across successive pages of a consistent WAL sequence.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.17 16916

---

### OVER is not supported for ordered-set aggregate @1@

#### [Description]

window functions must be called with a window definition.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.18 16917

---

### page verification failed, calculated checksum @1@ but expected @2@

#### [Description]

Throw a WARNING if the checksum fails, but only after we've checked for the all-zeroes case.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.19 16918

---

### parallel backup only supported by the directory format

#### [Description]

Parallel backup only in the directory archive format so far

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.20 16919

---

### parameter "@1@" requires a temporal value

#### [Description]

parameter recovery\_min\_apply\_delay requires a temporal value

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.21 16920

---

### percentile value @1@ is not between 0 and 1

#### [Description]

percentile value should be in between 0 and 1.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.22 16921

---

### permission denied for event trigger @1@

#### [Description]

the no\_priv\_msg array object is ACL\_KIND\_EVENT\_TRIGGER

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.23 16922

---

### permission denied to change owner of event trigger "@1@"

#### [Description]

New owner must be a superuser

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.24 16923

---

---

### permission denied to create event trigger "@1@"

#### [Description]

It would be nice to allow database owners or even regular users to do this, but there are obvious privilege escalation risks which would have to somehow be plugged first.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.25 16924

---

### pg\_largeobject entry for OID @1@, page @2@ has invalid data field size @3@

#### [Description]

the size of the data field of pg\_largeobject entry is less than 0 or greater than LOBLKSIZE.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.26 16926

---

### range constructor flags argument must not be null

#### [Description]

range constructor flags argument must not be null

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.27 16927

---

### relation "@1@" in @2@ clause not found in FROM clause

#### [Description]

the list cell is NULL for ensuring the SQL row locking clause such as FOR UPDATE is not found in FROM clause

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.28 16928

---

### removing elements from multidimensional arrays is not supported

[Description]

We can't remove elements from multi-dimensional arrays, since the result might not be rectangular.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.29 16929

---

### renaming an ON SELECT rule is not allowed

[Description]

We disallow renaming ON SELECT rules, because they should always be named "\_RETURN".

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.30 16930

---

### replication slot file @1@: checksum mismatch, is @2@, should be @3@

[Description]

verify the CRCs.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.31 16931

---

### replication slot file "@1@" has corrupted length @2@

[Description]

boundary check on length

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.32 16932

---

### replication slot file "@1@" has unsupported version

[Description]

verify version

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.33 16933

---

### replication slot file "@1@" has wrong magic @2@ instead of @3@

[Description]

verify magic

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.34 16934

---

### replication slot name "@1@" contains invalid character

[Description]

Replication slot names may only contain letters, numbers, and the underscore character

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.35 16935

---

### replication slot name "@1@" is too long

[Description]

Maximum length for identifiers (e.g. table names, column names, function names). Names actually are limited to one less byte than this, because the length must include a trailing zero byte.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.36 16936

---

### replication slot name "@1@" is too short

[Description]

Check whether the passed slot name is valid and report errors at elevel.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.37 16937

---

**Replication slot names may only contain letters, numbers, and the underscore character.**

[Description]

Replication slot names may only contain letters, numbers, and the underscore character.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.38 16938

---

**replication slot "@1@" already exists**

[Description]

Check for name collision, and identify an allocatable slot. We need to hold ReplicationSlotControlLock in shared mode for this, so that nobody else can change the in\_use flags while we're looking at them.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.39 16939

---

**replication slots can only be used if max\_replication\_slots > 0.**

[Description]

replication slots can only be used if max\_replication\_slots > 0

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.40 16940

---

**replication slots can only be used if wal\_level >= archive**

[Description]

replication slots can only be used if wal\_level >= archive

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.41 16941

---

### replication slot "@1@" does not exist

[Description]

replication slot does not exist

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.42 16942

---

### replication slot "@1@" is already active

[Description]

replication slot is already active

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.43 16943

---

### replication slot "@1@" was not created in this database

[Description]

replication slot was not created in this database

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.44 16944

---

### requested character not valid for encoding: @1@

[Description]

requested character not valid for encoding

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.45 16945

---

**requested starting point @1 @/@2@ is ahead of the WAL flush position of this server @3 @/@4@**

[Description]

requested starting point is ahead of the WAL flush position of this server

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.46 16946

---

**requested starting point @1 @/@2@ on timeline @3@ is not in this server's history**

[Description]

requested starting point on timeline is not in this server's history

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.47 16947

---

**requested timeline @1 @ does not contain minimum recovery point @2 @/@3@ on timeline @4@**

[Description]

requested timeline does not contain minimum recovery point on timeline

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.48 16948

---

**requested timeline @1 @ is not a child of this server's history**

[Description]

requested timeline is not a child of this server's history

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.49 16949

---

**requested timeline @1@ is not in this server's history**

[Description]

requested timeline is not in this server's history

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.50 16950

---

**RETURNING list entry has type @1@, but column has type @2@.**

[Description]

RETURNING list entry and column are of different types.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.51 16951

---

**RETURNING must have at least one column**

[Description]

RETURNING must have at least one column.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.52 16952

---

**return type of inverse transition function @1@ is not @2@**

[Description]

return type of inverse transition function must exactly match declared mtranstype

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.53 16953

---

### row is too big: size @1 @, maximum size @2 @

[Description]

row is too big.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.54 16954

---

### ROWS FROM() with multiple functions cannot have a column definition list

[Description]

ROWS FROM() with multiple functions cannot have a column definition list

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.55 16955

---

### rules on materialized views are not supported

[Description]

rules on materialized views are not supported

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.56 16956

---

### @1 @ cannot be applied to a function

[Description]

cannot be applied to a function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.57 16957

---

---

### @1@ cannot be applied to a join

[Description]

cannot be applied to a join

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.58 16958

---

### @1@ cannot be applied to a WITH query

[Description]

cannot be applied to a WITH query

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.59 16959

---

### @1@ cannot be applied to the nullable side of an outer join

[Description]

cannot be applied to the nullable side of an outer join

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.60 16960

---

### @1@ cannot be applied to VALUES

[Description]

cannot be applied to VALUES

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.61 16961

---

### @1@: cannot cluster specific table(s) in all databases

[Description]

cannot cluster specific table(s) in all databases

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.62 16962

---

**@1@: cannot reindex specific index(es) and system catalogs at the same time**

[Description]

cannot reindex specific index(es) and system catalogs at the same time

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.63 16963

---

**@1@: cannot reindex specific index(es) in all databases**

[Description]

cannot reindex specific index(es) in all databases

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.64 16964

---

**@1@: cannot reindex specific table(s) and system catalogs at the same time**

[Description]

cannot reindex specific table(s) and system catalogs at the same time

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.66.65 16965

---

**@1@: cannot reindex specific table(s) in all databases**

[Description]

cannot reindex specific table(s) in all databases

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.66 16966

---

**@1@: cannot use --create-slot or --drop-slot together with --startpos**

[Description]

cannot use create-slot or drop-slot together with startpos

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.67 16967

---

**@1@: cannot use --create-slot or --start together with --drop-slot**

[Description]

cannot use create-slot or start-slot together while doing a drop-slot

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.68 16968

---

**@1@: cannot vacuum specific table(s) in all databases**

[Description]

cannot vacuum specific table(s) in all databases

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.69 16969

---

**@1@ can only be called in a sql\_drop event trigger function**

[Description]

can only be called in a sql\_drop event trigger function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.70 16970

---

**@1@: could not access directory "@2@": @3@**

[Description]

Trouble in accessing directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.71 16971

---

**@1@: could not allocate SIDs: error code @2@**

[Description]

could not allocate security identifier(SID) and displays the last error returned by GetLastError().(GetLastError() is a windows specific call which returns one of the 500 System Error Codes)

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.72 16972

---

**@1@: could not change permissions of directory "@2@": @3@**

[Description]

could not change permissions of directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.73 16973

---

**@1@: could not change permissions of "@2@": @3@**

[Description]

Here chmod takes the PGPATH as path and options as S\_IRUSR | S\_IWUSR

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.74 16974

---

**@1@: could not close directory "@2@": @3@**

[Description]

closedir syscall called and errno set accordingly

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.75 16975

---

**@1@: could not create archive status file "@2@": @3@**

[Description]

This open syscall takes a temporary path name and flags O\_WRONLY | O\_CREAT | PG\_BINARY and mode as S\_IRUSR | S\_IWUSR

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.76 16976

---

**@1@: could not create replication slot "@2@": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields**

[Description]

could not create replication slot as rows is not equal to 1 and fields is not greater than or equal to 4

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.77 16977

---

**@1@: could not create symbolic link "@2@": @3@**

[Description]

while creating symbolic path for a Xlog directory or tablespace path

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.78 16978

---

**@1@: could not create timeline history file "@2@": @3@**

[Description]

This open syscall takes a temporary path name and flags O\_WRONLY | O\_CREAT | PG\_BINARY and mode as S\_IRUSR | S\_IWUSR

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.79 16979

---

**@1@: could not drop replication slot "@2@": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields**

[Description]

could not drop replication slot as rows and fields are not equal to zero

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.80 16980

---

**@1@: could not fetch default options**

[Description]

The function Pqconndefaults() Constructs a default connection options array, which identifies all the available options and shows any default values that are available from the environment etc. On error (eg out of memory), NULL is returned.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.81 16981

---

**@1@: could not find own program executable**

[Description]

find\_my\_exec() finds an absolute path to a valid executable

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.82 16982

---

**@1@: could not fsync file "@2@": @3@**

[Description]

could not fsync file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.83 16983

---

**@1@: could not fsync log file "@2@": @3@**

[Description]

could not fsync Log file.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.84 16984

---

**@1@: could not identify system: got @2@ rows and @3@ fields, expected @4@ rows and @5@ or more fields**

[Description]

Could not identify system as expected number of rows is not equal to 1 and number of fields is not greater than or equal to 3

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.85 16985

---

**@1@: could not locate my own executable path**

[Description]

find\_my\_exec() finds an absolute path to a valid executable

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.86 16986

---

**@1@: could not open directory "@2@": @3@**

[Description]

could not open directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.87 16987

---

**@1@: could not open file "@2@": @3@**

[Description]

could not open file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.88 16988

---

**@1@: could not open log file "@2@": @3@**

[Description]

could not open log file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.89 16989

---

**@1@: could not open timeline history file "@2@": @3@**

[Description]

could not open timeline history file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.90 16990

---

**@1@: could not parse next timeline's starting point "@2@"**

[Description]

could not parse next timeline's starting point

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.91 16991

---

**@1@: could not parse start position "@2@"**

[Description]

could not parse start position

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.92 16992

---

**@1@: could not read directory "@2@": @3@**

[Description]

could not read directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.93 16993

---

**@1@: could not remove promote signal file "@2@": @3@**

[Description]

could not remove promote signal file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.66.94 16994

---

---

**@1@: could not rename file "@2@" to "@3@" : @4@****[Description]**

could not rename file(Here we move the completed history file into place with its final name)

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.66.95 16995**

---

**@1@: could not send copy-end packet: @2@****[Description]**

PQputCopyEnd - send EOF indication to the backend during COPY IN. After calling this, use PQgetResult() to check command completion status. Returns 1 if successful, 0 if data could not be sent (only possible in nonblock mode), or -1 if an error occurs.

pqFlush - send any data waiting in the output buffer. Return 0 on success, -1 on failure and 1 when not all data could be sent because the socket would block and the connection is non-blocking.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.66.96 16996**

---

**@1@: could not stat file "@2@" : @3@****[Description]**

could not stat file

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.66.97 16997**

---

**@1@: could not write timeline history file "@2@" : @3@****[Description]**

This write operation happens whileWriting the history file to pg\_xlog or Writing the history file to disk

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause

## 2.66.98 16998

---

**@1@: could not write @2@ bytes to log file "@3@": @4@**

[Description]

could not write the bytes to log file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.66.99 16999

---

**@1@: directory name too long**

[Description]

directory name too long

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67 Message Numbers Beginning with 17000

---

### 2.67.1 17000

---

**@1@: directory "@2@" does not exist**

[Description]

directory does not exist, The errno ENOENT indicates that component of path does not exist, or path is an empty string.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

### 2.67.2 17001

---

**@1@: directory "@2@" is not a database cluster directory**

[Description]

directory is not a database cluster directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.3 17002

---

### **SELECT rule's target entry @1@ has different column name from column "@2@"cluster directory**

#### [Description]

resname is required to represent the correct column name in non-resjunk entries of top-level SELECT targetlists, since it will be used as the column title sent to the frontend.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.4 17003

---

### **SELECT target entry has type @1@, but column has type @2@.**

#### [Description]

SELECT column does not match target entry

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.5 17004

---

### **ShmemIndex entry size is wrong for data structure "@1@": expected @2@, actual @3@**

#### [Description]

ShmemIndex entry size is wrong for data structure.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.6 17005

---

### **@1@: incompatible server version @2@; client does not support streaming from server versions newer than @3@**

#### [Description]

incompatible server version ,client does not support streaming from server .ServerMajor and maxServerMajor are calculated as follows:(serverMajor = PQserverVersion(conn) / 100 and maxServerMajor = PG\_VERSION\_NUM / 100;)where PG\_VERSION\_NUM is 90401 and PQserverVersion returns the sversion; /\* server version, e.g. 70401 for 7.4.1 \*/

#### [System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.7 17006

---

**@1@: incompatible server version @2@; client does not support streaming from server versions older than @3@**

[Description]

incompatible server version ,client does not support streaming from server .ServerMajor and minServerMajor are calculated as follows;(serverMajor = PQserverVersion(conn) / 100 and minServerMajor = 903;)where PQserverVersion returns the sversion; /\* server version, e.g. 70401 for 7.4.1 \*/

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.8 17007

---

**@1@: incompatible server version @2@**

[Description]

incompatible server version; ServerMajor and maxServerMajor are calculated as follows;(minServerMajor = 903,serverMajor = PQserverVersion(conn) / 100 and maxServerMajor = PG\_VERSION\_NUM / 100;)where PG\_VERSION\_NUM is 90401 and PQserverVersion returns the sversion; /\* server version, e.g. 70401 for 7.4.1 \*/

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.9 17008

---

**@1@: invalid --max-rate unit: "@2@"**

[Description]

after\_num is obtained by passing src string to strtod

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.10 17009

---

**@1@: invalid number of parallel jobs**

[Description]

invalid number of parallel jobs

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.11 17010

---

**@1@: invalid tablespace mapping format "@2@", must be "OLDDIR=NEWDIR"**

[Description]

invalid tablespace mapping format

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.12 17011

---

**@1@: invalid transfer rate "@2@": @3@**

[Description]

invalid transfer rate

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.13 17012

---

**@1@: invalid xlog-method option "@2@", must be "fetch" or "stream"**

[Description]

invalid xlog-method option

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.14 17013

---

**@1@ is not allowed with aggregate functions**

[Description]

The return type of function LCS\_asString is not allowed with aggregate functions. In this error case, the return type of LCS\_asString is "FOR some"

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.15 17014

---

### @1@ is not allowed with DISTINCT clause

[Description]

The return type of function LCS\_asString is not allowed with aggregate functions. In this error case, the return type of LCS\_asString is "FOR some"

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

## 2.67.16 17015

---

### @1@ is not allowed with GROUP BY clause

[Description]

The return string of LCS\_asString() is not allowed with GROUP BY clause

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.17 17016

---

### @1@ is not allowed with HAVING clause

[Description]

The return string of LCS\_asString() is not allowed with HAVING clause

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.18 17017

---

### @1@ is not allowed with set-returning functions in the target list

[Description]

The return string of LCS\_asString() is not allowed with set-returning functions in the target list

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.19 17018

---

### @1@ is not allowed with UNION/INTERSECT/EXCEPT

[Description]

The return string of LCS\_asString() is not allowed with UNION/INTERSECT/EXCEPT

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.20 17019

---

### @1@ is not allowed with window functions

[Description]

The return string of LCS\_asString() is not allowed with window functions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.21 17020

---

### "@1@" is not a materialized view

[Description]

The Relation that is returned by RelationGetRelationName() is not a materialized view

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.22 17021

---

### @1@ is not an ordered-set aggregate, so it cannot have WITHIN GROUP

[Description]

Normal aggregate, so it can't have WITHIN GROUP

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.23 17022

---

**"@1@" is not a table, materialized view, composite type, or foreign table**

[Description]

If the particular relation is not a table, materialized view, composite type, or foreign table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.24 17023

---

**"@1@" is not a table, materialized view, index, or foreign table**

[Description]

The relation returned by the function RelationGetRelationName() is not a table, materialized view, index, or foreign table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.25 17024

---

**"@1@" is not a table, materialized view, or index**

[Description]

The relation is not a table, materialized view, or index

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.26 17025

---

**"@1@" is not a table or materialized view**

[Description]

The relation is not a table or materialized view

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.27 17026

---

**"@1@" is not a table, view, materialized view, composite type, index, or foreign table**

[Description]

The relation is not a table, view, materialized view, composite type, index, or foreign table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.28 17027

---

**"@1@" is not a table, view, materialized view, composite type, or foreign table**

[Description]

The relation is not a table, view, materialized view, composite type, or foreign table.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.29 17028

---

**"@1@" is not a table, view, materialized view, index, or TOAST table**

[Description]

The relation is not a table, view, materialized view, index, or TOAST table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.30 17029

---

**"@1@" is not a table, view, materialized view, index, or TOAST table**

[Description]

The relation is not a table, view, materialized view, index, or TOAST table.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.31 17030

---

### "@1@" is not a table, view, materialized view, sequence, or foreign table

#### [Description]

The relation is not a table, view, materialized view, sequence, or foreign table. Note: Don't allow ALTER TABLE. SET SCHEMA on relations that can't be moved to a different schema, such as indexes and TOAST tables.

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.32 17031

---

### "@1@" is not a table, view, or foreign table

#### [Description]

The relation is not a table, view, or foreign table

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.33 17032

---

### "@1@" is not a table, view, sequence, or foreign table

#### [Description]

The relation is not a table, view, sequence, or foreign table

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.34 17033

---

### @1@ must specify unqualified relation names

#### [Description]

The return type of LCS\_asString() must specify unqualified relation names

#### [System Processing]

Processing will be aborted.

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.35 17034

---

**snapbuild state file @1@: checksum mismatch, is @2@, should be @3@**

[Description]

snapbuild state file : checksum mismatch

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.36 17035

---

**snapbuild state file "@1@" has unsupported version @2@ instead of @3@**

[Description]

snapbuild state file has unsupported version.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.37 17036

---

**snapbuild state file "@1@" has wrong magic @2@ instead of @3@**

[Description]

snapbuild state file has wrong magic number

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.38 17037

---

**@1@: new directory is not an absolute path in tablespace mapping: @2@**

[Description]

new directory is not an absolute path in tablespace mapping

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.39 17038

---

---

**@1@: no database specified****[Description]**

no database specified for the given program name

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.67.40 17039**

---

**@1@: no slot specified****[Description]**

no slot specified for the given program name

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.67.41 17040**

---

**SP-GiST inner tuple size @1@ exceeds maximum @2@****[Description]**

SPGiST leaf tuple carries a datum and a heap tuple TID. Inner tuple should be small enough to fit on a page. Values larger than a buffer page cannot be indexed.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.67.42 17041**

---

**SSL failed to renegotiate connection before limit expired****[Description]**

SSL failed to renegotiate connection before limit expired

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.67.43 17042**

---

**@1@: symlinks are not supported on this platform**

[Description]

symlinks are not supported on this platform . Note : Define to 1 if you have the `symlink' function.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.44 17043

---

### **@1@: transaction log directory location can only be specified in plain mode**

[Description]

transaction log directory location can only be specified in plain mode

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.45 17044

---

### **@1@: transaction log directory location must be an absolute path**

[Description]

transaction log directory location must be an absolute path

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.46 17045

---

### **@1@: transfer rate must be greater than zero**

[Description]

transfer rate must be greater than zero

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.47 17046

---

### **@1@: transfer rate "@2@" exceeds integer range**

[Description]

transfer rate exceeds integer range

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.48 17047

---

### @1@: transfer rate "@2@" is not a valid value

[Description]

transfer rate is not a valid value Note: The second parameter is a out - parameter.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.49 17049

---

### strictness of aggregate's forward and inverse transition functions must match

[Description]

strictness of aggregate's forward and inverse transition functions must match. Note: Insist that forward and inverse transition functions have the same strictness setting. Allowing them to differ would require handling more special cases in advance\_windowaggregate and advance\_windowaggregate\_base, for no discernible benefit. This should have been checked at agg definition time, but we must check again in case either function's strictness property has been changed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.50 17050

---

### string too long to represent as jsonb string

[Description]

string too long to represent as jsonb string. Note :Due to an implementation restriction, jsonb strings cannot exceed 0x0FFFFFFF

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.51 17051

---

### @1@: unexpected response to TIMELINE\_HISTORY command: got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields

[Description]

unexpected response to TIMELINE\_HISTORY command.Note: The response to TIMELINE\_HISTORY is a single row result set with two fields: filename and content

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.52 17052

---

**@1@: unexpected result set after end-of-timeline: got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields**

[Description]

unexpected result set after end-of-timeline

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.53 17053

---

**@1@: WAL streaming can only be used in plain mode**

[Description]

WAL streaming can only be used in plain mode

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.54 17054

---

**system column "@1@" reference in check constraint is invalid**

[Description]

system column reference in check constraint is invalid

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.55 17055

---

**time field value out of range: @1@:@2@:@3@**

[Description]

time field value out of range

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.56 17056

---

### timestamp out of range: @1@-@2@-@3@ @4@:@5@:@6@

[Description]

timestamp out of range

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.57 17057

---

### too many background workers

[Description]

too many background workers

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.58 17058

---

### too many column names were specified

[Description]

too many column names were specified

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.59 17059

---

### too many dynamic shared memory segments

[Description]

too many dynamic shared memory segments

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.60 17060

---

### too many lexemes in thesaurus entry

[Description]

too many lexemes in thesaurus entry. Note: currently, tsearch\_readline can't return lines exceeding 4KB,so overflow of the word counts is impossible.But that may not always be true, so let's check.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.61 17061

---

### too many replication slots active before shutdown

[Description]

too many replication slots active before shutdown

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.62 17062

---

### total size of jsonb array elements exceeds the maximum of @1@ bytes

[Description]

Total size of jsonb array elements exceeds the maximum of 0x0FFFFFFF bytes

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.63 17063

---

### total size of jsonb object elements exceeds the maximum of @1@ bytes

[Description]

total size of jsonb object elements exceeds the maximum of 0x0FFFFFFFbytes

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.64 17064

---

**tuple to be updated was already modified by an operation triggered by the current command**

[Description]

tuple to be updated was already modified by an operation triggered by the current command

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.65 17065

---

**type modifier cannot have ORDER BY**

[Description]

type modifier cannot have ORDER BY

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.66 17066

---

**"TZ"/"tz"/"OF" format patterns are not supported in to\_date**

[Description]

format patterns are not supported in to\_date

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.67 17067

---

**\\u0000 cannot be converted to text.**

[Description]

\\u0000 cannot be converted to text. Note: The function report\_json\_context() reports a CONTEXT line for bogus JSON input.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.68 17068

---

### Unexpected array element.

[Description]

Unexpected array element.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.69 17069

---

### "TZ"/"tz"/"OF" format patterns are not supported in to\_date

[Description]

format patterns are not supported in to\_date Note:The COPY statement should look like "COPY ... FROM stdin;\n"

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.70 17070

---

### unexpected pageaddr @1@/@2@ in log segment @3@, offset @4@

[Description]

unexpected pageaddr in log segment offset

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.71 17071

---

### unexpected previous timeline ID @1@ (current timeline ID @2@) in checkpoint record

[Description]

unexpected previous timeline ID in checkpoint record

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.72 17072

---

### unexpected result after CommandComplete: @1@

[Description]

unexpected result after CommandComplete

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.73 17073

---

### unexpected result set after end-of-streaming

[Description]

unexpected result set after end-of-streaming

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.74 17074

---

### unexpected result status for \watch

[Description]

unexpected result status for \ watch

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.75 17075

---

### unexpected standby message type "@1@", after receiving CopyDone

[Description]

unexpected standby message type ,after receiving CopyDone . Note :If we already received a CopyDone from the frontend, the frontend should not send us anything until we've closed our end of the COPY.XXX: In theory, the frontend could already send the next command before receiving the CopyDone, but libpq doesn't currently allow that.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.76 17076

---

**unexpected timeline ID @1@ in checkpoint record, before reaching minimum recovery point @2@/@3@ on timeline @4@**

[Description]

unexpected timeline ID %u in checkpoint record, before reaching minimum recovery point %X/%X on timeline %u

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.77 17077

---

**unexpected timeline ID @1@ in log segment @2@, offset @3@**

[Description]

unexpected timeline ID in log segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.78 17078

---

**Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8.**

[Description]

Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.79 17079

---

**Unicode high surrogate must not follow a high surrogate.**

[Description]

Unicode high surrogate must not follow a high surrogate.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.80 17080

---

### Unicode low surrogate must follow a high surrogate.

[Description]

Unicode low surrogate must follow a high surrogate.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.81 17081

---

### UNNEST() with multiple arguments cannot have a column definition list

[Description]

UNNEST() with multiple arguments cannot have a column definition list

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.82 17082

---

### unsupported LDAP URL scheme: @1@

[Description]

unsupported LDAP URL scheme

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.83 17083

---

### unsupported Unicode escape sequence

[Description]

unsupported Unicode escape sequence

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.84 17084

---

### unterminated format specifier

[Description]

unterminated format specifier

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.85 17085

---

### UTC timezone offset is out of range.

[Description]

UTC timezone offset is out of range.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.86 17086

---

### variable "@1@" shadows a previously defined variable

[Description]

shadows a previously defined variable

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.87 17087

---

### VARIADIC argument must be an array

[Description]

VARIADIC argument must be an array

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.88 17088

---

---

### **\\watch cannot be used with an empty query**

[Description]

watch cannot be used with an empty query.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.67.89 17089**

---

### **\\watch cannot be used with COPY**

[Description]

watch cannot be used with COPY

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.67.90 17090**

---

### **WHERE CURRENT OF is not supported for this table type**

[Description]

WHERE CURRENT OF is not supported for this table type

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.67.91 17091**

---

### **window functions are not allowed in check constraints**

[Description]

window functions are not allowed in check constraints.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.67.92 17092**

---

### **window functions are not allowed in DEFAULT expressions**

[Description]

window functions are not allowed in DEFAULT expressions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.93 17093

---

### window functions are not allowed in EXECUTE parameters

[Description]

window functions are not allowed in EXECUTE parameters

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.94 17094

---

### window functions are not allowed in functions in FROM

[Description]

window functions are not allowed in functions in FROM

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.95 17095

---

### window functions are not allowed in index expressions

[Description]

window functions are not allowed in index expressions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.67.96 17096

---

### window functions are not allowed in index predicates

[Description]

window functions are not allowed in index predicates

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.67.97 17097

---

### window functions are not allowed in JOIN conditions

[Description]

window functions are not allowed in JOIN conditions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.67.98 17098

---

### window functions are not allowed in @1@

[Description]

window functions are not allowed in expression kind

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.67.99 17099

---

### window functions are not allowed in transform expressions

[Description]

window functions are not allowed in transform expressions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68 Message Numbers Beginning with17100

---

---

### 2.68.1 17100

---

#### window functions are not allowed in trigger WHEN conditions

[Description]

window functions are not allowed in trigger WHEN conditions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.2 17101

---

### window functions are not allowed in window definitions

[Description]

window functions are not allowed in window definitions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.3 17102

---

### window function @1@ cannot have WITHIN GROUP

[Description]

window function cannot have WITHIN GROUP Note:And, per spec, WITHIN GROUP isn't allowed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.4 17103

---

### window function @1@ requires an OVER clause

[Description]

window function requires an OVER clause. Note:True window functions must be called with a window definition.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.5 17104

---

### WITH CHECK OPTION is supported only on automatically updatable views

[Description]

WITH CHECK OPTION is supported only on automatically updatable views

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.6 17105

---

### WITH CHECK OPTION not supported on recursive views

[Description]

WITH CHECK OPTION not supported on recursive views

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.7 17106

---

### WITHIN GROUP is required for ordered-set aggregate @1@

[Description]

WITHIN GROUP is required for ordered-set aggregate

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.8 17107

---

### WITHIN GROUP specified, but @1@ is not an aggregate function

[Description]

WITHIN GROUP specified, but the function is not an aggregate function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.9 17108

---

### WITH ORDINALITY cannot be used with a column definition list

[Description]

WITH ORDINALITY cannot be used with a column definition list

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.10 17109

---

### tablespace encryption algorithm option can not be changed

[Description]

tablespace\_encryption\_algorithm option can not be changed with alter tablespace.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.11 17110

---

### result of USING clause for column "@1@" cannot be cast automatically to type @2@

[Description]

USING clause column value cannot be typecasted automatically to new column type specified.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.12 17111

---

### could not parse contents of file "@1@"

[Description]

Postgresql auto configuration file cannot be parsed

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.13 17114

---

### must be a superuser to cancel superuser query

[Description]

Only super user can execute this function

[System Processing]

processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.14 17115

---

---

**could not change directory to "@1@": @2@****[Description]**

pg\_resetxlog process cannot change the directory

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**@1@: WARNING: cannot create restricted tokens on this platform**

[Description]

Restricted Tokens cannot be created

[System Processing]

WARNING is issued

[Action]

To investigate the cause of the occurrence from the message, and remove cause for the WARNING.

## 2.68.19 17120

---

**@1@: could not open process token: error code @2@**

[Description]

Cannot open the process Token

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.20 17121

---

**@1@: could not allocate SIDs: error code @2@**

[Description]

Cannot allocate the SIDs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.21 17122

---

**@1@: could not create restricted token: error code @2@**

[Description]

Restricted token could not be created

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.22 17123

---

**@1@: could not start process for command "@2@": error code @3@**

[Description]

Process could not be started

[System Processing]

Processing could not be initiated

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.23 17124

---

**@1@: could not re-execute with restricted token: error code @2@**

[Description]

Restricted Token cannot be re-executed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.24 17125

---

**@1@: could not get exit code from subprocess: error code @2@**

[Description]

Cannot exit from the sub process

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.25 17126

---

**user does not exist**

[Description]

user does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.26 17127

---

**user name lookup failure: error code @1@**

[Description]

user does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.27 17128

---

### command not found

[Description]

Command cannot be found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.28 17129

---

### command not executable

[Description]

Command is not executable

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.29 17130

---

### could not determine encoding for codeset "@1@"

[Description]

Corresponding local could not found in PostgreSQL

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.30 17131

---

### could not get junction for "@1@": @2@

[Description]

could not get junction

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.31 17132

---

**could not get junction for "@1@": @2@**

[Description]

could not get junction

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.32 17133

---

**lock violation**

[Description]

Antivirus software or some other similar software has locked the database file

[System Processing]

Process trying to access the file continues and retries after every 30 seconds

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.33 17134

---

**sharing violation**

[Description]

Antivirus software or some other similar software has locked the database file

[System Processing]

Process trying to access the file continues and retries after every 30 seconds

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.34 17135

---

**could not get current working directory: @1@**

[Description]

The current working directory path cannot be found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.35 17136

---

---

### unrecognized error @1@

[Description]

Error could not be recognized

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.36 17138

---

### index row size @1@ exceeds maximum @2@ for index "@3@"

[Description]

The row size of the Index exceeded the maximum limit

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.37 17139

---

### unexpected page type 0x@1@ in BRIN index "@2@" block @3@

[Description]

Unexpected page type in BRIN index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.38 17141

---

### invalid value for "tablespace encryption algorithm" option

[Description]

Value specified for tablespace encryption algorithm is invalid. Acceptable values are \"none\", \"AES128\" and \"AES256\".

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.39 17142

---

### invalid value for "buffering" option

[Description]

Invalid value provided for relopion on buffering of Gist Indexes. Acceptable valid values are \"on\", \"off\", and \"auto\"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.40 17143

---

### cannot access temporary tables during a parallel operation

[Description]

Temporary tables cannot be accessed during parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.41 17144

---

### cannot insert tuples during a parallel operation

[Description]

Tuples cannot be inserted during the parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.42 17146

---

### attempted to delete invisible tuple

[Description]

An attempt has been made to delete an invisible tuple

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.43 17147

---

### cannot update tuples during a parallel operation

[Description]

Tuples cannot be updated during the parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.44 17148

---

### attempted to update invisible tuple

[Description]

An attempt has been made to update an invisible tuple

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.45 17149

---

### could not truncate file "@1@" to @2@: @3@

[Description]

File could not be truncated due to inaccessibility of the file or file's location

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.46 17150

---

### index "@1@" contains a half-dead internal page

[Description]

Index page is corrupted. This is no harm for processes performing searches. This can be fixed by RE-INDEXING.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.47 17151

---

### sample percentage must be between 0 and 100

[Description]

Sample percentage for sample scan must be between 0 and 100

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.48 17152

---

**cannot retrieve commit timestamp for transaction @1@**

[Description]

Cannot retrieve commit timestamp for uncommitted transactions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.49 17153

---

**could not get commit timestamp data**

[Description]

Could not get commit timestamp data. "track\_commit\_timestamp" parameter must be configured

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.50 17154

---

**database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database "@1@"**

[Description]

Database is not accepting any commands due to transaction wrap around issue. This can be fixed by vacuuming the database and committing/rolling-back the old unfinished prepared transactions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.51 17155

---

**database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database with OID @1@**

[Description]

Database is not accepting any commands due to transaction wrap around issue. This can be fixed by vacuuming the database and committing/rolling-back the old unfinished prepared transactions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.52 17156

---

### **multixact "members" limit exceeded**

[Description]

Multixact members limit exceeded.

Execute a database-wide VACUUM in database with OID %u with reduced vacuum\_multixact\_freeze\_min\_age and vacuum\_multixact\_freeze\_table\_age settings.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.53 17157

---

### **MultiXactId @1@ does no longer exist -- apparent wraparound**

[Description]

MultiXactID does not exist. Transaction wrap around completed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.54 17158

---

### **MultiXactId @1@ has not been created yet -- apparent wraparound**

[Description]

multixactId has not been created. Possible transaction wrap around has happend.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.55 17160

---

---

### postmaster exited during a parallel transaction

[Description]

postmaster exited during a parallel transaction

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.56 17165

---

### cannot PREPARE a transaction that has exported snapshots

[Description]

cannot PREPARE a transaction that has exported snapshots

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.57 17166

---

### cannot commit during a parallel operation

[Description]

cannot commit during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.58 17167

---

### cannot abort during a parallel operation

[Description]

cannot during during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.59 17168

---

### cannot define savepoints during a parallel operation

[Description]

cannot define savepoints during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.60 17169

---

### cannot release savepoints during a parallel operation

[Description]

cannot release savepoints during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.61 17170

---

### cannot rollback to savepoints during a parallel operation

[Description]

cannot rollback to savepoints during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.62 17171

---

### cannot start subtransactions during a parallel operation

[Description]

cannot start subtransactions during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.68.63 17172

---

### cannot commit subtransactions during a parallel operation

[Description]

cannot commit subtransactions during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.64 17173

---

**could not open transaction log file "@1@": @2@**

[Description]

could not open transaction log file. The transaction file status must be checked (Ex: file permissions, status etc)

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.65 17174

---

**new timeline @1@ forked off current database system timeline @2@ before current recovery point @3@/@4@**

[Description]

new timeline %u forked off current database system timeline %u before current recovery point %X/%X

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.66 17177

---

**parameter "@1@" requires a temporal value**

[Description]

recovery\_min\_apply\_delay parameter requires a temporal value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.67 17178

---

**requested timeline @1@ does not contain minimum recovery point @2@/@3@ on timeline @4@**

[Description]

minimum recovery point must be part of requested timeline's history

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.68 17179

---

**This means that the backup is corrupted and you will have to use another backup for recovery.**

[Description]

This means that the backup is corrupted and you will have to use another backup for recovery

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.69 17180

---

**unexpected previous timeline ID @1@ (current timeline ID @2@) in checkpoint record**

[Description]

unexpected previous timeline ID in checkpoint record. Check that the checkpoint record agrees with the current timeline.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.70 17181

---

**unexpected timeline ID @1@ in checkpoint record, before reaching minimum recovery point @2@/@3@ on timeline @4@**

[Description]

unexpected timeline ID in checkpoint record, before reaching minimum recovery point on timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.71 17182

---

**could not fsync log file @1@: @2@**

[Description]

could not fsync the log file. Check that the file exists and is available/accessible with appropriate permissions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.72 17183

---

**could not stat trigger file "@1@": @2@**

[Description]

Could not stat trigger file. Checking for the existence of trigger file. ensure that the trigger file exists with appropriate permissions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.73 17184

---

**invalid privilege type @1@ for type**

[Description]

invalid privilege type for object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.74 17185

---

**invalid privilege type @1@ for column**

[Description]

invalid privilege type for the column

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.75 17186

---

**permission denied for event trigger @1@**

[Description]

permission denied on the trigger

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.76 17187

---

**event trigger with OID @1@ does not exist**

[Description]

Trigger being accessed does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.77 17188

---

**constant of the type "regrole" cannot be used here**

[Description]

constant of the type regrole cannot be used here

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.78 17189

---

**pg\_class index OID value not set when in binary upgrade mode**

[Description]

pg\_class index OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.79 17190

---

**could not obtain lock on relation "@1@"**

[Description]

Lock on a relation could not be obtained. Check the blocking process

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.80 17191

---

### cannot create temporary tables in parallel mode

[Description]

cannot create temporary tables in parallel mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.81 17192

---

### role name cannot be qualified

[Description]

role name cannot be qualified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.82 17193

---

### schema name cannot be qualified

[Description]

schema name cannot be qualified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.83 17194

---

### language name cannot be qualified

[Description]

language name cannot be qualified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.84 17195

---

### server name cannot be qualified

[Description]

server name cannot be qualified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.85 17196

---

### event trigger name cannot be qualified

[Description]

event trigger name cannot be qualified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.86 17197

---

### "@1@" is not a materialized view

[Description]

The object type being accessed is not a materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.87 17198

---

### default value for column "@1@" of relation "@2@" does not exist

[Description]

default value for column of relation does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.68.88 17199

---

---

**operator @1@ (@2@, @3@) of @4@ does not exist****[Description]**

operator does not exist

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69 Message Numbers Beginning with 17200

---

### 2.69.1 17200

---

**function @1@ (@2@, @3@) of @4@ does not exist****[Description]**

function being accessed does not exist. Check if the function is existing with appropriate permissions and search\_path settings

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

### 2.69.2 17201

---

**user mapping for user "@1@" on server "@2@" does not exist****[Description]**

user mapping for user in server does not exist. Check the mapping user while creating foreign tables

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

### 2.69.3 17202

---

**unrecognized default ACL object type @1@****[Description]**

ACL object type is unrecognized. Valid object types are "r", "S", "f", and "T"

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.4 17203

---

### default ACL for user "@1@" in schema "@2@" on @3@ does not exist

[Description]

default ACL for user in schema on does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.5 17204

---

### default ACL for user "@1@" on @2@ does not exist

[Description]

default ACL for user on does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.6 17205

---

### name or argument lists may not contain nulls

[Description]

name or argument lists may not contain nulls

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.7 17206

---

### unsupported object type "@1@"

[Description]

unsupported object type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.8 17207

---

---

### **name list length must be exactly @1@**

[Description]

name list length must be exactly 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.69.9 17208**

---

### **large object OID may not be null**

[Description]

large object OID may not be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.69.10 17210**

---

### **argument list length must be exactly @1@**

[Description]

argument list length must be exactly 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.69.11 17211**

---

### **name list length must be at least @1@**

[Description]

name list length must be at least 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.69.12 17212**

---

### **unrecognized object type "@1@"**

[Description]

unrecognized object type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.13 17213

---

### aggregates cannot have more than @1@ argument

[Description]

aggregates cannot have more than 1 argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.14 17215

---

### a variadic ordered-set aggregate must use VARIADIC type ANY

[Description]

a variadic ordered-set aggregate must use VARIADIC type ANY

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.15 17216

---

### a hypothetical-set aggregate must have direct arguments matching its aggregated arguments

[Description]

a hypothetical-set aggregate must have direct arguments matching its aggregated arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.16 17218

---

### strictness of aggregate's forward and inverse transition functions must match

[Description]

strictness of aggregate's forward and inverse transition functions must match

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.17 17219

---

**final function with extra arguments must not be declared STRICT**

[Description]

final function with extra arguments must not be declared STRICT

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.18 17220

---

**moving-aggregate implementation returns type @1@, but plain implementation returns type @2@**

[Description]

moving-aggregate implementation returns type one type but plain implementation returns type other type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.19 17221

---

**function @1@ must accept VARIADIC ANY to be used in this aggregate**

[Description]

The function must accept VARIADIC ANY to be used in this aggregate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.20 17222

---

**constraint "@1@" for domain "@2@" does not exist**

[Description]

The constraint for domain does not exist. Check the constraint name

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.21 17223

---

**enum label "@1@" already exists**

[Description]

enum label already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.22 17224

---

**pg\_enum OID value not set when in binary upgrade mode**

[Description]

pg\_enum OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.23 17225

---

**pg\_type OID value not set when in binary upgrade mode**

[Description]

pg\_type OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.24 17226

---

**"@1@" is not a table or materialized view**

[Description]

The object referenced by pgstattuple utility is not a table or materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.25 17227

---

### only ordered-set aggregates can be hypothetical

[Description]

only ordered-set aggregates can be hypothetical

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.26 17228

---

### aggregate msfunc must be specified when mstype is specified

[Description]

aggregate msfunc must be specified when mstype is specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.27 17229

---

### aggregate minvfunc must be specified when mstype is specified

[Description]

aggregate minvfunc must be specified when mstype is specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.28 17230

---

### aggregate msfunc must not be specified without mstype

[Description]

aggregate msfunc must not be specified without mstype

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.29 17231

---

### aggregate minvfunc must not be specified without mstype

[Description]

aggregate minvfunc must not be specified without mstype

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.30 17232

---

### aggregate msspace must not be specified without mstype

[Description]

aggregate msspace must not be specified without mstype

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.31 17233

---

### aggregate minitcond must not be specified without mstype

[Description]

aggregate minitcond must not be specified without mstype

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.32 17234

---

### event trigger "@1@" already exists

[Description]

event trigger already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.33 17236

---

---

**could not write to COPY program: @1@****[Description]**

could not write to COPY program: %m

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.69.34 17237**

---

**must be superuser to COPY to or from an external program****[Description]**

Only an external program can COPY to or from an external program

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.69.35 17238**

---

**COPY FROM not supported with row-level security****[Description]**

COPY FROM an external file is not supported when row level security is enabled. Use INSERT statements instead

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.69.36 17239**

---

**COPY force null available only in CSV mode****[Description]**

COPY force null available only in CSV mode

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.69.37 17240**

---

**COPY force null only available using COPY FROM**

[Description]

COPY force null only available using COPY FROM

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.38 17241

---

### relation referenced by COPY statement has changed

[Description]

relation referenced by COPY statement has changed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.39 17242

---

### could not close pipe to external command: @1@

[Description]

could not close pipe to external command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.40 17243

---

### program "@1@" failed

[Description]

program has failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.41 17244

---

### could not execute command "@1@": @2@

[Description]

could not execute command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.42 17245

---

**cannot copy to materialized view "@1@"**

[Description]

cannot copy to materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.43 17246

---

**cannot perform FREEZE because of prior transaction activity**

[Description]

cannot perform FREEZE because of prior transaction activity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.44 17247

---

**cannot perform FREEZE because the table was not created or truncated in the current subtransaction**

[Description]

cannot perform FREEZE because the table was not created or truncated in the current subtransaction

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.45 17248

---

**too many column names were specified**

[Description]

too many column names were specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.46 17249

---

**policies not yet implemented for this command**

[Description]

policies not yet implemented for this command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.47 17250

---

**invalid locale name: "@1@"**

[Description]

Check if the locale name mentioned is correct.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.48 17251

---

**database "@1@" is used by a logical replication slot**

[Description]

The database referenced is used by a logical replication slot.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.49 17252

---

**option "@1@" cannot be specified with other options**

[Description]

When invoking alter database command option cannot be specified with other options

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.50 17253

---

### cannot disallow connections for current database

[Description]

cannot disallow connections for current database

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.51 17254

---

### permission denied to create event trigger "@1@"

[Description]

Permission denied to create event trigger. Must be superuser to create an event trigger. Check permissions on trigger

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.52 17255

---

### unrecognized event name "@1@"

[Description]

Unrecognized event name. Acceptable event name must be provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.53 17256

---

### unrecognized filter variable "@1@"

[Description]

unrecognized filter variable

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.54 17257

---

### function "@1@" must return type "event\_trigger"

[Description]

function must return type event\_trigger

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.55 17259

---

### event triggers are not supported for @1@

[Description]

event triggers are not supported for certain type of SQL statements

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.56 17260

---

### filter variable "@1@" specified more than once

[Description]

filter variable specified more than once

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.57 17261

---

### event trigger "@1@" does not exist

[Description]

Referenced event trigger does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.58 17262

---

---

## permission denied to change owner of event trigger "@1@"

### [Description]

permission denied to change owner of event trigger. The owner of an event trigger must be a superuser

### [System Processing]

Processing aborts

### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.59 17263

---

### @1@ can only be called in a sql\_drop event trigger function

### [Description]

The function pg\_event\_trigger\_dropped\_objects() can only be called in a sql\_drop event trigger function

### [System Processing]

Processing aborts

### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.60 17264

---

### @1@ can only be called in a table\_rewrite event trigger function

### [Description]

The function pg\_event\_trigger\_table\_rewrite\_oid() can only be called in a table\_rewrite event trigger function

### [System Processing]

Processing aborts

### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.61 17265

---

### @1@ can only be called in an event trigger function

### [Description]

The function pg\_event\_trigger\_ddl\_commands() can only be called in a event trigger function

### [System Processing]

Processing aborts

### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.62 17267

---

### aggregates cannot accept set arguments

[Description]

aggregates cannot accept set arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.63 17268

---

### transform function must not be volatile

[Description]

transform function must not be volatile

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.64 17269

---

### transform function must not be an aggregate function

[Description]

transform function must not be an aggregate function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.65 17270

---

### transform function must not be a window function

[Description]

transform function must not be a window function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.66 17271

---

### transform function must not return a set

[Description]

transform function must not return a set

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.67 17272

---

**transform function must take one argument**

[Description]

transform function must take one argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.68 17273

---

**first argument of transform function must be type "internal"**

[Description]

first argument of transform function must be type internal

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.69 17274

---

**data type @1@ is a pseudo-type**

[Description]

data type referenced is a pseudo-type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.70 17275

---

**data type @1@ is a domain**

[Description]

data type is a domain

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.71 17276

---

**return data type of FROM SQL function must be "internal"**

[Description]

return data type of FROM SQL function must be internal

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.72 17277

---

**return data type of TO SQL function must be the transform data type**

[Description]

return data type of TO SQL function must be the transform data type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.73 17278

---

**transform for type @1@ language "@2@" already exists**

[Description]

transform for type language already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.74 17279

---

**transform for type @1@ language "@2@" does not exist**

[Description]

transform for type language does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.75 17280

---

### operator class "@1@" does not exist for access method "@2@"

[Description]

operator class does not exist for access method

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.76 17281

---

### CONCURRENTLY cannot be used when the materialized view is not populated

[Description]

CONCURRENTLY cannot be used when the materialized view is not populated

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.77 17282

---

### CONCURRENTLY and WITH NO DATA options cannot be used together

[Description]

CONCURRENTLY and WITH NO DATA options cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.78 17283

---

### new data for materialized view "@1@" contains duplicate rows without any null columns

[Description]

new data for materialized view contains duplicate rows without any null columns

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.79 17284

---

---

### **WITH CHECK cannot be applied to SELECT or DELETE**

[Description]

WITH CHECK cannot be applied to SELECT or DELETE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.69.80 17285**

---

### **only WITH CHECK expression allowed for INSERT**

[Description]

only WITH CHECK expression allowed for INSERT

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.69.81 17286**

---

### **policy "@1@" for table "@2@" already exists**

[Description]

policy attempted to create for table already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.69.82 17287**

---

### **policy "@1@" for table "@2@" does not exist**

[Description]

Policy being attempted to alter does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.69.83 17288**

---

### **only USING expression allowed for SELECT, DELETE**

[Description]

only USING expression allowed for SELECT, DELETE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.84 17289

---

### referenced relation "@1@" is not a table or foreign table

[Description]

Relation referenced by CREATE OR ALTER TABLE is not a regular table or foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.85 17290

---

### materialized view "@1@" does not exist

[Description]

materialized view \"%s\" does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.86 17291

---

### Use DROP MATERIALIZED VIEW to remove a materialized view.

[Description]

Use DROP MATERIALIZED VIEW to remove a materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.87 17293

---

### inherited constraint "@1@" must be renamed in child tables too

[Description]

inherited constraint must be renamed in child tables too

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.88 17294

---

**cannot rename inherited constraint "@1@"**

[Description]

cannot rename inherited constraint

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.89 17295

---

**cannot rewrite table "@1@" used as a catalog table**

[Description]

cannot rewrite table used as a catalog table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.90 17296

---

**"@1@" is not a table, view, or foreign table**

[Description]

this is not a table, view, or foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.69.91 17297

---

**"@1@" is not a table, view, materialized view, or index**

[Description]

object referenced is not a table, view, materialized view, or index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.92 17298

---

**"@1@" is not a table, materialized view, or foreign table**

[Description]

object referenced is not of a type table, materialized view, or foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.69.93 17299

---

**constraint "@1@" of relation "@2@" is not a foreign key or check constraint**

[Description]

constraint of relation is not a foreign key or check constraint

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70 Message Numbers Beginning with 17300

---

### 2.70.1 17301

---

**"@1@" is not a table, view, sequence, or foreign table**

[Description]

object type is not a table, view, sequence, or foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.70.2 17302

---

**WITH CHECK OPTION is supported only on automatically updatable views**

[Description]

WITH CHECK OPTION is supported only on automatically updatable views

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.70.3 17303

---

**only tables, indexes, and materialized views exist in tablespaces**

[Description]

only tables, indexes, and materialized views exist in tablespaces

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.70.4 17304

---

**cannot move relations in to or out of pg\_global tablespace**

[Description]

cannot move relations in to or out of pg\_global tablespace

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.70.5 17305

---

**aborting because lock on relation "@1@.@2@" is not available**

[Description]

aborting because lock on relation is not available

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.70.6 17306

---

**no matching relations in tablespace "@1@" found**

[Description]

no matching relations in tablespace found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.7 17307

---

### invalid page in block @1@ of relation @2@

[Description]

invalid page in block of relation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.8 17308

---

### cannot use non-unique index "@1@" as replica identity

[Description]

cannot use non-unique index as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.9 17309

---

### cannot use non-immediate index "@1@" as replica identity

[Description]

cannot use non-immediate index as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.10 17310

---

### cannot use expression index "@1@" as replica identity

[Description]

cannot use expression index as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.11 17311

---

---

### cannot use partial index "@1@" as replica identity

[Description]

cannot use partial index \"%s\" as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.12 17312

---

### cannot use invalid index "@1@" as replica identity

[Description]

cannot use invalid index as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.13 17313

---

### index "@1@" cannot be used as replica identity because column "@2@" is nullable

[Description]

index \"%s\" cannot be used as replica identity because column \"%s\" is nullable

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.14 17319

---

### could not create an encrypted tablespace because the keystore is not open

[Description]

could not create an encrypted tablespace because the keystore is not open. Open the existing keystore, or set the master encryption key to create and open a new keystore

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.15 17321

---

### tablespace encryption algorithm option cannot be changed

[Description]

tablespace encryption algorithm option cannot be changed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.16 17323

---

### Foreign tables cannot have INSTEAD OF triggers.

[Description]

Foreign tables cannot have INSTEAD OF triggers.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.17 17326

---

### tuple to be updated was already modified by an operation triggered by the current command

[Description]

tuple to be updated was already modified by an operation triggered by the current command. Consider using an AFTER trigger instead of a BEFORE trigger to propagate changes to other rows

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.18 17327

---

### function @1@ should return type @2@

[Description]

function should return an acceptable type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.19 17328

---

### check constraints for domains cannot be marked NO INHERIT

[Description]

check constraints for domains cannot be marked NO INHERIT

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.20 17329

---

### range subtype cannot be @1@

[Description]

range subtype cannot be of psuedo type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.21 17330

---

### range canonical function @1@ must return range type

[Description]

range canonical function must return range type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.22 17331

---

### pg\_type array OID value not set when in binary upgrade mode

[Description]

pg\_type array OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.23 17332

---

### constraint "@1@" of domain "@2@" is not a check constraint

[Description]

constraint of domain is not a check constraint

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.24 17333

---

**constraint "@1@" for domain "@2@" already exists**

[Description]

constraint for domain already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.25 17334

---

**must be superuser to change bypassrls attribute**

[Description]

must be superuser to change bypassrls attribute

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.26 17335

---

**pg\_authid OID value not set when in binary upgrade mode**

[Description]

pg\_authid OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.27 17336

---

**must be superuser to alter settings globally**

[Description]

must be superuser to alter settings globally

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.28 17338

---

### @1@ cannot be executed from VACUUM or ANALYZE

[Description]

commands VACUUM or ANALYZE cannot be executed from VACUUM or ANALYZE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.29 17339

---

### invalid value for "check\_option" option

[Description]

invalid value for "check\_option" option. Valid values are "local" and "cascaded".

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.30 17340

---

### ON CONFLICT does not support deferrable unique constraints/exclusion constraints as arbiters

[Description]

ON CONFLICT does not support deferrable unique constraints/exclusion constraints as arbiters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.31 17341

---

### cannot change materialized view "@1@"

[Description]

cannot change materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.32 17342

---

### cannot insert into foreign table "@1@"

[Description]

cannot insert into foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.33 17343

---

### foreign table "@1@" does not allow inserts

[Description]

foreign table \"%s\" does not allow inserts

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.34 17344

---

### cannot update foreign table "@1@"

[Description]

cannot update foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.35 17345

---

### foreign table "@1@" does not allow updates

[Description]

foreign table does not allow updates

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.36 17346

---

### cannot delete from foreign table "@1@"

[Description]

cannot delete from foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.37 17347

---

### foreign table "@1@" does not allow deletes

[Description]

foreign table does not allow deletes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.38 17348

---

### cannot lock rows in materialized view "@1@"

[Description]

cannot lock rows in materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.39 17349

---

### new row violates check option for view "@1@"

[Description]

new row violates check option for view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.40 17350

---

---

**new row violates row-level security policy "@1@" for table "@2@"**

[Description]

new row violates row-level security policy for table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.41 17351

---

**new row violates row-level security policy for table "@1@"**

[Description]

new row violates row-level security policy for table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.42 17352

---

**new row violates row-level security policy "@1@" (USING expression) for table "@2@"**

[Description]

new row violates row-level security policy (USING expression) for table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.43 17353

---

**new row violates row-level security policy (USING expression) for table "@1@"**

[Description]

new row violates row-level security policy (USING expression) for table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.44 17354

---

**WHERE CURRENT OF is not supported for this table type**

[Description]

WHERE CURRENT OF is not supported for this table type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.45 17355

---

### materialized view "@1@" has not been populated

[Description]

materialized view has not been populated. Use the REFRESH MATERIALIZED VIEW command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.46 17356

---

### custom scan "@1@" does not support MarkPos

[Description]

custom-scan does not support MarkPos

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.47 17357

---

### lossy distance functions are not supported in index-only scans

[Description]

lossy distance functions are not supported in index-only scans

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.48 17358

---

### ON CONFLICT DO UPDATE command cannot affect row a second time

[Description]

ON CONFLICT DO UPDATE command cannot affect row a second time. Ensure that no rows proposed for insertion within the same command have duplicate constrained values

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.49 17359

---

### TABLESAMPLE parameter cannot be null

[Description]

TABLESAMPLE parameter cannot be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.50 17360

---

### TABLESAMPLE REPEATABLE parameter cannot be null

[Description]

TABLESAMPLE REPEATABLE parameter cannot be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.51 17361

---

### moving-aggregate transition function must not return null

[Description]

moving-aggregate transition function must not return null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.52 17362

---

### could not open configuration directory "@1@": @2@

[Description]

could not open configuration directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.53 17363

---

### could not initialize LDAP: @1@

[Description]

could not initialize LDAP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.54 17364

---

### LDAP user "@1@" does not exist

[Description]

LDAP user does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.55 17365

---

### LDAP user "@1@" is not unique

[Description]

LDAP user is not unique

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.56 17367

---

### lo\_lseek result out of range for large-object descriptor @1@

[Description]

lo\_lseek result out of range for large-object descriptor %d

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.57 17368

---

**io\_tell result out of range for large-object descriptor @1@**

[Description]

io\_tell result out of range for large-object descriptor

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.58 17369

---

**large object read request is too large**

[Description]

large object read request is too large

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.59 17370

---

**ECDH: unrecognized curve name: @1@**

[Description]

ECDH: unrecognized curve name

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.60 17371

---

**ECDH: could not create key**

[Description]

ECDH: could not create key

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.61 17372

---

### authentication file line too long

[Description]

authentication file line too long

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.62 17373

---

### could not parse LDAP URL "@1@": @2@

[Description]

could not parse LDAP URL

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.63 17374

---

### unsupported LDAP URL scheme: @1@

[Description]

unsupported LDAP URL scheme

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.64 17375

---

### filters not supported in LDAP URLs

[Description]

filters not supported in LDAP URLs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.65 17376

---

### LDAP URLs not supported on this platform

[Description]

LDAP URLs not supported on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.66 17377

---

### unrecognized address family @1@

[Description]

unrecognized address family

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.67 17378

---

### there is no client connection

[Description]

there is no client connection

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.68 17379

---

### terminating connection because protocol synchronization was lost

[Description]

terminating connection because protocol sync was lost

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.69 17380

---

---

### @1@: out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.70 17381

---

### @1@ cannot be applied to the nullable side of an outer join

[Description]

SQL row locking clause cannot be applied to the nullable side of an outer join

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.71 17383

---

### system columns cannot be used in an ON CONFLICT clause

[Description]

system columns cannot be used in an ON CONFLICT clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.72 17384

---

### constraint in ON CONFLICT clause has no associated index

[Description]

constraint in ON CONFLICT clause has no associated index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.70.73 17385

---

### ON CONFLICT DO UPDATE not supported with exclusion constraints

[Description]

ON CONFLICT DO UPDATE not supported with exclusion constraints

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.74 17386

---

### there is no unique or exclusion constraint matching the ON CONFLICT specification

[Description]

there is no unique or exclusion constraint matching the ON CONFLICT specification

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.75 17387

---

### @1@ cannot be applied to VALUES

[Description]

SQL row locking cannot be applied to VALUES

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.76 17388

---

### RETURNING must have at least one column

[Description]

RETURNING must have at least one column

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.77 17389

---

### DECLARE SCROLL CURSOR ... @1@ is not supported

[Description]

DECLARE SCROLL CURSOR ... is not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.78 17390

---

### materialized views must not use data-modifying statements in WITH

[Description]

materialized views must not use data-modifying statements in WITH

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.79 17391

---

### materialized views must not use temporary tables or views

[Description]

materialized views must not use temporary tables or views

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.80 17392

---

### materialized views may not be defined using bound parameters

[Description]

materialized views may not be defined using bound parameters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.81 17393

---

### materialized views cannot be UNLOGGED

[Description]

materialized views cannot be UNLOGGED

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.82 17394

---

### @1@ is not allowed with DISTINCT clause

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with DISTINCT clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.83 17395

---

### @1@ is not allowed with GROUP BY clause

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with GROUP BY clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.84 17396

---

### @1@ is not allowed with HAVING clause

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with HAVING clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.85 17397

---

### @1@ is not allowed with aggregate functions

[Description]

%s is not allowed with aggregate functions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.86 17398

---

### @1@ is not allowed with window functions

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with window functions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.70.87 17399

---

### @1@ is not allowed with set-returning functions in the target list

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with set-returning functions in the target list

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71 Message Numbers Beginning with 17400

---

### 2.71.1 17400

---

#### @1@ must specify unqualified relation names

[Description]

SQL row locking clause such as "FOR UPDATE" must specify unqualified relation names

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.71.2 17401

---

#### @1@ cannot be applied to a join

[Description]

SQL row locking clause such as "FOR UPDATE" cannot be applied to a join

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.3 17402

---

### @1@ cannot be applied to a function

[Description]

SQL row locking clause such as "FOR UPDATE" cannot be applied to a function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.4 17403

---

### @1@ cannot be applied to a WITH query

[Description]

SQL row locking clause such as "FOR UPDATE" cannot be applied to a WITH query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.5 17404

---

### relation "@1@" in @2@ clause not found in FROM clause

[Description]

Relation referenced by the SQL in FROM clause is not found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.6 17405

---

### outer join operator (+) cannot be used with joined table

[Description]

outer join operator (+) cannot be used with joined table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.7 17406

---

---

### **outer join operator (+) cannot be used with subquery**

[Description]

outer join operator (+) cannot be used with subquery

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.8 17407**

---

### **outer join operator (+) is not allowed in operand OR or IN predicate**

[Description]

outer join operator (+) is not allowed in operand OR or IN predicate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.9 17408**

---

### **incorrect specification in outer join operator(+)**

[Description]

incorrect specification in outer join operator(+)

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.10 17409**

---

### **outer join operator(+) cannot refer to other relations of same query level**

[Description]

outer join operator(+) cannot refer to other relations of same query level

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.11 17410**

---

### **a table may be outer joined to at most one other table**

[Description]

a table may be outer joined to at most one other table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.12 17411

---

### multiple outer join operators (+) cannot be specified for one table

[Description]

multiple outer join operators (+) cannot be specified for one table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.13 17412

---

### two tables cannot be outer-joined to each other

[Description]

two tables cannot be outer-joined to each other

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.14 17413

---

### invalid combination of outer join operator (+) and logical operators

[Description]

invalid combination of outer join operator (+) and logical operators

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.15 17414

---

### GROUPING must have fewer than 32 arguments

[Description]

GROUPING must have fewer than 32 arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.16 17415

---

### aggregate functions are not allowed in JOIN conditions

[Description]

aggregate functions are not allowed in JOIN conditions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.17 17416

---

### grouping operations are not allowed in JOIN conditions

[Description]

grouping operations are not allowed in JOIN conditions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.18 17417

---

### aggregate functions are not allowed in FROM clause of their own query level

[Description]

aggregate functions are not allowed in FROM clause of their own query level

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.19 17418

---

### grouping operations are not allowed in FROM clause of their own query level

[Description]

grouping operations are not allowed in FROM clause of their own query level

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.20 17419

---

### aggregate functions are not allowed in functions in FROM

[Description]

aggregate functions are not allowed in functions in FROM

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.21 17420

---

### grouping operations are not allowed in functions in FROM

[Description]

grouping operations are not allowed in functions in FROM

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.22 17421

---

### aggregate functions are not allowed in policy expressions

[Description]

aggregate functions are not allowed in policy expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.23 17422

---

### grouping operations are not allowed in policy expressions

[Description]

grouping operations are not allowed in policy expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.24 17423

---

### aggregate functions are not allowed in window RANGE

[Description]

aggregate functions are not allowed in window RANGE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.25 17424

---

### grouping operations are not allowed in window RANGE

[Description]

grouping operations are not allowed in window RANGE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.26 17425

---

### aggregate functions are not allowed in window ROWS

[Description]

aggregate functions are not allowed in window ROWS

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.27 17426

---

### grouping operations are not allowed in window ROWS

[Description]

grouping operations are not allowed in window ROWS

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.28 17427

---

---

### grouping operations are not allowed in check constraints

[Description]

grouping operations are not allowed in check constraints

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.29 17428

---

### grouping operations are not allowed in DEFAULT expressions

[Description]

grouping operations are not allowed in DEFAULT expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.30 17429

---

### grouping operations are not allowed in index expressions

[Description]

grouping operations are not allowed in index expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.31 17430

---

### grouping operations are not allowed in index predicates

[Description]

grouping operations are not allowed in index predicates

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.32 17431

---

### grouping operations are not allowed in transform expressions

[Description]

grouping operations are not allowed in transform expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.33 17432

---

### grouping operations are not allowed in EXECUTE parameters

[Description]

grouping operations are not allowed in EXECUTE parameters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.34 17433

---

### grouping operations are not allowed in trigger WHEN conditions

[Description]

grouping operations are not allowed in trigger WHEN conditions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.35 17434

---

### grouping operations are not allowed in @1@

[Description]

grouping operations are not allowed in the SQL constructs like GROUP BY

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.36 17435

---

### outer-level aggregate cannot contain a lower-level variable in its direct arguments

[Description]

outer-level aggregate cannot contain a lower-level variable in its direct arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.37 17436

---

### window functions are not allowed in functions in FROM

[Description]

window functions are not allowed in functions in FROM

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.38 17437

---

### window functions are not allowed in policy expressions

[Description]

window functions are not allowed in policy expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.39 17438

---

### window functions are not allowed in window definitions

[Description]

window functions are not allowed in window definitions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.40 17439

---

### window functions are not allowed in DEFAULT expressions

[Description]

window functions are not allowed in DEFAULT expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.41 17440

---

### window functions are not allowed in index expressions

[Description]

window functions are not allowed in index expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.42 17441

---

### window functions are not allowed in index predicates

[Description]

window functions are not allowed in index predicates

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.43 17442

---

### window functions are not allowed in transform expressions

[Description]

window functions are not allowed in transform expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.44 17443

---

### window functions are not allowed in @1@

[Description]

window functions are not allowed in the SQL constructs like GROUP BY

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.45 17444

---

### aggregate functions are not allowed in a recursive query's recursive term

[Description]

aggregate functions are not allowed in a recursive query's recursive term

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.46 17445

---

### Direct arguments of an ordered-set aggregate must use only grouped columns.

[Description]

Direct arguments of an ordered-set aggregate must use only grouped columns

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.47 17446

---

### arguments to GROUPING must be grouping expressions of the associated query level

[Description]

arguments to GROUPING must be grouping expressions of the associated query level

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.48 17447

---

### multiple column definition lists are not allowed for the same function

[Description]

multiple column definition lists are not allowed for the same function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.49 17448

---

---

### **ROWS FROM() with multiple functions cannot have a column definition list**

[Description]

ROWS FROM() with multiple functions cannot have a column definition list. Put a separate column definition list for each function inside ROWS FROM()

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.50 17449**

---

### **WITH ORDINALITY cannot be used with a column definition list**

[Description]

WITH ORDINALITY cannot be used with a column definition list. Put the column definition list inside ROWS FROM().

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.51 17450**

---

### **tablesample method @1@ does not exist**

[Description]

tablesample method does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.52 17451**

---

### **function @1@ must return type "tsm\_handler"**

[Description]

function must return type "tsm\_handler"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.53 17452**

---

### **tablesample method @1@ does not support REPEATABLE**

[Description]

tablesample method does not support REPEATABLE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.54 17453

---

### **TABLESAMPLE clause can only be applied to tables and materialized views**

[Description]

TABLESAMPLE clause can only be applied to tables and materialized views

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.55 17454

---

### **CUBE is limited to 12 elements**

[Description]

CUBE is limited to 12 elements

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.56 17455

---

### **Omit the parentheses in this OVER clause.**

[Description]

Omit the parentheses in this OVER clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.57 17456

---

### **an aggregate with DISTINCT must have at least one argument**

[Description]

an aggregate with DISTINCT must have at least one argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.58 17457

---

### **SELECT DISTINCT must have at least one column**

[Description]

SELECT DISTINCT must have at least one column

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.59 17458

---

### **ASC/DESC is not allowed in ON CONFLICT clause**

[Description]

ASC/DESC is not allowed in ON CONFLICT clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.60 17459

---

### **NULLS FIRST/LAST is not allowed in ON CONFLICT clause**

[Description]

NULLS FIRST/LAST is not allowed in ON CONFLICT clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.61 17460

---

### **ON CONFLICT DO UPDATE requires inference specification or constraint name**

[Description]

ON CONFLICT DO UPDATE requires inference specification or constraint name

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.62 17461

---

### ON CONFLICT is not supported with system catalog tables

[Description]

ON CONFLICT is not supported with system catalog tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.63 17462

---

### ON CONFLICT is not supported on table "@1@" used as a catalog table

[Description]

ON CONFLICT is not supported on table used as a catalog table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.64 17463

---

### argument of @1@ must be type @2@, not type @3@

[Description]

argument of the SQL construct must be of acceptable type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.65 17464

---

### argument declared "anyrange" is not a range type but type @1@

[Description]

argument declared \"anyrange\" is not a range type but type %s

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.66 17465

---

### column @1@.@2@ does not exist

[Description]

column does not exist.Re-check the column name referenced.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.67 17466

---

### syntax error at or near "(+)"

[Description]

syntax error at or near "(+)"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.68 17467

---

### could not find element type for data type @1@

[Description]

could not find element type for data type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.69 17468

---

### WITHIN GROUP specified, but @1@ is not an aggregate function

[Description]

WITHIN GROUP specified, but the function is not an aggregate function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.70 17469

---

---

### **FILTER specified, but @1@ is not an aggregate function**

[Description]

FILTER specified, but the function is not an aggregate function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.71 17470**

---

### **WITHIN GROUP is required for ordered-set aggregate @1@**

[Description]

WITHIN GROUP is required for ordered-set aggregate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.72 17471**

---

### **OVER is not supported for ordered-set aggregate @1@**

[Description]

OVER is not supported for ordered-set aggregate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.73 17472**

---

### **@1@ is not an ordered-set aggregate, so it cannot have WITHIN GROUP**

[Description]

The function is not an ordered-set aggregate, so it cannot have WITHIN GROUP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.71.74 17476**

---

### **VARIADIC argument must be an array**

[Description]

VARIADIC argument must be an array

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.75 17479

---

### system column "@1@" reference in check constraint is invalid

[Description]

system column reference in check constraint is invalid

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.76 17480

---

### primary key constraints are not supported on foreign tables

[Description]

primary key constraints are not supported on foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.77 17481

---

### unique constraints are not supported on foreign tables

[Description]

unique constraints are not supported on foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.78 17482

---

### foreign key constraints are not supported on foreign tables

[Description]

foreign key constraints are not supported on foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.79 17483

---

### exclusion constraints are not supported on foreign tables

[Description]

exclusion constraints are not supported on foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.80 17484

---

### LIKE is not supported for creating foreign tables

[Description]

LIKE is not supported for creating foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.81 17485

---

### rules on materialized views are not supported

[Description]

rules on materialized views are not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.82 17486

---

### poll() failed: @1@

[Description]

function call for poll() failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.83 17487

---

### huge TLB pages not supported on this platform

[Description]

huge TLB pages not supported on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.84 17488

---

### could not map anonymous shared memory: @1@

[Description]

could not map anonymous shared memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.85 17489

---

### huge pages not supported on this platform

[Description]

huge pages not supported on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.86 17490

---

### could not create shared memory segment: error code @1@

[Description]

could not create shared memory segment

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.87 17491

---

**@1@: invalid argument: "@2@"**

[Description]

invalid argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.88 17492

---

**WAL archival cannot be enabled when wal\_level is "minimal"**

[Description]

WAL archival cannot be enabled when wal\_level is "minimal"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.89 17493

---

**postmaster became multithreaded during startup**

[Description]

postmaster became multithreaded during startup

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.90 17494

---

**data directory "@1@" does not exist**

[Description]

data directory does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.71.91 17495

---

---

### performing immediate shutdown because data directory lock file is invalid

[Description]

performing immediate shutdown because data directory lock file is invalid

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.92 17497

---

### invalid processing mode in background worker

[Description]

invalid processing mode in background worker

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.93 17498

---

### could not create inherited socket: error code @1@

[Description]

could not create inherited socket

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.71.94 17499

---

### could not open backend variables file "@1@": @2@

[Description]

could not open backend variables file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72 Message Numbers Beginning with 17500

---

### 2.72.1 17500

---

**could not read from backend variables file "@1@": @2@**

[Description]

could not read from backend variables file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.72.2 17501

---

**could not map view of backend variables: error code @1@**

[Description]

could not map view of backend variables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.72.3 17502

---

**could not unmap view of backend variables: error code @1@**

[Description]

could not unmap view of backend variables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.72.4 17504

---

**could not write to log segment @1@ at offset @2@, length @3@: @4@**

[Description]

could not write to log segment

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.5 17505

---

**could not link file "@1@" to log segment "@2@" for initialization of log file : @3@**

[Description]

could not link file to log segment for initialization of log file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.6 17506

---

**could not rename file "@1@" to log segment "@2@" for initialization of log file : @3@**

[Description]

could not rename file to log segment for initialization of log file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.7 17507

---

**invalid timeline @1@**

[Description]

invalid timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.8 17508

---

**could not stat control file "@1@" : @2@**

[Description]

could not stat control file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.9 17509

---

---

### could not find WAL file "@1@"

[Description]

could not find WAL file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.10 17510

---

### could not stat file or directory "@1@": @2@

[Description]

could not stat file or directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.11 17511

---

### file name too long for tar format: "@1@"

[Description]

file name too long for tar format

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.12 17512

---

### could not send end-of-streaming message to primary: @1@

[Description]

could not send end-of-streaming message to primary

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.13 17513

---

### error reading result of streaming command: @1@

[Description]

error reading result of streaming command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.14 17514

---

### [unexpected result after CommandComplete: @1@](#)

[Description]

unexpected result after CommandComplete

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.15 17515

---

### [could not receive timeline history file from the primary server: @1@](#)

[Description]

could not receive timeline history file from the primary server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.16 17516

---

### [logical decoding requires wal\\_level >= logical](#)

[Description]

logical decoding requires wal\_level >= logical

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.17 17517

---

### [logical decoding requires a database connection](#)

[Description]

logical decoding requires a database connection

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.18 17518

---

### logical decoding cannot be used while in recovery

[Description]

logical decoding cannot be used while in recovery

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.19 17519

---

### cannot use physical replication slot for logical decoding

[Description]

cannot use physical replication slot for logical decoding

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.20 17520

---

### replication slot "@1@" was not created in this database

[Description]

replication slot was not created in this database

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.21 17521

---

### cannot create logical replication slot in transaction that has performed writes

[Description]

cannot create logical replication slot in transaction that has performed writes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.22 17522

---

### must be superuser or replication role to use replication slots

[Description]

must be superuser or replication role to use replication slots

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.23 17523

---

### array must be one-dimensional

[Description]

The provided input array must be one-dimensional

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.24 17524

---

### array must not contain nulls

[Description]

The provided input array must not contain nulls

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.25 17525

---

### array must have even number of elements

[Description]

The provided input array must have even number of elements

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.26 17526

---

**logical decoding output plugin "@1@" produces binary output, but function "@2@" expects textual data**

[Description]

logical decoding output plugin produces binary output, but function expects textual data

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.27 17527

---

**only superusers can query or manipulate replication origins**

[Description]

only superusers can query or manipulate replication origins

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.28 17528

---

**cannot query or manipulate replication origin when max\_replication\_slots = 0**

[Description]

cannot query or manipulate replication origin when max\_replication\_slots = 0

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.29 17529

---

**cannot manipulate replication origins during recovery**

[Description]

cannot manipulate replication origins during recovery

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.30 17530

---

### could not find free replication origin OID

[Description]

could not find free replication origin OID

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.31 17531

---

### could not drop replication origin with OID @1@, in use by PID @2@

[Description]

could not drop replication origin with OID as it is in use by a process

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.32 17532

---

### replication checkpoint has wrong magic @1@ instead of @2@

[Description]

replication checkpoint has wrong magic number instead of a correct magic number provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.33 17533

---

### could not read file "@1@": read @2@ of @3@

[Description]

could not read file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.34 17534

---

---

**could not find free replication state, increase max\_replication\_slots****[Description]**

could not find free replication state, increase max\_replication\_slots

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.72.35 17535**

---

**replication slot checkpoint has wrong checksum @1@, expected @2@****[Description]**

replication slot checkpoint has wrong checksum value, expected value is shown

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.72.36 17536**

---

**replication origin with OID @1@ is already active for PID @2@****[Description]**

replication origin with OID is already active for process with PID

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.72.37 17537**

---

**could not find free replication state slot for replication origin with OID @1@****[Description]**

could not find free replication state slot for replication origin with OID %u

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.72.38 17538**

---

**replication identifier @1@ is already active for PID @2@**

[Description]

replication identifier is already active for process PID

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.39 17539

---

### no replication origin is configured

[Description]

no replication origin is configured

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.40 17540

---

### could not write to data file for XID @1@: @2@

[Description]

could not write to data file for XID

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.41 17541

---

### could not read from reorderbuffer spill file: @1@

[Description]

could not read from reorderbuffer spill file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.42 17542

---

### could not read from reorderbuffer spill file: read @1@ instead of @2@ bytes

[Description]

could not read from reorderbuffer spill file: read instead of bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.43 17543

---

**could not read from file "@1@": read @2@ instead of @3@ bytes**

[Description]

could not read from file : read some bytes instead of actual bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.44 17544

---

**could not read file "@1@", read @2@ of @3@: @4@**

[Description]

could not read file read some bytes instead of actual bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.45 17545

---

**snapbuild state file "@1@" has wrong magic number: @2@ instead of @3@**

[Description]

snapbuild state file has wrong magic number: instead of actual magic number

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.46 17546

---

**snapbuild state file "@1@" has unsupported version: @2@ instead of @3@**

[Description]

snapbuild state file has unsupported version: instead of actual version number

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.47 17547

---

### checksum mismatch for snapbuild state file "@1@": is @2@, should be @3@

[Description]

checksum mismatch for snapbuild state file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.48 17548

---

### replication slot name "@1@" is too short

[Description]

replication slot name is too short

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.49 17549

---

### replication slot name "@1@" is too long

[Description]

replication slot name \"%s\" is too long

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.50 17550

---

### replication slot name "@1@" contains invalid character

[Description]

replication slot name \"%s\" contains invalid character

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.51 17551

---

### replication slot "@1@" already exists

[Description]

replication slot already exists invalid character

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.52 17552

---

### all replication slots are in use

[Description]

all replication slots are in use character

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.53 17553

---

### replication slot "@1@" does not exist

[Description]

replication slot does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.54 17554

---

### replication slot "@1@" is already active for PID @2@

[Description]

replication slot \"%s\" is already active for PID

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.55 17555

---

---

**could not remove directory "@1@"****[Description]**

could not remove directory

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.72.56 17556**

---

**replication slots can only be used if max\_replication\_slots > 0****[Description]**

replication slots can only be used if max\_replication\_slots > 0

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.72.57 17557**

---

**replication slots can only be used if wal\_level >= archive****[Description]**

replication slots can only be used if wal\_level >= archive

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.72.58 17558**

---

**could not read file "@1@", read @2@ of @3@: @4@****[Description]**

could not read file

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.72.59 17559**

---

**replication slot file "@1@" has wrong magic number: @2@ instead of @3@**

[Description]

replication slot file has wrong magic number

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.60 17560

---

### replication slot file "@1@" has unsupported version @2@

[Description]

replication slot file has unsupported version

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.61 17561

---

### replication slot file "@1@" has corrupted length @2@

[Description]

replication slot file has corrupted length

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.62 17562

---

### checksum mismatch for replication slot file "@1@": is @2@, should be @3@

[Description]

checksum mismatch for replication slot file \"%s\": is %u, should be %u

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.63 17563

---

### too many replication slots active before shutdown

[Description]

too many replication slots active before shutdown

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.64 17564

---

**terminating walreceiver due to timeout**

[Description]

terminating walreceiver due to timeout

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.65 17566

---

**could not seek to beginning of file "@1@": @2@**

[Description]

could not seek to beginning of file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.66 17567

---

**cannot use a logical replication slot for physical replication**

[Description]

cannot use a logical replication slot for physical replication

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.67 17568

---

**requested starting point @1@/@2@ on timeline @3@ is not in this server's history**

[Description]

While streaming WALs during standby recovery. Requested starting point on timeline is not in this server's history

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.68 17570

---

**could not convert table "@1@" to a view because it has row security enabled**

[Description]

could not convert table to a view because it has row security enabled

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.69 17571

---

**could not convert table "@1@" to a view because it has row security policies**

[Description]

could not convert table to a view because it has row security policies

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.70 17573

---

**renaming an ON SELECT rule is not allowed**

[Description]

renaming an ON SELECT rule is not allowed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.71 17574

---

**infinite recursion detected in policy for relation "@1@"**

[Description]

infinite recursion detected in policy for relation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.72 17575

---

### cannot insert into column "@1@" of view "@2@"

[Description]

cannot insert into column of view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.73 17576

---

### cannot update column "@1@" of view "@2@"

[Description]

cannot update column of view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.74 17577

---

### INSERT with ON CONFLICT clause cannot be used with table that has INSERT or UPDATE rules

[Description]

INSERT with ON CONFLICT clause cannot be used with table that has INSERT or UPDATE rules

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.75 17578

---

### NEW variables in ON UPDATE rules cannot reference columns that are part of a multiple assignment in the subject UPDATE command

[Description]

NEW variables in ON UPDATE rules cannot reference columns that are part of a multiple assignment in the subject UPDATE command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.76 17579

---

**exceeded maxAllocatedDescs (@1@) while trying to execute command "@2@"**

[Description]

exceeded maxAllocatedDescs while trying to execute command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.77 17580

---

**could not duplicate handle for "@1@": @2@**

[Description]

could not duplicate handle for the segment

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.78 17581

---

**invalid flags for opening a large object: @1@**

[Description]

invalid flags for opening a large object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.79 17582

---

**invalid whence setting: @1@**

[Description]

invalid whence setting

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.80 17583

---

---

### invalid large object write request size: @1@

[Description]

invalid large object write request size

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.81 17584

---

### canceling statement due to lock timeout

[Description]

canceling statement due to lock timeout. Check the process holding the lock.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.82 17585

---

### @1@: invalid command-line argument: @2@

[Description]

invalid command-line argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.83 17586

---

### fastpath function calls not supported in a replication connection

[Description]

fastpath function calls not supported in a replication connection

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.84 17587

---

### extended query protocol not supported in a replication connection

[Description]

extended query protocol not supported in a replication connection

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.85 17588

---

### cannot execute @1@ during a parallel operation

[Description]

cannot execute SQL commands such as CREATE during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.86 17589

---

### too many lexemes in thesaurus entry

[Description]

too many lexemes in thesaurus entry

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.87 17590

---

### input data type is not an array

[Description]

input data type is not an array

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.88 17591

---

### searching for elements in multidimensional arrays is not supported

[Description]

searching for elements in multidimensional arrays is not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.89 17593

---

**data type @1@ is not an array type**

[Description]

data type is not an array type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.90 17594

---

**cannot accumulate null arrays**

[Description]

cannot accumulate null arrays

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.91 17595

---

**cannot accumulate empty arrays**

[Description]

cannot accumulate empty arrays

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.72.92 17596

---

**cannot accumulate arrays of different dimensionality**

[Description]

cannot accumulate arrays of different dimensionality

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.93 17597

---

### removing elements from multidimensional arrays is not supported

[Description]

removing elements from multidimensional arrays is not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.94 17598

---

### thresholds must be one-dimensional array

[Description]

thresholds must be one-dimensional array

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.72.95 17599

---

### thresholds array must not contain NULLs

[Description]

thresholds array must not contain NULLs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73 Message Numbers Beginning with 17600

---

### 2.73.1 17600

---

#### date field value out of range: @1 @-@2 @-@3 @

[Description]

date field value out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.2 17601

---

### date out of range: @1@-@2@-@3@

[Description]

date out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.3 17602

---

### time field value out of range: @1@:@2@:@3@

[Description]

time field value out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.4 17603

---

### time zone abbreviation "@1@" is not used in time zone "@2@"

[Description]

time zone abbreviation is not used in time zone

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.5 17608

---

### localized string format value too long

[Description]

localized string format value too long

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.6 17609

---

### invalid line specification: must be two distinct points

[Description]

invalid line specification: must be two distinct points

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.7 17610

---

### invalid line specification: A and B cannot both be zero

[Description]

invalid line specification: A and B cannot both be zero

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.8 17611

---

### function "close\_sl" not implemented

[Description]

function "close\_sl" not implemented

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.9 17612

---

### invalid input syntax for type json

[Description]

invalid input syntax for type json

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.10 17613

---

---

### **"\u" must be followed by four hexadecimal digits.**

[Description]

must be followed by four hexadecimal digits. Check the syntax

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.73.11 17614**

---

### **unsupported Unicode escape sequence**

[Description]

unsupported Unicode escape sequence

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.73.12 17615**

---

### **key value must be scalar, not array, composite, or json**

[Description]

key value must be scalar, not array, composite, or json

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.73.13 17616**

---

### **could not determine data type for argument 1**

[Description]

could not determine data type for argument 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.73.14 17617**

---

### **could not determine data type for argument 2**

[Description]

could not determine data type for argument 2

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.15 17618

---

### field name must not be null

[Description]

field name must not be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.16 17619

---

### argument list must have even number of elements

[Description]

argument list must have even number of elements

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.17 17620

---

### could not determine data type for argument @1@

[Description]

could not determine data type for argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.18 17621

---

### argument @1@ cannot be null

[Description]

argument cannot be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.19 17622

---

### array must have two columns

[Description]

array must have two columns

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.20 17623

---

### null value not allowed for object key

[Description]

null value not allowed for object key

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.21 17624

---

### mismatched array dimensions

[Description]

mismatched array dimensions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.22 17625

---

### string too long to represent as jsonb string

[Description]

string too long to represent as jsonb string

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.23 17626

---

**invalid number of arguments: object must be matched key value pairs**

[Description]

invalid number or arguments: object must be matched key value pairs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.24 17629

---

**object keys must be strings**

[Description]

object keys must be strings

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.25 17630

---

**number of jsonb object pairs exceeds the maximum allowed (@1@)**

[Description]

number of jsonb object pairs exceeds the maximum allowed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.26 17631

---

**number of jsonb array elements exceeds the maximum allowed (@1@)**

[Description]

number of jsonb array elements exceeds the maximum allowed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.27 17632

---

### total size of jsonb array elements exceeds the maximum of @1@ bytes

[Description]

total size of jsonb array elements exceeds the maximum number of bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.28 17633

---

### total size of jsonb object elements exceeds the maximum of @1@ bytes

[Description]

total size of jsonb object elements exceeds the maximum number of bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.29 17634

---

### cannot call @1@ on a scalar

[Description]

cannot call this function on a scalar input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.30 17635

---

### cannot call @1@ on an array

[Description]

cannot call this function on an array input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.31 17636

---

---

### cannot get array length of a scalar

[Description]

cannot get array length of a scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.32 17637

---

### cannot get array length of a non-array

[Description]

cannot get array length of a non-array

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.33 17639

---

### function returning record called in context that cannot accept type record

[Description]

function returning record called in context that cannot accept type record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.34 17640

---

### cannot deconstruct an array as an object

[Description]

cannot deconstruct an array as an object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.35 17641

---

### cannot deconstruct a scalar

[Description]

cannot deconstruct a scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.36 17642

---

### cannot extract elements from a scalar

[Description]

cannot extract elements from a scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.37 17643

---

### cannot extract elements from an object

[Description]

cannot extract elements from an object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.38 17644

---

### cannot call @1@ on a non-array

[Description]

cannot call this function on a non-array input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.39 17645

---

### first argument of @1@ must be a row type

[Description]

first argument of this function must be a row type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.40 17646

---

**argument of @1@ must be an array of objects**

[Description]

argument of must be an array of objects

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.41 17647

---

**cannot call @1@ on an object**

[Description]

cannot call this function on an object input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.42 17648

---

**cannot delete from scalar**

[Description]

cannot delete from scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.43 17649

---

**cannot delete from object using integer index**

[Description]

cannot delete from object using integer subscript

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.44 17650

---

### cannot set path in scalar

[Description]

cannot set path in scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.45 17651

---

### cannot delete path in scalar

[Description]

cannot delete path in scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.46 17652

---

### invalid concatenation of jsonb objects

[Description]

invalid concatenation of jsonb objects

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.47 17653

---

### argument exceeds the maximum length of @1@ bytes

[Description]

argument exceeds the maximum length of bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.48 17654

---

### cannot use advisory locks during a parallel operation

[Description]

cannot use advisory locks during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.49 17656

---

### must be a member of the role whose query is being canceled

[Description]

must be a member of the role whose query is being canceled

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.50 17657

---

### must be a superuser to terminate superuser process

[Description]

must be a superuser to terminate superuser process

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.51 17658

---

### must be a member of the role whose process is being terminated

[Description]

must be a member of the role whose process is being terminated

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.52 17659

---

---

### cannot merge addresses from different families

[Description]

cannot merge addresses from different families

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.53 17660

---

### invalid scale in external "numeric" value

[Description]

invalid scale in external \"numeric\" value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.54 17661

---

### start value cannot be NaN

[Description]

While generating a numeric series - start value cannot be NaN

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.55 17662

---

### stop value cannot be NaN

[Description]

stop value cannot be NaN

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.56 17663

---

### step size cannot be NaN

[Description]

step size cannot be NaN

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.57 17664

---

### percentile value @1@ is not between 0 and 1

[Description]

percentile value %g is not between 0 and 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.58 17665

---

### invalid input syntax for type pg\_lsn: "@1@"

[Description]

invalid input syntax for type pg\_lsn

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.59 17666

---

### function can only be called when server is in binary upgrade mode

[Description]

function can only be called when server is in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.60 17667

---

### cannot accept a value of type event\_trigger

[Description]

cannot accept a value of type event\_trigger

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.61 17668

---

**cannot display a value of type event\_trigger**

[Description]

cannot display a value of type event\_trigger

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.62 17669

---

**cannot accept a value of type tsm\_handler**

[Description]

cannot accept a value of type tsm\_handler

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.63 17670

---

**cannot display a value of type tsm\_handler**

[Description]

cannot display a value of type tsm\_handler

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.73.64 17672

---

**cannot output a value of type @1@**

[Description]

cannot output a value of type pg\_ddl\_command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.65 17673

---

### malformed range literal: "@1@"

[Description]

malformed range literal. Check the input string format

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.66 17674

---

### invalid input syntax for numeric time zone: "@1@"

[Description]

invalid input syntax for numeric time zone

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.67 17675

---

### numeric time zone "@1@" out of range

[Description]

numeric time zone out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.68 17676

---

### timestamp out of range: @1@-@2@-@3@ @4@:@5@:@6@

[Description]

timestamp out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.69 17677

---

### interval units "@1@" not supported because months usually have fractional weeks

[Description]

interval units \"%s\" not supported because months usually have fractional weeks

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.70 17678

---

### invalid external txid\_snapshot data

[Description]

invalid external txid\_snapshot data

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.71 17679

---

### unterminated format specifier

[Description]

unterminated format specifier

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.72 17680

---

### number is out of range

[Description]

number is out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.73 17681

---

---

### **width argument position must be ended by "\$"**

[Description]

width argument position must be ended by \"\$\"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.73.74 17682**

---

### **type @1@ is not composite**

[Description]

type is not composite

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.73.75 17683**

---

### **keystore location "@1@" is too long**

[Description]

While configuring a keystore, the error is "keystore location mentioned is too long".

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.73.76 17684**

---

### **keystore does not exist**

[Description]

keystore does not exist. Make sure keystore\_location points to the correct location. If the setting is correct, set the master encryption key to create the keystore.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.73.77 17685**

---

### **must be superuser to manipulate keystore**

[Description]

must be superuser to manipulate keystore

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.78 17686

---

### **function "@1@" is not supported by this build**

[Description]

function \"%s\" is not supported by this build

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.79 17687

---

### **file "@1@" is not a keystore**

[Description]

file \"%s\" is not a keystore

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.80 17688

---

### **lock file "@1@" is empty**

[Description]

lock file is empty. Check if the lockfile is corrupt.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.81 17689

---

### **could not access directory "@1@" : @2@**

[Description]

could not access directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.82 17690

---

**bind\_textdomain\_codeset failed**

[Description]

bind\_textdomain\_codeset failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.83 17691

---

**parameter "@1@" requires a numeric value**

[Description]

parameter \"%s\" requires a numeric value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.84 17692

---

**cannot set parameters during a parallel operation**

[Description]

cannot set parameters during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.85 17693

---

**permission denied to set parameter "@1@"**

[Description]

permission denied to set parameter

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.86 17694

---

### must be superuser to execute ALTER SYSTEM command

[Description]

must be superuser to execute ALTER SYSTEM command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.87 17696

---

### parameter "@1@" could not be set

[Description]

parameter could not be set

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.88 17698

---

### could not seek in tuplestore temporary file: @1@

[Description]

could not seek in tuplestore temporary file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.73.89 17699

---

### could not read from tuplestore temporary file: @1@

[Description]

could not read from tuplestore temporary file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74 Message Numbers Beginning with 17700

---

### 2.74.1 17700

---

**could not write to tuplestore temporary file: @1@**

[Description]

could not write to tuplestore temporary file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.74.2 17703

---

**user does not exist**

[Description]

user does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.74.3 17704

---

**@1@: could not open directory "@2@": @3@**

[Description]

could not open directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.74.4 17705

---

**@1@: could not read directory "@2@": @3@**

[Description]

could not read directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.5 17706

---

**@1@: could not stat file "@2@": @3@**

[Description]

could not stat file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.6 17707

---

**@1@: could not open file "@2@": @3@**

[Description]

could not open file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.7 17708

---

**@1@: directory name too long**

[Description]

directory name too long

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.8 17709

---

**@1@: multiple "=" signs in tablespace mapping**

[Description]

multiple signs in tablespace mapping

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.9 17710

---

---

**@1@: invalid tablespace mapping format "@2@", must be "OLDDIR=NEWDIR"****[Description]**

invalid tablespace mapping format must be OLDDIR=NEWDIR

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.74.10 17711**

---

**@1@: old directory is not an absolute path in tablespace mapping: @2@****[Description]**

old directory is not an absolute path in tablespace mapping

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.74.11 17712**

---

**@1@: new directory is not an absolute path in tablespace mapping: @2@****[Description]**

new directory is not an absolute path in tablespace mapping

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.74.12 17713**

---

**@1@: transfer rate "@2@" is not a valid value****[Description]**

backup transfer rate is not a valid value

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.74.13 17714**

---

**@1@: invalid transfer rate "@2@" : @3@**

[Description]

invalid transfer rate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.14 17715

---

**@1@: transfer rate must be greater than zero**

[Description]

transfer rate must be greater than zero

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.15 17716

---

**@1@: invalid --max-rate unit: "@2@"**

[Description]

invalid --max-rate unit

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.16 17717

---

**@1@: transfer rate "@2@" exceeds integer range**

[Description]

Transfer rate exceeds integer range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.17 17718

---

**@1@: transfer rate "@2@" is out of range**

[Description]

Transfer rate is out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.18 17719

---

**@1@: incompatible server version @2@**

[Description]

incompatible server version

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.19 17720

---

**@1@: server returned unexpected response to BASE\_BACKUP command; got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields**

[Description]

server returned unexpected response to BASE\_BACKUP command; got rows and fields, expected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.20 17721

---

**@1@: invalid xlog-method option "@2@", must be "fetch" or "stream"**

[Description]

invalid xlog-method option : must be fetch or stream

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.21 17722

---

**@1@: transaction log directory location can only be specified in plain mode**

[Description]

transaction log directory location can only be specified in plain mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.22 17723

---

**@1@: could not create symbolic link "@2@": @3@**

[Description]

could not create symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.23 17724

---

**@1@: symlinks are not supported on this platform**

[Description]

symlinks are not supported on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.24 17725

---

**@1@: cannot use --create-slot together with --drop-slot**

[Description]

cannot use --create-slot together with --drop-slot

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.25 17726

---

**@1@: @2@ needs a slot to be specified using --slot**

[Description]

needs a slot to be specified using --slot

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.26 17727

---

**@1@: could not fsync log file "@2@": @3@**

[Description]

could not fsync log file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.27 17728

---

**@1@: could not open log file "@2@": @3@**

[Description]

could not open log file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.28 17729

---

**@1@: invalid fsync interval "@2@"**

[Description]

invalid fsync interval

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.29 17730

---

**@1@: could not parse start position "@2@"**

[Description]

could not parse start position

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.30 17731

---

### @1@: no slot specified

[Description]

no slot specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.31 17732

---

### @1@: no target file specified

[Description]

no target file specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.32 17733

---

### @1@: no database specified

[Description]

no database specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.33 17734

---

### @1@: at least one action needs to be specified

[Description]

at least one action needs to be specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.34 17735

---

---

**@1@: cannot use --create-slot or --start together with --drop-slot****[Description]**

cannot use --create-slot or --start together with --drop-slot

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.74.35 17736**

---

**@1@: cannot use --create-slot or --drop-slot together with --startpos****[Description]**

cannot use --create-slot or --drop-slot together with --startpos

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.74.36 17737**

---

**@1@: could not establish database-specific replication connection****[Description]**

could not establish database-specific replication connection

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.74.37 17738**

---

**@1@: could not create archive status file "@2@": @3@****[Description]**

could not create archive status file

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.74.38 17739**

---

**@1@: could not open timeline history file "@2@": @3@**

[Description]

could not open timeline history file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.39 17740

---

**@1@: server reported unexpected history file name for timeline @2@: @3@**

[Description]

server reported unexpected history file name for timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.40 17741

---

**@1@: could not create timeline history file "@2@": @3@**

[Description]

could not create timeline history file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.41 17742

---

**@1@: could not write timeline history file "@2@": @3@**

[Description]

could not write timeline history file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.42 17743

---

**@1@: could not rename file "@2@" to "@3@": @4@**

[Description]

could not rename file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.43 17744

---

**@1@: incompatible server version @2@; client does not support streaming from server versions older than @3@**

[Description]

incompatible server version; client does not support streaming from server versions older than

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.44 17745

---

**@1@: incompatible server version @2@; client does not support streaming from server versions newer than @3@**

[Description]

incompatible server version; client does not support streaming from server versions newer than

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.45 17746

---

**@1@: starting timeline @2@ is not present in the server**

[Description]

starting timeline is not present in the server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.46 17747

---

**@1@: server reported unexpected next timeline @2@, following timeline @3@**

[Description]

server reported unexpected next timeline, following timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.47 17748

---

**@1@: server stopped streaming timeline @2@ at @3@/@4@, but reported next timeline @5@ to begin at @6@/@7@**

[Description]

server stopped streaming a timeline, but reported next timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.48 17749

---

**@1@: unexpected result set after end-of-timeline: got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields**

[Description]

unexpected result set after end-of-timeline: got unexpected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.49 17750

---

**@1@: could not parse next timeline's starting point "@2@"**

[Description]

could not parse next timeline's starting point

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.50 17751

---

**@1@: socket not open**

[Description]

socket not open

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.51 17752

---

**@1@: could not send copy-end packet: @2@**

[Description]

could not send copy-end packet

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.52 17753

---

**@1@: could not connect to server: @2@**

[Description]

could not connect to server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.53 17754

---

**@1@: could not create replication slot "@2@": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields**

[Description]

could not create replication slot : got unexpected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.54 17755

---

**@1@: could not drop replication slot "@2@": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields**

[Description]

could not drop replication slot : got rows and fields mismatch with, expected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.55 17758

---

**@1@: WSAStartup failed: @2@**

[Description]

WSAStartup failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.56 17759

---

**could not create communication channels: @1@**

[Description]

could not create communication channels

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.57 17760

---

**could not get relation name for OID @1@: @2@**

[Description]

could not get relation name for OID

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.58 17761

---

**unrecognized command on communication channel: @1@**

[Description]

unrecognized command on communication channel

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.59 17762

---

**invalid message received from worker: @1@**

[Description]

invalid message received from worker

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.60 17763

---

**error processing a parallel work item**

[Description]

error processing a parallel work item

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.61 17764

---

**could not write to the communication channel: @1@**

[Description]

could not write to the communication channel

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.62 17765

---

**error in ListenToWorkers(): @1@**

[Description]

error in ListenToWorkers()

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.63 17766

---

### [pgpipe: could not create socket: error code @1@](#)

#### [Description]

pgpipe: could not create socket

#### [System Processing]

Processing aborts

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.64 17767

---

### [pgpipe: could not bind: error code @1@](#)

#### [Description]

pgpipe: could not bind

#### [System Processing]

Processing aborts

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.65 17768

---

### [pgpipe: could not listen: error code @1@](#)

#### [Description]

pgpipe: could not listen

#### [System Processing]

Processing aborts

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.66 17769

---

### [pgpipe: getsockname\(\) failed: error code @1@](#)

#### [Description]

pgpipe: getsockname() failed

#### [System Processing]

Processing aborts

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.67 17770

---

---

### **pgpipe: could not create second socket: error code @1@**

[Description]

pgpipe: could not create second socket

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.74.68 17771**

---

### **pgpipe: could not connect socket: error code @1@**

[Description]

pgpipe: could not connect socket

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.74.69 17772**

---

### **error during backup**

[Description]

error during backup

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.74.70 17773**

---

### **unexpected COPY statement syntax: "@1@"**

[Description]

unexpected COPY statement syntax

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.74.71 17774**

---

### **options -s/--schema-only and -a/--data-only cannot be used together**

[Description]

options `-s/--schema-only` and `-a/--data-only` cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.72 17775

---

### **options `-c/--clean` and `-a/--data-only` cannot be used together**

[Description]

options `-c/--clean` and `-a/--data-only` cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.73 17776

---

### **option `--if-exists` requires option `-c/--clean`**

[Description]

option `--if-exists` requires option `-c/--clean`

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.74 17777

---

### **@1@: invalid number of parallel jobs**

[Description]

%s: invalid number of parallel jobs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.75 17778

---

### **parallel backup only supported by the directory format**

[Description]

parallel backup only supported by the directory format

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.76 17779

---

**Exported snapshots are not supported by this server version.**

[Description]

Exported snapshots are not supported by this server version

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.77 17780

---

**unexpected policy command type: "@1@"**

[Description]

unexpected policy command type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.78 17781

---

**@1@: options -g/--globals-only and -r/--roles-only cannot be used together**

[Description]

options -g/--globals-only and -r/--roles-only cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.79 17782

---

**@1@: options -g/--globals-only and -t/--tablespaces-only cannot be used together**

[Description]

options -g/--globals-only and -t/--tablespaces-only cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.80 17783

---

### @1 @: option --if-exists requires option -c/--clean

[Description]

option --if-exists requires option -c/--clean

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.81 17784

---

### @1 @: options -r/--roles-only and -t/--tablespaces-only cannot be used together

[Description]

options -r/--roles-only and -t/--tablespaces-only cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.82 17785

---

### @1 @: options -d/--dbname and -f/--file cannot be used together

[Description]

options -d/--dbname and -f/--file cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.83 17786

---

### @1 @: options -c/--clean and -a/--data-only cannot be used together

[Description]

options -c/--clean and -a/--data-only cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.84 17787

---

### @1@: cannot specify both --single-transaction and multiple jobs

[Description]

cannot specify both --single-transaction and multiple jobs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.85 17788

---

### @1@: could not start server: @2@

[Description]

could not start server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.86 17789

---

### @1@: could not start server: error code @2@

[Description]

could not start server: error code

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.87 17790

---

### encoding conversion error on line @1@

[Description]

encoding conversion error on line

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.88 17791

---

---

### invalid value for numeric type "@1@" on line @2@

[Description]

invalid value for numeric type on line

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.89 17792

---

### length of nvarchar type is not assined

[Description]

length of nvarchar type is not assined

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.90 17793

---

### @1@: could not locate my own executable path

[Description]

could not locate my own executable path

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.91 17794

---

### lookup failed for type @1@

[Description]

lookup failed for type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.74.92 17795

---

### didn't get a return item from function

[Description]

didn't get a return item from function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.93 17796

---

### couldn't fetch \$\_TD

[Description]

couldn't fetch \$\_TD

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.94 17797

---

### didn't get a return item from trigger function

[Description]

didn't get a return item from trigger function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.95 17798

---

### event trigger functions cannot have declared arguments

[Description]

event trigger functions cannot have declared arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.74.96 17799

---

### GET STACKED DIAGNOSTICS cannot be used outside an exception handler

[Description]

GET STACKED DIAGNOSTICS cannot be used outside an exception handler

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.75 Message Numbers Beginning with 17800**

---

### **2.75.1 17800**

---

**cannot return non-composite value from function returning composite type**

[Description]

cannot return non-composite value from function returning composite type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### **2.75.2 17801**

---

**label does not exist**

[Description]

label does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### **2.75.3 17802**

---

**too many arguments for cursor**

[Description]

too many arguments for cursor

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### **2.75.4 17803**

---

**too many arguments for cursor**

[Description]

too many arguments for cursor

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.5 17804

---

**@1@ cannot be used as a role name here**

[Description]

Reserved name cannot be used as a role name here

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.6 17805

---

**@1@ is not allowed with UNION/INTERSECT/EXCEPT**

[Description]

Locking clause is not allowed with UNION/INTERSECT/EXCEPT

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.7 17806

---

**@1@: could not access directory "@2@": @3@**

[Description]

Failure in accessing directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.8 17807

---

**@1@: could not allocate SIDs: error code @2@**

[Description]

Failure in allocating SIDs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.9 17808

---

**@1@: could not change permissions of "@2@": @3@**

[Description]

Failure in changing the permissions of a file/directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.10 17809

---

**@1@: could not close directory "@2@": @3@**

[Description]

Failure in closing directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.11 17810

---

**@1@: could not close directory "@2@": @3@**

[Description]

Failure in closing a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.12 17811

---

**@1@: could not create restricted token: error code @2@**

[Description]

Failure in creating restricted token

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.13 17812

---

**@1@: could not fsync file "@2@": @3@**

[Description]

Failure in syncing the file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.14 17813

---

**@1@: could not get exit code from subprocess: error code @2@**

[Description]

Failure in getting the exit code of a child process

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.15 17814

---

**@1@: could not locate my own executable path**

[Description]

Executable path not defined

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.16 17815

---

**@1@: could not open file "@2@": @3@**

[Description]

The provided index is not a BRIN index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.17 17816

---

---

**@1@: could not open process token: error code @2@**

[Description]

Failure in opening process token

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.18 17817

---

**@1@: could not open registry key "@2@": error code @3@**

[Description]

Failure in opening the registry key to check the license

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.19 17818

---

**@1@: could not read directory "@2@": @3@**

[Description]

Failure in reading from a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.20 17819

---

**@1@: could not read file "@2@": @3@**

[Description]

Failure in reading the file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.21 17820

---

**@1@: could not read the value "@2@" of the registry entry: error code @3@**

[Description]

Failure in reading the registry key to check the license

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.22 17821

---

**@1@: could not re-execute with restricted token: error code @2@**

[Description]

re-executing with a restricted token is not allowed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.23 17822

---

**@1@: could not remove promote signal file "@2@": @3@**

[Description]

Failure in removing promote signal file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.24 17823

---

**@1@: could not start process for command "@2@": error code @3@**

[Description]

Process start failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.25 17824

---

**@1@: could not write @2@ bytes to log file "@3@": @4@**

[Description]

Failure in writing to a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.26 17825

---

**@1@: directory "@2@" does not exist**

[Description]

directory doesn't exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.27 17826

---

**@1@: directory "@2@" is not a database cluster directory**

[Description]

directory is not a database cluster directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.28 17827

---

**@1@: invalid argument for option -f: "@2@"**

[Description]

Invalid argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.29 17828

---

**@1@: invalid argument for option -t: "@2@"**

[Description]

Invalid argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.30 17829

---

### @1@: keystore location "@2@" is too long

[Description]

keystore location is more than 1024 characters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.31 17830

---

### @1@: oldest multitransaction ID (-m) must not be 0

[Description]

The provided oldest multitransaction ID (-m) must not be 0

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.32 17831

---

### @1@: out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.33 17832

---

### @1@: out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.34 17833

---

### @1@: replication connection using slot "@2@" is unexpectedly database specific

[Description]

replication connection using slot specified is unexpectedly database specific

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.35 17834

---

### @1@: the PID file "@2@" is empty

[Description]

Wrong PID file is found, it is empty

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.36 17835

---

### @1@: too many command-line arguments (first is "@2@")

[Description]

too many command-line arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.37 17836

---

### @1@: transaction ID (-c) must be either 0 or greater than or equal to 2

[Description]

Provided transaction ID (-c) must be either 0 or greater than or equal to 2

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.38 17837

---

---

**@1@: unexpected response to TIMELINE\_HISTORY command: got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields**

[Description]

Response from server to TIMELINE\_HISTORY command is wrong from the expected

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.39 17838

---

**"@1@" is a symbolic link, but symbolic links are not supported on this platform**

[Description]

Symbolic links are not supported in this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.40 17839

---

**"@1@" is not a BRIN index**

[Description]

The provided index is not a BRIN index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.41 17840

---

**"@1@" is not a directory or symbolic link**

[Description]

Specified path is not a directory or symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.42 17841

---

**"@1@" is not a directory**

[Description]

The specified path is not a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.43 17842

---

### "@1@" is not a regular file

[Description]

The specified file is not a regular file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.44 17843

---

### "@1@" is not a symbolic link

[Description]

The specified path/file is not a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.45 17844

---

### "@1@" is not a table, view, materialized view, sequence, or foreign table

[Description]

Object is not a table, view, materialized view, sequence, or foreign table to do the alter relation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.46 17845

---

### "@1@" : stopping truncate due to conflicting lock request

[Description]

Truncating table is stopped due to conflicting lock request by vacuum

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.47 17846

---

**\\watch cannot be used with an empty query**

[Description]

\\watch comamnd cannot be used with an empty query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.48 17847

---

**\\watch cannot be used with COPY**

[Description]

\\watch command cannot be used along with COPY command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.49 17848

---

**aggregate cannot accept shell type @1@**

[Description]

Shell type is not allowed in aggregate functions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.75.50 17849

---

**aggregates cannot have output arguments**

[Description]

Defining aggregates with output arguments is not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.51 17850

---

**an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type**

[Description]

an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.52 17851

---

**argument @1 @: could not determine data type**

[Description]

Could not determine input data type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.53 17852

---

**argument @1 @: key must not be null**

[Description]

Invalid key value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.54 17853

---

**argument of lo\_read exceeds integer range**

[Description]

The length argument of lo\_read exceeds integer range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.55 17854

---

### argument of lo\_truncate exceeds integer range

[Description]

The length argument of lo\_truncate exceeds integer range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.56 17855

---

### argument of lo\_write exceeds integer range

[Description]

The provided index is not a BRIN index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.57 17856

---

### background worker "@1@": only dynamic background workers can request notification

[Description]

only dynamic background workers can request notification

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.58 17857

---

### BKPBLOCK\_HAS\_DATA not set, but data length is @1@ at @2@/@3@

[Description]

BKPBLOCK\_HAS\_DATA not set, but data length is present in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.59 17858

---

**BKPBLOCK\_HAS\_DATA set, but no data included at @1 @/@2@**

[Description]

BKPBLOCK\_HAS\_DATA set, but no data in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.60 17859

---

**BKPBLOCK\_SAME\_REL set but no previous rel at @1 @/@2@**

[Description]

BKPBLOCK\_SAME\_REL set but no previous rel is provided in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.61 17860

---

**BKPIMAGE\_HAS\_HOLE not set, but hole offset @1 @ length @2@ at @3@/@4@**

[Description]

BKPIMAGE\_HAS\_HOLE not set, but hole offset is provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.62 17861

---

**BKPIMAGE\_HAS\_HOLE set, but hole offset @1 @ length @2@ block image length @3@ at @4@/@5@**

[Description]

BKPIMAGE\_HAS\_HOLE set, but hole offset is not provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.63 17862

---

### BKPIMAGE\_IS\_COMPRESSED set, but block image length @1@ at @2@/@3@

[Description]

BKPIMAGE\_IS\_COMPRESSED set, but block image length is not provided.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.64 17863

---

### cannot allocate multiple Perl interpreters on this platform

[Description]

cannot allocate multiple Perl interpreters on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.65 17864

---

### cannot alter type of a column used in a policy definition

[Description]

cannot alter type of a column used in a policy definition

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.66 17865

---

### cannot call @1@ on a non-object

[Description]

The parameter is not a Json Object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.67 17866

---

---

**cannot change logged status of table "@1@" because it is temporary****[Description]**

Temporary table logged status cannot be changed

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.75.68 17867**

---

**cannot copy from materialized view "@1@"****[Description]**

Copy command cannot be executed on a materialized view

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.75.69 17868**

---

**cannot delete tuples during a parallel operation****[Description]**

Delete operation is not allowed in parallel mode

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.75.70 17869**

---

**cannot determine OID of function lo\_lseek64****[Description]**

lo\_lseek64 function is not defined

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.75.71 17870**

---

**cannot determine OID of function lo\_tell64**

[Description]

lo\_tell64 function is not defined

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.72 17871

---

### cannot determine OID of function lo\_truncate64

[Description]

lo\_truncate64 function is not defined

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.73 17872

---

### cannot display a value of a shell type

[Description]

Shell type cannot be displayed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.74 17873

---

### cannot duplicate null pointer (internal error)

[Description]

The given input is a null pointer

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.75 17874

---

### cannot refresh materialized view "@1@" concurrently

[Description]

Cannot refresh materialized view concurrently

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.76 17875

---

**cannot set system attribute "@1@"**

[Description]

Cannot set system attributes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.77 17876

---

**cannot setup replication origin when one is already setup**

[Description]

replication origin is already setup

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.78 17877

---

**cannot use DISTINCT with WITHIN GROUP**

[Description]

cannot use DISTINCT with WITHIN GROUP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.79 17878

---

**cannot use multiple ORDER BY clauses with WITHIN GROUP**

[Description]

cannot use multiple ORDER BY clauses with WITHIN GROUP sql query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.80 17879

---

### cannot use special role specifier in DROP ROLE

[Description]

cannot use special role specifier in DROP ROLE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.81 17880

---

### cannot use VARIADIC with WITHIN GROUP

[Description]

cannot use VARIADIC with WITHIN GROUP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.82 17881

---

### constraint "@1@" of relation "@2@" is not a foreign key constraint

[Description]

constraint is not a foreign key constraint

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.83 17882

---

### conversion from numeric to Decimal failed

[Description]

conversion from numeric to Decimal failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.84 17883

---

### **COPY data transfer failed: @1@**

#### [Description]

Failed in data transfer of COPY command

#### [System Processing]

Processing aborts

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.85 17884

---

### **corrupted item pointer: offset = @1@, length = @2@**

#### [Description]

item pointer of a page is corrupted

#### [System Processing]

Processing aborts

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.86 17885

---

### **could not change table "@1@" to logged because it references unlogged table "@2@"**

#### [Description]

could not change table logged status because it references unlogged table

#### [System Processing]

Processing aborts

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.87 17886

---

### **could not change table "@1@" to unlogged because it references logged table "@2@"**

#### [Description]

could not change table logged status because it references logged table

#### [System Processing]

Processing aborts

#### [Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.88 17887

---

---

**could not close directory "@1@": @2@****[Description]**

Failure in closing a directory

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.75.89 17888**

---

**could not close directory "@1@": @2@****[Description]**

Failure in closing a directory

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.75.90 17889**

---

**could not close file "@1@": @2@****[Description]**

Failure in file close

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.75.91 17890**

---

**could not close pipe to external command: @1@****[Description]**

Failure in closing the pipe command to external command

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.75.92 17891**

---

**could not close target file "@1@": @2@**

[Description]

Failure in closing target file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.93 17892

---

### could not convert Python Unicode object to bytes

[Description]

could not convert Python Unicode object to bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.94 17893

---

### could not create any Unix-domain sockets

[Description]

Failure in creating Unix-domain sockets

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.95 17894

---

### could not create directory "@1@": @2@

[Description]

Failure in creating a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.96 17895

---

### could not create internal procedure "@1@": @2@

[Description]

could not create internal procedure

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.97 17896

---

**could not create symbolic link at "@1@": @2@**

[Description]

Failure in creating a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.98 17897

---

**could not execute command "@1@": @2@**

[Description]

could not execute command if it is not copy stream

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.99 17898

---

**could not import a module for Decimal constructor**

[Description]

Non decimal data found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.75.100 17899

---

**could not initialize globals**

[Description]

could not initialize globals in pl/python function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76 Message Numbers Beginning with 17900

---

### 2.76.1 17900

---

**could not load module "unknown": @1@**

[Description]

Failed in loading a module

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.76.2 17901

---

**could not look up effective user ID @1@: @2@**

[Description]

Getting the current user details failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.76.3 17902

---

**could not look up local user ID @1@: @2@**

[Description]

Lookup user name failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.76.4 17903

---

**could not map dynamic shared memory segment**

[Description]

Attaching to a dynamic shared memory segment failed.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.5 17904

---

**could not open directory "@1@": @2@**

[Description]

Failure in opening the directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.6 17905

---

**could not open file "@1@" for reading: @2@**

[Description]

Failure in opening a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.7 17906

---

**could not open file "@1@" for truncation: @2@**

[Description]

Failure in opening a file for truncating it's size

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.8 17907

---

**could not open file "@1@": @2@**

[Description]

Failure in opening the file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.9 17908

---

**could not open parent table of index @1@**

[Description]

Failure in opening the parent relation of an index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.10 17909

---

**could not open source file "@1@": @2@**

[Description]

Failure in opening a source file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.11 17910

---

**could not open target file "@1@": @2@**

[Description]

Failure in opening target file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.12 17911

---

**could not read directory "@1@": @2@**

[Description]

Failure in reading from a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.13 17912

---

### could not read directory "@1@": @2@

[Description]

Failure in reading from a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.14 17913

---

### could not read file "@1@": @2@

[Description]

Failure in reading a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.15 17914

---

### could not read symbolic link "@1@": @2@

[Description]

Failure in reading a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.16 17915

---

### could not read time zone file "@1@": @2@

[Description]

Failure in reading timezone file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.17 17916

---

---

### could not remove directory "@1@": @2@

[Description]

Failure in removing a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.18 17917

---

### could not remove file "@1@": @2@

[Description]

Failure in removing a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.19 17918

---

### could not remove symbolic link "@1@": @2@

[Description]

Failure in removing a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.20 17919

---

### could not seek in log file @1@ to offset @2@: @3@

[Description]

File seek operation is failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.21 17920

---

### could not seek in source file: @1@

[Description]

Failure in executing seek system call in source file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.22 17921

---

### could not seek in target file "@1@": @2@

[Description]

Failure in executing seek system call in target file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.23 17922

---

### could not set variable "@1@"

[Description]

Setting of psql variable is failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.24 17923

---

### could not split return value from trigger: @1@

[Description]

Trigger return value couldn't be splitted

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.25 17924

---

### could not stat file "@1@": @2@

[Description]

stat system call failed on a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.26 17925

---

### could not stat file "@1@": @2@

[Description]

Failure in stat system call

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.27 17926

---

### could not truncate file "@1@" to @2@: @3@

[Description]

Failure in truncating a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.28 17927

---

### could not write file "@1@": @2@

[Description]

Failure in writing to a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.29 17928

---

### could not write to file "@1@", wrote @2@ of @3@: @4@

[Description]

Failure in writing to a file.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.30 17929

---

**data file "@1@" in source is not a regular file**

[Description]

The data file is not a regular file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.31 17930

---

**database connection requirement not indicated during registration**

[Description]

database connection requirement not indicated during background worker registration

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.32 17931

---

**declared name @1@ is already defined**

[Description]

declared name has been defined already

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.33 17932

---

**encoding conversion error on line @1@**

[Description]

encoding conversion error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.34 17933

---

### event trigger functions cannot have declared arguments

[Description]

event trigger functions cannot have declared arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.35 17934

---

### EVP error code @1@

[Description]

Non zero error message. The error number returned by ERR\_get\_error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.36 17935

---

### EVP error code @1@

[Description]

EVP error code

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.37 17936

---

### FOR value should be positive integer

[Description]

FOR loop value should be positive integer

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.38 17937

---

### foreign key referenced-columns list must not contain duplicates

[Description]

The provided foreign key referenced-columns list contain duplicates

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.39 17938

---

### foreign-data wrapper "@1@" does not support IMPORT FOREIGN SCHEMA

[Description]

IMPORT FOREIGN SCHEMA doesn't supported by the foerign data wrapper

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.40 17939

---

### improper use of "\*"

[Description]

improper use of "\"\*" in the indirection reference

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.41 17940

---

### inherited relation "@1@" is not a table or foreign table

[Description]

inherited relation is not a table or foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.42 17941

---

---

### initial position must not be null

[Description]

First member of the array must not be nul

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.43 17942

---

### invalid action (CREATE) for regular file

[Description]

Regular files are created with open\_target\_file function, not with this

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.44 17943

---

### invalid block\_id @1@ at @2@/@3@

[Description]

invalid block\_id in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.45 17944

---

### Invalid character value.

[Description]

Invalid XML character value.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.46 17945

---

### invalid compressed image at @1@/@2@, block @3@

[Description]

The provided index is not a BRIN index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.47 17946

---

### invalid info bits @1@ in log segment @2@, offset @3@

[Description]

Invalid xlog header info in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.48 17947

---

### invalid input syntax for type txid\_snapshot: "@1@"

[Description]

invalid input syntax for type txid\_snapshot

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.49 17948

---

### invalid line number: @1@

[Description]

Provided line number is wrong in the sql query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.50 17949

---

### invalid magic number in dynamic shared memory segment

[Description]

Invalid dynamic shared memory segment

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.51 17950

---

**invalid MultiXactId: @1@**

[Description]

Invalid multixactid parameter

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.52 17951

---

**invalid value "@1@" for "@2@"**

[Description]

Invalid argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.53 17952

---

**invalid value for recovery parameter "@1@": "@2@"**

[Description]

Invalid recovery configuration parameter

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.54 17953

---

**invalid value in ECOBPG\_NCHAR on line @1@. The valid value is UTF16LE/ UTF16BE/ UTF32LE/ UTF32BE**

[Description]

Invalid ECOBPG\_NCHAR environment variable value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.55 17954

---

**Junk view columns are not updatable.**

[Description]

Write operation Junk view columns are not updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.56 17955

---

**length of nvarchar type is not assigned**

[Description]

length of nvarchar type is not assigned

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.57 17956

---

**local user with ID @1@ does not exist**

[Description]

Lookup user name failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.58 17957

---

**lost connection to parallel worker**

[Description]

Error while reading message queue may caused the worker to be shutdown

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.59 17958

---

### Malformed declaration: missing version.

[Description]

Version number missing in xml document/content

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.60 17959

---

### Missing encoding in text declaration.

[Description]

missing encoding in xml document/content

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.61 17960

---

### more than one row returned for \gset

[Description]

more than one row returned for \gset command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.62 17961

---

### must be owner of event trigger @1@

[Description]

must be owner of the even trigger

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.63 17962

---

**national characters is not supported on non-utf8 databases.**

[Description]

national characters is not supported on non-utf8 databases.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.64 17963

---

**neither BKPIMAGE\_HAS\_HOLE nor BKPIMAGE\_IS\_COMPRESSED set, but block image length is @1@ at @2@/@3@**

[Description]

neither BKPIMAGE\_HAS\_HOLE nor BKPIMAGE\_IS\_COMPRESSED set, but block image length is provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.65 17964

---

**nested service specifications not supported in service file "@1@", line @2@**

[Description]

nested service specifications not supported in service file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.66 17965

---

**no Decimal attribute in module**

[Description]

no Decimal attribute in module

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.67 17966

---

### no EVP error reported

[Description]

The errorcode returned by ERR\_get\_error() function is zero.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.68 17967

---

### no rows returned for \gset

[Description]

no rows returned for \gset command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.69 17968

---

### no SSL error reported

[Description]

no SSL error reported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.70 17969

---

### not enough arguments for cursor "@1@"

[Description]

syntax error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.71 17970

---

---

### number of parameters must be between 0 and 65535

[Description]

number of parameters must be between 0 and 65535

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.72 17971

---

### operating system error @1@

[Description]

The error number passed to this function may be an out of range error no. So sterror function returns an empty string

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.73 17972

---

### operator not allowed in variable definition

[Description]

Only sizeof operation is allowed in variable definition

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.74 17973

---

### operator too long

[Description]

The length of the operator is more than or equal to 64 characters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.75 17974

---

### out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.76 17975

---

### out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.77 17976

---

### out-of-order block\_id @1 @ at @2 @/@3 @

[Description]

Out-of-order blocks in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.78 17977

---

### Parsing XML declaration: '?>' expected.

[Description]

Provided XML declaration is unfinished

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.79 17978

---

### pclose failed: @1 @

[Description]

pclose system call failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.80 17979

---

**permission denied to reassign objects**

[Description]

Insufficient privileges on the object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.81 17980

---

**pgpipe: could not accept connection: error code @1 @**

[Description]

Failure in reading a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.82 17981

---

**record with invalid length at @1 @/@2 @**

[Description]

record with invalid length in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.83 17982

---

**requested character not valid for encoding: @1 @**

[Description]

Invalid character for the encoding

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.84 17983

---

**SELECT rule's target entry @1@ has different column name from column "@2@"**

[Description]

Rule target entry column doesn't match with column name in select query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.85 17984

---

**source file list is empty**

[Description]

Source file list is empty

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.86 17985

---

**Space required.**

[Description]

Space required in the specified location of XML content.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.87 17986

---

**SPI\_execute failed: @1@**

[Description]

Failure in SPI\_execute function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.88 17987

---

### **SPI\_execute\_plan failed: @1@**

[Description]

Failure in SPI\_execute\_plan function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.89 17988

---

### **SSL error code @1@**

[Description]

SSL has reported some error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.90 17989

---

### **standalone accepts only 'yes' or 'no'.**

[Description]

XML standalone accepts only 'yes' or 'no'.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.91 17990

---

### **STDIN/STDOUT not allowed with PROGRAM**

[Description]

STDIN/STDOUT not allowed with PROGRAM in copy command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.92 17991

---

---

### symbolic link "@1@" target is too long

[Description]

Symbolic link target length is more than the specified length

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.93 17992

---

### symbolic link target too long for tar format: file name "@1@", target "@2@"

[Description]

provided symbolic link target name is too long for tar format

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.94 17993

---

### tablespace method @1@ requires @2@ argument, not @3@

[Description]

Invalid number of tablespace arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.95 17994

---

### tablespace name cannot be qualified

[Description]

The provided tablespace name is not valid

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.76.96 17995

---

### The server (version @1@.@2@) does not support editing function source.

[Description]

The server does not support editing function source.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.97 17996

---

### time zone "@1@" appears to use leap seconds

[Description]

The provided timezone appears to have leap seconds

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.98 17997

---

### too many arguments for cursor "@1@"

[Description]

syntax error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.99 17998

---

### trigger's return list must have even number of elements

[Description]

Trigger can return only even number of elements

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.76.100 17999

---

### type modifier cannot have ORDER BY

[Description]

type modifier cannot have ORDER BY clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77 Message Numbers Beginning with 18000

---

### 2.77.1 18000

---

#### unexpected EOF while reading file "@1@"

[Description]

unexpected EOF reach while reading file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.77.2 18001

---

#### unexpected page modification for directory or symbolic link "@1@"

[Description]

unexpected page modification for directory or symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.77.3 18002

---

#### unexpected result set after end-of-streaming

[Description]

unexpected data after end-of-streaming

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.77.4 18003

---

#### unexpected result status for \\watch

[Description]

unexpected result status for \\watch command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.5 18004

---

### unexpected standby message type "@1@", after receiving CopyDone

[Description]

unexpected standby message type after copyDone

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.6 18005

---

### Unix-domain socket path "@1@" is too long (maximum @2@ bytes)

[Description]

unix-domain socket path has crossed more than 100 bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.7 18006

---

### UNNEST() with multiple arguments cannot have a column definition list

[Description]

UNNEST() with multiple arguments cannot have a column definition list

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.8 18007

---

### unrecognized attribute "@1@"

[Description]

Unrecognized attribute in the trigger function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.9 18008

---

**Unrecognized libxml error code: @1@.**

[Description]

Unknown code error - the default error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.10 18009

---

**unrecognized object type in default privileges: @1@**

[Description]

Unrecognized object type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.11 18010

---

**unterminated /\* comment**

[Description]

unterminated /\* comment in the sql query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.12 18011

---

**User "@1@" has an expired password.**

[Description]

user's password has been expired

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.13 18012

---

### User "@1@" has no password assigned.

[Description]

no password has assigned to user

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.14 18013

---

### user name lookup failure: error code @1@

[Description]

Lookup user name failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.15 18014

---

### View columns that are not columns of their base relation are not updatable.

[Description]

Write operation View columns that are not columns of their base relation are not updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.16 18015

---

### View columns that refer to system columns are not updatable.

[Description]

Write operation View columns that refer to system columns are not updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.17 18016

---

### View columns that return whole-row references are not updatable.

[Description]

Write operation View columns that return whole-row references are not updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.18 18017

---

### Views containing DISTINCT are not automatically updatable.

[Description]

Write operation Views containing DISTINCT clause are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.19 18018

---

### Views containing GROUP BY are not automatically updatable.

[Description]

Write operation Views containing GROUP BY clause are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.20 18019

---

### Views containing HAVING are not automatically updatable.

[Description]

Write operation Views containing HAVING clause are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.21 18020

---

---

### Views containing LIMIT or OFFSET are not automatically updatable.

[Description]

write operation Views containing LIMIT or OFFSET are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.22 18021

---

### Views containing TABLESAMPLE are not automatically updatable.

[Description]

Write operation Views containing TABLESAMPLE are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.23 18022

---

### Views containing UNION, INTERSECT, or EXCEPT are not automatically updatable.

[Description]

Write operation Views containing UNION, INTERSECT, or EXCEPT are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.24 18023

---

### Views containing WITH are not automatically updatable.

[Description]

Write operation Views containing WITH are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.25 18024

---

### Views that do not select from a single table or view are not automatically updatable.

[Description]

Write operation Views that do not select from a single table or view are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.26 18025

---

### Views that have no updatable columns are not automatically updatable.

[Description]

Write operation Views that have no updatable columns are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.27 18026

---

### Views that return aggregate functions are not automatically updatable.

[Description]

Write operation Views that return aggregate functions are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.28 18027

---

### Views that return set-returning functions are not automatically updatable.

[Description]

Write operation Views that return set-returning functions are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.29 18028

---

### Views that return window functions are not automatically updatable.

[Description]

Write operation Views that return window functions are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.30 18029

---

**WAL file is from different database system: incorrect XLOG\_BLCKSZ in page header**

[Description]

WAL file is from a different database not generated by these binaries because of mismatch in WAL block size

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.31 18030

---

**WAL file is from different database system: incorrect XLOG\_SEG\_SIZE in page header**

[Description]

WAL file is from a different database not generated by these binaries because of mismatch in WAL segment size

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.32 18031

---

**WHERE CURRENT OF is not supported on a view with grouping or aggregation**

[Description]

WHERE CURRENT OF syntax is not supported on view where there exists grouping or aggregation in the view query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.33 18032

---

**WHERE CURRENT OF is not supported on a view with more than one underlying relation**

[Description]

WHERE CURRENT OF syntax is not supported on view where there are more than one underlying relation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.34 18033

---

### WHERE CURRENT OF is not supported on a view with no underlying relation

[Description]

WHERE CURRENT OF syntax is not supported on view where there is no underlying relation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.35 18034

---

### window function @1@ cannot have WITHIN GROUP

[Description]

window function cannot have WITHIN GROUP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.36 18035

---

### window function @1@ requires an OVER clause

[Description]

True window functions must be called with a window definition

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.37 18036

---

### WITH CHECK OPTION not supported on recursive views

[Description]

WITH CHECK OPTION not supported on recursive views

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.38 18037

---

**@1@: expected @2@-element float8 array**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.77.39 18038

---

**\@1@\ must be registered in shared\_preload\_libraries and session\_preload\_libraries**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.40 18039

---

**\@1@\ must be registered in shared\_preload\_libraries**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.41 18040

---

**could not stat file \@1@: @2@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.42 18041

---

---

### Aggreg found in non-Agg plan node

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.77.43 18042

---

### Cannot find merge transition function

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.44 18043

---

### could not find block containing chunk @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.45 18044

---

### duplicate lock detected

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.46 18045

---

### expected 2-element int8 array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.77.47 18046

---

### expected 2-element interval array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.77.48 18047

---

### extent check error.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.49 18048

---

### index \@1@\ already contains data

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.77.50 18049

---

### internal error. memory not allocated.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.51 18050

---

**internal error. unknown code.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.52 18051

---

**internal error. multiple ROS command running**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.53 18052

---

**interval out of range**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.77.54 18053

---

**last recorded ros command is fatally broken.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.55 18054

---

**max\_worker\_processes is reset to @1@ from @2@ because old value is too small**

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.77.56 18055

---

**overwrite column meta data**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.57 18056

---

**planner failed to minimize tlist of scan**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.58 18057

---

**process @1@ is trying to acquire a lock owned by @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.59 18058

---

**ROS has not been formatted yet.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.60 18059

---

**starts ROS command \@1 @\**

[Description]

An error occurred.

[System Processing]

Continues processing.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.61 18060

---

**finished ROS command \@1 @\ (%.03f ms)**

[Description]

An error occurred.

[System Processing]

Continues processing.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.62 18061

---

**could not read from SMC evacuating temporary file: @1 @**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.63 18062

---

**could not read from SMC evacuating temporary file: @1@**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.77.64 18063

---

**could not read from SMC evacuating temporary file: nread=@1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.65 18064

---

**unterminated ROS command**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.66 18065

---

**vci\_CSFetchVirtualTuples returns @1@ num\_fetched\_rows(crid=% PRIi64 )**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.67 18066

---

---

### **vci\_index\_size requires 1 argument**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## **2.77.68 18067**

---

### **cannot alter table because the table is indexed by VCI**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.77.69 18068**

---

### **ALTER INDEX SET TABLESPACE is not supported for VCI**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.77.70 18069**

---

### **REINDEX is not supported for VCI**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## **2.77.71 18070**

---

### **could not use VCI: local ROS size (@1@) exceeds vci.max\_local\_ros (@2@)**

[Description]

An error occurred.

[System Processing]

Continues processing.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.72 18071

---

### could not use VCI: local ROS size (@1@) exceeds half of vci.shared\_work\_mem (@2@)

[Description]

An error occurred.

[System Processing]

Continues processing.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.73 18072

---

### access method \@1@\ does not support EXCLUDE clause

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.77.74 18073

---

### access method \@1@\ does not support index on temporary table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.77.75 18074

---

### access method \@1@\ does not support to CREATE INDEX on the expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.77.76 18075

---

### access method \@1@\ does not support concurrent index drop

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.77.77 18076

---

### access method \@1@\ does not support concurrent index build

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.77.78 18077

---

### access method \@1@\ does not support partial-index

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.77.79 18078

---

### access method \@1@\ does not support index on materialized view

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.77.80 18079

---

### compression buffer is full

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.77.81 18080

---

### cache lookup failed for function @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.82 18081

---

### could not unmap shared memory: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.77.83 18082

---

### incompatible VCI version: expected (@1@, @2@), stored (@3@, @4@).

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.84 18083

---

### parent @1@ of child @2@ died unexpectedly

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.85 18084

---

### System is too busy to do in a parallel execution: allocatable\_cpus = %.2f

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

## 2.77.86 18085

---

### cache lookup failed for aggregate @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.87 18086

---

### could not open directory \@1@\: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.88 18087

---

**value for domain @1@ violates check constraint \@2@\**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.77.89 18088

---

**domain @1@ does not allow null values**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.77.90 18089

---

**unrecognized boolop: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.77.91 18090

---

**could not start background process**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.92 18091

---

---

### could not start background process : postmaster died

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.93 18092

---

### could not stop background process

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.94 18093

---

### could not register background process

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.95 18094

---

### could not truncate file \@1@\: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.77.96 18095

---

### could not read from file \@1@\: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.97 18096

---

### could not unlink file \@1@\: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.98 18097

---

### could not open file \@1@\: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.99 18098

---

### could not write to file \@1@\: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.77.100 18099

---

### out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.78 Message Numbers Beginning with 18100

---

### 2.78.1 18100

---

**requested memory size 0x@1@lx overflows maximum managable memory size 0x@2@lx**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.78.2 18101

---

**a worker process died unexpectedly**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.78.3 18102

---

**could not map shared memory: @1@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.78.4 18103

---

### could not identify a comparison function for type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.78.5 18104

---

### aggregate @1@ needs to have compatible input type and transition type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.78.6 18105

---

### aggregate function calls cannot be nested

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.78.7 18106

---

### cannot pass more than @1@ argument to a function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.78.8 18107

---

---

### attribute @1@ has wrong type

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.78.9 18108

---

### value out of range: underflow

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.78.10 18109

---

### value out of range: overflow

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.78.11 18110

---

### could not read from SMC evacuating temporary file: nread=@1@

#### [Description]

An unexpected error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

Contact Fujitsu technical support.

---

## 2.78.12 18111

---

### extent check error.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79 Message Numbers Beginning with 20000

---

### 2.79.1 20000

---

#### [listagg\\_transfn called in non-aggregate context](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.79.2 20001

---

#### [feature not supported](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.79.3 20002

---

#### [median4\\_transfn called in non-aggregate context](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.79.4 20003

---

#### [lock request error](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.5 20004

---

### event registration error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.6 20005

---

### event name is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.7 20006

---

### feature not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.8 20007

---

### not called by trigger manager

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.9 20008

---

### not called on valid event

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.10 20009

---

### SPI\_connect failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.11 20010

---

### not called with valid relation

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.12 20011

---

### attribute event not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.13 20012

---

### attribute message not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.14 20013

---

### SPI\_prepare failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.15 20014

---

### can't execute sql

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.16 20015

---

### SPI execute error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.17 20016

---

### invalid value for @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.18 20017

---

### date out of range

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.19 20018

---

### timestamp out of range

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.20 20019

---

### invalid cursor number

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.21 20020

---

---

### failed to execute SQL statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.79.22 20021

---

### SQL is empty string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.79.23 20022

---

### host variable name "@1@" is too long

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.79.24 20023

---

### host variable name is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

### out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.79.51 20050

---

### insufficient privilege

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.52 20051

---

### datatype mismatch

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.53 20052

---

### unexpected type: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.54 20053

---

### pipe name is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.55 20054

---

### pipe creation error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.56 20055

---

### message is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.57 20056

---

### invalid Unicode escape

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

## 2.79.75 20074

---

### unsafe use of \\ in a string literal

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.76 20075

---

**@1@ at end of input**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.77 20076

---

**@1@ at or near "@2@"**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.78 20077

---

**dbms\_yylex\_init() failed: @1@.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## 2.79.79 20078

---

**invalid hexadecimal digit**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.79.80 20079**

---

### **nonstandard use of \ in a string literal**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.79.81 20080**

---

### **nonstandard use of \\ in a string literal**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.79.82 20081**

---

### **nonstandard use of escape in a string literal**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

## **2.80 Message Numbers Beginning with 70000**

---

### **2.80.1 70001**

---

#### **Error loading default settings from driverconfig.properties**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.80.2 70002

---

**Your security policy has prevented the connection from being attempted. You probably need to grant the connect java.net.SocketPermission to the database server host and port that you wish to connect to.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.3 70003

---

**Something unusual has occurred to cause the driver to fail. Please report this exception.**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.80.4 70004

---

**Connection attempt timed out.**

[Description]

Timeout occurred during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance\_work\_mem.

## 2.80.5 70005

---

### Interrupted while attempting to connect.

#### [Description]

The database server was disconnected during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.80.6 70006

---

### Method @1@ is not yet implemented.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.7 70007

---

### Requested CopyIn but got @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.8 70008

---

### Requested CopyOut but got @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.9 70009

---

### Copying from database failed: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.80.10 70010

---

### This copy stream is closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.11 70011

---

### Read from copy failed.

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- If the COMMIT process is not executed after update, add the COMMIT process.
  - If the total number of update records in a single transaction is high, split it into short transactions.
  - If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - Confirm that the database server has not stopped.
    - If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.80.12 70012

---

### Cannot write to copy a byte of value @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.13 70013

---

### A connection could not be made using the requested protocol @1@.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.14 70014

---

### Premature end of input stream, expected @1@ bytes, but only read @2@.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.15 70015

---

### Expected an EOF from server, got: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.16 70016

---

### An unexpected result was returned by a query.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.17 70017

---

### Illegal UTF-8 sequence: byte @1@ of @2@ byte sequence is not 10xxxxxx: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.18 70018

---

### Illegal UTF-8 sequence: @1@ bytes used to encode a @2@ byte value: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.19 70019

---

### Illegal UTF-8 sequence: initial byte is @1@: @2@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.20 70020

---

### Illegal UTF-8 sequence: final value is out of range: @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.21 70021

---

### Illegal UTF-8 sequence: final value is a surrogate value: @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.22 70022

---

### Zero bytes may not occur in string parameters.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.23 70023

---

---

**Zero bytes may not occur in identifiers.****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.80.24 70024**

---

**Cannot convert an instance of @1@ to type @2@****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.80.25 70025**

---

**Connection refused. Check that the hostname and port are correct and that the postmaster is accepting TCP/IP connections.****[Description]**

An error occurred during execution of the application or command.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.80.26 70026**

---

**The connection attempt failed.****[Description]**

The database server was disconnected during execution of the application.

**[System Processing]**

Processing will be aborted.

**[Action]**

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.80.27 70027

---

### The server does not support SSL.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.28 70028

---

### An error occurred while setting up the SSL connection.

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.29 70029

---

### Connection rejected: @1@.

#### [Description]

The database server was disconnected during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)

- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.80.30 70030

---

**The server requested password-based authentication, but no password was provided.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.31 70031

---

**The authentication type @1@ is not supported. Check that you have configured the pg\_hba.conf file to include the client's IP address or subnet, and that it is using an authentication scheme supported by the driver.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.32 70032

---

**Protocol error. Session setup failed.**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.33 70033

---

### Backend start-up failed: @1@.

#### [Description]

The database server was disconnected during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.80.34 70034

---

### The column index is out of range: @1@, number of columns: @2@.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.35 70035

---

### No value specified for parameter @1@.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.36 70036

---

### Expected command status BEGIN, got @1@.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.37 70037

---

### Unexpected command status: @1@.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.38 70038

---

### An I/O error occurred while sending to the backend.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.39 70039

---

### Unknown Response Type @1@.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.40 70040

---

### Ran out of memory retrieving query results.

#### [Description]

There was insufficient free space in the server's memory during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

## 2.80.41 70041

---

### Unable to interpret the update count in command completion tag: @1@.

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.42 70042

---

### Copy not implemented for protocol version 2

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.43 70043

---

### SSPI authentication is not supported because it is not portable. Try configuring the server to use GSSAPI instead.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.44 70044

---

### CommandComplete expected COPY but got:

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.45 70045

---

### Tried to obtain lock while already holding it

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.46 70046

---

### Tried to break lock on database connection

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.47 70047

---

### Interrupted while waiting to obtain lock on database connection

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.48 70048

---

---

### Unable to bind parameter values for statement.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.80.49 70049

---

### Database connection failed when starting copy

#### [Description]

The database server was disconnected during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
  - b) If the database server is starting or stopping, re-execute the command after the database server starts.

---

## 2.80.50 70050

---

### Tried to cancel an inactive copy operation

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.51 70051

---

### Database connection failed when canceling copy operation

#### [Description]

The database server was disconnected during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.80.52 70052

---

### Missing expected error response to copy cancel request

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.53 70053

---

### Got @1@ error responses to single copy cancel request

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.54 70054

---

### Tried to end inactive copy

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.55 70055

---

### Database connection failed when ending copy

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
- b) If the total number of update records in a single transaction is high, split it into short transactions.
- c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

- a) Confirm that the database server has not stopped.
- b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.80.56 70056

---

### Tried to write to an inactive copy operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.57 70057

---

### Database connection failed when writing to copy

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.80.58 70058

---

### Tried to read from inactive copy

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.59 70059

---

### Database connection failed when reading from copy

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
  - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.80.60 70060

### Received CommandComplete "@1@" without an active copy operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.61 70061

---

### Got CopyInResponse from server during an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.62 70062

---

---

### Got CopyOutResponse from server during an active @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.80.63 70063

---

### Got CopyData without an active copy operation

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.80.64 70064

---

### Unexpected copydata from server for @1@

#### [Description]

An error occurred during communication between the application and the database server.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

---

## 2.80.65 70065

---

### Unexpected packet type during copy: @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.80.66 70066

---

**Bind message length @1@ too long. This can be caused by very large or incorrect length specifications on InputStream parameters.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.67 70067

---

**The server's client\_encoding parameter was changed to @1@. The JDBC driver requires client\_encoding to be UTF8 for correct operation.**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.68 70068

---

**The server's DateStyle parameter was changed to @1@. The JDBC driver requires DateStyle to begin with ISO for correct operation.**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.69 70069

---

**The server's standard\_conforming\_strings parameter was reported as @1@. The JDBC driver expected on or off.**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.80.70 70070

---

**The driver currently does not support COPY operations.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.71 70071

---

**This PooledConnection has already been closed.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.72 70072

---

**Connection has been closed automatically because a new connection was opened for the same PooledConnection or the PooledConnection has been closed.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.80.73 70073

---

**Connection has been closed.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

### **2.81.2 70101**

---

**Transaction isolation level @1@ not supported.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.81.3 70102

---

#### Unable to translate data into the desired encoding.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.81.4 70103

---

#### Unable to determine a value for MaxIndexKeys due to missing system catalog data.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

### 2.81.5 70104

---

#### Unable to find name datatype in the system catalogs.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

### 2.81.6 70105

---

#### Operation requires a scrollable ResultSet, but this ResultSet is FORWARD\_ONLY.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.81.7 70106

---

---

### Unexpected error while decoding character data from a large object.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.81.8 70107

---

### Can't use relative move methods while on the insert row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.9 70108

---

### Invalid fetch direction constant: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.10 70109

---

### Cannot call cancelRowUpdates() when on the insert row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.11 70110

---

### Cannot call deleteRow() when on the insert row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.12 70111

---

**Currently positioned before the start of the ResultSet. You cannot call deleteRow() here.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.13 70112

---

**Currently positioned after the end of the ResultSet. You cannot call deleteRow() here.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.14 70113

---

**There are no rows in this ResultSet.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.15 70114

---

**Not on the insert row.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.16 70115

---

**You must specify at least one column value to insert a row.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.17 70116

---

**The JVM claims not to support the encoding: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.18 70117

---

**Provided InputStream failed.**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.81.19 70118

---

**Provided Reader failed.**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.81.20 70119

---

### Can't refresh the insert row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.21 70120

---

### Cannot call updateRow() when on the insert row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.22 70121

---

### Cannot update the ResultSet because it is either before the start or after the end of the results.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.23 70122

---

### ResultSets with concurrency CONCUR\_READ\_ONLY cannot be updated.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.24 70123

---

**No primary key found for table @1@.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.25 70124

---

**Fetch size must be a value greater to or equal to 0.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.26 70125

---

**Invalid character data was found. This is most likely caused by stored data containing characters that are invalid for the character set the database was created in. The most common example of this is storing 8bit data in a SQL\_ASCII database.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.27 70126

---

**Bad value for type @1@ : @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.28 70127

---

**The column name @1@ was not found in this ResultSet.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.29 70128

---

**ResultSet is not updateable. The query that generated this result set must select only one table, and must select all primary keys from that table. See the JDBC 2.1 API Specification, section 5.6 for more details.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.30 70129

---

**This ResultSet is closed.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.31 70130

---

**ResultSet not positioned properly, perhaps you need to call next.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.32 70131

---

### Can't use query methods that take a query string on a PreparedStatement.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.33 70132

---

### Multiple ResultSets were returned by the query.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.34 70133

---

### A CallableStatement was executed with nothing returned.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.35 70134

---

### A CallableStatement was executed with an invalid number of parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.36 70135

---

---

**A CallableStatement function was executed and the out parameter @1@ was of type @2@ however type @3@ was registered.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.37 70136

---

**Maximum number of rows must be a value greater than or equal to 0.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.38 70137

---

**Query timeout must be a value greater than or equals to 0.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.39 70138

---

**The maximum field size must be a value greater than or equal to 0.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.40 70139

---

**Unknown Types value.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.41 70140

---

### Invalid stream length @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.42 70141

---

### The JVM claims not to support the @1@ encoding.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.43 70142

---

### Unknown type @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.44 70143

---

### Cannot cast an instance of @1@ to type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.45 70144

---

**Unsupported Types value: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.46 70145

---

**Can't infer the SQL type to use for an instance of @1@. Use setObject() with an explicit Types value to specify the type to use.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.47 70146

---

**This statement does not declare an OUT parameter. Use '{' ?= call ... '}' to declare one.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.48 70147

---

**wasNull cannot be call before fetching a result.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.49 70148

---

**Malformed function or procedure escape syntax at offset @1@.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.50 70149

---

**Parameter of type @1@ was registered, but call to get@2@ (sqltype=@3@) was made.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.51 70150

---

**A CallableStatement was declared, but no call to registerOutParameter(1, <some type>) was made.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.52 70151

---

**No function outputs were registered.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.53 70152

---

**Results cannot be retrieved from a CallableStatement before it is executed.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.54 70153

---

**This statement has been closed.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.55 70154

---

**Too many update results were returned.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.56 70155

---

**Batch entry @1@ @2@ was aborted. Call getNextException to see the cause.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.57 70156

---

### **Unexpected error writing large object to database.**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.81.58 70157

---

### **@1@ function takes one and only one argument.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.59 70158

---

### **@1@ function takes two and only two arguments.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.60 70159

---

### **@1@ function takes four and only four argument.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.61 70160

---

### @1@ function takes two or three arguments.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.62 70161

---

### @1@ function doesn't take any argument.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.63 70162

---

### @1@ function takes three and only three arguments.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.64 70163

---

### Interval @1@ not yet implemented

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.65 70164

---

---

**Infinite value found for timestamp/date. This cannot be represented as time.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.66 70165

---

**The class @1@ does not implement org.postgresql.util.PGobject.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.67 70166

---

**Unknown ResultSet holdability setting: @1@.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.68 70167

---

**Server versions prior to 8.0 do not support savepoints.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.69 70168

---

**Cannot establish a savepoint in auto-commit mode.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.70 70169

---

### Returning autogenerated keys is not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.71 70170

---

### The parameter index is out of range: @1@, number of parameters: @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.72 70171

---

### Returning autogenerated keys is only supported for 8.2 and later servers.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.73 70172

---

### Returning autogenerated keys by column index is not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.74 70173

---

### Cannot reference a savepoint after it has been released.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.75 70174

---

### Cannot retrieve the id of a named savepoint.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.76 70175

---

### Cannot retrieve the name of an unnamed savepoint.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.77 70176

---

### Invalid UUID data.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.78 70177

---

### Unable to find server array type for provided name @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.79 70178

---

### Failed to set ClientInfo property: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.81.80 70179

---

### ClientInfo property not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.81 70180

---

### Unable to decode xml data.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.82 70181

---

**Unknown XML Source class: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.83 70182

---

**Unable to create SAXResult for SQLXML.**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.81.84 70183

---

**Unable to create StAXResult for SQLXML**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.81.85 70184

---

**Unknown XML Result class: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.81.86 70185

---

---

**This SQLXML object has already been freed.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.87 70186

---

**This SQLXML object has not been initialized, so you cannot retrieve data from it.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.88 70187

---

**Failed to convert binary xml data to encoding: @1@.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.89 70188

---

**Unable to convert DOMResult SQLXML data to a string.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.90 70189

---

**This SQLXML object has already been initialized, so you cannot manipulate it further.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.91 70190

---

### Failed to initialize LargeObject API

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.81.92 70191

---

### Large Objects may not be used in auto-commit mode.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.93 70192

---

### The SSLSocketFactory class provided @1@ could not be instantiated.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.94 70193

---

### Conversion of interval failed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.95 70194

---

### Conversion of money failed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.96 70195

---

### Transaction control methods setAutoCommit(true), commit, rollback and setSavePoint not allowed while an XA transaction is active.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.97 70196

---

### Invalid flags

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.81.98 70197

---

### xid must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## **2.81.99 70198**

---

### **Connection is busy with another transaction**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## **2.81.100 70199**

---

### **suspend/resume not implemented**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## **2.82 Message Numbers Beginning with 70200**

---

### **2.82.1 70200**

---

#### **Transaction interleaving not implemented**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### **2.82.2 70201**

---

#### **Error disabling autocommit**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

### 2.82.3 70202

---

**tried to call end without corresponding start call**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.82.4 70203

---

**Not implemented: Prepare must be issued using the same connection that started the transaction**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.82.5 70204

---

**Prepare called before end**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.82.6 70205

---

**Server versions prior to 8.1 do not support two-phase commit.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.82.7 70206

---

### Error preparing transaction

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.82.8 70207

---

### Invalid flag

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.82.9 70208

---

### Error during recover

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

---

## 2.82.10 70209

---

### Error rolling back prepared transaction

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.82.11 70210

---

**Not implemented: one-phase commit must be issued using the same connection that was used to start it**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.82.12 70211

---

**commit called before end**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.82.13 70212

---

**Error during one-phase commit**

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.82.14 70213

---

**Not implemented: 2nd phase commit must be issued using an idle connection**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.82.15 70214

---

### Error committing prepared transaction

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

## 2.82.16 70215

---

### Heuristic commit/rollback not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.82.17 70216

---

### Invalid definition statement format in connection configuration file. line number: @1@

[Description]

The format of a parameter definition statement in the connection configuration file is invalid.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Correct the connection configuration file and restart the application.

## 2.82.18 70217

---

### The same server name is specified by two or more SERVER parameters in the connection configuration file.

[Description]

The same server name is specified in multiple SERVER parameters in the connection configuration file.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Correct the server name specified in the SERVER parameter of the connection configuration file, and restart the application.

## 2.82.19 70218

---

### The connection configuration file cannot be opened. detail: "@1@"

[Description]

The process to open the connection configuration file failed.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Check the state of the connection configuration file, remove the cause of the error, and restart the application.

## 2.82.20 70219

---

### I/O error occurred during the reading of connection configuration file. file name: "@1@" detail: "@2@"

[Description]

An I/O error occurred during loading of the connection configuration file.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Check the state of the connection configuration file, remove the cause of the error, and restart the application.

## 2.82.21 70220

---

### server does not support auto connection switching

[Description]

The server does not support auto connection switching.

[System Processing]

Processing is aborted.

[Action]

Specify servers that support auto connection switching.

## 2.82.22 70221

---

### could not find a suitable target server

[Description]

Could not find a suitable target server.

[System Processing]

Processing is aborted.

[Action]

Check following settings (host, IP address, port number, or targetServer):

- Connection string
- Connection service file
- Data source of JDBC or ODBC
- Environment variables for default connection parameter values (ex. PGHOST)
- Arguments of functions of libpq
- Options of command

## 2.82.23 70222

---

### Invalid timeout (@1@<0).

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.82.24 70225

---

### invalid value for targetserver: @1@

[Description]

value of targetserver is invalid.

[System Processing]

Processing is aborted.

[Action]

Set one of the following:

- primary
- standby
- prefer\_standby
- any (can be specified only JDBC)

## 2.82.25 70226

---

### The sslservercertcn @1@ could not be verified.

[Description]

value of sslservercertcn is different from common name in the server certificate.

[System Processing]

Processing is aborted.

[Action]

Set SSL certificate's common name to sslservercertcn.

## 2.82.26 70227

---

### The sslservercertcn @1@ could not be verified by hostnameverifier @2@.

[Description]

value of sslservercertcn is different from common name in the server certificate.

[System Processing]

Processing is aborted.

[Action]

- Set SSL certificate's common name to sslservercertcn.
- Check the program of class specified by hostnameverifier.

## 2.83 Message Numbers Beginning with 80000

---

### 2.83.1 80001

---

#### The connection configuration file cannot be opened. detail: '@1@'

[Description]

The process to open the connection configuration file failed.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Check the state of the connection configuration file, remove the cause of the error, and restart the application.

### 2.83.2 80002

---

#### Invalid definition statement format in connection configuration file. line number: @1@

[Description]

The format of a parameter definition statement in the connection configuration file is invalid.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Correct the connection configuration file and restart the application.

### 2.83.3 80003

---

**The same server name is specified by two or more SERVER parameters in the connection configuration file.**

[Description]

The same server name is specified in multiple SERVER parameters in the connection configuration file.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Correct the server name specified in the SERVER parameter of the connection configuration file, and restart the application.

### 2.83.4 80004

---

**I/O error occurred during the reading of connection configuration file. file name: '@1@' detail: '@2@'**

[Description]

An I/O error occurred during loading of the connection configuration file.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Check the state of the connection configuration file, remove the cause of the error, and restart the application.

### 2.83.5 80005

---

**CommandTimeout can't be less than zero.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.83.6 80006

---

**The Connection is broken.**

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
  - b) If the total number of update records in a single transaction is high, split it into short transactions.
  - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
    - a) Confirm that the database server has not stopped.
    - b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.83.7 80007

---

### The Connection is not open.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.8 80008

---

### Parameter @1@ not found in query.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.9 80009

---

### The Connection property can't be changed with an uncommitted transaction.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.10 80010

---

**There is already an open DataReader associated with this Command which must be closed first.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.11 80011

---

**@1@ does not exist in pg\_proc**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.12 80012

---

**Invalid parameter type: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.13 80013

---

**Connection is not open**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.14 80014

---

**Connection already open**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.15 80015

---

**Invalid database name: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.16 80016

---

**Connection string argument missing!**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.17 80017

---

**Nested/Concurrent transactions aren't supported.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.18 80018

---

**numeric value @1@ in SqlConnection exceeds maximum value @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.19 80019

---

**numeric value @1@ in SqlConnection is below minimum value @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.20 80020

---

**expecting @1@[True/False] value in SqlConnection**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.21 80021

---

**expecting @1@[Numeric] value in SqlConnection**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.22 80022

---

### expecting @1 @=[Protocol Version] value in ConnectionString

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.23 80023

---

### key=value argument incorrect in ConnectionString

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.24 80024

---

### Attempt to set compatibility with version @1@ when using version @2@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.25 80025

---

### There is already an open DataReader associated with this Command which must be closed first.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.26 80026

---

### ApplicationName not supported.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.27 80027

---

### Timeout while getting a connection from pool.

#### [Description]

Timeout occurred during execution of the application.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance\_work\_mem.

## 2.83.28 80028

---

### Connection pool exceeds maximum size.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.29 80029

---

### Not a COPY IN query: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.30 80030

---

### Copy can only start in Ready state, not in @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.31 80031

---

### Tried to set Position of network stream @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.32 80032

---

### Tried to read non-readable @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.33 80033

---

### Tried to seek non-seekable @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.34 80034

---

### Tried to set length of network stream @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.35 80035

---

### Not a COPY OUT query, not in @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.36 80036

---

### Copy can only start in Ready state, not in @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.37 80037

---

### Tried to set Position of network stream @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.38 80038

---

**Tried to write non-writable @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.39 80039

---

**Tried to flush read-only @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.40 80040

---

**Tried to seek non-seekable @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.41 80041

---

**Tried to set length of network stream @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.42 80042

---

### Do not change stream of an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.43 80043

---

### Do not change delimiter of an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.44 80044

---

### Do not change separator of an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.45 80045

---

### Do not change escape symbol of an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.46 80046

---

---

### Do not change null symbol of an active @1@

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.47 80047

---

### Tried to add too many fields to a copy record with @1@ fields

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.48 80048

---

### Invalid attempt to read when no data is present.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.49 80049

---

### Column index out of range

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.50 80050

---

### could not find a suitable target server

[Description]

Could not find a suitable target server.

[System Processing]

Processing is aborted.

[Action]

Check following settings (host, IP address, port number, or targetServer):

- Connection string
- Connection service file
- Data source of JDBC or ODBC
- Environment variables for default connection parameter values(ex. PGHOST)
- Arguments of functions of libpq
- Options of command

## 2.83.51 80051

---

### server does not support auto connection switching

[Description]

The server does not support auto connection switching.

[System Processing]

Processing is aborted.

[Action]

Specify servers that support auto connection switching.

## 2.83.52 80052

---

### Only AuthenticationClearTextPassword and AuthenticationMD5Password supported for now. Received: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.53 80053

---

### A timeout has occurred. If you were establishing a connection, increase Timeout value in ConnectionString. If you were executing a command, increase the CommandTimeout value in ConnectionString or in your NpgsqlCommand object.

[Description]

Timeout occurred during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance\_work\_mem.

## 2.83.54 80054

---

### Connection establishment timeout. Increase Timeout value in ConnectionString.

### [Description]

Timeout occurred during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance\_work\_mem.

## 2.83.55 80055

---

### Failed to establish a connection to '@1@'.

### [Description]

The database server was disconnected during execution of the application.

### [System Processing]

Processing will be aborted.

### [Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

## 2.83.56 80056

---

**Ssl connection requested. No Ssl enabled connection from this host is configured.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.57 80057

---

**Backend sent unrecognized response type: @1@**

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

## 2.83.58 80058

---

**Store does not support specified edm type**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.59 80059

---

### Can't cast @1@ into any valid DbType.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.60 80060

---

### Cannot set NpgsqlDbType to just Array, Binary-Or with the element type (e.g. Array of Box is NpgsqlDbType.Array | NpgsqlDbType.Box).

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.61 80061

---

### Can't cast @1@ into NpgsqlParameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.62 80062

---

### Invalid attempt to read from column ordinal '@1@'. With CommandBehavior.SequentialAccess, you may only read from column ordinal '@2@' or greater.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.63 80063

---

### this[] index value

#### [Description]

An unexpected error occurred.

#### [System Processing]

Processing will be aborted.

#### [Action]

Contact Fujitsu technical support.

## 2.83.64 80064

---

### Field not found

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.65 80065

---

### No transaction in progress.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.66 80066

---

### Savepoint is not supported by backend.

#### [Description]

An error occurred during execution of the application or command.

#### [System Processing]

Processing will be aborted.

#### [Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## 2.83.67 80067

---

---

### Savepoint name cannot have semicolon.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.68 80068

---

### The collection is read-only

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.69 80069

---

### NotSupported @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.70 80070

---

### Require primitive EdmType

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

## 2.83.71 80071

---

### NotSupported: @1@ @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## **2.83.72 80072**

---

### **The authData parameter can only be null at the first call to continue!**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

## **2.83.73 80073**

---

### **SSPI returned invalid number of output buffers**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

# Chapter 3 Mirroring Controller Messages

This chapter explains messages output by Mirroring Controller.

## 3.1 Message Numbers Beginning with MCA00000

### 3.1.1 MCA00001

**"could not read file "{0}": exception={1}: {2}"**

[Description]

Could not read the file.

[Parameters]

{0}: file name

{1}: exception type

{2}: exception detail

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the message, and then remove it.

### 3.1.2 MCA00002

**{0}: "wrong number of server ID in definition file "{1}""**

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

### 3.1.3 MCA00003

**{0}: "server ID not found in definition file "{1}" line {2}"**

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

### 3.1.4 MCA00004

---

**{0}: "server ID specified in definition file "{1}" too long (max {2} bytes) line {3}"**

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: max length of server ID

{3}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

### 3.1.5 MCA00005

---

**"invalid host name or IP address "{1}" in definition file "{0}"**

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: file name

{1}: host name or IP address

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

### 3.1.6 MCA00006

---

**{0}: "invalid port number in definition file "{1}" line {2}"**

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

### 3.1.7 MCA00007

---

**{0}: "invalid format specified in definition file "{1}" line {2}"**

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

### 3.1.8 MCA00008

---

**{0}: "invalid value for parameter "{2}" in definition file "{1}"**

[Description]

Invalid parameter was found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

### 3.1.9 MCA00009

---

**{0}: "no value for parameter "{2}" specified in definition file "{1}"**

[Description]

Invalid parameter was found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

### 3.1.10 MCA00010

---

**{0}: "unrecognized parameter "{2}" in definition file "{1}"**

[Description]

Unrecognized parameter was found in definition file.

[Parameters]

{0}: file name

{1}: command name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

### 3.1.11 MCA00011

---

**%s: no operation mode specified**

[Description]

No operation mode was specified.

[Parameters]

%s: command name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying operation modes.

### 3.1.12 MCA00012

---

**%s: unrecognized operation mode "%s"**

[Description]

Unrecognized operation mode was specified.

[Parameters]

%s: command name

%s: operation mode

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying operation modes.

### 3.1.13 MCA00013

---

**%s: option "%s" duplicated**

[Description]

Certain option is duplicated.

[Parameters]

%s: command

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

### 3.1.14 MCA00014

---

**%s: "%s" option conflicts with "%s" option**

[Description]

Options are conflicting.

[Parameters]

%s: command

%s: option

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

### 3.1.15 MCA00015

---

**%s: option requires an argument -- %s**

[Description]

No argument specified for the option.

[Parameters]

%s: command

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

### 3.1.16 MCA00016

---

**%s: neither "%s" option nor environment variable "%s" specified**

[Description]

Both of required option and equivalent environment variable were not specified.

[Parameters]

%s: command

%s: option

%s: environment variable

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying required option or equivalent environment variable.

### 3.1.17 MCA00017

---

**%s: out of memory**

[Description]

Out of memory error occurred.

[Parameters]

%s: command

[System Processing]

Processing will be aborted.

[Action]

Obtain free memory space by stopping unnecessary processes or changing system settings.

### 3.1.18 MCA00018

---

**out of memory**

[Description]

Out of memory error occurred.

[System Processing]

Processing will be aborted.

[Action]

Obtain free memory space by stopping unnecessary processes or changing system settings.

### 3.1.19 MCA00019

---

**detected an error on the monitored object "{0}({1})": {2}**

[Description]

An error was detected on the monitored object.

[Parameters]

{0}: monitored object (server, database process, data storage destination directory, transaction log storage destination directory, tablespace directory)

{1}: object name (host name, database process name, directory path)

{2}: error detail ("no response:", "read/write error:" and detailed information)

[System Processing]

Perform failover or detaching.

If failover or detaching is already performed, these functions would be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide".

### 3.1.20 MCA00020

---

**unexpected error occurred in the monitoring process: {0}**

[Description]

Monitoring process cannot continue because an unexpected error was occurred during its processing.

[Parameters]

{0}: error detail

[System Processing]

Continues processing.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide".

### 3.1.21 MCA00021

---

**starting to {2} from {0} to {1}.**

[Description]

Switching standby server to primary server.

[Parameters]

{0}: server ID of primary server

{1}: server ID of standby server

{2}: "fail over" or "switch over"

[Action]

If Mirroring Controller executed switching automatically, find the message output before this message from system log or event log to identify the cause of switching, and then work around according to the Action of the message.

### 3.1.22 MCA00022

---

#### **{2} completed.switched from {0} to {1}**

##### [Description]

Switching standby server to primary server was completed.

##### [Parameters]

{0}: server ID of primary server

{1}: server ID of standby server

{2}: "fail over"or"switch over"

### 3.1.23 MCA00023

---

#### **failed to {2} from {0} to {1}**

##### [Description]

Failed to switch to primary server because of unexpected failure.

##### [Parameters]

{0}: server ID of primary server

{1}: server ID of standby server

{2}: "fail over"or"switch over"

##### [System Processing]

Processing of switching will be aborted.

##### [Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message.

### 3.1.24 MCA00024

---

#### **starting to detach standby server "{0}" {1}**

##### [Description]

Detaching standby server because of failure detected on standby server.

##### [Parameters]

{0}: server ID

{1}: "automatically" or none

##### [Action]

If Mirroring Controller executed detaching automatically, find the message output before this message from system log or event log to identify the cause of detaching, and then work around according to the Action of the message.

### 3.1.25 MCA00025

---

#### **detach standby server "{0}" completed {1}**

##### [Description]

Detached standby server.

##### [Parameters]

{0}: server ID

{1}: "automatically" or none

### 3.1.26 MCA00026

---

#### failed to {2} standby server "{0}" {1}

##### [Description]

Failed to detach standby server.

##### [Parameters]

{0}: server ID

{1}: "automatically" or none

{2}: "detach"

##### [System Processing]

Processing of detaching will be aborted.

##### [Action]

Refer to the description about workaround for failure of "Cluster Operation Guide".

### 3.1.27 MCA00027

---

#### another "{0}" command is running

##### [Description]

Cannot execute command with this operation mode because another command is running on the same or another server.

##### [Parameters]

{0}: command name

##### [System Processing]

Processing will be aborted.

##### [Action]

There is a case executing another command. Wait for completion of another command on the same or another server, and then re-execute.

In addition, there are the following cases when using mc\_ctl command.

There is a case under processing of a failover and an automatic detach by Mirroring Controller. Wait for completion of the processing under operation, and re-execute.

If any of the following cases occurs, there is a possibility that the processing of Mirroring Controller interrupts. Re-execute the mc\_ctl command after restarting Mirroring Controller.

- When abnormality occurs in the network
- When another server is downed
- When Mirroring Controller is stopped forcibly

### 3.1.28 MCA00028

---

#### communication timeout of Mirroring Controller occurred server:"{0}"

##### [Description]

Either of the followings has occurred.

- communication timeout between mc\_ctl command and Mirroring Controller process has occurred.
- communication timeout between Mirroring Controller processes have occurred.
- Terminating database instance was not completed in the specified time.

[Parameters]

{0}: server ("localhost" or server ID)

[System Processing]

Processing will be aborted.

[Action]

Completion synchronization for terminating database instance might have timed out, because connections remained. Disconnect all connections, and re-execute it.

Reduce CPU or network load caused by the other processes. If could not reduce it, extend remote\_call\_timeout in "server identifier".conf.

### 3.1.29 MCA00029

---

**could not create PID file of Mirroring Controller detail of cause:"{0}"**

[Description]

Could not create PID file of Mirroring Controller.

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the message, and then remove it.

### 3.1.30 MCA00030

---

**could not remove PID file of Mirroring Controller detail of cause:"%s"**

[Description]

Could not remove PID file of Mirroring Controller.

[Parameters]

{0}: detail of cause

[Action]

Identify the cause according to the message, and then remove it.

### 3.1.31 MCA00031

---

**could not read PID file of Mirroring Controller detail of cause:"%s"**

[Description]

Could not read PID file of Mirroring Controller.

[Parameters]

{0}: detail of cause

[Action]

Identify the cause according to the message, and then remove it.

### 3.1.32 MCA00032

---

#### invalid contents of PID file "%s" of Mirroring Controller

[Description]

The contents of PID file of Mirroring Controller is invalid.

[Parameters]

{0}: file name

[System Processing]

Processing will be aborted.

[Action]

The following causes could be considered.

- The file was stored or replaced by mistake
- The file was corrupted

When starting Mirroring Controller, move or remove the file shown in the message.

When stopped Mirroring Controller, find ID of process named "mcagent" and terminate forcibly by using OS command.

### 3.1.33 MCA00033

---

#### Mirroring Controller is already running

[Description]

Mirroring Controller is already running.

[System Processing]

Processing will be aborted.

[Action]

If needed, stop Mirroring Controller, and re-execute.

### 3.1.34 MCA00034

---

#### cannot execute %s command because Mirroring Controller is not running

[Description]

Cannot execute Mirroring Controller command because Mirroring Controller process is not running.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Start Mirroring Controller, and re-execute.

### 3.1.35 MCA00035

---

#### failed to start database instance

[Description]

Failed to start database instance.

[System Processing]

Processing will be aborted.

[Action]

Find the database message output in the log files of database output before this message, and then work around according to the Action of the message.

### 3.1.36 MCA00036

---

#### failed to stop database instance target server:"{0}"

[Description]

Failed to stop database instance.

[Parameters]

{0}: target server ("localhost" or server ID)

[System Processing]

Processing will be aborted.

[Action]

Find the database message output in the log files of database on the target server output before this message, and then work around according to the Action of the message.

### 3.1.37 MCA00037

---

#### Mirroring Controller option is not installed

[Description]

This functionality is enabled by installing Mirroring Controller option.

[Parameters]

{0}: target server ("localhost" or server ID)

[System Processing]

Processing will be aborted.

[Action]

To use this functionality, install Mirroring Controller option, and then re-execute.

### 3.1.38 MCA00038

---

#### starting Mirroring Controller

[Description]

Starting Mirroring Controller.

### 3.1.39 MCA00039

---

#### Mirroring Controller started

[Description]

Mirroring Controller started.

### 3.1.40 MCA00040

---

#### failed to start Mirroring Controller

[Description]

Failed to start Mirroring Controller.

[System Processing]

Processing will be aborted.

[Action]

Work around according to the Action of the message output before this message.

On Windows, if there is no message outputted before this message, please refer to the message outputted to an event log.

### 3.1.41 MCA00041

---

#### stopping Mirroring Controller

[Description]

Stopping Mirroring Controller.

### 3.1.42 MCA00042

---

#### Mirroring Controller stopped target server:"{0}"

[Description]

Mirroring Controller stopped.

[Parameters]

{0}: target server ("localhost" or server ID)

### 3.1.43 MCA00043

---

#### failed to stop Mirroring Controller target server:"{0}"

[Description]

Failed to stop Mirroring Controller.

[Parameters]

{0}: target server ("localhost" or server ID)

[System Processing]

Processing will be aborted.

[Action]

Identify the cause from system log or event log on the target server, and work around.

### 3.1.44 MCA00044

---

#### stopping Mirroring Controller forcibly

[Description]

Stopping Mirroring Controller forcibly.

### 3.1.45 MCA00045

---

#### stopped Mirroring Controller forcibly

[Description]

Mirroring Controller stopped forcibly.

### 3.1.46 MCA00046

---

#### enabled failover target server:"{0}"

[Description]

Enabled failover and automatic detach.

### 3.1.47 MCA00047

---

#### failed to enable failover target server:"{0}"

[Description]

Failed to enable failover and automatic detach.

[System Processing]

Processing will be aborted.

[Action]

Identify the cause from messages on system log or event log, and work around.

### 3.1.48 MCA00048

---

#### disabled failover target server:"{0}"

[Description]

Disabled failover and automatic detach.

### 3.1.49 MCA00049

---

#### failed to disable failover target server:"{0}"

[Description]

Failed to disable failover and automatic detach.

[System Processing]

Processing will be aborted.

[Action]

Identify the cause from messages on system log or event log, and work around.

### 3.1.50 MCA00050

---

**{0}: "server ID "{2}" specified with option "{1}" does not exist in definition file "{3}"**

[Description]

server ID specified with the option does not exist in definition file.

[Parameters]

{0}: command name

{1}: option

{2}: server ID

{3}: file name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options or definition file.

### 3.1.51 MCA00051

---

**{0}: "IP address of the command execution server is not specified in definition file "{1}"**

[Description]

IP address of the command execution server is not specified in definition file.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter descriptions of "Cluster Operation Guide".

### 3.1.52 MCA00052

---

**{0}: "wrong server ID "{2}" in definition file "{1}"**

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: server ID

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter descriptions of "Cluster Operation Guide".

### 3.1.53 MCA00054

---

#### "could not write to file "{0}": exception={1}: {2}"

##### [Description]

Failed to detach or synchronize standby server because could not write to the file.

##### [Parameters]

{0}: file name

{1}: exception type

{2}: exception detail

##### [System Processing]

Processing will be aborted.

##### [Action]

Check the error detail and eliminate causes, and detach or synchronize standby server according to "Actions when an Error Occurs" of "Cluster Operation Guide".

### 3.1.54 MCA00055

---

#### unexpected error occurred in the monitoring process: {0}

##### [Description]

Monitoring process could not continue because the unexpected error occurred.

##### [Parameters]

{0}: detail of cause

##### [System Processing]

Continues monitoring.

##### [Action]

Check the error detail and eliminate causes.

If you cannot clear the problem, contact Fujitsu technical support.

### 3.1.55 MCA00056

---

#### unexpected error occurred: {0}

##### [Description]

An unexpected error occurred.

##### [Parameters]

{0}: detail of cause

##### [System Processing]

Processing will be aborted.

##### [Action]

Check the error detail and eliminate cause.

If you cannot clear the problem, contact Fujitsu technical support.

### 3.1.56 MCA00057

---

#### failed to stop Mirroring Controller forcibly

[Description]

Failed to stop Mirroring Controller forcibly.

[System Processing]

Processing will be aborted.

[Action]

Check [Action] of the message output before this message, and re-execute.

If re-execution fails, terminate forcibly mc\_agent process with OS command.

### 3.1.57 MCA00058

---

#### could not access path "%s" specified as a directory for Mirroring Controller detail of cause: "%s"

[Description]

could not access path specified as a directory for Mirroring Controller.

[Parameters]

%s: path name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

### 3.1.58 MCA00059

---

#### system call error occurred: "%s" detail of cause: "%s"

[Description]

System call error occurred.

[Parameters]

%s: system call name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

### 3.1.59 MCA00060

---

#### could not get installation path

[Description]

Enterprise Postgres may not be installed.

[System Processing]

Processing will be aborted.

[Action]

Re-install Enterprise Postgres.

### 3.1.60 MCA00061

---

**could not access path "%1\$s" for parameter "%2\$s" in definition file "%3\$s" detail of cause:"%4\$s"**

[Description]

could not access path for parameter in definition file.

[Parameters]

%3\$s: file name

%2\$s: parameter name

%1\$s: path name

%4\$s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

### 3.1.61 MCA00062

---

**promotion processing completed**

[Description]

Promotion processing completed.

### 3.1.62 MCA00063

---

**promotion processing failed**

[Description]

Promotion processing failed.

[System Processing]

Processing will be aborted.

[Action]

Clear the problem according to [Action] of the message which was output before this message in system log or in database server log.

### 3.1.63 MCA00064

---

**stopped database instance forcibly**

[Description]

Database instance stopped forcibly.

### 3.1.64 MCA00065

---

#### failed to stop database instance forcibly

[Description]

Failed to stop database instance forcibly.

[System Processing]

Processing will be aborted.

[Action]

Clear the problem according to [Action] of the message which was output before this message in system log or in database server log.

### 3.1.65 MCA00067

---

#### did not switch during a degeneration use

[Description]

Did not switch during a degeneration use.

[System Processing]

Processing will be aborted.

[Action]

If Mirroring Controller executed switching automatically, find the message output before this message from system log or event log to identify the cause of degeneration, and then eliminate causes according to [Action] of the message and try to switch with command.

### 3.1.66 MCA00068

---

#### {0}: "users other than an instance administrator have the access privileges for definition file "{1}"

[Description]

users other than an instance administrator have the access privileges for definition file.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Revoke all the access privileges for users other than an instance administrator.

MCA00069

could not execute because Mirroring Controller of the server "{0}" is not running

[Description]

Could not execute because Mirroring Controller is not running.

[Parameters]

{0}: server ID

[System Processing]

Processing will be aborted.

[Action]

Start Mirroring Controller, and try to switch with command.

### 3.1.67 MCA00070

---

[Try "%s --help" for more information.\n](#)

[Description]

--help option can show more additional information.

[Parameters]

%s: command name

[System Processing]

None.

[Action]

Check the message output before this message, and refer to descriptions shown by '--help' option.

### 3.1.68 MCA00071

---

[starting to {0}](#)

[Description]

Switching standby server to primary server.

[Parameters]

{0}: "switch over"

### 3.1.69 MCA00072

---

[failed to {0}](#)

[Description]

Failed to switch to primary server because of an unexpected failure.

[Parameters]

{0}: "switch over"

[System Processing]

Processing of switching will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then eliminate causes according to [Action] of the message.

### 3.1.70 MCA00073

---

#### error detected in handling of the database instance detail of cause:"{0}"

##### [Description]

Error detected in handling of the database instance for the following purposes.

- Obtain the port number of database instance
- Access to the data storage destination directory

##### [Parameters]

{0}: detail of cause

##### [System Processing]

Processing will be aborted.

##### [Action]

Check the error detail and eliminate causes.

### 3.1.71 MCA00074

---

#### could not read PID file of Mirroring Controller detail of cause:"{0}"

##### [Description]

Could not read PID file of Mirroring Controller.

##### [Parameters]

{0}: detail of cause

##### [Action]

Identify the cause according to the message, and then remove it.

### 3.1.72 MCA00075

---

#### invalid contents of PID file "{0}" of Mirroring Controller

##### [Description]

The contents of PID file of Mirroring Controller is invalid.

##### [Parameters]

{0}: file name

##### [System Processing]

Processing will be aborted.

##### [Action]

The following causes could be considered.

- The file was stored or replaced by mistake
- The file was corrupted

When starting Mirroring Controller, move or remove the file shown in the message.

When stopped Mirroring Controller, find ID of process named "mcagent" and terminate forcibly by using OS command.

### 3.1.73 MCA00076

---

---

### cannot execute "{0}" command because Mirroring Controller is not running

#### [Description]

Cannot execute Mirroring Controller command because Mirroring Controller process is not running.

#### [Parameters]

{0}: command name

#### [System Processing]

Processing will be aborted.

#### [Action]

Start Mirroring Controller, and re-execute.

---

## 3.1.74 MCA00077

---

### %s: argument of option "%s" is too long

#### [Description]

Argument of option is too long.

#### [Parameters]

%s: command name

%s: option

#### [System Processing]

Processing will be aborted.

#### [Action]

Re-execute after correcting options.

---

## 3.1.75 MCA00078

---

### %s: invalid option -- %s

#### [Description]

Invalid option.

#### [Parameters]

%s: command name

%s: option

#### [System Processing]

Processing will be aborted.

#### [Action]

Re-execute after correcting options.

---

## 3.1.76 MCA00079

---

### %s: unnecessary operand "%s"

#### [Description]

Unnecessary operand.

[Parameters]

%s: command name

%s: operand

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting operand.

### 3.1.77 MCA00080

---

**%s: unrecognized operation mode or no operation mode specified**

[Description]

Unrecognized operation mode or no operation mode specified.

[Parameters]

%s: command name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting or specifying operation mode.

### 3.1.78 MCA00081

---

**start to enable the parameter "{1}" required to build in the standby server "{0}"**

[Description]

Start to enable the parameter required to build in the standby server.

[Parameters]

{0}: server ID

{1}: parameter name

### 3.1.79 MCA00082

---

**enabling the parameter "{1}" required to build in the standby server "{0}" completed**

[Description]

Enabling the parameter required to build in the standby server completed.

[Parameters]

{0}: server ID

{1}: parameter name

### 3.1.80 MCA00083

---

**failed to enable the parameter "{1}" required to build in the standby server "{0}"**

[Description]

Failed to enable the parameter required to build in the standby server.

The following causes could be considered.

- another command is running
- can not access definition file
- parameter does not exist

[Parameters]

{0}: server ID

{1}: parameter name

[System Processing]

Processing will be aborted.

[Action]

- If the parameter is not set

On the primary server, set the parameter of postgresql.conf file according to "parameter" description of "Cluster Operation Guide" and execute pg\_ctl command with reload mode.

- Otherwise

Find the message output before this message from display, system log or event log, and then eliminate causes according to [Action] of the message. Then, on the primary server, set the parameter of postgresql.conf file according to "parameter" description of "Cluster Operation Guide" and execute pg\_ctl command with reload mode.

### 3.1.81 MCA00084

---

#### primary server is already running

[Description]

Primary server is already running.

[System Processing]

Processing will be aborted.

[Action]

The standby server might be running without creating recovery.conf. Create recovery.conf, and re-execute.

### 3.1.82 MCA00085

---

#### cannot start Mirroring Controller because database instance is not running

[Description]

Cannot start Mirroring Controller because database instance is not running.

[System Processing]

Processing will be aborted.

[Action]

Start database instance, and re-execute.

### 3.1.83 MCA00086

---

#### could not get state of database instance detail of cause: "{0}"

[Description]

Could not get state of database instance.

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

### 3.1.84 MCA00087

---

#### unusable character is included in path "%s" specified as a directory for Mirroring Controller

[Description]

Unusable character is included in path specified as a directory for Mirroring Controller.

[Parameters]

%s: path name

[System Processing]

Processing will be aborted.

[Action]

Correct the path specified as a directory for Mirroring Controller according to the message and mc\_ctl command descriptions of "Reference".

### 3.1.85 MCA00088

---

#### %1\$s: unusable character is included in server ID "%3\$s" specified with option "%2\$s"

[Description]

Unusable character is included in server ID specified with option.

[Parameters]

%1\$s: command name

%2\$s: option

%3\$s: server ID

[System Processing]

Processing will be aborted.

[Action]

Correct the server ID specified with option according to the message and mc\_ctl command descriptions of "Reference".

### 3.1.86 MCA00089

---

#### only instance administrator can execute this command

[Description]

Only instance administrator who created the directory for Mirroring Controller can execute this command.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command by the instance administrator who created the directory for Mirroring Controller.

### 3.1.87 MCA00090

---

**could not read file "{0}": Permission denied**

[Description]

No read permissions for the file.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command, after granting the read permissions to the file.

### 3.1.88 MCA00091

---

**"host name or IP address "{1}" of the primary server and the standby server in definition file "{0}" are same, but the --local-server option was not specified"**

[Description]

Host name or IP address of the primary server and the standby server in definition file are same, but the --local-server option was not specified.

[Parameters]

{0}: file name

{1}: host name or IP address

[System Processing]

Processing will be aborted.

[Action]

If the primary server and the standby server are built in the same server, execute the mc\_ctl command with the --local-server option.

If the primary server and the standby server are built in the different server, correct host name or IP address in the definition file.

### 3.1.89 MCA00092

---

**this feature is not available in this edition**

[Description]

This feature is not available in this edition.

[System Processing]

Processing will be aborted

[Action]

Please install the right edition for this feature.

### 3.1.90 MCA00093

---

#### installation environment is destroyed

[Description]

Enterprise Postgres may not be installed correctly or may be destroyed.

[System Processing]

Processing will be aborted.

[Action]

Re-install Enterprise Postgres.

### 3.1.91 MCA00094

---

#### %s: invalid argument for option %s

[Description]

Invalid argument for option.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

### 3.1.92 MCA00095

---

#### could not remove file or directory "{0}"

[Description]

Could not remove the file or the directory.

[Parameters]

{0}: file name or directory name

[System Processing]

Processing will be aborted.

[Action]

Check the status of the file or the directory and eliminate causes, and then remove it.

### 3.1.93 MCA00096

---

#### "could not write file "{0}": exception={1}: {2}"

[Description]

Could not write the file.

[Parameters]

{0}: file name

{1}: exception type  
{2}: exception detail

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the message, and then remove it.

---

### 3.1.94 MCA00097

---

#### setup of standby server completed

[Description]

Setup of standby server completed.

---

### 3.1.95 MCA00098

---

#### setup of standby server failed

[Description]

Setup of standby server failed.

[System Processing]

Processing will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then eliminate causes according to [Action] of the message.

---

### 3.1.96 MCA00099

---

#### {0}: server "{1}" is running as a standby server

[Description]

Could not continue processing because database instance to be duplicated is not running as a primary server.

[Parameters]

{0}: command name  
{1}: server ID

[System Processing]

Processing will be aborted.

[Action]

Re-execute this command on the standby server to be set up.

---

## 3.2 Message Numbers Beginning with MCA00100

---

---

### 3.2.1 MCA00100

---

#### cannot execute {0} command because Mirroring Controller is running

[Description]

Cannot execute this command because Mirroring Controller is running on the server to be set up.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Execute this command on server where primary server is not running. If execute it on the right server, stop Mirroring Controller and then re-execute it.

### 3.2.2 MCA00101

---

#### cannot execute {0} command because database instance is running

[Description]

Cannot execute this command because database instance is running on the server to be set up.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Execute this command on server where primary server is not running. If execute it on the right server, stop database instance and then re-execute it.

### 3.2.3 MCA00102

---

#### {0}: invalid argument value {2} for option {1}

[Description]

Invalid argument for option.

[Parameters]

{0}: command name

{1}: option

{2}: argument value

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting argument value for the option.

### 3.2.4 MCA00103

---

#### could not move file or directory from {0} to {1}

[Description]

Could not move the file or the directory.

[Parameters]

{0}: source file or directory

{1}: target file or directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the file or the directory and eliminate causes, and then remove it.

### 3.2.5 MCA00104

---

#### could not create directory {0}

[Description]

Could not create the directory.

[Parameters]

{0}: target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

### 3.2.6 MCA00105

---

#### could not read the access privileges of {0}

[Description]

Could not read the access privileges.

[Parameters]

{0}: target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

### 3.2.7 MCA00106

---

#### failed to set the access privileges of {0}

[Description]

Failed to set the access privileges.

[Parameters]

{0}: target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

### 3.2.8 MCA00107

---

**service "{0}" is not registered**

[Description]

Service is not registered.

[Parameters]

{0}: Service name

[System Processing]

Processing will be aborted.

[Action]

Register service, and re-execute.

### 3.2.9 MCA00108

---

**could not start service "{0}" detail of cause:"{1}"**

[Description]

Could not start service.

[Parameters]

{0}: Service name

{1}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

### 3.2.10 MCA00109

---

**could not start service "%s" detail of cause:"%s"**

[Description]

Could not start service.

[Parameters]

%s: Service name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

### 3.2.11 MCA00110

---

#### service "%s" is not registered

[Description]

Service is not registered.

[Parameters]

%s: Service name

[System Processing]

Processing will be aborted.

[Action]

Register service, and re-execute.

### 3.2.12 MCA00111

---

#### Mirroring Controller service "%s" has been registered

[Description]

Mirroring Controller service has been registered with Windows Service.

[Parameters]

%s: Service name

### 3.2.13 MCA00112

---

#### Mirroring Controller service "%s" has been unregistered

[Description]

Mirroring Controller service has been unregistered from Windows Service.

[Parameters]

%s: Service name

### 3.2.14 MCA00113

---

#### service name "%s" is already in use

[Description]

Service name is already in use.

[Parameters]

%s: Service name

[System Processing]

Processing will be aborted.

[Action]

Check the service name, and re-execute.

### 3.2.15 MCA00114

---

#### could not register service "%s" detail of cause: "%s"

[Description]

An error occurred during registration of service.

[Parameters]

%s: Service name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

### 3.2.16 MCA00115

---

#### could not unregister service "%s" detail of cause: "%s"

[Description]

An error occurred during deregistration of service.

[Parameters]

%s: Service name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

### 3.2.17 MCA00116

---

#### %s: option "%s" is required

[Description]

A required option is not specified.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Specify the required option, and re-execute.

### 3.2.18 MCA00117

---

#### no authority to execute this command

[Description]

Only the administrative user can run this command.

[System Processing]

Processing will be aborted.

[Action]

Invoke the administrator's prompt, and re-execute this command.

### 3.2.19 MCA00119

---

#### could not receive respons from {0} server({1})

[Description]

An error was detected on the server.

[Parameters]

{0}: monitored object (server)

{1}: server type (primary, standby)

[System Processing]

Perform failover or disconnection.

If failover or disconnection has already been performed, then these options will be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide".

### 3.2.20 MCA00120

---

#### detected streaming replication error in {0} server({1})

[Description]

A streaming replication error was detected.

[Parameters]

{0}: monitored object (database process)

{1}: server type (primary, standby)

[System Processing]

Perform failover or disconnection .

If failover or disconnection has already been performed, then these options will be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide".

### 3.2.21 MCA00121

---

#### disk drives are available

[Description]

Database where data storage, transaction log storage and tablespaces are saved is working correctly.

### 3.2.22 MCA00122

---

#### a {0} server({1}) is running normally

[Description]

The server is running normally.

[Parameters]

{0}: server type (primary, standby)

{1}: monitored object (server)

### 3.2.23 MCA00123

---

#### Streaming Replication has started

[Description]

Streaming Replication has started

### 3.2.24 MCA00124

---

#### postmaster is running in {0} server({1})

[Description]

Postmaster is running

[Parameters]

{0}: server type (primary, standby)

{1}: monitored object (server)

### 3.2.25 MCA00125

---

#### failed to get the standby server information

[Description]

Failed to get the standby server information

[System Processing]

Perform failover or disconnection.

If failover or disconnection has already been performed, then these options will be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide".

### 3.2.26 MCA00126

---

#### {0} server({1}) was downed

[Description]

The database server has stopped.

[Parameters]

{0}: server type (primary, standby)

{1}: monitored object (server)

[System Processing]

Perform failover or disconnection.

If failover or disconnection has already been performed, then these options will be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide".

### 3.2.27 MCA00127

---

#### You can promote the standby server

[Description]

You can promote the standby server

### 3.2.28 MCA00128

---

#### You cannot promote the standby server

[Description]

You cannot promote the standby server

### 3.2.29 MCA00129

---

#### detected a disk I/O error in {0} server({1})

[Description]

A disk I/O error was detected.

[Parameters]

{0}: server type (primary, standby)

{1}: monitored object (server)

[System Processing]

Perform failover or disconnection.

If failover or disconnection has already been performed, then these options will be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide".

# FUJITSU Enterprise Postgres 9.5

## FJQSS User Guide (Information Collection Tool)

Solaris/Linux

J2S2-1625-01ENZO(00)  
November 2012

# Preface

---

This manual describes information to use the outline and the tool of FJQSS (Information Collection Tool).

## Purpose of this Manual

The purpose of this manual is to be able to gather the collected information by using FJQSS (Information Collection Tool) when trouble occurs.

## Reader of this Manual

This manual is targeted at the user who gathers the collected information when the trouble occurs.

You can obtain information on the method of gathering the function and the collected information of FJQSS (Information Collection Tool) obtain by referring to this manual.

## Structure of this Manual

The structure of this manual is as follows:

Chapter 1 outline

Chapter 2 FJQSS (Information Collection Tool)

Appendix A Messages and error codes

## Notations

The following notations are used in this manual;

### Symbols used in this manual

The following symbols are used in this manual.

Example:[Enter]key

### Symbols used in command

This subsection describes the symbols used in the examples of commands.

Example:

```
fjqss_collect [-s]
```

### Meaning of Symbols

| Symbol | Meaning   |
|--------|---|
| []     | The item enclosed with this sign is shown and omissible is shown. |

## Abbreviations

The following abbreviations are used in this manual:

### Operating Systems

| Full Name                                | Abbreviations  |
|--|----------------|
| Oracle Solaris 9                         | Solaris 9      |
| Oracle Solaris 10                        | Solaris 10     |
| Oracle Solaris 11                        | Solaris 11     |
| Oracle Solaris                           | Solaris        |
| Red Hat Enterprise Linux 6 (for x86)     | RHEL6(x86)     |
| Red Hat Enterprise Linux 6 (for Intel64) | RHEL6(Intel64) |
| Red Hat Enterprise Linux 5 (for x86)     | RHEL5(x86)     |
| Red Hat Enterprise Linux 5 (for Intel64) | RHEL5(Intel64) |

## Export Management Regulations

Our documentation may include special technology based on Foreign Exchange and Foreign Trade Control Law.

In case you export the relevant documentation or to provide any overseas resident with the relevant documentation, permission based on the above law is necessary.

## Trademarks and Screenshots

Oracle and Java are registered trademarks of Oracle Corporation, its subsidiaries and its affiliated companies in the United States and other countries.

The names of companies and products, etc. in the sentences inside can be trademarks or registered trademarks of each company.

# Chapter 1 Outline

This chapter explains the outline of FJQSS (Information Collection Tool).

## 1.1 FJQSS (Information Collection Tool)

---

This appendix explains FJQSS (Information Collection Tool) that archives the information for investigation (middleware logs and operation system logs) with an easy operation. Executing FJQSS right after a problem occurs makes a rapid investigating of the causes.

# Chapter 2 Collecting the information

This chapter explains the method of gathering the survey material, the confirm method of the survey material, and notes.

## 2.1 Collection method

This section explains the operating procedure of FJQSS (Information Collection Tool).

Collecting information can do by using the command. You can operate the Collection by the method that shows the product selection menu, or the method that does not show such the menu.

- [2.1.1 Collecting with showing menu](#)
- [2.1.2 Collecting without showing menu](#)

### 2.1.1 Collecting with showing menu

This subsection explains the operating procedure of FJQSS (Information Collection Tool) with showing the product selection menu.

#### Authority to execute

User Authority of the root user is necessary.

#### Prior confirmation

Set the output directory of the collected information if necessary. The output directory of default is the tmp directory (/tmp). See [\[2.3 Changing a path of the output directory\]](#) for details of changing the output directory.

#### Synopsis

If you execute the command specifying the output directory by the parameter:

```
fjqss_collect output_directory
```

If you execute the command specifying the output directory by the environment variable or the environmental configuration file:

```
fjqss_collect
```

#### Path to this command

```
/opt/FJSVqst1
```

#### Notes in executing the command

- Do not put fjqss\_collect or its copy into any other directory. They work only if they are in the path shown above in [Path to this command].
- Execute this command immediately after the problem occurs.
- Multiple execution of this command is not available. If you do that, the following error message appears:

```
FJQSS is already started. Please restart FJQSS after the executing one ends.
```

#### Operating procedure

This part explains the operating procedure of FJQSS (Information Collection Tool).

1. Log on to the server, open the console window and execute the information collection command in the console window.

Hereafter, it explains by the example when outputting the information to the default output directory(/tmp):

```
> cd /opt/FJSVqst1
> ./fjqss_collect
```

2. The product selection menu appears. It shows the list of the products whose information can be collected.
3. Put the number of the product of which you want to collect the information:

```

-----
FJQSS Product Selection
-----

  1.MW Product B (Server Side)
  2.MW Product B (Client Side)

Please input a number of the product
of which you want to collect the information.>>1

```

4. Check the indicated name(s) of the middleware (s) whose investigation information are to be collected, then press the [Y] key to start.

Collection starts and the following indicator appear in the command prompt:

```

The following product information is collected.
    MW Product B (Server Side)

Input 'Y-key' to collect data, or 'N-key' to stop.(default=N):y
preparing:          ##### 100% [00:01]

```

The time and the disk space required for the collection depend on the condition of the target system.

5. Check the contents of the output directory.

After the FJQSS (Information Collection Tool) has completed the collection, the following prompt appears. Verify that the information have been collected in the directory whose name is indicated in the prompt:

```

The following product information is collected.
    MW Product B (Server Side)

Input 'Y-key' to collect data, or 'N-key' to stop.(default=N):y
preparing:          ##### 100% [00:01]
collecting:         ##### 100% [00:01]
archiving:          ##### 100% [00:01]
compress:           ##### 100% [00:15]
Completed.
Gathered investigation informations archived to
    /tmp/ezcollect20121018172939/result20121018172939.tar.gz (206KB)

```

The following files are created in the output directory (ezcollectYYYYMMDDHHMMSS: YYYYMMDDHHMMSS indicates the time (year, month, day, hours, minutes and seconds) that the collection started). See [\[2.2 Checking the collected information\]](#) for the output directory:

- resultYYYYMMDDHHMMSS.tar.gz

The collected information.

- result.txt

The result log is a text file to indicate if the collection of information has succeeded.

This file indicates the names and the results of collection (OK/NG) of each material.

- ez.log

The activity log of the FJQSS (Information Collection Tool).

### Aborting FJQSS (Information Collection Tool)

This subsection explains how to abort running FJQSS (Information Collection Tool).

Although it is recommended that you wait until the collection ends, you can press [CTRL] + [C] key combination to abort the execution if it is necessary. The following prompt appears if [CTRL] + [C] is pressed and the execution is aborted.

```
The following product information is collected.
      MW Product B (Server Side)

Input 'Y-key' to collect data, or 'N-key' to stop.(default=N):y
preparing:          ##### 40% [00:01]
Stopped FJQSS process.
```

The output directory that has been made in the collecting might remain when the executing is aborted. There is no influence in the operation of FJQSS because the output directory will be newly made when FJQSS is executed again.

Moreover, there is no influence in the operation of FJQSS even if the remaining output directory was deleted.

Do not close the command prompt before the collection ends. if you do so, the temporary directories might remain in the work directory. Please delete the following directories if they remain in the work directory.

- ezcollectYYYYMMDDHHMMSS
- ezworkYYYYMMDDHHMMSS

See [2.3 Changing a path of the output directory](#)] for details of the work directory.

## 2.1.2 Collecting without showing menu

This subsection explains the operating procedure of FJQSS (Information Collection Tool) without showing the product selection menu.

You can use the procedure in the shell script.

### Authority to execute

User Authority of the root user is necessary.

### Prior confirmation

Verify the product identification name of the product of which you collect the information by the product information showing command. See [2.1.3 Getting the product identification name](#)] for details.

Set the output directory of the collected information if necessary. The output directory of default is the tmp directory (/tmp). See [\[2.3 Changing a path of the output directory\]](#) for details of changing the output directory.

### Synopsis

The specification of product identification name by "-pr <product identification name>" is necessary if you specify the silent mode option by "-s".

If you execute the command specifying the output directory by the parameter:

```
fjqss_collect -pr <product identification name> [-s] output_directory
```

If you execute the command specifying the output directory by the environment variable or the environmental configuration file:

```
fjqss_collect -pr <product identification name> [-s]
```

### Description

The fjqss\_collect command collects the information required for the investigation.

### Option

-pr

This option specifies the product identification name of the product of which you collect the information.

-s

The command runs without asking to the operator. (It runs in silent mode.)

### Path to this command

```
/opt/FJSVqst1
```

### Notes in executing the command

- Do not put fjqss\_collect or its copy into any other directory. They work only if they are in the path shown above in [Path to this command].
- Execute this command immediately after the problem occurs.
- Multiple execution of this command is not available. If you do that, the following error message appears:

```
FJQSS is already started. Please restart FJQSS after the executing one ends.
```

## 2.1.3 Getting the product identification name

This subsection explains how to get the product identification name which you specify when collecting the information without showing Product Selection Menu.

The product identification name can be got by executing the product information showing command.

### Authority to execute

User Authority of the root user is necessary.

### Synopsis

```
fjqss_mwpinfolist
```

### Description

This command shows the list of the information of products of which the information collection is available.

Each product's information is shown in one line.

The product's Information is shown in order of "No." (number), "KEY" (product identification name), "DispName" (product name) and "Path" (destination directory of the information)

Example of the result of executing the product information showing command:

```
MW Product List
No. KEY      DispName      Path
-----
1.  PRODUCTA  MW PRODUCT A  /opt/FJSVPRDA/server/fjqss_tool1
2.  PRODUCTB  MW PRODUCT B  /opt/FJSVPRDB/server/fjqss_tool1
3.  PRODUCTC  MW PRODUCT C  /opt/FJSVPRDC/server/fjqss_tool1
```

If you collect the information of the product No.1, specify the product identification name "PRODUCTA" as the parameter to collect the information of the "MW PRODUCT A" by the procedure of [2.1.2 Collecting without showing menu](#)].

### Path to this command

```
/opt/FJSVqst1
```

## 2.2 Checking the collected information

The collected information are created in the output directory (ezcollectYYYYMMDDHHMMSS) as file "resultYYYYMMDDHHMMSS.tar.gz".

The output directory is created at the output specified for an environmental configuration file destination at the output destination. If no destination is specified, then the output directory is created at the tmp directory (/tmp).

You can specify a path of the output directory if you execute the information collecting command in the console window. See [2.3 Changing a path of the output directory].for details of the environmental configuration file ant the output destination.

Verify that the following file and directory exist:

- Result log (result.txt)  
The result log is a text file to indicate if the collection of information has succeeded.  
This file indicates the names and the results of collection (OK/NG) of each material.
- Collected information (resultYYYYMMDDHHMMSS.tar.gz)

## 2.3 Changing a path of the output directory

You can change a path of the output directory by two methods below.

- Specifying a path of the output directory in the option of the information collecting command.
- Specifying a path of the output directory by setting the environment variable.
- Specifying a path of the output directory by updating the environmental configuration file.

The method of specifying in the option of the command explains in 2.1.1 Collecting with showing menu and 2.1.2 Collecting without showing menu]. Hereafter, the method of specifying by the environment variable and by the environmental configuration file will be explained.

-

### Specifying a path of the output directory by setting the environment variable

You can specify the directory where the output directory will be created by setting the environment variable %EZ\_OUTPUTDIR% before executing this command.

#### Description format:

```
EZ_OUTPUTDIR="the directory path where the output directory will be created"
output EZ_OUTPUTDIR
```

#### Example:

If “/etc/work” is specified to %EZ\_OUTPUTDIR%:

```
EZ_OUTPUTDIR=/etc/work
export EZ_OUTPUTDIR
```

Then the directory below will be created as the output directory:

```
/etc/work/ezcollectYYYYMMDDHHMMSS
```

### Specifying a path of the output directory by updating the environmental configuration file

Environmental configuration file (FJQSSconf.txt) is a file that defines the operating environment of FJQSS.

It exists in following directory.

```
<Directory where the product is installed>/fjqss_tooln (n=1,2,...,9)
```

The items that can be specified for environmental configuration file are shown below.

| Item      | Outline   | Omission      |
|-----------|---|---------------|
| OutputDir | The directory path where the output directory will be created (*3). | Possible (*2) |

| Item    | Outline   | Omission     |
|---------|---|--------------|
| WorkDir | The directory path where the work directory (*1) will be created by FJQSS execution (*3). | Possible(*2) |

(\*1)The work directory is a directory that temporarily stores information necessary for the execution of FJQSS. When FJQSS ends, stored information is automatically deleted.

(\*2) If the specification is wrong or omitted, the tmp directory (/tmp) is used.

(\*3) You can specify the directory by the relative path from an absolute path or environmental configuration file.

The format of environmental configuration file is shown below.

**Description format:**

```
OutputDir="the directory path where the output directory will be created"
WorkDir=" work directory"
```

**Example:**

If “/etc/work” is specified to OutputDir, “/etc/tmp” is specified to WorkDir.

```
OutputDir=/etc/work
WorkDir=/etc/tmp
```

Then the directory below will be created as the output directory:

```
/etc/work/ezcollectYYYYMMDDHHMMSS
```

And the directory below will be created as the work directory:

```
/etc/tmp/ezworkYYYYMMDDHHMMSS
```

 **Note**

If the plural specifications of the output directory is done, then the specification becomes effective in the following order by priority:

1. Specification in the option of the information collecting command.
2. Specification by setting the environment variable.
3. Specification by updating the environmental configuration file.

# Appendix A Messages and error codes

## A.1 Error Messages

The message which FJQSS outputs can have an error code. See [A.2 Error Codes]. for detail of error codes.

| Look for   | What to do   |
|--|--|
| FJQSS is already started.<br>Please restart FJQSS after the executing one ends.  | Check if FJQSS is running. Multiple execution of it is not available.  |
| The file used with FJQSS is not found.<br>Please contact a Fujitsu technological member.<br>(product= PRODUCT_IDENTIFICATION_NAME, errcode= ERROR_CODE)  | Please contact the Fujitsu engineer, and pass on the PRODUCT_IDENTIFICATION_NAME, PATH_NAME and ERROR_CODE in the message. About detail meanings of the ERROR_CODE, see [A.2 Error Codes]. |
| Failed in the copy of materials used with FJQSS to the work directory.<br>Please contact a Fujitsu technological member.<br>(PATH= PATH_NAME, errcode= ERROR_CODE)   |  |
| Failed in the access of the file used with FJQSS.<br>Please contact a Fujitsu technological member.<br>(errcode= ERROR_CODE)   |  |
| The file used with FJQSS is not found or broken.<br>Please contact a Fujitsu technological member.<br>(PATH= PATH_NAME)  |  |
| Failed in the access of the directory used with FJQSS.<br>Please contact a Fujitsu technological member.<br>(PATH= PATH_NAME)  |  |
| Failed in the current directory change to the work directory.<br>Please contact a Fujitsu technological member.<br>(PATH= PATH_NAME)   |  |
| Failed to execute FJQSS. Please contact Fujitsu technical staff.   |  |
| There is a wrong option in the command line.<br>Please restart FJQSS with the correct option.  | Execute FJQSS again after removing the cause according to the left messages. About Environmental configuration file, see [2.3 Changing a path of the output directory].                    |
| Not super-user.<br>Please restart FJQSS by super-user  |  |
| A memory is insufficient.<br>Please stop unnecessary applications and restart FJQSS.   |  |
| The product specified by the -pr option is not found.<br>Please restart FJQSS with the correct option.<br>(product= PRODUCT_IDENTIFICATION_NAME)   |  |
| Japanese characters are included in the directory name at the 'OutputDir' of environmental file. Japanese characters cannot be used.<br>Please correct environmental file and restart FJQSS.<br>(environmental file=PATH_NAME) |  |

| Look for   | What to do |                                     |
|--|------------|-------------------------------------|
| <p>Japanese characters are included in the directory name at the 'WorkDir' of environmental file. Japanese characters cannot be used.</p> <p>Please correct environmental file and restart FJQSS.</p> <p>(environmental file=PATH_NAME)</p>  |            |                                     |
| <p>Failed in making the output directory.</p> <p>Please confirm the following.</p> <ul style="list-style-type: none"> <li>-There must be an authority to make the folder.</li> <li>-Passing in xx bytes or less must be specified.</li> <li>-The length of each directory name must be 255 bytes or less.</li> </ul> |            |                                     |
| <p>Failed in making the work directory.</p> <p>Please confirm the following.</p> <ul style="list-style-type: none"> <li>-There must be an authority to make the folder.</li> <li>-Passing in xx bytes or less must be specified.</li> <li>-The length of each directory name must be 255 bytes or less.</li> </ul>   |            |                                     |
| <p>Output directory is too long at the 'OutputDir' of environmental file.Please adjust the output directory to xx bytes or less and restart FJQSS</p> <p>(environmental file= PATH_NAME)</p>   |            |                                     |
| <p>Work directory is too long at the 'WorkDir' of environmental file.</p> <p>Please adjust the output directory to xx bytes or less and restart FJQSS</p> <p>(environmental file= PATH_NAME)</p>   |            |                                     |
| <p>The output directory is too long specified in the option.</p> <p>Please adjust the output directory to %s bytes or less and restart FJQSS.</p>  |            |                                     |
| <p>Japanese characters are included in the output directory specified in the option. Japanese characters cannot be used.</p> <p>Please correct the output directory and restart FJQSS.</p>   |            |                                     |

| <p>The is no installed product of which FJQSS can collect the information. FJQSS ends.</p>   |            |                                     |
| <p>Stopped FJQSS process.</p>  |            | <p>No user action is necessary.</p> |

## A.2 Error Codes

| Error Code | Cause     |
|------------|-----------|
| 0          | No error. |

| <b>Error Code</b> | <b>Cause</b>  |
|-------------------|---|
| 1                 | Command operand error   |
| 2                 | Insufficient memory   |
| 3                 | Failed to execute without administrator permissions   |
| 5                 | Though "-s" option exists, "-pr" option does not exist  |
| 6                 | FJQSS common component has been already done  |
| 10                | Middleware products' list file does not exist   |
| 11                | Middleware product specified with -pr option does not exist   |
| 13                | The built-in directory of the target middleware product of collecting information does not exist          |
| 15                | Japanese characters are included in the directory name at the output directory of environmental file      |
| 16                | Japanese characters are included in the directory name at the work directory of environmental file        |
| 17                | Too long path name is specified in the directory name at the output directory of environmental file       |
| 18                | Too long path name is specified in the directory name at the work directory of environmental file         |
| 19                | Failed to create the output directory   |
| 20                | Failed to create the work directory   |
| 21                | Failed to access the directory  |
| 22                | Failed to copy the common materials and built-in materials of the product directory to the work directory |
| 23                | Failed to show the information of the product to collect its information materials                        |
| 24                | Failed to change the current directory to the work directory  |
| 25                | Too long path name is specified to the parameter that specifies the output directory                      |
| 26                | Japanese characters are included in the parameter that specifies the output directory                     |
| 27                | Products of which collecting information is available are not installed                                   |
| 28                | Failed to execute FJQSS   |
