Fujitsu Enterprise Postgres

Urgent notification

Global Support News and IMPORTANT update information - No. GSI26-H049-02

This is to inform you of the impact on Fujitsu Enterprise Postgres of the recent security vulnerability CVE-2026-86862 reported by OSS PgAdmin4 community.

Fujitsu Limited

Oct 28, 2026

Incident Information

[Incident management number] PH25599

- **Description:**

  In pgAdmin4, validation was insufficient when a database name was specified in an invalid format in Restore and Maintenance features.

  In this case, the operation may be performed on a database with the same name as the login role, and a restore or maintenance operation may be performed on an unintended database.

  This is CVE-2026-86862 vulnerability reported by pgAdmin4 community.

- **Products and versions affected:**

  Version 12:

  FUJITSU Enterprise Postgres Client 12/12SP1/12SP1B for Windows

  Version 13:

  FUJITSU Enterprise Postgres Client 13/13SP1/13SP1A for Windows

  Version 14:

  FUJITSU Enterprise Postgres Client 14/14A/14SP1 for Windows

  Version 15:

  Fujitsu Enterprise Postgres Client 15/15SP1/15SP2 for Windows

  Fujitsu Enterprise Postgres Client with Cryptographic Module 15 for Windows

  Version 16:

 © Fujitsu 2026

Fujitsu Enterprise Postgres Client 16/16SP1 for Windows

Fujitsu Enterprise Postgres Client with Cryptographic Module 16 for Windows

Version 17:

Fujitsu Enterprise Postgres Client 17/17SP1/17SP2 for Windows

Fujitsu Enterprise Postgres Client with Cryptographic Module 17 for Windows

Version 18:

Fujitsu Enterprise Postgres Client 18/18SP1/18SP2 for Windows

Fujitsu Enterprise Postgres Client with Cryptographic Module 18 for Windows

Detailed Information

1. Issue and conditions to reproduce issue

[Issue]

In pgAdmin4, validation was insufficient when a database name was specified in an invalid format in Restore and Maintenance features.

In this case, the operation may be performed on a database with the same name as the login role, and a restore or maintenance operation may be performed on an unintended database.

[Environment]

- Windows

[Conditions]

1) The Restore or Maintenance feature is used. AND

2) A database name is specified in an invalid format.

2. Cause

There were issues in Restore or Maintenance feature for database with an invalid format name.

3. How to avoid the issue

Apply patch when released by Fujitsu.

A community patch has been released, and a corresponding Fujitsu Enterprise Postgres patch (for version 14-18) to follow. A notification will be sent to when the patch is made available.

Contact your Fujitsu service support center.

[Workaround]

None.

4. Recovery measures after the issue occurs

None.

5. Other

None.
