Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.10 12509

cannot convert relation containing dropped columns to view

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.11 12510

SELECT rule's target entry @1@ has different column name from column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.12 12511

SELECT rule's target entry @1@ has different type from column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.13 12512

RETURNING list's entry @1@ has different type from column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.14 12513

SELECT rule's target entry @1@ has different size from column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.15 12514

RETURNING list's entry @1@ has different size from column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.16 12515

SELECT rule's target list has too few entries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.17 12516

RETURNING list has too few entries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.18 12517

[@1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.19 12518

[Perl hash contains nonexistent column "@1@"](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.20 12519

[number of array dimensions \(@1@\) exceeds the maximum allowed \(@2@\)](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.21 12520

[multidimensional arrays must have array expressions with matching dimensions](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.22 12521

PL/Perl function must return reference to hash or array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.23 12522

\$_TD->{new} does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.24 12523

\$_TD->{new} is not a hash reference

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.25 12524

PL/Perl functions cannot return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.26 12525

PL/Perl functions cannot accept type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.27 12526

didn't get a CODE reference from compiling function "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.26.28 12527

set-valued function called in context that cannot accept a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.29 12528

set-returning PL/Perl function must return reference to array or use return_next

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.30 12529

function returning record called in context that cannot accept type record

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.31 12530

ignoring modified row in DELETE trigger

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.26.32 12531

result of PL/Perl trigger function must be undef, "SKIP", or "MODIFY"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.33 12533

trigger functions can only be called as triggers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.34 12534

cannot use return_next in a non-SETOF function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.35 12535

SETOF-composite-returning PL/Perl function must call return_next with reference to hash

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.36 12536

PL/pgSQL functions cannot accept type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.37 12537

could not determine actual return type for polymorphic function "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.38 12538

trigger functions can only be called as triggers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.39 12539

PL/pgSQL functions cannot return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.40 12540

trigger functions cannot have declared arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.41 12541

parameter name "@1@" used more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.42 12542

column reference "@1@" is ambiguous

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.43 12543

record "@1@" has no field "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.44 12544

variable "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.45 12545

relation "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.46 12546

variable "@1@" has pseudo-type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.47 12547

relation "@1@" is not a table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.48 12548

type "@1@" is only a shell

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.49 12549

unrecognized exception condition "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.50 12550

could not determine actual argument type for polymorphic function "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.51 12551

CONTINUE cannot be used outside a loop

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.52 12552

control reached end of function without RETURN

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.53 12553

set-valued function called in context that cannot accept a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.54 12554

control reached end of trigger procedure without RETURN

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.55 12555

trigger procedure cannot return a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.56 12556

variable "@1@" declared NOT NULL cannot default to NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.57 12557

case not found

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.58 12558

lower bound of FOR loop cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.59 12559

upper bound of FOR loop cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.60 12560

BY value of FOR loop cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.61 12561

BY value of FOR loop must be greater than zero

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.62 12562

cursor "@1@" already in use

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.63 12563

arguments given for cursor without arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.64 12564

arguments required for cursor

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.65 12565

FOREACH expression must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.66 12566

FOREACH expression must yield an array, not type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.67 12567

slice dimension (@1@) is out of the valid range 0..@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.68 12568

FOREACH ... SLICE loop variable must be of an array type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.69 12569

FOREACH loop variable must not be of an array type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.70 12570

cannot use RETURN NEXT in a non-SETOF function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.71 12571

wrong result type supplied in RETURN NEXT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.72 12572

record "@1@" is not assigned yet

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.73 12573

wrong record type supplied in RETURN NEXT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.74 12574

RETURN NEXT must have a parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.75 12575

cannot use RETURN QUERY in a non-SETOF function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.76 12576

RAISE without parameters cannot be used outside an exception handler

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.77 12577

too few parameters specified for RAISE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.78 12578

too many parameters specified for RAISE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.79 12579

RAISE statement option cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.80 12580

RAISE option already specified: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.81 12581

cannot COPY to/from client in PL/pgSQL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.82 12582

cannot begin/end transactions in PL/pgSQL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.83 12583

INTO used with a command that cannot return data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.84 12584

query returned no rows

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.85 12585

query returned more than one row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.86 12586

query has no destination for result data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.87 12587

query string argument of EXECUTE is null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.88 12588

EXECUTE of SELECT ... INTO is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.89 12589

cursor variable "@1@" is null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.90 12590

cursor "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.91 12591

relative or absolute cursor position is null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.92 12592

null value cannot be assigned to variable "@1@" declared NOT NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.93 12593

cannot assign non-composite value to a row variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.94 12594

cannot assign non-composite value to a record variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.95 12595

number of array dimensions (@1@) exceeds the maximum allowed (@2@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.96 12596

subscripted object is not an array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.97 12597

array subscript in assignment must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.98 12598

query "@1@" did not return data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27 Message Numbers Beginning with 12600

2.27.1 12600

row or record variable cannot be NOT NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.2 12601

default value for row or record variable is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.3 12603

"@1@" is not a scalar variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.4 12604

loop variable of loop over rows must be a record or row variable or list of scalar variables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.5 12605

cursor FOR loop must have only one target variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.6 12606

cursor FOR loop must use a bound cursor variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.7 12607

integer FOR loop must have only one target variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.8 12608

cannot specify REVERSE in query FOR loop

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.9 12609

loop variable of FOREACH must be a known variable or list of variables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.10 12610

FETCH statement cannot return multiple rows

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.11 12611

cursor variable must be a simple variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.12 12612

variable "@1@" must be of type cursor or refcursor

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.13 12613

"@1@" is not a known variable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.14 12614

missing "@1@" at end of SQL expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.15 12615

missing "@1@" at end of SQL statement

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.16 12616

RETURN cannot have a parameter in function returning set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.17 12617

RETURN cannot have a parameter in function with OUT parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.18 12618

RETURN cannot have a parameter in function returning void

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.19 12620

RETURN NEXT cannot have a parameter in function with OUT parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.20 12622

"@1@" is declared CONSTANT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.21 12623

record or row variable cannot be part of multiple-item INTO list

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.22 12624

too many INTO variables specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.23 12625

end label "@1@" specified for unlabelled block

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.24 12626

end label "@1@" differs from block's label "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.25 12627

cursor "@1@" has no arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.26 12628

cursor "@1@" has arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.27 12629

@1@ at end of input

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.28 12630

unexpected return value from trigger procedure

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.29 12631

PL/Python trigger function returned "MODIFY" in a DELETE trigger -- ignored

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.27.30 12632

TD["new"] deleted, cannot modify row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.31 12633

TD["new"] is not a dictionary

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.32 12634

TD["new"] dictionary key at ordinal position @1@ is not a string

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.33 12635

key "@1@" found in TD["new"] does not exist as a column in the triggering row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.34 12636

unsupported set function return mode

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.35 12637

returned object cannot be iterated

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.36 12638

PL/Python function with return type "void" did not return None

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.37 12639

forcibly aborting a subtransaction that has not been exited

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.27.38 12640

function returning record called in context that cannot accept type record

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.39 12641

trigger functions can only be called as triggers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.40 12642

PL/Python functions cannot return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.41 12643

PL/Python functions cannot accept type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.42 12645

could not convert Python object into cstring: Python string representation appears to contain null bytes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.43 12646

key "@1@" not found in mapping

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.44 12647

length of returned sequence did not match number of columns in row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.45 12648

attribute "@1@" does not exist in Python object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.46 12649

plpy.prepare: type name at ordinal position @1@ is not a string

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.47 12652

@1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.48 12653

@1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.49 12655

trigger functions can only be called as triggers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.50 12656

PL/Tcl functions cannot return type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.28 Message Numbers Beginning with 12700

2.28.1 12704

function "@1@" does not exist

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.28.2 12725

operator @1@ is not a valid ordering operator

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.29 Message Numbers Beginning with 12900

2.29.1 12908

could not remove cache file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.29.2 12909

could not open tablespace directory "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.30 Message Numbers Beginning with 13000

2.30.1 13092

too few arguments for format()

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.30.2 13094

null values cannot be formatted as an SQL identifier

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.31 Message Numbers Beginning with 13300

2.31.1 13359

online backup was canceled, recovery cannot continue

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.31.2 13362

online backup mode canceled

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.31.3 13363

online backup mode was not canceled

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.32 Message Numbers Beginning with 13400

2.32.1 13449

cannot convert whole-row table reference

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.2 13452

cannot alter type "@1@" because column "@2@.@3@" uses it

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.3 13453

cannot alter foreign table "@1@" because column "@2@.@3@" uses its row type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.4 13454

cannot alter table "@1@" because column "@2@.@3@" uses its row type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.5 13478

parameter "lc_ctype" must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.6 13481

operator family "@1@" does not exist for access method "@2@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.32.7 13490

directories for tablespace @1@ could not be removed

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.32.8 13497

cannot drop extension "@1@" because it is being modified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.9 13499

@1@ can only be called from an SQL script executed by CREATE EXTENSION

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.33 Message Numbers Beginning with 13500

2.33.1 13508

must be superuser to set schema of @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.33.2 13580

cannot PREPARE while holding both session-level and transaction-level locks on the same object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.33.3 13589

sending cancel to blocking autovacuum PID @1@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.33.4 13597

not enough elements in RWConflictPool to record a read/write conflict

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.33.5 13598

not enough elements in RWConflictPool to record a potential read/write conflict

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.34 Message Numbers Beginning with 13700

2.34.1 13761

cannot move extension "@1@" into schema "@2@" because the extension contains the schema

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.35 Message Numbers Beginning with 13800

2.35.1 13833

column @1@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.35.2 13860

symbolic link "@1@" target is too long

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.35.3 13864

unexpected message type "@1@"

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.35.4 13884

could not create signal listener pipe for PID @1@: error code @2@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.36 Message Numbers Beginning with 13900

2.36.1 13922

could not close handle to backend parameter variables: error code @1@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.36.2 13941

conflicting constraint properties

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.36.3 13943

@1@ constraints cannot be marked DEFERRABLE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.36.4 13944

@1@ constraints cannot be marked NOT VALID

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.37 Message Numbers Beginning with 14000

2.37.1 14024

column name must be qualified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.37.2 14028

cannot create relations in temporary schemas of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.37.3 14029

cannot create temporary relation in non-temporary schema

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.37.4 14030

only temporary relations may be created in temporary schemas

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.37.5 14042

cannot reassign ownership of objects owned by @1@ because they are required by the database system

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.38 Message Numbers Beginning with 14100

2.38.1 14104

cannot convert Perl array to non-array type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.38.2 14105

cannot convert Perl hash to non-composite type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.39 Message Numbers Beginning with 14200

2.39.1 14211

PL/Tcl functions cannot accept type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.39.2 14218

"@1@" is a table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.39.3 14282

cannot add schema "@1@" to extension "@2@" because the schema contains the extension

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.39.4 14284

could not identify current directory: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.5 14285

invalid binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.6 14286

could not read binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.7 14287

could not find a "@1@" to execute

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.8 14289

could not read symbolic link "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.9 14290

child process exited with exit code @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.10 14291

child process was terminated by exception 0x@1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.11 14292

child process was terminated by signal @1@: @2@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.12 14294

child process exited with unrecognized status @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.13 14295

could not identify current directory: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.39.14 14296

invalid binary "@1@"

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

child process was terminated by exception 0x@1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.40.41 14348

child process was terminated by signal @1@: @2@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.40.42 14351

could not access directory for core file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.40.43 14352

path specified by configuration parameter "@1@" is invalid: "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.44 14353

WAL archiving is not active

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.45 14354

could not set permissions on path specified by configuration parameter "@1@": "@2@": @3@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.40.46 14366

a failure has occurred while multiplexing transaction log files

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.40.47 14367

multiplexing of transaction log files has been stopped

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.40.48 14368

must be superuser to control WAL multiplexing

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.49 14369

WAL multiplexing is not configured

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.50 14370

WAL multiplexing is already paused

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.51 14371

WAL multiplexing is not paused

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.52 14372

could not fork XLog multiplexer process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.40.53 14373

could not set junction for "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.40.54 14374

could not set junction for "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.40.55 14375

could not remove file or directory "@1@": @2@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.40.56 14376

could not remove file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.40.57 14377

could not set junction for "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.40.58 14378

could not get junction for "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.40.59 14379

could not open directory "@1@": @2@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.40.60 14380

could not read directory "@1@": @2@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.40.61 14381

could not stat file or directory "@1@": @2@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.40.62 14384

could not determine encoding for locale "@1@": codeset is "@2@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.40.63 14385

could not remove file or directory "@1@": @2@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.40.64 14388

@1@ at or near "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.65 14390

query "@1@" returned more than one row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.66 14391

query "@1@" is not a SELECT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.67 14392

block label must be placed before DECLARE, not after

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.68 14393

collations are not supported by type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.69 14394

row or record variable cannot be CONSTANT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.70 14395

cannot use serializable mode in a hot standby

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.41 Message Numbers Beginning with 14400

2.41.1 14419

could not write lock file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.41.2 14421

Expected 1 tuple with 2 fields, got @1@ tuples with @2@ fields.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.41.3 14422

The primary's identifier is @1@, the standby's identifier is @2@.

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.41.4 14423

The transaction has already committed locally, but might not have been replicated to the standby.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.5 14424

You can choose the collation by applying the COLLATE clause to one or both expressions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.6 14425

Query has too few columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.7 14426

Cannot cast type @1@ to @2@ in column @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.8 14427

Query has too many columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.9 14430

No aggregate function matches the given name and argument types. Perhaps you misplaced ORDER BY; ORDER BY must appear after all regular arguments of the aggregate.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.10 14431

No function matches the given name and argument types. You might need to add explicit type casts.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.11 14432

There is a WITH item named "@1@", but it cannot be referenced from this part of the query.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.12 14433

Use WITH RECURSIVE, or re-order the WITH items to remove forward references.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.13 14434

Perhaps you meant to reference the table alias "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.14 14435

There is an entry for table "@1@", but it cannot be referenced from this part of the query.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.15 14436

String constants with Unicode escapes cannot be used when standard_conforming_strings is off.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.16 14437

Unicode escapes must be \uXXXX or \UXXXXXXXX.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.17 14438

Use " to write quotes in strings. \ is insecure in client-only encodings.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.18 14439

Use " to write quotes in strings, or use the escape string syntax (E'...').

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.19 14440

Use the escape string syntax for backslashes, e.g., E'\\'.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.20 14441

Use the escape string syntax for escapes, e.g., E'\r\n'.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.21 14442

Cast the output of the non-recursive term to the correct type.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.22 14443

Use the COLLATE clause to set the collation of the non-recursive term.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.23 14444

Explicitly cast to the desired type, for example ARRAY[]::integer[].

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.24 14445

Row comparison operators must be associated with btree operator families.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.25 14446

There are multiple equally-plausible candidates.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.26 14447

You will need to rewrite or cast the expression.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.27 14448

Use an explicit ordering operator or modify the query.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.28 14449

Could not choose a best candidate operator. You might need to add explicit type casts.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.29 14450

No operator matches the given name and argument type(s). You might need to add explicit type casts.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.30 14451

Aggregates with DISTINCT must be able to sort their inputs.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.31 14452

Constraint "@1@" contains a whole-row reference to table "@2@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.32 14453

Index "@1@" contains a whole-row table reference.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.33 14454

Cannot create a primary key or unique constraint using such an index.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.34 14455

Cannot create a non-deferrable constraint using a deferrable index.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.35 14456

Ordering operators must be "<" or ">" members of btree operator families.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.36 14457

Update your data type.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.37 14458

Use NONE to denote the missing argument of a unary operator.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.38 14459

Use separate LIMIT and OFFSET clauses.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.39 14460

For example, FROM (VALUES ...) [AS] foo.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.40 14461

For example, FROM (SELECT ...) [AS] foo.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.41 14463

The insertion source is a row expression containing the same number of columns expected by the INSERT. Did you accidentally use extra parentheses?

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.42 14464

Only result column names can be used, not expressions or functions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.43 14465

Add the expression/function to every SELECT, or move the UNION into a FROM clause.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.44 14466

Scrollable cursors must be READ ONLY.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.45 14467

Holdable cursors must be READ ONLY.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.46 14468

Insensitive cursors must be READ ONLY.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.47 14469

Valid options in this context are: @1 @

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.48 14470

Specify OWNED BY table.column or OWNED BY NONE.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.49 14471

Extension names must not be empty.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.50 14472

Extension names must not contain "--".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.51 14473

Extension names must not begin or end with "-".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.52 14474

Extension names must not contain directory separator characters.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.53 14475

Version names must not be empty.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.54 14476

Version names must not contain "--".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.55 14477

Version names must not begin or end with "-".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.56 14478

Version names must not contain directory separator characters.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.57 14479

Must be superuser to create this extension.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.58 14480

Must be superuser to update this extension.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.59 14481

@1@ is not in the extension's schema "@2@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.60 14482

Consider using tablespaces instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.61 14483

Use the same encoding as in the template database, or use template0 as template.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.62 14484

Use the same collation as in the template database, or use template0 as template.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.63 14485

Use the same LC_CTYPE as in the template database, or use template0 as template.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.64 14486

There is a conflict because database "@1@" already has some tables in this tablespace.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.65 14487

The chosen LC_CTYPE setting requires encoding "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.66 14488

The chosen LC_COLLATE setting requires encoding "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.67 14489

You must move them back to the database's default tablespace before using this command.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.68 14490

There are @1@ other session(s) and @2@ prepared transaction(s) using the database.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.69 14493

@1@ dead row versions cannot be removed yet. @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.70 14494

The prefix "pg_" is reserved for system schemas.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.71 14496

The server process with PID @1@ is among those with the oldest transactions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.72 14497

The NOTIFY queue cannot be emptied until that process ends its current transaction.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.73 14498

Use the COLLATE clause to set the collation explicitly.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.41.74 14499

The supported languages are listed in the pg_pltemplate system catalog.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42 Message Numbers Beginning with 14500

2.42.1 14500

Anyone can COPY to stdout or from stdin. psql's \copy command also works for anyone.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.2 14501

Try the COPY (SELECT ...) TO variant.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.3 14502

COPY @1@, line @2@, column @3@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.4 14503

COPY @1@, line @2@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.5 14504

COPY @1@, line @2@, column @3@: "@4@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.6 14505

COPY @1@, line @2@, column @3@: null input

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.7 14506

COPY @1@, line @2@: "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.8 14507

Use "\r" to represent carriage return.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.9 14508

Use quoted CSV field to represent carriage return.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.10 14509

Use "\n" to represent newline.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.11 14510

Use quoted CSV field to represent newline.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.12 14512

@1@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.13 14513

@1@ index row versions were removed. @2@ index pages have been deleted, @3@ are currently reusable. @4@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.14 14514

Operator class "@1@" already is the default.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.15 14515

Must be superuser to change owner of a foreign-data wrapper.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.16 14516

The owner of a foreign-data wrapper must be a superuser.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.17 14517

Must be superuser to create a foreign-data wrapper.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.18 14518

Must be superuser to alter a foreign-data wrapper.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.19 14520

Expected @1@ parameters but got @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.20 14521

Close open transactions soon to avoid wraparound problems.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.21 14522

You might have already suffered transaction-wraparound data loss.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.22 14523

Must be superuser to create a tablespace.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.23 14524

The prefix "pg_" is reserved for system tablespaces.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.24 14525

Create this directory for the tablespace before restarting the server.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.25 14526

You can remove the directories manually if necessary.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.26 14528

You can alter type @1@, which will alter the array type as well.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.27 14529

Tables cannot have INSTEAD OF triggers.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.28 14530

Views cannot have row-level BEFORE or AFTER triggers.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.29 14531

Views cannot have TRUNCATE triggers.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.30 14532

"@1@" versus "@2@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.31 14533

To resolve the conflict, specify a default explicitly.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.32 14534

Use ALTER TYPE instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.33 14535

Use ALTER ... CASCADE to alter the typed tables too.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.34 14536

Key columns "@1@" and "@2@" are of incompatible types: @3@ and @4@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.35 14537

@1@ depends on @2@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.36 14538

Change the ownership of the index's table, instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.37 14539

Sequence "@1@" is linked to table "@2@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.38 14540

"@1@" is already a child of "@2@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.39 14541

Only commutative operators can be used in exclusion constraints.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.40 14542

The exclusion operator must be related to the index operator class for the constraint.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.41 14543

You must specify an operator class for the index or define a default operator class for the data type.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.42 14544

Creating a shell type definition.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.43 14545

Use CREATE LANGUAGE to load the language into the database.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.44 14546

Use DROP AGGREGATE to drop aggregate functions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.45 14549

Key @1@ is duplicated.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.46 14551

Perhaps you need a different "datestyle" setting.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.47 14552

The operating system could not find any locale data for the locale name "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.48 14553

The server's LC_CTYPE locale is probably incompatible with the database encoding.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.49 14554

Provide two argument types for operator.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.50 14555

Missing left parenthesis.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.51 14556

Too few columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.52 14557

Unexpected end of input.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.53 14558

Too many columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.54 14559

Junk after right parenthesis.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.55 14560

Intervals are not tied to specific calendar dates.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.56 14561

"EEEE" may only be used together with digit and decimal point patterns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.57 14562

Do not mix Gregorian and ISO week date conventions in a formatting template.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.58 14563

This value contradicts a previous setting for the same field type.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.59 14564

Field requires @1@ characters, but only @2@ remain.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.60 14565

If your source string is not fixed-width, try using the "FM" modifier.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.61 14566

Field requires @1@ characters, but only @2@ could be parsed.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.62 14567

Value must be an integer.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.63 14568

Value must be in the range @1@ to @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.64 14569

The given value did not match any of the allowed values for this field.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.65 14570

Use the 24-hour clock, or give an hour between 1 and 12.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.66 14571

Escape string must be empty or one character.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.67 14572

Value has bits set to right of mask.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.68 14573

Target must be "archiver" or "bgwriter".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.69 14574

Identifier must be less than @1@ characters.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.70 14575

This functionality requires the server to be built with libxml support.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.71 14576

You need to rebuild PostgreSQL using --with-libxml.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.72 14577

XML processing instruction target name cannot be "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.73 14578

XML processing instruction cannot contain "?>".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.74 14579

libxml2 has incompatible char type: sizeof(char)=@1 @, sizeof(xmlChar)=@2 @.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.75 14580

XML does not support infinite date values.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.76 14581

XML does not support infinite timestamp values.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.77 14582

The array must be two-dimensional with length of the second axis equal to 2.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.78 14583

ACL key word must be "group" or "user".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.79 14584

A name must follow the "group" or "user" key word.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.80 14585

Use CASCADE to revoke them too.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.81 14586

Dimension array must be one dimensional.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.82 14587

Lower bound of dimension array must be one.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.83 14588

Low bound array has different size than dimensions array.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.84 14589

MATCH FULL does not allow mixing of null and nonnull key values.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.85 14590

Remove this referential integrity trigger and its mates, then do ALTER TABLE ADD CONSTRAINT.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.86 14591

This is most likely due to a rule having rewritten the query.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.87 14593

Key (@1@)=(@2@) is not present in table "@3@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.88 14594

Key (@1@)=(@2@) is still referenced from table "@3@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.89 14595

A field with precision @1@, scale @2@ must round to an absolute value less than @3@@4@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.90 14596

Arrays with element types @1@ and @2@ are not compatible for concatenation.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.91 14597

Arrays of @1@ and @2@ dimensions are not compatible for concatenation.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.92 14598

Arrays with differing element dimensions are not compatible for concatenation.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.42.93 14599

Arrays with differing dimensions are not compatible for concatenation.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43 Message Numbers Beginning with 14600

2.43.1 14600

Is another postgres (PID @1@) running in data directory "@2@"?

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.2 14601

Is another postmaster (PID @1@) running in data directory "@2@"?

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.3 14602

Is another postgres (PID @1@) using socket file "@2@"?

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.4 14603

Is another postmaster (PID @1 @) using socket file "@2@"?

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.5 14605

The file seems accidentally left over, but it could not be removed. Please remove the file by hand and try again.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.6 14606

File "@1@" is missing.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.7 14607

File "@1@" does not contain valid data.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.8 14608

You might need to initdb.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.9 14609

he data directory was initialized by PostgreSQL version @1@, which is not compatible with this version @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.10 14610

Specify an absolute path.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.11 14611

Set up WAL archiving when you configure "@1@" parameter.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.12 14612

Database OID @1 @ now seems to belong to "@2@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.13 14613

User does not have CONNECT privilege.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.14 14614

The database was initialized with LC_COLLATE "@1@", which is not recognized by setlocale().

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.15 14615

Recreate the database with another locale or install the missing locale.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.16 14616

The database was initialized with LC_CTYPE "@1@", which is not recognized by setlocale().

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.17 14617

You should immediately run CREATE USER "@1@" SUPERUSER;.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.18 14618

It seems to have just been dropped or renamed.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.19 14619

The database subdirectory "@1@" is missing.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.20 14620

String of @1@ bytes is too long for encoding conversion.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.21 14621

Continuing anyway, but there's something wrong.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.22 14622

Failed while creating memory context "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.23 14623

Failed on request of size @1@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.24 14624

Extension libraries are required to use the PG_MODULE_MAGIC macro.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.25 14625

Server is version @1@, library is version @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.26 14627

You need an unconditional ON INSERT DO INSTEAD rule with a RETURNING clause.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.27 14628

You need an unconditional ON UPDATE DO INSTEAD rule with a RETURNING clause.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.28 14629

You need an unconditional ON DELETE DO INSTEAD rule with a RETURNING clause.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.29 14630

Use views or triggers instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.30 14631

Use triggers instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.31 14632

Use views instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.32 14633

In particular, the table cannot be involved in any foreign key relationships.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.33 14634

Failed system call was shmget(key=@1 @, size=@2 @, 0@3 @).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.34 14638

Failed system call was CreateFileMapping(size=@1 @, name=@2 @).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.35 14639

Check if there are any old server processes still running, and terminate them.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.36 14640

Failed system call was DuplicateHandle.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.37 14641

Failed system call was MapViewOfFileEx.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.38 14642

Failed system call was semget(@1@, @2@, 0@3@).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.39 14643

This error does *not* mean that you have run out of disk space. It occurs when either the system limit for the maximum number of semaphore sets (SEMMNI), or the system wide maximum number of semaphores (SEMMNS), would be exceeded. You need to raise the respective kernel parameter. Alternatively, reduce PostgreSQL's consumption of semaphores by reducing its max_connections parameter. The PostgreSQL documentation contains more information about configuring your system for PostgreSQL.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.40 14644

You possibly need to raise your kernel's SEMVMX value to be at least @1@. Look into the PostgreSQL documentation for details.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.41 14645

Some of the datatypes only support hashing, while others only support sorting.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.42 14646

Window partitioning columns must be of sortable datatypes.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.43 14647

Window ordering columns must be of sortable datatypes.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.44 14648

SQL function "@1@" during startup

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.45 14649

All column datatypes must be hashable.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.46 14650

See server log for query details.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.47 14651

Client IP address resolved to "@1@", forward lookup matches.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.48 14652

Client IP address resolved to "@1@", forward lookup not checked.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.49 14653

Client IP address resolved to "@1@", forward lookup does not match.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.50 14654

LDAP over SSL is not supported on this platform.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.51 14655

Is another postmaster already running on port @1@? If not, remove socket file "@2@" and retry.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.52 14656

Is another postmaster already running on port @1@? If not, wait a few seconds and retry.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.53 14657

Anyone can use the client-side lo_import() provided by libpq.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.54 14658

Anyone can use the client-side `lo_export()` provided by `libpq`.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.55 14659

File must have permissions `u=rw (0600)` or less if owned by the database user, or permissions `u=rw,g=r (0640)` or less if owned by root.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.56 14660

SSL library does not support certificate revocation lists.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.57 14662

line `@1@` of configuration file "`@2@`"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.58 14663

Set ssl = on in postgresql.conf.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.59 14664

Compile with --with-openssl to use SSL connections.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.60 14666

Cannot enlarge string buffer containing @1@ bytes by @2@ more bytes.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.61 14667

Please REINDEX it.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.62 14668

Values larger than 1/3 of a buffer page cannot be indexed. Consider a function index of an MD5 hash of the value, or use full text indexing.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.63 14669

Key @1@ already exists.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.64 14670

This may be because of a non-immutable index expression.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.65 14671

To fix this, do REINDEX INDEX "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.66 14672

This is caused by an incomplete page split at crash recovery before upgrading to PostgreSQL 9.1.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.67 14673

The index is not optimal. To optimize it, contact a developer, or try to use the column as the second one in the CREATE INDEX command.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.68 14674

Could not open file "@1@": @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.69 14675

Could not seek in file "@1@" to offset @2@: @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.70 14676

Could not read from file "@1@" at offset @2@: @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.71 14677

Could not write to file "@1@" at offset @2@: @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.72 14678

Could not fsync file "@1@": @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.73 14679

Could not close file "@1@": @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.74 14680

Set max_prepared_transactions to a nonzero value.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.75 14681

Increase max_prepared_transactions (currently @1@).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.76 14682

Must be superuser or the user that prepared the transaction.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.77 14683

Connect to the database where the transaction was prepared to finish it.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.78 14687

Expected a numeric timeline ID.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.79 14688

Timeline IDs must be in increasing sequence.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.80 14689

Timeline IDs must be less than child timeline's ID.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.81 14690

The database cluster was initialized with PG_CONTROL_VERSION @1@ (0x@2@), but the server was compiled with PG_CONTROL_VERSION @3@ (0x@4@).**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.82 14691

This could be a problem of mismatched byte ordering. It looks like you need to initdb.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.83 14692

The database cluster was initialized with PG_CONTROL_VERSION @1@, but the server was compiled with PG_CONTROL_VERSION @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.84 14693

It looks like you need to initdb.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.85 14694

The database cluster was initialized with CATALOG_VERSION_NO @1@, but the server was compiled with CATALOG_VERSION_NO @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.86 14695

The database cluster was initialized with MAXALIGN @1@, but the server was compiled with MAXALIGN @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.87 14696

The database cluster appears to use a different floating-point number format than the server executable.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.88 14697

The database cluster was initialized with BLCKSZ @1@, but the server was compiled with BLCKSZ @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.89 14698

It looks like you need to recompile or initdb.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.90 14699

The database cluster was initialized with RELSEG_SIZE @1@, but the server was compiled with RELSEG_SIZE @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44 Message Numbers Beginning with 14700

2.44.1 14700

The database cluster was initialized with XLOG_BLCKSZ @1@, but the server was compiled with XLOG_BLCKSZ @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.2 14701

The database cluster was initialized with XLOG_SEG_SIZE @1@, but the server was compiled with XLOG_SEG_SIZE @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.3 14702

The database cluster was initialized with NAMEDATALEN @1@, but the server was compiled with NAMEDATALEN @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.4 14703

The database cluster was initialized with INDEX_MAX_KEYS @1@, but the server was compiled with INDEX_MAX_KEYS @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.5 14704

The database cluster was initialized with TOAST_MAX_CHUNK_SIZE @1@, but the server was compiled with TOAST_MAX_CHUNK_SIZE @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.6 14707

The database cluster was initialized without USE_FLOAT4_BYVAL but the server was compiled with USE_FLOAT4_BYVAL.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.7 14708

The database cluster was initialized with USE_FLOAT4_BYVAL but the server was compiled without USE_FLOAT4_BYVAL.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.8 14709

The database cluster was initialized without USE_FLOAT8_BYVAL but the server was compiled with USE_FLOAT8_BYVAL.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.9 14710

The database cluster was initialized with USE_FLOAT8_BYVAL but the server was compiled without USE_FLOAT8_BYVAL.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.10 14711

The database server will regularly poll the pg_wal subdirectory to check for files placed there.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.11 14712

Execute pg_wal_replay_resume() to continue.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.12 14713

Recovery control functions can only be executed during recovery.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.13 14714

This happens if you temporarily set wal_level=minimal without taking a new base backup.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.14 14715

Either set wal_level to "replica" on the master, or turn off hot_standby here.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.15 14716

This probably means that some data is corrupted and you will have to use the last backup for recovery.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.16 14717

If this has occurred more than once some data might be corrupted and you might need to choose an earlier recovery target.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.17 14718

If you are restoring from a backup, touch "@1@/recovery.signal" and add required recovery options.If you are not restoring from a backup, try removing the file "@2@/backup_label".Be careful: removing "@3@/backup_label" will result in a corrupt cluster if restoring from a backup.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.18 14719

Online backup started with pg_start_backup() must be ended with pg_stop_backup(), and all WAL up to that point must be available at recovery.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.19 14720

WAL control functions cannot be executed during recovery.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.20 14721

wal_level must be set to "replica" or "logical" at server start.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.21 14722

Run pg_stop_backup() and try again.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.22 14723

If you're sure there is no backup in progress, remove file "@1@" and try again.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.23 14724

Check that your archive_command is executing properly. pg_stop_backup can be canceled safely, but the database backup will not be usable without all the WAL segments.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.24 14727

WAL redo at @1 @/@2@ for @3@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.25 14731

To avoid a database shutdown, execute a database-wide VACUUM in that database. You might also need to commit or roll back old prepared transactions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.26 14732

Values larger than a buffer page cannot be indexed.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.27 14733

Valid values are between "@1@" and "@2@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.28 14734

Valid values are between "@1@" and "@2@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.29 14735

Returned type @1@ does not match expected type @2@ in column @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.30 14736

Number of returned columns (@1@) does not match expected column count (@2@).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.31 14737

Attribute "@1@" of type @2@ does not match corresponding attribute of type @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.32 14738

Attribute "@1@" of type @2@ does not exist in type @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.33 14739

To enable inserting into the view, provide an INSTEAD OF INSERT trigger or an unconditional ON INSERT DO INSTEAD rule.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.34 14740

To enable updating the view, provide an INSTEAD OF UPDATE trigger or an unconditional ON UPDATE DO INSTEAD rule.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.35 14741

To enable deleting from the view, provide an INSTEAD OF DELETE trigger or an unconditional ON DELETE DO INSTEAD rule.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.36 14742

SQL function "@1@" statement @2@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.37 14743

SQL function "@1@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.38 14744

SQL function "@1@" during inlining

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.39 14745

Function's final statement must be SELECT or INSERT/UPDATE/DELETE RETURNING.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.40 14746

Final statement must return exactly one column.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.41 14747

Actual return type is @1@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.42 14748

Final statement returns too many columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.43 14749

Final statement returns @1@ instead of @2@ at column @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.44 14750

Final statement returns too few columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.45 14751

Input has too many columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.46 14752

Table has type @1@ at ordinal position @2@, but query expects @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.47 14753

Query provides a value for a dropped column at ordinal position @1@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.48 14754

Input has too few columns.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.49 14755

Check for missing "SPI_finish" calls.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.50 14756

SQL statement "@1@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.51 14757

Table has type @1@, but query expects @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.52 14758

Table row contains @1@ attribute, but query expects @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.53 14759

Physical storage mismatch on dropped attribute at ordinal position @1@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.54 14760

Returned row contains @1@ attribute, but query expects @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.55 14761

Returned type @1@ at ordinal position @2@, but query expects @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.56 14762

Array with element type @1@ cannot be included in ARRAY construct with element type @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.57 14763

Key @1@ conflicts with key @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.58 14764

Key @1@ conflicts with existing key @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.59 14765

This has been seen to occur with buggy kernels; consider updating your system.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.60 14766

Multiple failures --- write error might be permanent.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.61 14767

writing block @1@ of relation @2@**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.62 14768

Only RowExclusiveLock or less can be acquired on database objects during recovery.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.63 14769

You might need to increase max_locks_per_transaction.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.64 14771

You might need to run fewer transactions at a time or increase max_connections.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.65 14772

There might be an idle transaction or a forgotten prepared transaction causing this.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.66 14773

"default_transaction_isolation" is set to "serializable".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.67 14774

You can use "SET default_transaction_isolation = 'repeatable read'" to change the default.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.68 14775

You might need to increase max_pred_locks_per_transaction.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.69 14776

The transaction might succeed if retried.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.70 14778

User transaction caused buffer deadlock with recovery.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.71 14779

System allows @1@, we need at least @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.72 14782

Check free disk space.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.73 14783

Consider increasing the configuration parameter "max_wal_size".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.74 14784

Consult recent messages in the server log for details.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.75 14785

This may indicate an incomplete PostgreSQL installation, or that the file "@1@" has been moved away from its proper location.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.76 14786

The server must be started by the user that owns the data directory.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.77 14787

Permissions should be u=rwx (0700).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.78 14788

[See C include file "ntstatus.h" for a description of the hexadecimal value.](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.79 14789

[automatic vacuum of table "@1@.@2@.@3@"](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.80 14790

[automatic analyze of table "@1@.@2@.@3@"](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.81 14791

[Enable the "track_counts" option.](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.82 14792

The failed archive command was: @1@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.83 14793

Some of the transaction logs were lost that are necessary to recover the database completely.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.84 14794

Fix the problem by referring to the messages prior to this one. Then take a full backup of the database.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.85 14795

line @1@ of configuration file "@2@": "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.86 14796

Words longer than @1@ characters are ignored.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.87 14797

Use "?" to represent a stop word within a sample phrase.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.88 14798

Declare it with SCROLL option to enable backward scan.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.89 14799

prepare: @1@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45 Message Numbers Beginning with 14800

2.45.1 14800

parameters: @1@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.2 14801

abort reason: recovery conflict

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.3 14802

User was holding shared buffer pin for too long.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.4 14803

User was holding a relation lock for too long.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.5 14804

User was or might have been using tablespace that must be dropped.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.6 14805

User query might have needed to see row versions that must be removed.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.7 14806

User was connected to a database that must be dropped.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.8 14808

In a moment you should be able to reconnect to the database and repeat your command.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.9 14809

An invalid floating-point operation was signaled. This probably means an out-of-range result or an invalid operation, such as division by zero.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.10 14810

Increase the configuration parameter "max_stack_depth" (currently @1@kB), after ensuring the platform's stack depth limit is adequate.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.11 14811

Try "@1@ --help" for more information.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.12 14812

An aggregate returning a polymorphic type must have at least one polymorphic argument.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.13 14813

A function returning "internal" must have at least one "internal" argument.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.14 14814

Use DROP FUNCTION @1@ first.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.15 14815

Row type defined by OUT parameters is different.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.16 14816

System catalog modifications are currently disallowed.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.17 14818

A relation has an associated type of the same name, so you must use a name that doesn't conflict with any existing type.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.18 14819

Table "@1@" references "@2@", but they do not have the same ON COMMIT setting.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.19 14820

Table "@1@" references "@2@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.20 14821

Truncate table "@1@" at the same time, or use TRUNCATE ... CASCADE.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.21 14822

GRANT and REVOKE are not allowed on untrusted languages, because only superusers can use untrusted languages.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.22 14823

You can drop @1@ instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.23 14824

Use DROP ... CASCADE to drop the dependent objects too.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.24 14825

An aggregate using a polymorphic transition type must have at least one polymorphic argument.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.25 14826

A function returning a polymorphic type must have at least one polymorphic argument.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.26 14827

Labels must be @1@ characters or less.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.27 14828

Valid fork names are "main", "fsm", "vm", and "init".

[Description]

Supplementary information was output.

[System Processing]

while executing plperl.on_plperlu_init

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.37 14839

PL/Perl function "@1@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.38 14840

compilation of PL/Perl function "@1@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.39 14841

PL/Perl anonymous code block

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.40 14842

PL/Python function "@1@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.41 14843

PL/Python anonymous code block

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.42 14844

while modifying trigger row

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.43 14845

while creating return value

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.44 14846

Expected None or a string.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.45 14847

Expected None, "OK", "SKIP", or "MODIFY".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.46 14848

PL/Python set-returning functions only support returning one value per call.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.47 14849

PL/Python set-returning functions must return an iterable object.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.48 14852

To return null in a column, add the value None to the mapping with the key named after the column.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.49 14853

To return null in a column, let the returned object have an attribute named after column with value None.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.50 14856

The arguments of the trigger can be accessed through TG_NARGS and TG_ARGV instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.51 14857

compilation of PL/pgSQL function "@1@" near line @2@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.52 14858

It could refer to either a PL/pgSQL variable or a table column.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.53 14859

PL/pgSQL function @1@ line @2@ @3@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.54 14860

PL/pgSQL function @1@ @2@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.55 14861

PL/pgSQL function @1@ line @2@ at @3@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.56 14862

PL/pgSQL function @1@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.57 14863

CASE statement is missing ELSE part.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.58 14864

The tuple structure of a not-yet-assigned record is indeterminate.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.59 14865

@1@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.60 14866

Use a BEGIN block with an EXCEPTION clause instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.61 14867

If you want to discard the results of a SELECT, use PERFORM instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.62 14868

You might want to use EXECUTE ... INTO or EXECUTE CREATE TABLE ... AS instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.63 14869

Use RETURN NEXT or RETURN QUERY.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.64 14870

@1@in PL/Tcl function "@2@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.65 14871

could not translate host name "@1@" to address: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.66 14873

out of memory

[Description]

There was insufficient free space in the client's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

2.45.67 14877

host name must be specified

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.45.68 14881

GSSAPI continuation error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.45.69 14882

duplicate GSS authentication request

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.45.70 14883

GSSAPI name import error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.45.71 14884

SSPI continuation error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.45.72 14885

could not acquire SSPI credentials

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.73 14886

SCM_CRED authentication method not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.74 14887

Kerberos 4 authentication not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.75 14888

Kerberos 5 authentication not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.76 14889

GSSAPI authentication not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.77 14890

SSPI authentication not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.78 14891

Crypt authentication not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.79 14892

authentication method @1@ not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.80 14893

invalid sslmode value: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.81 14894

sslmode value "@1@" invalid when SSL support is not compiled in

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.82 14895

could not set socket to TCP no delay mode: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.83 14896

could not connect to server: @1@ Is the server running locally and accepting connections on Unix domain socket "@2@"?

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.84 14897

could not connect to server: @1@ Is the server running on host "@2@" (@3@) and accepting TCP/IP connections on port @4@?

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.85 14898

could not connect to server: @1@ Is the server running on host "@2@" and accepting TCP/IP connections on port @3@?

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46 Message Numbers Beginning with 14900

2.46.1 14902

setsockopt(@1@) failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.2 14903

WSAIoctl(SIO_KEEPA_LIVE_VALS) failed: @1@i

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.3 14904

invalid port number: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.4 14906

could not translate Unix-domain socket path "@1@" to address: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.5 14907

invalid connection state, probably indicative of memory corruption

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.46.6 14908

could not create socket: @1@

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.46.7 14909

could not set socket to nonblocking mode: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.8 14910

could not set socket to close-on-exec mode: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.9 14911

keepalives parameter must be an integer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.10 14913

could not get socket error status: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.11 14914

could not get client address from socket: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.12 14915

requirepeer parameter is not supported on this platform

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.13 14916

could not get peer credentials: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.14 14918

requirepeer specifies "@1@", but actual peer user name is "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.15 14919

could not send startup packet: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.16 14921

unexpected message from server during startup

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.17 14922

could not send SSL negotiation packet: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.18 14923

server does not support SSL, but SSL was required

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.19 14924

received invalid response to SSL negotiation: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.20 14925

expected authentication request from server, but received @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.21 14926

out of memory allocating GSSAPI buffer (@1@)

[Description]

There was insufficient free space in the client's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

2.46.22 14927

invalid connection state @1@, probably indicative of memory corruption

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.46.23 14928

PGEventProc "@1@" failed during PGEVT_CONNRESET event

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.24 14929

invalid LDAP URL "@1@": scheme must be ldap://

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.25 14930

invalid LDAP URL "@1@": missing distinguished name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.26 14931

invalid LDAP URL "@1@": must have exactly one attribute

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.27 14932

invalid LDAP URL "@1@": must have search scope (base/one/sub)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.28 14933

invalid LDAP URL "@1@": no filter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.29 14934

invalid LDAP URL "@1@": invalid port number

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.30 14935

could not create LDAP structure

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.31 14936

lookup on LDAP server failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.32 14937

more than one entry found on LDAP lookup

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.33 14938

no entry found on LDAP lookup

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.34 14939

attribute has no values on LDAP lookup

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.35 14940

missing "=" after "@1@" in connection info string

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.36 14941

invalid connection option "@1@"

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.37 14942

unterminated quoted string in connection info string

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.38 14944

definition of service "@1@" not found

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.39 14945

service file "@1@" not found

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.40 14946

line @1@ too long in service file "@2@"

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.41 14947

syntax error in service file "@1@", line @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.42 14948

connection pointer is NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.43 14951

password retrieved from file "@1@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.46.44 14952

command string is a null pointer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.45 14953

statement name is a null pointer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.46 14954

function requires at least protocol version 3.0

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.47 14955

no connection to the server

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.48 14956

another command is already in progress

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.49 14957

length must be given for binary parameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.50 14958

unexpected asyncStatus: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.46.51 14959

PGEventProc "@1@" failed during PGEVT_RESULTCREATE event

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.52 14960

COPY terminated by new PQexec

[Description]

Processing was canceled.

[System Processing]

Processing will be aborted.

[Action]

Check the message text.

2.46.53 14961

COPY IN state must be terminated first

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.54 14962

COPY OUT state must be terminated first

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.55 14963

PQexec not allowed during COPY BOTH

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.56 14964

no COPY in progress

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.57 14965

connection in wrong state

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.58 14966

invalid ExecStatusType code

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.59 14967

column number @1@ is out of range 0..@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.60 14968

row number @1@ is out of range 0..@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.61 14969

parameter number @1@ is out of range 0..@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.62 14970

could not interpret result from server: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.63 14971

incomplete multibyte character

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.64 14972

cannot determine OID of function lo_truncate

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.65 14973

cannot determine OID of function lo_create

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.66 14974

could not open file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.67 14975

could not read from file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.68 14976

could not write to file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.69 14977

query to initialize large object functions did not return data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.70 14978

cannot determine OID of function lo_open

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.71 14979

cannot determine OID of function lo_close

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.72 14980

cannot determine OID of function lo_creat

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.73 14981

cannot determine OID of function lo_unlink

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.74 14982

cannot determine OID of function lo_lseek

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.75 14983

cannot determine OID of function lo_tell

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.76 14984

cannot determine OID of function loread

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.77 14985

cannot determine OID of function lowrite

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.78 14986

integer of size @1@ not supported by pqGetInt

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.79 14987

integer of size @1@ not supported by pqPutInt

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.80 14988

connection not open

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.81 14989

server closed the connection unexpectedly This probably means the server terminated abnormally before or while processing the request.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.82 14990

timeout expired

[Description]

Timeout occurred during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.46.83 14991

invalid socket

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.84 14992

select() failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.46.85 14993

invalid setenv state @1 @, probably indicative of memory corruption

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.46.86 14994

invalid state @1 @, probably indicative of memory corruption

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.46.87 14995

message type 0x@1 @ arrived from server while idle

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.46.88 14996

unexpected character @1 @ following empty query response ("I" message)

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.89 14997

server sent data ("D" message) without prior row description ("T" message)

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.90 14998

server sent binary data ("B" message) without prior row description ("T" message)

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.91 14999

unexpected response from server; first received character was "@1@"

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.47 Message Numbers Beginning with 15000

2.47.1 15000

out of memory for query result

[Description]

There was insufficient free space in the client's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

2.47.2 15001

lost synchronization with server, resetting connection

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- If the COMMIT process is not executed after update, add the COMMIT process.
 - If the total number of update records in a single transaction is high, split it into short transactions.
 - If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - Confirm that the database server has not stopped.
 - If the database server is starting or stopping, re-execute the command after the database server starts.

2.47.3 15002

protocol error: id=0x@1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.47.4 15003

server sent data ("D" message) without prior row description ("T" message)

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.47.5 15004

message contents do not agree with length in message type "@1@"

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.47.6 15005

lost synchronization with server: got message type "@1@", length @2@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.47.7 15006

unexpected field count in "D" message

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.47.8 15007

PQgetline: not doing text COPY OUT

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.47.9 15008

could not establish SSL connection: @1@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.47.10 15009

SSL SYSCALL error: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.11 15010

SSL SYSCALL error: EOF detected

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.12 15011

SSL error: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.13 15012

SSL connection has been closed unexpectedly

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
- b) If the total number of update records in a single transaction is high, split it into short transactions.
- c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.47.14 15013

unrecognized SSL error code: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.15 15014

could not receive data from server: @1@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)

- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.47.16 15015

could not send data to server: @1@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.47.17 15016

could not get server's host name from server certificate

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.18 15017

SSL certificate's name contains embedded null

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.19 15018

host name must be specified for a verified SSL connection

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.20 15019

server certificate for "@1@" does not match host name "@2@"

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.21 15020

could not create SSL context: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.22 15021

could not open certificate file "@1@": @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.23 15022

could not read certificate file "@1@": @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.24 15023

could not load SSL engine "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.25 15024

could not initialize SSL engine "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.26 15025

could not read private SSL key "@1@" from engine "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.27 15026

could not load private SSL key "@1@" from engine "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.28 15027

certificate present, but not private key file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.29 15028

private key file "@1@" has group or world access; permissions should be u=rw (0600) or less

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.30 15029

could not load private key file "@1@" : @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.31 15030

certificate does not match private key file "@1@" : @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.32 15031

could not read root certificate file "@1@": @2@

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.33 15032

SSL library does not support CRL certificates (file "@1@")

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.47.34 15033

could not get home directory to locate root certificate fileEither provide the file or change sslmode to disable server certificate verification.

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.35 15034

root certificate file "@1@" does not existEither provide the file or change sslmode to disable server certificate verification.

[Description]

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.36 15035

certificate could not be obtained: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.37 15036

no SSL error reported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.38 15037

SSL error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.39 15038

@1@: vacuuming database "@2@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.47.40 15042

skipped creating .ready file for multiplexed transaction log file "@1@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.47.41 15043

skipped recycling multiplexed transaction log file "@1@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.47.42 15044

skipped removing multiplexed transaction log file "@1@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.47.43 15045

no data found on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.44 15046

out of memory on line @1@

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.47.45 15047

unsupported type "@1@" on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.46 15048

too many arguments on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.47 15049

too few arguments on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.48 15050

invalid input syntax for type int: "@1@", on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.49 15051

invalid input syntax for type unsigned int: "@1@", on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.50 15052

invalid input syntax for floating-point type: "@1@", on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.51 15053

invalid syntax for type boolean: "@1@", on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.52 15054

could not convert boolean value: size mismatch, on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.53 15055

empty query on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.54 15056

null value without indicator on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.55 15057

variable does not have an array type on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.56 15058

data read from server is not an array on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.57 15059

inserting an array of variables is not supported on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.58 15060

connection "@1@" does not exist on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.59 15061

not connected to connection "@1@" on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.60 15062

invalid statement name "@1@" on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.61 15063

descriptor "@1@" not found on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.62 15064

descriptor index out of range on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.63 15065

unrecognized descriptor item "@1@" on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.64 15066

variable does not have a numeric type on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.65 15067

variable does not have a character type on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.66 15068

error in transaction processing on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.67 15069

could not connect to database "@1@" on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.68 15070

SQL error @1@ on line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.69 15071

the connection to the server was lost

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.70 15072

empty message text

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.71 15074

SP-GiST inner tuple size @1@ exceeds maximum @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.72 15075

backup_label contains data inconsistent with control file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.73 15076

WAL generated with full_page_writes=off was replayed since last restartpoint

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.74 15077

the standby was promoted during online backup

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.75 15078

WAL generated with full_page_writes=off was replayed during online backup

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.76 15080

cannot set privileges of array types

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.77 15081

**drop cascades to @1@ other object
drop cascades to @2@ other objects**

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.47.78 15082

constraint "@1@" conflicts with non-inherited constraint on relation "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.79 15083

DROP INDEX CONCURRENTLY must be first action in transaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.80 15085

domain @1@ has multiple constraints named "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.81 15086

functions cannot have more than @1@ argument
functions cannot have more than @2@ arguments

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.82 15087

skipping "@1@" --- cannot analyze this foreign table

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.47.83 15088

could not convert row type

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.47.84 15089

unexpected EOF on client connection with an open transaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.85 15090

EXPLAIN option TIMING requires ANALYZE

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.86 15091

only superuser can define a leakproof function

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.87 15092

cast will be ignored because the source data type is a domain

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.88 15093

cast will be ignored because the target data type is a domain

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.89 15094

btree sort support procedures must accept type "internal"**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.90 15095

btree sort support procedures must return void**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.91 15096

Use DROP TABLE to remove a table.**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.92 15097

Use DROP SEQUENCE to remove a sequence.**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.93 15098

Use DROP VIEW to remove a view.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.47.94 15099

Use DROP INDEX to remove an index.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48 Message Numbers Beginning with 15100

2.48.1 15100

Use DROP TYPE to remove a type.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.2 15101

Use DROP FOREIGN TABLE to remove a foreign table.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.3 15102

DROP INDEX CONCURRENTLY does not support dropping multiple objects

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.4 15103

DROP INDEX CONCURRENTLY does not support CASCADE

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.5 15104

cannot inherit from temporary relation of another session

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.6 15105

constraints on temporary tables must involve temporary tables of this session

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.7 15106

constraint must be validated on child tables too

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.8 15107

cannot inherit to temporary relation of another session

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.9 15108

constraint "@1@" conflicts with non-inherited constraint on child table "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.10 15109

Found referenced table's UPDATE trigger.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.11 15110

Found referenced table's DELETE trigger.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.12 15111

Found referencing table's trigger.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.13 15112

@1 @ constraints cannot be marked NO INHERIT

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.14 15113

type attribute "subtype" is required

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.15 15114

range collation specified but subtype does not support collation

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.16 15115

range canonical function @1@ must be immutable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.17 15116

range subtype diff function @1@ must return type @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.18 15117

range subtype diff function @1@ must be immutable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.19 15118

constraint "@1@" of domain "@2@" does not exist, skipping

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.20 15119

"@1@": suspending truncate due to conflicting lock request

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.21 15120

cannot set transaction read-write mode inside a read-only transaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.22 15121

transaction read-write mode must be set before any query

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.23 15122

cannot set transaction read-write mode during recovery

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.24 15123

SET TRANSACTION ISOLATION LEVEL must be called before any query

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.25 15124

SET TRANSACTION ISOLATION LEVEL must not be called in a subtransaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.26 15125

SET TRANSACTION [NOT] DEFERRABLE cannot be called within a subtransaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.27 15126

SET TRANSACTION [NOT] DEFERRABLE must be called before any query

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.28 15127

cannot delete from view "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.29 15128

GLOBAL is deprecated in temporary table creation

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.30 15129

duplicate trigger events specified

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.48.31 15130

unrecognized configuration parameter "@1@" in file "@2@" line @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.32 15131

configuration file "@1@" contains errors

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.33 15132

configuration file "@1@" contains errors; unaffected changes were applied

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.34 15133

configuration file "@1@" contains errors; no changes were applied

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.35 15134

too many syntax errors found, abandoning file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.36 15135

accepting GSS security context failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.37 15136

retrieving GSS user name failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.38 15137

could not acquire SSPI credentials

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.39 15138

could not accept SSPI security context

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.40 15139

could not get token from SSPI security context

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.41 15140

multiple values in ident field

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.48.42 15141

multiple values specified for connection type

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.48.43 15142

multiple values specified for host address

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.48.44 15143

multiple values specified for netmask

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.48.45 15144

multiple values specified for authentication type

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.48.46 15145

ident, peer, gssapi, sspi, and cert

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.48.47 15146

gssapi and sspi

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.48.48 15147

configuration file "@1@" contains no entries

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.49 15148

Unix-domain socket path "@1@" is too long (maximum @2@ bytes)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.50 15149

@1@: WSAStartup failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.51 15150

@1@: real and effective user IDs must match

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.52 15151

could not look up effective user ID @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.53 15153

too many range table entries

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.54 15154

SELECT ... INTO is not allowed here

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.55 15155

arguments declared "anyrange" are not all alike

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.56 15156

argument declared @1@ is not consistent with argument declared @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.57 15157

could not load dbghelp.dll, cannot write crash dump

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.58 15158

could not load required functions in dbghelp.dll, cannot write crash dump

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.59 15159

could not open crash dump file "@1@" for writing: error code @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.60 15160

could not write crash dump to file "@1@": error code @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.61 15161

could not check access token membership: error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.62 15162

could not get SID for Administrators group: error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.63 15163

could not get SID for PowerUsers group: error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.64 15164

could not create signal listener pipe: error code @1@; retrying

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.65 15165

could not create signal dispatch thread: error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.66 15166

@1@: superuser_reserved_connections must be less than max_connections

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.67 15167

[@1@: max_wal_senders must be less than max_connections](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.68 15168

[@1@: invalid datetoken tables, please fix](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.69 15169

[@1@: could not change permissions of external PID file "@2@": @3@](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.70 15170

[@1@: could not write external PID file "@2@": @3@](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.71 15171

could not fork new process for connection:

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.72 15172

could not read exit code for process

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.73 15173

could not post child completion status

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.74 15174

could not write to log file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.75 15175

invalid streaming start location

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.76 15176

unterminated quoted string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.77 15177

unexpected WAL file size "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.78 15178

unterminated bit string literal

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.79 15179

unterminated hexadecimal string literal

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.80 15180

invalid Unicode surrogate pair

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.81 15181

unterminated dollar-quoted string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.82 15182

zero-length delimited identifier

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.83 15183

unterminated quoted identifier

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.84 15184

Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.85 15185

invalid Unicode escape value

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.86 15186

invalid Unicode escape character

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.87 15187

temporary file size exceeds temp_file_limit (@1@kB)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.88 15188

a snapshot-importing transaction must not be READ ONLY DEFERRABLE

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.89 15189

could not import the requested snapshot

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.90 15190

connection to client lost

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.48.91 15191

invalid command-line argument for server process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.92 15194

range constructor flags argument must not be null

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.93 15195

result of range difference would not be contiguous

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.94 15196

result of range union would not be contiguous

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.95 15197

range lower bound must be less than or equal to range upper bound

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.96 15198

invalid range bound flags

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.48.97 15199

could not set up XML error handler

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49 Message Numbers Beginning with 15200

2.49.1 15200

keystore_location is not supported by this build

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.2 15201

keystore location is not configured

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.3 15202

could not encrypt or decrypt data because the keystore is not open

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.4 15203

keystore is already open

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.5 15204

passphrase is too short or too long

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.6 15205

passphrase-based key derivation failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.7 15206

a new master encryption key has been set

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.8 15207

passphrase of the keystore has been changed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.9 15208

encryption or decryption of data in tablespace @1@ failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.10 15209

encryption or decryption of data failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.11 15210

could not open keystore "@1@": necessary master encryption key does not exist in the keystore

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.12 15211

decryption of the auto-open keystore "@1@" failed: error code = @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.13 15212

encryption of the auto-open keystore "@1@" failed: error code = @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.14 15213

keystore "@1@" is corrupted: size = @2@ bytes, expected size = @3@ bytes

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.15 15214

could not open keystore "@1@" : passphrase is wrong, or the auto-open keystore was created by another computer or user

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.16 15215

keystore "@1@" is corrupted: invalid CRC

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.17 15216

encryption or decryption of the keystore "@1@" failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.18 15217

character with byte sequence @1@ in encoding "@2@" has no equivalent in encoding "@3@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.19 15218

Enables the planner's use of sequential-scan plans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.20 15219

Enables the planner's use of index-scan plans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.21 15220

Enables the planner's use of index-only-scan plans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.22 15221

Enables the planner's use of bitmap-scan plans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.23 15222

Enables the planner's use of TID scan plans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.24 15223

Enables the planner's use of explicit sort steps.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.25 15224

Enables the planner's use of hashed aggregation plans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.26 15225

Enables the planner's use of materialization.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.27 15226

Enables the planner's use of nested-loop join plans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.28 15227

Enables the planner's use of merge join plans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.29 15228

Enables the planner's use of hash join plans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.30 15229

Enables genetic query optimization.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.31 15230

Shows whether the current user is a superuser.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.32 15231

Enables advertising the server via Bonjour.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.33 15232

Enables SSL connections.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.34 15233

Forces synchronization of updates to disk.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.35 15235

Writes full pages to WAL when first modified after a checkpoint.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.36 15236

Logs each checkpoint.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.37 15237

Logs each successful connection.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.38 15238

Logs end of a session, including duration.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.39 15239

Shows whether the running server has assertion checks enabled.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.40 15240

Terminate session on any error.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.41 15241

Restarts all server processes on WAL multiplexing errors.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.42 15242

Enables fast WAL multiplexing.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.43 15243

Enables encryption of temporary files used in large queries.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.44 15244

Reinitialize server after backend crash.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.45 15245

Logs the duration of each completed SQL statement.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.46 15246

Logs each query's parse tree.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.47 15247

Logs each query's rewritten parse tree.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.48 15248

Logs each query's execution plan.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.49 15249

Indents parse and plan tree displays.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.50 15250

Writes parser performance statistics to the server log.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.51 15251

Writes planner performance statistics to the server log.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.52 15252

Writes executor performance statistics to the server log.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.53 15253

Writes cumulative performance statistics to the server log.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.54 15255

Collects information about executing commands.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.55 15256

Collects statistics on database activity.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.56 15257

Collects timing statistics for database I/O activity.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.57 15258

Updates the process title to show the active SQL command.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.58 15259

Starts the autovacuum subprocess.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.59 15260

Generates debugging output for LISTEN and NOTIFY.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.60 15261

Logs long lock waits.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.61 15262

Logs the host name in the connection logs.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.62 15264

Encrypt passwords.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.63 15265

Treats "expr=NULL" as "expr IS NULL".

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.64 15266

Enables per-database user names.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.65 15268

Sets the default read-only status of new transactions.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.66 15269

Sets the current transaction's read-only status.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.67 15270

Sets the default deferrable status of new transactions.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.68 15271

Whether to defer a read-only serializable transaction until it can be executed with no possible serialization failures.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.69 15272

Check function bodies during CREATE FUNCTION.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.70 15273

Enable input of NULL elements in arrays.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.71 15275

Start a subprocess to capture stderr output and/or csvlogs into log files.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.72 15276

Truncate existing log files of same name during log rotation.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.73 15277

Emit information about resource usage in sorting.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.74 15278

Generate debugging output for synchronized scanning.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.75 15279

Enable bounded sorting using heap sort.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.76 15280

Emit WAL-related debugging output.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.77 15281

Datetimes are integer based.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.78 15282

Sets whether Kerberos and GSSAPI user names should be treated as case-insensitive.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.79 15283

Warn about backslash escapes in ordinary string literals.

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.49.80 15284

Causes '...' strings to treat backslashes literally.

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.49.81 15285

Enable synchronized sequential scans.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.82 15286

Allows archiving of WAL files using archive_command.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.83 15287

Allows connections and queries during recovery.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.84 15288

Allows feedback from a hot standby to the primary that will avoid query conflicts.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.85 15289

Allows modifications of the structure of system tables.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.86 15290

Disables reading from system indexes.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.87 15291

Enables backward compatibility mode for privilege checks on large objects.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.88 15292

When generating SQL fragments, quote all identifiers.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.89 15293

Forces a switch to the next WAL file if a new file has not been started within N seconds.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.49.90 15294

Waits N seconds on connection startup after authentication.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.91 15295

Sets the default statistics target.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.92 15296

Sets the FROM-list size beyond which subqueries are not collapsed.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.93 15297

Sets the FROM-list size beyond which JOIN constructs are not flattened.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.94 15298

Sets the threshold of FROM items beyond which GEQO is used.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.49.95 15299

GEQO: effort is used to set the default for other GEQO parameters.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50 Message Numbers Beginning with 15300

2.50.1 15300

GEQO: number of individuals in the population.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.2 15301

GEQO: number of iterations of the algorithm.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.3 15302

Sets the time to wait on a lock before checking for deadlock.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.4 15303

Sets the maximum delay before canceling queries when a hot standby server is processing archived WAL data.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.5 15304

Sets the maximum delay before canceling queries when a hot standby server is processing streamed WAL data.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.6 15305

Sets the maximum interval between WAL receiver status reports to the sending server

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.7 15306

Sets the maximum number of concurrent connections.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.8 15307

Sets the number of connection slots reserved for superusers.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.9 15308

Sets the number of shared memory buffers used by the server.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.10 15309

Sets the maximum number of temporary buffers used by each session.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.11 15310

Sets the TCP port the server listens on.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.12 15311

Sets the access permissions of the Unix-domain socket.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.13 15312

Sets the file permissions for log files.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.14 15313

Sets the maximum memory to be used for query workspaces.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.15 15314

Sets the maximum memory to be used for maintenance operations.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.16 15315

Sets the maximum stack depth, in kilobytes.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.17 15316

Limits the total size of all temporary files used by each process.

[Description]

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

2.50.18 15317

Vacuum cost for a page found in the buffer cache.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.19 15318

Vacuum cost for a page not found in the buffer cache.**[Description]**

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.20 15319

Vacuum cost for a page dirtied by vacuum.**[Description]**

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.21 15320

Vacuum cost amount available before napping.**[Description]**

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.22 15321

Vacuum cost delay in milliseconds.**[Description]**

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.23 15322

Vacuum cost delay in milliseconds, for autovacuum.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.24 15323

Vacuum cost amount available before napping, for autovacuum.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.25 15324

Sets the maximum number of simultaneously open files for each server process.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.26 15325

Sets the maximum number of simultaneously prepared transactions.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.27 15326

Sets the maximum allowed duration of any statement.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.28 15327

Minimum age at which VACUUM should freeze a table row.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.29 15328

Age at which VACUUM should scan whole table to freeze tuples.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.30 15329

Number of transactions by which VACUUM and HOT cleanup should be deferred, if any.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.31 15330

Sets the maximum number of locks per transaction.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.32 15331

Sets the maximum number of predicate locks per transaction.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.33 15332

Sets the maximum allowed time to complete client authentication.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.34 15333

Waits N seconds on connection startup before authentication.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.35 15334

Sets the number of WAL files held for standby servers.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.36 15336

Sets the maximum time between automatic WAL checkpoints.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.37 15337

Enables warnings if checkpoint segments are filled more frequently than this.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.38 15338

Sets the number of disk-page buffers in shared memory for WAL.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.39 15339

Time between WAL flushes performed in the WAL writer.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.40 15340

Sets the maximum number of simultaneously running WAL sender processes.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.41 15341

Sets the maximum time to wait for WAL replication.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.42 15342

Sets the delay in microseconds between transaction commit and flushing WAL to disk.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.43 15343

Sets the minimum concurrent open transactions before performing commit_delay.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.44 15344

Sets the number of digits displayed for floating-point values.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.45 15345

Sets the minimum execution time above which statements will be logged.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.46 15346

Sets the minimum execution time above which autovacuum actions will be logged.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.47 15347

Background writer sleep time between rounds.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.48 15348

Background writer maximum number of LRU pages to flush per round.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.49 15349

Number of simultaneous requests that can be handled efficiently by the disk subsystem.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.50 15350

Automatic log file rotation will occur after N minutes.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.51 15351

Automatic log file rotation will occur after N kilobytes.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.52 15352

Shows the maximum number of function arguments.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.53 15353

Shows the maximum number of index keys.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.54 15354

Shows the maximum identifier length.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.55 15355

Shows the size of a disk block.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.56 15356

Shows the number of pages per disk file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.57 15357

Shows the block size in the write ahead log.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.58 15358

Shows the number of pages per write ahead log segment.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.59 15359

Time to sleep between autovacuum runs.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.60 15360

Minimum number of tuple updates or deletes prior to vacuum.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.61 15361

Minimum number of tuple inserts, updates, or deletes prior to analyze.**[Description]**

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.62 15362

Age at which to autovacuum a table to prevent transaction ID wraparound.**[Description]**

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.63 15363

Sets the maximum number of simultaneously running autovacuum worker processes.**[Description]**

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.64 15364

Time between issuing TCP keepalives.**[Description]**

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.65 15365

Time between TCP keepalive retransmits.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.66 15366

SSL renegotiation is no longer supported; this can only be 0.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.67 15367

Maximum number of TCP keepalive retransmits.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.68 15368

Sets the maximum allowed result for exact search by GIN.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.69 15369

Sets the planner's assumption about the size of the disk cache.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.70 15370

Shows the server version as an integer.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.71 15371

Log the use of temporary files larger than this number of kilobytes.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.72 15372

Sets the size reserved for pg_stat_activity.query, in bytes.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.73 15373

Sets the planner's estimate of the cost of a sequentially fetched disk page.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.74 15374

Sets the planner's estimate of the cost of a nonsequentially fetched disk page.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.75 15375

Sets the planner's estimate of the cost of processing each tuple (row).

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.76 15376

Sets the planner's estimate of the cost of processing each index entry during an index scan.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.77 15377

Sets the planner's estimate of the cost of processing each operator or function call.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.78 15378

Sets the planner's estimate of the fraction of a cursor's rows that will be retrieved.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.79 15379

GEQO: selective pressure within the population.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.80 15380

GEQO: seed for random path selection.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.81 15381

Multiple of the average buffer usage to free per round.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.82 15382

Sets the seed for random-number generation.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.83 15383

Number of tuple updates or deletes prior to vacuum as a fraction of reltuples.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.84 15384

Number of tuple inserts, updates, or deletes prior to analyze as a fraction of reltuples.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.85 15385

Time spent flushing dirty buffers during checkpoint, as fraction of checkpoint interval.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.86 15386

Sets the shell command that will be called to archive a WAL file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.87 15387

Sets the client's character set encoding.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.88 15388

Controls information prefixed to each log line.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.89 15389

Sets the time zone to use in log messages.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.90 15390

Sets the display format for date and time values.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.91 15391

Sets the default tablespace to create tables and indexes in.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.92 15392

Sets the tablespace(s) to use for temporary tables and sort files.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.93 15393

Sets the path for dynamically loadable modules.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.94 15394

Sets the location of the Kerberos server key file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.95 15396

Sets the Bonjour service name.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.96 15397

Shows the collation order locale.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.97 15398

Shows the character classification and case conversion locale.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.50.98 15399

Sets the language in which messages are displayed.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51 Message Numbers Beginning with 15400

2.51.1 15400

Sets the locale for formatting monetary amounts.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.2 15401

Sets the locale for formatting numbers.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.3 15402

Sets the locale for formatting date and time values.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.4 15403

Lists shared libraries to preload into server.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.5 15404

Lists shared libraries to preload into each backend.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.6 15405

Sets the schema search order for names that are not schema-qualified.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.7 15406

Sets the server (database) character set encoding.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.8 15407

Shows the server version.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.9 15408

Sets the current role.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.10 15409

Sets the session user name.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.11 15410

Sets the destination for server log output.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.12 15411

Sets the destination directory for log files.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.13 15412

Sets the file name pattern for log files.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.14 15413

Sets the program name used to identify PostgreSQL messages in syslog.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.15 15414

Sets the application name used to identify PostgreSQL messages in the event log.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.16 15415

Sets the time zone for displaying and interpreting time stamps.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.17 15416

Selects a file of time zone abbreviations.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.18 15417

Sets the current transaction's isolation level.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.19 15418

Sets the owning group of the Unix-domain socket.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.20 15419

Sets the directories where Unix-domain sockets will be created.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.21 15420

Sets the host name or IP address(es) to listen to.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.22 15421

Sets the server's data directory.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.23 15422

Sets the server's backup directory.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.24 15423

Sets the directory where multiplexed transaction log files are stored.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.25 15424

Sets the directory where server's core files are dumped.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.26 15425

Sets the location where the keystore is stored

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.27 15426

Sets the server's main configuration file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.28 15427

Sets the server's "hba" configuration file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.29 15428

Sets the server's "ident" configuration file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.30 15429

Writes the postmaster PID to the specified file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.31 15430

Location of the SSL server certificate file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.32 15431

Location of the SSL server private key file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.33 15432

Location of the SSL certificate authority file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.34 15433

Location of the SSL certificate revocation list file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.35 15434

Writes temporary statistics files to the specified directory.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.36 15435

Number of synchronous standbys and list of names of potential synchronous ones.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.37 15436

Sets default text search configuration.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.38 15437

Sets the list of allowed SSL ciphers.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.39 15438

Sets the application name to be reported in statistics and logs.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.40 15439

Sets whether "\" is allowed in string literals.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.41 15440

Sets the output format for bytea.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.42 15441

Sets the message levels that are sent to the client.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.43 15442

Enables the planner to use constraints to optimize queries.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.44 15443

Sets the transaction isolation level of each new transaction.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.45 15444

Sets the display format for interval values.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.46 15445

Sets the verbosity of logged messages.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.47 15446

Sets the message levels that are logged.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.48 15447

Causes all statements generating error at or above this level to be logged.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.49 15448

Sets the type of statements logged.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.50 15449

Sets the syslog "facility" to be used when syslog enabled.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.51 15450

Sets the session's behavior for triggers and rewrite rules.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.52 15451

Sets the current transaction's synchronization level.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.53 15452

Enables logging of recovery-related debugging information.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.54 15453

Collects function-level statistics on database activity.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.55 15454

Set the level of information written to the WAL.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.56 15455

Selects the method used for forcing WAL updates to disk.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.57 15456

Sets how binary values are to be encoded in XML.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.58 15457

Sets whether XML data in implicit parsing and serialization operations is to be considered as documents or content fragments.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.59 15458

Sets what to dump in core files.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.60 15459

Selects the algorithm for encrypting tablespaces.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.51.61 15460

@1@: could not access the server configuration file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.62 15461

SET LOCAL TRANSACTION SNAPSHOT is not implemented

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.63 15464

Bonjour is not supported by this build

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.64 15465

SSL is not supported by this build

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.65 15466

internal error: unrecognized run-time parameter type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.66 15467

time zone abbreviation "@1@" is too long (maximum @2@ characters) in time zone file "@3@", line @4@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.67 15468

invalid number for time zone offset in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.68 15469

time zone offset @1@ is out of range in time zone file "@2@", line @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.69 15470

missing time zone abbreviation in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.70 15471

missing time zone offset in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.71 15473

invalid syntax in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.72 15474

time zone abbreviation "@1@" is multiply defined

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.73 15475

invalid time zone file name "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.74 15476

time zone file recursion limit exceeded in file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.75 15477

line is too long in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.76 15478

@INCLUDE without file name in time zone file "@1@", line @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.77 15479

cannot export a snapshot from a subtransaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.78 15480

invalid snapshot data in file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.79 15481

@1@ must be called before any query

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.80 15482

a snapshot-importing transaction must have isolation level SERIALIZABLE or REPEATABLE READ

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.81 15483

invalid snapshot identifier: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.82 15484

a serializable transaction cannot import a snapshot from a non-serializable transaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.83 15485

a non-read-only serializable transaction cannot import a snapshot from a read-only transaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.84 15486

cannot import a snapshot from a different database

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.85 15487

out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.51.86 15488

could not open file "@1@" for reading: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.87 15489

could not open file "@1@" for writing: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.88 15490

could not write file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.89 15491

could not execute command "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.90 15492

removing data directory "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.91 15493

failed to remove data directory

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.92 15494

removing contents of data directory "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.51.93 15495

failed to remove contents of data directory

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52 Message Numbers Beginning with 15500

2.52.1 15500

data directory "@1@" not removed at user's request

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.2 15503

user name lookup failure: error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.3 15504

"@1@" is not a valid server encoding name

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.4 15505

could not create directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.5 15506

file "@1@" does not exist

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.6 15507

could not access file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.7 15508

file "@1@" is not a regular file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.8 15509

Passwords didn't match.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.9 15510

could not read password from file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.10 15515

could not write to child process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.11 15516

ok

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.52.12 15517

failed to restore old locale "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.13 15518

invalid locale name "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.14 15519

encoding mismatch

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.15 15525

@1@ initializes a PostgreSQL database cluster.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.16 15527

invalid authentication method "@1@" for "@2@" connections

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.17 15528

must specify a password for the superuser to enable @1@ authentication

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.18 15529

too many command-line arguments (first is "@1@")

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.19 15530

password prompt and password file cannot be specified together

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.20 15533

The program "postgres" is needed by @1@ but was not found in the same directory as "@2@". Check your installation.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.21 15534

The program "postgres" was found by "@1@"but was not the same version as @2@.Check your installation.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.22 15535

input file location must be an absolute path

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.23 15536

could not find suitable encoding for locale "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.24 15537

locale "@1@" requires unsupported encoding "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.25 15538

could not find suitable text search configuration for locale "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.26 15539

suitable text search configuration for locale "@1@" is unknown

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.52.27 15540

specified text search configuration "@1@" might not match locale "@2@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.52.28 15541

The default text search configuration will be set to "@1@".

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.52.29 15542

directory "@1@" exists but is not empty

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.30 15543

could not access directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.31 15544

WAL directory location must be an absolute path

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.32 15545

could not create symbolic link "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.33 15546

symlinks are not supported on this platform

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.34 15547

could not read from ready pipe: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.35 15548

could not parse write-ahead log location "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.36 15549

could not create pipe for background process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.37 15550

could not create background process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.38 15551

could not create background thread: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.39 15552

could not create directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.40 15553

directory "@1@" exists but is not empty

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.41 15554

could not access directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.42 15555

@1@s/@2@ kB (100@3@), @4@/@5@ tablespace @6@s

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.52.43 15556

@1@s/@2@ kB (@3@@4@), @5@/@6@ tablespace (@7@%-*.*s)

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.52.44 15560

@1@s/@2@ kB (@3@@4@), @5@/@6@ tablespace

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.52.45 15561

could not set compression level @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.46 15562

could not create compressed file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.47 15563

could not create file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.48 15564

could not get COPY data stream: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.49 15565

could not write to compressed file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.50 15566

could not write to file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.51 15567

could not close compressed file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.52 15568

could not close file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.53 15569

could not read COPY data: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.54 15570

invalid tar block header size: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.55 15573

could not set permissions on directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.56 15574

could not create symbolic link from "@1@" to "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.57 15575

unrecognized link indicator "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.58 15576

could not set permissions on file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.59 15577

COPY stream ended before last file was finished

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.60 15578

could not send replication command "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.61 15579

could not identify system: got @1@ rows and @2@ fields, expected @3@ rows and @4@ or more fields

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.62 15580

could not initiate base backup: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.63 15581

no data returned from server

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.64 15582

could not get backup header: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.65 15584

can only write single tablespace to stdout, database has @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.66 15585

starting background WAL receiver

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.67 15586

could not get write-ahead log end position from server: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.68 15587

no write-ahead log end position returned from server

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.69 15588

final receive failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.70 15589

could not send command to background pipe: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.71 15590

could not wait for child process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.72 15591

child @1@ died, expected @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.73 15594

could not wait for child thread: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.74 15595

could not get child thread exit status: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.75 15596

child thread exited with error @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.76 15597

invalid output format "@1@", must be "plain" or "tar"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.52.77 15599

invalid compression level "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53 Message Numbers Beginning with 15600

2.53.1 15600

invalid checkpoint argument "@1@", must be "fast" or "spread"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.2 15601

invalid status interval "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.3 15602

too many command-line arguments (first is "@1@")

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.4 15603

no target directory specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.5 15604

only tar mode backups can be compressed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.6 15606

this build does not support compression

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.7 15607

finished segment at @1 @/@2@ (timeline @3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.8 15608

received interrupt signal, exiting

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.9 15609

could not open directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.10 15611

could not stat file "@1@": @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.11 15612

segment file "@1@" has incorrect size @2@, skipping**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.12 15613

starting log streaming at @1@/@2@ (timeline @3@)**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.13 15614

invalid port number "@1@"**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.14 15615

disconnected

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.15 15616

disconnected; waiting @1@ seconds to try again

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.16 15617

could not open existing write-ahead log file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.17 15619

write-ahead log file "@1@" has @2@ byte, should be 0 or @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.18 15622

could not determine seek position in file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.19 15623

could not fsync file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.20 15625

not renaming "@1@@2@", segment is not complete

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.21 15626

system identifier does not match between base backup and streaming connection

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.22 15628

could not send feedback packet: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.23 15629

select() failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.24 15630

could not receive data from WAL stream: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.25 15632

unrecognized streaming header: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.26 15633

streaming header too small: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.27 15634

received write-ahead log record for offset @1@ with no file open

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.28 15635

got WAL data offset @1@, expected @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.29 15636

could not write @1@ bytes to WAL file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.30 15637

unexpected termination of replication stream: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.31 15638

replication stream was terminated before stop point

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.32 15640

could not connect to server

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.33 15642

could not determine server setting for integer_datetimes

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.34 15643

integer_datetimes compile flag does not match server

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.35 15645

@1@: could not find own program executable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.36 15646

@1@: invalid argument: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

could not open file "@1@" for reading: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.39 15649

could not read file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.40 15652

child process exited with unrecognized status @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.41 15653

@1@: could not open PID file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.42 15654

@1@: invalid data in PID file "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.43 15658

@1@: cannot set core file size limit; disallowed by hard limit

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.44 15659

@1@: could not read file "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.45 15660

@1@: option file "@2@" must have exactly one line

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.46 15661

The program "@1@" is needed by @2@ but was not found in the same directory as "@3@". Check your installation.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.47 15662

The program "@1@" was found by "@2@" but was not the same version as @3@. Check your installation.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.48 15663

@1@: database system initialization failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.49 15664

@1@: another server might be running; trying to start server anyway

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.50 15666

@1@: could not start serverExamine the log output.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.51 15668

@1@: PID file "@2@" does not exist

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.52 15669

Is server running?

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.53 15670

@1@: cannot stop server; single-user server is running (PID: @2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.54 15671

@1@: could not send stop signal (PID: @2@): @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.55 15673

@1@: server does not shut down

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.56 15674

@1@: cannot restart server; single-user server is running (PID: @2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.57 15675

@1@: old server process (PID: @2@) seems to be gone

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.58 15676

@1@: cannot reload server; single-user server is running (PID: @2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.59 15677

@1@: could not send reload signal (PID: @2@): @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.60 15678

@1@: cannot promote server; single-user server is running (PID: @2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.61 15679

@1@: cannot promote server; server is not in standby mode

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.62 15680

@1@: could not create promote signal file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.63 15681

@1@: could not write promote signal file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.64 15682

@1@: could not send promote signal (PID: @2@): @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.65 15683

@1@: could not send signal @2@ (PID: @3@): @4@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.66 15684

@1@: could not find own program executable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.67 15685

@1@: could not find postgres program executable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.68 15686

@1@: could not open service manager

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.69 15687

@1@: service "@2@" already registered

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.70 15688

@1@: could not register service "@2@" : error code @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.71 15689

@1@: service "@2@" not registered

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.72 15690

@1@: could not open service "@2@" : error code @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.73 15691

@1@: could not unregister service "@2@": error code @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.74 15692

Timed out waiting for server startup

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.75 15693

@1@: could not start service "@2@": error code @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.76 15695

@1@: could not open process token: error code @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.77 15696

@1@: could not allocate SIDs: error code @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.78 15697

@1@: could not create restricted token: error code @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.53.79 15699

@1@: unrecognized shutdown mode "@2@"**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54 Message Numbers Beginning with 15700

2.54.1 15700

@1@: unrecognized signal name "@2@"**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.2 15701

@1@: unrecognized start type "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.3 15702

@1@: could not determine the data directory using command "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.4 15703

@1@: -S option not supported on this platform

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.5 15704

@1@: too many command-line arguments (first is "@2@")

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.6 15705

@1@: missing arguments for kill mode

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.7 15706

@1@: unrecognized operation mode "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.8 15707

@1@: no operation specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.9 15708

child process exited with unrecognized status @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.10 15709

failed sanity check, parent OID @1@ of table "@2@" (OID @3@) not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.11 15710

could not parse numeric array "@1@": too many numbers

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.12 15711

could not parse numeric array "@1@": invalid character in number

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.13 15712

invalid compression code: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.14 15713

not built with zlib support

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.15 15714

could not initialize compression library: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.16 15715

could not close compression stream: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.17 15716

could not compress data: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.18 15718

could not uncompress data: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.19 15719

could not close compression library: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.20 15720

cannot duplicate null pointer (internal error)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.21 15721

@1@: unrecognized section name: "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.22 15722

out of on_exit_nicely slots

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.23 15723

could not close output file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.24 15725

unexpected section code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.25 15726

parallel restore is not supported with this archive file format

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.26 15727

parallel restore is not supported with archives made by pre-8.0 pg_dump

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.27 15728

cannot restore from compressed archive (compression not supported in this installation)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.28 15729

connecting to database for restore

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.54.29 15730

direct database connections are not supported in pre-1.3 archives

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.30 15731

warning from original dump file: @1@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.54.31 15732

internal error -- WriteData cannot be called outside the context of a DataDumper routine

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.32 15733

large-object output not supported in chosen format

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.33 15734

restored @1@ large object

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.34 15736

could not create large object @1@: @2@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.54.35 15737

could not open large object @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.36 15738

could not open TOC file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.37 15740

could not find entry for ID @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.38 15741

could not close TOC file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.39 15742

could not open output file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.40 15743

could not open output file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.41 15744

wrote @1@ byte of large object data (result = @2@)

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.54.42 15746

could not write to large object (result: @1@, expected: @2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.43 15748

while INITIALIZING:

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.44 15749

while PROCESSING TOC:

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.45 15750

while FINALIZING:

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.46 15751

from TOC entry @1@; @2@ @3@ @4@ @5@ @6@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.47 15752

bad dumpld

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.48 15753

bad table dumpId for TABLE DATA item

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.49 15754

unexpected data offset flag @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.50 15755

file offset in dump file is too large

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.51 15757

directory name too long: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.52 15758

directory "@1@" does not appear to be a valid archive ("toc.dat" does not exist)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.53 15759

could not open input file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.54 15760

could not open input file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.55 15761

could not read input file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.56 15762

input file is too short (read @1@, expected 5)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.57 15763

input file appears to be a text format dump. Please use psql.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.58 15764

input file does not appear to be a valid archive (too short?)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.59 15765

input file does not appear to be a valid archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.60 15766

could not close input file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.61 15767

unrecognized file format "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.62 15768

entry ID @1@ out of range -- perhaps a corrupt TOC

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.63 15770

unrecognized encoding "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.64 15771

invalid ENCODING item: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.65 15772

invalid STDSTRINGS item: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.66 15773

could not set session user to "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.67 15775

could not set search_path to "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.68 15776

could not set default_tablespace to @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.69 15779

did not find magic string in file header

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.70 15780

unsupported version (@1@.@2@) in file header

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.71 15781

sanity check on integer size (@1@) failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.72 15783

expected format (@1@) differs from format found in file (@2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.73 15786

a worker process died unexpectedly

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.74 15787

processing missed item @1@ @2@ @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.75 15789

could not create worker process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.76 15793

worker process failed: exit code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.77 15795

table "@1@" could not be created, will not restore its data

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.78 15796

invalid OID for large object

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.79 15797

unrecognized data block type (@1@) while searching archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.80 15798

error during file seek: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.54.81 15799

could not find block ID @1@ in archive -- possibly due to out-of-order restore request, which cannot be handled due to lack of data offsets in archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55 Message Numbers Beginning with 15800

2.55.1 15800

could not find block ID @1@ in archive -- possibly due to out-of-order restore request, which cannot be handled due to non-seekable input file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.2 15801

could not find block ID @1@ in archive -- possibly corrupt archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.3 15802

found unexpected block ID (@1@) when reading data -- expected @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.4 15803

unrecognized data block type @1@ while restoring archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.5 15804

could not read from input file: end of file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.6 15805

could not read from input file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.7 15807

could not close archive file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.8 15808

can only reopen input archives

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.9 15809

parallel restore from standard input is not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.10 15810

parallel restore from non-seekable file is not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.11 15811

could not determine seek position in archive file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.12 15812

could not set seek position in archive file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.13 15814

@1@: could not parse server version "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.14 15815

could not get server_version from libpq

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.15 15816

aborting because of server version mismatch

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.16 15817

could not reconnect to database

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.17 15818

could not reconnect to database: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.18 15819

connection needs password

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.19 15820

already connected to a database

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.20 15821

could not connect to database

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.21 15822

connection to database "@1@" failed: @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.22 15823

query failed: @1@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.23 15824

query was: @1@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.24 15825

@1@: @2@ Command was: @3@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.25 15826

could not execute query

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.26 15827

error returned by PQputCopyData: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.27 15828

error returned by PQputCopyEnd: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.28 15829

COPY failed for table "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.29 15830

could not start database transaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.30 15831

could not commit database transaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.31 15832

no output directory specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.32 15833

could not create directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.33 15834

could not close data file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.34 15835

could not open large object TOC file "@1@" for input: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.35 15836

invalid line in large object TOC file "@1@": "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.36 15837

error reading large object TOC file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.37 15838

could not close large object TOC file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.38 15840

could not write to blobs TOC file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.39 15841

file name too long: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.40 15842

this format cannot be read

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.41 15843

could not open TOC file "@1@" for output: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.42 15844

could not open TOC file for output: @1@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.43 15845

compression is not supported by tar archive format**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.44 15846

could not open TOC file "@1@" for input: @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.45 15847

could not open TOC file for input: @1@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.46 15848

could not find file "@1@" in archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.47 15849

could not generate temporary file name: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.48 15850

could not open temporary file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.49 15851

could not close tar member

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.50 15852

internal error -- neither th nor fh specified in tarReadRaw()

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.51 15856

invalid OID for large object (@1@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.52 15858

could not close temporary file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.53 15859

actual file length (@1@) does not match expected (@2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.54 15861

could not find header for file "@1@" in tar archive

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.55 15863

restoring data out of order is not supported in this archive format: "@1@" is required, but comes before "@2@" in the archive file.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.56 15864

incomplete tar header found (@1@ byte)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.57 15867

corrupt tar header found in @1@ (expected @2@, computed @3@) file position @4@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.58 15868

@1@: too many command-line arguments (first is "@2@")

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.59 15870

no matching schemas were found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.60 15871

no matching tables were found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.61 15872

invalid client encoding "@1@" specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.62 15873

invalid output format "@1@" specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.63 15875

dumping contents of table "@1@.@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.64 15876

Dumping the contents of table "@1@" failed: PQgetCopyData() failed.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.65 15877

Dumping the contents of table "@1@" failed: PQgetResult() failed.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.66 15878

error reading large object @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.67 15879

could not find parent extension for @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.68 15881

schema with OID @1@ does not exist

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.69 15889

failed sanity check, parent table with OID @1@ of sequence with OID @2@ not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.70 15890

query produced null referenced table name for foreign key trigger "@1@" on table "@2@" (OID of table: @3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.71 15891

invalid column numbering in table "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.72 15892

invalid adnum value @1@ for table "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.73 15893

expected @1@ check constraint on table "@2@" but found @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.55.74 15895

(The system catalogs might be corrupted.)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56 Message Numbers Beginning with 15900

2.56.1 15902

unrecognized provolatile value for function "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.2 15907

could not parse default ACL list (@1 @)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.3 15908

could not parse GRANT ACL list (@1 @) or REVOKE ACL list (@2 @) for object "@3@" (@4 @)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.4 15909

query to obtain definition of view "@1@" returned no data

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.5 15910

query to obtain definition of view "@1@" returned more than one definition

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.6 15911

definition of view "@1@" appears to be empty (length zero)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.7 15912

invalid column number @1@ for table "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.8 15913

missing index for constraint "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.9 15914

unrecognized constraint type: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.10 15915

query to get data of sequence "@1@" returned @2@ row (expected 1)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.11 15918

unexpected tgtype value: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.12 15919

invalid argument string (@1@) for trigger "@2@" on table "@3@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.13 15920

query to get rule "@1@" for table "@2@" failed: wrong number of rows returned

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.14 15921

query returned @1@ row instead of one: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.15 15923

invalid dumpId @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.16 15924

invalid dependency @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.17 15925

could not identify dependency loop

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.18 15927

The program "pg_dump" is needed by @1@ but was not found in the same directory as "@2@". Check your installation.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.19 15928

The program "pg_dump" was found by "@1@" but was not the same version as "@2@". Check your installation.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.20 15929

@1@: could not connect to database "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.21 15930

@1@: could not connect to databases "postgres" or "template1" Please specify an alternative database.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.22 15931

@1@: could not open the output file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.23 15932

@1@: could not parse ACL list (@2@) for tablespace "@3@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.24 15933

@1@: could not parse ACL list (@2@) for database "@3@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.25 15934

@1@: pg_dump failed on database "@2@", exiting

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.26 15935

@1@: could not re-open the output file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.27 15936

@1@: running "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.28 15937

@1@: could not connect to database "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.29 15938

could not get server version

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.30 15941

executing @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.31 15942

query failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.32 15943

query was: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.33 15944

unrecognized archive format "@1@"; please specify "c", "d", or "t"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.34 15946

@1@: invalid argument for option @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.35 15947

@1@: transaction ID epoch (-e) must not be -1

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.36 15949

@1@: transaction ID (-x) must not be 0

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.37 15951

@1@: OID (-o) must not be 0

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.38 15953

@1@: multitransaction ID (-m) must not be 0

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.39 15955

@1@: multitransaction offset (-O) must not be -1

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.40 15957

@1@: no data directory specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.41 15958

@1@: cannot be executed by "root"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.42 15959

@1@: could not change directory to "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.43 15960

@1@: could not open file "@2@" for reading: @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.44 15961

If these values seem acceptable, use -f to force reset.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.45 15962

Transaction log reset

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.46 15963

@1@: could not read file "@2@" : @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.47 15964

@1@: pg_control exists but has invalid CRC; proceed with caution

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.48 15965

@1@: pg_control exists but is broken or unknown version; ignoring it

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.49 15966

@1@: internal error -- sizeof(ControlFileData) is too large ... fix PG_CONTROL_SIZE

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.50 15967

@1@: could not create pg_control file: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.51 15968

@1@: could not write pg_control file: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.52 15969

@1@: fsync error: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.53 15970

@1@: could not open directory "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.54 15971

@1@: could not read directory "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.55 15972

@1@: could not delete file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.56 15973

@1@: could not open file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.57 15974

@1@: could not write file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.58 15975

could not create directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.59 15976

could not open directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.60 15977

could not stat file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.61 15978

could not read symbolic link "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.62 15979

could not create symbolic link "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.63 15981

could not open file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.64 15982

could not create file "@1@": @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.65 15983

could not read file "@1@": @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.66 15984

could not write to file "@1@": @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.67 15985

could not fsync file "@1@": @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.68 15986

could not close file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.69 15987

could not find own program executable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.70 15988

invalid checkpoint argument "@1@", must be "fast" or "spread"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.71 15989

invalid argument @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.72 15990

option @1@ conflicts with option @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.73 15991

the configured database storage directory differs from the data_directory parameter

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.74 15992

an invalid value was specified for the option -@1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.75 15993

backup data "@1@" is lost

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.76 15994

cannot be run as root

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.77 15995

invalid option --@1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.78 15996

invalid option -@1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.79 15997

backup of the database has not yet been performed, or an incorrect backup storage directory was specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.80 15998

the database storage directory and the \$PGDATA environment variable have not been specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.56.81 15999

option @1@ is necessary for option @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57 Message Numbers Beginning with 16000

2.57.1 16000

the requested recovery point is earlier than the date and time that the backup finished

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.2 16001

the specified backup does not exist

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.3 16002

the directory "@1@" for the tablespace with OID "@2@" does not exist

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.4 16003

the specified backup storage directory "@1@" is not correct

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.5 16004

the specified database storage directory is not correct

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.6 16005

the token in the file "pg_hba.conf" is too long and will be skipped: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.7 16006

the directory "@1@" for storing WAL does not exist

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.8 16007

"@1@" is being executed by another user

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.9 16008

the "@1@" parameter was not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.10 16009

could not find the configuration file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.11 16010

could not open the configuration file "@1@" : maximum nesting depth exceeded

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.12 16011

the PID file "@1@" does not exist

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.13 16012

the server is running

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.14 16013

the server is not running

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.15 16014

caught signal @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.16 16015

failed to build the absolute path "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.17 16016

failed to check the completion of archiving WAL files

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.18 16017

failed to connect to the database

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.19 16018

failed to get the database OID : @1@ (@2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.20 16019

failed to remove old backup data

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.21 16020

failed to restore the database storage directory "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.22 16021

failed to restore the tablespace directory "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.23 16022

retried backup @1@ times, but failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.24 16023

SQL command failed (@1@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.25 16024

the database with OID @1@ was created during backup

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.26 16025

backup control function "@1@" failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.27 16026

command failed: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.28 16027

could not close the file "@1@": @2@ (errno=@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.29 16028

could not close the PID file "@1@": @2@ (errno=@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.30 16029

could not create the directory "@1@": @2@ (errno=@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.31 16030

could not create the file "@1@": @2@ (errno=@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.32 16031

could not create the PID file "@1@": @2@ (errno=@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.33 16032

could not create the symbolic link "@1@": @2@ (errno=@3@)**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.34 16033

could not identify the current directory: @1@ (errno=@2@)**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.35 16034

could not open the directory "@1@": @2@ (errno=@3@)**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.36 16035

could not open the file "@1@": @2@ (errno=@3@)**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.58 16058

target "@1@" mismatch (internal error)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.59 16059

the program "@1@" is needed by @2@ but was not found in the same directory as "@3@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.60 16060

the program "@1@" was found in "@2@" but was not the same version as @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.61 16061

failed to get port number (internal error)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.62 16062

backup of configuration files completed successfully

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.57.63 16063

backup of database and configuration files completed successfully

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.57.64 16064

Confirm that the specified directory is correct. If it is correct, the backup data may be corrupted. Copy the backup data to the backup storage directory from backup media.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.65 16065

Check the installation.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.66 16066

Continue the backup.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.57.67 16067

Create an empty directory "@1@" on which the database administrator has full permissions, and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.68 16068

Create an empty directory "@1@" on which the database administrator has full permissions.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.69 16069

Recover the corrupt resource.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.70 16070

Is the server running?

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.71 16071

Please check whether the backup data exists or is not in the backup storage directory.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.72 16072

Please decrease the length of the path and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.73 16073

Please decrease the number of digits and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.74 16074

Please log in as the user that owns the server process.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.75 16075

Please remove the cause of the error, and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.76 16076

Please set the database storage directory "@1@" to -D option, and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.77 16077

Please set the recovery point to be after the date and time that the backup finished, and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.78 16078

Please set the backup storage directory to the 'backup_destination' parameter and restart the server.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.79 16079

Please specify the database storage directory as "@1@" and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.80 16080

Please specify the database storage directory correctly and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.81 16081

Please specify the port number correctly and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.82 16082

Please specify an integer greater than 0, and try again.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.83 16083

Please specify an integer greater than 0, or the 'all' keyword, and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.84 16084

Please specify an integer greater than or equal to 0, and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.85 16085

Please specify the backup storage directory correctly and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.86 16086

Please specify the time stamp using the correct length and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.87 16087

Please start the server and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.88 16088

Please stop the server and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.89 16089

Please wait for a short period and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.90 16090

Recovery of database completed successfully.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.91 16091

Retrying backup. (@1@ times).

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.92 16092

Specify the backup storage directory with the -B option, and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.93 16093

Refer to "@1@ --help" for more information.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.94 16094

Retry after the other process terminates.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.95 16095

Failed to identify backup data.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.96 16096

restore point name is too long (maximum @1@ bytes)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.97 16097

Try "@1@ --help" for more information.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.98 16098

keystore location is not specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.57.99 16099

too many command-line arguments (first is "@1@")

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58 Message Numbers Beginning with 16100

2.58.1 16100

no operation is specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.2 16101

could not open file "@1@": @2@ (errno=@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.3 16102

could not read file "@1@": @2@ (errno=@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.4 16103

keystore "@1@" is corrupted: size = @2@ bytes, expected size = @3@ bytes

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.5 16104

file "@1@" is not a keystore

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.6 16105

key is too long

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.7 16106

key is wrong

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.8 16107

passphrase-based key derivation failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.9 16108

decryption of the keystore failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.10 16109

decryption of the keystore failed: passphrase is wrong

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.11 16110

keystore "@1@" is corrupted: invalid CRC

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.12 16111

encryption of the keystore failed: error code = @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.13 16112

encryption of the keystore failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.14 16113

could not create file "@1@": @2@ (errno=@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.15 16114

could not write file "@1@": @2@ (errno=@3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.16 16115

child process exited with unrecognized status @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.17 16117

invalid command \@1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.18 16118

\\@1@: extra argument "@2@" ignored

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.19 16119

could not get home directory for user ID @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.20 16120

\\@1@: could not change directory to "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.21 16121

You are currently not connected to a database.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.22 16122

no query buffer

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.23 16123

@1@: invalid encoding name or conversion procedure not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.24 16124

\@1@: missing required argument

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.25 16125

Passwords didn't match.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.26 16128

out of memory

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.27 16129

\\@1@: environment variable name must not contain "="

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.28 16130

The server (version @1@) does not support showing function source.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.29 16131

function name is required

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.30 16132

@1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.31 16137

environment variable PSQL_EDITOR_LINENUMBER_ARG must be set to specify a line number

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.32 16138

could not start editor "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.33 16139

could not start /bin/sh

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.34 16140

could not locate temporary directory: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.35 16141

could not open temporary file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.36 16142

\pset: allowed formats are aligned, asciidoc, csv, html, latex, latex-longtable, troff-ms, unaligned, wrapped

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.37 16143

\pset: allowed line styles are ascii, old-ascii, unicode

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.38 16144

\pset: unknown option: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.39 16145

\\: failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.40 16146

cannot duplicate null pointer (internal error)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.41 16147

connection to server was lost

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.42 16148

Failed.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.58.43 16149

unexpected PQresultStatus: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.44 16150

The server (version @1@) does not support savepoints for ON_ERROR_ROLLBACK.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.45 16151

unexpected transaction status (@1@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.46 16152

\\copy: arguments required

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.47 16153

\\copy: parse error at "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.48 16154

\\copy: parse error at end of line

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.49 16155

@1@: cannot copy from/to a directory

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.50 16156

could not write COPY data: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.51 16158

Enter data to be copied followed by a newline.End with a backslash and a period on a line by itself, or an EOF signal.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.52 16159

aborted because of read failure

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.53 16160

The server (version @1 @) does not support tablespaces.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.54 16161

\ddf only takes [antwS+] as options

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.55 16162

\ldf does not take a "w" option with server version @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.56 16163

The server (version @1@) does not support altering default privileges.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.57 16164

Did not find any relation named "@1@".

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.58 16165

Did not find any relation with OID @1@.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.59 16166

The server (version @1@) does not support per-database role settings.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.60 16167

Did not find any settings for role "@1@".

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.61 16168

Did not find any settings.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.62 16169

Did not find any relation named "@1@".

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.63 16170

Did not find any relations.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.64 16171

The server (version @1@) does not support collations.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.65 16172

The server (version @1@) does not support full text search.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.66 16173

Did not find any text search configuration named "@1@".

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.67 16174

The server (version @1@) does not support foreign-data wrappers.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.68 16175

The server (version @1 @) does not support foreign servers.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.69 16176

The server (version @1 @) does not support user mappings.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.70 16177

The server (version @1 @) does not support foreign tables.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.71 16178

The server (version @1 @) does not support extensions.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.72 16179

Did not find any extension named "@1@".

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.73 16180

Did not find any extensions.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.74 16181

user name lookup failure: error code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.75 16182

could not read from input file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.76 16183

could not save history to file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.77 16184

history is not supported by this installation

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.78 16185

@1@: not connected to a database

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.79 16186

@1@: current transaction is aborted

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.80 16187

@1@: unknown transaction status**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.81 16188

Cannot add header to table content: column count of @1@ exceeded.**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.82 16189

Cannot add cell to table content: total cell count of @1@ exceeded.**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.83 16190

invalid output format (internal error): @1@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.84 16191

skipping recursive expansion of variable "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.85 16192

unterminated quoted string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.86 16193

@1@: out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.58.87 16194

cannot escape without active connection

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.88 16195

could not open log file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.89 16196

could not set printing parameter "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.90 16197

\\@1@: could not read value for variable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.58.91 16199

extra command-line argument "@1@" ignored

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59 Message Numbers Beginning with 16200

2.59.1 16200

tab completion query failed: @1@Query was:@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.2 16201

unrecognized value "@1@" for "@2@" Available values are: @3@.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.3 16202

Try "@1@ --help" for more information.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.4 16203

too many command-line arguments (first is "@1@")

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.5 16204

cannot cluster all databases and a specific one at the same time

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.6 16205

cannot cluster specific table(s) in all databases

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.7 16206

clustering of table "@1@" in database "@2@" failed: @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.8 16207

clustering of database "@1@" failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.9 16208

@1@: clustering database "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.10 16213

could not connect to database @1@: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.11 16214

query failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.12 16215

cannot duplicate null pointer (internal error)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.13 16216

out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.59.14 16217

Cancel request sent

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.15 16218

Could not send cancel request: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.16 16219

only one of --locale and --lc-ctype can be specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.17 16220

only one of --locale and --lc-collate can be specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.18 16221

"@1@" is not a valid encoding name

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.19 16222

database creation failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.20 16223

comment creation failed (database was created): @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.21 16228

Passwords didn't match.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.22 16229

password encryption failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.23 16230

creation of new role failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.24 16231

missing required argument database name

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.25 16232

Database "@1@" will be permanently removed.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.26 16233

database removal failed: @1@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.27 16236

missing required argument role name**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.28 16237

Role "@1@" will be permanently removed.**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.29 16238

removal of role "@1@" failed: @2@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.30 16239

cannot reindex all databases and a specific one at the same time

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.31 16240

cannot reindex all databases and system catalogs at the same time

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.32 16241

cannot reindex specific table(s) in all databases

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.33 16242

cannot reindex specific index(es) in all databases

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.34 16243

cannot reindex specific table(s) and system catalogs at the same time

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.35 16244

cannot reindex specific index(es) and system catalogs at the same time

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.36 16245

reindexing of table "@1@" in database "@2@" failed: @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.37 16246

reindexing of index "@1@" in database "@2@" failed: @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.62 16274

unterminated hexadecimal string literal

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.63 16275

unterminated quoted string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.64 16276

zero-length delimited identifier

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.65 16277

unterminated quoted identifier

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.66 16278

missing identifier in EXEC SQL UNDEF command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.67 16279

missing matching "EXEC SQL IFDEF" / "EXEC SQL IFNDEF"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.68 16280

missing "EXEC SQL ENDIF;"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.69 16281

more than one EXEC SQL ELSE

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.70 16282

unmatched EXEC SQL ENDIF

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.71 16283

too many nested EXEC SQL IFDEF conditions

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.72 16284

missing identifier in EXEC SQL IFDEF command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.73 16285

missing identifier in EXEC SQL DEFINE command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.74 16286

syntax error in EXEC SQL INCLUDE command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.75 16287

internal error: unreachable state; If the cause of errors cannot be found, contact the Fujitsu Systems Engineer (SE).

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.59.84 16296

AT option not allowed in CONNECT statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.85 16297

AT option not allowed in DISCONNECT statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.86 16298

AT option not allowed in SET CONNECTION statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.59.87 16299

AT option not allowed in TYPE statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60 Message Numbers Beginning with 16300

2.60.1 16300

AT option not allowed in VAR statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.2 16301

AT option not allowed in WHENEVER statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.3 16302

unsupported feature will be passed to server

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.4 16303

SHOW ALL is not implemented

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.5 16304

COPY FROM STDIN is not implemented

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.6 16308

using variable "@1@" in different declare statements is not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.7 16309

cursor "@1@" is already defined

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.8 16310

no longer supported LIMIT #,# syntax passed to server

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.9 16311

subquery in FROM must have an alias

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.10 16312

CREATE TABLE AS cannot specify INTO

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.11 16313

expected "@", found "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.12 16314

only protocols "tcp" and "unix" and database type "postgresql" are supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.13 16315

expected "://", found "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.14 16316

Unix-domain sockets only work on "localhost" but not on "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.15 16317

expected "postgresql", found "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.16 16318

invalid connection type: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.17 16319

expected "@" or "://", found "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.18 16320

invalid data type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.19 16321

incomplete statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.20 16322

unrecognized token "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.21 16323

only data types numeric and decimal have precision/scale argument

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.22 16324

interval specification not allowed here

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.23 16325

too many levels in nested structure/union definition

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.24 16326

pointers to varchar are not implemented

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.25 16327

using unsupported DESCRIBE statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.26 16328

initializer not allowed in EXEC SQL VAR command

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.27 16329

arrays of indicators are not allowed on input

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.28 16330

@1@ at or near "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.29 16331

out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.60.30 16332

unrecognized variable type code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.31 16333

variable "@1@" is hidden by a local variable of a different type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.32 16334

variable "@1@" is hidden by a local variable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.33 16335

indicator variable "@1@" is hidden by a local variable of a different type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.34 16336

indicator variable "@1@" is hidden by a local variable

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.35 16337

indicator for array/pointer has to be array/pointer

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.36 16338

nested arrays are not supported (except strings)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.37 16339

indicator for struct has to be a struct

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.38 16340

indicator for simple data type has to be simple

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.39 16341

unrecognized descriptor item code @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.40 16342

incorrectly formed variable "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.41 16343

variable "@1@" is not a pointer

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.42 16344

variable "@1@" is not a pointer to a structure or a union

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.43 16345

variable "@1@" is neither a structure nor a union

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.44 16346

variable "@1@" is not an array

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.45 16347

variable "@1@" is not declared

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.46 16348

indicator variable must have an integer type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.47 16349

unrecognized data type name "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.48 16350

multidimensional arrays are not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.49 16351

multilevel pointers (more than 2 levels) are not supported; found @1@ level

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.50 16353

pointer to pointer is not supported for this data type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.51 16354

multidimensional arrays for structures are not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.52 16355

invalid URI propagated to internal parser routine: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.53 16356

end of string reached when looking for matching "]" in IPv6 host address in URI: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.54 16357

IPv6 host address may not be empty in URI: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.55 16358

unexpected character "@1@" at position @2@ in URI (expected ":" or "/"): "@3@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.56 16359

extra key/value separator "=" in URI query parameter: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.57 16360

missing key/value separator "=" in URI query parameter: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.58 16361

invalid URI query parameter: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.59 16362

invalid percent-encoded token: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.60 16363

forbidden value @1@00 in percent-encoded value: "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.61 16364

insufficient data in "T" message

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.62 16365

extraneous data in "T" message

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.63 16366

insufficient data in "D" message

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.64 16367

extraneous data in "D" message

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.65 16368

at character @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.66 16369

unrecognized socket error: 0x@1@/@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.67 16370

If true, trusted and untrusted Perl code will be compiled in strict mode.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.68 16371

Perl initialization code to execute when a Perl interpreter is initialized.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.69 16372

Perl initialization code to execute once when plperl is first used.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.70 16373

Perl initialization code to execute once when plperl is first used.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.71 16374

duplicate declaration

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.72 16375

diagnostics item @1@ is not allowed in GET STACKED DIAGNOSTICS

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.73 16376

diagnostics item @1@ is not allowed in GET CURRENT DIAGNOSTICS

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.74 16377

unrecognized GET DIAGNOSTICS item

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.75 16378

unexpected end of function definition

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.76 16379

syntax error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.77 16380

invalid SQLSTATE code

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.78 16381

syntax error, expected "FOR"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.79 16382

mismatched parentheses

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.80 16383

missing expression

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.81 16384

missing SQL statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.82 16385

incomplete data type declaration

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.83 16386

missing data type declaration

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.84 16387

INTO specified more than once

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.85 16388

expected FROM or IN

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.86 16389

cursor "@1@" has no argument named "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.87 16390

value for parameter "@1@" of cursor "@2@" specified more than once

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.88 16391

unrecognized RAISE statement option

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.89 16392

syntax error, expected "="

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.90 16393

during initialization of execution state

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.91 16394

while storing call arguments into local variables

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.92 16395

during function entry

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.93 16396

while casting return value to function's return type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.94 16397

returned record type does not match expected record type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.95 16398

during function exit

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.60.96 16399

returned row structure does not match the structure of the triggering table

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61 Message Numbers Beginning with 16400

2.61.1 16400

during statement block local variable initialization

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.2 16401

during statement block entry

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.3 16402

during statement block exit

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.4 16403

during exception cleanup

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.5 16404

structure of query does not match function result type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.6 16405

**query "@1@" returned @2@ column
query "@3@" returned @4@ columns**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.7 16406

Sets handling of conflicts between PL/pgSQL variable names and table column names.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.8 16407

plpy.cursor expected a query or a plan

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.9 16408

plpy.cursor takes a sequence as its second argument

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.10 16409

could not execute plan

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.11 16410

Expected sequence of @1@ argument, got @2@: @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.12 16412

iterating a closed cursor

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.13 16413

iterating a cursor in an aborted subtransaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.14 16414

fetch from a closed cursor

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.15 16415

closing a cursor in an aborted subtransaction

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.16 16416

error fetching next item from iterator

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.17 16417

PyList_SetItem() failed, while setting up arguments

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.18 16418

PyDict_SetItemString() failed, while setting up arguments

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.19 16419

could not create new dictionary while building trigger arguments

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.20 16420

untrapped error in initialization

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.21 16421

could not import "__main__" module

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.22 16422

could not create globals

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.23 16424

could not import "plpy" module

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.24 16425

could not add the spiexceptions module

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.25 16427

could not generate SPI exceptions

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.26 16428

could not unpack arguments in plpy.elog

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.27 16429

could not parse error message in plpy.elog

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.28 16430

could not compile PL/Python function "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.29 16431

could not compile anonymous PL/Python code block

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.30 16432

command did not produce a result set

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.31 16433

second argument of plpy.prepare must be a sequence

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.32 16434

plpy.execute expected a query or a plan

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.33 16435

plpy.execute takes a sequence as its second argument

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.34 16437

this subtransaction has already been entered

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.35 16438

this subtransaction has already been exited

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.36 16439

this subtransaction has not been entered

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.37 16440

there is no subtransaction to exit from

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.38 16441

could not create new dictionary

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.39 16443

could not create bytes representation of Python object

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.40 16444

could not create string representation of Python object

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.41 16445

return value of function with array return type is not a Python sequence

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.42 16446

could not extract bytes from encoded string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.43 16447

The name: @1@ is invalid.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.44 16448

";" is not permitted in COBOL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.45 16449

"END-EXEC" is not permitted in C

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.46 16450

missing "EXEC SQL ENDIF END-EXEC."

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.47 16451

debug line with EXEC SQL is not permitted

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.48 16452

SQL string literal cannot continue multiline by COBOL syntax

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.49 16453

COBOL string literal cannot continue multiline by SQL syntax

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.50 16454

syntax error at or near "END-EXEC" in declare section

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.51 16455

syntax error in include file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.52 16456

internal error: unreachable state;

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.53 16457

could not open temporary file "@1@" for continue line

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.54 16458

FILLER or implicit FILLER is not available in EXEC SQL TYPE statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.55 16459

VALUE clause is not available in EXEC SQL TYPE statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.56 16460

REDEFINES clause is not available in EXEC SQL TYPE statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.57 16461

FILLER or implicit FILLER is not available in EXEC SQL VAR statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.58 16462

VALUE clause is not available in EXEC SQL VAR statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.59 16463

syntax error in WHENEVER statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.60 16464

FILLER or implicit FILLER is not available in TYPEDEF statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.61 16465

VALUE clause is not available in TYPEDEF statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.62 16466

REDEFINES clause is not available in TYPEDEF statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.63 16467

FILLER or implicit FILLER can use only for elementary item in group item

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.64 16468

USAGE clause is not available for group item name

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.65 16469

SIGN clause is not available for group item name

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.66 16470

VALUE clause is not available for group item name

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.67 16471

more than one USAGE clause

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.68 16472

more than one OCCURS clause

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.69 16473

more than one VALUE clause

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.70 16474

more than one SIGN clause

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.71 16475

more than one REDEFINES clause

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.72 16476

syntax error at or near "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.73 16477

length of varchar type is not assigned

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.74 16478

invalid NULL is set

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.61.75 16479

you can not be set to more than 1024 bytes of the string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.61.76 16480

group item is too deep

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.77 16481

multidimensional array is not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.78 16482

syntax is not available

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.79 16483

there is a character code that can not be determined

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.80 16484

the number of variables reached the max number 1000000

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.81 16485

host array variable is needed when using FOR ARRAY_SIZE

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.82 16486

unsupported datatype found at FOR statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.83 16487

FOR value should be positive integer

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.84 16488

SELECT..INTO returns too many rows on line @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.85 16491

@1@ failed

[Description]

Aborted the processing of this operation because an error occurred.

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the messages shown before this message, and then work around if necessary.

2.61.86 16492

CREATE TRIGGER will create implicit function "@1@."@2@()" for TRIGGER "@3@" on TABLE "@4@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.61.87 16493

The cursor is invalid on line @1@

[Description]

An error occurred during execution of the command.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.88 16494

Constraint trigger "@1@" for relation "@2@" cannot be replaced with non-constraint trigger

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.61.89 16495

Trigger "@1@" for relation "@2@" cannot be replaced with constraint trigger

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.61.90 16497

unterminated /*+ comment for hint of pg_hint_plan

[Description]

An unterminated /*+ comment for hint of pg_hint_plan is detected.

[System Processing]

Processing will be aborted.

[Action]

Terminate /*+ comment for hint of pg_hint_plan.

2.61.91 16498

trigger created with EXECUTE PROCEDURE cannot be replaced by DO block

[Description]

Trigger created with EXECUTE PROCEDURE cannot be replaced by DO block.

[System Processing]

Processing is aborted.

[Action]

Please redefine it after deleting the trigger.

2.61.92 16499

trigger created with DO block cannot be replaced by EXECUTE PROCEDURE

[Description]

Trigger created with DO block cannot be replaced by EXECUTE PROCEDURE.

[System Processing]

Processing is aborted.

[Action]

Please redefine it after deleting the trigger.

2.62 Message Numbers Beginning with 16500

2.62.1 16500

the connection is not the same as the connection in DECLARE STATEMENT, on line @1@

[Description]

The connection is not the same as the connection in DECLARE STATEMENT, on line @1@

[System Processing]

Processing is aborted.

[Action]

Please do not specify the connection when you use SQL statement identifier declared with DECLARE STATEMENT.

2.62.2 16501

cannot copy window "@1@" because it has a frame clause

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.62.3 16502

could not find any WAL files

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.62.4 16503

exceeded maxAllocatedDescs (@1@) while trying to open file "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.62.5 16504

exceeded maxAllocatedDescs (@1@) while trying to open directory "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.62.6 16505

tsquery is too large

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.62.7 16506

bit string length exceeds the maximum allowed (@1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.62.8 16507

error occurred at @1@: @2@ before error message processing is available

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.62.9 16508

language validation function @1@ called for language @2@ instead of @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.62.10 16510

The sslservercertcn "@1@" could not be verified

[Description]

value of sslservercertcn is different from common name in the server certificate.

[System Processing]

Processing is aborted.

[Action]

Set SSL certificate's common name to sslservercertcn.

2.62.11 16511

@1@: must be superuser to run this command

[Description]

Must be superuser to run this command.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command by the superuser.

2.62.12 16512

@1@: must be database super user to run this command

[Description]

Must be database super user to run this command.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command by the database super user.

2.62.13 16513

@1@: no subcommand specified

[Description]

No subcommand specified.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct options or operands.

2.62.14 16514

@1@: unrecognized subcommand "@2@"

[Description]

Unknown subcommand is specified.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct subcommand.

2.62.15 16515

@1@: too many command-line arguments (first is "@2@")

[Description]

Too many command-line arguments.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct options or operands.

2.62.16 16516

@1@: argument to an option "@2@" must be a list of port numbers

[Description]

Argument to the option must be a list of port numbers.

[System Processing]

Processing will be aborted.

[Action]

Specify multiple port number, separated by commas argument to an option, and re-execute the command. Specify a number from 1024 to 32767 for the port number.

2.62.17 16517

@1@: invalid argument for an option "@2@"

[Description]

Invalid argument for an option.

[System Processing]

Processing will be aborted.

[Action]

Check the options specified in command-line, and re-execute the command with correct operands.

2.62.18 16518

@1@: option "@2@" is required

[Description]

The indispensable option is not specified.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct options or confirm the indispensable option is being used correctly.

2.62.19 16519

@1@: requires an option "@2@" or setting the "@3@" environment variable

[Description]

Requires an option or setting the environment variable.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct options. Or, set a correct value to the environment variable, and re-execute the command.

2.62.20 16520

@1@: successfully completed

[Description]

Command successfully completed.

[System Processing]

Continues processing.

[Action]

No action required.

2.62.21 16521

@1@: user "@2@" does not exist

[Description]

The user is not registered into OS.

[System Processing]

Processing will be aborted.

[Action]

Register the user into OS, and re-execute the command. Or, re-execute the command which specified the registered user.

2.62.22 16522

@1@: data directory "@2@" does not exist

[Description]

The data directory does not exist.

[System Processing]

Processing will be aborted.

[Action]

Confirm that an option "--cluster-standbynode" is being used correctly. Or, check the command-line, and re-execute the command with existing data directory.

2.62.23 16523

@1@: "@2@" is not a valid data directory

[Description]

The data directory is not valid.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with valid data directory.

2.62.24 16524

@1@: database cluster is not stopped

[Description]

Database cluster is not stopped.

[System Processing]

Processing will be aborted.

[Action]

Stop the database cluster, and re-execute the command.

2.62.25 16525

@1@: domain root "@2@" already exists

[Description]

The domain root already exists.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct domain root.

2.62.26 16526

@1@: could not create directory "@2@"

[Description]

Could not create the directory.

[System Processing]

Processing will be aborted.

[Action]

Check the following and eliminate the cause of errors, and re-execute the command.

- the state of a disk and file system to creating the directory
- permission of the upper directory of specified directory

2.62.27 16527

@1@: start of PL/extJava has timed out : @2@

[Description]

Timed out waiting for start of PL/extJava.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command after the load on the system has decreased.

2.62.28 16528

@1@: stop of PL/extJava has timed out : @2@

[Description]

Timed out waiting for stop of PL/extJava.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command after the load on the system has decreased.

2.62.29 16529

@1@: port number "@2@" is already in use

[Description]

The port number is already in use.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command with a port number which is not used in other processes.

2.62.30 16530

@1@: domain name can only be specified "domain1"

[Description]

Domain name can only be specified "domain1".

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct domain name.

2.62.31 16531

@1@: domain "@2@" has already been created

[Description]

The domain has already been created.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct domain name.

2.62.32 16532

@1@: domain "@2@" has not been created

[Description]

The domain has not been created.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct domain name.

2.62.33 16533

@1@: permission denied to update file "@2@"

[Description]

Permission denied to update the file.

[System Processing]

Processing will be aborted.

[Action]

Permit writing to the file by execution user, and re-execute the command.

2.62.34 16534

@1@: container for database "@2@" does not exist

[Description]

Container for database does not exist.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct database name.

2.62.35 16535

@1@: container for database "@2@" already exists

[Description]

Container for database already exists.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct database name.

2.62.36 16536

@1@: command error occurred

[Description]

Internal command error occurred.

[System Processing]

Processing will be aborted.

[Action]

Fix the problem by referring to the messages prior to this one.

2.62.37 16537

@1@: the domain was not able to be deleted because there was a container

[Description]

The domain was not able to be deleted because the domain have a container.

[System Processing]

Processing will be aborted.

[Action]

Delete all containers on the domain, and re-execute the command. Or, re-execute the command with "--force" option.

2.62.38 16538

@1@: could not access the data directory

[Description]

Could not access the data directory.

[System Processing]

Processing will be aborted.

[Action]

Confirm that an option "--cluster-standbynode" is being used correctly. Or, specify database super user in "--dbadminuser" option and re-execute the command.

2.62.39 16539

@1@: server instance "@2@" does not exist

[Description]

Server instance does not exist.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct server instance.

2.62.40 16540

@1@: specified database name "@2@" does not follow the naming rules

[Description]

Specified database name does not follow the naming rules.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct database name.

2.62.41 16541

@1@: all the server instances of the container cannot be deleted

[Description]

All the server instances of the container cannot be deleted.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct database name.

2.62.42 16542

@1@: the mount does the shared-file system of the domain root or the data directory

[Description]

A command executing node is not a standby node.

[System Processing]

Processing will be aborted.

[Action]

Execute the command on standby node.

2.62.43 16543

@1@: cannot execute this subcommand on standby node

[Description]

Cannot execute this subcommand on standby node.

[System Processing]

Processing will be aborted.

[Action]

Execute the command on primary node.

2.62.44 16544

@1@: cannot execute this command concurrently

[Description]

Cannot execute this command concurrently.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command after a command executing was finished.

2.62.45 16545

@1@: domain root "@2@" does not exist

[Description]

Domain root does not exist.

[System Processing]

Processing will be aborted.

[Action]

Confirm that the shared-file system of the domain root is mounted. Or, restore domain root from backup and re-execute the command.

2.62.46 16546

parameter "@1@" necessary for the PL/extJava environment was not set

[Description]

PL/extJava environment was not set.

[System Processing]

Processing will be aborted.

[Action]

Set the PL/extJava environment.

2.62.47 16547

mismatched parentheses

[Description]

Missing parenthesis '(' or ')' in Java function definition.

[System Processing]

Processing will be aborted.

[Action]

Check the definition of Java function.

2.62.48 16548

invalid format specification for Java function

[Description]

Invalid format specification for Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the definition of Java function.

Java function definition format is [package].[class].[method].

2.62.49 16549

Java function cannot return type @1@

[Description]

The specified data type is not supported as Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the data type of return value.

2.62.50 16550

Java function cannot accept type @1@

[Description]

The specified data type is not supported as Java function arguments.

[System Processing]

Processing will be aborted.

[Action]

Check the data type of arguments value.

2.62.51 16551

could not execute the Java function at the application server: HTTP status code @1@ details: "@2@"

[Description]

The application server could not execute the Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the Java function of registered in application server.

Check the details.

- The classpath is not found. (plextjava_lib_dir=%s2)

%s2: directory

The directory that stores the Java function is not in the application server. Check the directory and register the Java function.

- The return type is different. (%s3)

%s3: data type

The return value of the Java function is not corresponding to the CREATE FUNCTION definition. Check the data type of Java function.

- The method is not found. (%s4)

%s4: data type

The Java function to which the data type is corresponding is not found. Check the data type of Java function.

- The class is not found. (%s5)

%s5: class name

The Java function to which the class name is corresponding is not found. Check the class name of Java function.

- The method is not static modifier. (%s6)

%s6: Java function name

The Java function is not defined by "Static". Check the Java function definition.

here is no executed authority. (%s7)

%s7: Java function name

The Java function is not defined by "Public". Check the Java function definition.

- Java application throws exception(%s8).

%s8: exception

The exception was generated by the Java function. Check the Java function definition.

- no message

The following causes are thought.

- There is a possibility that the container is not made. Make the container in application server.

a) There is a possibility where the number of server instances is insufficient. Add server instance (JavaVM) to the application server.

b) There is a possibility that memory shortage occurs. Check the Java application.

c) There is a possibility that the time-out is generated. Check the Java application.

d) There is a possibility that abnormality occurs by the application server. Check the following logs.

- Event log (For Windows(R))/system log (For Solaris/Linux).

- Server log of container

- JavaVM log of container
- Trace log of Web server
- Internal log of Web server

2.62.52 16552

could not connect to application server: @1@

[Description]

Could not connect to application server.

[System Processing]

Processing will be aborted.

[Action]

Check the plextjava.http_port parameter in postgresql.conf.

2.62.53 16553

could not create socket for application server connection: @1@

[Description]

Could not create socket.

[System Processing]

Processing will be aborted.

[Action]

There is possible where an open number of files that can be used with the system is insufficient. Please confirm the total of the file that can be used with the system.

2.62.54 16554

could not send data to application server: @1@

[Description]

The application server was disconnected during execution of the Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the message of application server.

2.62.55 16555

could not receive data from application server

[Description]

The application server was disconnected during execution of the Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the message of application server.

2.62.56 16556

could not receive data from application server: @1@

[Description]

The application server was disconnected during execution of the Java function.

[System Processing]

Processing will be aborted.

[Action]

Check the message of application server.

2.62.57 16563

@1@: at least one option of "@2@" must be specified

[Description]

Must specify at least one option.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct options.

2.62.58 16574

@1@: could not write directory "@2@"

[Description]

Could not write the directory.

[System Processing]

Processing will be aborted.

[Action]

Check that the disk of the directory has free space, and check that the abnormalities of the disk have not occurred.

2.62.59 16575

@1@: cannot execute with "@2@" option in primary server

[Description]

Do not specify the option to execute the command in primary server.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct options.

Restore it because PL/extJava environment may be corrupted when the server is member nodes of the cluster.

2.62.60 16576

@1@: specify "@2@" option in standby server

[Description]

Specify the option to execute the command in standby server.

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct options.

Restore it because PL/extJava environment may be corrupted when the server is member nodes of the cluster.

2.62.61 16577

Could not translate client host name "@1@" to IP address: @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.62.62 16578

Could not resolve client IP address to a host name: @1@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.62.63 16579

SELECT target entry is named "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.62.64 16580

SELECT target entry has type @1@, but column has type @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.62.65 16581

RETURNING list entry has type @1@, but column has type @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.62.66 16582

pg_largeobject entry for OID @1@, page @2@ has invalid data field size @3@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.62.67 16583

could not close directory "@1@": @2@

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.62.68 16584

could not create shared memory segment "@1@": @2@

[Description]

Could not create shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.69 16585

could not open shared memory segment "@1@": @2@

[Description]

Could not open shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.70 16586

could not map shared memory segment "@1@": @2@

[Description]

Could not map shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.71 16587

could not unmap shared memory segment "@1@": @2@

[Description]

Could not unmap shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.72 16588

could not remove shared memory segment "@1@": @2@

[Description]

Could not remove shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.73 16589

background worker "@1@": must attach to shared memory in order to request a database connection

[Description]

Could not register background worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.74 16590

background worker "@1@": cannot request database access if starting at postmaster start

[Description]

Could not register background worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.75 16591

background worker "@1@": invalid restart interval

[Description]

Could not register background worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.76 16592

terminating background worker "@1@" due to administrator command

[Description]

Could not register background worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.77 16596

dynamic shared memory control segment is not valid

[Description]

dynamic shared memory control segment is not valid.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.78 16597

too many dynamic shared memory segments

[Description]

Too many dynamic shared memory segments exist.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.62.79 16599

could not stat shared memory segment "@1@": @2@

[Description]

Could not get details about dynamic shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.63 Message Numbers Beginning with 16600

2.63.1 16600

could not resize shared memory segment "@1@" to @2@ bytes: @3@

[Description]

Could not resize shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.63.2 16601

could not get shared memory segment: @1@

[Description]

Could not get shared memory segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.63.3 16604

cannot add more timeout reasons

[Description]

cannot add more timeout reasons

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.63.4 16606

aborting because lock on relation "@1@"."@2@" is not available

[Description]

Aborting because lock on relation is not available.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.5 16607

affix file contains both old-style and new-style commands

[Description]

Affix file conatins commands in both old and new format.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.6 16608

aggregate cannot accept shell type @1@

[Description]

aggregate cannot accept shell type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.7 16609

aggregate functions are not allowed in a recursive query's recursive term

[Description]

aggregate functions are not allowed in a recursive query's recursive term.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.8 16610

aggregate functions are not allowed in check constraints

[Description]

aggregate functions are not allowed in check constraints.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.9 16611

aggregate functions are not allowed in DEFAULT expression

[Description]

aggregate functions are not allowed in DEFAULT expressions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.10 16612

aggregate functions are not allowed in EXECUTE parameters

[Description]

aggregate functions are not allowed in EXECUTE parameter.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.11 16613

aggregate functions are not allowed in FROM clause of their own query level

[Description]

Should only be possible in a LATERAL subquery.aggregate functions are not allowed in FROM clause of their own query level.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.12 16614

aggregate functions are not allowed in functions in FROM

[Description]

aggregate functions are not allowed in functions in FROM.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.13 16615

aggregate functions are not allowed in index expression

[Description]

aggregate functions are not allowed in index expression.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.14 16616

aggregate functions are not allowed in index predicates

[Description]

aggregate functions are not allowed in index predicates.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.15 16617

aggregate functions are not allowed in JOIN conditions

[Description]

aggregate functions are not allowed in JOIN conditions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.16 16618

aggregate functions are not allowed in @1@

[Description]

aggregate functions are not allowed in some kinds of expressions we are parsing such as
EXPR_KIND_WHERE,EXPR_KIND_FILTER, EXPR_KIND_INSERT_TARGET, EXPR_KIND_UPDATE_SOURCE,
EXPR_KIND_UPDATE_TARGET, EXPR_KIND_GROUP_BY, EXPR_KIND_LIMIT, EXPR_KIND_OFFSET,
EXPR_KIND_RETURNING,EXPR_KIND_VALUES.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.17 16620

aggregate functions are not allowed in trigger WHEN conditions

[Description]

aggregate functions are not allowed in trigger WHEN conditions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.18 16621

aggregate functions are not allowed in window RANGE

[Description]

aggregate functions are not allowed in window RANGE.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.19 16622

aggregate functions are not allowed in window ROWS

[Description]

aggregate functions are not allowed in window ROWS.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.20 16623

aggregate mfinalfunc must not be specified without mstype

[Description]

aggregate mfinalfunc must not be specified without mstype.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.21 16624

aggregate minitcond must not be specified without mstype

[Description]

aggregate minitcond must not be specified without mstype.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.22 16625

aggregate minvfunc must be specified when mstype is specified

[Description]

aggregate minvfunc must be specified when mstype is specified. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.23 16626

aggregate minvfunc must not be specified without mstype

[Description]

aggregate minvfunc must not be specified without mstype. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.24 16627

aggregate msfunc must be specified when mstype is specified

[Description]

aggregate msfunc must be specified when mstype is specified. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.25 16628

aggregate msfunc must not be specified without mstype

[Description]

aggregate msfunc must not be specified without mstype. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.26 16629

aggregate msspace must not be specified without mstype

[Description]

aggregate msspace must not be specified without mstype. if mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.27 16630

aggregates cannot accept set arguments

[Description]

aggregates cannot accept set arguments.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.28 16631

aggregates cannot have more than @1@ argument

[Description]

aggregates cannot have more than 99 argument. Aggregates can have at most FUNC_MAX_ARGS-1 args, else the transfnand/or finalfn will be unrepresentable in pg_proc. We must check now to protect fixed-size arrays here and possibly in called functions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.29 16632

aggregates cannot have output arguments

[Description]

aggregates cannot have output arguments.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.30 16633

a hypothetical-set aggregate must have direct arguments matching its aggregated arguments

[Description]

a hypothetical-set aggregate must have direct arguments matching its aggregated arguments.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.31 16634

All connection parameters must be supplied because no database connection exists

[Description]

All connection parameters must be supplied because no database connection exists. We don't know the supplied connection parameters and don't want to connect to the wrong database by using defaults, so require all parameters to be specified.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.32 16635

all replication slots are in use

[Description]

all replication slots are in use.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.33 16636

an aggregate with DISTINCT must have at least one argument

[Description]

an aggregate with DISTINCT must have at least one argument. Returning an empty list would cause the parsed Query to look like it didn't have DISTINCT, with results that would probably surprise the user. Note: this case is presently impossible for aggregates because of grammar restrictions, but we check anyway.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.34 16637

an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type

[Description]

an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.35 16638

argument declared "anyrange" is not a range type but type @1@

[Description]

argument declared \"anyrange\" is not a range type but type format type of range_type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.36 16639

argument list must have even number of elements

[Description]

argument list must have even number of elements.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.37 16640

argument of lo_read exceeds integer range

[Description]

argument of lo_read exceeds integer range. Long ago, somebody thought it'd be a good idea to declare this function as taking size_t ... but the underlying backend function only accepts a signed int32 length. So throw error if the given value overflows int32.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.38 16641

argument of lo_truncate exceeds integer range

[Description]

argument of lo_truncate exceeds integer range\n.Long ago, somebody thought it'd be a good idea to declare this function as taking size_t ... but the underlying backend function only accepts a signed int32 length. So throw error if the given value overflows int32. (A possible alternative is to automatically redirect the call to lo_truncate64; but if the caller wanted to rely on that backend function being available, he could have called lo_truncate64 for himself.)

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.39 16642

argument of lo_write exceeds integer range

[Description]

argument of lo_write exceeds integer range\n.Long ago, somebody thought it'd be a good idea to declare this function as taking size_t ... but the underlying backend function only accepts a signed int32 length. So throw error if the given value overflows int32.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.40 16643

argument of @1@ must be an array of objects

[Description]

argument of funcname must be an array of objects.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.41 16644

Array contents must start with "{"

[Description]

Array contents must start with \"{\".intuit dimensions from brace structure -- it better match what we were given.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.42 16645

array must be one-dimensional

[Description]

array must be one-dimensional.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.43 16646

array must have even number of elements

[Description]

array must have even number of elements.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.44 16647

array must have two columns

[Description]

array must have two columns.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.45 16648

array must not contain nulls

[Description]

array must not contain nulls.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.46 16649

Array value must start with "{" or dimension information

[Description]

Array value must start with "{" or dimension information. No array dimensions, so intuit dimensions from brace structure.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.47 16650

authentication file line too long

[Description]

authentication file line too long. Line too long!

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.48 16651

a variadic ordered-set aggregate must use VARIADIC type ANY

[Description]

a variadic ordered-set aggregate must use VARIADIC type ANY. An ordered-set aggregate that is VARIADIC must be VARIADIC ANY. In principle we could support regular variadic types, but it would make things much more complicated because we'd have to assemble the correct subsets of arguments into array values. Since no standard aggregates have use for such a case, we aren't bothering for now.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.49 16652

a worker process died unexpectedly

[Description]

a worker process died unexpectedly.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.50 16653

canceling statement due to lock timeout

[Description]

canceling statement due to lock timeout.If LOCK_TIMEOUT and STATEMENT_TIMEOUT indicators are both set, we prefer to report the former; but be sure to clear both.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.51 16654

cannot extract elements from an object

[Description]

cannot extract elements from an object.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.52 16655

cannot extract elements from a scalar

[Description]

cannot extract elements from a scalar.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.53 16656

cannot get array length of a non-array

[Description]

cannot get array length of a non-array.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.54 16657

cannot get array length of a scalar

[Description]

cannot get array length of a scalar.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.55 16658

cannot have more than 2³²-2 commands in a transaction

[Description]

cannot have more than 2³²-2 commands in a transaction.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.56 16659

cannot insert into column "@1@" of view "@2@"

[Description]

cannot insert into column non_updatable_col of view RelationGetRelationName(view). This is a different error, caused by an attempt to update a non-updatable column in an otherwise updatable view.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.57 16660

cannot insert into foreign table "@1@"

[Description]

cannot insert into foreign table RelationName of resultRel.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.58 16661

cannot lock rows in materialized view "@1@"

[Description]

cannot lock rows in materialized view RelationName of provided rel.Allow referencing a matview, but not actual locking clauses.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.59 16662

cannot move relations in to or out of pg_global tablespace

[Description]

cannot move relations in to or out of pg_global tablespace.Can't move shared relations in to or out of pg_global. This is also checked by ATExecSetTableSpace, but nice to stop earlier.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.60 16663

cannot perform FREEZE because of prior transaction activity

[Description]

cannot perform FREEZE because of prior transaction activity.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.61 16664

cannot perform FREEZE because the table was not created or truncated in the current subtransaction

[Description]

cannot perform FREEZE because the table was not created or truncated in the current subtransaction.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.62 16665

cannot refresh materialized view "@1@" concurrently

[Description]

cannot refresh materialized view matviewname concurrently.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.63 16666

cannot rename inherited constraint "@1@"

[Description]

cannot rename inherited constraint oldconname.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.64 16667

cannot return non-composite value from function returning composite type

[Description]

cannot return non-composite value from function returning composite type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.65 16668

cannot rewrite table "@1@" used as a catalog table

[Description]

cannot rewrite table Relation name used as a catalog table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.66 16669

cannot update column "@1@" of view "@2@"

[Description]

cannot update column non_updatable_col of view RelationGetRelationName(view).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.67 16670

cannot update foreign table "@1@"

[Description]

cannot update foreign table resultRel relation name.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.68 16671

cannot use a logical replication slot for physical replication

[Description]

Logical replication slots, similar to physical slots except that they are attached to a single database.cannot use a logical replication slot for physical replication.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.69 16672

cannot use DISTINCT with WITHIN GROUP

[Description]

cannot use DISTINCT with WITHIN GROUP.The order clause for WITHIN GROUP and the one for plain-aggregate ORDER BY share a field, so we have to check here that at most one is present. We also check for DISTINCT here to give a better error location.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.70 16673

cannot use expression index "@1@" as replica identity

[Description]

cannot use expression index Relation name of indexRel as replica identity. Expression indexes aren't supported.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.71 16674

cannot use invalid index "@1@" as replica identity

[Description]

cannot use invalid index Relation name of indexRel as replica identity.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.72 16675

cannot use ldapbasedn, ldapbinddn, ldapbindpasswd, ldapsearchattribute, or ldapurl together with ldaprefix

[Description]

cannot use ldapbasedn, ldapbinddn, ldapbindpasswd, ldapsearchattribute, or ldapurl together with ldaprefix. LDAP can operate in two modes: either with a direct bind, using ldaprefix and ldapsuffix, or using a search+bind, using ldapbasedn, ldapbinddn, ldapbindpasswd and ldapsearchattribute. Disallow mixing these parameters.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.73 16676

cannot use multiple ORDER BY clauses with WITHIN GROUP

[Description]

cannot use multiple ORDER BY clauses with WITHIN GROUP.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.74 16677

cannot use non-immediate index "@1@" as replica identity

[Description]

cannot use non-immediate index Relation name of indexRel as replica identity. Deferred indexes are not guaranteed to be always unique.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.75 16678

cannot use non-unique index "@1@" as replica identity

[Description]

cannot use non-unique index Relation name of indexRel as replica identity. The Access Method must support uniqueness, and the index must in fact be unique.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.76 16679

cannot use partial index "@1@" as replica identity

[Description]

cannot use partial index Relation name of indexRel as replica identity.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.77 16680

cannot use physical replication slot for logical decoding

[Description]

cannot use physical replication slot for logical decoding.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.78 16681

cannot use subquery in DEFAULT expression

[Description]

cannot use subquery in DEFAULT expression. Check to see if the sublink is in an invalid place within the query. We allow sublinks everywhere in SELECT/INSERT/UPDATE/DELETE, but generally not in utility statements.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.79 16682

cannot use VARIADIC with WITHIN GROUP

[Description]

cannot use VARIADIC with WITHIN GROUP.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.80 16683

check constraints for domains cannot be marked NO INHERIT

[Description]

check constraints for domains cannot be marked NO INHERIT. Check constraints are handled after domain creation, as they require the Oid of the domain; at this point we can only check that they're not marked NO INHERIT, because that would be bogus.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.81 16684

CONCURRENTLY and WITH NO DATA options cannot be used together

[Description]

CONCURRENTLY and WITH NO DATA options cannot be used together. Check that conflicting options have not been specified.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.82 16685

CONCURRENTLY cannot be used when the materialized view is not populated

[Description]

CONCURRENTLY cannot be used when the materialized view is not populated. Check that CONCURRENTLY is not specified if not populated.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.83 16687

constraint "@1@" of relation "@2@" is not a foreign key or check constraint

[Description]

constraint constrName of relation RelationName(rel) is not a foreign key or check constraint.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.84 16688

could not change directory to "@1@": @2@

[Description]

could not change directory to path: strerror(errno). could not change directory to orig_wd: strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.85 16689

could not close directory "@1@": @2@

[Description]

could not close directory ctx->directory and the corresponding error will be printed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.86 16690

could not close log file @1 @: @2@

[Description]

could not close log file XLogFileNameP(ThisTimeLineID, openLogSegNo) and the reason failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.87 16691

could not close log segment @1 @: @2@

[Description]

could not close log segment XLogFileNameP(recvFileTLI, recvSegNo) and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.88 16692

could not close pipe to external command: @1 @

[Description]

could not close pipe to external command and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.89 16693

could not close pipe to external command: @1 @

[Description]

could not close pipe to external command: strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.90 16694

could not complete SSL handshake on renegotiation, too many failures

[Description]

could not complete SSL handshake on renegotiation, too many failures. A handshake can fail, so be prepared to retry it, but only a few times and in this case we considered maximum limit is 20 times.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.91 16695

could not create any Unix-domain sockets

[Description]

could not create any Unix-domain sockets.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.92 16696

could not create communication channels: @1@

[Description]

could not create communication channels: strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.93 16697

could not create shared memory segment "@1@": @2@

[Description]

could not create shared memory segment name and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.94 16698

could not create Unix-domain socket in directory "@1@"

[Description]

could not create Unix-domain socket in one of the `Unix_socket_directories`.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.95 16699

could not determine data type for argument @1@

[Description]

could not determine data type for argument 1. since `json_object_agg()` is declared as taking type "any", the parser will not do any type conversion on unknown-type literals (that is, undecorated strings or NULLs). Such values will arrive here as type UNKNOWN, which fortunately does not matter to us, since `unknownout()` works fine.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64 Message Numbers Beginning with 16700

2.64.1 16700

could not determine encoding for codeset "@1@"

[Description]

could not determine encoding for codeset `cp` followed by the provided unsigned integer.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.2 16701

could not duplicate handle for "@1@": @2@

[Description]

could not duplicate handle for handle name and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.3 16702

could not execute command "@1@": @2@

[Description]

could not execute command filename and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.4 16703

could not execute command "@1@": @2@

[Description]

could not execute command options->file and the strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.5 16704

could not fdatsync log file @1@: @2@

[Description]

could not fdatsync log file XLogFileNameP(ThisTimeLineID, segno) and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.6 16705

could not fork worker process: @1@

[Description]

could not fork worker process. The reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.7 16706

could not fsync log file @1@: @2@

[Description]

could not fsync log file XLogFileNameP(ThisTimeLineID, segno) and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.8 16707

could not fsync log segment @1@: @2@

[Description]

could not fsync log segment XLogFileNameP(ThisTimeLineID, openLogSegNo) and reason for failure also printed along with error. XLogFileNameP(ThisTimeLineID, openLogSegNo) currently open log segment (if any). Also, if the open flag is changing, close the log file so it will be reopened (with new flag bit) at next use.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.9 16708

could not fsync write-through log file @1@: @2@

[Description]

could not fsync write-through log file XLogFileNameP(ThisTimeLineID, segno) and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.10 16709

could not get current working directory: @1@

[Description]

could not get current working directory: strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.11 16710

could not get home directory for user ID @1@: @2@

[Description]

could not get home directory for user ID user_id and strerror(errno) if errno set otherwise print _("user does not exist").

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.12 16711

could not get junction for "@1@": @2@

[Description]

could not get junction for path :msg.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.13 16712

could not get relation name for OID @1@: @2@

[Description]

could not get relation name for OID te->catalogId.oid, PQerrorMessage(AH->connection).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.14 16713

could not get shared memory segment: @1@

[Description]

could not get shared memory segment and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.15 16714

Could not identify system: got @1@ rows and @2@ fields, expected @3@ rows and @4@ or more fields

[Description]

Could not identify system: got res->ntups rows and res->numAttributes fields, expected 3 rows and 1 or more fields.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.16 16715

could not import a module for Decimal constructor

[Description]

could not import a module for Decimal constructor. Try to import cdecimal. If it doesn't exist, fall back to decimal.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.17 16716

could not initialize LDAP: @1@

[Description]

could not initialize LDAP and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.18 16719

could not look up local user ID @1@: @2@

[Description]

could not look up local user ID geteuid() and error string for the corresponding errno will be printed or if it is unknown error it will print "Unknown error".

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.19 16720

could not look up local user ID @1@: @2@

[Description]

could not look up local user ID (long)uid and if errno is set error string for the corresponding errno will be printed otherwise "user does not exist" will be printed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.20 16721

could not map anonymous shared memory: @1@

[Description]

could not map anonymous shared memory and the reason for failure will be printed along with error.If errno is ENOMEM means This error usually means that PostgreSQL's request for a shared memory segment exceeded available memory, swap space, or huge pages. To reduce the request size (currently size bytes), reduce PostgreSQL's shared memory usage, perhaps by reducing shared_buffers or max_connections.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.21 16722

could not map shared memory segment "@1@": @2@

[Description]

could not map shared memory segment handle name and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.22 16723

could not obtain lock on relation "@1@"

[Description]

could not obtain lock on relation relation name. Lock relation. This will also accept any pending invalidation messages. If we got back InvalidOid, indicating not found, then there's nothing to lock, but we accept invalidation messages anyway, to flush any negative catcache entries that may be lingering.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.23 16724

could not open backend variables file "@1@": @2@

[Description]

could not open backend variables file id and stterror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.24 16725

could not open configuration directory "@1@": @2@

[Description]

could not open configuration directory absolute location of includedir and the reason for failure also be printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.25 16726

could not open shared memory segment "@1@": @2@

[Description]

could not open shared memory segment dsm handle name and reason for failure also printed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.26 16727

could not open transaction log file "@1@": @2@

[Description]

could not open transaction log file path and reason for failure also prined along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.27 16728

could not parse file name "@1@"

[Description]

could not parse file name path name. temporary filenames from SnapBuildSerialize() include the LSN and everything but are postfixed by \$.pid.tmp. We can just remove them the same as other files because there can be none that are currently being written that are older than cutoff. We just log a message if a file doesn't fit the pattern, it's probably some editors lock/state file or similar...

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.28 16729

could not parse LDAP URL "@1@": @2@

[Description]

could not parse LDAP URL val and ldap_err2string on the return value of ldap_url_parse.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.29 16730

could not perform initial LDAP bind for ldapbinddn "@1@" on server "@2@": @3@

[Description]

could not perform initial LDAP bind for ldapbinddn port->hba->ldapbinddn on server port->hba->ldapservers and ldap_err2string on the return value of ldap_simple_bind_s. Bind with a pre-defined username/password (if available) for searching. If none is specified, this turns into an anonymous bind.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.30 16731

could not read directory "@1@": @2@

[Description]

could not read directory path and strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.31 16732

could not read file "@1@", read @2@ of @3@: @4@

[Description]

could not read file path, read readBytes of (int) SnapBuildOnDiskConstantSize) and the reason for failure also printed along with error. This error can occur during reading statically sized portion of snapshot or reading SnapBuild or during restore running xacts information or during restore committed xacts information.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.32 16733

could not read file "@1@", read @2@ of @3@: @4@

[Description]

could not read file , path read readBytes of (uint32) ReplicationSlotOnDiskConstantSize) and the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.33 16734

could not read from backend variables file "@1@": @2@

[Description]

could not read from backend variables file id and strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.34 16735

could not read from file "@1@": read @2@ instead of @3@ bytes

[Description]

could not read from file path: read readBytes instead of (int32) sizeof(LogicalRewriteMappingData) bytes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.35 16736

could not read from log segment @1@, offset @2@, length @3@: @4@

[Description]

could not read from log segment XLogFileNameP(curFileTimeLine, sendSegNo), offset sendOff, length (unsigned long) segbytes) and the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.36 16737

could not read from log segment @1@, offset @2@: @3@

[Description]

could not read from log segment fname, offset readOff and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.37 16738

could not read from reorderbuffer spill file: @1@

[Description]

could not read from reorderbuffer spill file and the reason for failure also be printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.38 16739

could not read from reorderbuffer spill file: read @1@ instead of @2@ bytes

[Description]

could not read from reorderbuffer spill file: read readBytes instead of (uint32) sizeof(ReorderBufferDiskChange) bytes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.39 16740

could not read from tuplestore temporary file: @1@

[Description]

could not read from tuplestore temporary file and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.40 16741

could not read time zone file "@1@": @2@

[Description]

could not read time zone file filename and the reason for failure also be printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.41 16742

could not receive timeline history file from "the primary server: @1@

[Description]

could not receive timeline history file from "the primary server:PQerrorMessage(streamConn).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.42 16743

could not remove directory "@1@"

[Description]

could not remove directory tmp_path. If removing the directory fails, the worst thing that will happen is that the user won't be able to create a new slot with the same name until the next server restart. We crashed while a slot was being setup or deleted, clean up. If we crashed with an ephemeral slot active, don't restore but delete it.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.43 16744

could not remove shared memory segment "@1@": @2@

[Description]

could not remove shared memory segment name and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.44 16746

could not resize shared memory segment "@1@" to @2@ bytes: @3@

[Description]

could not resize shared memory segment name to request_size bytes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.45 16747

Could not resolve client IP address to a host name: @1@

[Description]

Could not resolve client IP address to a host name gai_strerror(port->remote_hostname_errcode).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.46 16748

could not restore file "@1@" from archive: @2@

[Description]

could not restore file xlogfname from archive: Returns a human-readable string explaining the reason a child process terminated by taking the argument as rc.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.47 16749

could not search LDAP for filter "@1@" on server "@2@" : @3@

[Description]

could not search LDAP for filter filter on server port->hba->ldapservers: ldap_err2string(return value of ldap_search_s).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.48 16750

could not seek in log file @1@ to offset @2@: @3@

[Description]

could not seek in log file XLogFileNameP(ThisTimeLineID, openLogSegNo) to offset startoffset and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.49 16751

could not seek in log segment @1@ to offset @2@: @3@

[Description]

could not seek in log segment fname to offset readOff: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.50 16752

could not seek in tuplestore temporary file: @1@

[Description]

could not seek in tuplestore temporary file and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.51 16753

could not seek to beginning of file "@1@": @2@

[Description]

could not seek to beginning of file path and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.52 16754

could not send end-of-streaming message to primary: @1@

[Description]

could not send end-of-streaming message to primary: PQerrorMessage(streamConn).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.53 16755

could not set LDAP protocol version: @1@

[Description]

could not set LDAP protocol version: ldap_err2string(return value of ldap_set_option).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.54 16756

could not set socket to nonblocking mode: @1@

[Description]

could not set socket to nonblocking mode: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.55 16757

could not set socket to nonblocking mode: @1@

[Description]

could not set socket to nonblocking mode: SOCK_STRERROR(SOCK_ERRNO, sebuf, sizeof(sebuf)).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.56 16758

could not set variable "@1@"

[Description]

could not set variable varname.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.57 16759

could not start LDAP TLS session: @1@

[Description]

could not start LDAP TLS session: ldap_err2string(return value of _ldap_start_tls_sA).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.58 16760

could not stat control file "@1@": @2@

[Description]

could not stat control file XLOG_CONTROL_FILE and reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.59 16761

could not stat file or directory "@1@": @2@

[Description]

could not stat file or directory path/TABLESPACE_VERSION_DIRECTORY :the reason for failure printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.60 16762

could not stat file "@1@": @2@

[Description]

could not stat file options->file,strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.61 16763

could not stat shared memory segment "@1@": @2@

[Description]

could not stat shared memory segment name:the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.62 16764

could not stat trigger file "@1@": @2@

[Description]

Check to see whether the user-specified trigger file exists and whether a promote request has arrived. If either condition holds, return true.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.63 16765

Could not translate client host name "@1@" to IP address: @2@

[Description]

could not translate the client host name to ip address.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.64 16766

could not truncate file "@1@" to @2@: @3@

[Description]

Truncate all data that's not guaranteed to have been safely fsynced (by previous record or by the last checkpoint).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.65 16767

could not unmap shared memory segment "@1@": @2@

[Description]

could not unmap shared memory segment name: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.66 16768

could not write to COPY program: @1@

[Description]

could not write to COPY program: the reason for failure is printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.67 16769

could not write to data file for XID @1@: @2@

[Description]

could not write to data file for XID (txn->xid) and the reason for failure is also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.68 16770

could not write to file "@1@", wrote @2@ of @3@: @4@

[Description]

could not write to file src->path, wrote written of len: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.69 16771

could not write to log file @1@ at offset @2@, length @3@: @4@

[Description]

could not write to log file XLogFileNameP(ThisTimeLineID, openLogSegNo) at offset openLogOff length nbytes: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.70 16772

could not write to log segment @1@ at offset @2@, length @3@: @4@

[Description]

if write didn't set errno, assume no disk space

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.71 16773

could not write to the communication channel: @1@

[Description]

- 1.This function is executed in the worker process.It sends a message to the master on the communication channel.
- 2.This function is executed in the master process.It sends a message to a certain worker on the communication channel.If we're already aborting anyway, don't care if we succeed or not.The child might have gone already.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.72 16774

could not write to tuplestore temporary file: @1@

[Description]

could not write to tuplestore temporary file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.73 16775

database connection requirement not indicated during registration

[Description]

This flag means the bgworker requires a database connection. The connection is not established automatically; the worker must establish it later. It requires that BGWORKER_SHMEM_ACCESS was passed too.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.74 16776

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database "@1@"

[Description]

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database Execute a database-wide VACUUM in that database You might also need to commit or roll back old prepared transactions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.75 16777

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database with OID

[Description]

Execute a database-wide VACUUM in that database. You might also need to commit or roll back old prepared transactions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.76 16778

database "@1@" is used by a logical replication slot

[Description]

Check whether there are, possibly unconnected, logical slots that refer to the to-be-dropped database. The database lock we are holding prevents the creation of new slots using the database. ReplicationSlotsCountDBSlots -- count the number of slots that refer to the passed database oid. Returns true if there are any slots referencing the database. *nslots will be set to the absolute number of slots in the database, *nactive to ones currently active.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.77 16779

date field value out of range: @1@-@2@-@3@

[Description]

date field value out of range Note: we'll reject zero or negative year values. Perhaps negativesshould be allowed to represent BC years?

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.78 16780

date out of range: @1@-@2@-@3@

[Description]

date out of range Note: we'll reject zero or negative year values. Perhaps negativesshould be allowed to represent BC years?

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.79 16781

DECLARE CURSOR WITH HOLD ... @1@ is not supported

[Description]

DECLARE CURSOR WITH HOLD is not supported .FOR UPDATE and WITH HOLD are not compatible

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.80 16782

DECLARE INSENSITIVE CURSOR ... @1@ is not supported

[Description]

DECLARE INSENSITIVE CURSOR is not supportedFOR UPDATE and INSENSITIVE are not compatible

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.81 16783

DECLARE SCROLL CURSOR ... @1@ is not supported

[Description]

DECLARE SCROLL CURSOR is not supportedFOR UPDATE and SCROLL are not compatible

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.82 16784

ECDH: could not create key

[Description]

ECDH: could not create key

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.83 16785

ECDH: unrecognized curve name: @1@

[Description]

ECDH: unrecognized curve name

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.84 16786

enum label "@1@" already exists

[Description]

Check if label is already in use. The unique index on pg_enum would catch this anyway, but we prefer a friendlier error message, and besides we need a check to support IF NOT EXISTS.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.85 16788

error processing a parallel work item

[Description]

error processing a parallel work itemIt looks for an idle worker process and only returns if there is one.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.86 16789

error reading result of streaming command: @1@

[Description]

error reading result of streaming command

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.87 16790

event trigger functions cannot have declared arguments

[Description]

event trigger functions cannot have declared argumentsshouldn't be any declared arguments

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.88 16791

event trigger name cannot be qualified

[Description]

event trigger name cannot be qualifiedThe types of names handled by this function are not permitted to beschema-qualified or catalog-qualified.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.89 16792

event trigger "@1@" already exists

[Description]

An event trigger of same name is already exist

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.90 16793

event triggers are not supported for @1@

[Description]

Validate DDL command tags.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.91 16794

event trigger "@1@" does not exist

[Description]

event trigger does not exist.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.92 16795

event trigger "@1@" does not exist, skipping

[Description]

Generate a NOTICE stating that the named object was not found, and is being skipped. This is only relevant when "IF EXISTS" is used; otherwise, `get_object_address()` in `RemoveObjects` would have thrown an ERROR.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.93 16796

event trigger with OID @1@ does not exist

[Description]

event trigger with OID does not exist

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.94 16797

exceeded maxAllocatedDescs (@1@) while trying to execute command "@2@"

[Description]

exceeded maxAllocatedDescs while trying to execute command

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.95 16798

Expected 1 tuple with 2 fields, got @1@ tuples with @2@ fields.

[Description]

Expected 1 tuple with 2 fields

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.96 16799

Expected array element or "]", but found "@1@\"

[Description]

The context of the parser is maintained by the recursive descent mechanism, but is passed explicitly to the error reporting routine for better diagnostics.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65 Message Numbers Beginning with 16800

2.65.1 16800

Expected a transaction log switchpoint location.

[Description]

Expected a transaction log switchpoint location.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.2 16801

Expected ":", but found "@1@"

[Description]

invalid input syntax for type json The context of the parser is maintained by the recursive descent mechanism, but is passed explicitly to the error reporting routine for better diagnostics.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.3 16802

extended query protocol not supported in a replication connection

[Description]

'firstchar' specifies what kind of a forbidden message was received, and is used to construct the error message.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.4 16803

fastpath function calls not supported in a replication connection

[Description]

'firstchar' specifies what kind of a forbidden message was received, and is used to construct the error message.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.5 16804

field name must not be null

[Description]

If function is not marked "proisstrict" in pg_proc, it must check for null arguments using this macro. Do not try to GETARG a null argument!

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.6 16805

FILTER is not implemented for non-aggregate window functions

[Description]

FILTER is not yet supported with true window functions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.7 16806

filters not supported in LDAP URLs.

[Description]

filters not supported in LDAP URLs.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.8 16807

FILTER specified, but @1@ is not an aggregate function

[Description]

FILTER specified, but the function is not an aggregate function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.9 16808

filter value "@1@" not recognized for filter variable "@2@"

[Description]

Validate DDL command tags

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.10 16809

filter variable "@1@" specified more than once

[Description]

Complain about a duplicate filter variable.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.11 16810

final function with extra arguments must not be declared STRICT

[Description]

When finalfnExtraArgs is specified, the finalfn will certainly be passed at least one null argument, so complain if it's strict.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.12 16811

first argument of @1@ must be a row type

[Description]

Convenience function to determine whether a type OID represents a "rowtype" type --- either RECORD or a named composite type.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.13 16812

FORCE NULL column "@1@" not referenced by COPY

[Description]

Convert FORCE NULL name list to per-column flags, check validity

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.14 16813

foreign key referenced-columns list must not contain duplicates

[Description]

Reject duplicate appearances of columns in the referenced-columns list. Such a case is forbidden by the SQL standard, and even if we thought it useful to allow it, there would be ambiguity about how to match the list to unique indexes (in particular, it'd be unclear which indexopclass goes with which FK column).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.15 16814

Foreign tables cannot have constraint triggers.

[Description]

Foreign key table does not contain constraint triggers

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.16 16815

Foreign tables cannot have INSTEAD OF triggers.

[Description]

Foreign tables cannot have INSTEAD OF triggers.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.17 16816

Foreign tables cannot have TRUNCATE triggers.

[Description]

Foreign tables cannot have TRUNCATE triggers.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.18 16817

foreign table "@1@" does not allow deletes

[Description]

foreign table does not allow deletes

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.19 16818

foreign table "@1@" does not allow inserts

[Description]

foreign table does not allow inserts

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.20 16819

foreign table "@1@" does not allow updates

[Description]

foreign table \"%s\" does not allow updates

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.21 16820

foreign table "@1@" does not exist, skipping

[Description]

the foreign table is not existing.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.22 16821

format specifies argument 0, but arguments are numbered from 1

[Description]

Explicit 0 for argument index is immediately refused

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.23 16822

function returning record called in context that cannot accept type record

[Description]

- 1.failed to determine actual type of RECORDfunction returning record called in context that cannot accept type record
- 2.get the tupdesc from the result set info - it must be a record typebecause we already checked that arg1 is a record type, or we're in ato_record function which returns a setof record.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.24 16823

function @1@ must accept VARIADIC ANY to be used in this aggregate

[Description]

If the agg is declared to take VARIADIC ANY, the underlying functions had better be declared that way too, else they may receive too many parameters; but func_get_detail would have been happy with plain ANY.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.25 16824

function "@1@" must return type "event_trigger"

[Description]

Find and validate the trigger function.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.26 16825

hot standby is not possible because wal_level was not set to "hot_standby" or higher on the master server

[Description]

For Hot Standby, the WAL must be generated with 'hot_standby' mode, and we must have at least as many backend slots as the primary.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.27 16826

huge pages not supported on this platform

[Description]

huge pages not supported on this platform if the value is 1

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.28 16827

huge TLB pages not supported on this platform

[Description]

huge pages not supported on this platform if the value is 1

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.29 16829

index row size @1@ exceeds hash maximum @2@

[Description]

Check whether the item can fit on a hash page at all. (Eventually, we ought to try to apply TOAST methods if not.) Note that at this point, itemsz doesn't include the ItemId.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.30 16830

index row size @1@ exceeds maximum @2@ for index "@3@"

[Description]

If the tuple would be too big to be stored, function throws a suitable error if errorTooBig is TRUE, or returns NULL if errorTooBig is FALSE.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.31 16831

index "@1@" cannot be used as replica identity because column "@2@" is nullable

[Description]

Check index for nullable columns.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.32 16832

index "@1@" contains a half-dead internal page

[Description]

Pre-9.4 page deletion only marked internal pages as half-dead, but now we only use that flag on leaf pages.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.33 16833

interval time zone "@1@" must not include months or days

[Description]

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.34 16834

interval units "@1@" not supported because months usually have fractional weeks

[Description]

default condition of the switch statement with condition val

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.35 16835

invalid backup block size in record at @1@/@2@

[Description]

Add in the backup blocks, if any

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.36 16836

invalid contrecord length @1 @ at @2 @/@3 @

[Description]

Cross-check that xlp_rem_len agrees with how much of the record we expect there to be left.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.37 16837

invalid flags for opening a large object: @1 @

[Description]

Large object descriptor, appropriately filled in. The descriptor and subsidiary data are allocated in the specified memory context, which must be suitably long-lived for the caller's purposes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.38 16839

invalid input syntax for numeric time zone: "@1@"

[Description]

Note pg_tzset happily parses numeric input that DecodeTimezone would reject. To avoid having it accept input that would otherwise be seen as invalid, it's enough to disallow having a digit in the first position of our input string.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.39 16840

invalid input syntax for type json

[Description]

Per RFC4627, these characters MUST be escaped. Since *s isn't printable, exclude it from the context string.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.40 16841

invalid input syntax for type pg_isn: "@1@"

[Description]

Sanity check input format.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.41 16842

invalid large object write request size: @1 @

[Description]

the addition in the condition can't overflow because nbytes is only int32

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.42 16843

invalid line number: @1 @

[Description]

validating the line number.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.43 16844

invalid line specification: A and B cannot both be zero

[Description]

invalid line specification: A and B cannot both be zero

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.44 16845

invalid line specification: must be two distinct points

[Description]

invalid line specification: must be two distinct points

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.45 16846

invalid locale name: "@1@"

[Description]

Check that the chosen locales are valid, and get canonical spellings

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.46 16847

invalid magic number @1@ in log segment @2@, offset @3@

[Description]

invalid magic number in log segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.47 16848

invalid message received from worker: @1@

[Description]

Invalid message received from worker.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.48 16849

invalid MultiXactId: @1@

[Description]

No work except at first MultiXactId of a page. But beware: just after wraparound, the first MultiXactId of page zero is FirstMultiXactId.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.49 16850

invalid page in block @1@ of relation @2@

[Description]

verifying the page in block of relations

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.50 16851

invalid page in block @1@ of relation @2@; zeroing out page

[Description]

invalid page in block of relation, zeroing out page

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.51 16852

invalid processing mode in background worker

[Description]

it had better not gotten out of "init" mode yet

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.52 16853

invalid scale in external "numeric" value

[Description]

invalid scale in external

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.53 16854

invalid timeline @1@

[Description]

invalid timeline

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.54 16855

invalid value for "buffering" option

[Description]

Validator for "buffering" reoption on GiST indexes. Allows "on", "off" and "auto" values.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.55 16856

invalid value for "check_option" option

[Description]

Validator for "check_option" reoption on views. The allowed values are "local" and "cascaded".

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.56 16857

invalid value for parameter "replication"

[Description]

Try to interpret value as boolean value. Valid values are: true,false, yes, no, on, off, 1, 0; as well as unique prefixes thereof.If the string parses okay, return true, else false. If okay and result is not NULL, return the value in *result.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.57 16858

invalid value for recovery parameter "recovery_target"

[Description]

the recovery parameter name should be "recovery_target" and the recovery parameter value should be "immediate" .

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.58 16859

invalid value "@1@" for "@2@"

[Description]

- 1.checking if the parsed character is greater than 0 and that parsed character is less than required.
- 2.check if the source is equal to init
- 3.if the length is not valid

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.59 16860

invalid whence setting: @1@

[Description]

Note: overflow in the additions is possible, but since we will reject negative results, we don't need any extra test for that.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.60 16861

JSON does not support infinite date values.

[Description]

XSD doesn't support infinite values. Infinity and minus infinity must be the max and min values of DateADT. We could use INT_MIN and INT_MAX here, but seems better to not assume that int32 == int.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.61 16862

JSON does not support infinite timestamp values

[Description]

XSD doesn't support infinite values

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.62 16863

Junk after closing right brace

[Description]

only whitespace is allowed after the closing brace. We used to use isspace() for parsing array values, but that has undesirable results: an array value might be silently interpreted differently depending on the locale setting. Now we just hard-wire the traditional ASCII definition of isspace().

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.63 16864

Junk view columns are not updatable

[Description]

the only updatable columns we support are those that are Vars referring to user columns of the underlying base relation. The view targetlist may contain resjunk columns (e.g., a view defined like "SELECT * FROM t ORDER BY a+b" is auto-updatable) but such columns are not auto-updatable, and in fact should never appear in the outer query's targetlist.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.64 16865

large object read request is too large

[Description]

A result_length calculated from loSize may not fit in a size_t. Check that the size will satisfy this and subsequently-enforced size limits.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.65 16866

LIKE is not supported for creating foreign tables

[Description]

we could support LIKE in many cases, but worry about it another day

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.66 16867

lock file "@1@" is empty

[Description]

Either another server is starting, or the lock file is the remnant of a previous server startup crash.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.67 16868

logical decoding cannot be used while in recovery

[Description]

We check shared state each time only until we leave recovery mode. We can't re-enter recovery, so there's no need to keep checking after the shared variable has once been seen false. Note: We don't need a memory barrier when we're still in recovery. We might exit recovery immediately after return, so the caller can't rely on 'true' meaning that we're still in recovery anyway.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.68 16869

logical decoding requires a database connection

[Description]

Make sure the current settings & environment are capable of doing logicaldecoding.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.69 16870

logical decoding requires wal_level >= logical

[Description]

Make sure the current settings & environment are capable of doing logicaldecoding.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.70 16871

lo_lseek result out of range for large-object descriptor @1@

[Description]

guard against result overflow

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.71 16872

lo_tell result out of range for large-object descriptor @1@

[Description]

guard against result overflow

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.72 16873

malformed range literal: "@1@"

[Description]

first check for the empty range and then the rest should be whitespace. and then check if the string is not null terminated

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.73 16874

materialized views may not be defined using bound parameters

[Description]

A materialized view would either need to save parameters for use in maintaining/loading the data or prohibit them entirely. The latter seems safer and more sane.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.74 16875

materialized views must not use data-modifying statements in WITH

[Description]

Prohibit a data-modifying CTE in the query used to create a materialized view. It's not sufficiently clear what the user would want to happen if the MV is refreshed or incrementally maintained.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.75 16876

materialized views must not use temporary tables or views

[Description]

Check whether any temporary database objects are used in the creation query. It would be hard to refresh data or incrementally maintain it if a source disappeared.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.76 16877

mismatched array dimensions

[Description]

take separate key and value arrays of text to construct a json object pairwise.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.77 16878

Missing array dimension value

[Description]

Missing array dimension value

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.78 16879

more than one row returned for \gset

[Description]

StoreQueryTuple: assuming query result is OK, save data into variables

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.79 16880

moving-aggregate implementation returns type @1@, but plain implementation returns type @2@

[Description]

check if the moving-aggregate implementation returns type is not same as that of plain implementation returns type

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.80 16881

moving-aggregate transition function must not return null

[Description]

Moving-aggregate transition functions must not return null, for more see `advance_windowaggregate_base()`.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.81 16882

Multidimensional arrays must have sub-arrays with matching dimensions

[Description]

Multidimensional arrays must have sub-arrays with matching dimensions
`ArrayCount` will Determine the dimensions for an array string.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.82 16883

multiple column definition lists are not allowed for the same function

[Description]

check if the `codelist` and the `range functions codelist` ie., the multiple column definition list for the same function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.83 16884

MultiXactId @1@ does no longer exist -- apparent wraparound

[Description]

`MultiXactId` does no longer exist -- apparent wraparound

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.84 16885

MultiXactId @1@ has not been created yet -- apparent wraparound

[Description]

MultiXactId has not been created yet -- apparent wraparound

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.85 16886

must be owner of event trigger @1@

[Description]

the MAX_ACL_KIND object types that can have privilege errors

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.86 16887

must be superuser or replication role to start walsender

[Description]

Check replication permissions needed for walsender processes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.87 16888

must be superuser or replication role to use replication slots

[Description]

must be superuser or replication role to use replication slots

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.88 16889

must be superuser to alter settings globally

[Description]

Must be superuser to alter settings globally.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.89 16890

must be superuser to COPY to or from an external program

[Description]

Disallow COPY to/from file or program except to superusers.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.90 16891

Must be superuser to create an event trigger

[Description]

It would be nice to allow database owners or even regular users to do this, but there are obvious privilege escalation risks which would have to somehow be plugged first.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.91 16892

must be superuser to execute ALTER SYSTEM command

[Description]

must be superuser to execute ALTER SYSTEM command

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.92 16894

new data for "@1@" contains duplicate rows without any null columns

[Description]

Note that this ereport() is returning data to the user. Generally, we would want to make sure that the user has been granted access to this data. However, REFRESH MAT VIEW is only able to be run by the owner of the mat view (or a superuser) and therefore there is no need to check for access to data in the mat view.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.93 16895

new row violates WITH CHECK OPTION for view "@1@"

[Description]

WITH CHECK OPTION checks are intended to ensure that the new tuple is visible in the view. If the view's qual evaluates to NULL, then the new tuple won't be included in the view. Therefore we need to tell ExecQual to return FALSE for NULL (the opposite of what we do above for CHECK constraints).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.94 16896

no Decimal attribute in module

[Description]

the module is not contain any Decimal attribute.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.95 16897

no matching relations in tablespace "@1@" found

[Description]

there is no matching relations in tablespace.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.96 16898

no rows returned for \gset

[Description]

StoreQueryTuple: assuming query result is OK, save data into variables Returns true if successful, false otherwise.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.97 16899

not enough arguments for cursor "@1@"

[Description]

check the syntax immediately, instead of checking the final expression that may have the arguments reordered. Trailing whitespace must not be trimmed, because otherwise input of the form (param -- comment\n, param) would be translated into a form where the second parameter is commented out.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66 Message Numbers Beginning with 16900

2.66.1 16900

not enough shared memory for data structure "@1@" (@2@ bytes requested)

[Description]

If the shmem index doesn't exist, we are bootstrapping: we must be trying to init the shmem index itself. Notice that the ShmemIndexLock is released before the shmem index has been initialized. This should be OK because no other process can be accessing shared memory yet.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.2 16901

not enough shared memory for elements of data structure "@1@" (@2@ bytes requested)

[Description]

not enough shared memory for elements of data structure

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.3 16902

null value not allowed for object key

[Description]

null value not allowed for object key

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.4 16903

number is out of range

[Description]

check if the number is coming out of range ie.,in between 0 and 9.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.5 16904

number of jsonb array elements exceeds the maximum allowed (@1@)

[Description]

number of jsonb array elements exceeds the maximum allowed

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.6 16905

number of jsonb object pairs exceeds the maximum allowed (@1@)

[Description]

number of jsonb object pairs exceeds the maximum allowed

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.7 16906

number of parameters must be between 0 and 65535

[Description]

number of parameters must be between 0 and 65535

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.8 16907

Numeric time zones must have "-" or "+" as first character.

[Description]

The starting character of the numeric time zone should not digit.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.9 16908

numeric time zone "@1@" out of range

[Description]

DecodeTimezone()-Interpret string as a numeric timezone. Return 0 if okay (and set *tzip), a DTERR code if not okay.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.10 16909

Object keys should be text

[Description]

If function is not marked "proisstrict" in pg_proc, it must check for null arguments using this macro. Do not try to GETARG a null argument!

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.11 16910

only ordered-set aggregates can be hypothetical

[Description]

Symbolic values for aggkind column. We distinguish normal aggregates from ordered-set aggregates (which have two sets of arguments, namely direct and aggregated arguments) and from hypothetical-set aggregates (which are a subclass of ordered-set aggregates in which the last direct arguments have to match up in number and datatypes with the aggregated arguments).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.12 16911

only tables, indexes, and materialized views exist in tablespaces

[Description]

only tables, indexes, and materialized views exist in tablespaces

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.13 16912

operator not allowed in variable definition

[Description]

operator not allowed in variable definition

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.14 16913

option --if-exists requires option -c/--clean

[Description]

option --if-exists requires option -c/--clean

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.15 16914

outer-level aggregate cannot contain a lower-level variable in its direct arguments

[Description]

Now check for vars/aggs in the direct arguments, and throw error if needed. Note that we allow a Var of the agg's semantic level, but not an Agg of that level. In principle such Aggs could probably be supported, but it would create an ordering dependency among the aggregates at execution time. Since the case appears neither to be required by spec nor particularly useful, we just treat it as a nested-aggregate situation.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.16 16915

out-of-sequence timeline ID @1@ (after @2@) in log segment @3@, offset @4@

[Description]

Since child timelines are always assigned a TLI greater than their immediate parent's TLI, we should never see TLI go backwards across successive pages of a consistent WAL sequence.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.17 16916

OVER is not supported for ordered-set aggregate @1@

[Description]

window functions must be called with a window definition.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.18 16917

page verification failed, calculated checksum @1@ but expected @2@

[Description]

Throw a WARNING if the checksum fails, but only after we've checked for the all-zeroes case.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.19 16918

parallel backup only supported by the directory format

[Description]

Parallel backup only in the directory archive format so far

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.20 16920

percentile value @1@ is not between 0 and 1

[Description]

percentile value should be in between 0 and 1.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.21 16921

permission denied for event trigger @1@

[Description]

the no_priv_msg array object is ACL_KIND_EVENT_TRIGGER

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.22 16922

permission denied to change owner of event trigger "@1@"

[Description]

New owner must be a superuser

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.23 16923

permission denied to create event trigger "@1@"

[Description]

It would be nice to allow database owners or even regular users to do this, but there are obvious privilege escalation risks which would have to somehow be plugged first.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.24 16924

[pg_largeobject entry for OID @1@, page @2@ has invalid data field size @3@](#)

[Description]

the size of the data field of pg_largeobject entry is less than 0 or greater than LOBLKSIZE.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.25 16926

[range constructor flags argument must not be null](#)

[Description]

range constructor flags argument must not be null

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.26 16927

[relation "@1@" in @2@ clause not found in FROM clause](#)

[Description]

the list cell is NULL for ensuring the SQL row locking clause such as FOR UPDATE is not found in FROM clause

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.27 16928

[removing elements from multidimensional arrays is not supported](#)

[Description]

We can't remove elements from multi-dimensional arrays, since the result might not be rectangular.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.28 16929

renaming an ON SELECT rule is not allowed

[Description]

We disallow renaming ON SELECT rules, because they should always be named "_RETURN".

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.29 16930

replication slot file @1@: checksum mismatch, is @2@, should be @3@

[Description]

verify the CRCs.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.30 16931

replication slot file "@1@" has corrupted length @2@

[Description]

boundary check on length

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.31 16932

replication slot file "@1@" has unsupported version

[Description]

verify version

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.32 16933

replication slot file "@1@" has wrong magic @2@ instead of @3@

[Description]

verify magic

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.33 16934

replication slot name "@1@" contains invalid character

[Description]

Replication slot names may only contain letters, numbers, and the underscore character

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.34 16935

replication slot name "@1@" is too long

[Description]

Maximum length for identifiers (e.g. table names, column names, function names). Names actually are limited to one less byte than this, because the length must include a trailing zero byte.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.35 16936

replication slot name "@1@" is too short

[Description]

Check whether the passed slot name is valid and report errors at elevel.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.36 16937

Replication slot names may only contain letters, numbers, and the underscore character.

[Description]

Replication slot names may only contain letters, numbers, and the underscore character.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.37 16938

replication slot "@1@" already exists

[Description]

Check for name collision, and identify an allocatable slot. We need to hold ReplicationSlotControlLock in shared mode for this, so that nobody else can change the in_use flags while we're looking at them.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.38 16939

replication slots can only be used if max_replication_slots > 0.

[Description]

replication slots can only be used if max_replication_slots > 0

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.39 16940

replication slots can only be used if wal_level >= archive

[Description]

replication slots can only be used if wal_level >= archive

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.40 16941

replication slot "@1@" does not exist

[Description]

replication slot does not exist

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.41 16942

replication slot "@1@" is already active

[Description]

replication slot is already active

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.42 16943

replication slot "@1@" was not created in this database

[Description]

replication slot was not created in this database

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.43 16944

requested character not valid for encoding: @1@

[Description]

requested character not valid for encoding

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.44 16945

requested starting point @1@/@2@ is ahead of the WAL flush position of this server @3@/@4@

[Description]

requested starting point is ahead of the WAL flush position of this server

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.45 16946

requested starting point @1@/@2@ on timeline @3@ is not in this server's history

[Description]

requested starting point on timeline is not in this server's history

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.46 16947

requested timeline @1@ does not contain minimum recovery point @2@/@3@ on timeline @4@

[Description]

requested timeline does not contain minimum recovery point on timeline

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.47 16948

requested timeline @1@ is not a child of this server's history

[Description]

requested timeline is not a child of this server's history

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.48 16949

requested timeline @1@ is not in this server's history

[Description]

requested timeline is not in this server's history

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.49 16950

RETURNING list entry has type @1@, but column has type @2@.

[Description]

RETURNING list entry and column are of different types.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.50 16951

RETURNING must have at least one column

[Description]

RETURNING must have at least one column.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.51 16952

return type of inverse transition function @1@ is not @2@

[Description]

return type of inverse transition function must exactly match declared mtranstype

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.52 16953

row is too big: size @1@, maximum size @2@**[Description]**

row is too big.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.53 16954

ROWS FROM() with multiple functions cannot have a column definition list**[Description]**

ROWS FROM() with multiple functions cannot have a column definition list

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.54 16955

rules on materialized views are not supported**[Description]**

rules on materialized views are not supported

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.55 16956

@1@ cannot be applied to a function**[Description]**

cannot be applied to a function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.56 16957

@1@ cannot be applied to a join

[Description]

cannot be applied to a join

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.57 16958

@1@ cannot be applied to a WITH query

[Description]

cannot be applied to a WITH query

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.58 16959

@1@ cannot be applied to the nullable side of an outer join

[Description]

cannot be applied to the nullable side of an outer join

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.59 16960

@1@ cannot be applied to VALUES

[Description]

cannot be applied to VALUES

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.60 16961

@1@: cannot cluster specific table(s) in all databases

[Description]

cannot cluster specific table(s) in all databases

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.61 16962

@1@: cannot reindex specific index(es) and system catalogs at the same time

[Description]

cannot reindex specific index(es) and system catalogs at the same time

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.62 16963

@1@: cannot reindex specific index(es) in all databases

[Description]

cannot reindex specific index(es) in all databases

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.63 16964

@1@: cannot reindex specific table(s) and system catalogs at the same time

[Description]

cannot reindex specific table(s) and system catalogs at the same time

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.64 16965

@1@: cannot reindex specific table(s) in all databases

[Description]

cannot reindex specific table(s) in all databases

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.65 16966

@1@: cannot use --create-slot or --drop-slot together with --startpos

[Description]

cannot use create-slot or drop-slot together with startpos

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.66 16967

@1@: cannot use --create-slot or --start together with --drop-slot

[Description]

cannot use create-slot or start-slot together while doing a drop-slot

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.67 16968

@1@: cannot vacuum specific table(s) in all databases

[Description]

cannot vacuum specific table(s) in all databases

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.68 16969

@1@ can only be called in a sql_drop event trigger function

[Description]

can only be called in a sql_drop event trigger function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.69 16970

@1@: could not access directory "@2@": @3@

[Description]

Trouble in accessing directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.70 16971

@1@: could not allocate SIDs: error code @2@

[Description]

could not allocate security identifier(SID) and displays the last error returned by GetLastError().(GetLastError() is a windows specific call which returns one of the 500 System Error Codes)

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.71 16972

@1@: could not change permissions of directory "@2@": @3@

[Description]

could not change permissions of directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.72 16973

@1@: could not change permissions of "@2@": @3@

[Description]

Here chmod takes the PGPATH as path and options as S_IRUSR | S_IWUSR

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.73 16974

@1@: could not close directory "@2@": @3@

[Description]

closedir syscall called and errno set accordingly

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.74 16975

@1@: could not create archive status file "@2@": @3@

[Description]

This open syscall takes a temporary path name and flags O_WRONLY | O_CREAT | PG_BINARY and mode as S_IRUSR | S_IWUSR

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.75 16976

@1@: could not create replication slot "@2@": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields

[Description]

could not create replication slot as rows is not equal to 1 and fields is not greater than or equal to 4

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.76 16977

@1@: could not create symbolic link "@2@": @3@

[Description]

while creating symbolic path for a Xlog directory or tablespace path

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.77 16978

@1@: could not create timeline history file "@2@": @3@

[Description]

This open syscall takes a temporary path name and flags O_WRONLY | O_CREAT | PG_BINARY and mode as S_IRUSR | S_IWUSR

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.78 16979

@1@: could not drop replication slot "@2@": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields

[Description]

could not drop replication slot as rows and fields are not equal to zero

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.79 16980

@1@: could not fetch default options

[Description]

The function Pqconndefaults() Constructs a default connection options array, which identifies all the available options and shows any default values that are available from the environment etc. On error (eg out of memory), NULL is returned.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.80 16981

@1@: could not find own program executable

[Description]

find_my_exec() finds an absolute path to a valid executable

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.81 16982

@1@: could not fsync file "@2@": @3@

[Description]

could not fsync file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.82 16983

@1@: could not fsync log file "@2@": @3@

[Description]

could not fsync Log file.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.83 16984

@1@: could not identify system: got @2@ rows and @3@ fields, expected @4@ rows and @5@ or more fields

[Description]

Could not identify system as expected number of rows is not equal to 1 and number of fields is not greater than or equal to 3

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.84 16985

@1@: could not locate my own executable path

[Description]

find_my_exec() finds an absolute path to a valid executable

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.85 16986

@1@: could not open directory "@2@": @3@

[Description]

could not open directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.86 16987

@1@: could not open file "@2@": @3@

[Description]

could not open file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.87 16988

@1@: could not open log file "@2@": @3@

[Description]

could not open log file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.88 16989

@1@: could not open timeline history file "@2@": @3@

[Description]

could not open timeline history file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.89 16990

@1@: could not parse next timeline's starting point "@2@"

[Description]

could not parse next timeline's starting point

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.90 16991

@1@: could not parse start position "@2@"

[Description]

could not parse start position

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.91 16992

@1@: could not read directory "@2@": @3@

[Description]

could not read directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.92 16993

@1@: could not remove promote signal file "@2@": @3@

[Description]

could not remove promote signal file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.93 16994

@1@: could not rename file "@2@" to "@3@": @4@

[Description]

could not rename file(Here we move the completed history file into place with its final name)

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.94 16995

@1@: could not send copy-end packet: @2@

[Description]

PQputCopyEnd - send EOF indication to the backend during COPY IN. After calling this, use PQgetResult() to check command completion status. Returns 1 if successful, 0 if data could not be sent (only possible in nonblock mode), or -1 if an error occurs.

pqFlush - send any data waiting in the output buffer. Return 0 on success, -1 on failure and 1 when not all data could be sent because the socket would block and the connection is non-blocking.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.95 16996

@1@: could not stat file "@2@": @3@

[Description]

could not stat file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.96 16997

@1@: could not write timeline history file "@2@": @3@

[Description]

This write operation happens while Writing the history file to pg_xlog or Writing the history file to disk

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.66.97 16998

@1@: could not write @2@ bytes to log file "@3@": @4@**[Description]**

could not write the bytes to log file

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.66.98 16999

@1@: directory name too long**[Description]**

directory name too long

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67 Message Numbers Beginning with 17000

2.67.1 17000

@1@: directory "@2@" does not exist**[Description]**

directory does not exist,The errno ENOENT indicates that component of path does not exist, or path is an empty string.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.2 17001

@1@: directory "@2@" is not a database cluster directory**[Description]**

directory is not a database cluster directory

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.3 17002

SELECT rule's target entry @1@ has different column name from column "@2@"cluster directory

[Description]

resname is required to represent the correct column name in non-resjunk entries of top-level SELECT targetlists, since it will be used as the column title sent to the frontend.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.4 17003

SELECT target entry has type @1@, but column has type @2@.

[Description]

SELECT column does not match target entry

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.5 17004

ShmemIndex entry size is wrong for data structure "@1@": expected @2@, actual @3@

[Description]

ShmemIndex entry size is wrong for data structure.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.6 17005

@1@: incompatible server version @2@; client does not support streaming from server versions newer than @3@

[Description]

incompatible server version ,client does not support streaming from server .ServerMajor and maxServerMajor are calculated as follows; (serverMajor = PQserverVersion(conn) / 100 and maxServerMajor = PG_VERSION_NUM / 100;)where PG_VERSION_NUM is 90401 and PQserverVersion returns the sversion; /* server version, e.g. 70401 for 7.4.1 */

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.7 17006

@1@: incompatible server version @2@; client does not support streaming from server versions older than @3@

[Description]

incompatible server version ,client does not support streaming from server .ServerMajor and minServerMajor are calculated as follows;
(serverMajor = PQserverVersion(conn) / 100 and minServerMajor = 903;)where PQserverVersion returns the sversion; /* server version, e.g. 70401 for 7.4.1 */

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.8 17007

@1@: incompatible server version @2@

[Description]

incompatible server version; ServerMajor and maxServerMajor are calculated as follows;(minServerMajor = 903,serverMajor = PQserverVersion(conn) / 100 and maxServerMajor = PG_VERSION_NUM / 100;)where PG_VERSION_NUM is 90401 and PQserverVersion returns the sversion; /* server version, e.g. 70401 for 7.4.1 */

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.9 17008

@1@: invalid --max-rate unit: "@2@"

[Description]

after_num is obtained by passing src string to strtod

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.10 17009

@1@: invalid number of parallel jobs

[Description]

invalid number of parallel jobs

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.11 17010

@1@: invalid tablespace mapping format "@2@", must be "OLDDIR=NEWDIR"

[Description]

invalid tablespace mapping format

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.12 17011

@1@: invalid transfer rate "@2@": @3@

[Description]

invalid transfer rate

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.13 17012

@1@: invalid xlog-method option "@2@", must be "fetch" or "stream"

[Description]

invalid xlog-method option

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.14 17013

@1@ is not allowed with aggregate functions

[Description]

The return type of function LCS_asString is not allowed with aggregate functions. In this error case, the return type of LCS_asString is "FOR some"

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.15 17014

@1@ is not allowed with DISTINCT clause

[Description]

The return type of function LCS_asString is not allowed with aggregate functions. In this error case, the return type of LCS_asString is "FOR some"

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.16 17015

@1@ is not allowed with GROUP BY clause

[Description]

The return string of LCS_asString() is not allowed with GROUP BY clause

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.17 17016

@1@ is not allowed with HAVING clause

[Description]

The return string of LCS_asString() is not allowed with HAVING clause

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.18 17017

@1@ is not allowed with set-returning functions in the target list

[Description]

The return string of LCS_asString() is not allowed with set-returning functions in the target list

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.19 17018

@1@ is not allowed with UNION/INTERSECT/EXCEPT

[Description]

The return string of LCS_asString() is not allowed with UNION/INTERSECT/EXCEPT

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.20 17019

@1@ is not allowed with window functions

[Description]

The return string of LCS_asString() is not allowed with window functions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.21 17020

"@1@" is not a materialized view

[Description]

The Relation that is returned by RelationGetRelationName() is not a materialized view

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.22 17021

@1@ is not an ordered-set aggregate, so it cannot have WITHIN GROUP

[Description]

Normal aggregate, so it can't have WITHIN GROUP

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.23 17022

"@1@" is not a table, materialized view, composite type, or foreign table

[Description]

If the particular relation is not a table, materialized view, composite type, or foreign table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.24 17023

"@1@" is not a table, materialized view, index, or foreign table

[Description]

The relation returned by the function RelationGetRelationName() is not a table, materialized view, index, or foreign table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.25 17024

"@1@" is not a table, materialized view, or index

[Description]

The relation is not a table, materialized view, or index

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.26 17025

"@1@" is not a table or materialized view

[Description]

The relation is not a table or materialized view

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.27 17026

"@1@" is not a table, view, materialized view, composite type, index, or foreign table

[Description]

The relation is not a table, view, materialized view, composite type, index, or foreign table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.28 17027

"@1@" is not a table, view, materialized view, composite type, or foreign table

[Description]

The relation is not a table, view, materialized view, composite type, or foreign table.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.29 17028

"@1@" is not a table, view, materialized view, index, or TOAST table

[Description]

The relation is not a table, view, materialized view, index, or TOAST table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.30 17030

"@1@" is not a table, view, materialized view, sequence, or foreign table

[Description]

The relation is not a table, view, materialized view, sequence, or foreign table. Note: Don't allow ALTER TABLE. SET SCHEMA on relations that can't be moved to a different schema, such as indexes and TOAST tables.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.31 17031

"@1@" is not a table, view, or foreign table

[Description]

The relation is not a table, view, or foreign table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.32 17032

"@1@" is not a table, view, sequence, or foreign table

[Description]

The relation is not a table, view, sequence, or foreign table

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.33 17033

@1@ must specify unqualified relation names

[Description]

The return type of LCS_asString() must specify unqualified relation names

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.34 17034

snapbuild state file @1@: checksum mismatch, is @2@, should be @3@

[Description]

snapbuild state file : checksum mismatch

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.35 17035

snapbuild state file "@1@" has unsupported version @2@ instead of @3@**[Description]**

snapbuild state file has unsupported version.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.36 17036

snapbuild state file "@1@" has wrong magic @2@ instead of @3@**[Description]**

snapbuild state file has wrong magic number

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.37 17037

@1@: new directory is not an absolute path in tablespace mapping: @2@**[Description]**

new directory is not an absolute path in tablespace mapping

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.38 17038

@1@: no database specified**[Description]**

no database specified for the given program name

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.39 17039

@1@: no slot specified

[Description]

no slot specified for the given program name

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.40 17040

SP-GiST inner tuple size @1@ exceeds maximum @2@

[Description]

SPGiST leaf tuple carries a datum and a heap tuple TID. Inner tuple should be small enough to fit on a page. Values larger than a buffer page cannot be indexed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.41 17041

SSL failed to renegotiate connection before limit expired

[Description]

SSL failed to renegotiate connection before limit expired

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.42 17042

@1@: symlinks are not supported on this platform

[Description]

symlinks are not supported on this platform . Note : Define to 1 if you have the `symlink' function.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.43 17043

@1@: transaction log directory location can only be specified in plain mode

[Description]

transaction log directory location can only be specified in plain mode

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.44 17044

@1@: transaction log directory location must be an absolute path

[Description]

transaction log directory location must be an absolute path

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.45 17045

@1@: transfer rate must be greater than zero

[Description]

transfer rate must be greater than zero

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.46 17046

@1@: transfer rate "@2@" exceeds integer range

[Description]

transfer rate exceeds integer range

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.47 17047

@1@: transfer rate "@2@" is not a valid value

[Description]

transfer rate is not a valid value Note: The second parameter is a out - parameter.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.48 17049

strictness of aggregate's forward and inverse transition functions must match

[Description]

strictness of aggregate's forward and inverse transition functions must match. Note: Insist that forward and inverse transition functions have the same strictness setting. Allowing them to differ would require handling more special cases in `advance_windowaggregate` and `advance_windowaggregate_base`, for no discernible benefit. This should have been checked at agg definition time, but we must check again in case either function's strictness property has been changed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.49 17050

string too long to represent as jsonb string

[Description]

string too long to represent as jsonb string. Note :Due to an implementation restriction, jsonb strings cannot exceed 0x0FFFFFFF

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.50 17051

@1@: unexpected response to TIMELINE_HISTORY command: got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields

[Description]

unexpected response to TIMELINE_HISTORY command. Note: The response to TIMELINE_HISTORY is a single row result set with two fields: filename and content

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.51 17052

@1@: unexpected result set after end-of-timeline: got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields

[Description]

unexpected result set after end-of-timeline

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.52 17053

[@1@: WAL streaming can only be used in plain mode](#)

[Description]

WAL streaming can only be used in plain mode

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.53 17054

[system column "@1@" reference in check constraint is invalid](#)

[Description]

system column reference in check constraint is invalid

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.54 17055

[time field value out of range: @1@:@2@:@3@](#)

[Description]

time field value out of range

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.55 17056

[timestamp out of range: @1@-@2@-@3@ @4@:@5@:@6@](#)

[Description]

timestamp out of range

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.56 17057

too many background workers

[Description]

too many background workers

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.57 17058

too many column names were specified

[Description]

too many column names were specified

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.58 17059

too many dynamic shared memory segments

[Description]

too many dynamic shared memory segments

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.59 17060

too many lexemes in thesaurus entry

[Description]

too many lexemes in thesaurus entry. Note: currently, tsearch_readline can't return lines exceeding 4KB,so overflow of the word counts is impossible.But that may not always be true, so let's check.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.60 17061

too many replication slots active before shutdown

[Description]

too many replication slots active before shutdown

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.61 17062

total size of jsonb array elements exceeds the maximum of @1@ bytes

[Description]

Total size of jsonb array elements exceeds the maximum of 0xFFFFFFFF bytes

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.62 17063

total size of jsonb object elements exceeds the maximum of @1@ bytes

[Description]

total size of jsonb object elements exceeds the maximum of 0xFFFFFFFFbytes

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.63 17064

tuple to be updated was already modified by an operation triggered by the current command

[Description]

tuple to be updated was already modified by an operation triggered by the current command

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.64 17065

type modifier cannot have ORDER BY

[Description]

type modifier cannot have ORDER BY

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.65 17066

"TZ"/"tz"/"OF" format patterns are not supported in to_date

[Description]

format patterns are not supported in to_date

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.66 17067

\\u0000 cannot be converted to text.

[Description]

\\u0000 cannot be converted to text. Note: The function report_json_context() reports a CONTEXT line for bogus JSON input.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.67 17068

Unexpected array element.

[Description]

Unexpected array element.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.68 17070

unexpected pageaddr @1 @/@2@ in log segment @3@, offset @4@

[Description]

unexpected pageaddr in log segment offset

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.69 17071

unexpected previous timeline ID @1@ (current timeline ID @2@) in checkpoint record

[Description]

unexpected previous timeline ID in checkpoint record

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.70 17072

unexpected result after CommandComplete: @1@

[Description]

unexpected result after CommandComplete

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.71 17073

unexpected result set after end-of-streaming

[Description]

unexpected result set after end-of-streaming

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.72 17074

unexpected result status for \watch

[Description]

unexpected result status for \ watch

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.73 17075

unexpected standby message type "@1@", after receiving CopyDone

[Description]

unexpected standby message type ,after receiving CopyDone . Note :If we already received a CopyDone from the frontend, the frontend should not send us anything until we've closed our end of the COPY.XXX: In theory, the frontend could already send the next command before receiving the CopyDone, but libpq doesn't currently allow that.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.74 17076

unexpected timeline ID @1@ in checkpoint record, before reaching minimum recovery point @2@/@3@ on timeline @4@

[Description]

unexpected timeline ID %u in checkpoint record, before reaching minimum recovery point %X/%X on timeline %u

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.75 17077

unexpected timeline ID @1@ in log segment @2@, offset @3@

[Description]

unexpected timeline ID in log segment.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.76 17078

Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8.

[Description]

Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.77 17079

Unicode high surrogate must not follow a high surrogate.

[Description]

Unicode high surrogate must not follow a high surrogate.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.78 17080

Unicode low surrogate must follow a high surrogate.

[Description]

Unicode low surrogate must follow a high surrogate.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.79 17081

UNNEST() with multiple arguments cannot have a column definition list

[Description]

UNNEST() with multiple arguments cannot have a column definition list

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.80 17082

unsupported LDAP URL scheme: @1@

[Description]

unsupported LDAP URL scheme

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.81 17083

unsupported Unicode escape sequence

[Description]

unsupported Unicode escape sequence

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.82 17084

unterminated format specifier

[Description]

unterminated format specifier

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.83 17085

UTC timezone offset is out of range.

[Description]

UTC timezone offset is out of range.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.84 17086

variable "@1@" shadows a previously defined variable

[Description]

shadows a previously defined variable

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.85 17087

VARIADIC argument must be an array

[Description]

VARIADIC argument must be an array

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.86 17088

\watch cannot be used with an empty query

[Description]

watch cannot be used with an empty query.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.87 17089

\watch cannot be used with COPY

[Description]

watch cannot be used with COPY

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.88 17090

WHERE CURRENT OF is not supported for this table type

[Description]

WHERE CURRENT OF is not supported for this table type

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.89 17091

window functions are not allowed in check constraints

[Description]

window functions are not allowed in check constraints.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.90 17092

window functions are not allowed in DEFAULT expressions

[Description]

window functions are not allowed in DEFAULT expressions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.91 17093

window functions are not allowed in EXECUTE parameters

[Description]

window functions are not allowed in EXECUTE parameters

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.92 17094

window functions are not allowed in functions in FROM

[Description]

window functions are not allowed in functions in FROM

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.93 17095

window functions are not allowed in index expressions

[Description]

window functions are not allowed in index expressions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.94 17096

window functions are not allowed in index predicates

[Description]

window functions are not allowed in index predicates

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.95 17097

window functions are not allowed in JOIN conditions

[Description]

window functions are not allowed in JOIN conditions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.96 17098

window functions are not allowed in @1@

[Description]

window functions are not allowed in expression kind

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.97 17099

window functions are not allowed in transform expressions

[Description]

window functions are not allowed in transform expressions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68 Message Numbers Beginning with 17100

2.68.1 17100

window functions are not allowed in trigger WHEN conditions

[Description]

window functions are not allowed in trigger WHEN conditions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.2 17101

window functions are not allowed in window definitions

[Description]

window functions are not allowed in window definitions

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.3 17102

window function @1@ cannot have WITHIN GROUP

[Description]

window function cannot have WITHIN GROUP Note:And, per spec, WITHIN GROUP isn't allowed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.4 17103

window function @1@ requires an OVER clause

[Description]

window function requires an OVER clause. Note: True window functions must be called with a window definition.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.5 17104

WITH CHECK OPTION is supported only on automatically updatable views

[Description]

WITH CHECK OPTION is supported only on automatically updatable views

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.6 17105

WITH CHECK OPTION not supported on recursive views

[Description]

WITH CHECK OPTION not supported on recursive views

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.7 17106

WITHIN GROUP is required for ordered-set aggregate @1@

[Description]

WITHIN GROUP is required for ordered-set aggregate

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.8 17107

WITHIN GROUP specified, but @1@ is not an aggregate function

[Description]

WITHIN GROUP specified, but the function is not an aggregate function

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.9 17108

WITH ORDINALITY cannot be used with a column definition list

[Description]

WITH ORDINALITY cannot be used with a column definition list

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.10 17109

tablespace encryption algorithm option can not be changed

[Description]

tablespace_encryption_algorithm option can not be changed with alter tablespace.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.11 17110

result of USING clause for column "@1@" cannot be cast automatically to type @2@

[Description]

USING clause column value cannot be typecasted automatically to new column type specified.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.12 17111

could not parse contents of file "@1@"

[Description]

Postgresql auto configuration file cannot be parsed

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.13 17115

could not change directory to "@1@": @2@

[Description]

pg_resetxlog process cannot change the directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.14 17116

pclose failed: @1@

[Description]

pclose system call failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.15 17117

cannot duplicate null pointer (internal error)

[Description]

Null pointer cannot be duplicated

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.16 17118

out of memory

[Description]

Process runs out of memory

[System Processing]

Process aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.17 17119

cannot create restricted tokens on this platform

[Description]

Restricted Tokens cannot be created

[System Processing]

WARNING is issued

[Action]

To investigate the cause of the occurrence from the message, and remove cause for the WARNING.

2.68.18 17120

could not open process token: error code @1@

[Description]

Cannot open the process Token

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.19 17121

could not allocate SIDs: error code @1@

[Description]

Cannot allocate the SIDs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.20 17122

could not create restricted token: error code @1@

[Description]

Restricted token could not be created

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.21 17123

could not start process for command "@1@": error code @2@

[Description]

Process could not be started

[System Processing]

Processing could not be initiated

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.22 17124

could not re-execute with restricted token: error code @1@

[Description]

Restricted Token cannot be re-executed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.23 17125

could not get exit code from subprocess: error code @1@

[Description]

Cannot exit from the sub process

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.24 17126

user does not exist

[Description]

user does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.25 17127

user name lookup failure: error code @1@

[Description]

user does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.26 17128

command not found

[Description]

Command cannot be found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.27 17129

command not executable

[Description]

Command is not executable

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.28 17130

could not determine encoding for codeset "@1@"

[Description]

Corresponding local could not found in PostgreSQL

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.29 17131

could not get junction for "@1@": @2@

[Description]

could not get junction

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.30 17132

could not get junction for "@1@": @2@

[Description]

could not get junction

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.31 17133

lock violation

[Description]

Antivirus software or some other similar software has locked the database file

[System Processing]

Process trying to access the file continues and retries after every 30 seconds

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.32 17134

sharing violation

[Description]

Antivirus software or some other similar software has locked the database file

[System Processing]

Process trying to access the file continues and retries after every 30 seconds

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.33 17135

could not get current working directory: @1@**[Description]**

The current working directory path cannot be found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.34 17138

index row size @1@ exceeds maximum @2@ for index "@3@"**[Description]**

The row size of the Index exceeded the maximum limit

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.35 17139

unexpected page type 0x@1@ in BRIN index "@2@" block @3@**[Description]**

Unexpected page type in BRIN index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.36 17141

invalid value for "tablespace encryption algorithm" option**[Description]**

Value specified for tablespace encryption algorithm is invalid. Acceptable values are \"none\", \"AES128\" and \"AES256\".

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.37 17142

invalid value for "buffering" option

[Description]

Invalid value provided for reoption on buffering of Gist Indexes. Acceptable valid values are \"on\", \"off\", and \"auto\"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.38 17143

cannot access temporary tables during a parallel operation

[Description]

Temporary tables cannot be accessed during parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.39 17144

cannot insert tuples during a parallel operation

[Description]

Tuples cannot be inserted during the parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.40 17146

attempted to delete invisible tuple

[Description]

An attempt has been made to delete an invisible tuple

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.41 17147

cannot update tuples during a parallel operation

[Description]

Tuples cannot be updated during the parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.42 17148

attempted to update invisible tuple

[Description]

An attempt has been made to update an invisible tuple

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.43 17149

could not truncate file "@1@" to @2@: @3@

[Description]

File could not be truncated due to inaccessibility of the file or file's location

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.44 17150

index "@1@" contains a half-dead internal page

[Description]

Index page is corrupted. This is no harm for processes performing searches. This can be fixed by RE-INDEXING.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.45 17151

sample percentage must be between 0 and 100

[Description]

Sample percentage for sample scan must be between 0 and 100

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.46 17152

cannot retrieve commit timestamp for transaction @1@

[Description]

Cannot retrieve commit timestamp for uncommitted transactions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.47 17153

could not get commit timestamp data

[Description]

Could not get commit timestamp data. "track_commit_timestamp" parameter must be configured

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.48 17154

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database "@1@"

[Description]

Database is not accepting any commands due to transaction wrap around issue. This can be fixed by vacuuming the database and committing/rolling-back the old unfinished prepared transactions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.49 17155

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database with OID @1@

[Description]

Database is not accepting any commands due to transaction wrap around issue. This can be fixed by vacuuming the database and committing/rolling-back the old unfinished prepared transactions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.50 17156

multixact "members" limit exceeded

[Description]

Multixact members limit exceeded.

Execute a database-wide VACUUM in database with OID %u with reduced vacuum_multixact_freeze_min_age and vacuum_multixact_freeze_table_age settings.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.51 17157

MultiXactId @1 @ does no longer exist -- apparent wraparound

[Description]

MultiXactID does not exist. Transaction wrap around completed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.52 17158

MultiXactId @1 @ has not been created yet -- apparent wraparound

[Description]

multixactId has not been created. Possible transaction wrap around has happend.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.53 17160

postmaster exited during a parallel transaction

[Description]

postmaster exited during a parallel transaction

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.54 17165

cannot PREPARE a transaction that has exported snapshots

[Description]

cannot PREPARE a transaction that has exported snapshots

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.55 17166

cannot commit during a parallel operation

[Description]

cannot commit during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.56 17167

cannot abort during a parallel operation

[Description]

cannot during during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.57 17168

cannot define savepoints during a parallel operation

[Description]

cannot define savepoints during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.58 17169

cannot release savepoints during a parallel operation

[Description]

cannot release savepoints during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.59 17170

cannot rollback to savepoints during a parallel operation

[Description]

cannot rollback to savepoints during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.60 17171

cannot start subtransactions during a parallel operation

[Description]

cannot start subtransactions during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.61 17172

cannot commit subtransactions during a parallel operation

[Description]

cannot commit subtransactions during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.62 17174

new timeline @1@ forked off current database system timeline @2@ before current recovery point @3@/ @4@

[Description]

new timeline %u forked off current database system timeline %u before current recovery point %X/%X

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.63 17178

requested timeline @1@ does not contain minimum recovery point @2@/ @3@ on timeline @4@

[Description]

minimum recovery point must be part of requested timeline's history

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.64 17179

This means that the backup is corrupted and you will have to use another backup for recovery.

[Description]

This means that the backup is corrupted and you will have to use another backup for recovery

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.65 17180

unexpected previous timeline ID @1@ (current timeline ID @2@) in checkpoint record

[Description]

unexpected previous timeline ID in checkpoint record. Check that the checkpoint record agrees with the current time line.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.66 17181

unexpected timeline ID @1@ in checkpoint record, before reaching minimum recovery point @2@/@3@ on timeline @4@

[Description]

unexpected timeline ID in checkpoint record, before reaching minimum recovery point on timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.67 17182

could not fsync log file @1@: @2@

[Description]

could not fsync the log file. Check that the file exists and is available/accessible with appropriate permissions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.68 17183

could not stat promote trigger file "@1@": @2@

[Description]

Could not stat trigger file. Checking for the existence of trigger file. ensure that the trigger file exists with appropriate permissions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.69 17184

invalid privilege type @1@ for type

[Description]

invalid privilege type for object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.70 17185

invalid privilege type @1@ for column

[Description]

invalid privilege type for the column

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.71 17186

permission denied for event trigger @1@

[Description]

permission denied on the trigger

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.72 17187

event trigger with OID @1@ does not exist

[Description]

Trigger being accessed does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.73 17188

constant of the type @1@ cannot be used here

[Description]

constant of the type regrole cannot be used here

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.74 17189

pg_class index OID value not set when in binary upgrade mode

[Description]

pg_class index OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.75 17190

could not obtain lock on relation "@1@"

[Description]

Lock on a relation could not be obtained. Check the blocking process

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.76 17191

cannot create temporary tables during a parallel operation

[Description]

cannot create temporary tables in parallel mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.77 17197

"@1@" is not a materialized view

[Description]

The object type being accessed is not a materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.78 17198

default value for column "@1@" of relation "@2@" does not exist

[Description]

default value for column of relation does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.79 17199

operator @1@ (@2@, @3@) of @4@ does not exist

[Description]

operator does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69 Message Numbers Beginning with 17200

2.69.1 17200

function @1@ (@2@, @3@) of @4@ does not exist

[Description]

function being accessed does not exist. Check if the function is existing with appropriate permissions and search_path settings

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.2 17201

user mapping for user "@1@" on server "@2@" does not exist

[Description]

user mapping for user in server does not exist. Check the mapping user while creating foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.3 17202

unrecognized default ACL object type "@1@"

[Description]

ACL object type is unrecognized. Valid object types are "r", "S", "f", and "T"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.4 17203

default ACL for user "@1@" in schema "@2@" on @3@ does not exist

[Description]

default ACL for user in schema on does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.5 17204

default ACL for user "@1@" on @2@ does not exist

[Description]

default ACL for user on does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.6 17205

name or argument lists may not contain nulls

[Description]

name or argument lists may not contain nulls

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.7 17206

unsupported object type "@1@"

[Description]

unsupported object type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.8 17207

name list length must be exactly @1@

[Description]

name list length must be exactly 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.9 17208

large object OID may not be null

[Description]

large object OID may not be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.10 17210

argument list length must be exactly @1@

[Description]

argument list length must be exactly 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.11 17211

name list length must be at least @1@

[Description]

name list length must be at least 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.12 17212

unrecognized object type "@1@"

[Description]

unrecognized object type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.13 17213

aggregates cannot have more than @1@ argument

[Description]

aggregates cannot have more than 1 argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.14 17215

a variadic ordered-set aggregate must use VARIADIC type ANY

[Description]

a variadic ordered-set aggregate must use VARIADIC type ANY

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.15 17216

a hypothetical-set aggregate must have direct arguments matching its aggregated arguments

[Description]

a hypothetical-set aggregate must have direct arguments matching its aggregated arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.16 17218

strictness of aggregate's forward and inverse transition functions must match

[Description]

strictness of aggregate's forward and inverse transition functions must match

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.17 17219

final function with extra arguments must not be declared STRICT

[Description]

final function with extra arguments must not be declared STRICT

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.18 17220

moving-aggregate implementation returns type @1@, but plain implementation returns type @2@

[Description]

moving-aggregate implementation returns type one type but plain implementation returns type other type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.19 17221

function @1@ must accept VARIADIC ANY to be used in this aggregate

[Description]

The function must accept VARIADIC ANY to be used in this aggregate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.20 17222

constraint "@1@" for domain @2@ does not exist

[Description]

The constraint for domain does not exist. Check the constraint name

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.21 17223

enum label "@1@" already exists

[Description]

enum label already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.22 17224

pg_enum OID value not set when in binary upgrade mode

[Description]

pg_enum OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.23 17225

pg_type OID value not set when in binary upgrade mode

[Description]

pg_type OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.24 17226

"@1@" is not a table or materialized view

[Description]

The object referenced by pgstattuple utility is not a table or materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.25 17227

only ordered-set aggregates can be hypothetical

[Description]

only ordered-set aggregates can be hypothetical

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.26 17228

aggregate msfunc must be specified when mstype is specified

[Description]

aggregate msfunc must be specified when mstype is specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.27 17229

aggregate minvfunc must be specified when mstype is specified

[Description]

aggregate minvfunc must be specified when mstype is specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.28 17230

aggregate msfunc must not be specified without mstype

[Description]

aggregate msfunc must not be specified without mstype

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.29 17231

aggregate minvfunc must not be specified without mstype

[Description]

aggregate minvfunc must not be specified without mstype

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.30 17232

aggregate msspace must not be specified without mstype

[Description]

aggregate msspace must not be specified without mstype

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.31 17233

aggregate minitcond must not be specified without mstype

[Description]

aggregate minitcond must not be specified without mstype

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.32 17234

event trigger "@1@" already exists

[Description]

event trigger already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.33 17236

could not write to COPY program: @1@

[Description]

could not write to COPY program: %m

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.34 17237

must be superuser to COPY to or from an external program

[Description]

Only superuser can COPY to or from an external program

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.35 17238

COPY FROM not supported with row-level security

[Description]

COPY FROM an external file is not supported when row level security is enabled. Use INSERT statements instead

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.36 17239

COPY force null available only in CSV mode

[Description]

COPY force null available only in CSV mod

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.37 17240

COPY force null only available using COPY FROM

[Description]

COPY force null only available using COPY FROM

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.38 17241

relation referenced by COPY statement has changed

[Description]

relation referenced by COPY statement has changed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.39 17242

could not close pipe to external command: @1@

[Description]

could not close pipe to external command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.40 17243

program "@1@" failed

[Description]

program has failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.41 17244

could not execute command "@1@": @2@**[Description]**

could not execute command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.42 17245

cannot copy to materialized view "@1@"**[Description]**

cannot copy to materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.43 17246

cannot perform COPY FREEZE because of prior transaction activity**[Description]**

cannot perform FREEZE because of prior transaction activity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.44 17247

cannot perform COPY FREEZE because the table was not created or truncated in the current subtransaction**[Description]**

cannot perform FREEZE because the table was not created or truncated in the current subtransaction

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.45 17248

too many column names were specified

[Description]

too many column names were specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.46 17249

policies not yet implemented for this command

[Description]

policies not yet implemented for this command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.47 17250

invalid locale name: "@1@"

[Description]

Check if the locale name mentioned is correct.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.48 17251

database "@1@" is used by an active logical replication slot

[Description]

The database referenced is used by a logical replication slot.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.49 17252

option "@1@" cannot be specified with other options

[Description]

When invoking alter database command option cannot be specified with other options

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.50 17253

cannot disallow connections for current database

[Description]

cannot disallow connections for current database

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.51 17254

permission denied to create event trigger "@1@"

[Description]

Permission denied to create event trigger. Must be superuser to create an event trigger. Check permissions on trigger

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.52 17255

unrecognized event name "@1@"

[Description]

Unrecognized event name. Acceptable event name must be provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.53 17256

unrecognized filter variable "@1@"

[Description]

unrecognized filter variable

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.54 17259

event triggers are not supported for @1@

[Description]

event triggers are not supported for certain type of SQL statements

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.55 17260

filter variable "@1@" specified more than once

[Description]

filter variable specified more than once

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.56 17261

event trigger "@1@" does not exist

[Description]

Referenced event trigger does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.57 17262

permission denied to change owner of event trigger "@1@"

[Description]

permission denied to change owner of event trigger. The owner of an event trigger must be a superuser

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.58 17263

@1@ can only be called in a sql_drop event trigger function

[Description]

The function `pg_event_trigger_dropped_objects()` can only be called in a `sql_drop` event trigger function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.59 17264

@1@ can only be called in a table_rewrite event trigger function

[Description]

The function `pg_event_trigger_table_rewrite_oid()` can only be called in a `table_rewrite` event trigger function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.60 17265

@1@ can only be called in an event trigger function

[Description]

The function `pg_event_trigger_ddl_commands()` can only be called in a event trigger function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.61 17267

aggregates cannot accept set arguments

[Description]

aggregates cannot accept set arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.62 17268

transform function must not be volatile

[Description]

transform function must not be volatile

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.63 17269

transform function must not be an aggregate function

[Description]

transform function must not be an aggregate function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.64 17270

transform function must not be a window function

[Description]

transform function must not be a window function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.65 17271

transform function must not return a set

[Description]

transform function must not return a set

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.66 17272

transform function must take one argument

[Description]

transform function must take one argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.67 17273

first argument of transform function must be type @1@

[Description]

first argument of transform function must be type internal

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.68 17274

data type @1@ is a pseudo-type

[Description]

data type referenced is a pseudo-type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.69 17275

data type @1@ is a domain

[Description]

data type is a domain

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.70 17276

return data type of FROM SQL function must be @1@

[Description]

return data type of FROM SQL function must be internal

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.71 17277

return data type of TO SQL function must be the transform data type

[Description]

return data type of TO SQL function must be the transform data type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.72 17278

transform for type @1@ language "@2@" already exists

[Description]

transform for type language already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.73 17279

transform for type @1@ language "@2@" does not exist

[Description]

transform for type language does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.74 17280

operator class "@1@" does not exist for access method "@2@"

[Description]

operator class does not exist for access method

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.75 17281

CONCURRENTLY cannot be used when the materialized view is not populated

[Description]

CONCURRENTLY cannot be used when the materialized view is not populated

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.76 17282

CONCURRENTLY and WITH NO DATA options cannot be used together

[Description]

CONCURRENTLY and WITH NO DATA options cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.77 17283

new data for materialized view "@1@" contains duplicate rows without any null columns

[Description]

new data for materialized view contains duplicate rows without any null columns

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.78 17284

WITH CHECK cannot be applied to SELECT or DELETE

[Description]

WITH CHECK cannot be applied to SELECT or DELETE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.79 17285

only WITH CHECK expression allowed for INSERT

[Description]

only WITH CHECK expression allowed for INSERT

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.80 17286

policy "@1@" for table "@2@" already exists

[Description]

policy attempted to create for table already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.81 17287

policy "@1@" for table "@2@" does not exist

[Description]

Policy being attempted to alter does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.82 17288

only USING expression allowed for SELECT, DELETE

[Description]

only USING expression allowed for SELECT, DELETE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.83 17289

referenced relation "@1@" is not a table or foreign table

[Description]

Relation referenced by CREATE OR ALTER TABLE is not a regular table or foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.84 17290

materialized view "@1@" does not exist

[Description]

materialized view \"%s\" does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.85 17291

Use DROP MATERIALIZED VIEW to remove a materialized view.

[Description]

Use DROP MATERIALIZED VIEW to remove a materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.86 17293

inherited constraint "@1@" must be renamed in child tables too

[Description]

inherited constraint must be renamed in child tables too

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.87 17294

cannot rename inherited constraint "@1@"

[Description]

cannot rename inherited constraint

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.88 17295

cannot rewrite table "@1@" used as a catalog table

[Description]

cannot rewrite table used as a catalog table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.89 17296

"@1@" is not a table, view, or foreign table

[Description]

this is not a table, view, or foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.90 17297

"@1@" is not a table, view, materialized view, or index

[Description]

object referenced is not a table, view, materialized view, or index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.91 17298

"@1@" is not a table, materialized view, or foreign table

[Description]

object referenced is not of a type table, materialized view, or foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.92 17299

constraint "@1@" of relation "@2@" is not a foreign key or check constraint

[Description]

constraint of relation is not a foreign key or check constraint

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70 Message Numbers Beginning with 17300

2.70.1 17301

"@1@" is not a table, view, sequence, or foreign table

[Description]

object type is not a table, view, sequence, or foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.2 17302

WITH CHECK OPTION is supported only on automatically updatable views

[Description]

WITH CHECK OPTION is supported only on automatically updatable views

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.3 17303

only tables, indexes, and materialized views exist in tablespaces

[Description]

only tables, indexes, and materialized views exist in tablespaces

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.4 17304

cannot move relations in to or out of pg_global tablespace

[Description]

cannot move relations in to or out of pg_global tablespace

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.5 17305

aborting because lock on relation "@1@.@2@" is not available

[Description]

aborting because lock on relation is not available

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.6 17306

no matching relations in tablespace "@1@" found

[Description]

no matching relations in tablespace found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.7 17307

invalid page in block @1@ of relation @2@

[Description]

invalid page in block of relation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.8 17308

cannot use non-unique index "@1@" as replica identity

[Description]

cannot use non-unique index as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.9 17309

cannot use non-immediate index "@1@" as replica identity

[Description]

cannot use non-immediate index as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.10 17310

cannot use expression index "@1@" as replica identity

[Description]

cannot use expression index as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.11 17311

cannot use partial index "@1@" as replica identity

[Description]

cannot use partial index \"%s\" as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.12 17312

cannot use invalid index "@1@" as replica identity

[Description]

cannot use invalid index as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.13 17313

index "@1@" cannot be used as replica identity because column "@2@" is nullable

[Description]

index \"%s\" cannot be used as replica identity because column \"%s\" is nullable

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.14 17319

could not create an encrypted tablespace because the keystore is not open

[Description]

could not create an encrypted tablespace because the keystore is not open. Open the existing keystore, or set the master encryption key to create and open a new keystore

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.15 17321

tablespace encryption algorithm option cannot be changed

[Description]

tablespace encryption algorithm option cannot be changed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.16 17323

Foreign tables cannot have INSTEAD OF triggers.

[Description]

Foreign tables cannot have INSTEAD OF triggers.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.17 17326

tuple to be updated was already modified by an operation triggered by the current command

[Description]

tuple to be updated was already modified by an operation triggered by the current command. Consider using an AFTER trigger instead of a BEFORE trigger to propagate changes to other rows

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.18 17327

function @1@ should return type @2@

[Description]

function should return an acceptable type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.19 17328

check constraints for domains cannot be marked NO INHERIT

[Description]

check constraints for domains cannot be marked NO INHERIT

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.20 17329

range subtype cannot be @1 @

[Description]

range subtype cannot be of psuedo type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.21 17330

range canonical function @1 @ must return range type

[Description]

range canonical function must return range type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.22 17331

pg_type array OID value not set when in binary upgrade mode

[Description]

pg_type array OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.23 17332

constraint "@1@" of domain "@2@" is not a check constraint

[Description]

constraint of domain is not a check constraint

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.24 17333

constraint "@1@" for domain "@2@" already exists

[Description]

constraint for domain already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.25 17334

must be superuser to change bypassrls attribute

[Description]

must be superuser to change bypassrls attribute

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.26 17335

pg_authid OID value not set when in binary upgrade mode

[Description]

pg_authid OID value not set when in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.27 17336

must be superuser to alter settings globally

[Description]

must be superuser to alter settings globally

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.28 17338

@1@ cannot be executed from VACUUM or ANALYZE

[Description]

commands VACUUM or ANALYZE cannot be executed from VACUUM or ANALYZE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.29 17339

invalid value for "check_option" option

[Description]

invalid value for "check_option" option. Valid values are "local" and "cascaded".

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.30 17340

ON CONFLICT does not support deferrable unique constraints/exclusion constraints as arbiters

[Description]

ON CONFLICT does not support deferrable unique constraints/exclusion constraints as arbiters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.31 17341

cannot change materialized view "@1@"

[Description]

cannot change materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.32 17342

cannot insert into foreign table "@1@"

[Description]

cannot insert into foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.33 17343

foreign table "@1@" does not allow inserts

[Description]

foreign table \"%s\" does not allow inserts

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.34 17344

cannot update foreign table "@1@"

[Description]

cannot update foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.35 17345

foreign table "@1@" does not allow updates

[Description]

foreign table does not allow updates

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.36 17346

cannot delete from foreign table "@1@"

[Description]

cannot delete from foreign table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.37 17347

foreign table "@1@" does not allow deletes

[Description]

foreign table does not allow deletes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.38 17348

cannot lock rows in materialized view "@1@"

[Description]

cannot lock rows in materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.39 17349

new row violates check option for view "@1@"

[Description]

new row violates check option for view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.40 17350

new row violates row-level security policy "@1@" for table "@2@"

[Description]

new row violates row-level security policy for table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.41 17351

new row violates row-level security policy for table "@1@"

[Description]

new row violates row-level security policy for table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.42 17352

new row violates row-level security policy "@1@" (USING expression) for table "@2@"

[Description]

new row violates row-level security policy (USING expression) for table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.43 17353

new row violates row-level security policy (USING expression) for table "@1@"

[Description]

new row violates row-level security policy (USING expression) for table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.44 17354

WHERE CURRENT OF is not supported for this table type

[Description]

WHERE CURRENT OF is not supported for this table type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.45 17355

materialized view "@1@" has not been populated

[Description]

materialized view has not been populated. Use the REFRESH MATERIALIZED VIEW command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.46 17356

custom scan "@1@" does not support MarkPos

[Description]

custom-scan does not support MarkPos

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.47 17357

lossy distance functions are not supported in index-only scans

[Description]

lossy distance functions are not supported in index-only scans

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.48 17358

ON CONFLICT DO UPDATE command cannot affect row a second time

[Description]

ON CONFLICT DO UPDATE command cannot affect row a second time. Ensure that no rows proposed for insertion within the same command have duplicate constrained values

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.49 17359

TABLESAMPLE parameter cannot be null

[Description]

TABLESAMPLE parameter cannot be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.50 17360

TABLESAMPLE REPEATABLE parameter cannot be null

[Description]

TABLESAMPLE REPEATABLE parameter cannot be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.51 17361

moving-aggregate transition function must not return null

[Description]

moving-aggregate transition function must not return null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.52 17362

could not open configuration directory "@1@": @2@

[Description]

could not open configuration directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.53 17363

could not initialize LDAP: @1@

[Description]

could not initialize LDAP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.54 17364

LDAP user "@1@" does not exist

[Description]

LDAP user does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.55 17365

LDAP user "@1@" is not unique

[Description]

LDAP user is not unique

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.56 17367

lo_lseek result out of range for large-object descriptor @1@

[Description]

lo_lseek result out of range for large-object descriptor %d

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.57 17368

lo_tell result out of range for large-object descriptor @1@

[Description]

lo_tell result out of range for large-object descriptor

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.58 17369

large object read request is too large

[Description]

large object read request is too large

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.59 17370

ECDH: unrecognized curve name: @1@

[Description]

ECDH: unrecognized curve name

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.60 17371

ECDH: could not create key

[Description]

ECDH: could not create key

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.61 17372

authentication file line too long

[Description]

authentication file line too long

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.62 17373

could not parse LDAP URL "@1@": @2@

[Description]

could not parse LDAP URL

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.63 17374

unsupported LDAP URL scheme: @1@

[Description]

unsupported LDAP URL scheme

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.64 17375

filters not supported in LDAP URLs

[Description]

filters not supported in LDAP URLs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.65 17376

LDAP URLs not supported on this platform

[Description]

LDAP URLs not supported on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.66 17377

unrecognized address family @1@

[Description]

unrecognized address family

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.67 17378

there is no client connection

[Description]

there is no client connection

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.68 17379

terminating connection because protocol synchronization was lost

[Description]

terminating connection because protocol sync was lost

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.69 17381

@1@ cannot be applied to the nullable side of an outer join

[Description]

SQL row locking clause cannot be applied to the nullable side of an outer join

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.70 17384

constraint in ON CONFLICT clause has no associated index

[Description]

constraint in ON CONFLICT clause has no associated index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.71 17385

ON CONFLICT DO UPDATE not supported with exclusion constraints

[Description]

ON CONFLICT DO UPDATE not supported with exclusion constraints

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.72 17386

there is no unique or exclusion constraint matching the ON CONFLICT specification

[Description]

there is no unique or exclusion constraint matching the ON CONFLICT specification

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.73 17387

@1@ cannot be applied to VALUES

[Description]

SQL row locking cannot be applied to VALUES

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.74 17388

RETURNING must have at least one column

[Description]

RETURNING must have at least one column

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.75 17389

DECLARE SCROLL CURSOR ... @1@ is not supported

[Description]

DECLARE SCROLL CURSOR ... is not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.76 17390

materialized views must not use data-modifying statements in WITH

[Description]

materialized views must not use data-modifying statements in WITH

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.77 17391

materialized views must not use temporary tables or views

[Description]

materialized views must not use temporary tables or views

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.78 17392

materialized views may not be defined using bound parameters

[Description]

materialized views may not be defined using bound parameters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.79 17393

materialized views cannot be unlogged

[Description]

materialized views cannot be UNLOGGED

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.80 17394

@1@ is not allowed with DISTINCT clause

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with DISTINCT clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.81 17395

@1@ is not allowed with GROUP BY clause

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with GROUP BY clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.82 17396

@1@ is not allowed with HAVING clause

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with HAVING clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.83 17397

@1@ is not allowed with aggregate functions

[Description]

%s is not allowed with aggregate functions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.84 17398

@1@ is not allowed with window functions

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with window functions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.85 17399

@1@ is not allowed with set-returning functions in the target list

[Description]

SQL row locking clause such as "FOR UPDATE" is not allowed with set-returning functions in the target list

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71 Message Numbers Beginning with 17400

2.71.1 17400

@1@ must specify unqualified relation names

[Description]

SQL row locking clause such as "FOR UPDATE" must specify unqualified relation names

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.2 17401

@1@ cannot be applied to a join

[Description]

SQL row locking clause such as "FOR UPDATE" cannot be applied to a join

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.3 17402

@1@ cannot be applied to a function

[Description]

SQL row locking clause such as "FOR UPDATE" cannot be applied to a function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.4 17403

@1@ cannot be applied to a WITH query

[Description]

SQL row locking clause such as "FOR UPDATE" cannot be applied to a WITH query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.5 17404

relation "@1@" in "@2@" clause not found in FROM clause

[Description]

Relation referenced by the SQL in FROM clause is not found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.6 17405

outer join operator (+) cannot be used with joined table

[Description]

outer join operator (+) cannot be used with joined table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.7 17406

outer join operator (+) cannot be used with subquery

[Description]

outer join operator (+) cannot be used with subquery

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.8 17407

outer join operator (+) is not allowed in operand OR or IN predicate

[Description]

outer join operator (+) is not allowed in operand OR or IN predicate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.9 17408

incorrect specification in outer join operator(+)

[Description]

incorrect specification in outer join operator(+)

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.10 17409

outer join operator(+) cannot refer to other relations of same query level

[Description]

outer join operator(+) cannot refer to other relations of same query level

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.11 17410

a table may be outer joined to at most one other table

[Description]

a table may be outer joined to at most one other table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.12 17411

multiple outer join operators (+) cannot be specified for one table

[Description]

multiple outer join operators (+) cannot be specified for one table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.13 17412

two tables cannot be outer-joined to each other

[Description]

two tables cannot be outer-joined to each other

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.14 17413

invalid combination of outer join operator (+) and logical operators

[Description]

invalid combination of outer join operator (+) and logical operators

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.15 17414

GROUPING must have fewer than 32 arguments

[Description]

GROUPING must have fewer than 32 arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.16 17415

aggregate functions are not allowed in JOIN conditions

[Description]

aggregate functions are not allowed in JOIN conditions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.17 17416

grouping operations are not allowed in JOIN conditions

[Description]

grouping operations are not allowed in JOIN conditions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.18 17417

aggregate functions are not allowed in FROM clause of their own query level

[Description]

aggregate functions are not allowed in FROM clause of their own query level

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.19 17418

grouping operations are not allowed in FROM clause of their own query level

[Description]

grouping operations are not allowed in FROM clause of their own query level

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.20 17419

aggregate functions are not allowed in functions in FROM

[Description]

aggregate functions are not allowed in functions in FROM

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.21 17420

grouping operations are not allowed in functions in FROM

[Description]

grouping operations are not allowed in functions in FROM

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.22 17421

aggregate functions are not allowed in policy expressions

[Description]

aggregate functions are not allowed in policy expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.23 17422

grouping operations are not allowed in policy expressions

[Description]

grouping operations are not allowed in policy expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.24 17423

aggregate functions are not allowed in window RANGE

[Description]

aggregate functions are not allowed in window RANGE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.25 17424

grouping operations are not allowed in window RANGE

[Description]

grouping operations are not allowed in window RANGE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.26 17425

aggregate functions are not allowed in window ROWS

[Description]

aggregate functions are not allowed in window ROWS

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.27 17426

grouping operations are not allowed in window ROWS

[Description]

grouping operations are not allowed in window ROWS

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.28 17427

grouping operations are not allowed in check constraints

[Description]

grouping operations are not allowed in check constraints

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.29 17428

grouping operations are not allowed in DEFAULT expressions

[Description]

grouping operations are not allowed in DEFAULT expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.30 17429

grouping operations are not allowed in index expressions

[Description]

grouping operations are not allowed in index expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.31 17430

grouping operations are not allowed in index predicates

[Description]

grouping operations are not allowed in index predicates

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.32 17431

grouping operations are not allowed in transform expressions

[Description]

grouping operations are not allowed in transform expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.33 17432

grouping operations are not allowed in EXECUTE parameters

[Description]

grouping operations are not allowed in EXECUTE parameters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.34 17433

grouping operations are not allowed in trigger WHEN conditions

[Description]

grouping operations are not allowed in trigger WHEN conditions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.35 17434

grouping operations are not allowed in @1@

[Description]

grouping operations are not allowed in the SQL constructs like GROUP BY

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.36 17435

outer-level aggregate cannot contain a lower-level variable in its direct arguments

[Description]

outer-level aggregate cannot contain a lower-level variable in its direct arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.37 17436

window functions are not allowed in functions in FROM

[Description]

window functions are not allowed in functions in FROM

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.38 17437

window functions are not allowed in policy expressions

[Description]

window functions are not allowed in policy expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.39 17438

window functions are not allowed in window definitions

[Description]

window functions are not allowed in window definitions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.40 17439

window functions are not allowed in DEFAULT expressions

[Description]

window functions are not allowed in DEFAULT expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.41 17440

window functions are not allowed in index expressions

[Description]

window functions are not allowed in index expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.42 17441

window functions are not allowed in index predicates

[Description]

window functions are not allowed in index predicates

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.43 17442

window functions are not allowed in transform expressions

[Description]

window functions are not allowed in transform expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.44 17443

window functions are not allowed in @1@

[Description]

window functions are not allowed in the SQL constructs like GROUP BY

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.45 17444

aggregate functions are not allowed in a recursive query's recursive term

[Description]

aggregate functions are not allowed in a recursive query's recursive term

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.46 17445

Direct arguments of an ordered-set aggregate must use only grouped columns.

[Description]

Direct arguments of an ordered-set aggregate must use only grouped columns

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.47 17446

arguments to GROUPING must be grouping expressions of the associated query level

[Description]

arguments to GROUPING must be grouping expressions of the associated query level

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.48 17447

multiple column definition lists are not allowed for the same function

[Description]

multiple column definition lists are not allowed for the same function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.49 17448

ROWS FROM() with multiple functions cannot have a column definition list

[Description]

ROWS FROM() with multiple functions cannot have a column definition list. Put a separate column definition list for each function inside ROWS FROM()

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.50 17449

WITH ORDINALITY cannot be used with a column definition list

[Description]

WITH ORDINALITY cannot be used with a column definition list. Put the column definition list inside ROWS FROM().

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.51 17450

tablesample method @1@ does not exist

[Description]

tablesample method does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.52 17452

tablesample method @1@ does not support REPEATABLE

[Description]

tablesample method does not support REPEATABLE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.53 17453

TABLESAMPLE clause can only be applied to tables and materialized views

[Description]

TABLESAMPLE clause can only be applied to tables and materialized views

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.54 17454

CUBE is limited to 12 elements

[Description]

CUBE is limited to 12 elements

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.55 17455

Omit the parentheses in this OVER clause.

[Description]

Omit the parentheses in this OVER clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.56 17456

an aggregate with DISTINCT must have at least one argument

[Description]

an aggregate with DISTINCT must have at least one argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.57 17457

SELECT DISTINCT must have at least one column

[Description]

SELECT DISTINCT must have at least one column

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.58 17458

ASC/DESC is not allowed in ON CONFLICT clause

[Description]

ASC/DESC is not allowed in ON CONFLICT clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.59 17459

NULLS FIRST/LAST is not allowed in ON CONFLICT clause

[Description]

NULLS FIRST/LAST is not allowed in ON CONFLICT clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.60 17460

ON CONFLICT DO UPDATE requires inference specification or constraint name

[Description]

ON CONFLICT DO UPDATE requires inference specification or constraint name

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.61 17461

ON CONFLICT is not supported with system catalog tables

[Description]

ON CONFLICT is not supported with system catalog tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.62 17462

ON CONFLICT is not supported on table "@1@" used as a catalog table

[Description]

ON CONFLICT is not supported on table used as a catalog table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.63 17463

argument of @1@ must be type @2@, not type @3@

[Description]

argument of the SQL construct must be of acceptable type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.64 17464

argument declared @1@ is not a range type but type @2@

[Description]

argument declared \"anyrange\" is not a range type but type %s

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.65 17465

column @1@.@2@ does not exist

[Description]

column does not exist.Re-check the column name referenced.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.66 17466

syntax error at or near "(+)"

[Description]

syntax error at or near "(+)"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.67 17467

could not find element type for data type @1@

[Description]

could not find element type for data type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.68 17468

WITHIN GROUP specified, but @1@ is not an aggregate function

[Description]

WITHIN GROUP specified, but the function is not an aggregate function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.69 17469

FILTER specified, but @1@ is not an aggregate function

[Description]

FILTER specified, but the function is not an aggregate function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.70 17470

WITHIN GROUP is required for ordered-set aggregate @1@

[Description]

WITHIN GROUP is required for ordered-set aggregate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.71 17471

OVER is not supported for ordered-set aggregate @1@

[Description]

OVER is not supported for ordered-set aggregate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.72 17472

@1@ is not an ordered-set aggregate, so it cannot have WITHIN GROUP

[Description]

The function is not an ordered-set aggregate, so it cannot have WITHIN GROUP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.73 17476

VARIADIC argument must be an array

[Description]

VARIADIC argument must be an array

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.74 17479

system column "@1@" reference in check constraint is invalid

[Description]

system column reference in check constraint is invalid

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.75 17480

primary key constraints are not supported on foreign tables

[Description]

primary key constraints are not supported on foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.76 17481

unique constraints are not supported on foreign tables

[Description]

unique constraints are not supported on foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.77 17482

foreign key constraints are not supported on foreign tables

[Description]

foreign key constraints are not supported on foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.78 17483

exclusion constraints are not supported on foreign tables

[Description]

exclusion constraints are not supported on foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.79 17484

LIKE is not supported for creating foreign tables

[Description]

LIKE is not supported for creating foreign tables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.80 17485

rules on materialized views are not supported

[Description]

rules on materialized views are not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.81 17486

@1@ failed: @2@

[Description]

function call for poll() failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.82 17488

could not map anonymous shared memory: @1@

[Description]

could not map anonymous shared memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.83 17489

huge pages not supported on this platform

[Description]

huge pages not supported on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.84 17490

could not create shared memory segment: error code @1@

[Description]

could not create shared memory segment

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.85 17491

@1@: invalid argument: "@2@"

[Description]

invalid argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.86 17492

WAL archival cannot be enabled when wal_level is "minimal"

[Description]

WAL archival cannot be enabled when wal_level is "minimal"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.87 17493

postmaster became multithreaded during startup

[Description]

postmaster became multithreaded during startup

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.88 17494

data directory "@1@" does not exist

[Description]

data directory does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.89 17495

performing immediate shutdown because data directory lock file is invalid

[Description]

performing immediate shutdown because data directory lock file is invalid

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.90 17497

invalid processing mode in background worker

[Description]

invalid processing mode in background worker

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.91 17498

could not create inherited socket: error code @1@

[Description]

could not create inherited socket

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.92 17499

could not open backend variables file "@1@": @2@

[Description]

could not open backend variables file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72 Message Numbers Beginning with 17500

2.72.1 17500

could not read from backend variables file "@1@": @2@

[Description]

could not read from backend variables file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.2 17501

could not map view of backend variables: error code @1@

[Description]

could not map view of backend variables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.3 17502

could not unmap view of backend variables: error code @1@

[Description]

could not unmap view of backend variables

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.4 17503

could not open file "@1@" : @2@

[Description]

could not open WAL file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.5 17504

could not write to log segment @1@ at offset @2@, length @3@: @4@

[Description]

could not write to log segment

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.6 17507

invalid timeline @1@

[Description]

invalid timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.7 17508

could not stat file "@1@": @2@

[Description]

could not stat control file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.8 17509

could not find WAL file "@1@"

[Description]

could not find WAL file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.9 17510

could not stat file or directory "@1@": @2@

[Description]

could not stat file or directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.10 17511

file name too long for tar format: "@1@"

[Description]

file name too long for tar format

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.11 17512

could not send end-of-streaming message to primary: @1@

[Description]

could not send end-of-streaming message to primary

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.12 17513

error reading result of streaming command: @1@

[Description]

error reading result of streaming command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.13 17514

unexpected result after CommandComplete: @1@

[Description]

unexpected result after CommandComplete

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.14 17515

could not receive timeline history file from the primary server: @1@

[Description]

could not receive timeline history file from the primary server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.15 17516

logical decoding requires wal_level >= logical

[Description]

logical decoding requires wal_level >= logical

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.16 17517

logical decoding requires a database connection

[Description]

logical decoding requires a database connection

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.17 17518

logical decoding cannot be used while in recovery

[Description]

logical decoding cannot be used while in recovery

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.18 17519

cannot use physical replication slot for logical decoding

[Description]

cannot use physical replication slot for logical decoding

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.19 17520

replication slot "@1@" was not created in this database

[Description]

replication slot was not created in this database

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.20 17521

cannot create logical replication slot in transaction that has performed writes

[Description]

cannot create logical replication slot in transaction that has performed writes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.21 17522

must be superuser or replication role to use replication slots

[Description]

must be superuser or replication role to use replication slots

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.22 17523

array must be one-dimensional

[Description]

The provided input array must be one-dimensional

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.23 17524

array must not contain nulls

[Description]

The provided input array must not contain nulls

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.24 17525

array must have even number of elements

[Description]

The provided input array must have even number of elements

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.25 17526

logical decoding output plugin "@1@" produces binary output, but function "@2@" expects textual data

[Description]

logical decoding output plugin produces binary output, but function expects textual data

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.26 17527

only superusers can query or manipulate replication origins

[Description]

only superusers can query or manipulate replication origins

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.27 17528

cannot query or manipulate replication origin when max_replication_slots = 0

[Description]

cannot query or manipulate replication origin when max_replication_slots = 0

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.28 17529

cannot manipulate replication origins during recovery

[Description]

cannot manipulate replication origins during recovery

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.29 17530

could not find free replication origin OID

[Description]

could not find free replication origin OID

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.30 17531

could not drop replication origin with OID @1@, in use by PID @2@

[Description]

could not drop replication origin with OID as it is in use by a process

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.31 17532

replication checkpoint has wrong magic @1@ instead of @2@

[Description]

replication checkpoint has wrong magic number instead of a correct magic number provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.32 17533

could not read file "@1@": read @2@ of @3@

[Description]

could not read file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.33 17534

could not find free replication state, increase max_replication_slots

[Description]

could not find free replication state, increase max_replication_slots

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.34 17535

replication slot checkpoint has wrong checksum @1@, expected @2@

[Description]

replication slot checkpoint has wrong checksum value, expected value is shown

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.35 17536

replication origin with OID @1@ is already active for PID @2@

[Description]

replication origin with OID is already active for process with PID

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.36 17537

could not find free replication state slot for replication origin with OID @1@

[Description]

could not find free replication state slot for replication origin with OID %u

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.37 17539

no replication origin is configured

[Description]

no replication origin is configured

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.38 17540

could not write to data file for XID @1@: @2@

[Description]

could not write to data file for XID

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.39 17541

could not read from reorderbuffer spill file: @1@

[Description]

could not read from reorderbuffer spill file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.40 17542

could not read from reorderbuffer spill file: read @1@ instead of @2@ bytes

[Description]

could not read from reorderbuffer spill file: read instead of bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.41 17543

could not read from file "@1@": read @2@ instead of @3@ bytes

[Description]

could not read from file : read some bytes instead of actual bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.42 17545

snapbuild state file "@1@" has wrong magic number: @2@ instead of @3@

[Description]

snapbuild state file has wrong magic number: instead of actual magic number

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.43 17546

snapbuild state file "@1@" has unsupported version: @2@ instead of @3@

[Description]

snapbuild state file has unsupported version: instead of actual version number

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.44 17547

checksum mismatch for snapbuild state file "@1@": is @2@, should be @3@

[Description]

checksum mismatch for snapbuild state file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.45 17548

replication slot name "@1@" is too short

[Description]

replication slot name is too short

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.46 17549

replication slot name "@1@" is too long

[Description]

replication slot name \"%s\" is too long

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.47 17550

replication slot name "@1@" contains invalid character

[Description]

replication slot name \"%s\" contains invalid character

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.48 17551

replication slot "@1@" already exists

[Description]

replication slot already exists invalid character

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.49 17552

all replication slots are in use

[Description]

all replication slots are in use character

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.50 17553

replication slot "@1@" does not exist

[Description]

replication slot does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.51 17554

replication slot "@1@" is active for PID @2@

[Description]

replication slot \"%s\" is already active for PID

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.52 17555

could not remove directory "@1@"

[Description]

could not remove directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.53 17556

replication slots can only be used if max_replication_slots > 0

[Description]

replication slots can only be used if max_replication_slots > 0

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.54 17557

replication slots can only be used if wal_level >= replica

[Description]

replication slots can only be used if wal_level >= archive

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.55 17559

replication slot file "@1@" has wrong magic number: @2@ instead of @3@

[Description]

replication slot file has wrong magic number

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.56 17560

replication slot file "@1@" has unsupported version @2@

[Description]

replication slot file has unsupported version

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.57 17561

replication slot file "@1@" has corrupted length @2@

[Description]

replication slot file has corrupted length

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.58 17562

checksum mismatch for replication slot file "@1@": is @2@, should be @3@

[Description]

checksum mismatch for replication slot file \"%s\": is %u, should be %u

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.59 17563

too many replication slots active before shutdown

[Description]

too many replication slots active before shutdown

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.60 17564

terminating walreceiver due to timeout

[Description]

terminating walreceiver due to timeout

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.61 17566

could not seek to beginning of file "@1@": @2@

[Description]

could not seek to beginning of file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.62 17567

cannot use a logical replication slot for physical replication

[Description]

cannot use a logical replication slot for physical replication

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.63 17568

requested starting point @1@/@2@ on timeline @3@ is not in this server's history

[Description]

While streaming WALs during standby recovery. Requested starting point on timeline is not in this server's history

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.64 17570

could not convert table "@1@" to a view because it has row security enabled

[Description]

could not convert table to a view because it has row security enabled

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.65 17571

could not convert table "@1@" to a view because it has row security policies

[Description]

could not convert table to a view because it has row security policies

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.66 17573

renaming an ON SELECT rule is not allowed

[Description]

renaming an ON SELECT rule is not allowed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.67 17574

infinite recursion detected in policy for relation "@1@"

[Description]

infinite recursion detected in policy for relation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.68 17575

cannot insert into column "@1@" of view "@2@"

[Description]

cannot insert into column of view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.69 17576

cannot update column "@1@" of view "@2@"

[Description]

cannot update column of view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.70 17577

INSERT with ON CONFLICT clause cannot be used with table that has INSERT or UPDATE rules

[Description]

INSERT with ON CONFLICT clause cannot be used with table that has INSERT or UPDATE rules

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.71 17578

NEW variables in ON UPDATE rules cannot reference columns that are part of a multiple assignment in the subject UPDATE command

[Description]

NEW variables in ON UPDATE rules cannot reference columns that are part of a multiple assignment in the subject UPDATE command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.72 17579

exceeded maxAllocatedDescs (@1@) while trying to execute command "@2@"

[Description]

exceeded maxAllocatedDescs while trying to execute command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.73 17580

could not duplicate handle for "@1@" : @2@

[Description]

could not duplicate handle for the segment

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.74 17581

invalid flags for opening a large object: @1@

[Description]

invalid flags for opening a large object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.75 17582

invalid whence setting: @1@

[Description]

invalid whence setting

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.76 17583

invalid large object write request size: @1@

[Description]

invalid large object write request size

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.77 17584

canceling statement due to lock timeout

[Description]

canceling statement due to lock timeout. Check the process holding the lock.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.78 17585

@1@: invalid command-line argument: @2@

[Description]

invalid command-line argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.79 17586

fastpath function calls not supported in a replication connection

[Description]

fastpath function calls not supported in a replication connection

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.80 17587

extended query protocol not supported in a replication connection

[Description]

extended query protocol not supported in a replication connection

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.81 17588

cannot execute @1@ during a parallel operation

[Description]

cannot execute SQL commands such as CREATE during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.82 17589

too many lexemes in thesaurus entry

[Description]

too many lexemes in thesaurus entry

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.83 17590

input data type is not an array

[Description]

input data type is not an array

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.84 17591

searching for elements in multidimensional arrays is not supported

[Description]

searching for elements in multidimensional arrays is not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.85 17593

data type @1@ is not an array type

[Description]

data type is not an array type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.86 17594

cannot accumulate null arrays

[Description]

cannot accumulate null arrays

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.87 17595

cannot accumulate empty arrays

[Description]

cannot accumulate empty arrays

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.88 17596

cannot accumulate arrays of different dimensionality

[Description]

cannot accumulate arrays of different dimensionality

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.89 17597

removing elements from multidimensional arrays is not supported

[Description]

removing elements from multidimensional arrays is not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.90 17598

thresholds must be one-dimensional array

[Description]

thresholds must be one-dimensional array

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.72.91 17599

thresholds array must not contain NULLs

[Description]

thresholds array must not contain NULLs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73 Message Numbers Beginning with 17600

2.73.1 17600

date field value out of range: @1 @-@2@-@3@

[Description]

date field value out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.2 17601

date out of range: @1 @-@2@-@3@

[Description]

date out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.3 17602

time field value out of range: @1 @: @2@: @3@

[Description]

time field value out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.4 17608

localized string format value too long

[Description]

localized string format value too long

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.5 17610

invalid line specification: A and B cannot both be zero

[Description]

invalid line specification: A and B cannot both be zero

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.6 17611

function "close_sl" not implemented

[Description]

function \"close_sl\" not implemented

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.7 17612

invalid input syntax for type @1@

[Description]

invalid input syntax for type json

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.8 17613

"\u" must be followed by four hexadecimal digits.

[Description]

must be followed by four hexadecimal digits. Check the syntax

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.9 17614

unsupported Unicode escape sequence

[Description]

unsupported Unicode escape sequence

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.10 17615

key value must be scalar, not array, composite, or json

[Description]

key value must be scalar, not array, composite, or json

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.11 17616

could not determine data type for argument @1@

[Description]

could not determine data type for argument 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.12 17617

could not determine data type for argument @1@

[Description]

could not determine data type for argument 2

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.13 17618

field name must not be null

[Description]

field name must not be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.14 17619

argument list must have even number of elements

[Description]

argument list must have even number of elements

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.15 17620

could not determine data type for argument @1@

[Description]

could not determine data type for argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.16 17621

argument @1 @ cannot be null

[Description]

argument cannot be null

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.17 17622

array must have two columns

[Description]

array must have two columns

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.18 17623

null value not allowed for object key

[Description]

null value not allowed for object key

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.19 17624

mismatched array dimensions

[Description]

mismatched array dimensions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.20 17625

string too long to represent as jsonb string

[Description]

string too long to represent as jsonb string

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.21 17626

argument list must have even number of elements

[Description]

invalid number or arguments: object must be matched key value pairs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.22 17629

object keys must be strings

[Description]

object keys must be strings

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.23 17630

number of jsonb object pairs exceeds the maximum allowed (@1@)

[Description]

number of jsonb object pairs exceeds the maximum allowed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.24 17631

number of jsonb array elements exceeds the maximum allowed (@1@)

[Description]

number of jsonb array elements exceeds the maximum allowed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.25 17632

total size of jsonb array elements exceeds the maximum of @1@ bytes

[Description]

total size of jsonb array elements exceeds the maximum number of bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.26 17633

total size of jsonb object elements exceeds the maximum of @1@ bytes

[Description]

total size of jsonb object elements exceeds the maximum number of bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.27 17634

cannot call @1@ on a scalar

[Description]

cannot call this function on a scalar input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.28 17635

cannot call @1@ on an array

[Description]

cannot call this function on an array input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.29 17636

cannot get array length of a scalar

[Description]

cannot get array length of a scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.30 17637

cannot get array length of a non-array

[Description]

cannot get array length of a non-array

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.31 17639

function returning record called in context that cannot accept type record

[Description]

function returning record called in context that cannot accept type record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.32 17640

cannot deconstruct an array as an object

[Description]

cannot deconstruct an array as an object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.33 17641

cannot deconstruct a scalar

[Description]

cannot deconstruct a scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.34 17642

cannot extract elements from a scalar

[Description]

cannot extract elements from a scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.35 17643

cannot extract elements from an object

[Description]

cannot extract elements from an object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.36 17644

cannot call @1@ on a non-array

[Description]

cannot call this function on a non-array input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.37 17645

first argument of @1@ must be a row type

[Description]

first argument of this function must be a row type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.38 17646

argument of @1@ must be an array of objects

[Description]

argument of must be an array of objects

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.39 17647

cannot call @1@ on an object

[Description]

cannot call this function on an object input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.40 17648

cannot delete from scalar

[Description]

cannot delete from scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.41 17649

cannot delete from object using integer index

[Description]

cannot delete from object using integer subscript

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.42 17650

cannot set path in scalar

[Description]

cannot set path in scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.43 17651

cannot delete path in scalar

[Description]

cannot delete path in scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.44 17652

invalid concatenation of jsonb objects

[Description]

invalid concatenation of jsonb objects

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.45 17659

cannot merge addresses from different families

[Description]

cannot merge addresses from different families

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.46 17660

invalid scale in external "numeric" value

[Description]

invalid scale in external \"numeric\" value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.47 17661

start value cannot be NaN

[Description]

While generating a numeric series - start value cannot be NaN

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.48 17662

stop value cannot be NaN

[Description]

stop value cannot be NaN

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.49 17663

step size cannot be NaN

[Description]

step size cannot be NaN

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.50 17664

percentile value @1@ is not between 0 and 1

[Description]

percentile value %g is not between 0 and 1

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.51 17665

invalid input syntax for type @1@: "@2@"

[Description]

invalid input syntax for type pg_lsn

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.52 17666

function can only be called when server is in binary upgrade mode

[Description]

function can only be called when server is in binary upgrade mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.53 17672

cannot output a value of type @1@

[Description]

cannot output a value of type pg_ddl_command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.54 17673

malformed range literal: "@1@"

[Description]

malformed range literal. Check the input string format

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.55 17674

invalid input syntax for type @1@: "@2@"

[Description]

invalid input syntax for numeric time zone

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.56 17675

numeric time zone "@1@" out of range

[Description]

numeric time zone out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.57 17676

timestamp out of range: @1@-@2@-@3@ @4@:@5@:@6@

[Description]

timestamp out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.58 17677

interval units "@1@" not supported because months usually have fractional weeks

[Description]

interval units \"%s\" not supported because months usually have fractional weeks

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.59 17678

invalid external txid_snapshot data

[Description]

invalid external txid_snapshot data

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.60 17679

unterminated format() type specifier

[Description]

unterminated format specifier

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.61 17680

number is out of range

[Description]

number is out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.62 17681

width argument position must be ended by "\$"

[Description]

width argument position must be ended by \"\$\"

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.63 17682

type @1@ is not composite

[Description]

type is not composite

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.64 17683

keystore location "@1@" is too long

[Description]

While configuring a keystore, the error is "keystore location mentioned is too long".

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.65 17684

keystore does not exist

[Description]

keystore does not exist. Make sure keystore_location points to the correct location. If the setting is correct, set the master encryption key to create the keystore.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.66 17685

must be superuser to manipulate keystore

[Description]

must be superuser to manipulate keystore

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.67 17686

function "@1@" is not supported by this build

[Description]

function \"%s\" is not supported by this build

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.68 17687

file "@1@" is not a keystore

[Description]

file \"%s\" is not a keystore

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.69 17688

lock file "@1@" is empty

[Description]

lock file is empty. Check if the lockfile is corrupt.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.70 17689

could not access directory "@1@": @2@

[Description]

could not access directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.71 17690

bind_textdomain_codeset failed

[Description]

bind_textdomain_codeset failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.72 17691

invalid value for parameter "@1@": "@2@"

[Description]

parameter \"%s\" requires a numeric value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.73 17692

cannot set parameters during a parallel operation

[Description]

cannot set parameters during a parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.74 17693

permission denied to set parameter "@1@"

[Description]

permission denied to set parameter

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.75 17694

must be superuser to execute ALTER SYSTEM command

[Description]

must be superuser to execute ALTER SYSTEM command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.76 17696

parameter "@1@" could not be set

[Description]

parameter could not be set

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.77 17698

could not seek in tuplestore temporary file: @1@

[Description]

could not seek in tuplestore temporary file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.78 17699

could not read from tuplestore temporary file: @1@

[Description]

could not read from tuplestore temporary file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74 Message Numbers Beginning with 17700

2.74.1 17700

could not write to tuplestore temporary file: @1@

[Description]

could not write to tuplestore temporary file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.2 17703

user does not exist

[Description]

user does not exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.3 17704

could not open directory "@1@": @2@

[Description]

could not open directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.4 17705

could not read directory "@1@": @2@

[Description]

could not read directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.5 17706

could not stat file "@1@": @2@

[Description]

could not stat file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.6 17707

could not open file "@1@": @2@

[Description]

could not open file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.7 17708

directory name too long

[Description]

directory name too long

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.8 17709

multiple "=" signs in tablespace mapping

[Description]

multiple signs in tablespace mapping

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.9 17710

invalid tablespace mapping format "@1@", must be "OLDDIR=NEWDIR"

[Description]

invalid tablespace mapping format must be OLDDIR=NEWDIR

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.10 17711

old directory is not an absolute path in tablespace mapping: @1@

[Description]

old directory is not an absolute path in tablespace mapping

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.11 17712

new directory is not an absolute path in tablespace mapping: @1@

[Description]

new directory is not an absolute path in tablespace mapping

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.12 17713

transfer rate "@1@" is not a valid value

[Description]

backup transfer rate is not a valid value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.13 17714

invalid transfer rate "@1@": @2@

[Description]

invalid transfer rate

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.14 17715

transfer rate must be greater than zero

[Description]

transfer rate must be greater than zero

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.15 17716

invalid --max-rate unit: "@1@"

[Description]

invalid --max-rate unit

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.16 17717

transfer rate "@1@" exceeds integer range

[Description]

Transfer rate exceeds integer range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.17 17718

transfer rate "@1@" is out of range

[Description]

Transfer rate is out of range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.18 17719

incompatible server version @1@

[Description]

incompatible server version

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.19 17720

server returned unexpected response to BASE_BACKUP command; got @1@ rows and @2@ fields, expected @3@ rows and @4@ fields

[Description]

server returned unexpected response to BASE_BACKUP command; got rows and fields, expected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.20 17721

invalid wal-method option "@1@", must be "fetch", "stream", or "none"

[Description]

invalid xlog-method option : must be fetch or stream

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.21 17722

WAL directory location can only be specified in plain mode

[Description]

transaction log directory location can only be specified in plain mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.22 17723

could not create symbolic link "@1@": @2@

[Description]

could not create symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.23 17724

symlinks are not supported on this platform

[Description]

symlinks are not supported on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.24 17725

cannot use --create-slot together with --drop-slot

[Description]

cannot use --create-slot together with --drop-slot

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.25 17726

@1@ needs a slot to be specified using --slot

[Description]

needs a slot to be specified using --slot

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.26 17728

could not open log file "@1@": @2@

[Description]

could not open log file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.27 17729

invalid fsync interval "@1@"

[Description]

invalid fsync interval

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.28 17730

could not parse start position "@1@"

[Description]

could not parse start position

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.29 17731

no slot specified

[Description]

no slot specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.30 17732

no target file specified

[Description]

no target file specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.31 17733

no database specified

[Description]

no database specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.32 17734

at least one action needs to be specified

[Description]

at least one action needs to be specified

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.33 17735

cannot use --create-slot or --start together with --drop-slot

[Description]

cannot use --create-slot or --start together with --drop-slot

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.34 17736

cannot use --create-slot or --drop-slot together with --startpos

[Description]

cannot use --create-slot or --drop-slot together with --startpos

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.35 17737

could not establish database-specific replication connection

[Description]

could not establish database-specific replication connection

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.36 17738

could not create archive status file "@1@": @2@

[Description]

could not create archive status file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.37 17740

server reported unexpected history file name for timeline @1@: @2@

[Description]

server reported unexpected history file name for timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.38 17741

could not create timeline history file "@1@": @2@

[Description]

could not create timeline history file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.39 17742

could not write timeline history file "@1@": @2@

[Description]

could not write timeline history file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.40 17743

could not rename file "@1@" to "@2@": @3@

[Description]

could not rename file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.41 17744

incompatible server version @1@; client does not support streaming from server versions older than @2@

[Description]

incompatible server version; client does not support streaming from server versions older than

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.42 17745

incompatible server version @1@; client does not support streaming from server versions newer than @2@

[Description]

incompatible server version; client does not support streaming from server versions newer than

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.43 17746

starting timeline @1@ is not present in the server

[Description]

starting timeline is not present in the server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.44 17747

server reported unexpected next timeline @1@, following timeline @2@

[Description]

server reported unexpected next timeline, following timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.45 17748

server stopped streaming timeline @1@ at @2@/@3@, but reported next timeline @4@ to begin at @5@/@6@

[Description]

server stopped streaming a timeline, but reported next timeline

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.46 17749

unexpected result set after end-of-timeline: got @1@ rows and @2@ fields, expected @3@ rows and @4@ fields

[Description]

unexpected result set after end-of-timeline: got unexpected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.47 17750

could not parse next timeline's starting point "@1@"

[Description]

could not parse next timeline's starting point

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.48 17751

invalid socket: @1@

[Description]

socket not open

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.49 17752

could not send copy-end packet: @1@

[Description]

could not send copy-end packet

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.50 17753

could not connect to server: @1@

[Description]

could not connect to server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.51 17754

could not create replication slot "@1@": got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields

[Description]

could not create replication slot : got unexpected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.52 17755

could not drop replication slot "@1@": got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields

[Description]

could not drop replication slot : got rows and fields mismatch with, expected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.53 17758

WSAStartup failed: @1@

[Description]

WSAStartup failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.54 17759

could not create communication channels: @1@

[Description]

could not create communication channels

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.55 17761

unrecognized command received from master: "@1@"

[Description]

unrecognized command on communication channel

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.56 17762

invalid message received from worker: "@1@"

[Description]

invalid message received from worker

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.57 17764

could not write to the communication channel: @1@

[Description]

could not write to the communication channel

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.58 17765

select() failed: @1@

[Description]

error in ListenToWorkers()

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.59 17766

pgpipe: could not create socket: error code @1@

[Description]

pgpipe: could not create socket

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.60 17767

pgpipe: could not bind: error code @1@

[Description]

pgpipe: could not bind

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.61 17768

pgpipe: could not listen: error code @1@

[Description]

pgpipe: could not listen

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.62 17769

pgpipe: getsockname() failed: error code @1@

[Description]

pgpipe: getsockname() failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.63 17770

pgpipe: could not create second socket: error code @1@

[Description]

pgpipe: could not create second socket

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.64 17771

pgpipe: could not connect socket: error code @1@

[Description]

pgpipe: could not connect socket

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.65 17773

unexpected COPY statement syntax: "@1@"

[Description]

unexpected COPY statement syntax

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.66 17774

options -s/--schema-only and -a/--data-only cannot be used together

[Description]

options `-s/--schema-only` and `-a/--data-only` cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.67 17775

options `-c/--clean` and `-a/--data-only` cannot be used together

[Description]

options `-c/--clean` and `-a/--data-only` cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.68 17776

option `--if-exists` requires option `-c/--clean`

[Description]

option `--if-exists` requires option `-c/--clean`

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.69 17777

invalid number of parallel jobs

[Description]

%s: invalid number of parallel jobs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.70 17778

parallel backup only supported by the directory format

[Description]

parallel backup only supported by the directory format

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.71 17779

Exported snapshots are not supported by this server version.

[Description]

Exported snapshots are not supported by this server version

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.72 17780

unexpected policy command type: @1@

[Description]

unexpected policy command type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.73 17781

options -g/--globals-only and -r/--roles-only cannot be used together

[Description]

options -g/--globals-only and -r/--roles-only cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.74 17782

options -g/--globals-only and -t/--tablespaces-only cannot be used together

[Description]

options -g/--globals-only and -t/--tablespaces-only cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.75 17783

option --if-exists requires option -c/--clean

[Description]

option --if-exists requires option -c/--clean

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.76 17784

options -r/--roles-only and -t/--tablespaces-only cannot be used together

[Description]

options -r/--roles-only and -t/--tablespaces-only cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.77 17785

options -d/--dbname and -f/--file cannot be used together

[Description]

options -d/--dbname and -f/--file cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.78 17786

options -c/--clean and -a/--data-only cannot be used together

[Description]

options -c/--clean and -a/--data-only cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.79 17787

cannot specify both --single-transaction and multiple jobs

[Description]

cannot specify both --single-transaction and multiple jobs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.80 17788

@1@: could not start server: @2@

[Description]

could not start server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.81 17789

@1@: could not start server: error code @2@

[Description]

could not start server: error code

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.82 17790

encoding conversion error on line @1@

[Description]

encoding conversion error on line

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.83 17791

invalid value for numeric type "@1@" on line @2@

[Description]

invalid value for numeric type on line

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.84 17793

@1@: could not locate my own executable path

[Description]

could not locate my own executable path

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.85 17794

lookup failed for type @1@

[Description]

lookup failed for type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.86 17795

didn't get a return item from function

[Description]

didn't get a return item from function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.87 17796

couldn't fetch \$_TD

[Description]

couldn't fetch \$_TD

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.88 17797

didn't get a return item from trigger function

[Description]

didn't get a return item from trigger function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.89 17798

event trigger functions cannot have declared arguments

[Description]

event trigger functions cannot have declared arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.90 17799

GET STACKED DIAGNOSTICS cannot be used outside an exception handler

[Description]

GET STACKED DIAGNOSTICS cannot be used outside an exception handler

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75 Message Numbers Beginning with 17800

2.75.1 17800

cannot return non-composite value from function returning composite type

[Description]

cannot return non-composite value from function returning composite type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.2 17804

[@1@ cannot be used as a role name here](#)

[Description]

Reserved name cannot be used as a role name here

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.3 17805

[@1@ is not allowed with UNION/INTERSECT/EXCEPT](#)

[Description]

Locking clause is not allowed with UNION/INTERSECT/EXCEPT

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.4 17806

[@1@: could not access directory "@2@": @3@](#)

[Description]

Failure in accessing directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.5 17807

[could not allocate SIDs: error code @1@](#)

[Description]

Failure in allocating SIDs

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.6 17808

could not change permissions of "@1@": @2@

[Description]

Failure in changing the permissions of a file/directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.7 17809

@1@: could not close directory "@2@": @3@

[Description]

Failure in closing directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.8 17810

could not close directory "@1@": @2@

[Description]

Failure in closing a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.9 17811

could not create restricted token: error code @1@

[Description]

Failure in creating restricted token

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.10 17812

could not fsync file "@1@": @2@

[Description]

Failure in syncing the file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.11 17813

could not get exit code from subprocess: error code @1@

[Description]

Failure in getting the exit code of a child process

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.12 17816

could not open process token: error code @1@

[Description]

Failure in opening process token

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.13 17818

could not read directory "@1@": @2@

[Description]

Failure in reading from a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.14 17821

could not re-execute with restricted token: error code @1@

[Description]

re-executing with a restricted token is not allowed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.15 17822

@1@: could not remove promote signal file "@2@": @3@

[Description]

Failure in removing promote signal file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.16 17823

could not start process for command "@1@": error code @2@

[Description]

Process start failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.17 17824

could not write @1@ bytes to log file "@2@": @3@

[Description]

Failure in writing to a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.18 17825

@1@: directory "@2@" does not exist

[Description]

directory doesn't exist

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.19 17826

@1@: directory "@2@" is not a database cluster directory

[Description]

directory is not a database cluster directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.20 17827

@1@: invalid argument for option -f: "@2@"

[Description]

Invalid argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.21 17828

@1@: invalid argument for option -t: "@2@"

[Description]

Invalid argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.22 17829

keystore location "@1@" is too long

[Description]

keystore location is more than 1024 characters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.23 17830

@1@: oldest multitransaction ID (-m) must not be 0

[Description]

The provided oldest multitransaction ID (-m) must not be 0

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.24 17832

out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.25 17833

replication connection using slot "@1@" is unexpectedly database specific

[Description]

replication connection using slot specified is unexpectedly database specific

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.26 17834

@1@: the PID file "@2@" is empty

[Description]

Wrong PID file is found, it is empty

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.27 17835

@1@: too many command-line arguments (first is "@2@")

[Description]

too many command-line arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.28 17836

@1@: transaction ID (-c) must be either 0 or greater than or equal to 2

[Description]

Provided transaction ID (-c) must be either 0 or greater than or equal to 2

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.29 17837

unexpected response to TIMELINE_HISTORY command: got @1@ rows and @2@ fields, expected @3@ rows and @4@ fields

[Description]

Response from server to TIMELINE_HISTORY command is wrong from the expected

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.30 17838

"@1@" is a symbolic link, but symbolic links are not supported on this platform

[Description]

Symbolic links are not supported in this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.31 17839

"@1@" is not a BRIN index

[Description]

The provided index is not a BRIN index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.32 17840

"@1@" is not a directory or symbolic link

[Description]

Specified path is not a directory or symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.33 17841

"@1@" is not a directory

[Description]

The specified path is not a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.34 17842

"@1@" is not a regular file

[Description]

The specified file is not a regular file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.35 17843

"@1@" is not a symbolic link

[Description]

The specified path/file is not a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.36 17844

"@1@" is not a table, view, materialized view, sequence, or foreign table

[Description]

Object is not a table, view, materialized view, sequence, or foreign table to do the alter relation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.37 17845

"@1@" : stopping truncate due to conflicting lock request

[Description]

Truncating table is stopped due to conflicting lock request by vacuum

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.38 17846

\\watch cannot be used with an empty query

[Description]

\\watch comamnd cannot be used with an empty query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.39 17847

\\watch cannot be used with COPY

[Description]

\\watch command cannot be used along with COPY command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.40 17848

aggregate cannot accept shell type @1@

[Description]

Shell type is not allowed in aggregate functions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.41 17849

aggregates cannot have output arguments

[Description]

Defining aggregates with output arguments is not supported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.42 17850

an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type

[Description]

an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.43 17852

argument @1@: key must not be null

[Description]

Invalid key value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.44 17853

argument of lo_read exceeds integer range

[Description]

The length argument of lo_read exceeds integer range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.45 17854

argument of lo_truncate exceeds integer range

[Description]

The length argument of lo_truncate exceeds integer range

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.46 17855

argument of lo_write exceeds integer range

[Description]

The provided index is not a BRIN index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.47 17856

background worker "@1@": only dynamic background workers can request notification**[Description]**

only dynamic background workers can request notification

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.48 17857

BKPBLOCK_HAS_DATA not set, but data length is @1@ at @2@/@3@**[Description]**

BKPBLOCK_HAS_DATA not set, but data length is present in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.49 17858

BKPBLOCK_HAS_DATA set, but no data included at @1@/@2@**[Description]**

BKPBLOCK_HAS_DATA set, but no data in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.50 17859

BKPBLOCK_SAME_REL set but no previous rel at @1@/@2@**[Description]**

BKPBLOCK_SAME_REL set but no previous rel is provided in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.51 17860

BKPIMAGE_HAS_HOLE not set, but hole offset @1@ length @2@ at @3@/@4@

[Description]

BKPIMAGE_HAS_HOLE not set, but hole offset is provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.52 17861

BKPIMAGE_HAS_HOLE set, but hole offset @1@ length @2@ block image length @3@ at @4@/@5@

[Description]

BKPIMAGE_HAS_HOLE set, but hole offset is not provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.53 17862

BKPIMAGE_IS_COMPRESSED set, but block image length @1@ at @2@/@3@

[Description]

BKPIMAGE_IS_COMPRESSED set, but block image length is not provided.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.54 17863

cannot allocate multiple Perl interpreters on this platform

[Description]

cannot allocate multiple Perl interpreters on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.55 17864

cannot alter type of a column used in a policy definition

[Description]

cannot alter type of a column used in a policy definition

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.56 17865

cannot call @1@ on a non-object

[Description]

The parameter is not a Json Object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.57 17866

cannot change logged status of table "@1@" because it is temporary

[Description]

Temporary table logged status cannot be changed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.58 17867

cannot copy from materialized view "@1@"

[Description]

Copy command cannot be executed on a materialized view

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.59 17868

cannot delete tuples during a parallel operation

[Description]

Delete operation is not allowed in parallel mode

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.60 17869

cannot determine OID of function lo_lseek64

[Description]

lo_lseek64 function is not defined

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.61 17870

cannot determine OID of function lo_tell64

[Description]

lo_tell64 function is not defined

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.62 17871

cannot determine OID of function lo_truncate64

[Description]

lo_truncate64 function is not defined

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.63 17872

cannot display a value of a shell type

[Description]

Shell type cannot be displayed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.64 17873

cannot duplicate null pointer (internal error)

[Description]

The given input is a null pointer

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.65 17874

cannot refresh materialized view "@1@" concurrently

[Description]

Cannot refresh materialized view concurrently

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.66 17875

cannot set system attribute "@1@"

[Description]

Cannot set system attributes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.67 17876

cannot setup replication origin when one is already setup

[Description]

replication origin is already setup

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.68 17877

cannot use DISTINCT with WITHIN GROUP

[Description]

cannot use DISTINCT with WITHIN GROUP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.69 17878

cannot use multiple ORDER BY clauses with WITHIN GROUP

[Description]

cannot use multiple ORDER BY clauses with WITHIN GROUP sql query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.70 17879

cannot use special role specifier in DROP ROLE

[Description]

cannot use special role specifier in DROP ROLE

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.71 17880

cannot use VARIADIC with WITHIN GROUP

[Description]

cannot use VARIADIC with WITHIN GROUP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.72 17881

constraint "@1@" of relation "@2@" is not a foreign key constraint

[Description]

constraint is not a foreign key constraint

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.73 17882

conversion from numeric to Decimal failed

[Description]

conversion from numeric to Decimal failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.74 17883

COPY data transfer failed: @1 @

[Description]

Failed in data transfer of COPY command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.75 17884

corrupted line pointer: offset = @1 @, size = @2 @

[Description]

item pointer of a page is corrupted

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.76 17885

could not change table "@1 @" to logged because it references unlogged table "@2@"

[Description]

could not change table logged status because it references unlogged table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.77 17886

could not change table "@1@" to unlogged because it references logged table "@2@"

[Description]

could not change table logged status because it references logged table

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.78 17887

could not close directory "@1@": @2@

[Description]

Failure in closing a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.79 17888

could not close directory "@1@": @2@

[Description]

Failure in closing a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.80 17889

could not close file "@1@": @2@

[Description]

Failure in file close

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.81 17890

could not close pipe to external command: @1@

[Description]

Failure in closing the pipe command to external command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.82 17891

could not close target file "@1@": @2@

[Description]

Failure in closing target file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.83 17892

could not convert Python Unicode object to bytes

[Description]

could not convert Python Unicode object to bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.84 17893

could not create any Unix-domain sockets

[Description]

Failure in creating Unix-domain sockets

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.85 17894

could not create directory "@1@": @2@

[Description]

Failure in creating a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.86 17895

could not create internal procedure "@1@": @2@

[Description]

could not create internal procedure

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.87 17896

could not create symbolic link at "@1@": @2@

[Description]

Failure in creating a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.88 17897

could not execute command "@1@": @2@

[Description]

could not execute command if it is not copy stream

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.89 17898

could not import a module for Decimal constructor

[Description]

Non decimal data found

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.90 17899

could not initialize globals

[Description]

could not initialize globals in pl/python function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76 Message Numbers Beginning with 17900

2.76.1 17901

could not look up effective user ID @1@: @2@

[Description]

Getting the current user details failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.2 17902

could not look up local user ID @1@: @2@

[Description]

Lookup user name failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.3 17903

could not map dynamic shared memory segment

[Description]

Attaching to a dynamci shared memory segment failed.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.4 17904

could not open directory "@1@": @2@

[Description]

Failure in opening the directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.5 17905

could not open file "@1@" for reading: @2@

[Description]

Failure in opening a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.6 17906

could not open file "@1@" for truncation: @2@

[Description]

Faliure in opening a file for truncating it's size

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.7 17907

could not open file "@1@": @2@

[Description]

Failure in opening the file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.8 17908

could not open parent table of index @1@

[Description]

Failure in opening the parent relation of an index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.9 17909

could not open source file "@1@": @2@

[Description]

Failure in opening a source file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.10 17910

could not open target file "@1@": @2@

[Description]

Failure in opening target file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.11 17911

could not read directory "@1@": @2@

[Description]

Failure in reading from a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.12 17912

could not read directory "@1@": @2@

[Description]

Failure in reading from a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.13 17913

could not read file "@1@": @2@

[Description]

Failure in reading a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.14 17914

could not read symbolic link "@1@": @2@

[Description]

Failure in reading a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.15 17915

could not read time zone file "@1@": @2@

[Description]

Failure in reading timezone file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.16 17916

could not remove directory "@1@": @2@

[Description]

Failure in removing a directory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.17 17917

could not remove file "@1@": @2@

[Description]

Failure in removing a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.18 17918

could not remove symbolic link "@1@": @2@

[Description]

Failure in removing a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.19 17920

could not seek in source file: @1@

[Description]

Failure in executing seek system call in source file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.20 17921

could not seek in target file "@1@": @2@

[Description]

Failure in executing seek system call in target file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.21 17923

could not split return value from trigger: @1@

[Description]

Trigger return value couldn't be splitted

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.22 17924

could not stat file "@1@": @2@

[Description]

stat system call failed on a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.23 17925

could not stat file "@1@": @2@

[Description]

Failure in stat system call

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.24 17926

could not truncate file "@1@" to @2@: @3@

[Description]

Failure in truncating a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.25 17927

could not write file "@1@": @2@

[Description]

Failure in writing to a file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.26 17928

could not write to file "@1@", wrote @2@ of @3@: @4@

[Description]

Failure in writing to a file.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.27 17929

data file "@1@" in source is not a regular file

[Description]

The data file is not a regular file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.28 17930

database connection requirement not indicated during registration

[Description]

database connection requirement not indicated during background worker registration

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.29 17931

declared name @1@ is already defined

[Description]

declared name has been defined already

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.30 17934

EVP error code @1@

[Description]

Non zero error message. The error number returned by ERR_get_error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.31 17935

EVP error code @1@

[Description]

EVP error code

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.32 17936

FOR value should be positive integer

[Description]

FOR loop value should be positive integer

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.33 17937

foreign key referenced-columns list must not contain duplicates

[Description]

The provided foreign key referenced-columns list contain duplicates

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.34 17938

foreign-data wrapper "@1@" does not support IMPORT FOREIGN SCHEMA

[Description]

IMPORT FOREIGN SCHEMA doesn't supported by the foerign data wrapper

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.35 17939

improper use of "*"

[Description]

improper use of "\"*" in the indirection reference

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.36 17941

initial position must not be null

[Description]

First member of the array must not be nul

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.37 17942

invalid action (CREATE) for regular file

[Description]

Regular files are created with open_target_file function, not with this

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.38 17943

invalid block_id @1@ at @2@/@3@

[Description]

invalid block_id in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.39 17944

Invalid character value.

[Description]

Invalid XML character value.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.40 17945

invalid compressed image at @1@/@2@, block @3@

[Description]

The provided index is not a BRIN index

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.41 17947

invalid input syntax for type @1@: "@2@"

[Description]

invalid input syntax for type txid_snapshot

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.42 17948

invalid line number: @1@

[Description]

Provided line number is wrong in the sql query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.43 17949

invalid magic number in dynamic shared memory segment

[Description]

Invalid dynamic shared memory segment

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.44 17950

invalid MultiXactId: @1@

[Description]

Invalid multixactid parameter

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.45 17951

invalid value "@1@" for "@2@"

[Description]

Invalid argument

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.46 17953

invalid value in ECOBPG_NCHAR on line @1@. The valid value is UTF16LE/ UTF16BE/ UTF32LE/ UTF32BE/ SJIS/ COBOL_EUC.

[Description]

Invalid ECOBPG_NCHAR environment variable value

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.47 17954

Junk view columns are not updatable.

[Description]

Write operation Junk view columns are not updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.48 17955

length of nvarchar type is not assigned

[Description]

length of nvarchar type is not assigned

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.49 17956

local user with ID @1@ does not exist

[Description]

Lookup user name failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.50 17957

lost connection to parallel worker

[Description]

Error while reading message queue may caused the worker to be shutdown

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.51 17958

Malformed declaration: missing version.

[Description]

Version number missing in xml document/content

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.52 17959

Missing encoding in text declaration.

[Description]

missing encoding in xml document/content

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.53 17960

more than one row returned for \gset

[Description]

more than one row returned for \gset command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.54 17961

must be owner of event trigger @1@

[Description]

must be owner of the even trigger

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.55 17962

national characters is not supported on non-utf8 databases.

[Description]

national characters is not supported on non-utf8 databases.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.56 17963

neither BKPIMAGE_HAS_HOLE nor BKPIMAGE_IS_COMPRESSED set, but block image length is @1@ at @2@/ @3@

[Description]

neither BKPIMAGE_HAS_HOLE nor BKPIMAGE_IS_COMPRESSED set, but block impage length is provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.57 17964

nested service specifications not supported in service file "@1@", line @2@

[Description]

nested service specifications not supported in service file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.58 17965

no Decimal attribute in module

[Description]

no Decimal attribute in module

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.59 17966

no EVP error reported

[Description]

The errorcode returned by ERR_get_error() function is zero.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.60 17967

no rows returned for \gset

[Description]

no rows returned for \gset command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.61 17968

no SSL error reported

[Description]

no SSL error reported

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.62 17969

not enough arguments for cursor "@1@"

[Description]

syntax error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.63 17970

number of parameters must be between 0 and 65535

[Description]

number of parameters must be between 0 and 65535

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.64 17972

operator not allowed in variable definition

[Description]

Only sizeof operation is allowed in variable definition

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.65 17973

operator too long

[Description]

The length of the operator is more than or equal to 64 characters

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.66 17974

out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.67 17975

out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.68 17976

out-of-order block_id @1@ at @2@/@3@

[Description]

Out-of-order blocks in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.69 17977

Parsing XML declaration: '?>' expected.

[Description]

Provided XML declaration is unfinished

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.70 17978

pclose failed: @1@

[Description]

pclose system call failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.71 17979

permission denied to reassign objects

[Description]

Insufficient privileges on the object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.72 17980

pgpipe: could not accept connection: error code @1@

[Description]

Failure in reading a symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.73 17981

record with invalid length at @1@/@2@

[Description]

record with invalid length in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.74 17982

requested character not valid for encoding: @1@

[Description]

Invalid character for the encoding

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.75 17984

source file list is empty

[Description]

Source file list is empty

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.76 17985

Space required.

[Description]

Space required in the specified location of XML content.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.77 17986

SPI_execute failed: @1@

[Description]

Failure in SPI_execute function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.78 17987

SPI_execute_plan failed: @1@

[Description]

Failure in SPI_execute_plan function

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.79 17988

SSL error code @1@

[Description]

SSL has reported some error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.80 17989

standalone accepts only 'yes' or 'no'.

[Description]

XML standalone accepts only 'yes' or 'no'.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.81 17990

STDIN/STDOUT not allowed with PROGRAM

[Description]

STDIN/STDOUT not allowed with PROGRAM in copy command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.82 17991

symbolic link "@1@" target is too long

[Description]

Symbolic link target length is more than the specified length

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.83 17992

symbolic link target too long for tar format: file name "@1@", target "@2@"

[Description]

provided symbolic link target name is too long for tar format

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.84 17993

tablesample method @1@ requires @2@ argument, not @3@

[Description]

Invalid number of tablespample arguments

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.85 17995

The server (version @1@) does not support editing function source.

[Description]

The server does not support editing function source.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.86 17996

time zone "@1@" appears to use leap seconds

[Description]

The provided timezone appears to have leap seconds

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.87 17997

too many arguments for cursor "@1@"

[Description]

syntax error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.88 17999

type modifier cannot have ORDER BY

[Description]

type modifier cannot have ORDER BY clause

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77 Message Numbers Beginning with 18000

2.77.1 18000

unexpected EOF while reading file "@1@"

[Description]

unexpected EOF reach while reading file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.2 18001

unexpected page modification for directory or symbolic link "@1@"

[Description]

unexpected page modification for directory or symbolic link

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.3 18002

unexpected result set after end-of-streaming

[Description]

unexpected data after end-of-streaming

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.4 18003

unexpected result status for \\watch

[Description]

unexpected result status for \\watch command

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.5 18004

unexpected standby message type "@1@", after receiving CopyDone

[Description]

unexpected standby message type after copyDone

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.6 18005

Unix-domain socket path "@1@" is too long (maximum @2@ bytes)

[Description]

unix-domain socket path has crossed more than 100 bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.7 18006

UNNEST() with multiple arguments cannot have a column definition list

[Description]

UNNEST() with multiple arguments cannot have a column definition list

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.8 18008

Unrecognized libxml error code: @1@.

[Description]

Unknown code error - the default error

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.9 18009

unrecognized object type in default privileges: @1@

[Description]

Unrecognized object type

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.10 18010

unterminated /* comment

[Description]

unterminated /* comment in the sql query

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.11 18011

User "@1@" has an expired password.**[Description]**

user's password has been expired

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.12 18012

User "@1@" has no password assigned.**[Description]**

no password has assigned to user

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.13 18013

user name lookup failure: error code @1@**[Description]**

Lookup user name failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.14 18014

View columns that are not columns of their base relation are not updatable.**[Description]**

Write operation View columns that are not columns of their base relation are not updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.15 18015

View columns that refer to system columns are not updatable.

[Description]

Write operation View columns that refer to system columns are not updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.16 18016

View columns that return whole-row references are not updatable.

[Description]

Write operation View columns that return whole-row references are not updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.17 18017

Views containing DISTINCT are not automatically updatable.

[Description]

Write operation Views containing DISTINCT clause are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.18 18018

Views containing GROUP BY are not automatically updatable.

[Description]

Write operation Views containing GROUP BY clause are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.19 18019

Views containing HAVING are not automatically updatable.

[Description]

Write operation Views containing HAVING clause are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.20 18020

Views containing LIMIT or OFFSET are not automatically updatable.

[Description]

write operation Views containing LIMIT or OFFSET are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.21 18021

Views containing TABLESAMPLE are not automatically updatable.

[Description]

Write operation Views containing TABLESAMPLE are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.22 18022

Views containing UNION, INTERSECT, or EXCEPT are not automatically updatable.

[Description]

Write operation Views containing UNION, INTERSECT, or EXCEPT are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.23 18023

Views containing WITH are not automatically updatable.

[Description]

Write operation Views containing WITH are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.24 18024

Views that do not select from a single table or view are not automatically updatable.

[Description]

Write operation Views that do not select from a single table or view are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.25 18025

Views that have no updatable columns are not automatically updatable.

[Description]

Write operation Views that have no updatable columns are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.26 18026

Views that return aggregate functions are not automatically updatable.

[Description]

Write operation Views that return aggregate functions are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.27 18027

Views that return set-returning functions are not automatically updatable.

[Description]

Write operation Views that return set-returning functions are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.28 18028

Views that return window functions are not automatically updatable.

[Description]

Write operation Views that return window functions are not automatically updatable.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.29 18029

WAL file is from different database system: incorrect XLOG_BLCKSZ in page header

[Description]

WAL file is from a different database not generated by these binaries because of mismatch in WAL block size

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.30 18030

WAL file is from different database system: incorrect XLOG_SEG_SIZE in page header

[Description]

WAL file is from a different database not generated by these binaries because of mismatch in WAL segment size

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.31 18034

window function @1@ cannot have WITHIN GROUP

[Description]

window function cannot have WITHIN GROUP

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.32 18035

window function @1@ requires an OVER clause

[Description]

True window functions must be called with a window definition

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.33 18036

WITH CHECK OPTION not supported on recursive views

[Description]

WITH CHECK OPTION not supported on recursive views

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.34 18038

"@1@" must be registered in shared_preload_libraries and session_preload_libraries

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.35 18039

"@1@" must be registered in shared_preload_libraries

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.36 18044

duplicate lock detected

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.37 18049

internal error. memory not allocated.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.38 18050

internal error. unknown code.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.39 18058

ROS has not been formatted yet.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.40 18061

could not read from SMC evacuating temporary file: @1@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.41 18066

vci_index_size requires 1 argument

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.42 18067

cannot alter table because the table is indexed by VCI

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.43 18068

ALTER INDEX SET TABLESPACE is not supported for VCI

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.44 18069

REINDEX is not supported for VCI

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.45 18072

access method "@1@" does not support EXCLUDE clause

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.46 18073

access method "@1@" does not support index on temporary table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.47 18074

access method "@1@" does not support to CREATE INDEX on the expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.48 18075

access method "@1@" does not support concurrent index drop

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.49 18076

access method "@1@" does not support concurrent index build

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.50 18077

access method "@1@" does not support partial-index

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.51 18078

access method "@1@" does not support index on materialized view

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.52 18079

compression buffer is full

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.77.53 18091

could not start background process : postmaster died

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.54 18092

could not stop background process

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.55 18093

could not register background process

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.56 18097

could not open file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.77.57 18099

out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.78 Message Numbers Beginning with 18100

2.78.1 18103

could not identify a comparison function for type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.2 18104

aggregate @1@ needs to have compatible input type and transition type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.3 18105

aggregate function calls cannot be nested

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.4 18106

cannot pass more than @1@ argument to a function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.5 18108

value out of range: underflow

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.6 18109

value out of range: overflow

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.7 18112

access method "@1@" does not work under full_page_writes=off

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.8 18113

slot name must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.9 18114

options array must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.10 18115

cannot create a RETURNING list for a relation containing dropped columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.11 18116

path element at position @1@ is null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.12 18117

path element at position @1@ is not an integer: "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.13 18118

role with OID @1@ does not exist

[Description]

An error occurred during DB Server processing in the database.

[System Processing]

Processing will be aborted.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.78.14 18119

BKPBLOCK_HAS_DATA not set, but data length is @1@ at @2@/@3@

[Description]

BKPBLOCK_HAS_DATA not set, but data length is present in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.15 18120

BKPBLOCK_HAS_DATA set, but no data included at @1@/@2@

[Description]

BKPBLOCK_HAS_DATA set, but no data in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.16 18121

BKPBLOCK_SAME_REL set but no previous rel at @1@/@2@

[Description]

BKPBLOCK_SAME_REL set but no previous rel is provided in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.17 18122

BKPIMAGE_HAS_HOLE not set, but hole offset @1@ length @2@ at @3@/@4@

[Description]

BKPIMAGE_HAS_HOLE not set, but hole offset is provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.18 18123

BKPIMAGE_HAS_HOLE set, but hole offset @1@ length @2@ block image length @3@ at @4@/@5@

[Description]

BKPIMAGE_HAS_HOLE set, but hole offset is not provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.19 18124

BKPIMAGE_IS_COMPRESSED set, but block image length @1@ at @2@/@3@

[Description]

BKPIMAGE_IS_COMPRESSED set, but block image length is not provided.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.20 18126

invalid block_id @1@ at @2@/@3@

[Description]

invalid block_id in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.21 18127

neither BKPIMAGE_HAS_HOLE nor BKPIMAGE_IS_COMPRESSED set, but block image length is @1 @ at @2@/@3@

[Description]

neither BKPIMAGE_HAS_HOLE nor BKPIMAGE_IS_COMPRESSED set, but block image length is provided

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.22 18128

out-of-order block_id @1 @ at @2@/@3@

[Description]

Out-of-order blocks in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.23 18129

could not look up effective user ID @1 @: @2@

[Description]

Getting the current user details failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.24 18130

could not look up effective user ID @1 @: @2@

[Description]

Getting the current user details failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.25 18131

pclose failed: @1 @

[Description]

pclose system call failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.26 18132

pclose failed: @1 @

[Description]

pclose system call failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.27 18133

pclose failed: @1 @

[Description]

pclose system call failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.28 18134

pclose failed: @1 @

[Description]

pclose system call failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.29 18135

Valid values are "none", "AES128" and "AES256".

[Description]

Wrong tablespace encryption algorithm is passed during CREATE TABLESPACE command.

[System Processing]

Processing will be aborted

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.30 18136

parameter "parallel" must be SAFE, RESTRICTED, or UNSAFE

[Description]

Invalid parallel option is passed for the function to be created with CREATE FUNCTION command.

[System Processing]

Processing will be aborted

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.31 18137

Sets the maximum number of parallel processes per executor node.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.78.32 18139

Sets the planner's estimate of the cost of passing each tuple (row) from worker to master backend.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.78.33 18140

Sets the planner's estimate of the cost of starting up worker processes for parallel query.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.78.34 18144

no EVP error reported

[Description]

The errorcode returned by ERR_get_error() function is zero.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.35 18145

WARNING: password file "@1@" has group or world access; permissions should be u=rw (0600) or less

[Description]

Password file has group or world access.

[System Processing]

WARNING is issued

[Action]

To investigate the cause of the occurrence from the message, and remove cause for the WARNING.

2.78.36 18146

WARNING: password file "@1@" is not a plain file

[Description]

Password file is not a plain file.

[System Processing]

WARNING is issued

[Action]

To investigate the cause of the occurrence from the message, and remove cause for the WARNING.

2.78.37 18147

nested /* ... */ comments

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.38 18148

Please log in (using, e.g., "su") as the (unprivileged) user that willown the server process.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.39 18149

could not change permissions of directory "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.40 18150

Check your installation or specify the correct path using the option -L.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.41 18151

invalid locale settings; check LANG and LC_* environment variables

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.42 18152

You must identify the directory where the data for this database system will reside. Do this with either the invocation option `-D` or the environment variable `PGDATA`.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.43 18153

Data page checksums are disabled.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.78.44 18154

Data page checksums are enabled.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.78.45 18155

index "@1@" cannot be used as replica identity because column @2@ is a system column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.46 18157

parameter value for ALTER SYSTEM must not contain a newline

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.47 18162

multiple Python libraries are present in session

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.48 18163

Only one Python major version can be used in one session.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.49 18164

syncing target data directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.50 18168

reading user-defined tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.51 18169

requested compression not available in this installation -- archive will be uncompressed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.52 18170

WARNING: unexpected extra results during COPY of table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.53 18171

Synchronized snapshots on standby servers are not supported by this server version. Run with --no-synchronized-snapshots instead if you do not need synchronized snapshots.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.54 18172

TCP user timeout

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.55 18173

Cancel queries that conflict with recovery during hot standby promotion.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.56 18174

could not load library "vci.so": @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.57 18175

debug_helper must be loaded via shared_preload_libraries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.58 18176

[debug_helper injects error](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.59 18177

[More details may be available in the server log.](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.60 18178

[Kill all remaining database processes and restart the database.](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.61 18179

[deadlock detected](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.62 18180

VCI parallel execution is blocked by other operation.**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.63 18181

not enough maximum share memory for parallel query (@1@ bytes requested)**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.64 18182

You possibly need to raise the configuration parameter "vci.shared_work_mem" value to be at least @1@kB.**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.65 18183

You may need to increase max_worker_processes.**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.66 18184

unable to map dynamic shared memory segment

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.67 18185

too many workers already @1@/@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.68 18186

Failed while creating memory context "@1@".

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.69 18187

Failed on request of size @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.70 18188

failed to shm_open()

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.71 18189

could not open file "@1@": @2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.72 18190

could not get process AffinityMask: error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.73 18191

Failed system call was DuplicateHandle.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.74 18192

could not create semaphore: error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.75 18193

Failed system call was GetModuleHandle("ntdll.dll").

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.76 18194

could not get address of "NtQuerySystemInformation": error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.77 18195

Failed system call was GetModuleHandle("NtQuerySystemInformation").

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.78 18196

could not get system processor performance information : error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.79 18197

Failed system call was NtQuerySystemInformation.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.80 18198

cannot find vci.smc_directory: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.81 18199

could not create shared memory segment: error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79 Message Numbers Beginning with 18200

2.79.1 18200

Failed system call was OpenFileMapping(name=@1@).

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.2 18201

Failed system call was MapViewOfFileEx.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.3 18202

could not map shared memory segment

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.4 18203

could not initialize security descriptor: error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.5 18204

Failed system call was InitializeSecurityDescriptor.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.6 18205

could not set security descriptor DACL: error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.7 18206

Failed system call was SetSecurityDescriptorDacl.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.8 18207

Failed system call was CreateFileMapping(size=@1@, name=@2@).

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.9 18208

could not get priority class: error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.10 18209

Failed system call was GetPriorityClass.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.11 18210

could not set priority class=@1 @: error code @2 @

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.12 18211

Failed system call was SetPriorityClass.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.13 18212

pgx_prewarm_vci requires one argument

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.14 18213

relation cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.15 18214

@1@(VCI index regclass)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.16 18215

@1@ is not VCI index

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.17 18216

extension '@1@' does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.18 18217

function '@1@.@2@('

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.19 18218

Disable VCI by 'SELECT vci_disable();'

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.20 18219

internal error. unsupported compression format.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.21 18220

column missed in VCI index creation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.22 18221

This must never happen. Give up to use VCI index.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.23 18222

internal error: unsupported compression type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.24 18223

relation full

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.25 18224

internal error. unsupported compression type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.26 18225

Use DROP INDEX "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.27 18226

unexpected index access method call : "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.28 18227

duplicated columns in vci index creation: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.29 18228

duplicated columns are specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.30 18229

data type @1@ is not supported for access method "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.31 18230

unexpected attribute length

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.32 18231

You must drop index "@1@" before using this command.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.33 18232

DROP INDEX and CREATE INDEX instead

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.34 18233

only VCI index is supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.35 18234

extension "@1@" cannot specify a schema name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.36 18235

cannot cluster tables including @1 @ index(es)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.37 18236

Use DROP INDEX @1 @ first

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.38 18237

Use DROP INDEX to remove an vci index and try again without CONCURRENTLY option

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.39 18238

Try again without CONCURRENTLY option

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.40 18239

extension "@1@" prohibits this operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.41 18240

extension "@1@" prohibits this operation on access method "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.42 18241

extension "@1@" prohibits this operation on operation class "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.43 18242

extension "@1@" prohibits this operation on operation family "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.44 18243

extension "@1@" prohibits this operation on view "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.45 18244

database @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.46 18245

undefined lock state

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.47 18246

This might happen when CREATE INDEX fails. "DROP INDEX @1@" and CREATE INDEX again may help.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.48 18247

incompatible VCI version: expected (@1@, @2@), stored (@3@, @4@).

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.49 18248

This can happen when accessing old database with newer VCI modules. DROP and CREATE INDEX may help.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.50 18249

internal error. unsupported parameter.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.51 18250

Normally relations of VCI index are smaller than the table relation, therefore this error must not happen. Disable VCI by 'SELECT vci_disable()'

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.52 18251

data relation full

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.53 18252

vci index "@1@" corrupted

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.54 18253

TID (@1@, @2@) has been deleted from table "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.55 18254

try to insert TID (@1@, @2@) into ROS twice: extentId=@3@, index=@4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.56 18255

try to delete TID (@1@, @2@) into local delete list

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.57 18256

try to delete TID (@1 @, @2 @) into delete vector twice

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.58 18257

too many WOS rows over estimation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.59 18258

The number of devices exceeds the upper bound

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.60 18259

database connection requirement not indicated during registration

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.61 18260

invalid processing mode in background worker

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.62 18261

terminating VCI worker process due to administrator command

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.63 18262

"@1@" is not directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.64 18263

could not create directory "@1@" : @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.65 18264

could not stat directory "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.66 18265

needs to set at least @1@ to "max_worker_processes"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.67 18266

You will specify more than $\text{vci.control_max_workers} + (\# \text{ of CPU cores}) * @1@ + 1$ to the configuration parameter "max_worker_processes".

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.68 18267

extension "@1@" cannot be installed under this version of PostgreSQL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.69 18268

crash_emulation must be loaded via shared_preload_libraries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.70 18269

standby mode is not supported by single-user servers

[Description]

An error occurred during DB Server processing in the database.

[System Processing]

Processing will be aborted.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.79.71 18270

constraint "@1@" conflicts with inherited constraint on relation "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.72 18271

constraint "@1@" conflicts with NOT VALID constraint on relation "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.73 18272

constraint "@1@" conflicts with NOT VALID constraint on child table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.74 18274

only one of --source-pgdata or --source-server can be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.75 18275

internal error. failed to split

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.76 18276

invalid attribute number @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.77 18277

duplicated columns in vci index creation: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.78 18278

duplicated columns are specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.79 18279

cannot use "ctid" column with other columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.80 18280

The "vci_column_ids" option is required when "ctid" column is specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.81 18281

The "vci_column_ids" option cannot be used without "ctid" column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.82 18282

index name cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.83 18283

table oid cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.84 18284

array of column names cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.85 18285

storage option cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.86 18286

column name cannot be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.87 18287

column "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.88 18288

SPI_connect failed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.89 18289

SPI_prepare failed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.90 18290

cannot execute multi-query in vci_create()

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.91 18291

You might fold the index name with double quotation marks.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.92 18292

SPI_excep failed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.93 18293

SPI_finish failed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.94 18294

unterminated quoted string

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.95 18295

failed to parse vci_create() options.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.96 18296

failed to parse a vci_create() options: an invalid pair

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.97 18297

unrecognized options: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.98 18298

WARNING: could not find where to insert IF EXISTS in statement "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.99 18299

could not find function definition for function with OID @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.80 Message Numbers Beginning with 18300

2.80.1 18300

could not create the spiexceptions module

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.80.2 18301

could not create exception "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.80.3 18302

exclusive backup not in progress

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.80.4 18303

USING expression contains a whole-row table reference.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.80.5 18304

cannot COPY to/from client in a SQL function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.80.6 18305

calculated CRC checksum does not match value stored in file

[Description]

An error occurred reading the pg_control file.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.80.7 18306

byte ordering mismatch

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.80.8 18307

operator family "@1@" of access method @2@ contains function @3@ with invalid support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.9 18308

operator family "@1@" of access method @2@ contains function @3@ with wrong signature for support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.10 18310

operator family "@1@" of access method @2@ contains invalid ORDER BY specification for operator @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.11 18311

operator family "@1@" of access method @2@ contains operator @3@ with wrong signature**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.12 18312

operator family "@1@" of access method @2@ is missing operator(s) for types @3@ and @4@**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.13 18313

operator family "@1@" of access method @2@ is missing support function(s) for types @3@ and @4@**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.14 18314

operator class "@1@" of access method @2@ is missing operator(s)**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.15 18315

operator class "@1@" of access method @2@ is missing operator(s)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.16 18316

posting list is too long

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Reduce the value of maintenance_work_mem.

2.80.17 18317

Reduce maintenance_work_mem.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.18 18318

GIN pending list cannot be cleaned up during recovery.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.19 18319

"@1@" is not a GIN index

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.20 18320

cannot access temporary indexes of other sessions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.21 18321

operator family "@1@" of access method @2@ contains support procedure @3@ with different left and right input types

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.22 18322

operator family "@1@" of access method @2@ contains function @3@ with invalid support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.23 18323

operator family "@1@" of access method @2@ contains function @3@ with wrong signature for support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.24 18324

operator family "@1@" of access method @2@ contains operator @3@ with invalid strategy number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.25 18325

operator family "@1@" of access method @2@ contains invalid ORDER BY specification for operator @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.26 18326

operator family "@1@" of access method @2@ contains operator @3@ with wrong signature

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.27 18327

operator class "@1@" of access method @2@ is missing support function @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.28 18328

operator class "@1@" of access method @2@ is missing support function @3@ or @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.29 18329

Valid values are "on", "off", and "auto".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.30 18330

operator family "@1@" of access method @2@ contains support procedure @3@ with different left and right input types

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.31 18331

operator family "@1@" of access method @2@ contains function @3@ with invalid support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.32 18332

operator family "@1@" of access method @2@ contains function @3@ with wrong signature for support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.33 18333

operator family "@1@" of access method @2@ contains operator @3@ with invalid strategy number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.34 18334

operator family "@1@" of access method @2@ contains unsupported ORDER BY specification for operator @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.35 18335

operator family "@1@" of access method @2@ contains incorrect ORDER BY of family specification for operator @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.36 18336

operator family "@1@" of access method @2@ contains operator @3@ with wrong signature

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.37 18337

operator class "@1@" of access method @2@ is missing support function @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.38 18338

operator family "@1@" of access method @2@ contains support procedure @3@ with different left and right input types

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.39 18339

operator family "@1@" of access method @2@ contains function @3@ with wrong signature for support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.40 18340

operator family "@1@" of access method @2@ contains function @3@ with invalid support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.41 18341

operator family "@1@" of access method @2@ contains operator @3@ with invalid strategy number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.42 18342

operator family "@1@" of access method @2@ contains invalid ORDER BY specification for operator @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.43 18343

operator family "@1@" of access method @2@ contains operator @3@ with wrong signature

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.44 18344

operator family "@1@" of access method @2@ lacks support function for operator @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.45 18345

operator family "@1@" of access method @2@ is missing operator(s) for types @3@ and @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.46 18346

operator class "@1@" of access method @2@ is missing operator(s)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.47 18347

operator family "@1@" of access method @2@ is missing cross-type operator(s)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.48 18348

access method "@1@" is not of type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.49 18349

index access method "@1@" does not have a handler

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.50 18350

This can be caused by an interrupted VACUUM in version 9.3 or older, before upgrade. Please REINDEX it.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.51 18351

operator family "@1@" of access method @2@ contains function @3@ with invalid support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.52 18352

operator family "@1@" of access method @2@ contains function @3@ with wrong signature for support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.53 18353

operator family "@1@" of access method @2@ contains operator @3@ with invalid strategy number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.54 18354

operator family "@1@" of access method @2@ contains invalid ORDER BY specification for operator @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.55 18355

operator family "@1@" of access method @2@ contains operator @3@ with wrong signature

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.56 18356

operator family "@1@" of access method @2@ is missing operator(s) for types @3@ and @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.57 18357

operator family "@1@" of access method @2@ is missing support function for types @3@ and @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.58 18358

operator class "@1@" of access method @2@ is missing operator(s)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.59 18359

operator family "@1@" of access method @2@ is missing cross-type operator(s)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.60 18360

operator family "@1@" of access method @2@ contains support procedure @3@ with different left and right input types

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.61 18361

operator family "@1@" of access method @2@ contains function @3@ with invalid support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.62 18362

operator family "@1@" of access method @2@ contains function @3@ with wrong signature for support number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.63 18363

operator family "@1@" of access method @2@ contains operator @3@ with invalid strategy number @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.64 18364

operator family "@1@" of access method @2@ contains invalid ORDER BY specification for operator @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.65 18365

operator family "@1@" of access method @2@ contains operator @3@ with wrong signature

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.66 18366

operator family "@1@" of access method @2@ is missing operator(s) for types @3@ and @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.67 18367

operator family "@1@" of access method @2@ is missing support function @3@ for type @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.68 18368

operator class "@1@" of access method @2@ is missing operator(s)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.69 18369

Make sure the configuration parameter "@1@" is set on the master server.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.70 18370

Make sure the configuration parameter "@1@" is set.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.71 18371

Execute a database-wide VACUUM in that database. You might also need to commit or roll back old prepared transactions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.72 18372

database "@1@" must be vacuumed before @2@ more MultiXactId is used

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.80.73 18373

database with OID @1@ must be vacuumed before @2@ more MultiXactId is used

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.80.74 18374

This command would create a multixact with @1@ members, but the remaining space is only enough for @2@ member.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.75 18375

Execute a database-wide VACUUM in database with OID @1@ with reduced vacuum_multixact_freeze_min_age and vacuum_multixact_freeze_table_age settings.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.76 18376

database with OID @1@ must be vacuumed before @2@ more multixact member is used

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.77 18377

Execute a database-wide VACUUM in that database with reduced vacuum_multixact_freeze_min_age and vacuum_multixact_freeze_table_age settings.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.78 18378

Expected a write-ahead log switchpoint location.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.79 18379

requested timeline @1@ is not in this server's history

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.80.80 18380

Failed while allocating a WAL reading processor.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.81 18381

could not read two-phase state from WAL at @1@/@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.80.82 18382

expected two-phase state data is not present in WAL at @1@/@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.80.83 18383

Stop the postmaster and vacuum that database in single-user mode. You might also need to commit or roll back old prepared transactions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.84 18384

The database cluster was initialized with LOBLKSIZE @1 @, but the server was compiled with LOBLKSIZE @2 @.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.80.85 18387

@1 @ "@2 @": @3 @

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.80.86 18388

aborting backup due to backend exiting before pg_stop_backup was called

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.80.87 18389

a backup is already in progress in this session

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.80.88 18390

non-exclusive backup in progress

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

Try using `pg_stop_backup('f')` to stop a non-exclusive backup.

2.80.89 18391

non-exclusive backup is not in progress

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

Try using `pg_stop_backup('t')` to stop an exclusive backup.

2.80.90 18392

pg_class heap OID value not set when in binary upgrade mode

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.80.91 18393

return type of inverse transition function @1@ is not @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.92 18394

return type of combine function @1@ is not @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.93 18395

combine function with transition type @1@ must not be declared STRICT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.94 18396

return type of serialization function @1@ is not @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.95 18397

return type of deserialization function @1@ is not @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.96 18398

aggregate mfinalfunc must not be specified without mstype

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.97 18399

serialization functions may be specified only when the aggregate transition data type is @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81 Message Numbers Beginning with 18400

2.81.1 18400

must specify both or neither of serialization and deserialization functions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.2 18401

permission denied to create access method "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.3 18402

must be superuser to drop access methods

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.4 18403

handler function is not specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.5 18404

DO INSTEAD NOTHING rules are not supported for COPY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.6 18405

conditional DO INSTEAD rules are not supported for COPY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.7 18406

DO ALSO rules are not supported for the COPY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.8 18407

multi-statement DO INSTEAD rules are not supported for COPY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.9 18408

COPY query must have a RETURNING clause

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.10 18409

FORCE_NULL column "@1@" not referenced by COPY

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.11 18410

There is @1@ active slot

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.12 18411

There is @1@ other session using the database.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.13 18412

There is @1@ prepared transaction using the database.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.14 18413

access method "@1@" does not exist, skipping

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.81.15 18414

Must be superuser to create an event trigger.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.16 18415

filter value "@1@" not recognized for filter variable "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.17 18416

The owner of an event trigger must be a superuser.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.18 18417

Use CREATE EXTENSION ... CASCADE to install required extensions too.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.19 18418

file "@1@" is too large

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.20 18420

index creation on system columns is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.21 18421

Create a unique index with no WHERE clause on one or more columns of the materialized view.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.22 18422

join estimator function @1@ must return type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.23 18423

operator attribute "@1@" cannot be changed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.24 18424

All roles are members of the PUBLIC role.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.25 18425

role "@1@" could not be removed from policy "@2@" on "@3@"

[Description]

A warning has occurred during execution of the application or command.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.26 18426

You might need to add an explicit cast.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.27 18427

You might need to specify "USING @1@::@2@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.28 18428

@1@ depends on column "@2@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.29 18429

tablespace location should not be inside the data directory

[Description]

A warning has occurred during execution of the application or command.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.30 18430

Open the existing keystore, or set the master encryption key to create and open a new keystore

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.31 18431

Tablespace "@1@" does not exist.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.32 18432

Foreign tables cannot have TRUNCATE triggers.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.33 18433

Foreign tables cannot have constraint triggers.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.34 18434

Consider using an AFTER trigger instead of a BEFORE trigger to propagate changes to other rows.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.35 18435

type input function @1@ should not be volatile

[Description]

An error occurred during execution of the application or command.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that functions are not marked as volatile.

2.81.36 18436

type output function @1@ should not be volatile

[Description]

An error occurred during execution of the application or command.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that functions are not marked as volatile.

2.81.37 18437

type receive function @1 @ should not be volatile

[Description]

An error occurred during execution of the application or command.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that functions are not marked as volatile.

2.81.38 18438

type send function @1 @ should not be volatile

[Description]

An error occurred during execution of the application or command.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that functions are not marked as volatile.

2.81.39 18439

type modifier input function @1 @ should not be volatile

[Description]

An error occurred during execution of the application or command.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that functions are not marked as volatile.

2.81.40 18440

type modifier output function @1 @ should not be volatile

[Description]

An error occurred during execution of the application or command.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that functions are not marked as volatile.

2.81.41 18441

You must specify an operator class for the range type or define a default operator class for the subtype.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.42 18442

Use ALTER TABLE instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.43 18443

VACUUM option DISABLE_PAGE_SKIPPING cannot be used with FULL

[Description]

The DISABLE_PAGE_SKIPPING option cannot be used with VACUUM FULL or ANALYZE commands.

[System Processing]

Processing is aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.44 18444

oldest multixact is far in the past

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Close open transactions with multixacts soon to avoid wraparound problems.

2.81.45 18445

Close open transactions with multixacts soon to avoid wraparound problems.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.46 18446

Unrecognized key word: "@1@".

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.47 18447

Conflicting "datestyle" specifications.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.48 18448

Cannot specify months in time zone interval.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.49 18449

Cannot specify days in time zone interval.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.50 18450

PostgreSQL does not support leap seconds.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.51 18451

UTC timezone offset is out of range.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.52 18452

You can use REPEATABLE READ instead.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.53 18453

Conversion between @1@ and @2@ is not supported.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.54 18454

Cannot change "client_encoding" now.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.55 18455

cannot change client_encoding during a parallel operation

[Description]

This error occurs if a function wants to set client_encoding and is invoked by the parallel query.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that client_encoding is not set by the parallel query operation.

2.81.56 18456

Valid values are "local" and "cascaded".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.57 18457

Key conflicts exist.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.58 18458

Key conflicts with existing key.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.59 18459

Failing row contains @1@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.60 18460

Use the REFRESH MATERIALIZED VIEW command.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.61 18461

combine function for aggregate @1@ must be declared as STRICT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.62 18462

Ensure that no rows proposed for insertion within the same command have duplicate constrained values.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.63 18463

could not send tuple to shared-memory queue

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.81.64 18464

BSD authentication failed for user "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.65 18465

Connection matched pg_hba.conf line @1@: "@2@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.66 18466

could not translate name

[Description]

An error occurred while translating domain name to Kerberos realm name in SSL.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the domain name is written correctly.

2.81.67 18467

realm name too long

[Description]

An error occurred while translating domain name to Kerberos realm name in SSL.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the domain name is written correctly.

2.81.68 18468

translated account name too long

[Description]

An error occurred while translating account name to Kerberos user name in SSL.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the account name is written correctly.

2.81.69 18469

pam_set_item(PAM_RHOST) failed: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.70 18470

LDAP search for filter "@1@" on server "@2@" returned @3@ entry.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.71 18471

RADIUS response from @1@ has corrupt length: @2@ (actual length @3@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.72 18472

private key file "@1@" is not a regular file

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.73 18473

private key file "@1@" must be owned by the database user or root

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.74 18474

terminating connection due to unexpected postmaster exit

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the server is still running.

2.81.75 18475

Role "@1@" does not exist.

[Description]

The user does not exist.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.76 18476

User "@1@" has an expired password.

[Description]

The password is blank.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.77 18477

Password does not match for user "@1@".

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.78 18478

Specify exactly one connection type per line.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.79 18479

Specify one address range per line.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.80 18480

Specify an address range in CIDR notation, or provide a separate netmask.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.81 18481

Specify exactly one authentication type per line.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.82 18482

extensible node type "@1@" already exists

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.83 18483

ExtensibleNodeMethods "@1@" was not registered

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.84 18484

whole row unique index inference specifications are not supported

[Description]

The whole row unique index inference specifications are not supported.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.81.85 18485

It is SQL to which the outer joined operator is not supported. Please change to SQL that is using the joined table.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.86 18486

too many grouping sets present (maximum 4096)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the items in the GROUPING SET are less than the maximum allowable value.

2.81.87 18487

Put a separate column definition list for each function inside ROWS FROM().

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.88 18488

Use separate UNNEST() calls inside ROWS FROM(), and attach a column definition list to each one.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.89 18489

Put the column definition list inside ROWS FROM().

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.90 18490

For example, ON CONFLICT (column_name).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.91 18491

operator precedence change: @1@ is now lower precedence than @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.92 18492

There is an ordered-set aggregate @1@, but it requires @2@ direct arguments, not @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.93 18493

To use the hypothetical-set aggregate @1@, the number of hypothetical direct arguments (here @2@) must match the number of ordering columns (here @3@).

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.94 18494

There is an ordered-set aggregate @1@, but it requires at least @2@ direct arguments.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.95 18495

Could not choose a best candidate function. You might need to add explicit type casts.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.96 18496

FILTER is not implemented for non-aggregate window functions

[Description]

FILTER is not yet supported with true window functions.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.97 18497

The combining JOIN type must be INNER or LEFT for a LATERAL reference.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.98 18498

Perhaps you meant to reference the column "@1@.@2@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.81.99 18499

There is a column named "@1@" in table "@2@", but it cannot be referenced from this part of the query.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82 Message Numbers Beginning with 18500

2.82.1 18500

Perhaps you meant to reference the column "@1@.@2@" or the column "@3@.@4@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.2 18501

This error usually means that PostgreSQL's request for a shared memory segment exceeded your kernel's SHMMAX parameter, or possibly that it is less than your kernel's SHMMIN parameter. The PostgreSQL documentation contains more information about shared memory configuration.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.3 18502

This error usually means that PostgreSQL's request for a shared memory segment exceeded your kernel's SHMALL parameter. You might need to reconfigure the kernel with larger SHMALL. The PostgreSQL documentation contains more information about shared memory configuration.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.4 18503

This error does **not mean that you have run out of disk space. It occurs either if all available shared memory IDs have been taken, in which case you need to raise the SHMMNI parameter in your kernel, or because the system's overall limit for shared memory has been reached. The PostgreSQL documentation contains more information about shared memory configuration.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.5 18504

This error usually means that PostgreSQL's request for a shared memory segment exceeded available memory, swap space, or huge pages. To reduce the request size (currently @1@ bytes), reduce PostgreSQL's shared memory usage, perhaps by reducing shared_buffers or max_connections.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.6 18505

wrote crash dump to file "@1@"

[Description]

An error occurred.

[System Processing]

None

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.82.7 18506

background worker "@1@" : must be registered in shared_preload_libraries

[Description]

The background worker must be registered in shared_preload_libraries.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.8 18507

too many background workers

[Description]

Up to max_worker_processes background worker can be registered with the current settings.

[System Processing]

Processing will be aborted.

[Action]

Consider increasing the value of configuration parameter max_worker_processes.

2.82.9 18508

Up to @1@ background worker can be registered with the current settings.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.10 18509

Consider increasing the configuration parameter "max_worker_processes".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.11 18510

checkpoints are occurring too frequently (@1@ second apart)

[Description]

Checkpoints are occurring too frequently.

[System Processing]

Continues processing.

[Action]

Consider increasing the value of configuration parameter max_wal_size.

2.82.12 18511

using stale statistics instead of current ones because stats collector is not responding

[Description]

Using stale statistics instead of current ones because the statistics collector is not responding.

[System Processing]

Continues processing.

[Action]

Contact Fujitsu technical support.

2.82.13 18512

ending log output to stderr

[Description]

Ending log output to stderr.

[System Processing]

Continues processing.

[Action]

Future log output will be output to the log destination.

2.82.14 18513

Future log output will go to log destination "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.15 18514

Set the LC_ALL environment variable to a valid locale.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.16 18515

@1@: could not find the database systemExpected to find it in the directory "@2@",but could not open file "@3@": @4@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.82.17 18516

Valid values are: "false", 0, "true", 1, "database".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.18 18517

@1@ was not reloaded

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.82.19 18518

shutdown at recovery target

[Description]

Terminated normally, but a log message was output.

[System Processing]

None

[Action]

No action required.

2.82.20 18519

Failed process was running: @1@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.21 18520

could not fork checkpointer process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.82.22 18521

could not fork worker process: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.82.23 18522

could not parse connection string: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.82.24 18523

Could not identify system: got @1@ rows and @2@ fields, expected @3@ rows and @4@ or more fields.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.25 18524

Increase max_replication_slots and try again.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.26 18525

logical decoding found consistent point at @1@/@2@

[Description]

Transaction ID has finished. There are no more running transactions.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.27 18527

There are no running transactions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.28 18528

logical decoding found initial starting point at @1@/@2@

[Description]

The transaction needs to finish before building a snapshot.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.29 18530

Logical decoding will begin using saved snapshot.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.30 18531

could not parse file name "@1@"

[Description]

Could not parse file name in pg_logical/snapshots.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.31 18532

Replication slot names may only contain lower case letters, numbers, and the underscore character.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.32 18533

Free one or increase max_replication_slots.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.33 18534

standby "@1@" is now a synchronous standby with priority @2@

[Description]

Inform the user that the standby server is now a synchronous standby with priority number.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.34 18535

synchronous_standby_names parser failed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the value of synchronous_standby_names, which may come from postgresql.conf or the SQL command line.

2.82.35 18536

End of WAL reached on timeline @1@ at @2@/@3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.36 18537

primary server contains no more WAL on requested timeline @1@

[Description]

The primary server contains no more WALs on the requested timeline.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.37 18538

could not close log segment @1@: @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.82.38 18539

This server's history forked from timeline @1@ at @2@/@3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.39 18540

requested starting point @1@/@2@ is ahead of the WAL flush position of this server @3@/@4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.40 18541

terminating walsender process after promotion

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.41 18542

invalid page in block @1@ of relation @2@; zeroing out page

[Description]

In invalid page was found in the relation.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.42 18543

snapshot too old

[Description]

The snapshot is too old.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.82.43 18544

could not flush dirty data: @1@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.44 18545

could not determine dirty data size: @1@

[Description]

Could not determine dirty data size when flushing data.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.45 18546

could not munmap() while flushing data: @1@**[Description]**

An error is returned from the munmap function.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.82.46 18547

dynamic shared memory control segment is corrupt**[Description]**

Dynamic shared memory control segment is corrupt.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.47 18548

Set dynamic_shared_memory_type to a value other than "none".**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.48 18549

@1@ failed: @2@**[Description]**

An error occurred for epoll_ctl.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.82.49 18550

@1@ failed: @2@

[Description]

An error occurred for epoll_wait.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.82.50 18551

while updating tuple (@1@, @2@) in relation "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.51 18552

while deleting tuple (@1@, @2@) in relation "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.52 18553

while locking tuple (@1@, @2@) in relation "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.53 18554

while locking updated version (@1@, @2@) of tuple in relation "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.54 18555

while inserting index tuple (@1@, @2@) in relation "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.55 18556

while checking uniqueness of tuple (@1@, @2@) in relation "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.56 18557

while rechecking updated tuple (@1@, @2@) in relation "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.57 18558

while checking exclusion constraint on tuple (@1@, @2@) in relation "@3@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.58 18559

The source process with PID @1@ is not running anymore.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.59 18560

Process @1@ waits for @2@ on @3@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.60 18561

page verification failed, calculated checksum @1@ but expected @2@

[Description]

The calculated checksum is different from the checksum in the page head.

[System Processing]

Continues processing.

[Action]

No action required.

2.82.61 18562

could not open file "@1@" (target block @2@): previous segment is only @3@ blocks

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.82.62 18563

terminating connection because of crash of another server process

[Description]

The postmaster has commanded this server process to roll back the current transaction and exit, because another server process exited abnormally and possibly corrupted shared memory.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.82.63 18564

The postmaster has commanded this server process to roll back the current transaction and exit, because another server process exited abnormally and possibly corrupted shared memory.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.64 18565

terminating connection due to idle-in-transaction timeout

[Description]

Processing was canceled.

[System Processing]

Processing will be aborted.

[Action]

Check the message text.

2.82.65 18566

"max_stack_depth" must not exceed @1@kB.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.66 18567

increase the platform's stack depth limit via "ulimit -s" or local equivalent.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.67 18568

invalid affix flag "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.68 18569

affix flag "@1@" is out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.69 18570

invalid character in affix flag "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.70 18571

invalid affix flag "@1@" with "long" flag value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.71 18572

invalid affix alias "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.72 18573

invalid number of flag vector aliases

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.73 18574

Missing array dimension value.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.74 18575

Missing "@1@" after array dimensions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.75 18576

Array contents must start with "{".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.76 18577

Unexpected "@1@" character.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.77 18578

Unexpected array element.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.78 18579

Unmatched "@1@" character.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.79 18580

Multidimensional arrays must have sub-arrays with matching dimensions.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.80 18581

Junk after closing right brace.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.81 18582

array slice subscript must provide both boundaries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

When assigning to a slice of an empty array value, slice boundaries must be fully specified.

2.82.82 18583

When assigning to a slice of an empty array value, slice boundaries must be fully specified.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.83 18585

This time zone name appears in the configuration file for time zone abbreviation "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.84 18586

invalid size: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.85 18587

Invalid size unit: "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.86 18588

Valid units are "bytes", "kB", "MB", "GB", and "TB".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.87 18589

Input data is missing padding, is truncated, or is otherwise corrupted.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.88 18590

Character with value 0x@1@ must be escaped.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.89 18591

Unicode high surrogate must not follow a high surrogate.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.90 18592

Unicode low surrogate must follow a high surrogate.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.91 18593

\\u0000 cannot be converted to text.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.92 18594

Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.93 18595

Escape sequence "\\@1@" is invalid.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.94 18596

The input string ended unexpectedly.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.95 18597

Expected end of input, but found "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.96 18598

Expected JSON value, but found "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.97 18599

Expected string, but found "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83 Message Numbers Beginning with 18600

2.83.1 18600

Expected array element or "]", but found "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.2 18601

Expected ",", or "]", but found "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.3 18602

Expected string or "}", but found "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.4 18603

Expected ":", but found "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.5 18604

Expected ", " or "}", but found "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.6 18605

Token "@1@" is invalid.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.7 18606

JSON data, line @1@: @2@@3@@4@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.8 18607

The arguments of json_build_object() must consist of alternating keys and values.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.9 18608

Object keys should be text.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.10 18609

Due to an implementation restriction, jsonb strings cannot exceed @1@ bytes.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.11 18610

Try calling the function in the FROM clause using a column definition list.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.12 18611

cannot replace existing key

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Try using the function `jsonb_set` to replace the key value.

2.83.13 18612

Try using the function `jsonb_set` to replace key value.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.14 18613

levenshtein argument exceeds maximum length of @1@ characters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.15 18614

cannot use advisory locks during a parallel operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.16 18615

string is not a valid identifier: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

The string may have unclosed double quotation marks.

2.83.17 18616

String has unclosed double quotes.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.18 18617

Quoted identifier must not be empty.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.19 18618

No valid identifier before ".".**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.20 18619

No valid identifier after ".".**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.21 18620

Apply system library package updates.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.22 18621

invalid command name: "@1@"**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.23 18624

Valid values are "[]", "[]", "[]", and "()".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.24 18625

Junk after "empty" key word.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.25 18626

Missing left parenthesis or bracket.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.26 18627

Missing comma after lower bound.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.27 18628

Too many commas.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.28 18629

Junk after right parenthesis or bracket.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.29 18630

Key is not present in table "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.30 18631

Key is still referenced from table "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.31 18632

Numeric time zones must have "-" or "+" as first character.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.32 18633

timestamp out of range: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.33 18634

distance in phrase operator should not be greater than @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.34 18635

distance in phrase operator should be non-negative and less than @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.35 18636

lexeme array may not contain nulls

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.36 18637

weight array may not contain nulls

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.37 18638

unrecognized weight: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.38 18639

For a single "@1@" use "@2@@3@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.39 18640

This probably indicates that the version of libxml2 being used is not compatible with the libxml2 header files that PostgreSQL was built with.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.40 18641

Make sure keystore_location points to the correct location. If the setting is correct, set the master encryption key to create the keystore.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.41 18642

keystore has been opened

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.83.42 18643

auto-open keystore has been opened

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.83.43 18644

Compile with --with-openssl to use transparent data encryption.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.44 18645

Specify keystore_location parameter in postgresql.conf.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.45 18646

The length of the passphrase must be between @1@ and @2@ bytes.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.46 18647

Check if keystore_location parameter points to a correct directory.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.47 18648

TRAP: ExceptionalCondition: bad arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.83.48 18649

TRAP: @1@(" @2@", File: " @3@", Line: @4@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.83.49 18650

Server has FUNC_MAX_ARGS = @1@, library has @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.50 18651

Server has INDEX_MAX_KEYS = @1@, library has @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.51 18652

Server has NAMEDATALEN = @1@, library has @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.52 18653

Server has FLOAT4PASSBYVAL = @1@, library has @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.53 18654

Server has FLOAT8PASSBYVAL = @1@, library has @2@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.54 18655

Magic block has unexpected length or padding difference.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.55 18656

Either another server is starting, or the lock file is the remnant of a previous server startup crash.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.56 18657

could not open file "@1@": @2@; continuing anyway

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Continues processing.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.57 18658

lock file "@1@" contains wrong PID: @2@ instead of @3@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.58 18659

Specify a path outside the data directory.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.59 18660

Specify a path outside the transaction log directory.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.60 18661

replication connection authorized: user=@1@ SSL enabled (protocol=@2@, cipher=@3@, compression=@4@)

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.83.61 18662

connection authorized: user=@1@ database=@2@ SSL enabled (protocol=@3@, cipher=@4@, compression=@5@)

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.83.62 18663

must be superuser or replication role to start walsender

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.63 18665

@1@: could not access directory "@2@": @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.64 18666

Run initdb or pg_basebackup to initialize a PostgreSQL data directory.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.65 18667

@1@ does not know where to find the server configuration file. You must specify the --config-file or -D invocation option or set the PGDATA environment variable.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.66 18668

@1@ does not know where to find the database system data. This can be specified as "data_directory" in "@2@", or by the -D invocation option, or by the PGDATA environment variable.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.67 18669

@1@ does not know where to find the "hba" configuration file. This can be specified as "hba_file" in "@2@", or by the -D invocation option, or by the PGDATA environment variable.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.68 18670

@1@ does not know where to find the "ident" configuration file. This can be specified as "ident_file" in "@2@", or by the -D invocation option, or by the PGDATA environment variable.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.69 18671

Value exceeds integer range.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.70 18672

"temp_buffers" cannot be changed after any temporary tables have been accessed in the session.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.71 18673

Cannot enable parameter when "log_statement_stats" is true.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.72 18674

Cannot enable "log_statement_stats" when "log_parser_stats", "log_planner_stats", or "log_executor_stats" is true.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.73 18675

query-specified return tuple and function return type are not compatible

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.83.74 18676

query would be affected by row-level security policy for table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

To disable the policy for the table owner, use ALTER TABLE NO FORCE ROW LEVEL SECURITY.

2.83.75 18677

To disable the policy for the table's owner, use ALTER TABLE NO FORCE ROW LEVEL SECURITY.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.76 18678

Entry in time zone file "@1@", line @2@, conflicts with entry in file "@3@", line @4@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.77 18679

cannot have more than @1@ runs for an external sort

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.78 18680

Duplicate keys exist.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.79 18681

The source transaction is not running anymore.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.83.80 18682

@1@: WARNING: cannot create restricted tokens on this platform

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.81 18683

@1@: could not open process token: error code @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.82 18684

@1@: could not allocate SIDs: error code @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.83 18685

@1@: could not create restricted token: error code @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.84 18686

@1@: could not start process for command "@2@": error code @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.85 18687

@1@: could not re-execute with restricted token: error code @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.86 18688

@1@: could not get exit code from subprocess: error code @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.87 18689

You must run @1@ as the PostgreSQL superuser.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.88 18690

@1@: lock file "@2@" existsIs a server running? If not, delete the lock file and try again.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.89 18691

The database server was not shut down cleanly. Resetting the transaction log might cause data to be lost. If you want to proceed anyway, use -f to force reset.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.90 18692

If you are sure the data directory path is correct, execute touch @1@ and try again.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.91 18693

user does not exist

[Description]

user does not exist.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.92 18694

command not executable

[Description]

The command cannot be executed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.93 18695

command not found

[Description]

The command cannot be found.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.94 18696

The server (version @1@) does not support editing view definitions.

[Description]

The server does not support editing the view function.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.95 18697

out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.83.96 18698

There is no previous error.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.83.97 18699

Query buffer is empty.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84 Message Numbers Beginning with 18700

2.84.1 18700

The server (version @1@) does not support showing view definitions.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.2 18701

view name is required

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.3 18702

\pset: allowed Unicode column line styles are single, double

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.4 18703

\\pset: allowed Unicode header line styles are single, double

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.5 18704

Pager won't be used for less than @1@ line.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.6 18705

could not parse reloptions array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.7 18706

The connection to the server was lost. Attempting reset:

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.8 18707

canceled by user

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.9 18708

trying to exit copy mode

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.10 18709

\\crosstabview: statement did not return a result set

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.11 18710

\\crosstabview: query must return at least three columns

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.12 18711

\\crosstabview: vertical and horizontal headers must be different columns

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.13 18712

\\crosstabview: data column must be specified when query returns more than three columns

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.14 18713

\\crosstabview: maximum number of columns (@1 @) exceeded

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.15 18714

\\crosstabview: query result contains multiple data values for row "@1@", column "@2@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.16 18715

\\crosstabview: column number @1@ is out of range 1..@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.17 18716

\\crosstabview: ambiguous column name: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.18 18717

\\crosstabview: column name not found: "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.19 18718

The server (version @1@) does not support access methods.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.20 18719

Did not find any text search parser named "@1@".

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.21 18720

could not find own program executable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.22 18721

buffer size is wrong

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.23 18722

source or destination file is not specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.24 18723

too many command-line arguments (first is "@1@")

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.25 18724

out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.84.26 18725

could not create file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.27 18726

could not read file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.28 18727

could not write to file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.29 18728

could not fsync file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.30 18729

could not close file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.31 18730

user does not exist

[Description]

user does not exist.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.32 18731

user name lookup failure: error code @1@

[Description]

User name lookup failed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.33 18732

Cannot add header to table content: column count of @1@ exceeded.**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.34 18733

Cannot add cell to table content: total cell count of @1@ exceeded.**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.35 18734

invalid output format (internal error): @1@**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.36 18735

could not connect to database @1@: out of memory**[Description]**

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.84.37 18736

cannot reindex specific schema(s) in all databases

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.38 18737

cannot reindex specific schema(s) and system catalogs at the same time

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.39 18738

reindexing of schema "@1@" in database "@2@" failed: @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.40 18739

number of parallel jobs must be at least 1

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.41 18741

out of memory

[Description]

There was insufficient free space in the client's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

2.84.42 18742

could not obtain lock on relation "@1@"This usually means that someone requested an ACCESS EXCLUSIVE lock on the table after the pg_dump parent process had gotten the initial ACCESS SHARE lock on the table.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.43 18743

schema "@1@" not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.44 18744

table "@1@" not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.45 18745

index "@1@" not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.46 18746

function "@1@" not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.47 18747

trigger "@1@" not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.48 18748

WARNING: don't know how to set owner for object type "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.49 18749

archive was made on a machine with larger integers, some operations might fail

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.50 18750

archive is compressed, but this installation does not support compression -- no data will be available

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.51 18751

invalid creation date in header

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.52 18753

Synchronized snapshots are not supported by this server version. Run with --no-synchronized-snapshots instead if you do not need synchronized snapshots.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.53 18754

no matching tables were found for pattern "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.54 18755

Error message from server: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.55 18756

WARNING: owner of schema "@1@" appears to be invalid

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.56 18757

WARNING: owner of data type "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.57 18758

WARNING: owner of operator "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.58 18759

WARNING: owner of operator class "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.59 18760

WARNING: owner of operator family "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.60 18761

WARNING: owner of aggregate function "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.61 18762

WARNING: owner of function "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.62 18763

WARNING: owner of table "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.63 18764

WARNING: datatype of data type "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.64 18765

bogus value in proargmodes array

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.65 18766

could not parse proallargtypes array

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.66 18767

could not parse proargmodes array

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.67 18768

could not parse proargnames array

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.68 18769

could not parse proconfig array

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.69 18770

unrecognized proparallel value for function "@1@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.70 18771

bogus value in pg_cast.castfunc or pg_cast.castmethod field

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.71 18772

bogus value in pg_cast.castmethod field

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.72 18773

bogus transform definition, at least one of trffromsql and trftosql should be nonzero

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.73 18774

bogus value in pg_transform.trffromsql field

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.74 18775

bogus value in pg_transform.trftosql field

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.75 18777

WARNING: invalid type "@1@" of access method "@2@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.76 18778

aggregate function @1@ could not be dumped correctly for this database version; ignored

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.77 18779

could not parse initial GRANT ACL list (@1@) or initial REVOKE ACL list (@2@) for object "@3@" (@4@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.84.78 18780

could not parse reloptions array

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.84.79 18781

could not connect to server: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.80 18782

source server must not be in recovery mode

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.81 18783

full_page_writes must be enabled in the source server

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.82 18784

error running query (@1@) in source server: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.83 18785

unexpected result set from query

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.84 18786

unrecognized result "@1@" for current WAL insert location

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.85 18787

could not fetch file list: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.86 18788

unexpected result set while fetching file list

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.87 18789

could not send query: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.88 18790

could not set libpq connection to single row mode

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.89 18791

unexpected result while fetching remote files: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.90 18792

unexpected result set size while fetching remote files

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.91 18793

unexpected data types in result set while fetching remote files: @1@ @2@ @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.92 18794

unexpected result format while fetching remote files

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.93 18795

unexpected null values in result while fetching remote files

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.94 18796

unexpected result length while fetching remote files

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.95 18797

could not fetch remote file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.96 18798

unexpected result set while fetching remote file "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.97 18799

could not send COPY data: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85 Message Numbers Beginning with 18800

2.85.1 18801

could not send file list: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.2 18802

could not send end-of-COPY: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.3 18803

unexpected result while sending file list: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.4 18804

could not read WAL record at @1@/@2@: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.5 18805

could not read WAL record at @1@/@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.6 18806

could not find previous WAL record at @1@/@2@: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.7 18807

could not find previous WAL record at @1 @/@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.8 18808

WAL record modifies a relation, but record type is not recognized: lsn: @1 @/@2@, rmgr: @3@, info: @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.9 18809

cannot be executed by "root"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.10 18810

You must run @1 @ as the PostgreSQL superuser.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.11 18811

source and target clusters are from different systems

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.12 18812

clusters are not compatible with this version of pg_rewind

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.13 18813

target server needs to use either data checksums or "wal_log_hints = on"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.14 18814

target server must be shut down cleanly

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.15 18815

source data directory must be shut down cleanly

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.16 18816

invalid control file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.17 18817

could not find common ancestor of the source and target cluster's timelines

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.18 18818

backup label buffer too small

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.19 18819

unexpected control file CRC

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.20 18820

unexpected control file size @1@, expected @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.21 18822

syntax error in history file: @1@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.22 18823

Expected a numeric timeline ID.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.23 18824

Expected a write-ahead log switchpoint location.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.24 18825

invalid data in history file: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.25 18826

Timeline IDs must be in increasing sequence.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.26 18827

invalid data in history file

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.27 18828

Timeline IDs must be less than child timeline's ID.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.28 18829

invalid record offset at @1 @/@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.29 18830

contrecord is requested by @1 @/@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.30 18831

record length @1 @ at @2 @/@3 @ too long

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.31 18832

there is no contrecord flag at @1 @/@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.32 18833

invalid contrecord length @1@ at @2@/@3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.33 18834

invalid resource manager ID @1@ at @2@/@3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.34 18835

record with incorrect prev-link @1@/@2@ at @3@/@4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.35 18836

incorrect resource manager data checksum in record at @1@/@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.36 18837

invalid magic number @1@ in log segment @2@, offset @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.37 18838

invalid info bits @1@ in log segment @2@, offset @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.38 18839

WAL file is from different database system: WAL file database system identifier is @1@, pg_control database system identifier is @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.39 18840

WAL file is from different database system: incorrect XLOG_SEG_SIZE in page header

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.40 18841

WAL file is from different database system: incorrect XLOG_BLCKSZ in page header

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.41 18842

unexpected pageaddr @1@/@2@ in log segment @3@, offset @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.42 18843

out-of-sequence timeline ID @1@ (after @2@) in log segment @3@, offset @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.43 18844

record with invalid length at @1@/@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.44 18845

invalid compressed image at @1 @/@2@, block @3@**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.45 18847

WARNING: Calculated CRC checksum does not match value stored in file. Either the file is corrupt, or it has a different layout than this program is expecting. The results below are untrustworthy.**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.46 18848

byte ordering mismatch**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.47 18849

possible byte ordering mismatch The byte ordering used to store the pg_control file might not match the one used by this program. In that case the results below would be incorrect, and the PostgreSQL installation would be incompatible with this data directory.**[Description]**

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.48 18850

too many command-line arguments (first is "@1@")

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.49 18851

out of memory

[Description]

There was insufficient free space in the client's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

2.85.50 18852

cannot duplicate null pointer (internal error)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.51 18853

command not executable

[Description]

The command cannot be executed.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.52 18854

command not found

[Description]

The command cannot be found.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.53 18855

WARNING: online backup mode is activeShutdown will not complete until pg_stop_backup() is called.

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.85.54 18856

@1@: WARNING: cannot create restricted tokens on this platform

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.85.55 18857

@1@: WARNING: could not locate all job object functions in system API

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.85.56 18858

@1@: cannot be run as rootPlease log in (using, e.g., "su") as the (unprivileged) user that willown the server process.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.57 18859

out of memory

[Description]

There was insufficient free space in the client's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

2.85.58 18860

cannot duplicate null pointer (internal error)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.59 18861

out of memory

[Description]

There was insufficient free space in the client's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- Modify the application to reduce memory usage.

2.85.60 18862

replication slots can only be used with WAL streaming

[Description]

Replication slots can only be used with WAL streaming.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.61 18863

WAL directory location must be an absolute path

[Description]

The transaction log directory location must be an absolute path.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.62 18864

Make sure the WAL archive area specified by archive_command parameter is writable and not full.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.63 18865

query result has too many rows to fit in a Perl array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.64 18867

query result has too many rows to fit in a Python list

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.65 18868

'@1@' is an invalid keyword argument for this function

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.66 18869

invalid SQLSTATE code

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.67 18870

PGresult is not an error result

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.85.68 18871

extraneous data in "t" message

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86 Message Numbers Beginning with 18900

2.86.1 18954

invalid operator "@1@" in @2@ section

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.2 18955

invalid format parameter "@1@" of field "@2@" in @3@ section

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.3 18956

timestamp parameter must be set with pair of the begin and end timestamp : "@1@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.4 18957

invalid timestamp parameters, the end timestamp must advance to the begin timestamp: begin = "@1@", end = "@2@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.5 18958

pgaudit must be loaded via shared_preload_libraries

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.6 18959

pgaudit must be set log_replication_commands.

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.7 18960

"pgaudit.config_file" must be specify when pgaudit is loaded

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.8 18961

error invalid token "@1@" in "@2@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.9 18962

redundant @1@ section defined in file "@2@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.10 18963

invalid parameter "@1@" in "@2@" in file "@3@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.11 18964

invalid operator "@1@" in file "@2@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.12 18965

syntax error near token "@1@" in file "@2@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.13 18966

unrecognized configuration token "@1@" in "@2@" in file "@3@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.14 18967

could not make FIFO special file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.15 18968

could not open FIFO special file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.16 18969

could not read from named pipe: @1@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.17 18970

could not write audit log "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.18 18971

could not open audit log file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.19 18972

disabling automatic rotation

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.86.20 18973

pgaudit extension initialized

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.86.21 18974

following_async_walsenders parser failed

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.22 18975

Cannot specify "*" as standby names in "synchronous_standby_names" when "following_async_walsenders" is enabled

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.23 18976

Cannot enable "following_async_walsenders" when "*" is specify as standby names in "synchronous_standby_names"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.24 18977

Cannot specify the standby name (@1@) in "synchronous_standby_names" because it has been specified in "following_async_walsenders"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.25 18978

Cannot specify the standby name (@1@) in "following_async_walsenders" because it has been specified in "synchronous_standby_names"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.26 18979

tablespace "@1@" in the tablespaces list file does not exist

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.27 18980

no resource to backup with the copy command

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.28 18981

results of copying file does not exist

[Description]

The backup data may be corrupted.

[System Processing]

Processing will be aborted.

[Action]

Copy the backup data to the backup storage directory from backup media.

2.86.29 18982

Backup using the copy command has not been done

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.30 18983

option -Y is necessary because backup has been performed with the copy command

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.31 18984

option -Y must not be specified because backup has not been performed with the copy command

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.32 18985

could not set permissions of file "@1@": @2@ (errno=@3@)

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.33 18986

copy command "@1@" failed (mode=@2@): @3@**[Description]**

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.34 18987

tablespace name "@1@" has been overlapped in the tablespaces list file**[Description]**

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.35 18988

file "@1@" does not exist or is not a regular file**[Description]**

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.36 18989

tablespace "@1@" can not be specified in the tablespaces list file**[Description]**

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.37 18990

the tablespace name specified in the tablespaces list file could not be acquired: @1@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.86.38 18991

@1@: COPY FROM command must be specified

[Description]

COPY FROM command must be specified.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.86.39 18992

@1@: cannot launch more than @2@ workers

[Description]

The number of workers is too many

[System Processing]

Processing will be aborted.

[Action]

If the number of workers is high, reduce it.

2.86.40 18993

@1@: no table name specified

[Description]

No table name specified.

[System Processing]

Processing will be aborted.

[Action]

Please specify the table name you would load data.

2.86.41 18994

@1@: COPY TO command cannot be available

[Description]

COPY TO command cannot be available.

[System Processing]

Processing will be aborted.

[Action]

Please specify COPY FROM command.

2.86.42 18995

load failed

[Description]

Load failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.86.43 18996

could not start @1@ background processes

[Description]

Could not start %d background processes.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.86.44 18997

You might need to increase max_worker_processes.

[Description]

You might need to increase max_worker_processes.

[System Processing]

Processing will be aborted.

[Action]

You might need to increase max_worker_processes

2.86.45 18998

postmaster exited during a parallel loading

[Description]

postmaster exited during a parallel loading.

[System Processing]

Processing will be aborted.

[Action]

Please refer to the server log, and determine the cause of the error.

2.86.46 18999

COPY statement cannot be null

[Description]

COPY statement cannot be null.

[System Processing]

Processing will be aborted.

[Action]

Please specify COPY FROM statement.

2.87 Message Numbers Beginning with 19000

2.87.1 19000

number of workers must not be negative

[Description]

The number of workers must not be negative.

[System Processing]

Processing will be aborted.

[Action]

Please specify more than one.

2.87.2 19001

lack of max_prepared_transactions

[Description]

Lack of max_prepared_transactions.

[System Processing]

Processing will be aborted.

[Action]

Please increase max_prepared_transactions.

2.87.3 19002

max_prepared_transactions must be set at least @1@

[Description]

Lack of max_prepared_transactions.

[System Processing]

Processing will be aborted.

[Action]

Please increase max_prepared_transactions.

2.87.4 19003

pgx_loader only available using COPY FROM

[Description]

pgx_loader can be available only COPY FROM command.

[System Processing]

Processing will be aborted.

[Action]

Please specify COPY FROM statement.

2.87.5 19004

failed to execute SPI returned @1@

[Description]

Could not execute SPI.

[System Processing]

Processing will be aborted.

[Action]

Please refer to the server log, and determine the cause of the error.

2.87.6 19005

@1@ the prepared transaction with gid: "@2@"

[Description]

The prepared transaction has been completed.

[System Processing]

Continues processing.

[Action]

No action required.

2.87.7 19006

failed to delete the record with id: @1@(SPI returned: @2@)

[Description]

Could not delete the row in pgx_loader_state table.

[System Processing]

Processing will be aborted.

[Action]

Please refer to the server log, and determine the cause of the error.

2.87.8 19007

could not write to the shared message queue for PID @1 @: "@2@"

[Description]

Could not write to the shared memory message queue.

[System Processing]

Processing will be aborted.

[Action]

Please refer to the server log, and determine the cause of the error.

2.87.9 19008

COPY FROM instructs the PostgreSQL server process to read a file. You may want a client-side facility such as pgx_loader command.

[Description]

Failed to read the file.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.87.10 19009

failed to add new prepared transaction "@1@" by worker(@2@)

[Description]

Failed to add new prepared transaction.

[System Processing]

Processing will be aborted.

[Action]

Please refer to the server log, and determine the cause of the error.

2.87.11 19010

failed to fetch id column from "@1@" by worker(@2@)

[Description]

Failed to fetch the id column.

[System Processing]

Processing will be aborted.

[Action]

Please refer to the server log, and determine the cause of the error.

2.87.12 19011

cannot uniquely identify the id

[Description]

Could not uniquely identify the id.

[System Processing]

Processing will be aborted.

[Action]

Please refer to the server log, and determine the cause of the error.

2.87.13 19012

record with gid: "@1@" and master_pid: @2@ might already exist

[Description]

Could not uniquely identify the id.

[System Processing]

Processing will be aborted.

[Action]

Please refer to the server log, and determine the cause of the error.

2.87.14 19013

failed to update state column of record with id: @1@

[Description]

Failed to update the state column.

[System Processing]

Processing will be aborted.

[Action]

Please refer to the server log, and determine the cause of the error.

2.87.15 19014

could not get the status of file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.87.16 19015

could not open directory "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.87.17 19016

could not stat file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.87.18 19017

invalid value "@1@" for "@2@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.87.19 19018

could not open file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.87.20 19019

could not close file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.87.21 19020

[parallel worker failed to initialize](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.22 19021

[More details may be available in the server log.](#)

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.87.23 19022

[operator family "@1@" of access method @2@ contains support procedure @3@ with different left and right input types](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.24 19023

[operator family "@1@" of access method @2@ contains invalid ORDER BY specification for operator @3@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.25 19024

operator family "@1@" of access method @2@ contains operator @3@ with wrong signature

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.26 19025

operator family "@1@" of access method @2@ is missing cross-type operator(s)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.27 19026

could not determine data type for argument @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.28 19027

@1@: data directory is of wrong version File "@2@" contains "@3@", which is not compatible with this program's version "@4@".

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.87.29 19028

@1@: could not clear search_path: @2@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.87.30 19029

@1@: query returned @2@ row instead of one: @3@

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.87.31 19030

@1@: could not stat file "@2@": @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.32 19031

@1@: could not open directory "@2@": @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.33 19032

@1@: could not read directory "@2@": @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.34 19033

@1@: could not open file "@2@": @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.35 19034

@1@: could not fsync file "@2@" to "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.36 19035

@1@: could not rename file "@2@" to "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.37 19036

password too long

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.38 19037

block number out of range: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.39 19038

corrupted BRIN index: inconsistent range map

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.40 19039

invalid overflow block number @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.41 19040

removing stale two-phase state from memory for transaction @1@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.87.42 19041

removing future two-phase state from memory for transaction @1@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.87.43 19042

cannot PREPARE a transaction that has manipulated logical replication workers

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.87.44 19043

cannot PREPARE a transaction that has manipulated logical replication workers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.45 19044

could not open write-ahead log directory "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.46 19045

could not generate secret authorization token

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.47 19046

cannot use IN SCHEMA clause when using GRANT/REVOKE ON SCHEMAS

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.48 19047

permission denied for statistics object @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.49 19048

permission denied for publication @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.50 19049

permission denied for subscription @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.51 19050

must be owner of statistics object @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.52 19051

must be owner of publication @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.53 19052

must be owner of subscription @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.54 19053

publication with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.55 19054

subscription with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.56 19055

statistics object with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.57 19056

cannot add NO INHERIT constraint to partitioned table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.58 19057

statistics object "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.59 19058

must specify relation and object name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.60 19059

publication relation "@1@" in publication "@2@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.61 19060

empty range bound specified for partition "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.62 19061

partition "@1@" would overlap partition "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.63 19062

"@1@" is a partitioned table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.64 19063

"@1@" is a system table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.65 19064

table "@1@" cannot be replicated

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.66 19065

relation "@1@" is already member of publication "@2@"**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.67 19066

publication "@1@" does not exist**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.68 19067

subscription "@1@" does not exist**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.69 19068

publication "@1@" already exists**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.70 19069

subscription "@1@" already exists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.71 19070

statistics object "@1@" already exists in schema "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.72 19071

column "@1@" of relation "@2@" appears more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.73 19072

collation "default" cannot be copied

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.74 19073

unrecognized collation provider: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.75 19074

could not convert locale name "@1@" to language tag: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.76 19075

must be superuser to import system collations

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.77 19076

no usable system locales were found

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.87.78 19077

cannot copy from partitioned table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.79 19078

cannot route inserted tuples to a foreign table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.80 19079

database "@1@" is being used by logical replication subscription

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.81 19080

statistics object "@1@" does not exist, skipping

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.82 19081

publication "@1@" does not exist, skipping

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.87.83 19082

extension "@1@" has no installation script nor update path for version "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.84 19083

user mapping for "@1@" already exists for server "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.85 19084

third argument of cast function must be type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.86 19085

cannot create unique index on partitioned table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.87 19086

invalid list syntax for "publish" option

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.88 19087

unrecognized "publish" value: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.89 19088

unrecognized publication parameter: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.90 19089

must be superuser to create FOR ALL TABLES publication

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.91 19090

publication "@1@" is defined as FOR ALL TABLES

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.92 19091

relation "@1@" is not part of the publication

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.93 19092

permission denied to change owner of publication "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.94 19093

invalid sequence option SEQUENCE NAME

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.95 19094

identity column type must be smallint, integer, or bigint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.96 19095

MAXVALUE (@1@) is out of range for sequence data type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.97 19096

MINVALUE (@1@) is out of range for sequence data type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.98 19097

cannot change ownership of identity sequence

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.99 19098

only a single relation is allowed in CREATE STATISTICS

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.100 19099

relation "@1@" is not a table, foreign table, or materialized view

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88 Message Numbers Beginning with 19100

2.88.1 19100

only simple column references are allowed in CREATE STATISTICS

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.2 19101

statistics creation on system columns is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.3 19102

column "@1@" cannot be used in statistics because its type @2@ has no default btree

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.4 19103

cannot have more than @1@ columns in statistics

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.5 19104

extended statistics require at least 2 columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.6 19105

duplicate column name in statistics definition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.7 19106

unrecognized statistics kind "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.8 19107

unrecognized subscription parameter: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.9 19115

publication name "@1@" used more than once

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.10 19116

must be superuser to create subscriptions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.11 19117

could not connect to the publisher: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.12 19118

tables were not subscribed, you will have to run @1@ to subscribe the tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.13 19119

cannot set @1@ for enabled subscription

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.14 19120

cannot enable subscription that does not have a slot name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.15 19121

ALTER SUBSCRIPTION with refresh is not allowed for disabled subscriptions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.16 19122

ALTER SUBSCRIPTION ... REFRESH is not allowed for disabled subscriptions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.17 19123

could not drop the replication slot "@1@" on publisher

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.18 19124

permission denied to change owner of subscription "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.19 19125

could not receive list of replicated tables from the publisher: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.20 19127

"@1@" is not partitioned

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.21 19128

cannot partition using more than @1@ columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.22 19129

cannot truncate only a partitioned table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.23 19130

cannot inherit from partitioned table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.24 19131

cannot inherit from partition "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.25 19132

partition constraint is violated by some row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.26 19133

cannot add column to a partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.27 19134

cannot recursively add identity column to table that has child tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.28 19135

cannot remove constraint from only the partitioned table when partitions exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.29 19136

column "@1@" of relation "@2@" is an identity column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.30 19137

column "@1@" is marked NOT NULL in parent table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.31 19139

column "@1@" of relation "@2@" must be declared NOT NULL before identity can be added

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.32 19140

column "@1@" of relation "@2@" is already an identity column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.33 19141

column "@1@" of relation "@2@" already has a default value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.34 19142

column "@1@" of relation "@2@" is not an identity column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.35 19144

cannot drop column "@1@" because it is part of the partition key of relation "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.36 19145

cannot drop column from only the partitioned table when partitions exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.37 19148

cannot alter column "@1@" because it is part of the partition key of relation "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.38 19149

cannot change inheritance of a partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.39 19150

cannot change inheritance of partitioned table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.40 19151

cannot inherit from a partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.41 19152

trigger "@1@" prevents table "@2@" from becoming an inheritance child

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.42 19153

relation "@1@" is not a partition of relation "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.43 19154

cannot change table "@1@" to unlogged because it is part of a publication

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.44 19155

unrecognized partitioning strategy "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.45 19156

cannot use "list" partition strategy with more than one column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.46 19157

column "@1@" appears more than once in partition key

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.47 19158

column "@1@" named in partition key does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.48 19159

cannot use system column "@1@" in partition key

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.49 19160

functions in partition key expression must be marked IMMUTABLE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.50 19161

partition key expressions cannot contain whole-row references

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.51 19162

partition key expressions cannot contain system column references

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.52 19163

cannot use constant expression as partition key

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.53 19164

could not determine which collation to use for partition expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.54 19166

"@1@" is already a partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.55 19167

cannot attach a typed table as partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.56 19168

cannot attach inheritance child as partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.57 19169

cannot attach inheritance parent as partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.58 19170

cannot attach a permanent relation as partition of temporary relation "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.59 19171

cannot attach as partition of temporary relation of another session

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.60 19172

cannot attach temporary relation of another session as partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.61 19173

table "@1@" contains column "@2@" not found in parent "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.62 19174

trigger "@1@" prevents table "@2@" from becoming a partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.63 19175

ROW triggers with transition tables are not supported on partitions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.64 19176

ROW variable naming in the REFERENCING clause is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.65 19177

ROW triggers with transition tables are not supported on inheritance children

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.66 19178

transition table name can only be specified for an AFTER trigger

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.67 19179

TRUNCATE triggers with transition tables are not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.68 19180

transition tables cannot be specified for triggers with more than one event

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.69 19181

transition tables cannot be specified for triggers with column lists

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.70 19182

NEW TABLE can only be specified for an INSERT or UPDATE trigger

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.71 19183

NEW TABLE cannot be specified multiple times

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.72 19184

OLD TABLE can only be specified for a DELETE or UPDATE trigger

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.73 19185

OLD TABLE cannot be specified multiple times

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.74 19186

OLD TABLE name and NEW TABLE name cannot be the same

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.75 19187

attribute @1@ of type @2@ has been dropped

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.76 19188

attribute @1@ of type @2@ has wrong type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.77 19189

new row for relation "@1@" violates partition constraint

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.78 19190

no partition of relation "@1@" found for row

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.79 19191

cannot update table "@1@" because it does not have a replica identity and publishes updates**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.80 19192

cannot delete from table "@1@" because it does not have a replica identity and publishes deletes**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.81 19193

cannot use relation "@1@.@2@" as logical replication target**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.82 19194

namespace URI must not be null**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.83 19195

row filter expression must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.84 19196

column filter expression must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.85 19197

null is not allowed in column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.86 19198

UNENCRYPTED PASSWORD is no longer supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.87 19199

sequence option "@1@" not supported here

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89 Message Numbers Beginning with 19200

2.89.1 19200

unrecognized row security option "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.2 19201

only one DEFAULT value is allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.3 19202

only one PATH value per column is allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.4 19203

conflicting or redundant NULL / NOT NULL declarations for column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.5 19204

unrecognized column option "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.6 19205

malformed SCRAM message

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.7 19206

invalid SCRAM response

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.8 19207

could not generate random salt

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.9 19208

client requires SCRAM channel binding, but it is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.10 19209

client uses authorization identity, but it is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.11 19210

client requires an unsupported SCRAM extension

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.12 19211

non-printable characters in SCRAM nonce

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.13 19212

could not generate random nonce

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.14 19213

unexpected SCRAM channel-binding attribute in client-final-message

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.15 19214

SASL authentication is not supported in protocol version 2

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.16 19215

expected SASL response, got message type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.17 19216

client selected an invalid SASL authentication mechanism

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.18 19217

private key file "@1@" cannot be reloaded because it requires a passphrase

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.19 19218

could not set the cipher list (no valid ciphers available)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.20 19219

could not initialize SSL connection: SSL context not set up

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.21 19220

could not open DH parameters file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.22 19221

could not load DH parameters file: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.23 19222

invalid DH parameters: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.24 19223

invalid DH parameters: p is not prime

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.25 19224

invalid DH parameters: neither suitable generator or safe prime

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.26 19225

DH: could not load DH parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.27 19226

DH: could not set DH parameters: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.28 19227

could not parse RADIUS server list "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.29 19228

could not parse RADIUS port list "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.30 19229

could not parse RADIUS secret list "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.31 19230

could not parse RADIUS identifiers list "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.32 19231

ON CONFLICT clause is not supported with partitioned tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.33 19232

@1@ cannot be applied to a table function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.34 19233

@1@ cannot be applied to a named tuplestore

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.35 19234

aggregate functions are not allowed in partition key expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.36 19235

grouping operations are not allowed in partition key expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.37 19236

aggregate function calls cannot contain set-returning function calls

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.38 19237

window functions are not allowed in partition key expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.39 19238

relation "@1@" cannot be the target of a modifying statement

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.40 19239

set-returning functions must appear at top level of FROM

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.41 19240

only one FOR ORDINALITY column is allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.42 19241

column name "@1@" is not unique

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.43 19242

namespace name "@1@" is not unique

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.44 19243

only one default namespace is allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.45 19244

could not determine polymorphic type because input has type @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.46 19245

DEFAULT is not allowed in this context

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.47 19246

@1@ must not return a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.48 19247

source for a multiple-column UPDATE item must be a sub-SELECT or ROW() expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.49 19248

set-returning functions are not allowed in @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.50 19249

cannot use subquery in partition key expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.51 19250

window function calls cannot contain set-returning function calls

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.52 19251

function name "@1@" is not unique

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.53 19252

could not find a function named "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.54 19253

set-returning functions are not allowed in JOIN conditions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.55 19254

set-returning functions are not allowed in policy expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.56 19255

set-returning functions are not allowed in window definitions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.57 19256

set-returning functions are not allowed in check constraints

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.58 19257

set-returning functions are not allowed in DEFAULT expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.59 19258

set-returning functions are not allowed in index expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.60 19259

set-returning functions are not allowed in index predicates

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.61 19260

set-returning functions are not allowed in transform expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.62 19261

set-returning functions are not allowed in EXECUTE parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.63 19262

set-returning functions are not allowed in trigger WHEN conditions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.64 19263

set-returning functions are not allowed in partition key expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.65 19264

cannot create partitioned table as inheritance child

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.66 19265

multiple identity specifications for column "@1@" of table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.67 19266

primary key constraints are not supported on partitioned tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.68 19267

unique constraints are not supported on partitioned tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.69 19268

foreign key constraints are not supported on partitioned tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.70 19269

both default and identity specified for column "@1@" of table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.71 19270

exclusion constraints are not supported on partitioned tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.72 19271

invalid bound specification for a list partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.73 19272

invalid bound specification for a range partition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.74 19273

FROM must specify exactly one value per partitioning column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.75 19274

TO must specify exactly one value per partitioning column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.76 19275

cannot specify NULL in range bound

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.77 19276

every bound following MAXVALUE must also be MAXVALUE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.78 19277

every bound following MINVALUE must also be MINVALUE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.79 19278

specified value cannot be cast to type @1@ for column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.80 19279

invalid connection string syntax: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.81 19280

error while shutting down streaming COPY: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.82 19281

could not create replication slot "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.83 19282

invalid query response

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.84 19283

the query interface requires a database connection

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.85 19284

cannot start logical replication workers when max_replication_slots = 0

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.86 19285

out of logical replication worker slots

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.89.87 19286

out of background worker slots

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.89.88 19287

logical replication worker slot @1@ is empty, cannot attach

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.89 19288

replication origin "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.90 19289

replication origin with OID @1@ does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.91 19290

logical replication target relation "@1@.@2@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.92 19291

built-in type @1@ not found

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.93 19292

data type "@1@.@2@" required for logical replication does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.94 19293

initial slot snapshot too large

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.95 19294

could not fetch table info for table "@1@.@2@" from publisher: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.96 19295

table "@1@.@2@" not found on publisher

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.97 19296

could not fetch table info for table "@1@.@2@": @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.98 19297

could not start initial contents copy for table "@1@.@2@": @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.99 19298

table copy could not start transaction on publisher

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.100 19299

table copy could not finish transaction on publisher

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90 Message Numbers Beginning with 19300

2.90.1 19300

ORIGIN message sent out of order

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.2 19301

invalid logical replication message type "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.3 19302

terminating logical replication worker due to timeout

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.4 19303

subscription has no replication slot set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.5 19304

invalid proto_version

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.6 19305

proto_version "@1@" out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.7 19306

invalid publication_names syntax

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.8 19307

client sent proto_version=@1@ but we only support protocol @2@ or lower

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.9 19308

client sent proto_version=@1@ but we only support protocol @2@ or higher

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.10 19309

publication_names parameter missing

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.11 19310

number of synchronous standbys (@1@) must be greater than zero

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.12 19311

IDENTIFY_SYSTEM has not been run before START_REPLICATION

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.13 19312

cannot execute new commands while WAL sender is in stopping mode

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.14 19313

cannot execute SQL commands in WAL sender for physical replication

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.15 19314

cannot convert partitioned table "@1@" to a view

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.16 19315

cannot convert partition "@1@" to a view

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.17 19316

cannot insert into column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.18 19317

column "@1@" can only be updated to DEFAULT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.19 19319

statistics object "@1@.@2@" could not be computed for relation "@3@.@4@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.90.20 19324

out of shared memory (@1@ bytes requested)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.21 19325

terminating logical replication worker due to administrator command

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.22 19326

case conversion failed: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.23 19327

formatting field "@1@" is only supported in to_char

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.24 19328

expected json array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.25 19329

malformed json array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.26 19330

macaddr8 data out of range to convert to macaddr

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.27 19331

log format "@1@" is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.28 19332

cannot convert infinity to numeric

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.29 19333

collation provider LIBC is not supported on this platform

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.30 19334

collations with different collate and ctype values are not supported by ICU

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.31 19335

could not open collator for locale "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.32 19336

collation "@1@" has no actual version, but a version was specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.33 19337

collation "@1@" has version mismatch

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.34 19338

could not open ICU converter for encoding "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.35 19339

@1@ failed: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.36 19340

@1@ failed: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.37 19341

@1@ does not support the "global" option

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.38 19342

@1@ does not support the "global" option

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.39 19343

transaction ID @1@ is in the future

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.40 19344

collation failed: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.41 19345

sort key generation failed: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.42 19346

DEFAULT namespace is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.43 19347

row path filter must not be empty string

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.44 19348

column path filter must not be empty string

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.45 19349

more than one value returned by column XPath expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.46 19350

could not find function information for function "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.47 19351

encoding "@1@" not supported by ICU

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.48 19352

could not attach to dynamic shared area

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.49 19353

\\@1@ command ignored; use \\endif or Ctrl-C to exit current \\if block

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.50 19354

\\elif: cannot occur after \\else

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.51 19355

\\elif: no matching \\if

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.52 19356

\\else: cannot occur after \\else

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.53 19357

\\else: no matching \\if

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.54 19358

\\endif: no matching \\if

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.55 19359

shell command argument contains a newline or carriage return: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.56 19360

Did not find any settings for role "@1@" and database "@2@".

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.57 19361

Did not find any text search parsers.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.58 19362

Did not find any text search configurations.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.59 19363

The server (version @1@) does not support publications.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.60 19364

Did not find any publication named "@1@".

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.61 19365

Did not find any publications.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.62 19366

The server (version @1@) does not support subscriptions.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.63 19367

\\if: escaped

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.64 19368

query ignored; use `\endif` or `Ctrl-C` to exit current `\if` block

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.65 19369

reached EOF without finding closing `\endif(s)`

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.66 19370

unrecognized collation provider: `@1@`

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.67 19371

unrecognized value "`@1@`" for "`@2@`": Boolean expected

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.68 19372

invalid value "@1@" for "@2@": integer

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.69 19373

invalid variable name: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.70 19374

could not write to output file: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.71 19375

no matching schemas were found for pattern "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.72 19376

WARNING: owner of publication "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.90.73 19377

subscriptions not dumped because current user is not a superuser

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.90.74 19378

WARNING: owner of subscription "@1@" appears to be invalid

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.90.75 19379

could not parse subpublications array

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.90.76 19380

failed sanity check, parent table with OID @1@ of pg_rewrite entry with OID @2@ not found

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.77 19381

invalid number of parents @1@ for table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.78 19382

could not rename file "@1@" to "@2@" : @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.79 19383

failed to remove WAL directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.80 19384

failed to remove contents of WAL directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.81 19385

could not open file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.82 19386

failed to remove data directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.83 19387

failed to remove contents of data directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.84 19388

failed to remove WAL directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.85 19389

failed to remove contents of WAL directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.86 19390

data directory "@1@" not removed at user's request

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.87 19391

WAL directory "@1@" not removed at user's request

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.88 19392

changes to tablespace directories will not be undone

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.89 19393

could not finish writing WAL files: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.90 19394

cannot stream write-ahead logs in tar mode to stdout

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.91 19395

--no-slot cannot be used with slot name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.92 19396

could not open compressed file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.93 19397

could not seek in compressed file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.94 19398

could not read compressed file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.95 19399

compressed segment file "@1@" has incorrect uncompressed size @2@, skipping

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91 Message Numbers Beginning with 19400

2.91.1 19400

could not parse end position "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.2 19401

--endpos may only be specified with --start

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.3 19402

could not get size of write-ahead log file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.4 19403

could not fsync existing write-ahead log file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.5 19404

could not open write-ahead log file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.6 19405

@1@: could not create temporary replication slot "@2@": @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.7 19406

could not compress data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.8 19407

could not reset compression stream

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.9 19408

could not initialize compression library

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.10 19409

implementation error: tar files can't have more than one open file

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.11 19410

could not create tar header

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.12 19411

could not change compression parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.13 19412

unlink not supported with compression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.14 19413

could not close compression stream

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.15 19414

archive location "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.16 19416

could not remove file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.17 19417

could not read archive location "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.18 19418

could not close archive location "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.19 19419

could not open archive location "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.20 19420

invalid file name argument

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.21 19421

failed to get system locale name for "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.22 19422

must specify archive location

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.23 19423

must specify oldest kept WAL file

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.24 19424

too many command-line arguments

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.25 19425

This utility can only upgrade from PostgreSQL version 8.4 and later.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.26 19426

This utility can only upgrade to PostgreSQL version @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.27 19427

This utility cannot be used to downgrade to older major PostgreSQL versions.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.28 19428

Old cluster data and binary directories are from different major versions.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.29 19429

New cluster data and binary directories are from different major versions.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.30 19430

encodings for database "@1@" do not match: old "@2@", new "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.31 19431

lc_collate values for database "@1@" do not match: old "@2@", new "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.32 19432

lc_ctype values for database "@1@" do not match: old "@2@", new "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.33 19433

New cluster database "@1@" is not empty: found relation "@2@.@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.34 19434

could not open file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.35 19435

could not add execute permission to file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.36 19436

database user "@1@" is not the install user

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.37 19437

could not determine the number of users

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.38 19438

Only the install user can be defined in the new cluster.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.39 19439

The source cluster contains prepared transactions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.40 19440

The target cluster contains prepared transactions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.41 19441

The source cluster contains roles starting with "pg_"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.42 19442

The target cluster contains roles starting with "pg_"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.43 19443

failed to get the current locale

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.44 19444

failed to restore old locale "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.45 19445

could not get control data using @1@: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.46 19446

@1@: pg_resetwal problem

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.47 19447

@1@: controldata retrieval problem

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.48 19448

The source cluster lacks some required control information:**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.49 19449

The target cluster lacks some required control information:**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.50 19450

Cannot continue without required control information, terminating**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.51 19451

old and new pg_controldata alignments are invalid or do not matchLikely one cluster is a 32-bit install, the other 64-bit**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.52 19452

old and new pg_controldata block sizes are invalid or do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.53 19453

old and new pg_controldata maximum relation segment sizes are invalid or do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.54 19454

old and new pg_controldata WAL block sizes are invalid or do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.55 19455

old and new pg_controldata WAL segment sizes are invalid or do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.56 19456

old and new pg_controldata maximum identifier lengths are invalid or do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.57 19457

old and new pg_controldata maximum indexed columns are invalid or do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.58 19458

old and new pg_controldata maximum TOAST chunk sizes are invalid or do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.59 19459

old and new pg_controldata large-object chunk sizes are invalid or do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.60 19460

old and new pg_controldata date/time storage types do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.61 19461

old cluster does not use data checksums but the new one does

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.62 19462

old cluster uses data checksums but the new one does not

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.63 19463

old and new cluster pg_controldata checksum versions do not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.64 19464

Unable to rename @1@ to @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.65 19465

could not get pg_ctl version data using @1@: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.66 19466

could not get pg_ctl version output from @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.67 19467

command too long

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.68 19468

could not write to log file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.69 19469

There were problems executing "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.70 19470

could not open file "@1@" for reading: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.71 19471

You must have read and write access in the current directory.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.72 19472

check for "@1@" failed: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.73 19473

"@1@" is not a directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.74 19474

check for "@1@" failed: not a regular file

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.75 19475

check for "@1@" failed: cannot read file (permission denied)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.76 19476

check for "@1@" failed: cannot execute (permission denied)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.77 19477

error while copying relation "@1@.@2@" : could not open file "@3@" : @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.78 19478

error while copying relation "@1@.@2@": could not create file "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.79 19479

error while copying relation "@1@.@2@": could not read file "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.80 19480

error while copying relation "@1@.@2@": could not write file "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.81 19481

error while copying relation "@1@.@2@" ("@3@" to "@4@"): @5@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.82 19482

error while creating link for relation "@1@.@2@" ("@3@" to "@4@"): @5@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.83 19483

error while copying file ("@1@" to "@2@"): could not open file "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.84 19484

error while copying file ("@1@" to "@2@"): could not create file "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.85 19485

error while copying file ("@1@" to "@2@"): could not read file "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.86 19486

error while copying file ("@1@" to "@2@"): could not write file "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.87 19487

error while copying file ("@1@" to "@2@"): @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.88 19488

error while linking file ("@1@" to "@2@"): @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.89 19489

error while copying relation "@1@.@2@": could not stat file "@3@": @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.90 19490

error while copying relation "@1@.@2@": partial page found in file "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.91 19491

@1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.92 19492

Remove the problem functions from the old cluster to continue.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.93 19493

Checking for presence of required libraries

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.94 19494

could not load library "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.95 19495

Failed to match up old and new tables in database "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.96 19496

which is an index on "@1@.@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.97 19497

which is an index on OID @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.98 19498

which is the TOAST table for "@1@.@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.99 19499

[which is the TOAST table for OID @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92 Message Numbers Beginning with 19500

2.92.1 19500

[No match found in old cluster for new relation with OID @1@ in database "@2@": @3@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.2 19501

[No match found in new cluster for old relation with OID @1@ in database "@2@": @3@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.3 19502

[mappings for database "@1@":](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.4 19503

[@1@.@2@: @3@ to @4@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.5 19505

[source databases:](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.6 19506

[target databases:](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.7 19507

[Database: @1@](#)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.8 19508

relname: @1 @. @2@: relolid: @3@ reltblspace: @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.9 19509

@1@: cannot be run as root

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.10 19510

invalid old port number

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.11 19511

invalid new port number

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.12 19512

Running in verbose mode

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.13 19513

Try "[@1@ --help](#)" for more information.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.14 19514

old cluster binaries reside

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.15 19515

new cluster binaries reside

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.16 19516

old cluster data resides

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.17 19517

new cluster data resides

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.18 19518

could not determine current directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.19 19519

cannot run pg_upgrade from inside the new cluster data directory on Windows

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.20 19520

pg_upgrade upgrades a PostgreSQL cluster to a different major version.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.21 19521

Usage:

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.22 19522

pg_upgrade [OPTION]...

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.23 19523

Options:

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.24 19524

-b, --old-bindir=BINDIR old cluster executable directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.25 19525

-B, --new-bindir=BINDIR new cluster executable directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.26 19526

-c, --check check clusters only, don't change any data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.27 19527

-d, --old-datadir=DATADIR old cluster data directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.28 19528

-D, --new-datadir=DATADIR new cluster data directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.29 19529

-j, --jobs number of simultaneous processes or threads to use

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.30 19530

-k, --link link instead of copying files to new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.31 19531

-o, --old-options=OPTIONS old cluster options to pass to the server

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.32 19532

-O, --new-options=OPTIONS new cluster options to pass to the server

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.33 19533

-p, --old-port=PORT old cluster port number (default @1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.34 19534

-P, --new-port=PORT new cluster port number (default @1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.35 19535

-r, --retain retain SQL and log files after success

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.36 19536

-U, --username=NAME cluster superuser (default "@1@")

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.37 19537

-v, --verbose enable verbose internal logging**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.38 19538

-V, --version display version information, then exit**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.39 19539

-, --help show this help, then exit**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.40 19540

Report bugs to <pgsql-bugs@postgresql.org>.**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.41 19541

Finding the real data directory for the source cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.42 19542

Finding the real data directory for the target cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.43 19543

could not get data directory using @1@: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.44 19544

could not read line @1@ from file "@2@": @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.45 19545

user-supplied old port number @1@ corrected to @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.46 19546

could not create worker process: @1 @

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.47 19547

could not create worker thread: @1 @

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.48 19548

child worker exited abnormally: @1 @

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.49 19549

Setting next OID for new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.50 19550

Sync data directory to disk

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.51 19551

@1@: could not find own program executable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.52 19552

Analyzing all rows in the new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.53 19553

Freezing all rows in the new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.54 19554

Restoring global objects in the new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.55 19555

Restoring database schemas in the new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.56 19556

Deleting files from new @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.57 19557

could not delete directory "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.58 19558

Copying old @1@ to new server

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.59 19559

Setting next transaction ID and epoch for new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.60 19560

Setting next multixact ID and offset for new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.61 19561

Setting oldest multixact ID in new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.62 19562

Resetting WAL archives

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.63 19563

Setting frozenxid and minmxid counters in new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.64 19564

Setting minmxid counter in new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.65 19565

error while checking for existence of keystore file @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.66 19566

Linking user relation files

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.67 19567

Copying user relation files

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.68 19568

copying "@1@" to "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.69 19569

linking "@1@" to "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.70 19570

old database "@1@" not found in the new cluster

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.71 19571

error while checking for file existence "@1@.@2@" ("@3@" to "@4@"): @5@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.72 19572

rewriting "@1@" to "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.73 19573

connection to database failed: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.74 19574

Failure, exiting

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.75 19575

executing: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.76 19576

SQL command failed @1@@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.77 19577

could not open version file: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.78 19578

could not parse PG_VERSION file from @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.79 19579

connection to database failed: @1@**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.80 19580

pg_ctl failed to start the source server, or connection failed**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.81 19581

pg_ctl failed to start the target server, or connection failed**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.82 19582

out of memory**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.83 19583

libpq environment variable @1@ has a non-local server value: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.84 19584

tablespace directory "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.85 19585

could not stat tablespace directory "@1@" : @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.86 19586

tablespace path "@1@" is not a directory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.87 19587

%-*s

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.88 19588

ok

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.89 19589

Checking for large objects

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.90 19590

warning

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.91 19591

Checking for incompatible "line" data type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.92 19592

Checking for invalid "unknown" user columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.93 19593

Checking for hash indexes

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.94 19594

@1@: unexpected empty file "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.95 19595

@1@: pg_control exists but is broken or wrong version; ignoring it

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.96 19596

could not find file "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.97 19597

could not seek in log file @1@ to offset @2@: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.98 19598

could not read from log file @1@, offset @2@, length @3@: @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.92.99 19599

no arguments specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93 Message Numbers Beginning with 19600

2.93.1 19600

could not parse end WAL location "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.2 19601

could not parse limit "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.3 19602

resource manager "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.4 19603

could not parse start WAL location "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.5 19604

could not parse timeline "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.6 19605

could not parse "@1@" as a transaction ID

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.7 19606

unrecognized argument to --stats: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.8 19607

too many command-line arguments (first is "@1@")

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.9 19608

path "@1@" could not be opened: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.10 19609

could not open directory "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.11 19610

could not open file "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.12 19611

start WAL location @1@/@2@ is not inside file "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.13 19612

ENDSEG @1@ is before STARTSEG @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.14 19613

end WAL location @1 @/@2@ is not inside file "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.15 19614

no start WAL location given

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.16 19615

out of memory

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.17 19616

could not find a valid record after @1 @/@2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.18 19617

error in WAL record at @1 @/@2@: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.19 19618

cannot set system attribute "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.20 19619

function "@1@" is in the wrong language

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.21 19620

function "@1@" must not be SECURITY DEFINER

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.22 19621

set-valued function called in context that cannot accept a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.23 19622

column name/value list must have even number of elements

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.24 19623

column name/value list contains nonexistent column name "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.25 19624

cannot set system attribute "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.26 19625

malformed record literal: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.27 19626

number of array dimensions exceeds the maximum allowed (@1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.28 19627

could not determine sequence length for function return value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.29 19628

array size exceeds the maximum allowed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.30 19629

wrong length of inner sequence: has length @1@, but @2@ was expected

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.31 19630

malformed SCRAM message (empty message)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.32 19631

malformed SCRAM message (length mismatch)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.33 19632

incorrect server signature

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.34 19633

invalid SCRAM exchange state

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.35 19634

malformed SCRAM message (attribute "@1@" expected)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.36 19635

malformed SCRAM message (expected character "=" for attribute "@1@")

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.37 19636

could not generate nonce

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.38 19637

invalid SCRAM response (nonce mismatch)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.39 19638

malformed SCRAM message (invalid iteration count)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.40 19639

malformed SCRAM message (garbage at end of server-first-message)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.41 19640

error received from server in SCRAM exchange: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.42 19641

malformed SCRAM message (garbage at end of server-final-message)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.43 19642

malformed SCRAM message (invalid server signature)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.44 19643

out of memory allocating SSPI buffer (@1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.45 19644

duplicate SSPI authentication request

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.46 19645

duplicate SASL authentication request

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.47 19646

none of the server's SASL authentication mechanisms are supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.48 19647

out of memory allocating SASL buffer (@1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.49 19648

AuthenticationSASLFinal received from server, but SASL authentication was not completed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.50 19649

unexpected shape of result set returned for SHOW

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.51 19650

password_encryption value too long

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.52 19651

unrecognized password encryption algorithm "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.53 19652

could not match @1@ host names to @2@ hostaddrs

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.54 19653

could not match @1@ port numbers to @2@ hosts

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.55 19654

invalid target_session_attrs value: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.56 19655

invalid target_server value: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.57 19656

could not parse network address "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.58 19657

PGresult cannot support more than INT_MAX tuples

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.59 19658

size_t overflow

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.60 19659

cannot pass more than @1@ arguments to a function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.61 19660

set-valued function called in context that cannot accept a set

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.62 19661

More details may be available in the server log.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.63 19662

Kill all remaining database processes and restart the database.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.64 19663

deadlock detected

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.65 19664

VCI parallel execution is blocked by other operation.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.66 19665

not enough maximum share memory for parallel query (@1@ bytes requested)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.67 19666

You possibly need to raise the configuration parameter "vci.shared_work_mem" value to be at least @1@kB.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.68 19667

You may need to increase max_worker_processes.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.69 19669

Failed on request of size @1@.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.93.70 19670

failed to shm_open()

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.71 19671

could not open file "@1@": @2@

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.93.72 19672

could not get handle of the kernel module : error code @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.73 19673

the relation is not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.74 19674

access method "@1@" does not work with partitioned tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.75 19675

The "vci_column_ids" option cannot be used without "ctid" column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.76 19676

VCI failed to catch up with dropped columns in table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.77 19677

Automatically recreated "CREATE INDEX" is corrupt. Please recreate VCI by "vci_create()" function.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.78 19688

compress method must be defined when leaf type is different from input type

[Description]

compress method is not defined.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.79 19689

WAL segment size must be a power of two between 1 MB and 1 GB, but the control file specifies @1 @ byte

[Description]

Control file specifies WAL segment size is wrong, may be the control file is corrupted?

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.80 19690

"min_wal_size" must be at least twice "wal_segment_size"

[Description]

The GUC parameter of min_wal_size must be at least twice the size of the wal_segment_size

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.81 19691

"max_wal_size" must be at least twice "wal_segment_size"

[Description]

The GUC parameter of max_wal_size must be at least twice the size of the wal_segment_size

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.82 19692

-X requires a power of two value between 1 MB and 1 GB

[Description]

Specified WAL segment size must be power of two and it should be between 1MB and 1GB

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.83 19693

parameter "@1@" must be READ_ONLY, SHAREABLE, or READ_WRITE

[Description]

The value of aggregate function aggfinalmodify or aggmfinalmodify values must not be other than the above listed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.84 19694

including column does not support an operator class

[Description]

Create index with including column doesn't support operator class.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.85 19695

column "@1@" cannot be used in statistics because its type @2@ has no default btree operator class

[Description]

When creating statistics, the column's type must have default btree operator class.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.86 19696

could not connect to publisher when attempting to drop the replication slot "@1@"

[Description]

When dropping a subscription that is associated with a replication slot on the remote host (the normal state), DROP SUBSCRIPTION will connect to the remote host and try to drop the replication slot as part of its operation. This is necessary so that the resources allocated for the subscription on the remote host are released. If this fails, either because the remote host is not reachable or because the remote replication slot cannot be dropped or does not exist or never existed, the DROP SUBSCRIPTION command will fail.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.87 19697

cannot refer to non-index column by number

[Description]

We allow referencing columns by numbers only for indexes, since table column numbers could contain gaps if columns are later dropped.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.93.88 19698

cannot use ONLY for foreign key on partitioned table "@1@" referencing relation "@2@"

[Description]

Using ONLY to add or drop a constraint on partitioned table is supported only when there are no partitions. Once partitions exist, using ONLY will result in an error as adding or dropping constraints only on the partitioned table, when partitions exist, is not supported.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94 Message Numbers Beginning with 19700

2.94.1 19701

unsupported SCRAM channel-binding type "@1@"

[Description]

The only channel binding type supported is tls-server-end-point.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.2 19702

SCRAM channel binding check failed

[Description]

Compare the value sent by the client with the value expected by the server, if they are different, then SCRAM channel binding check fails.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.3 19703

User "@1@" has a password that cannot be used with MD5 authentication.

[Description]

Incompatible password hash format.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.4 19704

RANGE with offset PRECEDING/FOLLOWING requires exactly one ORDER BY column

[Description]

The number of order by clause is not one.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.5 19705

RANGE with offset PRECEDING/FOLLOWING is not supported for column type @1@

[Description]

The column type can't be used in RANGE with offset PRECEDING/FOLLOWING.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.6 19706

a hash-partitioned table may not have a default partition

[Description]

Partition table may not be a default partition if the partitioned table have hash type partition.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.7 19707

every hash partition modulus must be a factor of the next larger modulus

[Description]

Check the rule that every modulus must be a factor of the next larger modulus. For example, if you have a bunch of partitions that all have modulus 5, you can add a new partition with modulus 10 or a new partition with modulus 15, but you cannot add both a partition with modulus 10 and a partition with modulus 15, because 10 is not a factor of 15.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.8 19708

remainder for hash partition must be a non-negative integer

[Description]

Sanity check remainder.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.9 19709

column @1@ of the partition key has type "@2@", but supplied value is of type "@3@"

[Description]

Partition key column type and given value type should match

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.10 19710

@1@ total checksum verification failures

[Description]

By default, checksums are verified and checksum failures are reported for any possible page corruptions

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.94.11 19711

checksum verification failure during base backup

[Description]

By default, checksums are verified and checksum failures are reported for any possible page corruptions

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.94.12 19712

could not verify checksum in file "@1@", block @2@: read buffer size @3@ and page size @4@ differ**[Description]**

The checksums are verified at block level, so we iterate over the buffer in chunks of BLCKSZ, after making sure that TAR_SEND_SIZE/buf is divisible by BLCKSZ.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.94.13 19713

logical replication worker slot @1@ is already used by another worker, cannot attach**[Description]**

Another worker occupied the logical replication worker slot.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.14 19714

logical replication target relation "@1@.@2@" is missing some replicated columns**[Description]**

Local relation does not have some of the columns that are logically replicated from remote relation

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.15 19715

logical replication target relation "@1@.@2@" uses system columns in REPLICA IDENTITY index**[Description]**

Logical replication target relation uses some of the system columns to identify rows which are updated or deleted.

[System Processing]

Processing will be aborted.

[Action]

Usage of system columns for REPLICA IDENTITY should be avoided as these data vary across databases.

2.94.16 19716

publisher did not send replica identity column expected by the logical replication target relation "@1@.@2@"

[Description]

The logical replication relation is not updatable. Replica identity index and primary key are not defined.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.17 19717

logical replication target relation "@1@.@2@" has neither REPLICA IDENTITY index nor PRIMARY KEY and published relation does not have REPLICA IDENTITY FULL

[Description]

The logical replication relation is not updatable.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.18 19718

logical replication apply worker for subscription @1@ will not start because the subscription was removed during startup

[Description]

Subscription to which the logical replication apply worker is been assigned is already removed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.19 19719

cannot advance replication slot that has not previously reserved WAL

[Description]

A slot whose restart_lsn has never been reserved cannot be advanced.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.20 19720

cannot advance replication slot to @1 @/@2@, minimum is @3 @/@4@

[Description]

Data older than minimum is not available anymore. Check if the slot is not moving backwards.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.21 19721

@1@ must not be called inside a transaction

[Description]

When creating a new replication slot, it is not allowed to put CREATE_REPLICATION_SLOT and EXPORT_SNAPSHOT in a transAction.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.22 19722

@1@ must be called inside a transaction

[Description]

When creating a new replication slot, we must put CREATE_REPLICATION_SLOT and USE_SNAPSHOT in a transAction.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.23 19723

@1@ must be called in REPEATABLE READ isolation mode transaction

[Description]

When creating a new replication slot, we must put CREATE_REPLICATION_SLOT and USE_SNAPSHOT in REPEATABLE READ isolation mode transAction.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.24 19724

CREATE_REPLICATION_SLOT ... USE_SNAPSHOT must be called before any query

[Description]

When creating a new replication slot, we must call CREATE_REPLICATION_SLOT ... USE_SNAPSHOT before any query.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.25 19725

@1@ must not be called in a subtransaction

[Description]

When creating a new replication slot, we must not put CREATE_REPLICATION_SLOT and USE_SNAPSHOT in a subtransAction.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.26 19726

wrong flag type, only arrays and scalars are allowed

[Description]

Jasbonb flag type support arrays and scalars only.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.27 19727

not prepared for charset_conv_convert

[Description]

conversions are not open, so it is not ready for charset_conv_convert.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.28 19728

cannot perform transaction commands inside a cursor loop that is not read-only

[Description]

Doing transAction control, especially abort, inside a cursor loop that is not read-only, for example using UPDATE RETURNING, has weird semantics issues.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.29 19729

@1@: argument of --wal-segsize must be a power of 2 between 1 and 1024

[Description]

The input parameter WAL segment size is wrong.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.30 19730

@1@: checksum error occurred

[Description]

When basebackup, checksum error occurred.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.31 19731

--create-slot and --no-slot are incompatible options

[Description]

The input parameter in invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.32 19732

WAL segment size must be a power of two between 1 MB and 1 GB, but the remote server reported a value of @1@ byte

[Description]

The WAL segment size is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.33 19733

@1@: could not open process token: error code @2@

[Description]

Most Windows targets make DWORD a 32-bit unsigned long, but in case it doesn't cast DWORD before printing.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.34 19734

@1@: could not allocate SIDs: error code @2@

[Description]

Calling AllocateAndInitializeSid failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.35 19735

@1@: could not create restricted token: error code @2@

[Description]

Calling _CreateRestrictedToken failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.36 19736

@1@: could not start process for command "@2@": error code @3@

[Description]

Calling CreateProcessAsUser failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.37 19737

@1@: could not re-execute with restricted token: error code @2@

[Description]

Calling CreateRestrictedProcess failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.38 19738

@1@: could not get exit code from subprocess: error code @2@

[Description]

Calling GetExitCodeProcess failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.39 19739

@1@: invalid argument for option @2@

[Description]

The input argument for option is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.40 19740

@1@: transaction ID epoch (-e) must not be -1

[Description]

The input parameter for option is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.41 19741

@1@: transaction ID (-x) must not be 0

[Description]

The input parameter for option is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.42 19742

@1@: transaction ID (-c) must be either 0 or greater than or equal to 2

[Description]

The input parameter for option is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.43 19743

@1@: OID (-o) must not be 0

[Description]

The input parameter for option is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.44 19744

@1@: multitransaction ID (-m) must not be 0

[Description]

The input parameter for option is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.45 19745

@1@: oldest multitransaction ID (-m) must not be 0

[Description]

The input parameter for option is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.46 19746

@1@: multitransaction offset (-O) must not be -1

[Description]

The input parameter for option is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.47 19747

@1@: argument of --wal-segsize must be a power of 2 between 1 and 1024

[Description]

The input parameter for option is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.48 19748

@1@: too many command-line arguments (first is "@2@")

[Description]

The input parameters are too many.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.49 19749

@1@: no data directory specified

[Description]

Data directory must be specified.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.50 19750

@1@: cannot be executed by "root"

[Description]

Don't allow to be run by root, to avoid overwriting the ownership of files in the data directory. Check is made only for root as any other user won't have sufficient permissions to modify files in the data directory.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.51 19751

You must run @1@ as the PostgreSQL superuser.

[Description]

Don't allow to be run by root, to avoid overwriting the ownership of files in the data directory. We need only check for root any other user won't have sufficient permissions to modify files in the data directory.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.52 19752

@1@: could not change directory to "@2@": @3@

[Description]

Change directory failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.53 19753

@1@: could not open file "@2@" for reading: @3@

[Description]

Open file for reading failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.54 19754

@1@: lock file "@2@" existsIs a server running? If not, delete the lock file and try again.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.55 19755

@1@: could not read file "@2@" : @3@

[Description]

Reading file failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.56 19756

@1@: data directory is of wrong versionFile "@2@" contains "@3@", which is not compatible with this program's version "@4@".

[Description]

The version of the data directory must be same with the program's version.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.57 19757

If you are sure the data directory path is correct, execute touch @1@ and try again.

[Description]

If pg_control is not there at all, or can't be read, the odds are that wrong DataDir path is being handed. User can do "touch pg_control" to force us to proceed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.58 19758

@1@: pg_control exists but has invalid CRC; proceed with caution

[Description]

We will use the data but treat it as guessed.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.59 19759

@1@: pg_control specifies invalid WAL segment size (@2@ byte); proceed with caution

[Description]

if WAL segment size is not valid. WAL segment size must be a power of two between 1 MB and 1 GB.

[System Processing]

Processing will proceed.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.60 19760

@1@: could not create pg_control file: @2@

[Description]

Create pg_control file failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.61 19761

@1@: could not write pg_control file: @2@

[Description]

There can be not enough disk space.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.62 19762

@1@: fsync error: @2@

[Description]

The return value of fsync is not zero.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.63 19763

could not open directory "@1@": @2@

[Description]

Open directory failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.64 19764

@1@: could not read directory "@2@": @3@

[Description]

read directory failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.65 19765

@1@: could not close directory "@2@": @3@

[Description]

Close directory failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.66 19766

@1@: could not delete file "@2@": @3@

[Description]

Delete file failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.67 19767

@1@: could not open file "@2@": @3@

[Description]

Open file failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.68 19768

@1@: could not write file "@2@": @3@

[Description]

There can be not enough disk space.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.69 19769

WAL segment size must be a power of two between 1 MB and 1 GB, but the control file specifies @1@ byte

[Description]

WAL segment size is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.70 19770

Could not create thread for alarm

[Description]

Create thread for alarm failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.71 19771

could not open output file

[Description]

open output file failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.72 19772

write failed

[Description]

The return value is not same with expected value.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.73 19773

fsync failed

[Description]

The return value of fsync is not zero.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.74 19774

seek failed

[Description]

the return value of lseek is -1.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.75 19775

Detected clock going backwards in time.

[Description]

Current time is smaller than previous time.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.76 19776

Time warp: @1 @ ms

[Description]

Current time is smaller than previous time, showing the difference.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.77 19777

template0 must not allow connections, i.e. its pg_database.datallowconn must be false

[Description]

avoid restore failure when pg_dumpall tries to create template0

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.78 19778

All non-template0 databases must allow connections, i.e. their pg_database.datallowconn must be true

[Description]

avoid datallowconn == false databases from being skipped on restore

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.79 19779

The source cluster was shut down while in recovery mode. To upgrade, use "rsync" as documented or shut it down as a primary.

[Description]

we check here that the server was shut down cleanly from the controldata perspective.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.80 19780

The target cluster was shut down while in recovery mode. To upgrade, use "rsync" as documented or shut it down as a primary.

[Description]

Clean server shut down is checked from the controldata perspective.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.81 19781

Consult the last few lines of "@1@" or "@2@" for the probable cause of the failure.

[Description]

check the last few lines.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.82 19782

Consult the last few lines of "@1@" for the probable cause of the failure.

[Description]

check the last few lines.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.83 19783

could not create hard link between old and new data directories: @1@ In link mode the old and new data directories must be on the same file system.

[Description]

link file failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.84 19784

Your installation references loadable libraries that are missing from the new installation. You can add these libraries to the new installation, or remove the functions using them from the old installation. A list of problem libraries is in the file: @1@

[Description]

Some of the libraries required by the new installation is missing. Check that the new cluster contains all required libraries.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.85 19785

You must identify the directory where the @1@ . Please use the @2@ command-line option or the @3@ environment variable.

[Description]

getenv failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.86 19786

There seems to be a postmaster servicing the old cluster.Please shutdown that postmaster and try again.

[Description]

If we have a postmaster.pid file in old cluster, try to start the server. If it doesn't start, assume the server is running.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.87 19787

There seems to be a postmaster servicing the new cluster.Please shutdown that postmaster and try again.

[Description]

If we have a postmaster.pid file in new cluster, try to start the server. If it doesn't start, assume the server is running.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.88 19788

could not connect to source postmaster started with the command: @1 @

[Description]

pg_ctl failed, If connection reason is found then connection will be re-attempted.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.89 19789

could not connect to target postmaster started with the command: @1 @

[Description]

pg_ctl failed, If connection reason is found then connection will be re-attempted.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.90 19790

Cannot upgrade to/from the same system catalog version when using tablespaces.

[Description]

The directories of old cluster and new cluster should be different.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.91 19791

@1@: could not read block @2@ in file "@3@": read @4@ of @5@

[Description]

The return value of read is not BLCKSZ.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.92 19792

checksum verification failed in file "@1@", block @2@: calculated checksum @3@ but block contains @4@

[Description]

The calculated checksum is different from the checksum that was saved in the block.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.93 19793

checksums verified in file "@1@"

[Description]

List of files verified for checksum is listed.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.94 19794

invalid segment number @1@ in file name "@2@"

[Description]

The segment number is zero.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.95 19795

invalid filenode specification, must be numeric: @1@

[Description]

relfilenode is zero.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.96 19796

pg_control CRC value is incorrect

[Description]

CRC check failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.97 19797

cluster must be shut down

[Description]

The state of the cluster must be DB_SHUTDOWNED or DB_SHUTDOWNED_IN_RECOVERY.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.98 19798

data checksums are not enabled in cluster

[Description]

data checksum version is zero.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.94.99 19799

WAL segment size must be a power of two between 1 MB and 1 GB, but the WAL file "@1@" header specifies @2@ byte

[Description]

Specified WAL segment size is must be power of two and it should be between 1MB and 1GB

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95 Message Numbers Beginning with 19800

2.95.1 19800

invalid value "@1@" for "@2@": integer expected

[Description]

string is not recognized.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.2 19801

pointers to uvvarchar are not implemented

[Description]

The length of the uvvarchar is not positive.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.3 19802

server offered SCRAM-SHA-256-PLUS authentication over a non-SSL connection

[Description]

The server offered SCRAM-SHA-256-PLUS, but the connection is not SSL-encrypted. That's not sane.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.4 19803

procedure parameter "@1@" is an output parameter but corresponding argument is not writable

[Description]

The output parameter should be writable.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.5 19804

procedure parameter @1@ is an output parameter but corresponding argument is not writable

[Description]

The output parameter should be writable.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.6 19805

function returning record called in context that cannot accept type record

[Description]

The result type is not TYPEFUNC_COMPOSITE.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.7 19806

@1@: could not send replication command "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.8 19807

could not fetch WAL segment size: got @1@ rows and @2@ fields, expected @3@ rows and @4@ or more fields

[Description]

The result number of show wal_segment_size is not one.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.9 19808

WAL segment size could not be parsed

[Description]

The wal segment size is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.10 19809

WAL segment size must be a power of two between 1 MB and 1 GB, but the remote server reported a value of @1@ byte

[Description]

The wal segment size is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.11 19810

@1@: WAL segment size must be a power of two between 1 MB and 1 GB, but the remote server reported a value of @2@ bytes

[Description]

The wal segment size is invalid.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.12 19811

Whether to continue running after a failure to sync data files.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.95.13 19815

level number 77 could not be used in TYPEDEF statement

[Description]

77 level variable is used in the TYPEDEF statement.

[System Processing]

Precompiling will be aborted.

[Action]

Change the level number.

2.95.14 19816

level number 77 could not be used for group item

[Description]

A group data item contains the 77 level variable.

[System Processing]

Precompiling will be aborted.

[Action]

Remove the variable from the group data item.

2.95.15 19817

"VARYING" cannot have a level number greater than 48

[Description]

Variables that have greather than 48 level have VARYING clause.

[System Processing]

Precompiling will be aborted.

[Action]

Remove "VARYNING" clause or change the level number.

2.95.16 19818

cannot alter inherited column "@1@" of relation "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.17 19819

empty configuration file name: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.18 19820

configuration file recursion in "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.19 19821

empty configuration directory name: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.20 19822

no slot available for new worker process

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.21 19823

could not read from file "@1@"

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.22 19824

while setting parameter "@1@" to "@2@"

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.95.23 19825

@1@: too many jobs for this platform -- try @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.24 19826

cannot PREPARE a transaction that has operated on temporary objects

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.25 19827

cannot perform FREEZE on a partitioned table

[Description]

(Nothing)

[System Processing]

(Nothing)

[Action]

(Nothing)

2.95.26 19836

waitpid() failed: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.27 19837

child process exited abnormally: status @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.28 19838

XMLTABLE cannot cast a namespace node to a non-XML result type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.29 19839

cannot create foreign partition of partitioned table "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.30 19840

cannot attach foreign table "@1@" as partition of partitioned table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.31 19841

could not determine row type for result of @1@

[Description]

The result row type cannot be determined.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.32 19842

selecting default time zone ...

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.95.33 19843

malformed SCRAM message (invalid salt)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.34 19844

cluster is not compatible with this version of pg_checksums

[Description]

The version of the cluster and the version of pg_verify_checksums must be the same.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.35 19845

database cluster is not compatible

[Description]

pg_verify_checksums is not compatible with the database cluster.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.36 19846

The database cluster was initialized with block size @1@, but pg_checksums was compiled with block size @2@.

[Description]

The initial BLCKSZ of the database cluster must be the same as pg_verify_checksums

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.37 19847

type @1@ is not composite

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.38 19848

tables declared WITH OIDS are not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.39 19849

could not read from log segment @1@, offset @2@, length @3@: @4@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.40 19850

could not read from log segment @1@, offset @2@: read @3@ of @4@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.41 19851

skipping redundant vacuum to prevent wraparound of table "@1@.@2@.@3@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.95.42 19852

index row size @1@ exceeds btree version @2@ maximum @3@ for index "@4@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.43 19853

tid (@1@, @2@) is not valid for relation "@3@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.44 19854

table access method "@1@" does not exist

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.45 19855

incorrect size of file "@1@" : @2@ byte

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.46 19856

incorrect alignment of CRC offset for file "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.47 19857

invalid magic number stored in file "@1@"

[Description]

An error occurred reading the file.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.48 19858

invalid size stored in file "@1@"

[Description]

An error occurred reading the file.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.49 19859

calculated CRC checksum does not match value stored in file "@1@"

[Description]

An error occurred reading the file.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.50 19860

using recovery command file "@1@" is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.51 19861

could not fsync write-through file "@1@": @2@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.52 19862

could not read from log segment @1@, offset @2@: read @3@ of @4@

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.53 19863

"wait_seconds" must not be negative or zero

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.54 19864

server did not promote within @1@ seconds

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.55 19865

must be superuser to call pg_nextoid()

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.56 19866

pg_nextoid() can only be used on system catalogs

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.57 19867

column "@1@" is not of type oid

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.58 19868

index "@1@" is not the index for column "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.59 19869

cannot use generated column "@1@" in column generation expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.60 19870

primary key column "@1@" is not marked NOT NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.61 19871

nondeterministic collations are not supported for operator class "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.62 19872

concurrent index creation for exclusion constraints is not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.63 19873

cannot change routine kind

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.64 19874

cannot change number of direct arguments of an aggregate function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.65 19875

nondeterministic collations not supported with this provider

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.66 19876

invalid COPY file header (WITH OIDS)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.67 19877

column "@1@" is a generated column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.68 19878

support function @1@ must return type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.69 19879

must be superuser to specify a support function

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.70 19880

cannot specify default tablespace for partitioned relations

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.71 19881

table "@1@" has no indexes that can be reindexed concurrently

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.95.72 19882

table "@1@" has no indexes to reindex

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.95.73 19883

cannot reindex system catalogs concurrently

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.74 19884

cannot reindex system catalogs concurrently, skipping all

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.95.75 19885

cannot reindex invalid index "@1@.@2@" concurrently, skipping

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.95.76 19886

cannot reindex exclusion constraint index "@1@.@2@" concurrently, skipping

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.95.77 19887

cannot reindex this type of relation concurrently

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.95.78 19888

index "@1@.@2@" was reindexed

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.95.79 19889

@1@ and @2@ are mutually exclusive options

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.80 19890

subscription with @1@ must also set @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.81 19891

specifying a table access method is not supported on a partitioned table

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.82 19892

inherited column "@1@" has a generation conflict

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.83 19893

column "@1@" of relation "@2@" is a generated column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.84 19894

invalid @1@ action for foreign key constraint containing generated column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.85 19895

generation expression for column "@1@" cannot be cast automatically to type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.86 19896

cannot alter type of a column used by a generated column

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.87 19897

cannot use generated column in partition key

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.88 19898

BEFORE trigger's WHEN condition cannot reference NEW generated columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.95.89 19899

could not serialize access due to concurrent delete

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96 Message Numbers Beginning with 19900

2.96.1 19900

unrecognized ANALYZE option "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.2 19901

skipping vacuum of "@1@" --- relation no longer exists

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.96.3 19902

tuple to be deleted was already modified by an operation triggered by the current command

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.4 19903

WHERE clause not allowed with COPY TO

[Description]

WHERE clause not allowed with COPY TO in copy command.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.96.5 19904

for a generated column, GENERATED ALWAYS must be specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.6 19905

XQuery "x" flag (expanded regular expressions) is not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.7 19906

@1@ at end of jsonpath input

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.8 19907

@1@ at or near "@2@" of jsonpath input

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.9 19908

GSSAPI encryption can only be used with gss, trust, or reject authentication methods

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.10 19909

could not extract domain name from ldapbasedn

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.11 19910

LDAP authentication could not find DNS SRV records for "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.12 19911

LDAP server not specified, and no ldapbasedn

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.13 19912

outgoing GSSAPI message would not use confidentiality

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.14 19913

server tried to send oversized GSSAPI packet (@1 @ > @2 @)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.15 19914

oversized GSSAPI packet sent by the client (@1 @ > @2 @)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.16 19915

incoming GSSAPI message did not use confidentiality

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.17 19916

oversized GSSAPI packet sent by the client (@1 @ > @2 @)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.18 19917

could not set minimum SSL protocol version

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.96.19 19918

could not set maximum SSL protocol version

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.96.20 19919

hostgssenc record cannot match because GSSAPI is not supported by this build

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.96.21 19920

GSSAPI encryption only supports gss, trust, or reject authentication

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.22 19921

invalid value for clientcert: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.23 19922

aggregate functions are not allowed in partition bound

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.24 19923

grouping operations are not allowed in partition bound

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.25 19924

aggregate functions are not allowed in column generation expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.26 19925

grouping operations are not allowed in column generation expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.27 19926

aggregate functions are not allowed in COPY FROM WHERE conditions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.28 19927

grouping operations are not allowed in COPY FROM WHERE conditions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.29 19928

window functions are not allowed in partition bound

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.30 19929

window functions are not allowed in COPY FROM WHERE conditions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.31 19930

window functions are not allowed in column generation expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.32 19931

cannot use column reference in DEFAULT expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.33 19932

cannot use column reference in partition bound expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.34 19933

cannot use subquery in partition bound

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.35 19934

cannot use subquery in COPY FROM WHERE condition

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.36 19935

cannot use subquery in column generation expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.37 19936

procedures cannot have more than @1@ argument

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.96.38 19937

routine name "@1@" is not unique

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.39 19938

aggregate name "@1@" is not unique

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.40 19939

procedure name "@1@" is not unique

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.41 19940

set-returning functions are not allowed in partition bound

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.42 19941

set-returning functions are not allowed in COPY FROM WHERE conditions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.43 19942

set-returning functions are not allowed in column generation expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.44 19943

cannot use system column "@1@" in column generation expression

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.45 19944

generated columns are not supported on typed tables

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.46 19945

generated columns are not supported on partitions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.47 19946

multiple generation clauses specified for column "@1@" of table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.48 19947

both default and generation expression specified for column "@1@" of table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.49 19948

both identity and generation expression specified for column "@1@" of table "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.50 19949

collation of partition bound value for column "@1@" does not match partition key collation "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.51 19950

removed orphan archive status file "@1@"

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.96.52 19951

removal of orphan archive status file "@1@" failed too many times, will try again later

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.96.53 19952

nondeterministic collations are not supported for regular expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.54 19953

replication origin name "@1@" is reserved

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.55 19954

cannot copy physical replication slot "@1@" as a logical replication slot

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.56 19955

cannot copy logical replication slot "@1@" as a physical replication slot

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.57 19956

cannot copy a replication slot that doesn't reserve WAL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.58 19957

could not copy replication slot "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.59 19958

could not read from log segment @1@, offset @2@: read @3@ of @4@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.60 19959

could not close shared memory segment "@1@": @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.61 19960

must be superuser to rotate log files with adminpack 1.0

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.62 19961

unsafe use of new value "@1@" of enum type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.63 19962

@ is not allowed in root expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.64 19963

LAST is allowed only in array subscripts

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.65 19964

single boolean result is expected

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.66 19965

"vars" argument is not an object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.67 19966

JSON object does not contain key "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.68 19967

jsonpath member accessor can only be applied to an object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.69 19968

jsonpath wildcard array accessor can only be applied to an array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.70 19969

jsonpath array subscript is out of bounds

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.71 19970

jsonpath array accessor can only be applied to an array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.72 19971

jsonpath wildcard member accessor can only be applied to an object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.73 19972

jsonpath item method .@1@() can only be applied to an array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.74 19973

jsonpath item method .@1@() can only be applied to a numeric value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.75 19974

jsonpath item method .@1@() can only be applied to a string or numeric value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.76 19975

left operand of jsonpath operator @1@ is not a single numeric value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.77 19976

right operand of jsonpath operator @1@ is not a single numeric value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.78 19977

operand of unary jsonpath operator @1@ is not a numeric value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.79 19978

jsonpath item method .@1@() can only be applied to an object

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.80 19979

could not find jsonpath variable "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.81 19980

jsonpath array subscript is not a single numeric value

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.82 19981

jsonpath array subscript is out of integer range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.83 19982

nondeterministic collations are not supported for LIKE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.84 19983

nondeterministic collations are not supported for ILIKE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.85 19984

SQL regular expression may not contain more than two escape-double-quote

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.86 19985

removing partition "@1@" violates foreign key constraint "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.87 19986

nondeterministic collations are not supported for substring searches

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.96.88 19987

Sets the shell command that will retrieve an archived WAL file.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.89 19988

Sets the shell command that will be executed at every restart point.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.90 19989

Sets the shell command that will be executed once at the end of recovery.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.91 19990

Specifies the timeline to recover into.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.92 19991

Set to "immediate" to end recovery as soon as a consistent state is reached.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.93 19992

Sets the transaction ID up to which recovery will proceed.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.94 19993

Sets the time stamp up to which recovery will proceed.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.95 19994

Sets the named restore point up to which recovery will proceed.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.96 19995

Sets the LSN of the write-ahead log location up to which recovery will proceed.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.97 19996

Specifies a file name whose presence ends recovery in the standby.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.98 19997

Sets the connection string to be used to connect to the sending server.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.99 19998

Sets the name of the replication slot to use on the sending server.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.96.100 19999

Sets the default table access method for new tables.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.97 Message Numbers Beginning with 20000

2.97.1 20000

[listagg_transfn called in non-aggregate context](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.2 20002

[median4_transfn called in non-aggregate context](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.3 20003

[lock request error](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.4 20004

[event registration error](#)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.5 20005

event name is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.6 20006

feature not supported

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.7 20007

not called by trigger manager

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.8 20008

not called on valid event

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.9 20009

SPI_connect failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.10 20010

not called with valid relation

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.11 20011

attribute event not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.12 20012

attribute message not found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.13 20013

SPI_prepare failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.14 20014

can't execute sql

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.15 20015

SPI execute error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.16 20016

invalid value for @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.17 20017

date out of range

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.18 20018

timestamp out of range

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.19 20019

invalid cursor number

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.20 20020

failed to execute SQL statement

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.21 20021

SQL is empty string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.22 20022

host variable name "@1@" is too long

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.23 20023

host variable name is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.24 20024

no statement parsed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.25 20025

host variable does not exist

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.26 20026

invalid length for host variable name

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.27 20027

invalid length for variable character string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.28 20028

not all variables bound

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.29 20029

no statement execute

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.30 20030

not supported data type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.31 20031

mismatch column_value data type and define_column data type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.32 20032

mismatch select data type and define_column data type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.33 20033

@1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.34 20034

invalid parameter

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.35 20035

null value not allowed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.36 20036

invalid encoding name "@1@"

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.37 20037

program limit exceeded

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.38 20038

no data found

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.39 20039

SPI_prepare_failed

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.40 20040

start_line must be positive (@1@ passed)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.41 20041

end_line must be positive (@1@ passed)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.42 20042

return type must be a row type

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.43 20043

failed to retrieve the default LC_COLLATE value

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.44 20044

failed to set the requested LC_COLLATE value [@1 @]

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.45 20045

failed to set back the default LC_COLLATE value [@1 @]

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.46 20046

unknown format

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.47 20047

function is called from invalid context

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.48 20048

argument is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.49 20049

out of memory

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.97.50 20050

insufficient privilege

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.51 20051

datatype mismatch

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.52 20052

unexpected type: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.53 20053

pipe name is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.54 20054

pipe creation error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.55 20055

message is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.56 20056

could not determine data type of input

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.57 20057

unknown equal operand for datatype

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.58 20058

cannot set range to negative number

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.59 20059

date is out of range

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.60 20060

nonbizday registration error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.61 20061

nonbizday unregistration error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.62 20062

plvlex.tokens is not available in the built

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.63 20063

too few parameters specified for template string

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.64 20064

substitution is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.65 20065

buffer overflow

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.66 20066

internal error

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.67 20067

Limit decreased to @1@ bytes.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.68 20068

Limit increased to @1@ bytes.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.69 20069

unknown option '@1@'

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.70 20070

too much large memory block request

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.71 20071

corrupted pointer

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.72 20082

SQL is NULL

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.97.73 20083

input value length is @1@; too long for type nvarchar2(@2@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.97.74 20084

input value too long for type nvarchar2(@1@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.97.75 20085

input value length is @1@; too long for type varchar2(@2@)

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.97.76 20086

input value length is @1@; too long for type varchar2(@2@)**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.97.77 20087

String constants with Unicode escapes cannot be used when standard_conforming_strings is off.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.97.78 20088

Unicode escapes must be \uXXXX or \UXXXXXXXX.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.97.79 20089

Use " to write quotes in strings. \' is insecure in client-only encodings.**[Description]**

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.97.80 20090

Use " to write quotes in strings, or use the escape string syntax (E'...').

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.97.81 20091

Use the escape string syntax for backslashes, e.g., E'\\'.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.97.82 20092

Use the escape string syntax for escapes, e.g., E'\\r'.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.97.83 20093

cannot to parse timezone "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.97.84 20094

utl_file package is not supported on Microsoft Windows

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.97.85 20095

an argument is NULL

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.98 Message Numbers Beginning with 20100

2.98.1 20123

Please specify an integer between 0 and 9, and retry.

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.98.2 20124

could not initialize compression library: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.98.3 20125

could not close compression stream: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.98.4 20126

could not compress data: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.98.5 20127

could not uncompress data: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.98.6 20128

source file is not specified

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.98.7 20129

could not seek to end of file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99 Message Numbers Beginning with 25000

2.99.1 25000

Name of the SSL library.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.2 25001

Sets the action to perform upon reaching the recovery target.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.3 25002

Selects the shared memory implementation used for the main shared memory region.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.4 25003

Sets the minimum SSL/TLS protocol version to use.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.5 25004

Sets the maximum SSL/TLS protocol version to use.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.6 25005

multiple recovery targets specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.99.7 25006

could not determine which collation to use for string hashing

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.99.8 25007

WITH OIDS is no longer supported; this can only be false.

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.9 25008

could not read compressed file "@1@": read @2@ of @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.99.10 25009

could not close file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.11 25010

checksums enabled in file "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.12 25011

seek failed for block @1@ in file "@2@": @3@

[Description]

the return value of lseek is -1.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.99.13 25012

could not write block @1@ in file "@2@": @3@**[Description]**

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

2.99.14 25013

could not write block @1@ in file "@2@": wrote @3@ of @4@**[Description]**

There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Delete user data stored in the database server to free up space on the disk.

2.99.15 25014

data checksums are already disabled in cluster**[Description]**

data checksums are already disabled in cluster.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.99.16 25015

data checksums are already enabled in cluster**[Description]**

data checksums are already enabled in cluster.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.99.17 25016

Checksums enabled in cluster

[Description]

Checksums enabled in cluster.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.18 25017

Checksums disabled in cluster

[Description]

Checksums disabled in cluster.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.19 25018

out of memory

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.20 25019

could not close file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.21 25020

could not open file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.22 25021

could not write file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.23 25022

could not fsync file "@1@": @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.24 25023

@1@: could not start server due to setsid() failure: @2@

[Description]

could not start server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.25 25024

@1@: cannot rotate log file; single-user server is running (PID: @2@)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.26 25025

@1@: could not create log rotation signal file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.27 25026

@1@: could not write log rotation signal file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.28 25027

@1@: could not send log rotation signal (PID: @2@): @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.29 25028

@1@: could not remove log rotation signal file "@2@": @3@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.30 25029

out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.31 25030

out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.32 25031

restoring tables WITH OIDS is not supported anymore

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.99.33 25032

could not set default_table_access_method: @1@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.34 25033

extra_float_digits must be in range -15..3

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.35 25034

rows-per-insert must be in range @1@..@2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.36 25035

option --on-conflict-do-nothing requires option --inserts, --rows-per-insert, or --column-inserts

[Description]

option --on-conflict-do-nothing requires option --inserts, --rows-per-insert, or --column-inserts

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.37 25036

WITH OIDS is not supported anymore (table "@1@")

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.99.38 25037

no referencing object @1@ @2@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.99.39 25038

no referenced object @1@ @2@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.99.40 25039

option --exclude-database cannot be used together with -g/--globals-only, -r/--roles-only, or -t/--tablespaces-only

[Description]

option --exclude-database cannot be used together with -g/--globals-only, -r/--roles-only, or -t/--tablespaces-only

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.41 25040

excluding database "@1@"

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.99.42 25041

one of -d/--dbname and -f/--file must be specified

[Description]

one of -d/--dbname and -f/--file must be specified

[System Processing]

Processing will be aborted.

[Action]

Check the command-line, and re-execute the command with correct options.

2.99.43 25042

options -C/--create and -1/--single-transaction cannot be used together

[Description]

options -C/--create and -1/--single-transaction cannot be used together

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.99.44 25043

could not find referenced extension @1@

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.99.45 25044

number of source and target fields in assignment does not match

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.99.46 25045

cannot set generated column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.99.47 25046

cannot set generated column "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.99.48 25049

unrecognized value "@1@" for option '-i'

[Description]

Unrecognized value specified for option '-i'.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.49 25050

unrecognized stop mode "@1@"

[Description]

Unrecognized stop mode was specified.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.50 25051

invalid timeout "@1@"

[Description]

Invalid timeout specified.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.51 25052

too many command-line arguments (first is "@1@")

[Description]

Too many command-line arguments.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.52 25053

unrecognized operation mode "@1@"

[Description]

Unrecognized operation mode was specified.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.53 25054

no operation mode is specified

[Description]

No operation mode is specified.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.54 25055

no connection manager directory is specified and environment variable CMDATA is unset

[Description]

No connection manager directory is specified and environment variable CMDATA is unset.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.94 25095

invalid value for parameter '@1@'

[Description]

Invalid value for parameter.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.95 25096

could not open file "@1@": @2@

[Description]

Could not open file.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.99.96 25097

invalid parameter '@1@' in configuration file "@2@" line @3@

[Description]

Invalid parameter in configuration file.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.97 25098

invalid value for parameter '@1@' in configuration file "@2@" line @3@

[Description]

Invalid value for parameter in configuration file.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.99.98 25099

could not notify application: @1@

[Description]

Could not notify application.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100 Message Numbers Beginning with 25100

2.100.1 25100

unexpected heartbeat event is reported: host="@1@"

[Description]

Unexpected heartbeat event is reported.

[System Processing]

Processing aborts.

[Action]

Contact Fujitsu technical support.

2.100.2 25101

could not reply all application info: @1@

[Description]

Could not reply all application info.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.3 25102

could not reply all node info: @1@

[Description]

Could not reply all node info.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.4 25103

could not reply target node info: @1@

[Description]

Could not reply target node info.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.5 25104

invalid query "@1@" is received

[Description]

Invalid query is received.

[System Processing]

Processing aborts.

[Action]

Contact Fujitsu technical support.

2.100.6 25105

received invalid startup packet

[Description]

Received invalid startup packet.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.7 25106

could not complete command: @1@

[Description]

Could not complete command.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.8 25107

could not be ready for next command: @1@

[Description]

Could not be ready for next command.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.9 25108

invalid status(@1@) for connection of application internal event(@2@)

[Description]

Invalid status for connection of application internal event.

[System Processing]

Processing aborts.

[Action]

Contact Fujitsu technical support.

2.100.10 25109

rejected a connection from application due to going shutdown

[Description]

Rejected a connection from application due to going shutdown.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.11 25110

could not reply for startup: @1@

[Description]

Could not reply for startup.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.12 25111

unexpected packet(@1@) is received

[Description]

Unexpected packet is received.

[System Processing]

Processing aborts.

[Action]

Contact Fujitsu technical support.

2.100.13 25112

@1@ causes an error at application connection: @2@

[Description]

Causes an error at application connection.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.14 25113

application connection is closed by remote in @1@

[Description]

Application connection is closed by remote.

[System Processing]

Processing continues.

[Action]

Check log of remote system.

2.100.15 25114

unexpected heartbeat event(@1@) is received

[Description]

Unexpected heartbeat event is received.

[System Processing]

Processing aborts.

[Action]

Contact Fujitsu technical support.

2.100.16 25115

could not listen for socket: @1@

[Description]

Could not listen for socket.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.17 25116

could not accept application connection: @1@

[Description]

Could not accept application connection.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.18 25117

could not get string format address: @1@

[Description]

Could not get string format address.

[System Processing]

Processing continues.

[Action]

Check log of Operating System.

2.100.19 25118

could not open pid file "@1@": @2@

[Description]

Could not open pid file.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.20 25119

could not read from pid file "@1@": @2@

[Description]

Could not read from pid file.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.21 25120

"@1@" is not pid file: number of line is not enough(expect 4 but @2@)

[Description]

Not pid file: number of line is not enough.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.22 25121

could not write to pid file "@1@": @2@

[Description]

Could not write to pid file.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.23 25122

could not seek pid file "@1@": @2@

[Description]

Could not seek pid file.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.24 25123

could not sync to pid file "@1@": @2@

[Description]

Could not sync to pid file.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.25 25124

closing all application connections

[Description]

Closing all application connections.

[System Processing]

Processing continues.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.26 25125

received smart shutdown request

[Description]

Received smart shutdown request.

[System Processing]

Processing continues.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.27 25126

received fast shutdown request

[Description]

Received fast shutdown request.

[System Processing]

Processing continues.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.28 25127

received immediate shutdown request

[Description]

Received immediate shutdown request.

[System Processing]

Processing continues.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.29 25128

invalid packet is received: msgtype='0x@1@'

[Description]

Invalid packet is received.

[System Processing]

Processing aborts.

[Action]

Contact Fujitsu technical support.

2.100.30 25129

could not change directory to "@1@": @2@

[Description]

Could not change directory.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.31 25130

could not create pid file "@1@": @2@

[Description]

Could not create pid file.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.32 25131

invalid pid file "@1@"

[Description]

Invalid pid file.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.33 25132

another conmgr process(PID @1@) is running

[Description]

Another conmgr process is running.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.34 25133

could not write pid file "@1@": @2@

[Description]

Could not write pid file.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.35 25134

could not remove pid file "@1@": @2@

[Description]

Could not remove pid file.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.36 25135

real and effective user IDs must match

[Description]

Real and effective user IDs must match.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.37 25136

no cmddata directory specified and environment variable CMDATA unset

[Description]

No cmddata directory specified and environment variable CMDATA unset.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.38 25137

cmdata directory "@1@" does not exist

[Description]

Cmdata directory does not exist.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.39 25138

could not access to cmdata directory "@1@" : @2@

[Description]

Could not access to cmdata directory.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.40 25139

"@1@" is not a directory

[Description]

Not a directory.

[System Processing]

Processing aborts.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.41 25140

conmgr process is starting

[Description]

Conmgr process is starting.

[System Processing]

Processing continues.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.42 25141

conmgr process stopped

[Description]

Conmgr process stopped.

[System Processing]

Processing continues.

[Action]

Recheck command line, configuration file, or logic of your application. Hint message may follow with this message.

2.100.43 25142

could not prepare for heartbeat: @1@

[Description]

Could not prepare for heartbeat.

[System Processing]

Processing aborts.

[Action]

Check log of Operating System.

2.100.44 25143

could not connect due to the following errors

[Description]

Could not connect due to the following errors.

Sleep until another process releases global meta cache because global meta cache cannot be swept away yet. Please increase pgx_global_metacache.

[Description]

Sleep until another process releases global meta cache because global meta cache cannot be swept away yet. Please increase pgx_global_metacache.

[System Processing]

Processing continues.

[Action]

If this message occurs frequently, increase the pgx_global_metacache parameter setting and restart the database.

2.101.6 25205

GMC is swept away

[Description]

GMC is swept away.

[System Processing]

Processing continues.

[Action]

No action required.

2.101.7 25206

pgx_global_metacache must be set to at least 10MB when enabled.

[Description]

pgx_global_metacache must be set to at least 10MB when enabled.

[System Processing]

Processing will be aborted.

[Action]

Set the pgx_global_metacache parameter to at least 10MB and restart the database.

2.101.8 25207

TDE_z: PKCS11 Slot ID is not defined

[Description]

The opencryptoki Slot ID for transparent data encryption is not defined.

[System Processing]

Processing will be aborted.

[Action]

In postgresql.conf set the GUC TDE_z.SLOT_ID to the opencryptoki Slot ID configured for transparent data encryption.

2.101.9 25208

TDE_z: PKCS11 User PIN is not available at load time

[Description]

The opencryptoki User PIN associated with the token of Slot ID was not defined at load time.

[System Processing]

This is only a warning message when TDE_z is loaded.

[Action]

The token User PIN must be known to TDE_z before secure keys can be used. Specify the User PIN at load time with --user-pin option, or by GUC TDE_z.USER_PIN in postgresql.conf. Or, specify the User PIN at run-time using SELECT pgx_open_keystore(user pin); or SELECT pgx_set_master_key(user pin);

2.101.10 25209

TDE_z: Slot @1@ token model is '@2@'

[Description]

Logs the opencryptoki Slot ID and token model that TDE_z will be using.

[System Processing]

This is an information message when TDE_z is loaded.

[Action]

No action is required. Confirm the Slot and token type are as expected.

2.101.11 25210

TDE_z: Slot @1@ token model '@2@' is not supported

[Description]

The opencryptoki token model at the specified Slot ID is not supported by TDE_z.

[System Processing]

Processing will be aborted.

[Action]

Only "EP11" and "CCA" tokens are supported.

2.101.12 25211

TDE_z: Slot @1@ C_GetMechanismInfo CKM_AES_KEY_GEN: @2@ [@3@]

[Description]

The specified Slot ID does not support a mechanism required by TDE_z.

[System Processing]

Processing will be aborted.

[Action]

Specify a different token which supports the necessary mechanism.

2.101.13 25212

TDE_z: Slot @1@ mechanism does not support CKF_GENERATE

[Description]

The specified Slot ID does not support a mechanism required by TDE_z.

[System Processing]

Processing will be aborted.

[Action]

Specify a different token which supports the necessary mechanism.

2.101.14 25213

TDE_z: Slot @1@ C_GetMechanismInfo CKM_AES_CBC: @2@ [@3@]

[Description]

The specified Slot ID does not support a mechanism required by TDE_z.

[System Processing]

Processing will be aborted.

[Action]

Specify a different token which supports the necessary mechanism.

2.101.15 25214

TDE_z: Slot @1@ mechanism does not support CKF_ENCRYPT

[Description]

The specified Slot ID does not support a mechanism required by TDE_z.

[System Processing]

Processing will be aborted.

[Action]

Specify a different token which supports the necessary mechanism.

2.101.16 25215

TDE_z: Slot @1@ mechanism does not support CKF_DECRYPT

[Description]

The specified Slot ID does not support a mechanism required by TDE_z.

[System Processing]

Processing will be aborted.

[Action]

Specify a different token which supports the necessary mechanism.

2.101.17 25216

TDE_z: Unable to initialize the opencryptoki library: 0x@1@ [@2@]

[Description]

The call to the C_Initialize function of PKCS#11 has failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and take appropriate action based on the reported PKCS#11 error code.

2.101.18 25217

TDE_z: Slot @1@ C_OpenSession: @2@ [@3@]

[Description]

The call to the C_OpenSession function of PKCS#11 has failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and take appropriate action based on the reported PKCS#11 error code.

2.101.19 25218

TDE_z extension must be loaded via shared_preload_libraries

[Description]

The TDE_z extension cannot be dynamically loaded by the user.

[System Processing]

Processing will be aborted.

[Action]

In postgresql.conf specify shared_preload_libraries = 'TDE_z'

2.101.20 25219

TDE_z: C_Login: @1@ [@2@]

[Description]

The call to the C_OpenSession function of PKCS#11 has failed.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and take appropriate action based on the reported PKCS#11 error code.

2.101.21 25220

TDE_z: Expected key not found: @1@ [@2@]

[Description]

During encryption or decryption processing TDE_z was not able to find an expected opencryptoki key.

[System Processing]

Processing will be aborted.

[Action]

The keystore and the opencryptoki token key objects are not consistent with each other. This may happen if the keystore and/or opencryptoki token directory have been incorrectly copied (or not copied at all). Check all files have been copied correctly.

2.101.22 25221

TDE_z : Operation not supported

[Description]

The TDE_z extension cannot be dynamically loaded by the user.

[System Processing]

Processing will be aborted.

[Action]

In postgresql.conf specify shared_preload_libraries = 'TDE_z'

2.101.23 25222

Keystore does not require passphrase.

[Description]

keystore-passphrase command line option and PGX_KEYSTORE_PASSPHRASE environment variable should not be set when using TDE_z extension.

[System Processing]

Processing will be aborted.

[Action]

Remove keystore-passphrase from command line option or unset PGX_KEYSTORE_PASSPHRASE environment variable before starting the server with TDE_z extension loaded.

2.101.24 25223

Keystore does not require passphrase. @1@ cannot be executed.

[Description]

pgx_set_keystore_passphrase function cannot be executed when TDE_z extension is used.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly

2.101.25 25224

encryption of the keystore "@1@" failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.101.26 25225

decryption of the keystore "@1@" failed: @2@

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.101.27 25226

keystore for Hardware-based encryption has been opened

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.102 Message Numbers Beginning with 70000

2.102.1 70001

Error loading default settings from driverconfig.properties

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.102.2 70002

Your security policy has prevented the connection from being attempted. You probably need to grant the connect java.net.SocketPermission to the database server host and port that you wish to connect to.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.3 70003

Something unusual has occurred to cause the driver to fail. Please report this exception.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.102.4 70004

Connection attempt timed out.

[Description]

Timeout occurred during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.102.5 70005

Interrupted while attempting to connect.

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.102.6 70006

Method @1@ is not yet implemented.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.7 70007

Requested CopyIn but got @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.8 70008

Requested CopyOut but got @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.9 70009

Copying from database failed: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.102.10 70010

This copy stream is closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.11 70011

Read from copy failed.

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.102.12 70012

Cannot write to copy a byte of value @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.13 70013

A connection could not be made using the requested protocol @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.14 70014

Premature end of input stream, expected @1@ bytes, but only read @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.15 70015

Expected an EOF from server, got: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.16 70016

An unexpected result was returned by a query.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.17 70017

Illegal UTF-8 sequence: byte @1@ of @2@ byte sequence is not 10xxxxx: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.18 70018

Illegal UTF-8 sequence: @1@ bytes used to encode a @2@ byte value: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.19 70019

Illegal UTF-8 sequence: initial byte is @1@: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.20 70020

Illegal UTF-8 sequence: final value is out of range: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.21 70021

Illegal UTF-8 sequence: final value is a surrogate value: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.22 70022

Zero bytes may not occur in string parameters.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.23 70023

Zero bytes may not occur in identifiers.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.24 70024

Cannot convert an instance of @1@ to type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.25 70025

Connection to @1@ refused. Check that the hostname and port are correct and that the postmaster is accepting TCP/IP connections.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.26 70026

The connection attempt failed.

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.102.27 70027

The server does not support SSL.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.28 70028

An error occurred while setting up the SSL connection.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.29 70030

The server requested password-based authentication, but no password was provided.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.30 70031

The authentication type @1@ is not supported. Check that you have configured the pg_hba.conf file to include the client's IP address or subnet, and that it is using an authentication scheme supported by the driver.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.31 70032

Protocol error. Session setup failed.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.32 70034

The column index is out of range: @1@, number of columns: @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.33 70035

No value specified for parameter @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.34 70036

Expected command status BEGIN, got @1@.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.35 70037

Unexpected command status: @1@.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.36 70038

An I/O error occurred while sending to the backend.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.37 70039

Unknown Response Type @1@.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.38 70040

Ran out of memory retrieving query results.

[Description]

There was insufficient free space in the server's memory during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Estimate memory usage and take the following action:

- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.102.39 70044

CommandComplete expected COPY but got:

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.40 70045

Tried to obtain lock while already holding it

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.41 70046

Tried to break lock on database connection

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.42 70047

Interrupted while waiting to obtain lock on database connection

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.43 70048

Unable to bind parameter values for statement.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.44 70049

Database connection failed when starting copy

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.102.45 70050

Tried to cancel an inactive copy operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.46 70051

Database connection failed when canceling copy operation

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.102.47 70052

Missing expected error response to copy cancel request

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.48 70053

Got @1@ error responses to single copy cancel request

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.49 70054

Tried to end inactive copy

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.50 70055

Database connection failed when ending copy

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- If the COMMIT process is not executed after update, add the COMMIT process.
 - If the total number of update records in a single transaction is high, split it into short transactions.
 - If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - Confirm that the database server has not stopped.
 - If the database server is starting or stopping, re-execute the command after the database server starts.

2.102.51 70056

Tried to write to an inactive copy operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.52 70057

Database connection failed when writing to copy

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.102.53 70058

Tried to read from inactive copy

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.54 70059

Database connection failed when reading from copy

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.102.55 70060

Received CommandComplete "@1@" without an active copy operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.56 70061

Got CopyInResponse from server during an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.57 70062

Got CopyOutResponse from server during an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.58 70063

Got CopyData without an active copy operation

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.59 70064

Unexpected copydata from server for @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.60 70065

Unexpected packet type during copy: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.61 70066

Bind message length @1@ too long. This can be caused by very large or incorrect length specifications on InputStream parameters.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.62 70067

The server's client_encoding parameter was changed to @1@. The JDBC driver requires client_encoding to be UTF8 for correct operation.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.63 70068

The server's DateStyle parameter was changed to @1 @. The JDBC driver requires DateStyle to begin with ISO for correct operation.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.64 70069

The server's standard_conforming_strings parameter was reported as @1 @. The JDBC driver expected on or off.

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.102.65 70070

The driver currently does not support COPY operations.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.66 70071

This PooledConnection has already been closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.67 70072

Connection has been closed automatically because a new connection was opened for the same PooledConnection or the PooledConnection has been closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.68 70073

Connection has been closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.69 70074

Statement has been closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.70 70075

Failed to setup DataSource.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.102.71 70076

DataSource has been closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.72 70077

Fastpath call @1@ - No result was returned and we expected an integer.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.73 70078

The fastpath function @1@ is unknown.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.74 70079

Conversion to type @1@ failed: @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.75 70080

Cannot tell if path is open or closed: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.76 70081

GSS Authentication failed

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
- a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.102.77 70082

The array index is out of range: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.78 70083

The array index is out of range: @1@, number of elements: @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.79 70084

Truncation of large objects is only implemented in 8.3 and later servers.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.80 70085

Cannot truncate LOB to a negative length.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.81 70086

PostgreSQL LOBs can only index to: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.82 70087

LOB positioning offsets start at 1.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.83 70088

free() was called on this LOB previously

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.84 70089

Unsupported value for stringtype parameter: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.85 70091

No results were returned by the query.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.86 70092

A result was returned when none was expected.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.102.87 70093

Custom type maps are not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.88 70094

Failed to create object for: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.89 70095

Unable to load the class @1@ responsible for the datatype @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.90 70096

Cannot change transaction read-only property in the middle of a transaction.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.91 70097

Cannot commit when autoCommit is enabled.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.92 70098

This connection has been closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.102.93 70099

Cannot rollback when autoCommit is enabled.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103 Message Numbers Beginning with 70100

2.103.1 70100

Cannot change transaction isolation level in the middle of a transaction.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.2 70101

Transaction isolation level @1@ not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.3 70102

Unable to translate data into the desired encoding.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.4 70103

Unable to determine a value for MaxIndexKeys due to missing system catalog data.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.103.5 70104

Unable to find name datatype in the system catalogs.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.103.6 70105

Operation requires a scrollable ResultSet, but this ResultSet is FORWARD_ONLY.**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.7 70107

Can't use relative move methods while on the insert row.**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.8 70108

Invalid fetch direction constant: @1@.**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.9 70109

Cannot call cancelRowUpdates() when on the insert row.**[Description]**

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.10 70110

Cannot call deleteRow() when on the insert row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.11 70111

Currently positioned before the start of the ResultSet. You cannot call deleteRow() here.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.12 70112

Currently positioned after the end of the ResultSet. You cannot call deleteRow() here.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.13 70113

There are no rows in this ResultSet.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.14 70114

Not on the insert row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.15 70115

You must specify at least one column value to insert a row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.16 70116

The JVM claims not to support the encoding: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.17 70117

Provided InputStream failed.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.103.18 70118

Provided Reader failed.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.103.19 70119

Can't refresh the insert row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.20 70120

Cannot call updateRow() when on the insert row.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.21 70121

Cannot update the ResultSet because it is either before the start or after the end of the results.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.22 70122

ResultSets with concurrency CONCUR_READ_ONLY cannot be updated.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.23 70123

No primary key found for table @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.24 70124

Fetch size must be a value greater to or equal to 0.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.25 70125

Invalid character data was found. This is most likely caused by stored data containing characters that are invalid for the character set the database was created in. The most common example of this is storing 8bit data in a SQL_ASCII database.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.26 70126

Bad value for type @1@ : @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.27 70127

The column name @1@ was not found in this ResultSet.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.28 70128

ResultSet is not updateable. The query that generated this result set must select only one table, and must select all primary keys from that table. See the JDBC 2.1 API Specification, section 5.6 for more details.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.29 70129

This ResultSet is closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.30 70130

ResultSet not positioned properly, perhaps you need to call next.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.31 70131

Can't use query methods that take a query string on a PreparedStatement.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.32 70132

Multiple ResultSets were returned by the query.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.33 70133

A CallableStatement was executed with nothing returned.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.34 70134

A CallableStatement was executed with an invalid number of parameters

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.35 70135

A CallableStatement function was executed and the out parameter @1@ was of type @2@ however type @3@ was registered.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.36 70136

Maximum number of rows must be a value greater than or equal to 0.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.37 70137

Query timeout must be a value greater than or equals to 0.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.38 70138

The maximum field size must be a value greater than or equal to 0.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.39 70139

Unknown Types value.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.40 70140

Invalid stream length @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.41 70141

The JVM claims not to support the @1@ encoding.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.42 70142

Unknown type @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.43 70143

Cannot cast an instance of @1@ to type @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.44 70144

Unsupported Types value: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.45 70145

Can't infer the SQL type to use for an instance of @1@. Use setObject() with an explicit Types value to specify the type to use.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.46 70146

This statement does not declare an OUT parameter. Use '{' ?= call ... }' to declare one.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.47 70147

wasNull cannot be call before fetching a result.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.48 70148

Malformed function or procedure escape syntax at offset @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.49 70149

Parameter of type @1@ was registered, but call to get@2@ (sqltype=@3@) was made.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.50 70150

A CallableStatement was declared, but no call to registerOutParameter(1, <some type>) was made.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.51 70151

No function outputs were registered.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.52 70152

Results cannot be retrieved from a CallableStatement before it is executed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.53 70153

This statement has been closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.54 70154

Too many update results were returned.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.55 70155

Batch entry @1@ @2@ was aborted: @3@ Call getNextException to see other errors in the batch.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.56 70156

Unexpected error writing large object to database.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.103.57 70157

@1@ function takes one and only one argument.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.58 70158

@1@ function takes two and only two arguments.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.59 70159

@1 @ function takes four and only four argument.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.60 70160

@1 @ function takes two or three arguments.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.61 70161

@1 @ function doesn't take any argument.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.62 70162

@1 @ function takes three and only three arguments.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.63 70163

Interval @1@ not yet implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.64 70166

Unknown ResultSet holdability setting: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.65 70168

Cannot establish a savepoint in auto-commit mode.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.66 70169

Returning autogenerated keys is not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.67 70170

The parameter index is out of range: @1@, number of parameters: @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.68 70172

Returning autogenerated keys by column index is not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.69 70173

Cannot reference a savepoint after it has been released.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.70 70174

Cannot retrieve the id of a named savepoint.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.71 70175

Cannot retrieve the name of an unnamed savepoint.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.72 70176

Invalid UUID data.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.73 70177

Unable to find server array type for provided name @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.74 70178

Failed to set ClientInfo property: @1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.103.75 70179

ClientInfo property not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.76 70180

Unable to decode xml data.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.77 70181

Unknown XML Source class: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.78 70182

Unable to create SAXResult for SQLXML.

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.103.79 70183

Unable to create StAXResult for SQLXML

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.103.80 70184

Unknown XML Result class: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.81 70185

This SQLXML object has already been freed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.82 70186

This SQLXML object has not been initialized, so you cannot retrieve data from it.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.83 70187

Failed to convert binary xml data to encoding: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.84 70188

Unable to convert DOMResult SQLXML data to a string.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.85 70189

This SQLXML object has already been initialized, so you cannot manipulate it further.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.86 70191

Large Objects may not be used in auto-commit mode.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.87 70192

The SSLSocketFactory class provided @1@ could not be instantiated.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.88 70193

Conversion of interval failed

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.89 70194

Conversion of money failed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.90 70195

Transaction control methods setAutoCommit(true), commit, rollback and setSavePoint not allowed while an XA transaction is active.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.91 70196

Invalid flags

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.92 70197

xid must not be null

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.93 70198

Connection is busy with another transaction

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.103.94 70199

suspend/resume not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104 Message Numbers Beginning with 70200

2.104.1 70200

Transaction interleaving not implemented

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.2 70201

Error disabling autocommit

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.104.3 70202

tried to call end without corresponding start call

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.4 70203

Not implemented: Prepare must be issued using the same connection that started the transaction

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.5 70204

Prepare called before end

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.6 70206

Error preparing transaction

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.104.7 70207

Invalid flag

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.8 70208

Error during recover

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.104.9 70209

Error rolling back prepared transaction

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.104.10 70210

Not implemented: one-phase commit must be issued using the same connection that was used to start it

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.11 70211

commit called before end

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.12 70212

Error during one-phase commit

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.104.13 70213

Not implemented: 2nd phase commit must be issued using an idle connection

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.14 70214

Error committing prepared transaction

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.104.15 70215

Heuristic commit/rollback not supported

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.16 70221

Could not find a server with specified targetServerType: @1@

[Description]

Could not find a suitable target server.

[System Processing]

Processing is aborted.

[Action]

Check following settings (host, IP address, port number, or targetServer):

- Connection string
- Connection service file
- Data source of JDBC or ODBC
- Environment variables for default connection parameter values(ex. PGHOST)
- Arguments of functions of libpq
- Options of command

2.104.17 70222

Invalid timeout (@1@<0).

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.18 70225

Invalid targetServerType value: @1@

[Description]

value of targetserver is invalid.

[System Processing]

Processing is aborted.

[Action]

Set one of the following:

- primary
- standby
- prefer_standby
- any(can be specified only JDBC)

2.104.19 70226

The sslservercertcn @1@ could not be verified.

[Description]

value of sslservercertcn is different from common name in the server certificate.

[System Processing]

Processing is aborted.

[Action]

Set SSL certificate's common name to sslservercertcn.

2.104.20 70227

The sslservercertcn @1@ could not be verified by hostnameverifier @2@.

[Description]

value of sslservercertcn is different from common name in the server certificate.

[System Processing]

Processing is aborted.

[Action]

- Set SSL certificate's common name to sslservercertcn.

- Check the program of class specified by hostnameverifier.

2.104.21 70228

Properties for the driver contains a non-string value for the key

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.104.22 70229

(pgjdbc: autodetected server-encoding to be @1 @, if the message is not readable, please check database logs and/or host, port, dbname, user, password, pg_hba.conf)

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.104.23 70230

Object is too large to send over the protocol.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.24 70231

No IOException expected from StringBuffer or StringBuilder

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.25 70232

oid type @1@ not known and not a number

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.26 70233

The SocketFactory class provided @1@ could not be instantiated.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.27 70234

Added parameters index out of range: @1@, number of columns: @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.28 70235

Invalid sslmode value: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.29 70237

Unsupported property name: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.30 70238

Fastpath call @1@ - No result was returned and we expected a numeric.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.31 70239

Fastpath call @1@ - No result was returned or wrong size while expecting an integer.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.32 70240

Fastpath call @1@ - No result was returned and we expected a long.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.33 70241

Fastpath call @1@ - No result was returned or wrong size while expecting a long.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.34 70242

@1@ parameter value must be an integer but was: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.35 70243

The sslfactoryarg property may not be empty.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.36 70244

The environment variable containing the server's SSL certificate must not be empty.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.37 70245

The system property containing the server's SSL certificate must not be empty.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.38 70246

The sslfactoryarg property must start with the prefix file:, classpath:, env:, sys:, or -----BEGIN CERTIFICATE-----.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.39 70247

An error occurred reading the certificate

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.40 70248

No X509TrustManager found

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.41 70249

Could not find a java cryptographic algorithm: X.509 CertificateFactory not available.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.42 70250

Could not open SSL certificate file @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.43 70251

Loading the SSL certificate @1@ into a KeyManager failed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.44 70252

Could not read password for SSL key file, console is not available.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.45 70253

Could not read password for SSL key file by callbackhandler @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.46 70254

Could not decrypt SSL key file @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.47 70255

Could not read SSL key file @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.48 70256

Could not find a java cryptographic algorithm: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.49 70257

The password callback class provided @1@ could not be instantiated.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.50 70258

Could not open SSL root certificate file @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.51 70259

Could not read SSL root certificate file @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.52 70260

Loading the SSL root certificate @1@ into a TrustManager failed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.53 70261

Could not initialize SSL context.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.54 70262

SSL error: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.55 70263

The HostnameVerifier class provided @1@ could not be instantiated.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.56 70264

The hostname @1@ could not be verified by hostnameverifier @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.57 70266

One ore more ClientInfo failed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.58 70267

Can't use executeWithFlags(int) on a Statement.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.59 70268

Bad value for type timestamp/date/time: @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.60 70269

Unsupported binary encoding of @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.61 70270

Cannot convert the column of type @1@ to requested type @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.62 70271

No hstore extension installed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.63 70272

Unsupported properties: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.64 70293

SCRAM authentication is not supported by this driver. You need JDK >= 8 and pgjdbc >= 42.2.0 (not ".jre" versions).

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.65 70294

Finalizing a Connection that was never closed.

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.104.66 70295

Validating connection.

[Description]

The application or command terminated normally, but a warning was output.

[System Processing]

Processing will continue.

[Action]

Check the message text and confirm that the issue does not affect the expected outcome.

2.104.67 70296

Invalid elements @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.68 70297

Network timeout must be a value greater than or equal to 0.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.69 70298

Unable to set network timeout.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.104.70 70299

Unable to get network timeout.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105 Message Numbers Beginning with 70300

2.105.1 70300

No SCRAM mechanism(s) advertised by the server.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.2 70301

Invalid or unsupported by client SCRAM mechanisms

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.3 70302

Invalid server-first-message: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.4 70303

Invalid server-final-message: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.5 70304

SCRAM authentication failed, server returned error: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.6 70305

Invalid server SCRAM signature.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.7 70306

Enter SSL password:

[Description]

Terminated normally.

[System Processing]

Continues processing.

[Action]

No action required.

2.105.8 70307

Detail: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.9 70308

Hint: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.10 70309

Position: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.11 70310

Where: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.12 70311

Internal Query: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.13 70312

Location: File: @1@, Routine: @2@, Line: @3@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.14 70313

Server SQLState: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.15 70314

conversion to @1@ from @2@ not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.16 70315

Requested CopyDual but got @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.17 70316

CopyIn copy direction can't receive data

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.18 70317

An error occurred while trying to get the socket timeout.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.19 70318

An error occurred while trying to reset the socket timeout.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.20 70319

Got CopyBothResponse from server during an active @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.21 70320

Unable to parse the count in command completion tag: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.22 70321

Unexpected packet type during replication: @1@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.23 70322

This replication stream has been closed.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.24 70323

Cannot cast to boolean: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.25 70324

Unsupported type conversion to @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.26 70325

Error releasing savepoint

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.105.27 70327

Invalid Inet data.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.105.28 70328

Server does not support temporary replication slots

[Description]

(Nothing)

[System Processing]

(Nothing)

[Action]

(Nothing)

2.106 Message Numbers Beginning with 80000

2.106.1 80001

The connection configuration file cannot be opened. detail: '@1@'

[Description]

The process to open the connection configuration file failed.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Check the state of the connection configuration file, remove the cause of the error, and restart the application.

2.106.2 80002

Invalid definition statement format in connection configuration file. line number: @1@

[Description]

The format of a parameter definition statement in the connection configuration file is invalid.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Correct the connection configuration file and restart the application.

2.106.3 80003

The same server name is specified by two or more SERVER parameters in the connection configuration file.

[Description]

The same server name is specified in multiple SERVER parameters in the connection configuration file.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Correct the server name specified in the SERVER parameter of the connection configuration file, and restart the application.

2.106.4 80004

I/O error occurred during the reading of connection configuration file. file name: '@1@' detail: '@2@'

[Description]

An I/O error occurred during loading of the connection configuration file.

[System Processing]

Processing is aborted.

[Action]

This messages is output in the case of HA Database Ready.

Check the state of the connection configuration file, remove the cause of the error, and restart the application.

2.106.5 80005

CommandTimeout can't be less than zero.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.6 80006

The Connection is broken.

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.106.7 80007

The Connection is not open.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.8 80008

Parameter @1@ not found in query.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.9 80009

The Connection property can't be changed with an uncommitted transaction.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.10 80010

There is already an open DataReader associated with this Command which must be closed first.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.11 80011

@1@ does not exist in pg_proc

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.12 80012

Invalid parameter type: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.13 80013

Connection is not open

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.14 80014

Connection already open

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.15 80015

Invalid database name: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.16 80016

Connection string argument missing!

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.17 80017

Nested/Concurrent transactions aren't supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.18 80018

numeric value @1@ in ConnectionString exceeds maximum value @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.19 80019

numeric value @1@ in ConnectionString is below minimum value @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.20 80020

expecting @1@=[True/False] value in ConnectionString

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.21 80021

expecting @1 @=[Numeric] value in ConnectionString

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.22 80022

expecting @1 @=[Protocol Version] value in ConnectionString

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.23 80023

key=value argument incorrect in ConnectionString

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.24 80024

Attempt to set compatibility with version @1@ when using version @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.25 80025

There is already an open DataReader associated with this Command which must be closed first.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.26 80026

ApplicationName not supported.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.27 80027

Timeout while getting a connection from pool.

[Description]

Timeout occurred during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.106.28 80028

Connection pool exceeds maximum size.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.29 80029

Not a COPY IN query: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.30 80030

Copy can only start in Ready state, not in @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.31 80031

Tried to set Position of network stream @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.32 80032

Tried to read non-readable @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.33 80033

Tried to seek non-seekable @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.34 80034

Tried to set length of network stream @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.35 80035

Not a COPY OUT query, not in @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.36 80036

Copy can only start in Ready state, not in @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.37 80037

Tried to set Position of network stream @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.38 80038

Tried to write non-writable @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.39 80039

Tried to flush read-only @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.40 80040

Tried to seek non-seekable @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.41 80041

Tried to set length of network stream @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.42 80042

Do not change stream of an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.43 80043

Do not change delimiter of an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.44 80044

Do not change separator of an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.45 80045

Do not change escape symbol of an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.46 80046

Do not change null symbol of an active @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.47 80047

Tried to add too many fields to a copy record with @1@ fields

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.48 80048

Invalid attempt to read when no data is present.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.49 80049

Column index out of range

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.50 80050

could not find a suitable target server

[Description]

Could not find a suitable target server.

[System Processing]

Processing is aborted.

[Action]

Check following settings (host, IP address, port number, or targetServer):

- Connection string
- Connection service file
- Data source of JDBC or ODBC
- Environment variables for default connection parameter values(ex. PGHOST)
- Arguments of functions of libpq
- Options of command

2.106.51 80051

server does not support auto connection switching

[Description]

The server does not support auto connection switching.

[System Processing]

Processing is aborted.

[Action]

Specify servers that support auto connection switching.

2.106.52 80052

Only AuthenticationClearTextPassword and AuthenticationMD5Password supported for now. Received: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.53 80053

A timeout has occurred. If you were establishing a connection, increase Timeout value in ConnectionString. If you were executing a command, increase the CommandTimeout value in ConnectionString or in your NpgsqlCommand object.

[Description]

Timeout occurred during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.106.54 80054

Connection establishment timeout. Increase Timeout value in ConnectionString.

[Description]

Timeout occurred during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Check the following:

- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.106.55 80055

Failed to establish a connection to '@1@'.

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:

- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:

- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

- a) If the COMMIT process is not executed after update, add the COMMIT process.
 - b) If the total number of update records in a single transaction is high, split it into short transactions.
 - c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
 - a) Confirm that the database server has not stopped.
 - b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.106.56 80056

Ssl connection requested. No Ssl enabled connection from this host is configured.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.57 80057

Backend sent unrecognized response type: @1@

[Description]

An error occurred during communication between the application and the database server.

[System Processing]

Processing will be aborted.

[Action]

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.106.58 80058

Store does not support specified edm type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.59 80059

Can't cast @1 @ into any valid DbType.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.60 80060

Cannot set NpgsqlDbType to just Array, Binary-Or with the element type (e.g. Array of Box is NpgsqlDbType.Array | NpgsqlDbType.Box).

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.61 80061

Can't cast @1 @ into NpgsqlParameter

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.62 80062

Invalid attempt to read from column ordinal '@1@'. With CommandBehavior.SequentialAccess, you may only read from column ordinal '@2@' or greater.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.63 80063

this[] index value

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.106.64 80064

Field not found

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.65 80065

No transaction in progress.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.66 80066

Savepoint is not supported by backend.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.67 80067

Savepoint name cannot have semicolon.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.68 80068

The collection is read-only

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.69 80069

NotSupported @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.70 80070

Require primitive EdmType

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.71 80071

NotSupported: @1@ @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.72 80072

The authData parameter can only be null at the first call to continue!

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.73 80073

SSPI returned invalid number of output buffers

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.74 80074

Dns hostname lookup timeout. Increase Timeout value in ConnectionString.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.75 80075

Could not load Npgsql.EntityFrameworkCoreLegacy assembly, is it installed?

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.76 80076

Npgsql.EntityFrameworkCoreLegacy assembly does not seem to contain the correct type!

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.77 80077

Invalid parameter name: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.78 80078

Parameter not found

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.79 80079

The parameter already belongs to a collection

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.80 80080

No parameter with the specified name exists in the collection

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.81 80081

Only AuthenticationClearTextPassword and AuthenticationMD5Password supported for now. Received: @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.82 80082

key=value argument incorrect in ConnectionString

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.83 80083

expecting @1@=[True/False] value in ConnectionString

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.84 80084

expecting @1 @=[Numeric] value in ConnectionString

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.85 80085

numeric value @1 @ in ConnectionString exceeds maximum value @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.86 80086

numeric value @1 @ in ConnectionString is below minimum value @2@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.87 80087

expecting @1 @=[Protocol Version] value in ConnectionString

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.88 80088

The Transaction property can't be changed with an uncommitted transaction.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.89 80089

Only Text and StoredProcedure types supported!

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.90 80090

There have been errors reported by the backend.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.91 80091

There have been errors on @1@():

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.92 80092

There have been errors on @1 @(@2@):

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.93 80093

The Connection is not set.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.94 80094

Multiple queries not supported for this command type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.95 80095

Cannot derive function parameter of type VARIADIC

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.96 80096

Cannot derive function parameter of type TABLE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.97 80097

ConnectionString cannot be empty.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.98 80098

A SocketException occurred

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.106.99 80099

There have been errors on Open()

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107 Message Numbers Beginning with 80100

2.107.1 80100

Error in Close()

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.2 80101

Insufficient backend data to describe dimension count in binary array header

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.3 80102

Invalid array dimension count encountered in binary array header

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.4 80103

Insufficient backend data to describe all expected dimensions in binary array header

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.5 80104

Out of backend data while reading binary array

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.6 80105

Expected a hex character, got

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.7 80106

Expected a hex character, got @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.8 80107

Expected an octal character, got @1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.9 80108

Object is immutable

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.10 80109

Unexpected integer binary field length

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.11 80110

Unexpected float binary field length

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.12 80111

Unable to cast data to NpgsqlPoint type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.13 80112

Unable to cast data to Rectangle type

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.14 80113

Type already mapped

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.15 80114

NpgsqlDbType already aliased

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.16 80115

DbType already aliased

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.107.17 80116

Type already aliased

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

Chapter 3 Mirroring Controller Messages

This chapter explains messages output by Mirroring Controller.

3.1 Message Numbers Beginning with MCA00000

3.1.1 MCA00001

could not read file "{0}": exception={1}: {2}

[Description]

Could not read the file.

[Parameters]

{0}: file name

{1}: exception type

{2}: exception detail

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the message, and then remove it.

3.1.2 MCA00002

{0}: wrong number of server ID in definition file "{1}"

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.1.3 MCA00003

{0}: server ID not found in definition file "{1}" line {2}

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.1.4 MCA00004

{0}: server ID specified in definition file "{1}" too long (max {2} bytes) line {3}

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: max length of server ID

{3}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.1.5 MCA00005

invalid host name or IP address "{1}" in definition file "{0}"

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: file name

{1}: host name or IP address

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.1.6 MCA00006

{0}: invalid port number in definition file "{1}" line {2}

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.1.7 MCA00007

{0}: invalid format specified in definition file "{1}" line {2}

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.1.8 MCA00008

{0}: invalid value for parameter "{2}" in definition file "{1}"

[Description]

Invalid parameter was found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.1.9 MCA00009

{0}: no value for parameter "{2}" specified in definition file "{1}"

[Description]

Invalid parameter was found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.1.10 MCA00010

{0}: unrecognized parameter "{2}" in definition file "{1}"

[Description]

Unrecognized parameter was found in definition file.

[Parameters]

{0}: file name

{1}: command name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.1.11 MCA00011

%s: no operation mode specified

[Description]

No operation mode was specified.

[Parameters]

%s: command name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying operation modes.

3.1.12 MCA00012

%s: unrecognized operation mode "%s"

[Description]

Unrecognized operation mode was specified.

[Parameters]

%s: command name

%s: operation mode

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying operation modes.

3.1.13 MCA00013

%s: option "%s" duplicated

[Description]

Certain option is duplicated.

[Parameters]

%s: command

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.1.14 MCA00014

%s: "%s" option conflicts with "%s" option

[Description]

Options are conflicting.

[Parameters]

%s: command

%s: option

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.1.15 MCA00015

%s: option requires an argument -- %s

[Description]

No argument specified for the option.

[Parameters]

%s: command

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.1.16 MCA00016

%s: neither "%s" option nor environment variable "%s" specified

[Description]

Both of required option and equivalent environment variable were not specified.

[Parameters]

%s: command

%s: option

%s: environment variable

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying required option or equivalent environment variable.

3.1.17 MCA00017

%s: out of memory

[Description]

Out of memory error occurred.

[Parameters]

%s: command

[System Processing]

Processing will be aborted.

[Action]

Obtain free memory space by stopping unnecessary processes or changing system settings.

3.1.18 MCA00018

out of memory

[Description]

Out of memory error occurred.

[System Processing]

Processing will be aborted.

[Action]

Obtain free memory space by stopping unnecessary processes or changing system settings.

3.1.19 MCA00019

detected an error on the monitored object "{0}({1)": {2}

[Description]

An error was detected on the monitored object.

[Parameters]

{0}: monitored object (server, database process, data storage destination directory, transaction log storage destination directory, tablespace directory)

{1}: object name (host name, database process name, directory path)

{2}: error detail ("no response:", "read/write error:" and detailed information)

[System Processing]

Perform failover or detaching.

If failover or detaching is already performed, these functions would be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide (Database Multiplexing)".

3.1.20 MCA00020

unexpected error occurred in the monitoring process: {0}

[Description]

Monitoring process cannot continue because an unexpected error was occurred during its processing.

[Parameters]

{0}: error detail

[System Processing]

Continues processing.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide (Database Multiplexing)".

3.1.21 MCA00021

starting to {2} from {0} to {1}.

[Description]

Switching standby server to primary server.

[Parameters]

{0}: server ID of primary server

{1}: server ID of standby server

{2}: "fail over" or "switch over"

[Action]

If Mirroring Controller executed switching automatically, find the message output before this message from system log or event log to identify the cause of switching, and then work around according to the Action of the message.

3.1.22 MCA00022

{2} completed.switched from {0} to {1}

[Description]

Switching standby server to primary server was completed.

[Parameters]

{0}: server ID of primary server

{1}: server ID of standby server

{2}: "fail over"or"switch over"

3.1.23 MCA00023

failed to {2} from {0} to {1}

[Description]

Failed to switch to primary server because of unexpected failure.

[Parameters]

{0}: server ID of primary server

{1}: server ID of standby server

{2}: "fail over"or"switch over"

[System Processing]

Processing of switching will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message.

3.1.24 MCA00024

starting to detach standby server "{0}" {1}

[Description]

Detaching standby server because of failure detected on standby server.

[Parameters]

{0}: server ID

{1}: "automatically" or none

[Action]

If Mirroring Controller executed detaching automatically, find the message output before this message from system log or event log to identify the cause of detaching, and then work around according to the Action of the message.

3.1.25 MCA00025

detach standby server "{0}" completed {1}

[Description]

Detached standby server.

[Parameters]

{0}: server ID

{1}: "automatically" or none

3.1.26 MCA00026

failed to {2} standby server "{0}" {1}

[Description]

Failed to detach standby server.

[Parameters]

{0}: server ID

{1}: "automatically" or none

{2}: "detach"

[System Processing]

Processing of detaching will be aborted.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide (Database Multiplexing)".

3.1.27 MCA00027

another "{0}" command is running

[Description]

Cannot execute command with this operation mode because another command is running on the same or another server.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

There is a case executing another command. Wait for completion of another command on the same or another server, and then re-execute.

In addition, there are the following cases when using mc_ctl command.

There is a case under processing of a failover and an automatic detach by Mirroring Controller. Wait for completion of the processing under operation, and re-execute.

If any of the following cases occurs, there is a possibility that the processing of Mirroring Controller interrupts. Re-execute the mc_ctl command after restarting Mirroring Controller.

- When abnormality occurs in the network
- When another server is downed
- When Mirroring Controller is stopped forcibly

3.1.28 MCA00028

communication timeout of Mirroring Controller occurred server:"{0}"

[Description]

Either of the followings has occurred.

- communication timeout between mc_ctl command and Mirroring Controller process has occurred.
- communication timeout between Mirroring Controller processes have occurred.
- Terminating database instance was not completed in the specified time.

[Parameters]

{0}: server ("localhost" or server ID)

[System Processing]

Processing will be aborted.

[Action]

Completion synchronization for terminating database instance might have timed out, because connections remained. Disconnect all connections, and re-execute it.

Reduce CPU or network load caused by the other processes. If could not reduce it, extend remote_call_timeout in "server identifier".conf.

3.1.29 MCA00029

could not create PID file "{0}" of Mirroring Controller detail of cause:"{1}"

[Description]

Could not create PID file of Mirroring Controller.

[Parameters]

{0}: file name

{1}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the message, and then remove it.

3.1.30 MCA00030

could not remove PID file "%s" of Mirroring Controller detail of cause:"%s"

[Description]

Could not remove PID file of Mirroring Controller.

[Parameters]

%s: file name

%s: detail of cause

[Action]

Identify the cause according to the message, and then remove it.

3.1.31 MCA00031

could not read PID file "%s" of Mirroring Controller detail of cause:"%s"

[Description]

Could not read PID file of Mirroring Controller.

[Parameters]

%s: file name

%s: detail of cause

[Action]

Identify the cause according to the message, and then remove it.

3.1.32 MCA00032

invalid contents of PID file "%s" of Mirroring Controller

[Description]

The contents of PID file of Mirroring Controller is invalid.

[Parameters]

%s: file name

[System Processing]

Processing will be aborted.

[Action]

The following causes could be considered.

- The file was stored or replaced by mistake
- The file was corrupted

When starting Mirroring Controller, move or remove the file shown in the message.

When stopping Mirroring Controller, terminate forcibly mc_keeper process and terminate forcibly mc_agent process with using OS command.

3.1.33 MCA00033

Mirroring Controller is already running

[Description]

Mirroring Controller is already running.

[System Processing]

Processing will be aborted.

[Action]

If needed, stop Mirroring Controller, and re-execute.

3.1.34 MCA00034

cannot execute %s command because Mirroring Controller is not running

[Description]

Cannot execute Mirroring Controller command because Mirroring Controller process is not running.

[Parameters]

%s: command name

[System Processing]

Processing will be aborted.

[Action]

Start Mirroring Controller, and re-execute.

3.1.35 MCA00035

failed to start database instance

[Description]

Failed to start database instance.

[System Processing]

Processing will be aborted.

[Action]

Find the database message output in the log files of database output before this message, and then work around according to the Action of the message.

3.1.36 MCA00036

failed to stop database instance target server:"{0}"

[Description]

Failed to stop database instance.

[Parameters]

{0}: target server ("localhost" or server ID)

[System Processing]

Processing will be aborted.

[Action]

Find the database message output in the log files of database on the target server output before this message, and then work around according to the Action of the message.

3.1.37 MCA00037

Mirroring Controller option is not installed

[Description]

This functionality is enabled by installing Mirroring Controller option.

[System Processing]

Processing will be aborted.

[Action]

To use this functionality, install Mirroring Controller option, and then re-execute.

3.1.38 MCA00038

starting Mirroring Controller

[Description]

Starting Mirroring Controller.

3.1.39 MCA00039

Mirroring Controller started

[Description]

Mirroring Controller started.

3.1.40 MCA00040

failed to start Mirroring Controller

[Description]

Failed to start Mirroring Controller.

[System Processing]

Processing will be aborted.

[Action]

Work around according to the Action of the message output before this message.

On Windows, if there is no message outputted before this message, please refer to the message outputted to an event log.

3.1.41 MCA00041

stopping Mirroring Controller

[Description]

Stopping Mirroring Controller.

3.1.42 MCA00042

Mirroring Controller stopped target server:"{0}"

[Description]

Mirroring Controller stopped.

[Parameters]

{0}: target server ("localhost" or server ID)

3.1.43 MCA00043

failed to stop Mirroring Controller target server:"{0}"

[Description]

Failed to stop Mirroring Controller.

[Parameters]

{0}: target server ("localhost" or server ID)

[System Processing]

Processing will be aborted.

[Action]

Identify the cause from system log or event log on the target server, and work around.

3.1.44 MCA00044

stopping Mirroring Controller forcibly

[Description]

Stopping Mirroring Controller forcibly.

3.1.45 MCA00045

stopped Mirroring Controller forcibly

[Description]

Mirroring Controller stopped forcibly.

3.1.46 MCA00046

enabled failover target server:"{0}"

[Description]

Enabled failover and automatic detach.

[Parameters]

{0}: target server ("localhost" or server ID)

3.1.47 MCA00047

failed to enable failover target server:"{0}"

[Description]

Failed to enable failover and automatic detach.

[Parameters]

{0}: target server ("localhost" or server ID)

[System Processing]

Processing will be aborted.

[Action]

Identify the cause from messages on system log or event log, and work around.

3.1.48 MCA00048

disabled failover target server:"{0}"

[Description]

Disabled failover and automatic detach.

[Parameters]

{0}: target server ("localhost" or server ID)

3.1.49 MCA00049

failed to disable failover target server:"{0}"

[Description]

Failed to disable failover and automatic detach.

[Parameters]

{0}: target server ("localhost" or server ID)

[System Processing]

Processing will be aborted.

[Action]

Identify the cause from messages on system log or event log, and work around.

3.1.50 MCA00050

{0}: server ID "{2}" specified with option "{1}" does not exist in definition file "{3}"

[Description]

server ID specified with the option does not exist in definition file.

[Parameters]

{0}: command name

{1}: option

{2}: server ID

{3}: file name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options or definition file.

3.1.51 MCA00051

{0}: The IP address or host name of the server where the command was executed in is not found on the definition file "{1}"

[Description]

Either of the followings has occurred.

- The IP address or host name that does not exist is specified.
- The network interface is stopped.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter descriptions of "Cluster Operation Guide (Database Multiplexing)".

3.1.52 MCA00052

{0}: wrong server ID "{2}" in definition file "{1}"

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: server ID

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter descriptions of "Cluster Operation Guide (Database Multiplexing)".

3.1.53 MCA00053

failed to detach standby server

[Description]

Failed to detach standby server

because processing of detaching cannot be continued by something failure.

[System Processing]

Processing of detaching will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message.

3.1.54 MCA00054

could not write to file "{0}": exception={1}: {2}

[Description]

Failed to detach or synchronize standby server because could not write to the file.

[Parameters]

{0}: file name

{1}: exception type

{2}: exception detail

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes, and detach or synchronize standby server according to "Actions when an Error Occurs" of "Cluster Operation Guide (Database Multiplexing)".

3.1.55 MCA00055

unexpected error occurred in the monitoring process: {0}

[Description]

Monitoring process could not continue because the unexpected error occurred.

[Parameters]

{0}: detail of cause

[System Processing]

Continues monitoring.

[Action]

Check the error detail and eliminate causes.

If you cannot clear the problem, contact Fujitsu technical support.

3.1.56 MCA00056

unexpected error occurred: {0}

[Description]

An unexpected error occurred.

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate cause.

If you cannot clear the problem, contact Fujitsu technical support.

3.1.57 MCA00057

failed to stop Mirroring Controller forcibly

[Description]

Failed to stop Mirroring Controller forcibly.

[System Processing]

Processing will be aborted.

[Action]

Check [Action] of the message output before this message, and re-execute.

If re-execution fails, terminate forcibly mc_keeper process and terminate forcibly mc_agent process with using OS command.

3.1.58 MCA00058

could not access path "%s" specified as a directory for Mirroring Controller detail of cause: "%s"

[Description]

could not access path specified as a directory for Mirroring Controller.

[Parameters]

%s: path name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.1.59 MCA00059

system call error occurred: "%s" detail of cause: "%s"

[Description]

System call error occurred.

[Parameters]

%s: system call name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.1.60 MCA00060

could not get installation path

[Description]

Enterprise Postgres may not be installed.

[System Processing]

Processing will be aborted.

[Action]

Re-install Enterprise Postgres.

3.1.61 MCA00061

could not access path "%1\$s" for parameter "%2\$s" in definition file "%3\$s" detail of cause:"%4\$s"

[Description]

could not access path for parameter in definition file.

[Parameters]

%3\$s: file name

%2\$s: parameter name

%1\$s: path name

%4\$s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.1.62 MCA00062

promotion processing completed

[Description]

Promotion processing completed.

3.1.63 MCA00063

promotion processing failed

[Description]

Promotion processing failed.

[System Processing]

Processing will be aborted.

[Action]

Clear the problem according to [Action] of the message which was output before this message in system log or in database server log.

3.1.64 MCA00064

stopped database instance forcibly

[Description]

Database instance stopped forcibly.

3.1.65 MCA00065

failed to stop database instance forcibly

[Description]

Failed to stop database instance forcibly.

[System Processing]

Processing will be aborted.

[Action]

Clear the problem according to [Action] of the message which was output before this message in system log or in database server log.

3.1.66 MCA00067

did not switch during a degeneration use

[Description]

Did not switch during a degeneration use.

[System Processing]

Processing will be aborted.

[Action]

If Mirroring Controller executed switching automatically, find the message output before this message from system log or event log to identify the cause of degeneration, and then eliminate causes according to [Action] of the message and try to switch with command.

3.1.67 MCA00068

{0}: users other than an instance administrator have the access privileges for definition file "{1}"

[Description]

users other than an instance administrator have the access privileges for definition file.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Revoke all the access privileges for users other than an instance administrator.

MCA00069

could not execute because Mirroring Controller of the server "{0}" is not running

[Description]

Could not execute because Mirroring Controller is not running.

[Parameters]

{0}: server ID

[System Processing]

Processing will be aborted.

[Action]

Start Mirroring Controller, and try to switch with command.

3.1.68 MCA00070

Try "%s --help" for more information.\n

[Description]

--help option can show more additional information.

[Parameters]

%s: command name

[System Processing]

None.

[Action]

Check the message output before this message, and refer to descriptions shown by '--help' option.

3.1.69 MCA00071

starting to {0}

[Description]

Switching standby server to primary server.

[Parameters]

{0}: "switch over"

3.1.70 MCA00072

failed to {0}

[Description]

Failed to switch to primary server because of an unexpected failure.

[Parameters]

{0}: "switch over"

[System Processing]

Processing of switching will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then eliminate causes according to [Action] of the message.

3.1.71 MCA00073

error detected in handling of the database instance detail of cause:"{0}"

[Description]

Error detected in handling of the database instance for the following purposes.

- Obtain the port number of database instance
- Access to the data storage destination directory

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.1.72 MCA00074

could not read PID file "{0}" of Mirroring Controller detail of cause:"{1}"

[Description]

Could not read PID file of Mirroring Controller.

[Parameters]

{0}: file name

{1}: detail of cause

[Action]

Identify the cause according to the message, and then remove it.

3.1.73 MCA00075

invalid contents of PID file "{0}" of Mirroring Controller

[Description]

The contents of PID file of Mirroring Controller is invalid.

[Parameters]

{0}: file name

[System Processing]

Processing will be aborted.

[Action]

The following causes could be considered.

- The file was stored or replaced by mistake
- The file was corrupted

When starting Mirroring Controller, move or remove the file shown in the message.

When stopping Mirroring Controller, terminate forcibly mc_keeper process and terminate forcibly mc_agent process with using OS command.

3.1.74 MCA00076

cannot execute "{0}" command because Mirroring Controller is not running

[Description]

Cannot execute Mirroring Controller command because Mirroring Controller process is not running.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Start Mirroring Controller, and re-execute.

3.1.75 MCA00077

%s: argument of option "%s" is too long

[Description]

Argument of option is too long.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.1.76 MCA00078

%s: invalid option -- %s

[Description]

Invalid option.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.1.77 MCA00079

%s: unnecessary operand "%s"

[Description]

Unnecessary operand.

[Parameters]

%s: command name

%s: operand

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting operand.

3.1.78 MCA00080

%s: unrecognized operation mode or no operation mode specified

[Description]

Unrecognized operation mode or no operation mode specified.

[Parameters]

%s: command name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting or specifying operation mode.

3.1.79 MCA00081

start to enable the parameter "{1}" required to build in the standby server "{0}"

[Description]

Start to enable the parameter required to build in the standby server.

[Parameters]

{0}: server ID

{1}: parameter name

3.1.80 MCA00082

enabling the parameter "{1}" required to build in the standby server "{0}" completed

[Description]

Enabling the parameter required to build in the standby server completed.

[Parameters]

{0}: server ID

{1}: parameter name

3.1.81 MCA00083

failed to enable the parameter "{1}" required to build in the standby server "{0}"

[Description]

Failed to enable the parameter required to build in the standby server.

The following causes could be considered.

- another command is running
- can not access definition file
- parameter does not exist

[Parameters]

{0}: server ID

{1}: parameter name

[System Processing]

Processing will be aborted.

[Action]

- If the parameter is not set

On the primary server, set the parameter of postgresql.conf file according to "parameter" description of "Cluster Operation Guide (Database Multiplexing)" and execute pg_ctl command with reload mode.

- Otherwise

Find the message output before this message from display, system log or event log, and then eliminate causes according to [Action] of the message. Then, on the primary server, set the parameter of postgresql.conf file according to "parameter" description of "Cluster Operation Guide (Database Multiplexing)" and execute pg_ctl command with reload mode.

3.1.82 MCA00084

primary server is already running

[Description]

Primary server is already running.

[System Processing]

Processing will be aborted.

[Action]

The standby server might be running without creating standby.signal. Create standby.signal, and re-execute.

3.1.83 MCA00085

cannot start Mirroring Controller because database instance is not running

[Description]

Cannot start Mirroring Controller because database instance is not running.

[System Processing]

Processing will be aborted.

[Action]

Start database instance, and re-execute.

3.1.84 MCA00086

could not get state of database instance detail of cause:"{0}"

[Description]

Could not get state of database instance.

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.1.85 MCA00087

unusable character is included in path "%s" specified as a directory for Mirroring Controller

[Description]

Unusable character is included in path specified as a directory for Mirroring Controller.

[Parameters]

%s: path name

[System Processing]

Processing will be aborted.

[Action]

Correct the path specified as a directory for Mirroring Controller according to the message and mc_ctl command descriptions of "Reference".

3.1.86 MCA00088

%1\$s: unusable character is included in server ID "%3\$s" specified with option "%2\$s"

[Description]

Unusable character is included in server ID specified with option.

[Parameters]

%1\$s: command name

%2\$s: option

%3\$s: server ID

[System Processing]

Processing will be aborted.

[Action]

Correct the server ID specified with option according to the message and mc_ctl command descriptions of "Reference".

3.1.87 MCA00089

only instance administrator can execute this command

[Description]

Only instance administrator who created the directory for Mirroring Controller can execute this command.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command by the instance administrator who created the directory for Mirroring Controller.

3.1.88 MCA00090

could not read file "{0}": Permission denied

[Description]

No read permissions for the file.

[Parameters]

{0}: file name

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command, after granting the read permissions to the file.

3.1.89 MCA00091

host name or IP address "{1}" of the primary server and the standby server in definition file "{0}" are same, but the --local-server option was not specified

[Description]

Host name or IP address of the primary server and the standby server in definition file are same, but the --local-server option was not specified.

[Parameters]

{0}: file name

{1}: host name or IP address

[System Processing]

Processing will be aborted.

[Action]

If the primary server and the standby server are built in the same server, execute the mc_ctl command with the --local-server option.

If the primary server and the standby server are built in the different server, correct host name or IP address in the definition file.

3.1.90 MCA00092

this feature is not available in this edition

[Description]

This feature is not available in this edition.

[System Processing]

Processing will be aborted

[Action]

Please install the right edition for this feature.

3.1.91 MCA00093

installation environment is destroyed

[Description]

Enterprise Postgres may not be installed correctly or may be destroyed.

[System Processing]

Processing will be aborted.

[Action]

Re-install Enterprise Postgres.

3.1.92 MCA00094

%s: invalid argument for option %s

[Description]

Invalid argument for option.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.1.93 MCA00095

could not remove file or directory "{0}"

[Description]

Could not remove the file or the directory.

[Parameters]

{0}: file name or directory name

[System Processing]

Processing will be aborted.

[Action]

Check the status of the file or the directory and eliminate causes, and then remove it.

3.1.94 MCA00096

could not write file "{0}": exception={1}: {2}

[Description]

Could not write the file.

[Parameters]

{0}: file name

{1}: exception type

{2}: exception detail

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the message, and then remove it.

3.1.95 MCA00097

setup of standby server completed

[Description]

Setup of standby server completed.

3.1.96 MCA00098

setup of standby server failed

[Description]

Setup of standby server failed.

[System Processing]

Processing will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then eliminate causes according to [Action] of the message.

3.1.97 MCA00099

{0}: server "{1}" is running as a standby server

[Description]

Could not continue processing because database instance to be duplicated is not running as a primary server.

[Parameters]

{0}: command name

{1}: server ID

[System Processing]

Processing will be aborted.

[Action]

Re-execute this command on the standby server to be set up.

3.2 Message Numbers Beginning with MCA00100

3.2.1 MCA00100

cannot execute {0} command because Mirroring Controller is running

[Description]

Cannot execute this command because Mirroring Controller is running on the server to be set up.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Execute this command on server where primary server is not running. If execute it on the right server, stop Mirroring Controller and then re-execute it.

3.2.2 MCA00101

cannot execute {0} command because database instance is running

[Description]

Cannot execute this command because database instance is running on the server to be set up.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Execute this command on server where primary server is not running. If execute it on the right server, stop database instance and then re-execute it.

3.2.3 MCA00102

{0}: invalid argument value {2} for option {1}

[Description]

Invalid argument for option.

[Parameters]

{0}: command name

{1}: option

{2}: argument value

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting argument value for the option.

3.2.4 MCA00103

could not move file or directory from {0} to {1}

[Description]

Could not move the file or the directory.

[Parameters]

{0}: source file or directory

{1}: target file or directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the file or the directory and eliminate causes, and then remove it.

3.2.5 MCA00104

could not create directory {0}

[Description]

Could not create the directory.

[Parameters]

{0}: target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

3.2.6 MCA00105

could not read the access privileges of {0}

[Description]

Could not read the access privileges.

[Parameters]

{0}: target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

3.2.7 MCA00106

failed to set the access privileges of {0}

[Description]

Failed to set the access privileges.

[Parameters]

{0}: target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

3.2.8 MCA00107

service "{0}" is not registered

[Description]

Service is not registered.

[Parameters]

{0}: Service name

[System Processing]

Processing will be aborted.

[Action]

Register service, and re-execute.

3.2.9 MCA00108

could not start service "{0}" detail of cause: "{1}"

[Description]

Could not start service.

[Parameters]

{0}: Service name

{1}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.2.10 MCA00109

could not start service "%s" detail of cause: "%s"

[Description]

Could not start service.

[Parameters]

%s: Service name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.2.11 MCA00110

service "%s" is not registered

[Description]

Service is not registered.

[Parameters]

%s: Service name

[System Processing]

Processing will be aborted.

[Action]

Register service, and re-execute.

3.2.12 MCA00111

Mirroring Controller service "%s" has been registered

[Description]

Mirroring Controller service has been registered with Windows Service.

[Parameters]

%s: Service name

3.2.13 MCA00112

Mirroring Controller service "%s" has been unregistered

[Description]

Mirroring Controller service has been unregistered from Windows Service.

[Parameters]

%s: Service name

3.2.14 MCA00113

service name "%s" is already in use

[Description]

Service name is already in use.

[Parameters]

%s: Service name

[System Processing]

Processing will be aborted.

[Action]

Check the service name, and re-execute.

3.2.15 MCA00114

could not register service "%s" detail of cause: "%s"

[Description]

An error occurred during registration of service.

[Parameters]

%s: Service name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.2.16 MCA00115

could not unregister service "%s" detail of cause: "%s"

[Description]

An error occurred during deregistration of service.

[Parameters]

%s: Service name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.2.17 MCA00116

%s: option "%s" is required

[Description]

A required option is not specified.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Specify the required option, and re-execute.

3.2.18 MCA00117

no authority to execute this command

[Description]

Only the administrative user can run this command.

[System Processing]

Processing will be aborted.

[Action]

Invoke the administrator's prompt, and re-execute this command.

3.2.19 MCA00119

could not receive respons from {0} server({1})

[Description]

An error was detected on the server.

[Parameters]

{0}: monitored object (server)

{1}: server type (primary, candidate primary, standby)

[System Processing]

Perform failover or detaching.

If failover or detaching is already performed, these functions would be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide (Database Multiplexing)".

3.2.20 MCA00120

detected streaming replication error in {0} server({1})

[Description]

A streaming replication error was detected.

[Parameters]

{0}: monitored object (database process)

{1}: server type (primary, candidate primary, standby)

[System Processing]

Perform failover or detaching.

If failover or detaching is already performed, these functions would be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide (Database Multiplexing)".

3.2.21 MCA00121

disk drives are available

[Description]

Database where data storage, transaction log storage and tablespaces are saved is working correctly.

3.2.22 MCA00122

a {0} server({1}) is running normally

[Description]

A server is running normally.

[Parameters]

{0}: server type (primary, candidate primary, standby)

{1}: monitored object (server)

3.2.23 MCA00123

Streaming Replication has started

[Description]

Streaming Replication has started

3.2.24 MCA00124

postmaster is running in {0} server({1})

[Description]

postmaster is running

[Parameters]

{0}: server type (primary, candidate primary, standby)

{1}: monitored object (server)

3.2.25 MCA00125

failed to get the standby server information

[Description]

Failed to get the standby server information

[System Processing]

Perform failover or detaching.

If failover or detaching is already performed, these functions would be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide (Database Multiplexing)".

3.2.26 MCA00126

{0} server({1}) was downed

[Description]

database server was downed

[Parameters]

{0}: server type (primary, candidate primary, standby)

{1}: monitored object (server)

[System Processing]

Perform failover or detaching.

If failover or detaching is already performed, these functions would be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide (Database Multiplexing)".

3.2.27 MCA00127

You can promote the standby server

[Description]

You can promote the standby server

3.2.28 MCA00128

You cannot promote the standby server

[Description]

You cannot promote the standby server

3.2.29 MCA00129

detected a disk I/O error in {0} server({1})

[Description]

A disk I/O error was detected.

[Parameters]

{0}: server type (primary, candidate primary, standby)

{1}: monitored object (server)

[System Processing]

Perform failover or detaching.

If failover or detaching is already performed, these functions would be disabled.

[Action]

Refer to the description about workaround for failure of "Cluster Operation Guide (Database Multiplexing)".

3.2.30 MCA00130

starting to switch over forcibly

[Description]

Starting to switch over forcibly.

3.2.31 MCA00131

succeeded in switching over to {0} forcibly

[Description]

Switching standby server to primary server succeeded.

[Parameters]

{0}: server ID of standby server

3.2.32 MCA00132

failed to switch over to {0} forcibly

[Description]

Failed in processing of switching because of unexpected failure.

[Parameters]

{0}: server ID of standby server

[System Processing]

Processing of switching will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message.

3.2.33 MCA00133

starting to detach standby server forcibly

[Description]

Starting to detach standby server forcibly.

3.2.34 MCA00134

succeeded in detaching standby server "{0}" completed forcibly

[Description]

Detached standby server succeeded.

[Parameters]

{0}: server ID

3.2.35 MCA00135

failed to detach standby server "{0}" forcibly

[Description]

Failed to detach standby server.

[Parameters]

{0}: server ID

[System Processing]

Processing of detaching will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message.

3.2.36 MCA00136

{0}: the specified option is invalid: "{1}"

[Description]

the specified option is invalid.

[Parameters]

{0}: command name

{1}: option name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.2.37 MCA00137

disabled standby server "{0}" to automatically switch because of canceling the synchronous replication for standby server

[Description]

Disabled the standby server to automatically switch because of canceling the synchronous replication for standby server.

[Parameters]

{0}: server ID

3.2.38 MCA00138

disabled standby server "{0}" to automatically switch

[Description]

Disabled the standby server to automatically switch.

[Parameters]

{0}: server ID

3.2.39 MCA00139

failed to disable standby server "{0}" to automatically switch

[Description]

Failed to disable the standby server to automatically switch.

[Parameters]

{0}: server ID

[System processing]

Processing will be aborted.

[Action]

The following causes could be considered.

- An error was detected in database server

- Timeout waiting for between Mirroring Controller processes of database server
- Identify the cause from messages on system log or event log, and work around.

3.2.40 MCA00140

{0}: invalid server kind specified in definition file "{1}" line {2}

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.2.41 MCA00141

{0}: server kind 'arbiter' do not specified in definition file "{2}" despite value 'arbitration' is specified parameter heartbeat_error_action in definition file "{1}"

[Description]

Server kind 'arbiter' do not been specified in network.conf despite value 'arbitration' is specified parameter heartbeat_error_action in "server identifier".conf

[Parameters]

{0}: command name

{1}: file name

{2}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.2.42 MCA00142

{0}: could not specify server kind 'arbiter' in definition file "{3}" because value '{2}' is specified parameter heartbeat_error_action in definition file "{1}"

[Description]

Could not specify server kind 'arbiter' in network.conf because value 'arbitration' is not specified parameter heartbeat_error_action in "server identifier".conf.

[Parameters]

{0}: command name

{1}: file name

{2}: message, arbitration, command, fallback

{3}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.2.43 MCA00143

{0}: second port number to use for the arbitration network is not specified in definition file "{1}"

[Description]

Second port number to use for the arbitration network is not specified in network.conf.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.2.44 MCA00144

{0}: could not specify second port number to use for the arbitration network in definition file "{3}" because value '{2}' is specified parameter heartbeat_error_action in definition file "{1}"

[Description]

Could not specify second port number to use for the arbitration network in network.conf.

[Parameters]

{0}: command name

{1}: file name

{2}: message, command, fallback

{3}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.2.45 MCA00145

{0}: second IP address to use for the arbitration network is not specified in definition file "{1}"

[Description]

Second IP address to use for the arbitration network is not specified in network.conf.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.2.46 MCA00146

{0}: cannot specify second IP Address on server kind 'arbiter' in definition file "{1}"

[Description]

Cannot specify second IP Address on server kind 'arbiter' in network.conf.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.2.47 MCA00147

{0}: could not use parameter '{3}' because value '{2}' is specified parameter heartbeat_error_action in definition file "{1}"

[Description]

Could not use parameter in "server identifier".conf.

[Parameters]

{0}: command name

{1}: file name

{2}: message, arbitration, command, fallback

{3}: parameter

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.2.48 MCA00148

{0}: could not use option "{3}" because value '{2}' is specified parameter heartbeat_error_action in definition file "{1}"

[Description]

Could not use this option.

[Parameters]

{0}: command

{1}: file name

{2}: message, arbitration, command, fallback

{3}: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options according to the message and mc_ctl command descriptions of "Reference".

3.2.49 MCA00149

requesting arbitration server "{0}" to connect

[Description]

Requesting arbitration server to connect.

[Parameters]

{0}: server ID

[System processing]

Requesting arbitration server to connect.

3.2.50 MCA00150

trying to connect to arbitration server "{0}"

[Description]

Trying to connect to arbitration server.

[Parameters]

{0}: server ID

[System processing]

Trying to connect to arbitration server until success.

3.2.51 MCA00151

succeeded in connection with arbitration server "{0}"

[Description]

Succeeded in connection with arbitration server.

[Parameters]

{0}: server ID

3.2.52 MCA00152

failed to connect to arbitration server "{0}" event:"{1}"

[Description]

Either of the followings has occurred.

- incorrect specification in network.conf
- error occurs in the network between database server and arbitration server
- Mirroring Controller Arbitration process is not running or in the stop processing
- Mirroring Controller Arbitration process or arbitration server detects an error

[Parameters]

{0}: server ID

{1}: "timeout" or "communication error"

[System Processing]

Processing will be aborted.

[Action]

Check the following and identify the cause, and eliminate cause.

- specification about server kind 'arbiter' in network.conf
- the value of arbiter_connect_timeout parameter in "server identifier".conf
- communication status between database server and arbitration server
- Mirroring Controller Arbitration process starting status
- the message in arbitration server

3.2.53 MCA00153

disconnected from arbitration server "{0}"

[Description]

Disconnected from arbitration server.

[Parameters]

{0}: sever ID

3.2.54 MCA00154

timeout waiting for communication with Mirroring Controller Arbitration process server:"{0}"

[Description]

Timeout waiting for communication between Mirroring Controller process and Mirroring Controller Arbitration process.

[Parameters]

{0}: server ID

[System Processing]

Try to connect to arbitration server.

[Action]

Check whether a network error between arbitration server and database server or an error of arbtration server was detected.

If an error was not detected, the value of `arbiter_alive_timeout` parameter in "server identifier".conf is too short.
Review and extend the value of `arbiter_alive_timeout` in "server identifier".conf.

3.2.55 MCA00155

failed to open communication environment detail of cause:"{0}"

[Description]

Failed to open communication environment.

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

3.2.56 MCA00156

invalid port number for server "{0}" in definition file "{1}"

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: server ID

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.2.57 MCA00157

communication error with the arbitration server "{0}" occurred

[Description]

Communication error with the arbitration server occurred.

[Parameters]

{0}: server ID

[System Processing]

Trying to connect.

[Action]

Either of the followings has occurred.

- When Mirroring Controller Arbitration process of a arbitration server is not running
- When abnormality occurs in the network between a database server and arbitration server

Identify the cause from messages on system log or event log in arbitration server or database server, and work around.

3.2.58 MCA00158

failed to start Mirroring Controller because of could not connect to arbitration server "{0}"

[Description]

Failed to start Mirroring Controller because of could not connect to arbitration server.

[Parameters]

{0}: server ID

[System processing]

Processing will be aborted.

[Action]

Work around according to the Action of the message output before this message.

On Windows, if there is no message outputted before this message, please refer to the message outputted to an event log.

MCA00159

requesting arbitration server "{1}" to arbitrate for database server "{0}"

[Description]

Requesting arbitration server to arbitrate for the target server.

[Parameters]

{0}: server ID

{1}: server ID

[System processing]

Requesting arbitration server to arbitrate for the target server.

3.2.59 MCA00160

the arbitration server "{0}" arbitrated status of database server "{1}" as sanity

[Description]

The arbitration server arbitrated status of database server as sanity.

[Parameters]

{0}: server ID

{1}: server ID

3.2.60 MCA00161

the request for arbitration was omitted because fencing command for a database server "{0}" was finished already

[Description]

The request for arbitration was omitted because fencing command for a database server was finished already.

[Parameters]

{0}: server ID

3.2.61 MCA00162

arbitration processing cannot request because the "{0}" command is carrying out

[Description]

Cannot request arbitration processing because command is running on the same or another server.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

3.2.62 MCA00163

timeout waiting for requesting arbitration server "{0}" to arbitrate

[Description]

Timeout waiting for requesting arbitration server to arbitrate.

[Parameters]

{0}: server ID

[System Processing]

Processing will be aborted.

[Action]

Switch or detach server in yourself according to descriptions of "Cluster Operation Guide (Database Multiplexing)".

3.2.63 MCA00164

requesting arbitration server "{0}" to fence database server "{1}"

[Description]

Requesting arbitration server to fence database server.

[Parameters]

{0}: server ID

{1}: server ID

[System Processing]

Requesting arbitration server to fence.

3.2.64 MCA00165

arbitration server "{0}" succeeded in fencing for database server "{1}"

[Description]

Arbtration server succeeded in executing fencing command for the target server.

[Parameters]

{0}: server ID

{1}: server ID

3.2.65 MCA00166

arbitration server "{0}" failed to fence for database server "{1}". detail of cause: check log file in arbitration server

[Description]

Arbitration process failed to execute fencing command for the target server.

[Parameters]

{0}: server ID

{1}: server ID

[System Processing]

Processing will be aborted.

[Action]

Check error message in arbitration server.

If needed, perform switch or detach the database server with manually operation according to descriptions of "Cluster Operation Guide (Database Multiplexing)".

3.2.66 MCA00167

timeout waiting for a request to fence to arbitration server "{0}"

[Description]

Timeout waiting for a request to fence to arbitration server.

[Parameters]

{0}: server ID

[System Processing]

Processing will be aborted.

[Action]

Switch or detach server in yourself according to descriptions of "Cluster Operation Guide (Database Multiplexing)".

3.2.67 MCA00168

arbitration server "{0}" rejected the request to fence database server "{1}"

[Description]

Either of the followings is esteemed.

- The arbitration server is executing arbitration process
- Fencing command was executed just before

[Parameters]

{0}: server ID

{1}: server ID

3.2.68 MCA00169

could not request "{1}" because of disconnecting from arbitration server "{0}"

[Description]

Could not request arbitration server to arbitrate, fence or disable automatically switch because of disconnecting.

[Parameters]

{0}: server ID

{1}: "arbitration" or "fencing" or "disable automatically switch"

[System Processing]

Processing will be aborted.

[Action]

Either of the followings has occurred.

- Mirroring Controller Arbitration process is not running in arbitration server
- Abnormality occurs in the network between database server and arbitration server

Identify the cause from messages on system log or event log in arbitration server or database server, and work around.

3.2.69 MCA00170

rejeceted a request arbitration server "{1}" because database server "{0}" was beening fencing

[Description]

The following requirements shouldn't be executed if it is requested from the database server which is a fencing target.

- request to arbitrate
- request to fence

[Parameters]

{0}: server ID

{1}: server ID

[Action]

Processing will be aborted.

3.2.70 MCA00171

requested arbitration server "{0}" to disable standby server "{1}" to automatically switch

[Description]

Requested arbitraion server to disable the standby server to automatically switch.

[Parameters]

{0}: server ID

{1}: server ID

3.2.71 MCA00172

arbitration server "{0}" fenced standby server "{1}" because of failed to disable the standby server to automatically switch

[Description]

Arbitration server fenced the standby server because of failed to disable the standby server to automatically switch.

[Parameters]

{0}: server ID

{1}: server ID

3.2.72 MCA00173

arbitration server "{0}" tried to fence standby server "{1}" because of failed to disable the standby server to automatically switch, however fencing was failed

[Description]

Arbitration server tried to fence the standby server because of failed to disable the standby server to automatically switch, however fencing was failed.

[Parameters]

{0}: server ID

{1}: server ID

[System Processing]

Processing will be aborted.

[Action]

Switch or detach database server which error has been detected in yourself.

After, identify the cause from messages on system log or event log in arbitration server and work around.

3.2.73 MCA00174

requested standby server "{0}" to disable automatically switching

[Description]

Requested the standby server to disable automatically switching.

[Parameters]

{0}: server ID

3.2.74 MCA00175

{0}: cannot execute switching over forcibly other than on standby server

[Description]

Switching over forcibly needs to be executed only on standby server.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Check whether the server where the command was executed is correct.

Either, check that Mirroring Controller has been degenerate state yet.

3.2.75 MCA00176

{0}: cannot execute detaching forcibly other than on primary server

[Description]

Detaching forcibly needs to be executed only on primary server.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Check whether the server where the command was executed is correct.

Either, check that Mirroring Controller has been degenerate state yet.

3.2.76 MCA00177

forcible switch over to standby server "{0}" was requested although the data may be not synchronous with primary server

[Description]

Forcible switch over to standby server was requested although the data may be not synchronous with primary server.

[Parameters]

{0}: server ID

[System Processing]

Processing will be continued.

[Action]

Check the data of database server and recovery as necessary, after forcible switch over will be completed.

3.2.77 MCA00178

database server which is able to be switched over is not found

[Description]

Database server which is able to be switched over is not found.

[System Processing]

Processing will be aborted.

3.2.78 MCA00179

starting to detach standby server

[Description]

Starting to detach standby server.

3.2.79 MCA00180

database server which needs to be detached is not found

[Description]

Database server which needs to be detached is not found.

[System Processing]

Processing will be aborted.

3.2.80 MCA00181

database server already has been detached

[Description]

Database server already has been detached.

[System Processing]

Processing will be aborted.

3.2.81 MCA00182

failed to switch over forcibly

[Description]

Failed in processing of switching because of unexpected failure.

[System Processing]

Processing of switching will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message.

3.2.82 MCA00183

failed to detach standby server forcibly

[Description]

Failed to detach standby server.

[System Processing]

Processing of detaching will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message.

3.2.83 MCA00184

could not {1} because {0} server is abnormal

[Description]

Could not switch over or detach because server is abnormal

[Parameters]

{0}: "primary" or "candidate primary" or "standby"

{1}: "switch over" or "detach"

[System Processing]

Processing will be aborted.

[Action]

Find the message output before this message in the log files on the target server, and work around according to the Action of the message.

3.2.84 MCA00185

value of heartbeat_error_action is different from the value of other server "{0}"

[Description]

Value of heartbeat_error_action is different from the value of other server "{0}".

[Parameters]

{0}: server ID

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting value of heartbeat_error_action to the same value as another server.

3.2.85 MCA00186

restarting Mirroring Controller process because an its error was detected: %s

[Description]

Restarting Mirroring Controller process because an its error was detected.

[Parameters]

%s: error detail ("no response", "down")

[System Processing]

Restarting Mirroring Controller process.

3.2.86 MCA00187

Mirroring Controller process was restarted

[Description]

Mirroring Controller process was restarted.

3.2.87 MCA00188

failed to restart Mirroring Controller

[Description]

Failed to restart Mirooring Controller.

[System Processing]

Processing will be aborted.

[Action]

Work around according to the Action of the message output before this message.

On Windows, if there is no message outputted before this message, please refer to the message outputted to an event log.

After, execute the mc_ctl command to restart Mirroring Controller.

3.2.88 MCA00189

could not access "{0}" file detail of cause:"{1}"

[Description]

Could not access the process information file of OS.

[Parameters]

{0}: file name

{1}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.2.89 MCA00190

invalid contents of "{0}" file

[Description]

Invalid contents of /proc/[pid]/status file.

[Parameters]

{0}: file name

[System Processing]

Processing will be aborted.

[Action]

Check whether mc_keeper process or mc_agent process exists with using OS command.

3.2.90 MCA00191

executing arbitration command and inquiring the result of arbitration

[Description]

Executing arbitration command that execute arbitration.

[System processing]

Degenerate depending on result of arbitration command.

3.2.91 MCA00192

executing fencing command

[Description]

Executing fencing command.

[System processing]

Processing will be continued depending on result of fencing command.

3.2.92 MCA00193

starting degenerate because of result of arbitration command for database server "{0}" result: "{1}"

[Description]

Starting degenerate because of result of arbitration command for target server.

[parameters]

{0}: server ID

{1}: return code of command

3.2.93 MCA00194

degeneracy is not executed because of result of arbitration command to database server "{0}" result: "{1}"

[Description]

Degeneracy is not executed because of result of arbitration command to target server.

[parameters]

{0}: server ID

{1}: return code of command

3.2.94 MCA00195

timeout has occurred during arbitration command has been executing to database server "{0}"

[Description]

Timeout has occurred during arbitration command has been executing to target server.

[Parameters]

{0}: server ID

[System Processing]

Processing will be aborted.

[Action]

Check the state of database server and switch or detach the server with manually operation according to descriptions of "Cluster Operation Guide (Database Multiplexing)" as necessary.

When find process ID of arbitration command, terminate forcibly by using OS command.

3.2.95 MCA00196

{0}: two or more standby server names are specified in the parameter "synchronous_standby_names" in PostgreSQL

[Description]

multiple synchronous standby servers can not be monitored by Mirroring Controller.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying single standby server to synchronous_standby_names.

3.2.96 MCA00197

the arbitration server "{0}" didn't arbitrate status of database server "{1}" as sanity

[Description]

Status of the target server was not arbitrated as sanity by arbitration server.

[Parameters]

{0}: server ID

{1}: server ID

[System processing]

Start degenerate processing.

3.2.97 MCA00198

fencing command for database server "{0}" succeeded: result:"{1}"

[Description]

Fencing command for database server succeeded.

[parameters]

{0}: server ID

{1}: return code of command

[System processing]

Processing will be continued.

3.2.98 MCA00199

fencing command for database server "{0}" failed: result:"{1}"

[Description]

Fencing command for database server failed.

[parameters]

{0}: server ID

{1}: return code of command

[System processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

Switch or detach the server with manually operation according to descriptions of "Cluster Operation Guide (Database Multiplexing)" as necessary.

MCA00200

timeout waiting for the fencing command

[Description]

Timeout waiting for the fencing command.

[System processing]

Processing will be aborted.

[Action]

The value of fencing_command_timeout parameter in server identifier.conf is too short.

Review and extend the value of fencing_command_timeout parameter in arbitration.conf.

When find process ID of fencing command, terminate forcibly by using OS command.

3.3 Message Numbers Beginning with MCA00200

3.3.1 MCA00201

executing state-transition-command kind of command:{0}

[Description]

Executing state-transition-command.

[parameters]

{0}: kind of state-transition-command(post-switch, pre-detach, post-attach)

3.3.2 MCA00202

state-transition-command has done kind of command:{0}

[Description]

State-transition-command has done.

[parameters]

{0}: kind of state-transition-command(post-promote, pre-detach, post-attach)

[System processing]

Processing will be continued.

3.3.3 MCA00203

timeout has occurred to state-transition-command kind of command:{0}

[Description]

Timeout has occurred to state-transition-command.

[parameters]

{0}: kind of state-transition-command(post-promote, pre-detach, post-attach)

[System Processing]

Processing of state-transition-command will be aborted.

[Action]

If the process of state-transition-command remained, terminate the process forcibly by using OS command. After checking processing status of state-transition-command, exec the processing of the command manually.

3.3.4 MCA00204

detected recovery from an error on monitoring of table space({0})

[Description]

detected recovery from an error on monitoring of table space

[Parameters]

{0}: directory path of table space

3.3.5 MCA00205

detected no response on monitoring of database process

[Description]

Detected no response on monitoring of database process.

[System Processing]

Continues processing.

[Action]

Check the error detail and eliminate causes.

3.3.6 MCA00206

detected recovery from no response on monitoring of database process

[Description]

Detected recovery from no response on monitoring of database process.

3.3.7 MCA00207

{0}: the user name specified in parameter db_instance_username of definition file "{1}" is not database superuser

[Description]

The user name specified in parameter db_instance_username is not database superuser.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying a database superuser.

3.3.8 MCA00208

{0}: the user name specified in parameter db_instance_username of definition file "{1}" does not exist

[Description]

The user name specified in parameter db_instance_username does not exist.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying a database superuser.

3.3.9 MCA00209

{0}: could not specify second IP address to use for the arbitration network in definition file "{3}" because value '{2}' is specified parameter heartbeat_error_action in definition file "{1}"

[Description]

Could not specify second IP address to use for the arbitration network in network.conf.

[Parameters]

{0}: command name

{1}: file name

{2}: message, command, fallback

{3}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.3.10 MCA00210

{0}: cannot specify second port number on server kind 'arbiter' in definition file "{1}"

[Description]

Cannot specify second port number on server kind 'arbiter' in network.conf.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.3.11 MCA00211

{0}: could not use parameter "{2}" because parameter "{3}" is not specified in definition file "{1}"

[Description]

This parameter cannot be specified because the parameter with dependency is not specified in the definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

{3}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.3.12 MCA00212

{0}: primary_conninfo parameter is not specified in postgresql.auto.conf

[Description]

Primary_conninfo parameter is not specified in postgresql.auto.conf file.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Specify primary_conninfo parameter in postgresql.auto.conf file according to the description of "Setting Up the Standby Center" for disaster recovery of "Cluster Operation Guide (Database Multiplexing)".

3.3.13 MCA00213

values of parameters for abnormality monitoring of operating system or server in server definition file "{1}" are too small for value of heartbeat_interval in arbitration definition file of arbitration server "{0}"

[Description]

Because the values of parameters for abnormality monitoring of the operating system or server in the server definition file are too small compared with the value of heartbeat_interval in the arbitration definition file of the arbitration server, the arbitration for the target database server might be delayed.

[Parameters]

{0}: server ID

{1}: file name

[System Processing]

Depending on the start mode of the mc_ctl command, either of the following processes will be performed.

- When --async-connect-arbiter option is not specified

Processing will be aborted.

- When --async-connect-arbiter option is specified

Continues processing.

[Action]

Take either of the following actions.

- When --async-connect-arbiter option is not specified

Correct the value of parameters for abnormality monitoring of the operating system or server according to the message and "Tuning for Optimization of Degradation Using Abnormality Monitoring With the Arbitration Server" of "Cluster Operation Guide (Database Multiplexing)".

After that, re-execute the mc_ctl command.

- When --async-connect-arbiter option is specified

Correct the parameters for abnormality monitoring of the operating system or server according to the message and "Tuning for Optimization of Degradation Using Abnormality Monitoring With the Arbitration Server" of "Cluster Operation Guide (Database Multiplexing)".

After that, execute the mc_ctl command to restart Mirroring Controller.

3.3.14 MCA00214

{0}: keyword "{1}" is not specified for primary_conninfo parameter in postgresql.auto.conf

[Description]

The required keyword is not specified for primary_conninfo parameter in postgresql.auto.conf file.

[Parameters]

{0}: command name

{1}: keyword name

[System Processing]

Processing will be aborted.

[Action]

Specify the required keyword for primary_conninfo parameter in postgresql.auto.conf file according to the description of "Setting Up the Standby Center" for disaster recovery of "Cluster Operation Guide (Database Multiplexing)".

3.3.15 MCA00215

{0}: keyword "{3}" is not specified for parameter "{2}" in definition file "{1}"

[Description]

The keyword is not specified for the parameter in the definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

{3}: keyword name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.3.16 MCA00216

{0}: value that cannot be specified for keyword "{3}" of parameter "{2}" in definition file "{1}" is set

[Description]

The value that cannot be specified for keyword of the parameter in the definition file is set.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

{3}: keyword name

[System Processing]

Processing will be aborted.

[Action]

Take either of the following actions.

- When the keyword is application_name

Correct the definition file or postgresql.auto.conf file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

- Otherwise

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.3.17 MCA00217

{0}: could not use parameter "{3}" because parameter "{2}" is specified in definition file "{1}"

[Description]

This parameter cannot be specified because the parameter with exclusive relationship is specified in the definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

{3}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.3.18 MCA00218

{0}: value 'fallback' could not be specified for parameter heartbeat_error_action because parameter "{2}" is specified in definition file "{1}"

[Description]

The parameter with exclusive relationship is specified although 'fallback' is specified for heartbeat_error_action.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.3.19 MCA00219

you can switch the connection destination of streaming replication of server "{0}"

[Description]

You can switch the connection destination of streaming replication.

[Parameters]

{0}: server ID

3.3.20 MCA00220

you cannot switch the connection destination of streaming replication of server "{0}"

[Description]

You cannot switch the connection destination of streaming replication.

[Parameters]

{0}: server ID

3.3.21 MCA00221

start to build in standby server "{0}"

[Description]

Start to build in standby server.

[Parameters]

{0}: server ID

3.3.22 MCA00222

failed to build in standby server "{0}"

[Description]

Failed to build in standby server.

[Parameters]

{0}: server ID

[System Processing]

Processing will be aborted.

[Action]

Find the message output before this message from display of own and other server, system log or event log, and then work around according to the Action of the message.

3.3.23 MCA00223

build in standby server "{0}" completed

[Description]

Build in standby server "{0}" completed.

[Parameters]

{0}: server ID

3.3.24 MCA00224

start to switch the connection destination of streaming replication

[Description]

Start to switch the connection destination of streaming replication.

3.3.25 MCA00225

failed to switch the connection destination of streaming replication

[Description]

Failed to switch the connection destination of streaming replication.

[System Processing]

Processing of switching will be aborted.

[Action]

Find the message output before this message from display of own and other server, system log or event log, and then work around according to the Action of the message.

3.3.26 MCA00226

start to switch the connection destination of streaming replication of server "{0}"

[Description]

Start to switch the connection destination of streaming replication.

[Parameters]

{0}: server ID

[Action]

If Mirroring Controller executed switching automatically, find the message output before this message from system log or event log to identify the cause of switching, and then work around according to the Action of the message.

3.3.27 MCA00227

failed to switch the connection destination of streaming replication of server "{0}"

[Description]

Failed to switch the connection destination of streaming replication.

[Parameters]

{0}: server ID

[System Processing]

Processing of switching will be aborted.

[Action]

Find the message output before this message from display own and other server, system log or event log, and then work around according to the Action of the message.

3.3.28 MCA00228

switch the connection destination of streaming replication of server "{0}" completed

[Description]

Switch the connection destination of streaming replication completed.

[Parameters]

{0}: server ID

3.3.29 MCA00229

switch forcibly the connection destination of streaming replication of server "{0}" completed

[Description]

Switch forcibly the connection destination of streaming replication completed.

[Parameters]

{0}: server ID

3.3.30 MCA00230

value of primary_conninfo parameter which is specified in postgresql.auto.conf file of server "{0}" has been updated to the value of parameter "{2}" which is specified in definition file "{1}"

[Description]

Value of primary_conninfo parameter which is specified in postgresql.auto.conf file has been updated.

[Parameters]

{0}: server ID

{1}: file name

{2}: parameter name

3.3.31 MCA00231

failed to update value of primary_conninfo parameter which is specified in postgresql.auto.conf file of server "{0}" detail of cause:"{1}"

[Description]

Failed to update value of primary_conninfo parameter which is specified in postgresql.auto.conf file.

[Parameters]

{0}: server ID

{1}: detail of cause

[Action]

Check the error detail and eliminate causes.

3.3.32 MCA00232

update value of parameter "{2}" to "{3}" which is specified in definition file "{1}" of server "{0}" has completed

[Description]

Update value of parameter which is specified in definition file has completed.

[Parameters]

{0}: server ID

{1}: file name

{2}: parameter name

{3}: primary, standby

3.3.33 MCA00233

failed to update value of parameter "{2}" which is specified in definition file "{1}" of server "{0}"

[Description]

Failed to update value of parameter which is specified in definition file.

[Parameters]

{0}: server ID

{1}: file name

[Action]

Find the message output before this message from display of own and other server, system log or event log, and then work around according to the Action of the message.

3.3.34 MCA00234

failed to check the consistency of LSN between server "{0}" and server "{1}"

[Description]

Failed to check the consistency of LSN between the server.

[Parameters]

{0}: server ID

{1}: server ID

[Action]

Find the message output before this message from display of own and other server, system log or event log, and then work around according to the Action of the message.

3.3.35 MCA00235

failed to update value of parameter "{2}" which is specified in file "{1}" of old candidate primary server "{0}"

[Description]

Failed to update value of parameter which is specified on old candidate primary server.

[Parameters]

{0}: server ID

{1}: file name

{2}: parameter name

[Action]

Either of the following processes will be performed before restarting OS if automatic start and stop of Mirroring Controller has been setting, otherwise building in old candidate primary server to new candidate primary server.

- When update postgresql.auto.conf file has failed

Update connection setting of primary_conninfo parameter which is specified in postgresql.auto.conf file to new candidate primary server by executing ALTER SYSTEM SET statement

- When update "server identifier".conf file has failed

Edit setting of standbycenter_mode parameter in 'standby' which is specified in "server identifier".conf file.

3.3.36 MCA00236

Mirroring Controller of the server "{0}" is not running

[Description]

Mirroring Controller of the server "{0}" is not running.

[Parameters]

{0}: server ID

3.3.37 MCA00237

invalid combination of server own server type:{0} other server type:{1}

[Description]

Invalid combination of server.

[Parameters]

{0}: own server type

{1}: other server type

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description to be set referring disaster recovery operation of "Cluster Operation Guide (Database Multiplexing)".

3.3.38 MCA00238

{0}: cannot execute detaching forcibly other than on operation center

[Description]

Detaching forcibly needs to be executed only on operation center.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Check whether the server where the command was executed is correct.

3.3.39 MCA00239

standbycenter_mode parameter is specified in the definition file "{0}" of primary server

[Description]

standbycenter_mode parameter is specified in the definition file of primary server.

[Parameters]

{0}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description to be set referring disaster recovery operation of "Cluster Operation Guide (Database Multiplexing)".

3.3.40 MCA00240

promoted to the primary server, although standbycenter_mode parameter is specified in the definition file "{1}" of the server "{0}"

[Description]

Promoted to the primary server, although standbycenter_mode parameter is specified in the definition file.

[Parameters]

{0}: server ID

{1}: file name

[System Processing]

Stop monitoring.

[Action]

Correct the definition file according to the message and parameter description to be set referring disaster recovery operation of "Cluster Operation Guide (Database Multiplexing)".

3.3.41 MCA00241

write permission is denied on definition file "{0}"

[Description]

Write permission is denied on definition file.

[Parameters]

{0}: file name

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command, after granting the write permissions to the definition file.

3.3.42 MCA00242

{0}: invalid format value is specified for parameter "{2}" in definition file "{1}"

[Description]

The invalid format value is specified for parameter in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.3.43 MCA00243

{0}: value is not set to keyword "{1}" of primary_conninfo parameter in postgresql.auto.conf

[Description]

The value is not set to keyword of primary_conninfo parameter in postgresql.auto.conf.

[Parameters]

{0}: command name

{1}: keyword name

[System Processing]

Processing will be aborted.

[Action]

Set the value for the keyword of primary_conninfo parameter in postgresql.auto.conf file according to the description of "Setting Up the Standby Center" for disaster recovery of "Cluster Operation Guide (Database Multiplexing)".

3.3.44 MCA00244

failed to start monitoring of database process

[Description]

Failed to start monitoring of database process.

[System Processing]

Processing will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message. After that, execute the mc_ctl command to restart Mirroring Controller.

3.3.45 MCA00245

checking the consistency of LSN between server "{0}" and server "{1}" is not executed because candidate primary server is abnormal

[Description]

Checking the consistency of LSN is not executed because candidate primary server is abnormal.

[Parameters]

{0}: server ID

{1}: server ID

[System Processing]

Processing will be continued.

[Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message, after switching over will be completed. After that, build in old candidate primary server to new candidate primary server.

3.4 Message Numbers Beginning with MCR00000

3.4.1 MCR00001

could not read file "{0}": exception={1}: {2}

[Description]

Could not read the file.

[Parameters]

{0}: file name

{1}: exception type

{2}: exception detail

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the message, and then remove it.

3.4.2 MCR00002

{0}: wrong number of server ID in definition file "{1}"

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.4.3 MCR00003

{0}: server ID specified in definition file "{1}" too long (max {2} bytes) line {3}

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: max length of server ID

{3}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.4.4 MCR00004

{0}: wrong server ID in definition file "{1}"

[Description]

Could not use a server ID with same name in network.conf.

[Parameters]

{0}: command name

{1}: file name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter descriptions of "Cluster Operation Guide (Database Multiplexing)".

3.4.5 MCR00005

invalid host name or IP address "{1}" in definition file "{0}"

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: file name

{1}: host name or IP address

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.4.6 MCR00006

{0}: invalid port number in definition file "{1}" line {2}

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.4.7 MCR00007

{0}: invalid format specified in definition file "{1}" line {2}

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.4.8 MCR00008

{0}: invalid value for parameter "{2}" in definition file "{1}"

[Description]

Invalid parameter was found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.4.9 MCR00009

{0}: no value for parameter "{2}" specified in definition file "{1}"

[Description]

Invalid parameter was found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.4.10 MCR00010

{0}: unrecognized parameter "{2}" in definition file "{1}"

[Description]

Unrecognized parameter was found in definition file.

[Parameters]

{0}: file name

{1}: command name

{2}: parameter name

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.4.11 MCR00011

%s: option "%s" duplicated

[Description]

Certain option is duplicated.

[Parameters]

%s: command

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.4.12 MCR00012

%s: "%s" option conflicts with "%s" option

[Description]

Options are conflicting.

[Parameters]

%s: command

%s: option

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.4.13 MCR00013

%s: option requires an argument -- %s

[Description]

No argument specified for the option.

[Parameters]

%s: command

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.4.14 MCR00014

%s: neither "%s" option nor environment variable "%s" specified

[Description]

Both of required option and equivalent environment variable were not specified.

[Parameters]

%s: command

%s: option

%s: environment variable

[System Processing]

Processing will be aborted.

[Action]

Re-execute after specifying required option or equivalent environment variable.

3.4.15 MCR00015

%s: argument of option "%s" is too long

[Description]

Argument of option is too long.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.4.16 MCR00016

%s: invalid option -- %s

[Description]

Invalid option.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.4.17 MCR00017

%s: option "%s" is required

[Description]

A required option is not specified.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Specify the required option, and re-execute.

3.4.18 MCR00018

%s: unnecessary operand "%s"

[Description]

Unnecessary operand.

[Parameters]

%s: command name

%s: operand

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting operand.

3.4.19 MCR00019

%s: unrecognized operation mode or no operation mode specified

[Description]

Unrecognized operation mode or no operation mode specified.

[Parameters]

%s: command name

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting or specifying operation mode.

3.4.20 MCR00020

Try "%s --help" for more information.\n

[Description]

--help option can show more additional information.

[Parameters]

%s: command name

[System Processing]

None.

[Action]

Check the message output before this message, and refer to descriptions shown by '--help' option.

3.4.21 MCR00021

%s: out of memory

[Description]

Out of memory error occurred.

[Parameters]

%s: command

[System Processing]

Processing will be aborted.

[Action]

Obtain free memory space by stopping unnecessary processes or changing system settings.

3.4.22 MCR00022

another "{0}" command is running

[Description]

Cannot execute command with this operation mode because another command is running on the same or another server.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

There is a case executing another command. Wait for completion of another command on the same or another server, and then re-execute.

In addition, there are the following cases when using mc_arb command.

There is a case under processing of an arbitration by Mirroring Controller Arbitration process. Wait for completion of the processing under operation, and re-execute.

If any of the following cases occurs, there is a possibility that the processing of Mirroring Controller Arbitration process interrupts. Re-execute the mc_arb command after restarting Mirroring Controller Arbitration process.

- When abnormality occurs in the network
- When another server is downed
- When Mirroring Controller Arbitration process is stopped forcibly

3.4.23 MCR00023

Mirroring Controller Arbitration process is already running

[Description]

Mirroring Controller Arbitration process is already running.

[System Processing]

Processing will be aborted.

[Action]

If needed, stop Mirroring Controller Arbitration process, and re-execute.

If could not start although Mirroring Controller Arbitration process not started, refer to the description about workaround for failure of "Cluster Operation Guide (Database Multiplexing)".

3.4.24 MCR00024

cannot execute %s command because Mirroring Controller Arbitration process is not running

[Description]

Cannot execute Mirroring Controller Arbitration process command because Mirroring Controller Arbitration process is not running.

[Parameters]

%s: command name

[System Processing]

Processing will be aborted.

[Action]

Start Mirroring Controller Arbitration process, and re-execute.

3.4.25 MCR00025

timeout waiting for communication with Mirroring Controller Arbitration process

[Description]

Timeout waiting for communication with Mirroring Controller Arbitration process.

[System processing]

Processing will be aborted.

[Action]

Check whether a network error was detected.

If an error was not detected, there is a possibility that the load of the system may be the cause, please re-execute after a while.

3.4.26 MCR00026

could not create PID file of Mirroring Controller Arbitration process detail of cause:"{0}"

[Description]

Could not create PID file of Mirroring Controller Arbitration process.

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the message, and then remove it.

3.4.27 MCR00027

could not remove PID file of Mirroring Controller Arbitration process detail of cause:"%s"

[Description]

Could not remove PID file of Mirroring Controller Arbitration process.

[Parameters]

%s: detail of cause

[Action]

Identify the cause according to the message, and then remove it.

3.4.28 MCR00028

could not read PID file of Mirroring Controller Arbitration process detail of cause:"%s"

[Description]

Could not read PID file of Mirroring Controller Arbitration process.

[Parameters]

%s: detail of cause

[Action]

Identify the cause according to the message, and then remove it.

3.4.29 MCR00029

invalid contents of PID file "%s" of Mirroring Controller Arbitration process

[Description]

The contents of PID file of Mirroring Controller Arbitration process is invalid.

[Parameters]

%s: file name

[System Processing]

Processing will be aborted.

[Action]

The following causes could be considered.

- The file was stored or replaced by mistake
- The file was corrupted

When starting Mirroring Controller Arbitration process, move or remove the file shown in the message.

When stopped Mirroring Controller Arbitration process, find ID of process named "mc_arbiter" and terminate forcibly by using OS command.

3.4.30 MCR00030

unexpected error occurred: {0}

[Description]

An unexpected error occurred.

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate cause.

If you cannot clear the problem, contact Fujitsu technical support.

3.4.31 MCR00031

system call error occurred:"%s" detail of cause:"%s"

[Description]

System call error occurred.

[Parameters]

%s: system call name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.4.32 MCR00032

failed to open communication environment detail of cause:"{0}"

[Description]

Failed to open communication environment.

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

3.4.33 MCR00033

could not read file "{0}": Permission denied

[Description]

No read permissions for the file.

[Parameters]

{0}: file name

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command, after granting the read permissions to the file.

3.4.34 MCR00034

could not read the access privileges of {0}

[Description]

Could not read the access privileges.

[Parameters]

{0}: target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

3.4.35 MCR00035

failed to set the access privileges of {0}

[Description]

Failed to set the access privileges.

[Parameters]

{0}: target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

3.4.36 MCR00036

could not get installation path

[Description]

FUJITSU Enterprise Postgres may not be installed.

[System Processing]

Processing will be aborted.

[Action]

Re-install FUJITSU Enterprise Postgres.

3.4.37 MCR00037

could not access "{0}" file detail of cause:"{1}"

[Description]

Could not access the process information file of OS.

[Parameters]

{0}: file name

{1}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.4.38 MCR00038

invalid contents of "{0}" file

[Description]

Invalid contents of /proc/[pid]/status file.

[Parameters]

{0}: file name

[System Processing]

Processing will be aborted.

[Action]

Check mc_arbiter process is existed or not in yourself.

3.4.39 MCR00039

unusable character is included in path "%s" specified as a directory for Mirroring Controller Arbitration process

[Description]

Unusable character is included in path specified as a directory for Mirroring Controller Arbitration process.

[Parameters]

%s: path name

[System Processing]

Processing will be aborted.

[Action]

Correct the path specified as a directory for Mirroring Controller Arbitration process according to the message and mc_arb command descriptions of "Reference".

3.4.40 MCR00040

could not access path "%s" specified as a directory for Mirroring Controller Arbitration process detail of cause:"%s"

[Description]

Could not access path specified as a directory for Mirroring Controller Arbitration process.

[Parameters]

%s: path name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.4.41 MCR00041

{0}: IP address "{2}" specified for parameter "my_address" in definition file "{1}" is not found

[Description]

IP address specified for my_address parameter in arbitration.conf is not found.

[Parameters]

{0}: command name

{1}: file name

{2}: IP address

[System Processing]

Processing will be aborted.

[Action]

Check whether IP address specified by my_address parameter in arbitration.conf is correct or IP address is valid.

3.4.42 MCR00042

could not access path "{0}" for parameter "{1}" in definition file "{2}" detail of cause:"{3}"

[Description]

Either of the followings has occurred.

- File does not exist
- You do not specify a file
- Could not read the access privileges

[Parameters]

- {0}: path name
- {1}: parameter name
- {2}: file name
- {3}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.4.43 MCR00043

{0}: users other than a command executor have the access privileges for definition file "{1}"

[Description]

Users other than a command executor have the access privileges for definition file.

[Parameters]

- {0}: command name
- {1}: file name

[System Processing]

Processing will be aborted.

[Action]

Revoke all the access privileges for any users other than a command executor.

3.4.44 MCR00044

only the owner of definition file "{0}" can execute this command

[Parameters]

- {0}: file name

[Description]

Only the owner who created the directory for Mirroring Controller Arbitration process can execute this command.

[System Processing]

Processing will be aborted.

[Action]

Re-execute the command by the owner who created the directory for Mirroring Controller Arbitration process.

3.4.45 MCR00045

starting Mirroring Controller Arbitration process

[Description]

Starting Mirroring Controller Arbitration process.

3.4.46 MCR00046

Mirroring Controller Arbitration process started

[Description]

Mirroring Controller Arbitration process started.

3.4.47 MCR00047

failed to start Mirroring Controller Arbitration process

[Description]

Failed to start Mirroring Controller Arbitration process.

[System Processing]

Processing will be aborted.

[Action]

Work around according to the Action of the message output before this message.

On Windows, if there is no message outputted before this message, please refer to the message outputted to an event log.

MCR00048

failed to report Mirroring Controller Arbitration process status

[Description]

Failed to report Mirroring Controller Arbitration process status.

[System Processing]

Processing will be aborted.

[Action]

Work around according to the Action of the message output before this message.

On Windows, if there is no message outputted before this message, please refer to the message outputted to an event log.

3.4.48 MCR00049

stopping Mirroring Controller Arbitration process

[Description]

Stopping Mirroring Controller Arbitration process.

3.4.49 MCR00050

Mirroring Controller Arbitration process stopped

[Description]

Mirroring Controller Arbitration process stopped.

3.4.50 MCR00051

could not stop Mirroring Controller Arbitration process because database server connects

[Description]

Could not stop Mirroring Controller Arbitration process because database server connects.

[System Processing]

Processing will be aborted.

[Action]

Execute mc_arb status command to find connected database server.

Re-execute after stopping Mirroring Controller on database server.

3.4.51 MCR00052

failed to stop Mirroring Controller Arbitration process

[Description]

Failed to stop Mirroring Controller Arbitration process.

[System Processing]

Processing will be aborted.

[Action]

Identify the cause from system log or event log on the target server, and work around.

3.4.52 MCR00053

stopping Mirroring Controller Arbitration process forcibly

[Description]

Stopping Mirroring Controller Arbitration process forcibly.

3.4.53 MCR00054

Mirroring Controller Arbitration process stopped forcibly

[Description]

Mirroring Controller Arbitration process stopped forcibly.

3.4.54 MCR00055

failed to stop Mirroring Controller Arbitration process forcibly

[Description]

Failed to stop Mirroring Controller Arbitration process forcibly.

[System Processing]

Processing will be aborted.

[Action]

Check [Action] of the message output before this message, and re-execute.

If re-execution fails, terminate forcibly mc_arbiter process with OS command.

3.4.55 MCR00056

database server "{0}" requested to arbitrate for database server "{1}" status

[Description]

Accepts a request to arbitrate from the database server which has detected an error.

[Parameters]

{0}: server ID

{1}: server ID

3.4.56 MCR00057

arbitrating the status of database server "{0}"

[Description]

Arbitrating for the status of the database server which was detected an error.

[Parameters]

{0}: server ID

[System Processing]

Arbitrating for the status of the database server which was detected an error.

3.4.57 MCR00058

received response from database server "{0}"

[Description]

A server is running normally.

[Parameters]

{0}: server ID

[System Processing]

Return result to database server.

3.4.58 MCR00059

could not receive response from database server "{0}"

[Description]

Detected the database server to be abnormal.

[Parameters]

{0}: server ID

[System Processing]

Execute fencing command.

3.4.59 MCR00060

rejected a request to arbitrate from database server "{0}"

[Description]

Either of the followings has occurred.

- Fencing command was executed just before
- The arbitration server was in the stop processing

[Parameters]

{0}: server ID

[System Processing]

Rejected a request to arbitrate from the database server.

3.4.60 MCR00061

database server "{0}" requested to fence database server "{1}"

[Description]

Accepted a request to fence from the database server which has detected an error.

[Parameters]

{0}: server ID

{1}: server ID

3.4.61 MCR00062

executing fencing command

[Description]

Executing fencing command.

[System processing]

Executing fencing command.

3.4.62 MCR00063

fencing command for database server "{0}" succeeded: result:"{1}"

[Description]

Fencing command for database server succeeded.

[parameters]

{0}: server ID

{1}: return code of command

[System processing]

Returning result to database server.

3.4.63 MCR00064

fencing command for database server "{0}" failed: result:"{1}"

[Description]

Fencing command for database server failed.

[parameters]

{0}: server ID

{1}: return code of command

[System processing]

Returning result to database server.

3.4.64 MCR00065

timeout waiting for the fencing command

[Description]

Timeout waiting for the fencing command.

[System processing]

Processing will be aborted.

[Action]

The value of fencing_command_timeout parameter in arbitration.conf is too short.

Review and extend the value of fencing_command_timeout parameter in arbitration.conf.

When find process ID of fencing command, terminate forcibly by using OS command.

3.4.65 MCR00066

rejected a request to fence from database server "{0}"

[Description]

Either of the followings is esteemed.

- The arbitration server has been executing arbitration process
- Fencing command has been executed just before
- The arbitration server was in the stop processing

[Parameters]

{0}: server ID

[System Processing]

Rejected a request to fence from database server.

3.4.66 MCR00067

rejected a request to fence from database server "{0}" because the database server is a fencing target

[Description]

The following requirements shouldn't be executed if it is requested from the database server which is a fencing target.

- request to arbitrate
- request to fence
- request to disable automatically switch

[Parameters]

{0}: server ID

[Action]

Processing will be aborted.

3.4.67 MCR00068

database server "{0}" requested to disable standby server "{1}" to automatically switch

[Description]

Accepted a request to disable the standby server to automatically switch.

[Parameters]

{0}: sever ID

{1}: sever ID

3.4.68 MCR00069

requested standby server "{0}" to disable automatically switching

[Description]

Requested the standby server to disable automatically switching.

[Parameters]

{0}: server ID

3.4.69 MCR00070

disabled standby server "{0}" to automatically switch

[Description]

Disabled the standby server to automatically switch.

[Parameters]

{0}: server ID

3.4.70 MCR00071

failed to disable standby server "{0}" to automatically switch

[Description]

Failed to disable the standby server to automatically switch.

[Parameters]

{0}: server ID

[System processing]

Executing fencing command.

3.4.71 MCR00072

omitted to disable standby server "{0}" to automatically switch

[Description]

It is not necessary to disable the standby server to automatically switch because a fencing for this database server is executing.

[Parameters]

{0}: server ID

[System processing]

Processing will be aborted.

3.4.72 MCR00073

connection was requested from database server "{0}"

[Description]

Connection was requested from database server.

[Parameters]

{0}: server ID

[Description]

Try connection to database server.

3.4.73 MCR00074

succeeded in connection with Mirroring Controller process of database server "{0}"

[Description]

Succeeded in connection with Mirroring Controller process of database server.

[Parameters]

{0}: server ID

3.4.74 MCR00075

rejected a request to connect from database server "{0}" because of during the fencing command execution

[Description]

Rejected a request to connect from database server because of during the fencing command execution.

[Parameters]

{0}: server ID

[Action]

Rejected a request to connect from database server.

3.4.75 MCR00076

disconnected from the database server "{0}"

[Description]

Disconnected from the database server.

[Parameters]

{0}: server ID

3.4.76 MCR00077

the disallowed IP address "{0}" tried to access

[Description]

The IP address which is different from the IP address in network.conf tried to access.

[parameters]

{0}: IP Adresses

[System Processing]

Connection will be rejected.

3.4.77 MCR00078

tried to access from database server with installed different product version IP address:"{0}"

[Description]

tried to access from database server with installed different product version.

[parameters]

{0}: IP address

[System Processing]

Connection will be rejected

[Action]

Match the product version level between arbitration server and database server.

3.4.78 MCR00079

the invalid server ID tried to access IP address:"{0}"

[Description]

The server ID which is different from the server ID in network.conf tried to access.

[Parameters]

{0}: IP address

[System Processing]

Connection will be rejected.

3.4.79 MCR00080

the combination of server IDs of arbitration server is incompatible with that of database server "{0}"

[Description]

The combination of server IDs of arbitration server is incompatible with that of the database server.

[Parameters]

{0}: server ID

[System Processing]

Processing will be aborted.

[Action]

Check the network.conf of both database server and arbitration sever, and correct the file.

3.4.80 MCR00081

the invalid packet received

[Description]

The invalid packet received.

[System Processing]

Connection will be rejected.

3.4.81 MCR00082

{0}: invalid server kind specified in definition file "{1}" line {2}

[Description]

Invalid descriptions were found in definition file.

[Parameters]

{0}: command name

{1}: file name

{2}: line number

[System Processing]

Processing will be aborted.

[Action]

Correct the definition file according to the message and parameter description of "Cluster Operation Guide (Database Multiplexing)".

3.4.82 MCR00083

%s: invalid argument for option %s

[Description]

Invalid argument for option.

[Parameters]

%s: command name

%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.4.83 MCR00084

installation environment is destroyed

[Description]

FUJITSU Enterprise Postgres may not be installed correctly or may be destroyed.

[System Processing]

Processing will be aborted.

[Action]

Re-install FUJITSU Enterprise Postgres.

3.4.84 MCR00085

no authority to execute this command

[Description]

Only the user who possesses an administrative authority can run this command.

[System Processing]

Processing will be aborted.

[Action]

Invoke the administrator's prompt, and re-execute this command.

3.4.85 MCR00086

failed to start service "{0}" detail of cause:"{1}"

[Description]

Failed to start service.

[Parameters]

{0}: Service name

{1}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.4.86 MCR00087

service "{0}" is not registered

[Description]

Service is not registered.

[Parameters]

{0}: Service name

[System Processing]

Processing will be aborted.

[Action]

Register service, and re-execute.

3.4.87 MCR00088

service "%s" for Mirroring Controller Arbitration process was registered

[Description]

Service for Mirroring Controller Arbitration process was registered with Windows service.

[Parameters]

%s: Service name

3.4.88 MCR00089

failed to register service "%s" detail of cause:"%s"

[Description]

An error occurred during registration of service.

[Parameters]

%s: Service name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.4.89 MCR00090

service name "%s" is already in use

[Description]

Service name is already in use.

[Parameters]

%s: Service name

[System Processing]

Processing will be aborted.

[Action]

Check the service name, and re-execute.

3.4.90 MCR00091

service "%s" for Mirroring Controller Arbitration process was unregistered

[Description]

Service for Mirroring Controller Arbitration process was unregistered from Windows service.

[Parameters]

%s: Service name

3.4.91 MCR00092

failed to unregister service "%s" detail of cause:"%s"

[Description]

An error occurred during deregistration of service.

[Parameters]

%s: Service name

%s: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

3.4.92 MCR00093

an error occurred in Mirroring Controller Arbitration process: {0}

[Description]

An error occurred in Mirroring Controller Arbitration process.

[Parameters]

{0}: detail of cause

[System Processing]

Processing will be aborted.

[Action]

Check the error detail and eliminate causes.

If you cannot clear the problem, contact Fujitsu technical support.

After removing the cause of errors, execute mc_arb command with the -e option to stop Mirroring Controller Arbitration process forcibly.

After that, execute the mc_arb command to start Mirroring Controller Arbitration process.

3.4.93 MCR00094

value of heartbeat_interval in arbitration definition file "{1}" is too large compared with value of parameters for abnormality monitoring of operating system or server in server definition file of database server "{0}"

[Description]

Because the value of heartbeat_interval parameter in the arbitration definition file is too large compared with the value of parameters for abnormality monitoring of the operating system or server in the server definition file of the database server, the arbitration for the target database server might be delayed.

[Parameters]

{0}: server ID

{1}: file name

[System Processing]

Continues processing.

[Action]

Correct the parameters for abnormality monitoring of the operating system or server according to the message and "Tuning for Optimization of Degradation Using Abnormality Monitoring With the Arbitration Server" of "Cluster Operation Guide (Database Multiplexing)".

After that, execute the mc_arb command to restart Mirroring Controller Arbitration process.

3.4.94 MCR00095

start to monitor of database server "{0}"

[Description]

Start to monitor of the database server.

[Parameters]

{0}: server ID

3.4.95 MCR00096

failed to start monitoring of database server "{0}"

[Description]

Failed to start monitoring of the database server.

[Parameters]

{0}: server ID

[System Processing]

Processing will be aborted.

[Action]

Find the message output before this message from display, system log or event log, and then work around according to the Action of the message.

3.4.96 MCR00097

stop Mirroring Controller Arbitration process forcibly because an error has occurred in Mirroring Controller Arbitration process: {0}

[Description]

Stop Mirroring Controller Arbitration process forcibly because an error has occurred in Mirroring Controller Arbitration process

[Parameters]

{0}: detail of cause

[System Processing]

Mirroring Controller Arbitration process will be stopped forcibly.

[Action]

Check the error detail and eliminate causes.

If you cannot clear the problem, contact Fujitsu technical support.

After removing the cause of errors, execute the mc_arb command to start Mirroring Controller Arbitration process.

3.4.97 MCR00098

stop monitoring of database server "{0}"

[Description]

Stop monitoring of the database server.

[Parameters]

{0}: server ID

3.4.98 MCR00099

detected an error on database server "{0}"

[Description]

Either of the followings has occurred.

- The database server is downed
- The arbitration network is abnormal

[Parameters]

{0}: server ID

[System Processing]

Continues processing.

3.5 Message Numbers Beginning with MCR00100

3.5.1 MCR00100

detected recovery of database server "{0}"

[Description]

detected recovery of the database server.

[Parameters]

{0}: server ID

3.5.2 MCR00101

arbitration for database server "{0}" has been delayed

[Description]

Either of the followings has occurred.

- The parameters for abnormality monitoring of the operating system or server are not optimally tuned
- The arbitration server is not responding

[Parameters]

{0}: server ID

Table of Contents

Preface	xxxi
1. What Is PostgreSQL?	xxxi
2. A Brief History of PostgreSQL	xxxi
2.1. The Berkeley POSTGRES Project	xxxii
2.2. Postgres95	xxxii
2.3. PostgreSQL	xxxiii
3. Conventions	xxxiii
4. Further Information	xxxiii
5. Bug Reporting Guidelines	xxxiv
5.1. Identifying Bugs	xxxiv
5.2. What to Report	xxxv
5.3. Where to Report Bugs	xxxvi
I. Tutorial	1
1. Getting Started	3
1.1. Installation	3
1.2. Architectural Fundamentals	3
1.3. Creating a Database	3
1.4. Accessing a Database	5
2. The SQL Language	7
2.1. Introduction	7
2.2. Concepts	7
2.3. Creating a New Table	7
2.4. Populating a Table With Rows	8
2.5. Querying a Table	9
2.6. Joins Between Tables	11
2.7. Aggregate Functions	13
2.8. Updates	15
2.9. Deletions	15
3. Advanced Features	16
3.1. Introduction	16
3.2. Views	16
3.3. Foreign Keys	16
3.4. Transactions	17
3.5. Window Functions	19
3.6. Inheritance	22
3.7. Conclusion	23
II. The SQL Language	24
4. SQL Syntax	32
4.1. Lexical Structure	32
4.2. Value Expressions	41
4.3. Calling Functions	55
5. Data Definition	58
5.1. Table Basics	58
5.2. Default Values	59
5.3. Generated Columns	60
5.4. Constraints	61
5.5. System Columns	69
5.6. Modifying Tables	69
5.7. Privileges	72
5.8. Row Security Policies	77
5.9. Schemas	83
5.10. Inheritance	87
5.11. Table Partitioning	91
5.12. Foreign Data	104
5.13. Other Database Objects	104

5.14. Dependency Tracking	105
6. Data Manipulation	107
6.1. Inserting Data	107
6.2. Updating Data	108
6.3. Deleting Data	109
6.4. Returning Data From Modified Rows	109
7. Queries	111
7.1. Overview	111
7.2. Table Expressions	111
7.3. Select Lists	126
7.4. Combining Queries	128
7.5. Sorting Rows	128
7.6. LIMIT and OFFSET	129
7.7. VALUES Lists	130
7.8. WITH Queries (Common Table Expressions)	131
8. Data Types	138
8.1. Numeric Types	139
8.2. Monetary Types	144
8.3. Character Types	145
8.4. Binary Data Types	147
8.5. Date/Time Types	149
8.6. Boolean Type	158
8.7. Enumerated Types	159
8.8. Geometric Types	161
8.9. Network Address Types	163
8.10. Bit String Types	166
8.11. Text Search Types	167
8.12. UUID Type	169
8.13. XML Type	170
8.14. JSON Types	172
8.15. Arrays	181
8.16. Composite Types	190
8.17. Range Types	197
8.18. Domain Types	203
8.19. Object Identifier Types	203
8.20. pg_lsn Type	205
8.21. Pseudo-Types	205
9. Functions and Operators	207
9.1. Logical Operators	207
9.2. Comparison Functions and Operators	207
9.3. Mathematical Functions and Operators	210
9.4. String Functions and Operators	214
9.5. Binary String Functions and Operators	228
9.6. Bit String Functions and Operators	230
9.7. Pattern Matching	231
9.8. Data Type Formatting Functions	248
9.9. Date/Time Functions and Operators	255
9.10. Enum Support Functions	269
9.11. Geometric Functions and Operators	269
9.12. Network Address Functions and Operators	273
9.13. Text Search Functions and Operators	276
9.14. XML Functions	282
9.15. JSON Functions and Operators	296
9.16. Sequence Manipulation Functions	312
9.17. Conditional Expressions	315
9.18. Array Functions and Operators	318
9.19. Range Functions and Operators	321
9.20. Aggregate Functions	323

9.21. Window Functions	330
9.22. Subquery Expressions	332
9.23. Row and Array Comparisons	335
9.24. Set Returning Functions	338
9.25. System Information Functions and Operators	341
9.26. System Administration Functions	358
9.27. Trigger Functions	377
9.28. Event Trigger Functions	378
9.29. Statistics Information Functions	381
10. Type Conversion	382
10.1. Overview	382
10.2. Operators	383
10.3. Functions	387
10.4. Value Storage	391
10.5. UNION, CASE, and Related Constructs	391
10.6. SELECT Output Columns	393
11. Indexes	394
11.1. Introduction	394
11.2. Index Types	395
11.3. Multicolumn Indexes	397
11.4. Indexes and ORDER BY	398
11.5. Combining Multiple Indexes	399
11.6. Unique Indexes	399
11.7. Indexes on Expressions	400
11.8. Partial Indexes	400
11.9. Index-Only Scans and Covering Indexes	403
11.10. Operator Classes and Operator Families	405
11.11. Indexes and Collations	407
11.12. Examining Index Usage	407
12. Full Text Search	409
12.1. Introduction	409
12.2. Tables and Indexes	413
12.3. Controlling Text Search	415
12.4. Additional Features	422
12.5. Parsers	427
12.6. Dictionaries	429
12.7. Configuration Example	439
12.8. Testing and Debugging Text Search	440
12.9. GIN and GiST Index Types	445
12.10. psql Support	445
12.11. Limitations	449
13. Concurrency Control	450
13.1. Introduction	450
13.2. Transaction Isolation	450
13.3. Explicit Locking	456
13.4. Data Consistency Checks at the Application Level	461
13.5. Caveats	463
13.6. Locking and Indexes	463
14. Performance Tips	465
14.1. Using EXPLAIN	465
14.2. Statistics Used by the Planner	476
14.3. Controlling the Planner with Explicit JOIN Clauses	481
14.4. Populating a Database	483
14.5. Non-Durable Settings	486
15. Parallel Query	487
15.1. How Parallel Query Works	487
15.2. When Can Parallel Query Be Used?	488
15.3. Parallel Plans	489

15.4. Parallel Safety	491
III. Server Administration	493
16. Installation from Source Code	499
16.1. Short Version	499
16.2. Requirements	499
16.3. Getting the Source	501
16.4. Installation Procedure	501
16.5. Post-Installation Setup	513
16.6. Supported Platforms	514
16.7. Platform-Specific Notes	515
17. Installation from Source Code on Windows	520
17.1. Building with Visual C++ or the Microsoft Windows SDK	520
18. Server Setup and Operation	525
18.1. The PostgreSQL User Account	525
18.2. Creating a Database Cluster	525
18.3. Starting the Database Server	527
18.4. Managing Kernel Resources	531
18.5. Shutting Down the Server	540
18.6. Upgrading a PostgreSQL Cluster	541
18.7. Preventing Server Spoofing	543
18.8. Encryption Options	544
18.9. Secure TCP/IP Connections with SSL	545
18.10. Secure TCP/IP Connections with GSSAPI Encryption	549
18.11. Secure TCP/IP Connections with SSH Tunnels	549
18.12. Registering Event Log on Windows	550
19. Server Configuration	552
19.1. Setting Parameters	552
19.2. File Locations	556
19.3. Connections and Authentication	557
19.4. Resource Consumption	563
19.5. Write Ahead Log	570
19.6. Replication	578
19.7. Query Planning	584
19.8. Error Reporting and Logging	591
19.9. Run-time Statistics	602
19.10. Automatic Vacuuming	603
19.11. Client Connection Defaults	605
19.12. Lock Management	614
19.13. Version and Platform Compatibility	615
19.14. Error Handling	617
19.15. Preset Options	617
19.16. Customized Options	619
19.17. Developer Options	619
19.18. Short Options	622
20. Client Authentication	624
20.1. The <code>pg_hba.conf</code> File	624
20.2. User Name Maps	632
20.3. Authentication Methods	633
20.4. Trust Authentication	633
20.5. Password Authentication	634
20.6. GSSAPI Authentication	635
20.7. SSPI Authentication	636
20.8. Ident Authentication	637
20.9. Peer Authentication	638
20.10. LDAP Authentication	638
20.11. RADIUS Authentication	641
20.12. Certificate Authentication	642
20.13. PAM Authentication	642

20.14. BSD Authentication	643
20.15. Authentication Problems	643
21. Database Roles	644
21.1. Database Roles	644
21.2. Role Attributes	645
21.3. Role Membership	646
21.4. Dropping Roles	648
21.5. Default Roles	648
21.6. Function Security	649
22. Managing Databases	651
22.1. Overview	651
22.2. Creating a Database	651
22.3. Template Databases	652
22.4. Database Configuration	653
22.5. Destroying a Database	654
22.6. Tablespaces	654
23. Localization	657
23.1. Locale Support	657
23.2. Collation Support	659
23.3. Character Set Support	665
24. Routine Database Maintenance Tasks	672
24.1. Routine Vacuuming	672
24.2. Routine Reindexing	680
24.3. Log File Maintenance	680
25. Backup and Restore	682
25.1. SQL Dump	682
25.2. File System Level Backup	685
25.3. Continuous Archiving and Point-in-Time Recovery (PITR)	686
26. High Availability, Load Balancing, and Replication	698
26.1. Comparison of Different Solutions	698
26.2. Log-Shipping Standby Servers	701
26.3. Failover	710
26.4. Alternative Method for Log Shipping	711
26.5. Hot Standby	712
27. Monitoring Database Activity	720
27.1. Standard Unix Tools	720
27.2. The Statistics Collector	721
27.3. Viewing Locks	753
27.4. Progress Reporting	754
27.5. Dynamic Tracing	759
28. Monitoring Disk Usage	769
28.1. Determining Disk Usage	769
28.2. Disk Full Failure	770
29. Reliability and the Write-Ahead Log	771
29.1. Reliability	771
29.2. Write-Ahead Logging (WAL)	773
29.3. Asynchronous Commit	773
29.4. WAL Configuration	774
29.5. WAL Internals	777
30. Logical Replication	779
30.1. Publication	779
30.2. Subscription	780
30.3. Conflicts	781
30.4. Restrictions	781
30.5. Architecture	782
30.6. Monitoring	783
30.7. Security	783
30.8. Configuration Settings	783

30.9. Quick Setup	783
31. Just-in-Time Compilation (JIT)	785
31.1. What Is JIT compilation?	785
31.2. When to JIT?	785
31.3. Configuration	787
31.4. Extensibility	787
32. Regression Tests	788
32.1. Running the Tests	788
32.2. Test Evaluation	792
32.3. Variant Comparison Files	794
32.4. TAP Tests	795
32.5. Test Coverage Examination	795
IV. Client Interfaces	797
33. libpq - C Library	802
33.1. Database Connection Control Functions	802
33.2. Connection Status Functions	816
33.3. Command Execution Functions	822
33.4. Asynchronous Command Processing	838
33.5. Retrieving Query Results Row-by-Row	842
33.6. Canceling Queries in Progress	842
33.7. The Fast-Path Interface	843
33.8. Asynchronous Notification	844
33.9. Functions Associated with the COPY Command	845
33.10. Control Functions	850
33.11. Miscellaneous Functions	851
33.12. Notice Processing	855
33.13. Event System	856
33.14. Environment Variables	862
33.15. The Password File	864
33.16. The Connection Service File	864
33.17. LDAP Lookup of Connection Parameters	865
33.18. SSL Support	866
33.19. Behavior in Threaded Programs	869
33.20. Building libpq Programs	870
33.21. Example Programs	871
34. Large Objects	883
34.1. Introduction	883
34.2. Implementation Features	883
34.3. Client Interfaces	883
34.4. Server-Side Functions	887
34.5. Example Program	889
35. ECPG - Embedded SQL in C	895
35.1. The Concept	895
35.2. Managing Database Connections	895
35.3. Running SQL Commands	898
35.4. Using Host Variables	901
35.5. Dynamic SQL	915
35.6. pgtypes Library	917
35.7. Using Descriptor Areas	931
35.8. Error Handling	944
35.9. Preprocessor Directives	951
35.10. Processing Embedded SQL Programs	953
35.11. Library Functions	954
35.12. Large Objects	955
35.13. C++ Applications	956
35.14. Embedded SQL Commands	960
35.15. Informix Compatibility Mode	984
35.16. Internals	999

36. The Information Schema	1002
36.1. The Schema	1002
36.2. Data Types	1002
36.3. information_schema_catalog_name	1003
36.4. administrable_role_authorizations	1003
36.5. applicable_roles	1003
36.6. attributes	1004
36.7. character_sets	1007
36.8. check_constraint_routine_usage	1008
36.9. check_constraints	1008
36.10. collations	1009
36.11. collation_character_set_applicability	1009
36.12. column_column_usage	1010
36.13. column_domain_usage	1010
36.14. column_options	1010
36.15. column_privileges	1011
36.16. column_udt_usage	1011
36.17. columns	1012
36.18. constraint_column_usage	1016
36.19. constraint_table_usage	1017
36.20. data_type_privileges	1017
36.21. domain_constraints	1018
36.22. domain_udt_usage	1019
36.23. domains	1019
36.24. element_types	1022
36.25. enabled_roles	1024
36.26. foreign_data_wrapper_options	1024
36.27. foreign_data_wrappers	1025

V. Server Programming	1056
37. Extending SQL	1061
37.1. How Extensibility Works	1061
37.2. The PostgreSQL Type System	1061
37.3. User-Defined Functions	1063
37.4. User-Defined Procedures	1063
37.5. Query Language (SQL) Functions	1063
37.6. Function Overloading	1079
37.7. Function Volatility Categories	1080
37.8. Procedural Language Functions	1082
37.9. Internal Functions	1082
37.10. C-Language Functions	1082
37.11. Function Optimization Information	1103
37.12. User-Defined Aggregates	1104
37.13. User-Defined Types	1111
37.14. User-Defined Operators	1115
37.15. Operator Optimization Information	1116
37.16. Interfacing Extensions to Indexes	1120
37.17. Packaging Related Objects into an Extension	1133
37.18. Extension Building Infrastructure	1140
38. Triggers	1144
38.1. Overview of Trigger Behavior	1144
38.2. Visibility of Data Changes	1147
38.3. Writing Trigger Functions in C	1147
38.4. A Complete Trigger Example	1150
39. Event Triggers	1154
39.1. Overview of Event Trigger Behavior	1154
39.2. Event Trigger Firing Matrix	1155
39.3. Writing Event Trigger Functions in C	1160
39.4. A Complete Event Trigger Example	1161
39.5. A Table Rewrite Event Trigger Example	1162
40. The Rule System	1164
40.1. The Query Tree	1164
40.2. Views and the Rule System	1165
40.3. Materialized Views	1172
40.4. Rules on INSERT, UPDATE, and DELETE	1175
40.5. Rules and Privileges	1186
40.6. Rules and Command Status	1188
40.7. Rules Versus Triggers	1188
41. Procedural Languages	1191
41.1. Installing Procedural Languages	1191
42. PL/pgSQL - SQL Procedural Language	1194
42.1. Overview	1194
42.2. Structure of PL/pgSQL	1195
42.3. Declarations	1197
42.4. Expressions	1202
42.5. Basic Statements	1203
42.6. Control Structures	1210
42.7. Cursors	1225
42.8. Transaction Management	1231

42.9. Errors and Messages	1232
42.10. Trigger Functions	1234
42.11. PL/pgSQL under the Hood	1243
42.12. Tips for Developing in PL/pgSQL	1246
42.13. Porting from Oracle PL/SQL	1250
43. PL/Tcl - Tcl Procedural Language	1260
43.1. Overview	1260
43.2. PL/Tcl Functions and Arguments	1260
43.3. Data Values in PL/Tcl	1262
43.4. Global Data in PL/Tcl	1262
43.5. Database Access from PL/Tcl	1263
43.6. Trigger Functions in PL/Tcl	1265
43.7. Event Trigger Functions in PL/Tcl	1267
43.8. Error Handling in PL/Tcl	1267
43.9. Explicit Subtransactions in PL/Tcl	1268
43.10. Transaction Management	1269
43.11. PL/Tcl Configuration	1270
43.12. Tcl Procedure Names	1270
44. PL/Perl - Perl Procedural Language	1271
44.1. PL/Perl Functions and Arguments	1271
44.2. Data Values in PL/Perl	1275
44.3. Built-in Functions	1275
44.4. Global Values in PL/Perl	1280
44.5. Trusted and Untrusted PL/Perl	1281
44.6. PL/Perl Triggers	1282
44.7. PL/Perl Event Triggers	1284
44.8. PL/Perl Under the Hood	1284
45. PL/Python - Python Procedural Language	1287
45.1. Python 2 vs. Python 3	1287
45.2. PL/Python Functions	1288
45.3. Data Values	1289
45.4. Sharing Data	1295
45.5. Anonymous Code Blocks	1295
45.6. Trigger Functions	1295
45.7. Database Access	1296
45.8. Explicit Subtransactions	1300
45.9. Transaction Management	1301
45.10. Utility Functions	1302
45.11. Environment Variables	1303
46. Server Programming Interface	1305
46.1. Interface Functions	1305
46.2. Interface Support Functions	1339
46.3. Memory Management	1348
46.4. Transaction Management	1358
46.5. Visibility of Data Changes	1361
46.6. Examples	1361
47. Background Worker Processes	1365
48. Logical Decoding	1368
48.1. Logical Decoding Examples	1368
48.2. Logical Decoding Concepts	1370
48.3. Streaming Replication Protocol Interface	1372
48.4. Logical Decoding SQL Interface	1372
48.5. System Catalogs Related to Logical Decoding	1372
48.6. Logical Decoding Output Plugins	1372
48.7. Logical Decoding Output Writers	1377
48.8. Synchronous Replication Support for Logical Decoding	1377
49. Replication Progress Tracking	1378

52.	Frontend/Backend Protocol	2139
52.1.	Overview	2139
52.2.	Message Flow	2140
52.3.	SASL Authentication	2153
52.4.	Streaming Replication Protocol	2155
52.5.	Logical Streaming Replication Protocol	2161
52.6.	Message Data Types	2162
52.7.	Message Formats	2163
52.8.	Error and Notice Message Fields	2180
52.9.	Logical Replication Message Formats	2182
52.10.	Summary of Changes since Protocol 2.0	2186
53.	PostgreSQL Coding Conventions	2188
53.1.	Formatting	2188
53.2.	Reporting Errors Within the Server	2188
53.3.	Error Message Style Guide	2191
53.4.	Miscellaneous Coding Conventions	2195
54.	Native Language Support	2198
54.1.	For the Translator	2198
54.2.	For the Programmer	2200
55.	Writing a Procedural Language Handler	2204
56.	Writing a Foreign Data Wrapper	2207
56.1.	Foreign Data Wrapper Functions	2207
56.2.	Foreign Data Wrapper Callback Routines	2207
56.3.	Foreign Data Wrapper Helper Functions	2221
56.4.	Foreign Data Wrapper Query Planning	2222
56.5.	Row Locking in Foreign Data Wrappers	2224
57.	Writing a Table Sampling Method	2226
57.1.	Sampling Method Support Functions	2226

58. Writing a Custom Scan Provider	2229
58.1. Creating Custom Scan Paths	2229
58.2. Creating Custom Scan Plans	2230
58.3. Executing Custom Scans	2231
59. Genetic Query Optimizer	2234
59.1. Query Handling as a Complex Optimization Problem	2234
59.2. Genetic Algorithms	2234
59.3. Genetic Query Optimization (GEO) in PostgreSQL	2235
59.4. Further Reading	2236
60. Table Access Method Interface Definition	2238
61. Index Access Method Interface Definition	2239
61.1. Basic API Structure for Indexes	2239
61.2. Index Access Method Functions	2241
61.3. Index Scanning	2247
61.4. Index Locking Considerations	2248
61.5. Index Uniqueness Checks	2249
61.6. Index Cost Estimation Functions	2250
62. Generic WAL Records	2254
63. B-Tree Indexes	2256
63.1. Introduction	2256
63.2. Behavior of B-Tree Operator Classes	2256
63.3. B-Tree Support Functions	2257
63.4. Implementation	2258
64. GiST Indexes	2259
64.1. Introduction	2259
64.2. Built-in Operator Classes	2259
64.3. Extensibility	2260
64.4. Implementation	2269
64.5. Examples	2269
65. SP-GiST Indexes	2271
65.1. Introduction	2271
65.2. Built-in Operator Classes	2271
65.3. Extensibility	2272
65.4. Implementation	2280
65.5. Examples	2281
66. GIN Indexes	2282
66.1. Introduction	2282
66.2. Built-in Operator Classes	2282
66.3. Extensibility	2282
66.4. Implementation	2285
66.5. GIN Tips and Tricks	2286
66.6. Limitations	2287
66.7. Examples	2287
67. BRIN Indexes	2288
67.1. Introduction	2288
67.2. Built-in Operator Classes	2289
67.3. Extensibility	2290
68. Database Physical Storage	2293
68.1. Database File Layout	2293
68.2. TOAST	2295

List of Figures

9.1. XSLT Stylesheet for Converting SQL/XML Output to HTML	296
59.1. Structured Diagram of a Genetic Algorithm	2235
66.1. GIN Internals	2285
68.1. Page Layout	2301

List of Tables

4.1. Backslash Escape Sequences	35
4.2. Operator Precedence (highest to lowest)	40
5.1. ACL Privilege Abbreviations	75
5.2. Summary of Access Privileges	75
8.1. Data Types	138
8.2. Numeric Types	139
8.3. Monetary Types	144
8.4. Character Types	145
8.5. Special Character Types	147
8.6. Binary Data Types	147
8.7. <code>bytea</code> Literal Escaped Octets	148
8.8. <code>bytea</code> Output Escaped Octets	149
8.9. Date/Time Types	149
8.10. Date Input	151
8.11. Time Input	151
8.12. Time Zone Input	152
8.13. Special Date/Time Inputs	153
8.14. Date/Time Output Styles	154
8.15. Date Order Conventions	154
8.16. ISO 8601 Interval Unit Abbreviations	156
8.17. Interval Input	157
8.18. Interval Output Style Examples	158
8.19. Boolean Data Type	158
8.20. Geometric Types	161
8.21. Network Address Types	164
8.22. <code>cidr</code> Type Input Examples	164
8.23. JSON Primitive Types and Corresponding PostgreSQL Types	173
8.24. <code>jsonpath</code> Variables	180
8.25. <code>jsonpath</code> Accessors	180
8.26. Object Identifier Types	204
8.27. Pseudo-Types	205
9.1. Comparison Operators	207
9.2. Comparison Predicates	208
9.3. Comparison Functions	210
9.4. Mathematical Operators	210
9.5. Mathematical Functions	211
9.6. Random Functions	213
9.7. Trigonometric Functions	213
9.8. Hyperbolic Functions	214
9.9. SQL String Functions and Operators	214
9.10. Other String Functions	216
9.11. Built-in Conversions	223
9.12. SQL Binary String Functions and Operators	228
9.13. Other Binary String Functions	229
9.14. Bit String Operators	231
9.15. Regular Expression Match Operators	234
9.16. Regular Expression Atoms	238
9.17. Regular Expression Quantifiers	239
9.18. Regular Expression Constraints	240
9.19. Regular Expression Character-Entry Escapes	241
9.20. Regular Expression Class-Shorthand Escapes	242
9.21. Regular Expression Constraint Escapes	243
9.22. Regular Expression Back References	243
9.23. ARE Embedded-Option Letters	244
9.24. Formatting Functions	248

9.25. Template Patterns for Date/Time Formatting	249
9.26. Template Pattern Modifiers for Date/Time Formatting	250
9.27. Template Patterns for Numeric Formatting	253
9.28. Template Pattern Modifiers for Numeric Formatting	254
9.29. <code>to_char</code> Examples	254
9.30. Date/Time Operators	255
9.31. Date/Time Functions	256
9.32. <code>AT TIME ZONE</code> Variants	266
9.33. Enum Support Functions	269
9.34. Geometric Operators	270
9.35. Geometric Functions	271
9.36. Geometric Type Conversion Functions	272
9.37. <code>cidr</code> and <code>inet</code> Operators	274
9.38. <code>cidr</code> and <code>inet</code> Functions	274
9.39. <code>macaddr</code> Functions	275
9.40. <code>macaddr8</code> Functions	276
9.41. Text Search Operators	276
9.42. Text Search Functions	277
9.43. Text Search Debugging Functions	281
9.44. <code>json</code> and <code>jsonb</code> Operators	297
9.45. Additional <code>jsonb</code> Operators	298
9.46. JSON Creation Functions	299
9.47. JSON Processing Functions	301
9.48. <code>jsonpath</code> Operators and Methods	310
9.49. <code>jsonpath</code> Filter Expression Elements	311
9.50. Sequence Functions	313
9.51. Array Operators	318
9.52. Array Functions	319
9.53. Range Operators	321
9.54. Range Functions	322
9.55. General-Purpose Aggregate Functions	323
9.56. Aggregate Functions for Statistics	326

Preface

This book is the official documentation of PostgreSQL. It has been written by the PostgreSQL developers and other volunteers in parallel to the development of the PostgreSQL software. It describes all the functionality that the current version of PostgreSQL officially supports.

To make the large amount of information about PostgreSQL manageable, this book has been organized in several parts. Each part is targeted at a different class of users, or at users in different stages of their PostgreSQL experience:

- Part I is an informal introduction for new users.
- Part II documents the SQL query language environment, including data types and functions, as well as user-level performance tuning. Every PostgreSQL user should read this.
- Part III describes the installation and administration of the server. Everyone who runs a PostgreSQL server, be it for private use or for others, should read this part.
- Part IV describes the programming interfaces for PostgreSQL client programs.
- Part V contains information for advanced users about the extensibility capabilities of the server. Topics include user-defined data types and functions.
- Part VI contains reference information about SQL commands, client and server programs. This part supports the other parts with structured information sorted by command or program.
- Part VII contains assorted information that might be of use to PostgreSQL developers.

1. What Is PostgreSQL?

PostgreSQL is an object-relational database management system (ORDBMS) based on POSTGRES, Version 4.2¹, developed at the University of California at Berkeley Computer Science Department. POSTGRES pioneered many concepts that only became available in some commercial database systems much later.

PostgreSQL is an open-source descendant of this original Berkeley code. It supports a large part of the SQL standard and offers many modern features:

- complex queries
- foreign keys
- triggers
- updatable views
- transactional integrity
- multiversion concurrency control

Also, PostgreSQL can be extended by the user in many ways, for example by adding new

- data types
- functions
- operators
- aggregate functions
- index methods
- procedural languages

And because of the liberal license, PostgreSQL can be used, modified, and distributed by anyone free of charge for any purpose, be it private, commercial, or academic.

2. A Brief History of PostgreSQL

¹ <http://db.cs.berkeley.edu/postgres.html>

The object-relational database management system now known as PostgreSQL is derived from the POSTGRES package written at the University of California at Berkeley. With over two decades of development behind it, PostgreSQL is now the most advanced open-source database available anywhere.

2.1. The Berkeley POSTGRES Project

The POSTGRES project, led by Professor Michael Stonebraker, was sponsored by the Defense Advanced Research Projects Agency (DARPA), the Army Research Office (ARO), the National Science Foundation (NSF), and ESL, Inc. The implementation of POSTGRES began in 1986. The initial concepts for the system were presented in [ston86], and the definition of the initial data model appeared in [rowe87]. The design of the rule system at that time was described in [ston87a]. The rationale and architecture of the storage manager were detailed in [ston87b].

POSTGRES has undergone several major releases since then. The first “demoware” system became operational in 1987 and was shown at the 1988 ACM-SIGMOD Conference. Version 1, described in [ston90a], was released to a few external users in June 1989. In response to a critique of the first rule system ([ston89]), the rule system was redesigned ([ston90b]), and Version 2 was released in June 1990 with the new rule system. Version 3 appeared in 1991 and added support for multiple storage managers, an improved query executor, and a rewritten rule system. For the most part, subsequent releases until Postgres95 (see below) focused on portability and reliability.

POSTGRES has been used to implement many different research and production applications. These include: a financial data analysis system, a jet engine performance monitoring package, an asteroid tracking database, a medical information database, and several geographic information systems. POSTGRES has also been used as an educational tool at several universities. Finally, Illustra Information Technologies (later merged into Informix², which is now owned by IBM³) picked up the code and commercialized it. In late 1992, POSTGRES became the primary data manager for the Sequoia 2000 scientific computing project⁴.

The size of the external user community nearly doubled during 1993. It became increasingly obvious that maintenance of the prototype code and support was taking up large amounts of time that should have been devoted to database research. In an effort to reduce this support burden, the Berkeley POSTGRES project officially ended with Version 4.2.

2.2. Postgres95

In 1994, Andrew Yu and Jolly Chen added an SQL language interpreter to POSTGRES. Under a new name, Postgres95 was subsequently released to the web to find its own way in the world as an open-source descendant of the original POSTGRES Berkeley code.

Postgres95 code was completely ANSI C and trimmed in size by 25%. Many internal changes improved performance and maintainability. Postgres95 release 1.0.x ran about 30-50% faster on the Wisconsin Benchmark compared to POSTGRES, Version 4.2. Apart from bug fixes, the following were the major enhancements:

- The query language PostQUEL was replaced with SQL (implemented in the server). (Interface library libpq was named after PostQUEL.) Subqueries were not supported until PostgreSQL (see below), but they could be imitated in Postgres95 with user-defined SQL functions. Aggregate functions were re-implemented. Support for the `GROUP BY` query clause was also added.
- A new program (psql) was provided for interactive SQL queries, which used GNU Readline. This largely superseded the old monitor program.
- A new front-end library, `libpqtc1`, supported Tcl-based clients. A sample shell, `pgtc1sh`, provided new Tcl commands to interface Tcl programs with the Postgres95 server.

⁴ http://meteora.ucsd.edu/s2k/s2k_home.html

- The large-object interface was overhauled. The inversion large objects were the only mechanism for storing large objects. (The inversion file system was removed.)
- The instance-level rule system was removed. Rules were still available as rewrite rules.
- A short tutorial introducing regular SQL features as well as those of Postgres95 was distributed with the source code
- GNU make (instead of BSD make) was used for the build. Also, Postgres95 could be compiled with an unpatched GCC (data alignment of doubles was fixed).

2.3. PostgreSQL

By 1996, it became clear that the name “Postgres95” would not stand the test of time. We chose a new name, PostgreSQL, to reflect the relationship between the original POSTGRES and the more recent versions with SQL capability. At the same time, we set the version numbering to start at 6.0, putting the numbers back into the sequence originally begun by the Berkeley POSTGRES project.

Many people continue to refer to PostgreSQL as “Postgres” (now rarely in all capital letters) because of tradition or because it is easier to pronounce. This usage is widely accepted as a nickname or alias.

The emphasis during development of Postgres95 was on identifying and understanding existing problems in the server code. With PostgreSQL, the emphasis has shifted to augmenting features and capabilities, although work continues in all areas.

Details about what has happened in PostgreSQL since then can be found in Appendix E.

3. Conventions

The following conventions are used in the synopsis of a command: brackets ([and]) indicate optional parts. (In the synopsis of a Tcl command, question marks (?) are used instead, as is usual in Tcl.) Braces ({ and }) and vertical lines (|) indicate that you must choose one alternative. Dots (. . .) mean that the preceding element can be repeated.

Where it enhances the clarity, SQL commands are preceded by the prompt =>, and shell commands are preceded by the prompt \$. Normally, prompts are not shown, though.

An *administrator* is generally a person who is in charge of installing and running the server. A *user* could be anyone who is using, or wants to use, any part of the PostgreSQL system. These terms should not be interpreted too narrowly; this book does not have fixed presumptions about system administration procedures.

4. Further Information

Besides the documentation, that is, this book, there are other resources about PostgreSQL:

Wiki

The PostgreSQL wiki⁵ contains the project's FAQ⁶ (Frequently Asked Questions) list, TODO⁷ list, and detailed information about many more topics.

Web Site

The PostgreSQL web site⁸ carries details on the latest release and other information to make your work or play with PostgreSQL more productive.

⁵ <https://wiki.postgresql.org>

⁶ https://wiki.postgresql.org/wiki/Frequently_Asked_Questions

⁷ <https://wiki.postgresql.org/wiki/ToDo>

⁸ <https://www.postgresql.org>

Mailing Lists

The mailing lists are a good place to have your questions answered, to share experiences with other users, and to contact the developers. Consult the PostgreSQL web site for details.

Yourself!

PostgreSQL is an open-source project. As such, it depends on the user community for ongoing support. As you begin to use PostgreSQL, you will rely on others for help, either through the documentation or through the mailing lists. Consider contributing your knowledge back. Read the mailing lists and answer questions. If you learn something which is not in the documentation, write it up and contribute it. If you add features to the code, contribute them.

5. Bug Reporting Guidelines

When you find a bug in PostgreSQL we want to hear about it. Your bug reports play an important part in making PostgreSQL more reliable because even the utmost care cannot guarantee that every part of PostgreSQL will work on every platform under every circumstance.

The following suggestions are intended to assist you in forming bug reports that can be handled in an effective fashion. No one is required to follow them but doing so tends to be to everyone's advantage.

We cannot promise to fix every bug right away. If the bug is obvious, critical, or affects a lot of users, chances are good that someone will look into it. It could also happen that we tell you to update to a newer version to see if the bug happens there. Or we might decide that the bug cannot be fixed before some major rewrite we might be planning is done. Or perhaps it is simply too hard and there are more important things on the agenda. If you need help immediately, consider obtaining a commercial support contract.

5.1. Identifying Bugs

Before you report a bug, please read and re-read the documentation to verify that you can really do whatever it is you are trying. If it is not clear from the documentation whether you can do something or not, please report that too; it is a bug in the documentation. If it turns out that a program does something different from what the documentation says, that is a bug. That might include, but is not limited to, the following circumstances:

- A program terminates with a fatal signal or an operating system error message that would point to a problem in the program. (A counterexample might be a “disk full” message, since you have to fix that yourself.)
- A program produces the wrong output for any given input.
- A program refuses to accept valid input (as defined in the documentation).
- A program accepts invalid input without a notice or error message. But keep in mind that your idea of invalid input might be our idea of an extension or compatibility with traditional practice.
- PostgreSQL fails to compile, build, or install according to the instructions on supported platforms.

Here “program” refers to any executable, not only the backend process.

Being slow or resource-hogging is not necessarily a bug. Read the documentation or ask on one of the mailing lists for help in tuning your applications. Failing to comply to the SQL standard is not necessarily a bug either, unless compliance for the specific feature is explicitly claimed.

Before you continue, check on the TODO list and in the FAQ to see if your bug is already known. If you cannot decode the information on the TODO list, report your problem. The least we can do is make the TODO list clearer.

5.2. What to Report

The most important thing to remember about bug reporting is to state all the facts and only facts. Do not speculate what you think went wrong, what “it seemed to do”, or which part of the program has a fault. If you are not familiar with the implementation you would probably guess wrong and not help us a bit. And even if you are, educated explanations are a great supplement to but no substitute for facts. If we are going to fix the bug we still have to see it happen for ourselves first. Reporting the bare facts is relatively straightforward (you can probably copy and paste them from the screen) but all too often important details are left out because someone thought it does not matter or the report would be understood anyway.

The following items should be contained in every bug report:

- The exact sequence of steps *from program start-up* necessary to reproduce the problem. This should be self-contained; it is not enough to send in a bare `SELECT` statement without the preceding `CREATE TABLE` and `INSERT` statements, if the output should depend on the data in the tables. We do not have the time to reverse-engineer your database schema, and if we are supposed to make up our own data we would probably miss the problem.

The best format for a test case for SQL-related problems is a file that can be run through the `psql` frontend that shows the problem. (Be sure to not have anything in your `~/ .psqlrc` start-up file.) An easy way to create this file is to use `pg_dump` to dump out the table declarations and data needed to set the scene, then add the problem query. You are encouraged to minimize the size of your example, but this is not absolutely necessary. If the bug is reproducible, we will find it either way.

If your application uses some other client interface, such as PHP, then please try to isolate the offending queries. We will probably not set up a web server to reproduce your problem. In any case remember to provide the exact input files; do not guess that the problem happens for “large files” or “midsize databases”, etc. since this information is too inexact to be of use.

- The output you got. Please do not say that it “didn’t work” or “crashed”. If there is an error message, show it, even if you do not understand it. If the program terminates with an operating system error, say which. If nothing at all happens, say so. Even if the result of your test case is a program crash or otherwise obvious it might not happen on our platform. The easiest thing is to copy the output from the terminal, if possible.

Note

If you are reporting an error message, please obtain the most verbose form of the message. In `psql`, say `\set VERBOSITY verbose` beforehand. If you are extracting the message from the server log, set the run-time parameter `log_error_verbosity` to `verbose` so that all details are logged.

Note

In case of fatal errors, the error message reported by the client might not contain all the information available. Please also look at the log output of the database server. If you do not keep your server’s log output, this would be a good time to start doing so.

- The output you expected is very important to state. If you just write “This command gives me that output.” or “This is not what I expected.”, we might run it ourselves, scan the output, and think it looks OK and is exactly what we expected. We should not have to spend the time to decode the exact semantics behind your commands. Especially refrain from merely saying that “This is not what SQL says/Oracle does.” Digging out the correct behavior from SQL is not a fun undertaking,

nor do we all know how all the other relational databases out there behave. (If your problem is a program crash, you can obviously omit this item.)

- Any command line options and other start-up options, including any relevant environment variables or configuration files that you changed from the default. Again, please provide exact information. If you are using a prepackaged distribution that starts the database server at boot time, you should try to find out how that is done.
- Anything you did at all differently from the installation instructions.
- The PostgreSQL version. You can run the command `SELECT version();` to find out the version of the server you are connected to. Most executable programs also support a `--version` option; at least `postgres --version` and `psql --version` should work. If the function or the options do not exist then your version is more than old enough to warrant an upgrade. If you run a prepackaged version, such as RPMs, say so, including any subversion the package might have. If you are talking about a Git snapshot, mention that, including the commit hash.

If your version is older than 12.1 we will almost certainly tell you to upgrade. There are many bug fixes and improvements in each new release, so it is quite possible that a bug you have encountered in an older release of PostgreSQL has already been fixed. We can only provide limited support for sites using older releases of PostgreSQL; if you require more than we can provide, consider acquiring a commercial support contract.

- Platform information. This includes the kernel name and version, C library, processor, memory information, and so on. In most cases it is sufficient to report the vendor and version, but do not assume everyone knows what exactly “Debian” contains or that everyone runs on `x86_64`. If you have installation problems then information about the toolchain on your machine (compiler, make, and so on) is also necessary.

Do not be afraid if your bug report becomes rather lengthy. That is a fact of life. It is better to report everything the first time than us having to squeeze the facts out of you. On the other hand, if your input files are huge, it is fair to ask first whether somebody is interested in looking into it. Here is an article⁹ that outlines some more tips on reporting bugs.

Do not spend all your time to figure out which changes in the input make the problem go away. This will probably not help solving it. If it turns out that the bug cannot be fixed right away, you will still have time to find and share your work-around. Also, once again, do not waste your time guessing why the bug exists. We will find that out soon enough.

When writing a bug report, please avoid confusing terminology. The software package in total is called “PostgreSQL”, sometimes “Postgres” for short. If you are specifically talking about the backend process, mention that, do not just say “PostgreSQL crashes”. A crash of a single backend process is quite different from crash of the parent “postgres” process; please don't say “the server crashed” when you mean a single backend process went down, nor vice versa. Also, client programs such as the interactive frontend “psql” are completely separate from the backend. Please try to be specific about whether the problem is on the client or server side.

5.3. Where to Report Bugs

In general, send bug reports to the bug report mailing list at `<pgsql-bugs@lists.postgresql.org>`. You are requested to use a descriptive subject for your email message, perhaps parts of the error message.

Another method is to fill in the bug report web-form available at the project's web site¹⁰. Entering a bug report this way causes it to be mailed to the `<pgsql-bugs@lists.postgresql.org>` mailing list.

⁹ <https://www.chiark.greenend.org.uk/~sgtatham/bugs.html>

¹⁰ <https://www.postgresql.org/>

If your bug report has security implications and you'd prefer that it not become immediately visible in public archives, don't send it to `pgsql-bugs`. Security issues can be reported privately to `<security@postgresql.org>`.

Do not send bug reports to any of the user mailing lists, such as `<pgsql-sql@lists.postgresql.org>` or `<pgsql-general@lists.postgresql.org>`. These mailing lists are for answering user questions, and their subscribers normally do not wish to receive bug reports. More importantly, they are unlikely to fix them.

Also, please do *not* send reports to the developers' mailing list `<pgsql-hackers@lists.postgresql.org>`. This list is for discussing the development of PostgreSQL, and it would be nice if we could keep the bug reports separate. We might choose to take up a discussion about your bug report on `pgsql-hackers`, if the problem needs more review.

If you have a problem with the documentation, the best place to report it is the documentation mailing list `<pgsql-docs@lists.postgresql.org>`. Please be specific about what part of the documentation you are unhappy with.

If your bug is a portability problem on a non-supported platform, send mail to `<pgsql-hackers@lists.postgresql.org>`, so we (and you) can work on porting PostgreSQL to your platform.

Note

Due to the unfortunate amount of spam going around, all of the above lists will be moderated unless you are subscribed. That means there will be some delay before the email is delivered. If you wish to subscribe to the lists, please visit <https://lists.postgresql.org/> for instructions.

Part I. Tutorial

Welcome to the PostgreSQL Tutorial. The following few chapters are intended to give a simple introduction to PostgreSQL, relational database concepts, and the SQL language to those who are new to any one of these aspects. We only assume some general knowledge about how to use computers. No particular Unix or programming experience is required. This part is mainly intended to give you some hands-on experience with important aspects of the PostgreSQL system. It makes no attempt to be a complete or thorough treatment of the topics it covers.

After you have worked through this tutorial you might want to move on to reading Part II to gain a more formal knowledge of the SQL language, or Part IV for information about developing applications for PostgreSQL. Those who set up and manage their own server should also read Part III.

Table of Contents

3.5. Window Functions	19
3.6. Inheritance	22
3.7. Conclusion	23

Chapter 1. Getting Started

1.1. Installation

Before you can use PostgreSQL you need to install it, of course. It is possible that PostgreSQL is already installed at your site, either because it was included in your operating system distribution or because the system administrator already installed it. If that is the case, you should obtain information from the operating system documentation or your system administrator about how to access PostgreSQL.

If you are not sure whether PostgreSQL is already available or whether you can use it for your experimentation then you can install it yourself. Doing so is not hard and it can be a good exercise. PostgreSQL can be installed by any unprivileged user; no superuser (root) access is required.

If you are installing PostgreSQL yourself, then refer to Chapter 16 for instructions on installation, and return to this guide when the installation is complete. Be sure to follow closely the section about setting up the appropriate environment variables.

If your site administrator has not set things up in the default way, you might have some more work to do. For example, if the database server machine is a remote machine, you will need to set the `PGHOST` environment variable to the name of the database server machine. The environment variable `PGPORT` might also have to be set. The bottom line is this: if you try to start an application program and it complains that it cannot connect to the database, you should consult your site administrator or, if that is you, the documentation to make sure that your environment is properly set up. If you did not understand the preceding paragraph then read the next section.

1.2. Architectural Fundamentals

Before we proceed, you should understand the basic PostgreSQL system architecture. Understanding how the parts of PostgreSQL interact will make this chapter somewhat clearer.

In database jargon, PostgreSQL uses a client/server model. A PostgreSQL session consists of the following cooperating processes (programs):

- A server process, which manages the database files, accepts connections to the database from client applications, and performs database actions on behalf of the clients. The database server program is called `postgres`.
- The user's client (frontend) application that wants to perform database operations. Client applications can be very diverse in nature: a client could be a text-oriented tool, a graphical application, a web server that accesses the database to display web pages, or a specialized database maintenance tool. Some client applications are supplied with the PostgreSQL distribution; most are developed by users.

As is typical of client/server applications, the client and the server can be on different hosts. In that case they communicate over a TCP/IP network connection. You should keep this in mind, because the files that can be accessed on a client machine might not be accessible (or might only be accessible using a different file name) on the database server machine.

The PostgreSQL server can handle multiple concurrent connections from clients. To achieve this it starts (“forks”) a new process for each connection. From that point on, the client and the new server process communicate without intervention by the original `postgres` process. Thus, the master server process is always running, waiting for client connections, whereas client and associated server processes come and go. (All of this is of course invisible to the user. We only mention it here for completeness.)

1.3. Creating a Database

The first test to see whether you can access the database server is to try to create a database. A running PostgreSQL server can manage many databases. Typically, a separate database is used for each project or for each user.

Possibly, your site administrator has already created a database for your use. In that case you can omit this step and skip ahead to the next section.

To create a new database, in this example named `mydb`, you use the following command:

```
$ createdb mydb
```

If this produces no response then this step was successful and you can skip over the remainder of this section.

If you see a message similar to:

```
createdb: command not found
```

then PostgreSQL was not installed properly. Either it was not installed at all or your shell's search path was not set to include it. Try calling the command with an absolute path instead:

```
$ /usr/local/pgsql/bin/createdb mydb
```

The path at your site might be different. Contact your site administrator or check the installation instructions to correct the situation.

Another response could be this:

```
createdb: could not connect to database postgres: could not connect
to server: No such file or directory
    Is the server running locally and accepting
connections on Unix domain socket "/tmp/.s.PGSQL.5432"?
```

This means that the server was not started, or it was not started where `createdb` expected it. Again, check the installation instructions or consult the administrator.

Another response could be this:

```
createdb: could not connect to database postgres: FATAL:  role
"joe" does not exist
```

where your own login name is mentioned. This will happen if the administrator has not created a PostgreSQL user account for you. (PostgreSQL user accounts are distinct from operating system user accounts.) If you are the administrator, see Chapter 21 for help creating accounts. You will need to become the operating system user under which PostgreSQL was installed (usually `postgres`) to create the first user account. It could also be that you were assigned a PostgreSQL user name that is different from your operating system user name; in that case you need to use the `-U` switch or set the `PGUSER` environment variable to specify your PostgreSQL user name.

If you have a user account but it does not have the privileges required to create a database, you will see the following:

```
createdb: database creation failed: ERROR:  permission denied to
create database
```

Not every user has authorization to create new databases. If PostgreSQL refuses to create databases for you then the site administrator needs to grant you permission to create databases. Consult your site administrator if this occurs. If you installed PostgreSQL yourself then you should log in for the purposes of this tutorial under the user account that you started the server as.¹

You can also create databases with other names. PostgreSQL allows you to create any number of databases at a given site. Database names must have an alphabetic first character and are limited to 63 bytes in length. A convenient choice is to create a database with the same name as your current user name. Many tools assume that database name as the default, so it can save you some typing. To create that database, simply type:

```
$ createdb
```

If you do not want to use your database anymore you can remove it. For example, if you are the owner (creator) of the database `mydb`, you can destroy it using the following command:

```
$ dropdb mydb
```

(For this command, the database name does not default to the user account name. You always need to specify it.) This action physically removes all files associated with the database and cannot be undone, so this should only be done with a great deal of forethought.

More about `createdb` and `dropdb` can be found in `createdb` and `dropdb` respectively.

1.4. Accessing a Database

Once you have created a database, you can access it by:

- Running the PostgreSQL interactive terminal program, called *psql*, which allows you to interactively enter, edit, and execute SQL commands.
- Using an existing graphical frontend tool like pgAdmin or an office suite with ODBC or JDBC support to create and manipulate a database. These possibilities are not covered in this tutorial.
- Writing a custom application, using one of the several available language bindings. These possibilities are discussed further in Part IV.

You probably want to start up `psql` to try the examples in this tutorial. It can be activated for the `mydb` database by typing the command:

```
$ psql mydb
```

If you do not supply the database name then it will default to your user account name. You already discovered this scheme in the previous section using `createdb`.

In `psql`, you will be greeted with the following message:

```
psql (12.1)
Type "help" for help.

mydb=>
```

The last line could also be:

¹ As an explanation for why this works: PostgreSQL user names are separate from operating system user accounts. When you connect to a database, you can choose what PostgreSQL user name to connect as; if you don't, it will default to the same name as your current operating system account. As it happens, there will always be a PostgreSQL user account that has the same name as the operating system user that started the server, and it also happens that that user always has permission to create databases. Instead of logging in as that user you can also specify the `-U` option everywhere to select a PostgreSQL user name to connect as.

mydb=#

That would mean you are a database superuser, which is most likely the case if you installed the PostgreSQL instance yourself. Being a superuser means that you are not subject to access controls. For the purposes of this tutorial that is not important.

If you encounter problems starting `psql` then go back to the previous section. The diagnostics of `createdb` and `psql` are similar, and if the former worked the latter should work as well.

The last line printed out by `psql` is the prompt, and it indicates that `psql` is listening to you and that you can type SQL queries into a work space maintained by `psql`. Try out these commands:

```
mydb=> SELECT version();
                version
-----
 PostgreSQL 12.1 on x86_64-pc-linux-gnu, compiled by gcc (Debian
 4.9.2-10) 4.9.2, 64-bit
(1 row)
```

```
mydb=> SELECT current_date;
       date
-----
 2016-01-07
(1 row)
```

```
mydb=> SELECT 2 + 2;
 ?column?
-----
        4
(1 row)
```

The `psql` program has a number of internal commands that are not SQL commands. They begin with the backslash character, “\”. For example, you can get help on the syntax of various PostgreSQL SQL commands by typing:

```
mydb=> \h
```

To get out of `psql`, type:

```
mydb=> \q
```

and `psql` will quit and return you to your command shell. (For more internal commands, type `\?` at the `psql` prompt.) The full capabilities of `psql` are documented in `psql`. In this tutorial we will not use these features explicitly, but you can use them yourself when it is helpful.

Chapter 2. The SQL Language

2.1. Introduction

This chapter provides an overview of how to use SQL to perform simple operations. This tutorial is only intended to give you an introduction and is in no way a complete tutorial on SQL. Numerous books have been written on SQL, including [melt93] and [date97]. You should be aware that some PostgreSQL language features are extensions to the standard.

In the examples that follow, we assume that you have created a database named `mydb`, as described in the previous chapter, and have been able to start `psql`.

Examples in this manual can also be found in the PostgreSQL source distribution in the directory `src/tutorial/`. (Binary distributions of PostgreSQL might not compile these files.) To use those files, first change to that directory and run `make`:

```
$ cd ../src/tutorial
$ make
```

This creates the scripts and compiles the C files containing user-defined functions and types. Then, to start the tutorial, do the following:

```
$ cd ../tutorial
$ psql -s mydb
```

```
...
```

```
mydb=> \i basics.sql
```

The `\i` command reads in commands from the specified file. `psql`'s `-s` option puts you in single step mode which pauses before sending each statement to the server. The commands used in this section are in the file `basics.sql`.

2.2. Concepts

PostgreSQL is a *relational database management system* (RDBMS). That means it is a system for managing data stored in *relations*. Relation is essentially a mathematical term for *table*. The notion of storing data in tables is so commonplace today that it might seem inherently obvious, but there are a number of other ways of organizing databases. Files and directories on Unix-like operating systems form an example of a hierarchical database. A more modern development is the object-oriented database.

Each table is a named collection of *rows*. Each row of a given table has the same set of named *columns*, and each column is of a specific data type. Whereas columns have a fixed order in each row, it is important to remember that SQL does not guarantee the order of the rows within the table in any way (although they can be explicitly sorted for display).

Tables are grouped into databases, and a collection of databases managed by a single PostgreSQL server instance constitutes a database *cluster*.

2.3. Creating a New Table

You can create a new table by specifying the table name, along with all column names and their types:

```
CREATE TABLE weather (  
    city          varchar(80),  
    temp_lo      int,          -- low temperature  
    temp_hi      int,          -- high temperature  
    prcp         real,        -- precipitation  
    date         date  
);
```

You can enter this into `psql` with the line breaks. `psql` will recognize that the command is not terminated until the semicolon.

White space (i.e., spaces, tabs, and newlines) can be used freely in SQL commands. That means you can type the command aligned differently than above, or even all on one line. Two dashes (“--”) introduce comments. Whatever follows them is ignored up to the end of the line. SQL is case insensitive about key words and identifiers, except when identifiers are double-quoted to preserve the case (not done above).

`varchar(80)` specifies a data type that can store arbitrary character strings up to 80 characters in length. `int` is the normal integer type. `real` is a type for storing single precision floating-point numbers. `date` should be self-explanatory. (Yes, the column of type `date` is also named `date`. This might be convenient or confusing — you choose.)

PostgreSQL supports the standard SQL types `int`, `smallint`, `real`, `double precision`, `char(N)`, `varchar(N)`, `date`, `time`, `timestamp`, and `interval`, as well as other types of general utility and a rich set of geometric types. PostgreSQL can be customized with an arbitrary number of user-defined data types. Consequently, type names are not key words in the syntax, except where required to support special cases in the SQL standard.

The second example will store cities and their associated geographical location:

```
CREATE TABLE cities (  
    name          varchar(80),  
    location      point  
);
```

The `point` type is an example of a PostgreSQL-specific data type.

Finally, it should be mentioned that if you don't need a table any longer or want to recreate it differently you can remove it using the following command:

```
DROP TABLE tablename;
```

2.4. Populating a Table With Rows

The `INSERT` statement is used to populate a table with rows:

```
INSERT INTO weather VALUES ('San Francisco', 46, 50, 0.25,  
    '1994-11-27');
```

Note that all data types use rather obvious input formats. Constants that are not simple numeric values usually must be surrounded by single quotes (`'`), as in the example. The `date` type is actually quite flexible in what it accepts, but for this tutorial we will stick to the unambiguous format shown here.

The `point` type requires a coordinate pair as input, as shown here:

```
INSERT INTO cities VALUES ('San Francisco', '(-194.0, 53.0)');
```

The syntax used so far requires you to remember the order of the columns. An alternative syntax allows you to list the columns explicitly:

```
INSERT INTO weather (city, temp_lo, temp_hi, prcp, date)
VALUES ('San Francisco', 43, 57, 0.0, '1994-11-29');
```

You can list the columns in a different order if you wish or even omit some columns, e.g., if the precipitation is unknown:

```
INSERT INTO weather (date, city, temp_hi, temp_lo)
VALUES ('1994-11-29', 'Hayward', 54, 37);
```

Many developers consider explicitly listing the columns better style than relying on the order implicitly.

Please enter all the commands shown above so you have some data to work with in the following sections.

You could also have used `COPY` to load large amounts of data from flat-text files. This is usually faster because the `COPY` command is optimized for this application while allowing less flexibility than `INSERT`. An example would be:

```
COPY weather FROM '/home/user/weather.txt';
```

where the file name for the source file must be available on the machine running the backend process, not the client, since the backend process reads the file directly. You can read more about the `COPY` command in `COPY`.

2.5. Querying a Table

To retrieve data from a table, the table is *queried*. An SQL `SELECT` statement is used to do this. The statement is divided into a select list (the part that lists the columns to be returned), a table list (the part that lists the tables from which to retrieve the data), and an optional qualification (the part that specifies any restrictions). For example, to retrieve all the rows of table `weather`, type:

```
SELECT * FROM weather;
```

Here `*` is a shorthand for “all columns”.¹ So the same result would be had with:

```
SELECT city, temp_lo, temp_hi, prcp, date FROM weather;
```

The output should be:

city	temp_lo	temp_hi	prcp	date
San Francisco	46	50	0.25	1994-11-27
San Francisco	43	57	0	1994-11-29
Hayward	37	54		1994-11-29

(3 rows)

¹ While `SELECT *` is useful for off-the-cuff queries, it is widely considered bad style in production code, since adding a column to the table would change the results.

You can write expressions, not just simple column references, in the select list. For example, you can do:

```
SELECT city, (temp_hi+temp_lo)/2 AS temp_avg, date FROM weather;
```

This should give:

city	temp_avg	date
San Francisco	48	1994-11-27
San Francisco	50	1994-11-29
Hayward	45	1994-11-29

(3 rows)

Notice how the AS clause is used to relabel the output column. (The AS clause is optional.)

A query can be “qualified” by adding a WHERE clause that specifies which rows are wanted. The WHERE clause contains a Boolean (truth value) expression, and only rows for which the Boolean expression is true are returned. The usual Boolean operators (AND, OR, and NOT) are allowed in the qualification. For example, the following retrieves the weather of San Francisco on rainy days:

```
SELECT * FROM weather
  WHERE city = 'San Francisco' AND prcp > 0.0;
```

Result:

city	temp_lo	temp_hi	prcp	date
San Francisco	46	50	0.25	1994-11-27

(1 row)

You can request that the results of a query be returned in sorted order:

```
SELECT * FROM weather
  ORDER BY city;
```

city	temp_lo	temp_hi	prcp	date
Hayward	37	54		1994-11-29
San Francisco	43	57	0	1994-11-29
San Francisco	46	50	0.25	1994-11-27

In this example, the sort order isn't fully specified, and so you might get the San Francisco rows in either order. But you'd always get the results shown above if you do:

```
SELECT * FROM weather
  ORDER BY city, temp_lo;
```

You can request that duplicate rows be removed from the result of a query:

```
SELECT DISTINCT city
  FROM weather;
```

```

      city
-----
 Hayward
 San Francisco
(2 rows)

```

Here again, the result row ordering might vary. You can ensure consistent results by using `DISTINCT` and `ORDER BY` together:²

```

SELECT DISTINCT city
   FROM weather
  ORDER BY city;

```

2.6. Joins Between Tables

Thus far, our queries have only accessed one table at a time. Queries can access multiple tables at once, or access the same table in such a way that multiple rows of the table are being processed at the same time. A query that accesses multiple rows of the same or different tables at one time is called a *join* query. As an example, say you wish to list all the weather records together with the location of the associated city. To do that, we need to compare the `city` column of each row of the weather table with the `name` column of all rows in the `cities` table, and select the pairs of rows where these values match.

Note

This is only a conceptual model. The join is usually performed in a more efficient manner than actually comparing each possible pair of rows, but this is invisible to the user.

This would be accomplished by the following query:

```

SELECT *
   FROM weather, cities
  WHERE city = name;

```

```

      city      | temp_lo | temp_hi | prcp | date       | name
-----+-----+-----+-----+-----+-----
 | location
-----+-----+-----+-----+-----+-----
+-----+-----+-----+-----+-----+-----
 San Francisco |      46 |      50 | 0.25 | 1994-11-27 | San
 Francisco | (-194,53)
 San Francisco |      43 |      57 | 0    | 1994-11-29 | San
 Francisco | (-194,53)
(2 rows)

```

Observe two things about the result set:

- There is no result row for the city of Hayward. This is because there is no matching entry in the `cities` table for Hayward, so the join ignores the unmatched rows in the weather table. We will see shortly how this can be fixed.

² In some database systems, including older versions of PostgreSQL, the implementation of `DISTINCT` automatically orders the rows and so `ORDER BY` is unnecessary. But this is not required by the SQL standard, and current PostgreSQL does not guarantee that `DISTINCT` causes the rows to be ordered.

- There are two columns containing the city name. This is correct because the lists of columns from the `weather` and `cities` tables are concatenated. In practice this is undesirable, though, so you will probably want to list the output columns explicitly rather than using `*`:

```
SELECT city, temp_lo, temp_hi, prcp, date, location
       FROM weather, cities
       WHERE city = name;
```

Exercise: Attempt to determine the semantics of this query when the `WHERE` clause is omitted.

Since the columns all had different names, the parser automatically found which table they belong to. If there were duplicate column names in the two tables you'd need to *qualify* the column names to show which one you meant, as in:

```
SELECT weather.city, weather.temp_lo, weather.temp_hi,
       weather.prcp, weather.date, cities.location
       FROM weather, cities
       WHERE cities.name = weather.city;
```

It is widely considered good style to qualify all column names in a join query, so that the query won't fail if a duplicate column name is later added to one of the tables.

Join queries of the kind seen thus far can also be written in this alternative form:

```
SELECT *
       FROM weather INNER JOIN cities ON (weather.city = cities.name);
```

This syntax is not as commonly used as the one above, but we show it here to help you understand the following topics.

Now we will figure out how we can get the Hayward records back in. What we want the query to do is to scan the `weather` table and for each row to find the matching `cities` row(s). If no matching row is found we want some “empty values” to be substituted for the `cities` table's columns. This kind of query is called an *outer join*. (The joins we have seen so far are inner joins.) The command looks like this:

```
SELECT *
       FROM weather LEFT OUTER JOIN cities ON (weather.city =
       cities.name);
```

city location	temp_lo	temp_hi	prcp	date	name
Hayward	37	54		1994-11-29	
San Francisco (-194,53)	46	50	0.25	1994-11-27	San
San Francisco (-194,53)	43	57	0	1994-11-29	San

(3 rows)

This query is called a *left outer join* because the table mentioned on the left of the join operator will have each of its rows in the output at least once, whereas the table on the right will only have those rows output that match some row of the left table. When outputting a left-table row for which there is no right-table match, empty (null) values are substituted for the right-table columns.

Exercise: There are also right outer joins and full outer joins. Try to find out what those do.

We can also join a table against itself. This is called a *self join*. As an example, suppose we wish to find all the weather records that are in the temperature range of other weather records. So we need to compare the `temp_lo` and `temp_hi` columns of each `weather` row to the `temp_lo` and `temp_hi` columns of all other `weather` rows. We can do this with the following query:

```
SELECT W1.city, W1.temp_lo AS low, W1.temp_hi AS high,
       W2.city, W2.temp_lo AS low, W2.temp_hi AS high
FROM weather W1, weather W2
WHERE W1.temp_lo < W2.temp_lo
AND W1.temp_hi > W2.temp_hi;
```

city	low	high	city	low	high
San Francisco	43	57	San Francisco	46	50
Hayward	37	54	San Francisco	46	50

(2 rows)

Here we have relabeled the `weather` table as `W1` and `W2` to be able to distinguish the left and right side of the join. You can also use these kinds of aliases in other queries to save some typing, e.g.:

```
SELECT *
FROM weather w, cities c
WHERE w.city = c.name;
```

You will encounter this style of abbreviating quite frequently.

2.7. Aggregate Functions

Like most other relational database products, PostgreSQL supports *aggregate functions*. An aggregate function computes a single result from multiple input rows. For example, there are aggregates to compute the `count`, `sum`, `avg` (average), `max` (maximum) and `min` (minimum) over a set of rows.

As an example, we can find the highest low-temperature reading anywhere with:

```
SELECT max(temp_lo) FROM weather;
```

```
max
-----
 46
(1 row)
```

If we wanted to know what city (or cities) that reading occurred in, we might try:

```
SELECT city FROM weather WHERE temp_lo = max(temp_lo);      WRONG
```

but this will not work since the aggregate `max` cannot be used in the `WHERE` clause. (This restriction exists because the `WHERE` clause determines which rows will be included in the aggregate calculation; so obviously it has to be evaluated before aggregate functions are computed.) However, as is often the case the query can be restated to accomplish the desired result, here by using a *subquery*:

```
SELECT city FROM weather
```

```
WHERE temp_lo = (SELECT max(temp_lo) FROM weather);
```

```

      city
-----
San Francisco
(1 row)

```

This is OK because the subquery is an independent computation that computes its own aggregate separately from what is happening in the outer query.

Aggregates are also very useful in combination with `GROUP BY` clauses. For example, we can get the maximum low temperature observed in each city with:

```
SELECT city, max(temp_lo)
FROM weather
GROUP BY city;
```

```

      city      | max
-----+-----
 Hayward       |   37
San Francisco  |   46
(2 rows)

```

which gives us one output row per city. Each aggregate result is computed over the table rows matching that city. We can filter these grouped rows using `HAVING`:

```
SELECT city, max(temp_lo)
FROM weather
GROUP BY city
HAVING max(temp_lo) < 40;
```

```

      city      | max
-----+-----
 Hayward       |   37
(1 row)

```

which gives us the same results for only the cities that have all `temp_lo` values below 40. Finally, if we only care about cities whose names begin with “S”, we might do:

```
SELECT city, max(temp_lo)
FROM weather
WHERE city LIKE 'S%'           -- I
GROUP BY city
HAVING max(temp_lo) < 40;
```

I The `LIKE` operator does pattern matching and is explained in Section 9.7.

It is important to understand the interaction between aggregates and SQL's `WHERE` and `HAVING` clauses. The fundamental difference between `WHERE` and `HAVING` is this: `WHERE` selects input rows before groups and aggregates are computed (thus, it controls which rows go into the aggregate computation), whereas `HAVING` selects group rows after groups and aggregates are computed. Thus, the `WHERE` clause must not contain aggregate functions; it makes no sense to try to use an aggregate to determine which rows will be inputs to the aggregates. On the other hand, the `HAVING` clause always contains aggregate functions. (Strictly speaking, you are allowed to write a `HAVING` clause that doesn't use

aggregates, but it's seldom useful. The same condition could be used more efficiently at the WHERE stage.)

In the previous example, we can apply the city name restriction in WHERE, since it needs no aggregate. This is more efficient than adding the restriction to HAVING, because we avoid doing the grouping and aggregate calculations for all rows that fail the WHERE check.

2.8. Updates

You can update existing rows using the UPDATE command. Suppose you discover the temperature readings are all off by 2 degrees after November 28. You can correct the data as follows:

```
UPDATE weather
  SET temp_hi = temp_hi - 2, temp_lo = temp_lo - 2
  WHERE date > '1994-11-28';
```

Look at the new state of the data:

```
SELECT * FROM weather;
```

city	temp_lo	temp_hi	prcp	date
San Francisco	46	50	0.25	1994-11-27
San Francisco	41	55	0	1994-11-29
Hayward	35	52		1994-11-29

(3 rows)

2.9. Deletions

Rows can be removed from a table using the DELETE command. Suppose you are no longer interested in the weather of Hayward. Then you can do the following to delete those rows from the table:

```
DELETE FROM weather WHERE city = 'Hayward';
```

All weather records belonging to Hayward are removed.

```
SELECT * FROM weather;
```

city	temp_lo	temp_hi	prcp	date
San Francisco	46	50	0.25	1994-11-27
San Francisco	41	55	0	1994-11-29

(2 rows)

One should be wary of statements of the form

```
DELETE FROM tablename;
```

Without a qualification, DELETE will remove *all* rows from the given table, leaving it empty. The system will not request confirmation before doing this!

Chapter 3. Advanced Features

3.1. Introduction

In the previous chapter we have covered the basics of using SQL to store and access your data in PostgreSQL. We will now discuss some more advanced features of SQL that simplify management and prevent loss or corruption of your data. Finally, we will look at some PostgreSQL extensions.

This chapter will on occasion refer to examples found in Chapter 2 to change or improve them, so it will be useful to have read that chapter. Some examples from this chapter can also be found in `advanced.sql` in the tutorial directory. This file also contains some sample data to load, which is not repeated here. (Refer to Section 2.1 for how to use the file.)

3.2. Views

Refer back to the queries in Section 2.6. Suppose the combined listing of weather records and city location is of particular interest to your application, but you do not want to type the query each time you need it. You can create a *view* over the query, which gives a name to the query that you can refer to like an ordinary table:

```
CREATE VIEW myview AS
  SELECT city, temp_lo, temp_hi, prcp, date, location
     FROM weather, cities
     WHERE city = name;
```

```
SELECT * FROM myview;
```

Making liberal use of views is a key aspect of good SQL database design. Views allow you to encapsulate the details of the structure of your tables, which might change as your application evolves, behind consistent interfaces.

Views can be used in almost any place a real table can be used. Building views upon other views is not uncommon.

3.3. Foreign Keys

Recall the `weather` and `cities` tables from Chapter 2. Consider the following problem: You want to make sure that no one can insert rows in the `weather` table that do not have a matching entry in the `cities` table. This is called maintaining the *referential integrity* of your data. In simplistic database systems this would be implemented (if at all) by first looking at the `cities` table to check if a matching record exists, and then inserting or rejecting the new `weather` records. This approach has a number of problems and is very inconvenient, so PostgreSQL can do this for you.

The new declaration of the tables would look like this:

```
CREATE TABLE cities (
  city      varchar(80) primary key,
  location  point
);

CREATE TABLE weather (
  city      varchar(80) references cities(city),
  temp_lo  int,
```

```
        temp_hi    int,  
        prcp      real,  
        date      date  
    );
```

Now try inserting an invalid record:

```
INSERT INTO weather VALUES ('Berkeley', 45, 53, 0.0, '1994-11-28');
```

```
ERROR: insert or update on table "weather" violates foreign key  
constraint "weather_city_fkey"  
DETAIL: Key (city)=(Berkeley) is not present in table "cities".
```

The behavior of foreign keys can be finely tuned to your application. We will not go beyond this simple example in this tutorial, but just refer you to Chapter 5 for more information. Making correct use of foreign keys will definitely improve the quality of your database applications, so you are strongly encouraged to learn about them.

3.4. Transactions

Transactions are a fundamental concept of all database systems. The essential point of a transaction is that it bundles multiple steps into a single, all-or-nothing operation. The intermediate states between the steps are not visible to other concurrent transactions, and if some failure occurs that prevents the transaction from completing, then none of the steps affect the database at all.

For example, consider a bank database that contains balances for various customer accounts, as well as total deposit balances for branches. Suppose that we want to record a payment of \$100.00 from Alice's account to Bob's account. Simplifying outrageously, the SQL commands for this might look like:

```
UPDATE accounts SET balance = balance - 100.00  
    WHERE name = 'Alice';  
UPDATE branches SET balance = balance - 100.00  
    WHERE name = (SELECT branch_name FROM accounts WHERE name =  
    'Alice');  
UPDATE accounts SET balance = balance + 100.00  
    WHERE name = 'Bob';  
UPDATE branches SET balance = balance + 100.00  
    WHERE name = (SELECT branch_name FROM accounts WHERE name =  
    'Bob');
```

The details of these commands are not important here; the important point is that there are several separate updates involved to accomplish this rather simple operation. Our bank's officers will want to be assured that either all these updates happen, or none of them happen. It would certainly not do for a system failure to result in Bob receiving \$100.00 that was not debited from Alice. Nor would Alice long remain a happy customer if she was debited without Bob being credited. We need a guarantee that if something goes wrong partway through the operation, none of the steps executed so far will take effect. Grouping the updates into a *transaction* gives us this guarantee. A transaction is said to be *atomic*: from the point of view of other transactions, it either happens completely or not at all.

We also want a guarantee that once a transaction is completed and acknowledged by the database system, it has indeed been permanently recorded and won't be lost even if a crash ensues shortly thereafter. For example, if we are recording a cash withdrawal by Bob, we do not want any chance that the debit to his account will disappear in a crash just after he walks out the bank door. A transactional database guarantees that all the updates made by a transaction are logged in permanent storage (i.e., on disk) before the transaction is reported complete.

Another important property of transactional databases is closely related to the notion of atomic updates: when multiple transactions are running concurrently, each one should not be able to see the incomplete changes made by others. For example, if one transaction is busy totalling all the branch balances, it would not do for it to include the debit from Alice's branch but not the credit to Bob's branch, nor vice versa. So transactions must be all-or-nothing not only in terms of their permanent effect on the database, but also in terms of their visibility as they happen. The updates made so far by an open transaction are invisible to other transactions until the transaction completes, whereupon all the updates become visible simultaneously.

In PostgreSQL, a transaction is set up by surrounding the SQL commands of the transaction with `BEGIN` and `COMMIT` commands. So our banking transaction would actually look like:

```
BEGIN;  
UPDATE accounts SET balance = balance - 100.00  
    WHERE name = 'Alice';  
-- etc etc  
COMMIT;
```

If, partway through the transaction, we decide we do not want to commit (perhaps we just noticed that Alice's balance went negative), we can issue the command `ROLLBACK` instead of `COMMIT`, and all our updates so far will be canceled.

PostgreSQL actually treats every SQL statement as being executed within a transaction. If you do not issue a `BEGIN` command, then each individual statement has an implicit `BEGIN` and (if successful) `COMMIT` wrapped around it. A group of statements surrounded by `BEGIN` and `COMMIT` is sometimes called a *transaction block*.

Note

Some client libraries issue `BEGIN` and `COMMIT` commands automatically, so that you might get the effect of transaction blocks without asking. Check the documentation for the interface you are using.

It's possible to control the statements in a transaction in a more granular fashion through the use of *savepoints*. Savepoints allow you to selectively discard parts of the transaction, while committing the rest. After defining a savepoint with `SAVEPOINT`, you can if needed roll back to the savepoint with `ROLLBACK TO`. All the transaction's database changes between defining the savepoint and rolling back to it are discarded, but changes earlier than the savepoint are kept.

After rolling back to a savepoint, it continues to be defined, so you can roll back to it several times. Conversely, if you are sure you won't need to roll back to a particular savepoint again, it can be released, so the system can free some resources. Keep in mind that either releasing or rolling back to a savepoint will automatically release all savepoints that were defined after it.

All this is happening within the transaction block, so none of it is visible to other database sessions. When and if you commit the transaction block, the committed actions become visible as a unit to other sessions, while the rolled-back actions never become visible at all.

Remembering the bank database, suppose we debit \$100.00 from Alice's account, and credit Bob's account, only to find later that we should have credited Wally's account. We could do it using savepoints like this:

```
BEGIN;  
UPDATE accounts SET balance = balance - 100.00  
    WHERE name = 'Alice';  
SAVEPOINT my_savepoint;
```

```

UPDATE accounts SET balance = balance + 100.00
  WHERE name = 'Bob';
-- oops ... forget that and use Wally's account
ROLLBACK TO my_savepoint;
UPDATE accounts SET balance = balance + 100.00
  WHERE name = 'Wally';
COMMIT;

```

This example is, of course, oversimplified, but there's a lot of control possible in a transaction block through the use of savepoints. Moreover, `ROLLBACK TO` is the only way to regain control of a transaction block that was put in aborted state by the system due to an error, short of rolling it back completely and starting again.

3.5. Window Functions

A *window function* performs a calculation across a set of table rows that are somehow related to the current row. This is comparable to the type of calculation that can be done with an aggregate function. However, window functions do not cause rows to become grouped into a single output row like non-window aggregate calls would. Instead, the rows retain their separate identities. Behind the scenes, the window function is able to access more than just the current row of the query result.

Here is an example that shows how to compare each employee's salary with the average salary in his or her department:

```

SELECT depname, empno, salary, avg(salary) OVER (PARTITION BY
  depname) FROM empsalary;

```

depname	empno	salary	avg
develop	11	5200	5020.000000000000000000
develop	7	4200	5020.000000000000000000
develop	9	4500	5020.000000000000000000
develop	8	6000	5020.000000000000000000
develop	10	5200	5020.000000000000000000
personnel	5	3500	3700.000000000000000000
personnel	2	3900	3700.000000000000000000
sales	3	4800	4866.666666666666666667
sales	1	5000	4866.666666666666666667
sales	4	4800	4866.666666666666666667

(10 rows)

The first three output columns come directly from the table `empsalary`, and there is one output row for each row in the table. The fourth column represents an average taken across all the table rows that have the same `depname` value as the current row. (This actually is the same function as the non-window `avg` aggregate, but the `OVER` clause causes it to be treated as a window function and computed across the window frame.)

A window function call always contains an `OVER` clause directly following the window function's name and argument(s). This is what syntactically distinguishes it from a normal function or non-window aggregate. The `OVER` clause determines exactly how the rows of the query are split up for processing by the window function. The `PARTITION BY` clause within `OVER` divides the rows into groups, or partitions, that share the same values of the `PARTITION BY` expression(s). For each row, the window function is computed across the rows that fall into the same partition as the current row.

You can also control the order in which rows are processed by window functions using `ORDER BY` within `OVER`. (The window `ORDER BY` does not even have to match the order in which the rows are output.) Here is an example:

```
SELECT depname, empno, salary,
       rank() OVER (PARTITION BY depname ORDER BY salary DESC)
FROM empsalary;
```

depname	empno	salary	rank
develop	8	6000	1
develop	10	5200	2
develop	11	5200	2
develop	9	4500	4
develop	7	4200	5
personnel	2	3900	1
personnel	5	3500	2
sales	1	5000	1
sales	4	4800	2
sales	3	4800	2

(10 rows)

As shown here, the `rank` function produces a numerical rank for each distinct `ORDER BY` value in the current row's partition, using the order defined by the `ORDER BY` clause. `rank` needs no explicit parameter, because its behavior is entirely determined by the `OVER` clause.

The rows considered by a window function are those of the “virtual table” produced by the query's `FROM` clause as filtered by its `WHERE`, `GROUP BY`, and `HAVING` clauses if any. For example, a row removed because it does not meet the `WHERE` condition is not seen by any window function. A query can contain multiple window functions that slice up the data in different ways using different `OVER` clauses, but they all act on the same collection of rows defined by this virtual table.

We already saw that `ORDER BY` can be omitted if the ordering of rows is not important. It is also possible to omit `PARTITION BY`, in which case there is a single partition containing all rows.

There is another important concept associated with window functions: for each row, there is a set of rows within its partition called its *window frame*. Some window functions act only on the rows of the window frame, rather than of the whole partition. By default, if `ORDER BY` is supplied then the frame consists of all rows from the start of the partition up through the current row, plus any following rows that are equal to the current row according to the `ORDER BY` clause. When `ORDER BY` is omitted the default frame consists of all rows in the partition.¹ Here is an example using `sum`:

```
SELECT salary, sum(salary) OVER () FROM empsalary;
```

salary	sum
5200	47100
5000	47100
3500	47100
4800	47100
3900	47100
4200	47100
4500	47100
4800	47100
6000	47100
5200	47100

(10 rows)

¹ There are options to define the window frame in other ways, but this tutorial does not cover them. See Section 4.2.8 for details.

Above, since there is no `ORDER BY` in the `OVER` clause, the window frame is the same as the partition, which for lack of `PARTITION BY` is the whole table; in other words each sum is taken over the whole table and so we get the same result for each output row. But if we add an `ORDER BY` clause, we get very different results:

```
SELECT salary, sum(salary) OVER (ORDER BY salary) FROM empsalary;
```

salary	sum
3500	3500
3900	7400
4200	11600
4500	16100
4800	25700
4800	25700
5000	30700
5200	41100
5200	41100
6000	47100

(10 rows)

Here the sum is taken from the first (lowest) salary up through the current one, including any duplicates of the current one (notice the results for the duplicated salaries).

Window functions are permitted only in the `SELECT` list and the `ORDER BY` clause of the query. They are forbidden elsewhere, such as in `GROUP BY`, `HAVING` and `WHERE` clauses. This is because they logically execute after the processing of those clauses. Also, window functions execute after non-window aggregate functions. This means it is valid to include an aggregate function call in the arguments of a window function, but not vice versa.

If there is a need to filter or group rows after the window calculations are performed, you can use a sub-select. For example:

```
SELECT depname, empno, salary, enroll_date
FROM
  (SELECT depname, empno, salary, enroll_date,
         rank() OVER (PARTITION BY depname ORDER BY salary DESC,
                    empno) AS pos
   FROM empsalary
  ) AS ss
WHERE pos < 3;
```

The above query only shows the rows from the inner query having rank less than 3.

When a query involves multiple window functions, it is possible to write out each one with a separate `OVER` clause, but this is duplicative and error-prone if the same windowing behavior is wanted for several functions. Instead, each windowing behavior can be named in a `WINDOW` clause and then referenced in `OVER`. For example:

```
SELECT sum(salary) OVER w, avg(salary) OVER w
FROM empsalary
WINDOW w AS (PARTITION BY depname ORDER BY salary DESC);
```

More details about window functions can be found in Section 4.2.8, Section 9.21, Section 7.2.5, and the `SELECT` reference page.

3.6. Inheritance

Inheritance is a concept from object-oriented databases. It opens up interesting new possibilities of database design.

Let's create two tables: A table `cities` and a table `capitals`. Naturally, capitals are also cities, so you want some way to show the capitals implicitly when you list all cities. If you're really clever you might invent some scheme like this:

```
CREATE TABLE capitals (  
    name          text,  
    population    real,  
    altitude      int,    -- (in ft)  
    state         char(2)  
);  
  
CREATE TABLE non_capitals (  
    name          text,  
    population    real,  
    altitude      int     -- (in ft)  
);  
  
CREATE VIEW cities AS  
    SELECT name, population, altitude FROM capitals  
    UNION  
    SELECT name, population, altitude FROM non_capitals;
```

This works OK as far as querying goes, but it gets ugly when you need to update several rows, for one thing.

A better solution is this:

```
CREATE TABLE cities (  
    name          text,  
    population    real,  
    altitude      int     -- (in ft)  
);  
  
CREATE TABLE capitals (  
    state         char(2)  
) INHERITS (cities);
```

In this case, a row of `capitals` *inherits* all columns (`name`, `population`, and `altitude`) from its *parent*, `cities`. The type of the column `name` is `text`, a native PostgreSQL type for variable length character strings. State capitals have an extra column, `state`, that shows their state. In PostgreSQL, a table can inherit from zero or more other tables.

For example, the following query finds the names of all cities, including state capitals, that are located at an altitude over 500 feet:

```
SELECT name, altitude  
    FROM cities  
    WHERE altitude > 500;
```

which returns:

name	altitude
Las Vegas	2174
Mariposa	1953
Madison	845

(3 rows)

On the other hand, the following query finds all the cities that are not state capitals and are situated at an altitude over 500 feet:

```
SELECT name, altitude
FROM ONLY cities
WHERE altitude > 500;
```

name	altitude
Las Vegas	2174
Mariposa	1953

(2 rows)

Here the `ONLY` before `cities` indicates that the query should be run over only the `cities` table, and not tables below `cities` in the inheritance hierarchy. Many of the commands that we have already discussed — `SELECT`, `UPDATE`, and `DELETE` — support this `ONLY` notation.

Note

Although inheritance is frequently useful, it has not been integrated with unique constraints or foreign keys, which limits its usefulness. See Section 5.10 for more detail.

3.7. Conclusion

PostgreSQL has many features not touched upon in this tutorial introduction, which has been oriented toward newer users of SQL. These features are discussed in more detail in the remainder of this book.

If you feel you need more introductory material, please visit the PostgreSQL web site² for links to more resources.

² <https://www.postgresql.org>

Part II. The SQL Language

This part describes the use of the SQL language in PostgreSQL. We start with describing the general syntax of SQL, then explain how to create the structures to hold data, how to populate the database, and how to query it. The middle part lists the available data types and functions for use in SQL commands. The rest treats several aspects that are important for tuning a database for optimal performance.

The information in this part is arranged so that a novice user can follow it start to end to gain a full understanding of the topics without having to refer forward too many times. The chapters are intended to be self-contained, so that advanced users can read the chapters individually as they choose. The information in this part is presented in a narrative fashion in topical units. Readers looking for a complete description of a particular command should see Part VI.

Readers of this part should know how to connect to a PostgreSQL database and issue SQL commands. Readers that are unfamiliar with these issues are encouraged to read Part I first. SQL commands are typically entered using the PostgreSQL interactive terminal `psql`, but other programs that have similar functionality can be used as well.

Chapter 4. SQL Syntax

This chapter describes the syntax of SQL. It forms the foundation for understanding the following chapters which will go into detail about how SQL commands are applied to define and modify data.

We also advise users who are already familiar with SQL to read this chapter carefully because it contains several rules and concepts that are implemented inconsistently among SQL databases or that are specific to PostgreSQL.

4.1. Lexical Structure

SQL input consists of a sequence of *commands*. A command is composed of a sequence of *tokens*, terminated by a semicolon (“;”). The end of the input stream also terminates a command. Which tokens are valid depends on the syntax of the particular command.

A token can be a *key word*, an *identifier*, a *quoted identifier*, a *literal* (or constant), or a special character symbol. Tokens are normally separated by whitespace (space, tab, newline), but need not be if there is no ambiguity (which is generally only the case if a special character is adjacent to some other token type).

For example, the following is (syntactically) valid SQL input:

```
SELECT * FROM MY_TABLE;  
UPDATE MY_TABLE SET A = 5;  
INSERT INTO MY_TABLE VALUES (3, 'hi there');
```

This is a sequence of three commands, one per line (although this is not required; more than one command can be on a line, and commands can usefully be split across lines).

Additionally, *comments* can occur in SQL input. They are not tokens, they are effectively equivalent to whitespace.

The SQL syntax is not very consistent regarding what tokens identify commands and which are operands or parameters. The first few tokens are generally the command name, so in the above example we would usually speak of a “SELECT”, an “UPDATE”, and an “INSERT” command. But for instance the UPDATE command always requires a SET token to appear in a certain position, and this particular variation of INSERT also requires a VALUES in order to be complete. The precise syntax rules for each command are described in Part VI.

4.1.1. Identifiers and Key Words

Tokens such as SELECT, UPDATE, or VALUES in the example above are examples of *key words*, that is, words that have a fixed meaning in the SQL language. The tokens MY_TABLE and A are examples of *identifiers*. They identify names of tables, columns, or other database objects, depending on the command they are used in. Therefore they are sometimes simply called “names”. Key words and identifiers have the same lexical structure, meaning that one cannot know whether a token is an identifier or a key word without knowing the language. A complete list of key words can be found in Appendix C.

SQL identifiers and key words must begin with a letter (a-z, but also letters with diacritical marks and non-Latin letters) or an underscore (_). Subsequent characters in an identifier or key word can be letters, underscores, digits (0-9), or dollar signs (\$). Note that dollar signs are not allowed in identifiers according to the letter of the SQL standard, so their use might render applications less portable. The SQL standard will not define a key word that contains digits or starts or ends with an underscore, so identifiers of this form are safe against possible conflict with future extensions of the standard.

The system uses no more than `NAMEDATALEN-1` bytes of an identifier; longer names can be written in commands, but they will be truncated. By default, `NAMEDATALEN` is 64 so the maximum identifier length is 63 bytes. If this limit is problematic, it can be raised by changing the `NAMEDATALEN` constant in `src/include/pg_config_manual.h`.

Key words and unquoted identifiers are case insensitive. Therefore:

```
UPDATE MY_TABLE SET A = 5;
```

can equivalently be written as:

```
uPDaTE my_Table SeT a = 5;
```

A convention often used is to write key words in upper case and names in lower case, e.g.:

```
UPDATE my_table SET a = 5;
```

There is a second kind of identifier: the *delimited identifier* or *quoted identifier*. It is formed by enclosing an arbitrary sequence of characters in double-quotes (`"`). A delimited identifier is always an identifier, never a key word. So `"select"` could be used to refer to a column or table named `"select"`, whereas an unquoted `select` would be taken as a key word and would therefore provoke a parse error when used where a table or column name is expected. The example can be written with quoted identifiers like this:

```
UPDATE "my_table" SET "a" = 5;
```

Quoted identifiers can contain any character, except the character with code zero. (To include a double quote, write two double quotes.) This allows constructing table or column names that would otherwise not be possible, such as ones containing spaces or ampersands. The length limitation still applies.

A variant of quoted identifiers allows including escaped Unicode characters identified by their code points. This variant starts with `U&` (upper or lower case `U` followed by ampersand) immediately before the opening double quote, without any spaces in between, for example `U&"foo"`. (Note that this creates an ambiguity with the operator `&`. Use spaces around the operator to avoid this problem.) Inside the quotes, Unicode characters can be specified in escaped form by writing a backslash followed by the four-digit hexadecimal code point number or alternatively a backslash followed by a plus sign followed by a six-digit hexadecimal code point number. For example, the identifier `"data"` could be written as

```
U&"d\0061t\+000061"
```

The following less trivial example writes the Russian word `"slon"` (elephant) in Cyrillic letters:

```
U&"\0441\043B\043E\043D"
```

If a different escape character than backslash is desired, it can be specified using the `UESCAPE` clause after the string, for example:

```
U&"d!0061t!+000061" UESCAPE '!'
```

The escape character can be any single character other than a hexadecimal digit, the plus sign, a single quote, a double quote, or a whitespace character. Note that the escape character is written in single quotes, not double quotes.

To include the escape character in the identifier literally, write it twice.

The Unicode escape syntax works only when the server encoding is UTF8. When other server encodings are used, only code points in the ASCII range (up to \007F) can be specified. Both the 4-digit and the 6-digit form can be used to specify UTF-16 surrogate pairs to compose characters with code points larger than U+FFFF, although the availability of the 6-digit form technically makes this unnecessary. (Surrogate pairs are not stored directly, but combined into a single code point that is then encoded in UTF-8.)

Quoting an identifier also makes it case-sensitive, whereas unquoted names are always folded to lower case. For example, the identifiers `FOO`, `foo`, and `"foo"` are considered the same by PostgreSQL, but `"FOO"` and `"FOO"` are different from these three and each other. (The folding of unquoted names to lower case in PostgreSQL is incompatible with the SQL standard, which says that unquoted names should be folded to upper case. Thus, `foo` should be equivalent to `"FOO"` not `"foo"` according to the standard. If you want to write portable applications you are advised to always quote a particular name or never quote it.)

4.1.2. Constants

There are three kinds of *implicitly-typed constants* in PostgreSQL: strings, bit strings, and numbers. Constants can also be specified with explicit types, which can enable more accurate representation and more efficient handling by the system. These alternatives are discussed in the following subsections.

4.1.2.1. String Constants

A string constant in SQL is an arbitrary sequence of characters bounded by single quotes (`'`), for example `'This is a string'`. To include a single-quote character within a string constant, write two adjacent single quotes, e.g., `'Dianne 's horse'`. Note that this is *not* the same as a double-quote character (`"`).

Two string constants that are only separated by whitespace *with at least one newline* are concatenated and effectively treated as if the string had been written as one constant. For example:

```
SELECT 'foo'
'bar' ;
```

is equivalent to:

```
SELECT 'foobar' ;
```

but:

```
SELECT 'foo'      'bar' ;
```

is not valid syntax. (This slightly bizarre behavior is specified by SQL; PostgreSQL is following the standard.)

4.1.2.2. String Constants with C-Style Escapes

PostgreSQL also accepts “escape” string constants, which are an extension to the SQL standard. An escape string constant is specified by writing the letter `E` (upper or lower case) just before the opening single quote, e.g., `E'foo'`. (When continuing an escape string constant across lines, write `E` only before the first opening quote.) Within an escape string, a backslash character (`\`) begins a C-like *backslash escape* sequence, in which the combination of backslash and following character(s) represent a special byte value, as shown in Table 4.1.

Table 4.1. Backslash Escape Sequences

Backslash Escape Sequence	Interpretation
<code>\b</code>	backspace
<code>\f</code>	form feed
<code>\n</code>	newline
<code>\r</code>	carriage return
<code>\t</code>	tab
<code>\o</code> , <code>\oo</code> , <code>\ooo</code> ($o = 0 - 7$)	octal byte value
<code>\xh</code> , <code>\xhh</code> ($h = 0 - 9, A - F$)	hexadecimal byte value
<code>\uxxxx</code> , <code>\Uxxxxxxxx</code> ($x = 0 - 9, A - F$)	16 or 32-bit hexadecimal Unicode character value

Any other character following a backslash is taken literally. Thus, to include a backslash character, write two backslashes (`\\`). Also, a single quote can be included in an escape string by writing `\'`, in addition to the normal way of `'`.

It is your responsibility that the byte sequences you create, especially when using the octal or hexadecimal escapes, compose valid characters in the server character set encoding. When the server encoding is UTF-8, then the Unicode escapes or the alternative Unicode escape syntax, explained in Section 4.1.2.3, should be used instead. (The alternative would be doing the UTF-8 encoding by hand and writing out the bytes, which would be very cumbersome.)

The Unicode escape syntax works fully only when the server encoding is UTF8. When other server encodings are used, only code points in the ASCII range (up to `\u007F`) can be specified. Both the 4-digit and the 8-digit form can be used to specify UTF-16 surrogate pairs to compose characters with code points larger than U+FFFF, although the availability of the 8-digit form technically makes this unnecessary. (When surrogate pairs are used when the server encoding is UTF8, they are first combined into a single code point that is then encoded in UTF-8.)

Caution

If the configuration parameter `standard_conforming_strings` is `off`, then PostgreSQL recognizes backslash escapes in both regular and escape string constants. However, as of PostgreSQL 9.1, the default is `on`, meaning that backslash escapes are recognized only in escape string constants. This behavior is more standards-compliant, but might break applications which rely on the historical behavior, where backslash escapes were always recognized. As a workaround, you can set this parameter to `off`, but it is better to migrate away from using backslash escapes. If you need to use a backslash escape to represent a special character, write the string constant with an `E`.

In addition to `standard_conforming_strings`, the configuration parameters `escape_string_warning` and `backslash_quote` govern treatment of backslashes in string constants.

The character with the code zero cannot be in a string constant.

4.1.2.3. String Constants with Unicode Escapes

PostgreSQL also supports another type of escape syntax for strings that allows specifying arbitrary Unicode characters by code point. A Unicode escape string constant starts with `U&` (upper or lower case letter `U` followed by ampersand) immediately before the opening quote, without any spaces in between, for example `U&'foo'`. (Note that this creates an ambiguity with the operator `&`. Use spaces around the operator to avoid this problem.) Inside the quotes, Unicode characters can be specified

in escaped form by writing a backslash followed by the four-digit hexadecimal code point number or alternatively a backslash followed by a plus sign followed by a six-digit hexadecimal code point number. For example, the string 'data' could be written as

```
U&'d\0061t\+000061'
```

The following less trivial example writes the Russian word “slon” (elephant) in Cyrillic letters:

```
U&' \0441\043B\043E\043D'
```

If a different escape character than backslash is desired, it can be specified using the `UESCAPE` clause after the string, for example:

```
U&'d!0061t!+000061' UESCAPE '!'
```

The escape character can be any single character other than a hexadecimal digit, the plus sign, a single quote, a double quote, or a whitespace character.

The Unicode escape syntax works only when the server encoding is UTF8. When other server encodings are used, only code points in the ASCII range (up to `\007F`) can be specified. Both the 4-digit and the 6-digit form can be used to specify UTF-16 surrogate pairs to compose characters with code points larger than `U+FFFF`, although the availability of the 6-digit form technically makes this unnecessary. (When surrogate pairs are used when the server encoding is UTF8, they are first combined into a single code point that is then encoded in UTF-8.)

Also, the Unicode escape syntax for string constants only works when the configuration parameter `standard_conforming_strings` is turned on. This is because otherwise this syntax could confuse clients that parse the SQL statements to the point that it could lead to SQL injections and similar security issues. If the parameter is set to off, this syntax will be rejected with an error message.

To include the escape character in the string literally, write it twice.

4.1.2.4. Dollar-Quoted String Constants

While the standard syntax for specifying string constants is usually convenient, it can be difficult to understand when the desired string contains many single quotes or backslashes, since each of those must be doubled. To allow more readable queries in such situations, PostgreSQL provides another way, called “dollar quoting”, to write string constants. A dollar-quoted string constant consists of a dollar sign (`$`), an optional “tag” of zero or more characters, another dollar sign, an arbitrary sequence of characters that makes up the string content, a dollar sign, the same tag that began this dollar quote, and a dollar sign. For example, here are two different ways to specify the string “Dianne's horse” using dollar quoting:

```
$$Dianne's horse$$
$SomeTag$Dianne's horse$SomeTag$
```

Notice that inside the dollar-quoted string, single quotes can be used without needing to be escaped. Indeed, no characters inside a dollar-quoted string are ever escaped: the string content is always written literally. Backslashes are not special, and neither are dollar signs, unless they are part of a sequence matching the opening tag.

It is possible to nest dollar-quoted string constants by choosing different tags at each nesting level. This is most commonly used in writing function definitions. For example:

```
$function$
```

```

BEGIN
    RETURN ($1 ~ $q$[\t\r\n\v\\]$q$);
END;
$function$

```

Here, the sequence `q[\t\r\n\v\\]q` represents a dollar-quoted literal string `[\t\r\n\v\\]`, which will be recognized when the function body is executed by PostgreSQL. But since the sequence does not match the outer dollar quoting delimiter `$function$`, it is just some more characters within the constant so far as the outer string is concerned.

The tag, if any, of a dollar-quoted string follows the same rules as an unquoted identifier, except that it cannot contain a dollar sign. Tags are case sensitive, so `tagString contenttag` is correct, but `TAGString contenttag` is not.

A dollar-quoted string that follows a keyword or identifier must be separated from it by whitespace; otherwise the dollar quoting delimiter would be taken as part of the preceding identifier.

Dollar quoting is not part of the SQL standard, but it is often a more convenient way to write complicated string literals than the standard-compliant single quote syntax. It is particularly useful when representing string constants inside other constants, as is often needed in procedural function definitions. With single-quote syntax, each backslash in the above example would have to be written as four backslashes, which would be reduced to two backslashes in parsing the original string constant, and then to one when the inner string constant is re-parsed during function execution.

4.1.2.5. Bit-String Constants

Bit-string constants look like regular string constants with a `B` (upper or lower case) immediately before the opening quote (no intervening whitespace), e.g., `B'1001'`. The only characters allowed within bit-string constants are 0 and 1.

Alternatively, bit-string constants can be specified in hexadecimal notation, using a leading `X` (upper or lower case), e.g., `X'1FF'`. This notation is equivalent to a bit-string constant with four binary digits for each hexadecimal digit.

Both forms of bit-string constant can be continued across lines in the same way as regular string constants. Dollar quoting cannot be used in a bit-string constant.

4.1.2.6. Numeric Constants

Numeric constants are accepted in these general forms:

```

digits
digits.[digits][e[+-]digits]
[digits].digits[e[+-]digits]
digite[+-]digits

```

where *digits* is one or more decimal digits (0 through 9). At least one digit must be before or after the decimal point, if one is used. At least one digit must follow the exponent marker (*e*), if one is present. There cannot be any spaces or other characters embedded in the constant. Note that any leading plus or minus sign is not actually considered part of the constant; it is an operator applied to the constant.

These are some examples of valid numeric constants:

```

42
3.5
4.
.001

```

```
5e2
1.925e-3
```

A numeric constant that contains neither a decimal point nor an exponent is initially presumed to be type `integer` if its value fits in type `integer` (32 bits); otherwise it is presumed to be type `bigint` if its value fits in type `bigint` (64 bits); otherwise it is taken to be type `numeric`. Constants that contain decimal points and/or exponents are always initially presumed to be type `numeric`.

The initially assigned data type of a numeric constant is just a starting point for the type resolution algorithms. In most cases the constant will be automatically coerced to the most appropriate type depending on context. When necessary, you can force a numeric value to be interpreted as a specific data type by casting it. For example, you can force a numeric value to be treated as type `real` (`float4`) by writing:

```
REAL '1.23' -- string style
1.23::REAL -- PostgreSQL (historical) style
```

These are actually just special cases of the general casting notations discussed next.

4.1.2.7. Constants of Other Types

A constant of an *arbitrary* type can be entered using any one of the following notations:

```
type 'string'
'string'::type
CAST ( 'string' AS type )
```

The string constant's text is passed to the input conversion routine for the type called *type*. The result is a constant of the indicated type. The explicit type cast can be omitted if there is no ambiguity as to the type the constant must be (for example, when it is assigned directly to a table column), in which case it is automatically coerced.

The string constant can be written using either regular SQL notation or dollar-quoting.

It is also possible to specify a type coercion using a function-like syntax:

```
typename ( 'string' )
```

but not all type names can be used in this way; see Section 4.2.9 for details.

The `::`, `CAST()`, and function-call syntaxes can also be used to specify run-time type conversions of arbitrary expressions, as discussed in Section 4.2.9. To avoid syntactic ambiguity, the *type* `'string'` syntax can only be used to specify the type of a simple literal constant. Another restriction on the *type* `'string'` syntax is that it does not work for array types; use `::` or `CAST()` to specify the type of an array constant.

The `CAST()` syntax conforms to SQL. The *type* `'string'` syntax is a generalization of the standard: SQL specifies this syntax only for a few data types, but PostgreSQL allows it for all types. The syntax with `::` is historical PostgreSQL usage, as is the function-call syntax.

4.1.3. Operators

An operator name is a sequence of up to `NAMEDATALEN-1` (63 by default) characters from the following list:

+ - * / < > = ~ ! @ # % ^ & | ` ?

There are a few restrictions on operator names, however:

- -- and /* cannot appear anywhere in an operator name, since they will be taken as the start of a comment.
- A multiple-character operator name cannot end in + or -, unless the name also contains at least one of these characters:

~ ! @ # % ^ & | ` ?

For example, @- is an allowed operator name, but *- is not. This restriction allows PostgreSQL to parse SQL-compliant queries without requiring spaces between tokens.

When working with non-SQL-standard operator names, you will usually need to separate adjacent operators with spaces to avoid ambiguity. For example, if you have defined a left unary operator named @, you cannot write X*@Y; you must write X* @Y to ensure that PostgreSQL reads it as two operator names not one.

4.1.4. Special Characters

Some characters that are not alphanumeric have a special meaning that is different from being an operator. Details on the usage can be found at the location where the respective syntax element is described. This section only exists to advise the existence and summarize the purposes of these characters.

- A dollar sign (\$) followed by digits is used to represent a positional parameter in the body of a function definition or a prepared statement. In other contexts the dollar sign can be part of an identifier or a dollar-quoted string constant.
- Parentheses (()) have their usual meaning to group expressions and enforce precedence. In some cases parentheses are required as part of the fixed syntax of a particular SQL command.
- Brackets [[]] are used to select the elements of an array. See Section 8.15 for more information on arrays.
- Commas (,) are used in some syntactical constructs to separate the elements of a list.
- The semicolon (;) terminates an SQL command. It cannot appear anywhere within a command, except within a string constant or quoted identifier.
- The colon (:) is used to select “slices” from arrays. (See Section 8.15.) In certain SQL dialects (such as Embedded SQL), the colon is used to prefix variable names.
- The asterisk (*) is used in some contexts to denote all the fields of a table row or composite value. It also has a special meaning when used as the argument of an aggregate function, namely that the aggregate does not require any explicit parameter.
- The period (.) is used in numeric constants, and to separate schema, table, and column names.

4.1.5. Comments

A comment is a sequence of characters beginning with double dashes and extending to the end of the line, e.g.:

```
-- This is a standard SQL comment
```

Alternatively, C-style block comments can be used:

```
/* multiline comment
 * with nesting: /* nested block comment */
 */
```

where the comment begins with `/*` and extends to the matching occurrence of `*/`. These block comments nest, as specified in the SQL standard but unlike C, so that one can comment out larger blocks of code that might contain existing block comments.

A comment is removed from the input stream before further syntax analysis and is effectively replaced by whitespace.

4.1.6. Operator Precedence

Table 4.2 shows the precedence and associativity of the operators in PostgreSQL. Most operators have the same precedence and are left-associative. The precedence and associativity of the operators is hard-wired into the parser.

You will sometimes need to add parentheses when using combinations of binary and unary operators. For instance:

```
SELECT 5 ! - 6;
```

will be parsed as:

```
SELECT 5 ! (- 6);
```

because the parser has no idea — until it is too late — that `!` is defined as a postfix operator, not an infix one. To get the desired behavior in this case, you must write:

```
SELECT (5 !) - 6;
```

This is the price one pays for extensibility.

Table 4.2. Operator Precedence (highest to lowest)

Operator/Element	Associativity	Description
.	left	table/column name separator
::	left	PostgreSQL-style typecast
[]	left	array element selection
+ -	right	unary plus, unary minus
^	left	exponentiation
* / %	left	multiplication, division, modulo
+ -	left	addition, subtraction
(any other operator)	left	all other native and user-defined operators
BETWEEN IN LIKE ILIKE SIMILAR		range containment, set membership, string matching
< > = <= >= <>		comparison operators
IS ISNULL NOTNULL		IS TRUE, IS FALSE, IS NULL, IS DISTINCT FROM, etc

Operator/Element	Associativity	Description
NOT	right	logical negation
AND	left	logical conjunction
OR	left	logical disjunction

Note that the operator precedence rules also apply to user-defined operators that have the same names as the built-in operators mentioned above. For example, if you define a “+” operator for some custom data type it will have the same precedence as the built-in “+” operator, no matter what yours does.

When a schema-qualified operator name is used in the OPERATOR syntax, as for example in:

```
SELECT 3 OPERATOR(pg_catalog.+) 4;
```

the OPERATOR construct is taken to have the default precedence shown in Table 4.2 for “any other operator”. This is true no matter which specific operator appears inside OPERATOR().

Note

PostgreSQL versions before 9.5 used slightly different operator precedence rules. In particular, <= >= and <> used to be treated as generic operators; IS tests used to have higher priority; and NOT BETWEEN and related constructs acted inconsistently, being taken in some cases as having the precedence of NOT rather than BETWEEN. These rules were changed for better compliance with the SQL standard and to reduce confusion from inconsistent treatment of logically equivalent constructs. In most cases, these changes will result in no behavioral change, or perhaps in “no such operator” failures which can be resolved by adding parentheses. However there are corner cases in which a query might change behavior without any parsing error being reported. If you are concerned about whether these changes have silently broken something, you can test your application with the configuration parameter operator_precedence_warning turned on to see if any warnings are logged.

4.2. Value Expressions

Value expressions are used in a variety of contexts, such as in the target list of the SELECT command, as new column values in INSERT or UPDATE, or in search conditions in a number of commands. The result of a value expression is sometimes called a *scalar*, to distinguish it from the result of a table expression (which is a table). Value expressions are therefore also called *scalar expressions* (or even simply *expressions*). The expression syntax allows the calculation of values from primitive parts using arithmetic, logical, set, and other operations.

A value expression is one of the following:

- A constant or literal value
- A column reference
- A positional parameter reference, in the body of a function definition or prepared statement
- A subscripted expression
- A field selection expression
- An operator invocation
- A function call

- An aggregate expression
- A window function call
- A type cast
- A collation expression
- A scalar subquery
- An array constructor
- A row constructor
- Another value expression in parentheses (used to group subexpressions and override precedence)

In addition to this list, there are a number of constructs that can be classified as an expression but do not follow any general syntax rules. These generally have the semantics of a function or operator and are explained in the appropriate location in Chapter 9. An example is the `IS NULL` clause.

We have already discussed constants in Section 4.1.2. The following sections discuss the remaining options.

4.2.1. Column References

A column can be referenced in the form:

correlation.columnname

correlation is the name of a table (possibly qualified with a schema name), or an alias for a table defined by means of a `FROM` clause. The correlation name and separating dot can be omitted if the column name is unique across all the tables being used in the current query. (See also Chapter 7.)

4.2.2. Positional Parameters

A positional parameter reference is used to indicate a value that is supplied externally to an SQL statement. Parameters are used in SQL function definitions and in prepared queries. Some client libraries also support specifying data values separately from the SQL command string, in which case parameters are used to refer to the out-of-line data values. The form of a parameter reference is:

\$number

For example, consider the definition of a function, `dept`, as:

```
CREATE FUNCTION dept(text) RETURNS dept
  AS $$ SELECT * FROM dept WHERE name = $1 $$
LANGUAGE SQL;
```

Here the `$1` references the value of the first function argument whenever the function is invoked.

4.2.3. Subscripts

If an expression yields a value of an array type, then a specific element of the array value can be extracted by writing

expression[subscript]

or multiple adjacent elements (an “array slice”) can be extracted by writing

```
expression[lower_subscript:upper_subscript]
```

(Here, the brackets [] are meant to appear literally.) Each *subscript* is itself an expression, which must yield an integer value.

In general the array *expression* must be parenthesized, but the parentheses can be omitted when the expression to be subscripted is just a column reference or positional parameter. Also, multiple subscripts can be concatenated when the original array is multidimensional. For example:

```
mytable.arraycolumn[4]  
mytable.two_d_column[17][34]  
$1[10:42]  
(arrayfunction(a,b))[42]
```

The parentheses in the last example are required. See Section 8.15 for more about arrays.

4.2.4. Field Selection

If an expression yields a value of a composite type (row type), then a specific field of the row can be extracted by writing

```
expression.fieldname
```

In general the row *expression* must be parenthesized, but the parentheses can be omitted when the expression to be selected from is just a table reference or positional parameter. For example:

```
mytable.mycolumn  
$1.somecolumn  
(rowfunction(a,b)).col3
```

(Thus, a qualified column reference is actually just a special case of the field selection syntax.) An important special case is extracting a field from a table column that is of a composite type:

```
(compositemcol).somefield  
(mytable.compositemcol).somefield
```

The parentheses are required here to show that *compositemcol* is a column name not a table name, or that *mytable* is a table name not a schema name in the second case.

You can ask for all fields of a composite value by writing *.**:

```
(compositemcol).*
```

This notation behaves differently depending on context; see Section 8.16.5 for details.

4.2.5. Operator Invocations

There are three possible syntaxes for an operator invocation:

```
expression operator expression (binary infix operator)  
operator expression (unary prefix operator)
```

expression operator (unary postfix operator)

where the *operator* token follows the syntax rules of Section 4.1.3, or is one of the key words AND, OR, and NOT, or is a qualified operator name in the form:

```
OPERATOR(schema.operatorname)
```

Which particular operators exist and whether they are unary or binary depends on what operators have been defined by the system or the user. Chapter 9 describes the built-in operators.

4.2.6. Function Calls

The syntax for a function call is the name of a function (possibly qualified with a schema name), followed by its argument list enclosed in parentheses:

```
function_name ([expression [, expression ... ] ] )
```

For example, the following computes the square root of 2:

```
sqrt(2)
```

The list of built-in functions is in Chapter 9. Other functions can be added by the user.

When issuing queries in a database where some users mistrust other users, observe security precautions from Section 10.3 when writing function calls.

The arguments can optionally have names attached. See Section 4.3 for details.

Note

A function that takes a single argument of composite type can optionally be called using field-selection syntax, and conversely field selection can be written in functional style. That is, the notations `col(table)` and `table.col` are interchangeable. This behavior is not SQL-standard but is provided in PostgreSQL because it allows use of functions to emulate “computed fields”. For more information see Section 8.16.5.

4.2.7. Aggregate Expressions

An *aggregate expression* represents the application of an aggregate function across the rows selected by a query. An aggregate function reduces multiple inputs to a single output value, such as the sum or average of the inputs. The syntax of an aggregate expression is one of the following:

```
aggregate_name (expression [ , ... ] [ order_by_clause ] ) [ FILTER  
  ( WHERE filter_clause ) ]  
aggregate_name (ALL expression [ , ... ] [ order_by_clause ] )  
  [ FILTER ( WHERE filter_clause ) ]  
aggregate_name (DISTINCT expression [ , ... ] [ order_by_clause ] )  
  [ FILTER ( WHERE filter_clause ) ]  
aggregate_name ( * ) [ FILTER ( WHERE filter_clause ) ]  
aggregate_name ( [ expression [ , ... ] ] ) WITHIN GROUP  
  ( order_by_clause ) [ FILTER ( WHERE filter_clause ) ]
```

where *aggregate_name* is a previously defined aggregate (possibly qualified with a schema name) and *expression* is any value expression that does not itself contain an aggregate expression or

a window function call. The optional *order_by_clause* and *filter_clause* are described below.

The first form of aggregate expression invokes the aggregate once for each input row. The second form is the same as the first, since ALL is the default. The third form invokes the aggregate once for each distinct value of the expression (or distinct set of values, for multiple expressions) found in the input rows. The fourth form invokes the aggregate once for each input row; since no particular input value is specified, it is generally only useful for the `count (*)` aggregate function. The last form is used with *ordered-set* aggregate functions, which are described below.

Most aggregate functions ignore null inputs, so that rows in which one or more of the expression(s) yield null are discarded. This can be assumed to be true, unless otherwise specified, for all built-in aggregates.

For example, `count (*)` yields the total number of input rows; `count (f1)` yields the number of input rows in which `f1` is non-null, since `count` ignores nulls; and `count (distinct f1)` yields the number of distinct non-null values of `f1`.

Ordinarily, the input rows are fed to the aggregate function in an unspecified order. In many cases this does not matter; for example, `min` produces the same result no matter what order it receives the inputs in. However, some aggregate functions (such as `array_agg` and `string_agg`) produce results that depend on the ordering of the input rows. When using such an aggregate, the optional *order_by_clause* can be used to specify the desired ordering. The *order_by_clause* has the same syntax as for a query-level ORDER BY clause, as described in Section 7.5, except that its expressions are always just expressions and cannot be output-column names or numbers. For example:

```
SELECT array_agg(a ORDER BY b DESC) FROM table;
```

When dealing with multiple-argument aggregate functions, note that the ORDER BY clause goes after all the aggregate arguments. For example, write this:

```
SELECT string_agg(a, ',' ORDER BY a) FROM table;
```

not this:

```
SELECT string_agg(a ORDER BY a, ',') FROM table; -- incorrect
```

The latter is syntactically valid, but it represents a call of a single-argument aggregate function with two ORDER BY keys (the second one being rather useless since it's a constant).

If DISTINCT is specified in addition to an *order_by_clause*, then all the ORDER BY expressions must match regular arguments of the aggregate; that is, you cannot sort on an expression that is not included in the DISTINCT list.

Note

The ability to specify both DISTINCT and ORDER BY in an aggregate function is a PostgreSQL extension.

Placing ORDER BY within the aggregate's regular argument list, as described so far, is used when ordering the input rows for general-purpose and statistical aggregates, for which ordering is optional. There is a subclass of aggregate functions called *ordered-set aggregates* for which an *order_by_clause* is *required*, usually because the aggregate's computation is only sensible in terms of a specific ordering of its input rows. Typical examples of ordered-set aggregates include rank and percentile calculations. For an ordered-set aggregate, the *order_by_clause* is written inside

`WITHIN GROUP (...)`, as shown in the final syntax alternative above. The expressions in the *order_by_clause* are evaluated once per input row just like regular aggregate arguments, sorted as per the *order_by_clause*'s requirements, and fed to the aggregate function as input arguments. (This is unlike the case for a non-`WITHIN GROUP order_by_clause`, which is not treated as argument(s) to the aggregate function.) The argument expressions preceding `WITHIN GROUP`, if any, are called *direct arguments* to distinguish them from the *aggregated arguments* listed in the *order_by_clause*. Unlike regular aggregate arguments, direct arguments are evaluated only once per aggregate call, not once per input row. This means that they can contain variables only if those variables are grouped by `GROUP BY`; this restriction is the same as if the direct arguments were not inside an aggregate expression at all. Direct arguments are typically used for things like percentile fractions, which only make sense as a single value per aggregation calculation. The direct argument list can be empty; in this case, write just `()` not `(*)`. (PostgreSQL will actually accept either spelling, but only the first way conforms to the SQL standard.)

An example of an ordered-set aggregate call is:

```
SELECT percentile_cont(0.5) WITHIN GROUP (ORDER BY income) FROM
households;
percentile_cont
-----
                50489
```

which obtains the 50th percentile, or median, value of the `income` column from table `households`. Here, `0.5` is a direct argument; it would make no sense for the percentile fraction to be a value varying across rows.

If `FILTER` is specified, then only the input rows for which the *filter_clause* evaluates to true are fed to the aggregate function; other rows are discarded. For example:

```
SELECT
    count(*) AS unfiltered,
    count(*) FILTER (WHERE i < 5) AS filtered
FROM generate_series(1,10) AS s(i);
unfiltered | filtered
-----+-----
                10 |          4
(1 row)
```

The predefined aggregate functions are described in Section 9.20. Other aggregate functions can be added by the user.

An aggregate expression can only appear in the result list or `HAVING` clause of a `SELECT` command. It is forbidden in other clauses, such as `WHERE`, because those clauses are logically evaluated before the results of aggregates are formed.

When an aggregate expression appears in a subquery (see Section 4.2.11 and Section 9.22), the aggregate is normally evaluated over the rows of the subquery. But an exception occurs if the aggregate's arguments (and *filter_clause* if any) contain only outer-level variables: the aggregate then belongs to the nearest such outer level, and is evaluated over the rows of that query. The aggregate expression as a whole is then an outer reference for the subquery it appears in, and acts as a constant over any one evaluation of that subquery. The restriction about appearing only in the result list or `HAVING` clause applies with respect to the query level that the aggregate belongs to.

4.2.8. Window Function Calls

A *window function call* represents the application of an aggregate-like function over some portion of the rows selected by a query. Unlike non-window aggregate calls, this is not tied to grouping of the

selected rows into a single output row — each row remains separate in the query output. However the window function has access to all the rows that would be part of the current row's group according to the grouping specification (`PARTITION BY` list) of the window function call. The syntax of a window function call is one of the following:

```
function_name ([expression [, expression ... ]]) [ FILTER
  ( WHERE filter_clause ) ] OVER window_name
function_name ([expression [, expression ... ]]) [ FILTER
  ( WHERE filter_clause ) ] OVER ( window_definition )
function_name ( * ) [ FILTER ( WHERE filter_clause ) ]
  OVER window_name
function_name ( * ) [ FILTER ( WHERE filter_clause ) ] OVER
  ( window_definition )
```

where *window_definition* has the syntax

```
[ existing_window_name ]
[ PARTITION BY expression [, ...] ]
[ ORDER BY expression [ ASC | DESC | USING operator ] [ NULLS
  { FIRST | LAST } ] [, ...] ]
[ frame_clause ]
```

The optional *frame_clause* can be one of

```
{ RANGE | ROWS | GROUPS } frame_start [ frame_exclusion ]
{ RANGE | ROWS | GROUPS } BETWEEN frame_start AND frame_end
[ frame_exclusion ]
```

where *frame_start* and *frame_end* can be one of

```
UNBOUNDED PRECEDING
offset PRECEDING
CURRENT ROW
offset FOLLOWING
UNBOUNDED FOLLOWING
```

and *frame_exclusion* can be one of

```
EXCLUDE CURRENT ROW
EXCLUDE GROUP
EXCLUDE TIES
EXCLUDE NO OTHERS
```

Here, *expression* represents any value expression that does not itself contain window function calls.

window_name is a reference to a named window specification defined in the query's `WINDOW` clause. Alternatively, a full *window_definition* can be given within parentheses, using the same syntax as for defining a named window in the `WINDOW` clause; see the `SELECT` reference page for details. It's worth pointing out that `OVER wname` is not exactly equivalent to `OVER (wname ...)`; the latter implies copying and modifying the window definition, and will be rejected if the referenced window specification includes a frame clause.

The `PARTITION BY` clause groups the rows of the query into *partitions*, which are processed separately by the window function. `PARTITION BY` works similarly to a query-level `GROUP BY` clause,

except that its expressions are always just expressions and cannot be output-column names or numbers. Without `PARTITION BY`, all rows produced by the query are treated as a single partition. The `ORDER BY` clause determines the order in which the rows of a partition are processed by the window function. It works similarly to a query-level `ORDER BY` clause, but likewise cannot use output-column names or numbers. Without `ORDER BY`, rows are processed in an unspecified order.

The *frame_clause* specifies the set of rows constituting the *window frame*, which is a subset of the current partition, for those window functions that act on the frame instead of the whole partition. The set of rows in the frame can vary depending on which row is the current row. The frame can be specified in `RANGE`, `ROWS` or `GROUPS` mode; in each case, it runs from the *frame_start* to the *frame_end*. If *frame_end* is omitted, the end defaults to `CURRENT ROW`.

A *frame_start* of `UNBOUNDED PRECEDING` means that the frame starts with the first row of the partition, and similarly a *frame_end* of `UNBOUNDED FOLLOWING` means that the frame ends with the last row of the partition.

In `RANGE` or `GROUPS` mode, a *frame_start* of `CURRENT ROW` means the frame starts with the current row's first *peer* row (a row that the window's `ORDER BY` clause sorts as equivalent to the current row), while a *frame_end* of `CURRENT ROW` means the frame ends with the current row's last peer row. In `ROWS` mode, `CURRENT ROW` simply means the current row.

In the *offset PRECEDING* and *offset FOLLOWING* frame options, the *offset* must be an expression not containing any variables, aggregate functions, or window functions. The meaning of the *offset* depends on the frame mode:

- In `ROWS` mode, the *offset* must yield a non-null, non-negative integer, and the option means that the frame starts or ends the specified number of rows before or after the current row.
- In `GROUPS` mode, the *offset* again must yield a non-null, non-negative integer, and the option means that the frame starts or ends the specified number of *peer groups* before or after the current row's peer group, where a peer group is a set of rows that are equivalent in the `ORDER BY` ordering. (There must be an `ORDER BY` clause in the window definition to use `GROUPS` mode.)
- In `RANGE` mode, these options require that the `ORDER BY` clause specify exactly one column. The *offset* specifies the maximum difference between the value of that column in the current row and its value in preceding or following rows of the frame. The data type of the *offset* expression varies depending on the data type of the ordering column. For numeric ordering columns it is typically of the same type as the ordering column, but for datetime ordering columns it is an `interval`. For example, if the ordering column is of type `date` or `timestamp`, one could write `RANGE BETWEEN '1 day' PRECEDING AND '10 days' FOLLOWING`. The *offset* is still required to be non-null and non-negative, though the meaning of “non-negative” depends on its data type.

In any case, the distance to the end of the frame is limited by the distance to the end of the partition, so that for rows near the partition ends the frame might contain fewer rows than elsewhere.

Notice that in both `ROWS` and `GROUPS` mode, `0 PRECEDING` and `0 FOLLOWING` are equivalent to `CURRENT ROW`. This normally holds in `RANGE` mode as well, for an appropriate data-type-specific meaning of “zero”.

The *frame_exclusion* option allows rows around the current row to be excluded from the frame, even if they would be included according to the frame start and frame end options. `EXCLUDE CURRENT ROW` excludes the current row from the frame. `EXCLUDE GROUP` excludes the current row and its ordering peers from the frame. `EXCLUDE TIES` excludes any peers of the current row from the frame, but not the current row itself. `EXCLUDE NO OTHERS` simply specifies explicitly the default behavior of not excluding the current row or its peers.

The default framing option is `RANGE UNBOUNDED PRECEDING`, which is the same as `RANGE BETWEEN UNBOUNDED PRECEDING AND CURRENT ROW`. With `ORDER BY`, this sets the frame to be all rows from the partition start up through the current row's last `ORDER BY` peer. Without

`ORDER BY`, this means all rows of the partition are included in the window frame, since all rows become peers of the current row.

Restrictions are that *frame_start* cannot be `UNBOUNDED FOLLOWING`, *frame_end* cannot be `UNBOUNDED PRECEDING`, and the *frame_end* choice cannot appear earlier in the above list of *frame_start* and *frame_end* options than the *frame_start* choice does — for example `RANGE BETWEEN CURRENT ROW AND offset PRECEDING` is not allowed. But, for example, `ROWS BETWEEN 7 PRECEDING AND 8 PRECEDING` is allowed, even though it would never select any rows.

If `FILTER` is specified, then only the input rows for which the *filter_clause* evaluates to true are fed to the window function; other rows are discarded. Only window functions that are aggregates accept a `FILTER` clause.

The built-in window functions are described in Table 9.60. Other window functions can be added by the user. Also, any built-in or user-defined general-purpose or statistical aggregate can be used as a window function. (Ordered-set and hypothetical-set aggregates cannot presently be used as window functions.)

The syntaxes using `*` are used for calling parameter-less aggregate functions as window functions, for example `count(*) OVER (PARTITION BY x ORDER BY y)`. The asterisk (`*`) is customarily not used for window-specific functions. Window-specific functions do not allow `DISTINCT` or `ORDER BY` to be used within the function argument list.

Window function calls are permitted only in the `SELECT` list and the `ORDER BY` clause of the query.

More information about window functions can be found in Section 3.5, Section 9.21, and Section 7.2.5.

4.2.9. Type Casts

A type cast specifies a conversion from one data type to another. PostgreSQL accepts two equivalent syntaxes for type casts:

```
CAST ( expression AS type )
expression::type
```

The `CAST` syntax conforms to SQL; the syntax with `::` is historical PostgreSQL usage.

When a cast is applied to a value expression of a known type, it represents a run-time type conversion. The cast will succeed only if a suitable type conversion operation has been defined. Notice that this is subtly different from the use of casts with constants, as shown in Section 4.1.2.7. A cast applied to an unadorned string literal represents the initial assignment of a type to a literal constant value, and so it will succeed for any type (if the contents of the string literal are acceptable input syntax for the data type).

An explicit type cast can usually be omitted if there is no ambiguity as to the type that a value expression must produce (for example, when it is assigned to a table column); the system will automatically apply a type cast in such cases. However, automatic casting is only done for casts that are marked “OK to apply implicitly” in the system catalogs. Other casts must be invoked with explicit casting syntax. This restriction is intended to prevent surprising conversions from being applied silently.

It is also possible to specify a type cast using a function-like syntax:

```
typename ( expression )
```

However, this only works for types whose names are also valid as function names. For example, `double precision` cannot be used this way, but the equivalent `float8` can. Also, the names `in-`

`interval`, `time`, and `timestamp` can only be used in this fashion if they are double-quoted, because of syntactic conflicts. Therefore, the use of the function-like cast syntax leads to inconsistencies and should probably be avoided.

Note

The function-like syntax is in fact just a function call. When one of the two standard cast syntaxes is used to do a run-time conversion, it will internally invoke a registered function to perform the conversion. By convention, these conversion functions have the same name as their output type, and thus the “function-like syntax” is nothing more than a direct invocation of the underlying conversion function. Obviously, this is not something that a portable application should rely on. For further details see `CREATE CAST`.

4.2.10. Collation Expressions

The `COLLATE` clause overrides the collation of an expression. It is appended to the expression it applies to:

```
expr COLLATE collation
```

where *collation* is a possibly schema-qualified identifier. The `COLLATE` clause binds tighter than operators; parentheses can be used when necessary.

If no collation is explicitly specified, the database system either derives a collation from the columns involved in the expression, or it defaults to the default collation of the database if no column is involved in the expression.

The two common uses of the `COLLATE` clause are overriding the sort order in an `ORDER BY` clause, for example:

```
SELECT a, b, c FROM tbl WHERE ... ORDER BY a COLLATE "C";
```

and overriding the collation of a function or operator call that has locale-sensitive results, for example:

```
SELECT * FROM tbl WHERE a > 'foo' COLLATE "C";
```

Note that in the latter case the `COLLATE` clause is attached to an input argument of the operator we wish to affect. It doesn't matter which argument of the operator or function call the `COLLATE` clause is attached to, because the collation that is applied by the operator or function is derived by considering all arguments, and an explicit `COLLATE` clause will override the collations of all other arguments. (Attaching non-matching `COLLATE` clauses to more than one argument, however, is an error. For more details see Section 23.2.) Thus, this gives the same result as the previous example:

```
SELECT * FROM tbl WHERE a COLLATE "C" > 'foo';
```

But this is an error:

```
SELECT * FROM tbl WHERE (a > 'foo') COLLATE "C";
```

because it attempts to apply a collation to the result of the `>` operator, which is of the non-collatable data type `boolean`.

4.2.11. Scalar Subqueries

A scalar subquery is an ordinary `SELECT` query in parentheses that returns exactly one row with one column. (See Chapter 7 for information about writing queries.) The `SELECT` query is executed and the single returned value is used in the surrounding value expression. It is an error to use a query that returns more than one row or more than one column as a scalar subquery. (But if, during a particular execution, the subquery returns no rows, there is no error; the scalar result is taken to be null.) The subquery can refer to variables from the surrounding query, which will act as constants during any one evaluation of the subquery. See also Section 9.22 for other expressions involving subqueries.

For example, the following finds the largest city population in each state:

```
SELECT name, (SELECT max(pop) FROM cities WHERE cities.state =
             states.name)
           FROM states;
```

4.2.12. Array Constructors

An array constructor is an expression that builds an array value using values for its member elements. A simple array constructor consists of the key word `ARRAY`, a left square bracket `[`, a list of expressions (separated by commas) for the array element values, and finally a right square bracket `]`. For example:

```
SELECT ARRAY[1,2,3+4];
       array
-----
   {1,2,7}
(1 row)
```

By default, the array element type is the common type of the member expressions, determined using the same rules as for `UNION` or `CASE` constructs (see Section 10.5). You can override this by explicitly casting the array constructor to the desired type, for example:

```
SELECT ARRAY[1,2,22.7]::integer[];
       array
-----
   {1,2,23}
(1 row)
```

This has the same effect as casting each expression to the array element type individually. For more on casting, see Section 4.2.9.

Multidimensional array values can be built by nesting array constructors. In the inner constructors, the key word `ARRAY` can be omitted. For example, these produce the same result:

```
SELECT ARRAY[ARRAY[1,2], ARRAY[3,4]];
       array
-----
   {{1,2},{3,4}}
(1 row)

SELECT ARRAY[[1,2],[3,4]];
       array
-----
   {{1,2},{3,4}}
(1 row)
```
