- Specify the data storage destination in the -D option. If the -D option is omitted, the value of the PGDATA environment variable is used by default.

Example

```
> pgx_dmpall -D D:\database\inst1
```

7. Resume applications

Resume applications that are using the database.

---

**10.2 Recovering from Data Corruption**

If data in a disk is logically corrupted and the database does not operate properly, you can recover the database cluster to its state at the time of backup.

There are two methods of recovery:

- **10.2.1 Using WebAdmin**

- **10.2.2 Using the pgx_rcvall Command**

**Note**

- Back up the database cluster after recovering it. Backup deletes obsolete archive logs (transaction logs copied to the backup data storage destination), freeing up disk space and reducing the recovery time.
If you recover data to a point in the past, a new time series (database update history) will start from that recovery point. When recovery is complete, the recovery point is the latest point in the new time series. When you subsequently recover data to the latest state, the database update is re-executed on the new time series.

10.2.1 Using WebAdmin

If using WebAdmin, recover the data to the point immediately prior to data corruption by using the backup data. Refer to "10.1.1 Using WebAdmin" for details.

10.2.2 Using the pgx_rcvall Command

Recover the database cluster by specifying in the pgx_rcvall command the date and time of the backup you want to read from. Then re-execute the transaction as required to recover the data.

Follow the procedure below to recover the data storage disk.

1. Stop applications
   Stop applications that are using the database.

2. Stop the instance
   Stop the instance. Refer to "2.1.2 Using Commands" for information on how to stop an instance.
   If the instance fails to stop, refer to "10.11 Actions in Response to Failure to Stop an Instance".

3. Confirm the backup date and time
   Pinpoint a date and time prior to the data corruption based on the content of the job log or event log.

4. Recover the keystore, and enable automatic opening of the keystore
   When the data in the database has been encrypted, restore the keystore to its state at the time of the database backup. Configure automatic opening of the keystore as necessary.

5. Recover the database cluster
   Use the pgx_rcvall command to recover the database cluster.
   Specify the following values in the pgx_rcvall command:
   - Specify the data storage destination in the -D option. If the -D option is omitted, the value of the PGDATA environment variable is used by default.
   - Specify the backup storage directory in the -B option.
   - Specify the recovery date and time in the -e option.

   Example
   In the following examples, "May 20, 2015 10:00:00" is specified as the recovery time.

   ```
   > pgx_rcvall -D:D:\database\inst1 -B:E:\backup\inst1 -e "2015-05-20 10:00:00"
   ```

   Note
   If recovery fails, remove the cause of the error in accordance with the displayed error message and then re-execute the pgx_rcvall command.

   If the message "pgx_rcvall: an error occurred during recovery" is displayed, then the log recorded when recovery was executed is output after this message. The cause of the error is output in around the last fifteen lines of the log, so remove the cause of the error in accordance with the message and then re-execute the pgx_rcvall command.

   The following message displayed during recovery is output as part of normal operation of pgx_rcvall command (therefore the user does not need not be concerned).
6. Start the instance

Start the instance. Refer to "2.1.2 Using Commands" for information on how to start an instance.

If necessary, re-execute transaction processing from the specified recovery time, and then resume database operations.

**Note**

The `pgx_rcvall` command cannot accurately recover a hash index. If you are using a hash index, wait for the instance to start and then execute the `REINDEX` command for the appropriate index.

7. Resume applications

Resume applications that are using the database.

**See**

Refer to "`pgx_rcvall`" in the Reference for information on the `pgx_rcvall` command.

---

### 10.3 Recovering from an Incorrect User Operation

This section describes how to recover database clusters when data has been corrupted due to erroneous user operations.

There are two methods of recovery:

- 10.3.1 Using WebAdmin
- 10.3.2 Using the `pgx_rcvall` Command

**Note**

- Back up the database cluster after recovering it. Backup deletes obsolete archive logs (transaction logs copied to the backup data storage destination), freeing up disk space and reducing the recovery time.

- If you recover data to a point in the past, a new time series (database update history) will start from that recovery point. When recovery is complete, the recovery point is the latest point in the new time series. When you subsequently recover data to the latest state, the database update is re-executed on the new time series.

- An effective restore point is one created on a time series for which you have made a backup. That is, if you recover data to a point in the past, you cannot use any restore points set after that recovery point. Therefore, once you manage to recover your target past data, make a backup.

---

#### 10.3.1 Using WebAdmin

You can use WebAdmin to recover data to a backup point.

**Note**

Recovery operation cannot be performed on an instance that is part of a streaming replication cluster in standby mode.

If disk failure occurs on a standby instance, it may be necessary to delete and re-create the instance.

Recovery operation can be performed on an instance that is part of a streaming replication cluster in "Master" mode. If a recovery operation is performed on a master instance, it will break the replication cluster and streaming replication will stop between the master instance and all its standby instances. In such an event, the standby instances can be promoted to standalone instances or can be deleted and re-created.
Follow the procedure below to recover the data in the data storage disk.

1. Stop applications
   Stop applications that are using the database.

2. Stop the instance
   Stop the instance. Refer to "2.1.1 Using WebAdmin" for information on how to stop an instance.

3. Recover the keystore, and enable automatic opening of the keystore
   Do the following if the data in the database has been encrypted:
   - Restore the keystore to its state at the time of the database backup.
   - Enable automatic opening of the key store.

4. Recover the database cluster
   Log in to WebAdmin, and in the [Instances] tab, select the instance to be recovered and click.

5. Recover to the backup point
   In the [Restore Instance] dialog box, click [Yes].
   Recovery is performed. An instance is automatically started when recovery is successful.

Note

WebAdmin cannot accurately recover a hash index. If you are using a hash index, then after recovery, execute the REINDEX command for the appropriate index.

6. Resume database operations
   If necessary, re-execute transaction processing from the backup point to when an erroneous operation was performed, and then resume database operations.

10.3.2 Using the pgx_rcvall Command

The pgx_rcvall command recovers database clusters to the restore point created with the server command. Refer to "Setting a restore point" in "3.2.2 Using Server Commands" for information on how to create a restore point.

Follow the procedure below to recover the data in the data storage disk.

1. Stop applications
   Stop applications that are using the database.

2. Stop the instance
   Stop the instance. Refer to "2.1.2 Using Commands" for information on how to stop an instance.
   If the instance fails to stop, refer to "10.11 Actions in Response to Failure to Stop an Instance".

3. Confirm the restore point
   Use a restore point recorded in an arbitrary file, as explained in "3.2.2 Using Server Commands", to determine a restore point prior to the erroneous operation.

4. Recover the keystore, and enable automatic opening of the keystore
   When the data in the database has been encrypted, restore the keystore to its state at the time of the database backup. Configure automatic opening of the keystore as necessary.

5. Recover the database cluster
   Use the pgx_rcvall command to recover the database cluster.
   Specify the following values in the pgx_rcvall command:
- Specify the data storage destination in the -D option. If the -D option is omitted, the value of the PGDATA environment variable is used by default.
- Specify the backup data storage destination in the -B option.
- The -n option recovers the data to the specified restore point.

Example
The following example executes the pgx_rcvall command with the restore point "batch_20150503_1".

```bash
> pgx_rcvall -D D:\database\inst1 -B E:\backup\inst1 -n batch_20150503_1
```

Note
If recovery fails, remove the cause of the error in accordance with the displayed error message and then re-execute the pgx_rcvall command.
If the message "pgx_rcvall: an error occurred during recovery" is displayed, then the log recorded when recovery was executed is output after this message. The cause of the error is output in around the last fifteen lines of the log, so remove the cause of the error in accordance with the message and then re-execute the pgx_rcvall command.
The following message displayed during recovery is output as part of normal operation of pgx_rcvall (therefore the user does not need not be concerned).

```
FATAL: The database system is starting
```

6. Start the instance
Start the instance.
Refer to "2.1.2 Using Commands" for information on how to start an instance.

Note
The pgx_rcvall command cannot accurately recover a hash index. If you are using a hash index, wait for the instance to start and then execute the REINDEX command for the appropriate index.

7. Restart operation of the database
If necessary, re-execute transaction processing from the specified recovery time to the point when an erroneous operation was performed, and then resume database operations.

See
Refer to "pgx_rcvall" in the Reference for information on the pgx_rcvall command.

10.4 Actions in Response to an Application Error
If there is a connection from a client that has been in the waiting state for an extended period, you can minimize performance degradation of the database by closing the problematic connection.
The following methods are available for identifying a connection to be closed:

- view(pg_stat_activity) (refer to "10.4.1 When using the view (pg_stat_activity")
- pgAdmin (refer to "10.4.2 Using pgAdmin")

Use the system management function (pg_terminate_backend) to disconnect connections.
10.4.1 When using the view (pg_stat_activity)

When using the view (pg_stat_activity), follow the procedure below to close a connection.

1. Use psql command to connect to the postgres database.

```bash
> psql postgres
psql (9.6.2)
Type "help" for help.
```

2. Close connections from clients that have been in the waiting state for an extended period.

   Use pg_terminate_backend() to close connections that have been trying to connect for an extended period.

   However, when considering continued compatibility of applications, do not reference or use system catalogs and functions directly in SQL statements. Refer to “Notes on Application Compatibility” in the Application Development Guide for details.

   **Example**

   The following example closes connections where the client has been in the waiting state for at least 60 minutes.

   ```sql
   select pid, usename, application_name, client_hostname, pg_terminate_backend(pid) from pg_stat_activity where state='idle in transaction' and current_timestamp > cast(query_start + interval '60 minutes' as timestamp);
   
<table>
<thead>
<tr>
<th>pid</th>
<th>usename</th>
<th>application_name</th>
<th>client_hostname</th>
<th>pg_terminate_backend</th>
</tr>
</thead>
<tbody>
<tr>
<td>4684</td>
<td>fsepuser</td>
<td>apl1</td>
<td>192.11.11.1</td>
<td>t</td>
</tr>
</tbody>
</table>
   ``

See

- Refer to "System Administration Functions" under "The SQL Language" in the PostgreSQL Documentation for information on pg_terminate_backend.
- Refer to “Notes on Application Compatibility” in the Application Development Guide for information on how to maintain application compatibility.

10.4.2 Using pgAdmin

If using pgAdmin, follow the procedure below to close connections.
1. From the [Tools] menu in pgAdmin, click [Server Status].
2. Close client connections that have been in the waiting state for an extended period.

From the transaction start time displayed under [TX start], select connections that have been in the waiting state for an extended period. Then click the red square button to close the connections.

10.5 Actions in Response to an Access Error

If access is denied, grant privileges allowing the instance administrator to operate the following directories, and then re-execute the operation. Also, refer to the event log and the server log, and confirm that the file system has not been mounted as read-only due to a disk error. If the file system has been mounted as read-only, mount it properly and then re-execute operations.

- Data storage destination
- Tablespace storage destination
- Transaction log storage destination
- Backup data storage destination

See

Refer to "Preparing Directories to Deploy Resources" under "Setup" in the Installation and Setup Guide for Server for information on the privileges required for the directory.
10.6 Actions in Response to Insufficient Space on the Data Storage Destination

If the data storage destination runs out of space, check if the disk contains any unnecessary files and delete them so that operations can continue.

If deleting unnecessary files does not solve the problem, you must migrate data to a disk with larger capacity.

There are two methods of migrating data:

- 10.6.1 Using a Tablespace
- 10.6.2 Replacing the Disk with a Larger Capacity Disk

10.6.1 Using a Tablespace

FUJITSU Enterprise Postgres enables you to use a tablespace to change the storage destination of database objects, such as tables and indexes, to a different disk.

The procedure is as follows:

1. Create a tablespace
   Use the CREATE TABLESPACE command to create a new tablespace in the prepared disk.

2. Modify the tablespace
   Use the ALTER TABLE command to modify tables for the newly defined tablespace.

See

Refer to “SQL Commands” under “Reference” in the PostgreSQL Documentation for information on the CREATE TABLESPACE command and ALTER TABLE command.

10.6.2 Replacing the Disk with a Larger Capacity Disk

Before replacing the disk with a larger capacity disk, migrate resources at the data storage destination using the backup and recovery features.

There are two methods of performing backup and recovery:

- 10.6.2.1 Using WebAdmin
- 10.6.2.2 Using Server Commands

The following sections describe procedures that use each of these methods to replace the disk and migrate resources at the data storage destination.

Note

- Before replacing the disk, stop applications and instances that are using the database.
- It is recommended that you back up the database cluster following recovery. Backup deletes obsolete archive logs (transaction logs copied to the backup data storage destination), freeing up disk space and reducing the recovery time.

10.6.2.1 Using WebAdmin

Follow the procedure below to replace the disk and migrate resources at the data storage destination by using WebAdmin.

1. Back up files
   If the disk at the data storage destination contains any required files, back up the files. It is not necessary to back up the data storage destination.
2. Stop applications
   Stop applications that are using the database.

3. Back up the database cluster
   Back up the latest resources at the data storage destination. Refer to "3.2.1 Using WebAdmin" for details.

4. Stop the instance
   Stop the instance. Refer to "2.1.1 Using WebAdmin" for information on how to stop an instance.

5. Replace with a larger capacity disk
   Replace the disk. Then, recover the volume configuration information.

6. Recover the database cluster
   Log in to WebAdmin, and perform recovery operations. Refer to steps 4 ("Create a tablespace directory ") to 7 ("Run recovery") under "If failure occurred in the data storage disk or the transaction log storage disk" in "10.1.1 Using WebAdmin" for information on the procedure. An instance is automatically started when recovery is successful.

7. Resume applications
   Resume applications that are using the database.

8. Restore the files
   Restore the files backed up in step 1.

**10.6.2.2 Using Server Commands**

Follow the procedure below to replace the disk and migrate resources at the data storage destination by using server commands.

1. Back up files
   If the disk at the data storage destination contains any required files, back up the files. It is not necessary to back up the data storage destination.

2. Stop applications
   Stop applications that are using the database.

3. Back up the database cluster
   Back up the latest resources at the data storage destination. Refer to "3.2.2 Using Server Commands" for details.

4. Stop the instance
   After backup is complete, stop the instance. Refer to "2.1.2 Using Commands" for information on how to stop an instance.
   If the instance fails to stop, refer to "10.11 Actions in Response to Failure to Stop an Instance".

5. Replace with a larger capacity disk
   Replace the disk. Then, recover the volume configuration information.

6. Create a data storage destination
   Create a data storage destination. If a tablespace was defined, also create a directory for it.
   In [Properties] in Windows(R) Explorer, set appropriate permissions so that only the instance administrator can access the data storage destination directory. (Refer to [Help and Support] in Windows(R) for information on [Properties].)

7. Recover the keystore, and enable automatic opening of the keystore
   When the data in the database has been encrypted, restore the keystore to its state at the time of the database backup. Configure automatic opening of the keystore as necessary.

8. Recover the database cluster
   Use the pgx_reva11 command to recover the database cluster.
- Specify the data storage destination in the -D option. If the -D option is omitted, the value of the PGDATA environment variable is used by default.

- Specify the backup storage directory in the -B option.

Example

```
> pgx_rcvall -D D:\database\inst1 -B E:\backup\inst1
```

**Note**

If recovery fails, remove the cause of the error in accordance with the displayed error message and then re-execute the pgx_rcvall command.

If the message "pgx_rcvall: an error occurred during recovery" is displayed, then the log recorded when recovery was executed is output after this message. The cause of the error is output in around the last fifteen lines of the log, so remove the cause of the error in accordance with the message and then re-execute the pgx_rcvall command.

The following message displayed during recovery is output as part of normal operation of pgx_rcvall (therefore the user does not need not be concerned).

```
FATAL: The database system is starting
```

**See**

Refer to "pgx_rcvall" in the Reference for information on the pgx_rcvall command.

9. Start the instance

Start the instance.

Refer to "2.1.2 Using Commands" for information on how to start an instance.

**Note**

The pgx_rcvall command cannot accurately recover a hash index. If you are using a hash index, wait for the pgx_rcvall command to end and then execute the REINDEX command for the appropriate index.

10. Resume applications

Resume applications that are using the database.

11. Restore files

Restore the files backed up in step 1.

### 10.7 Actions in Response to Insufficient Space on the Backup Data Storage Destination

If space runs out on the backup data storage destination, check if the disk contains any unnecessary files and delete them, and then make a backup as required.

If deleting unnecessary files does not solve the problem, take the following action:

- **10.7.1 Temporarily Saving Backup Data**
- **10.7.2 Replacing the Disk with a Larger Capacity Disk**
10.7.1 Temporarily Saving Backup Data

This method involves temporarily moving backup data to a different directory, saving it there, and securing disk space on the backup data storage destination so that a backup can be made normally.

Use this method if you need time to prepare a larger capacity disk.

If space runs out on the backup data storage destination, archive logs can no longer be stored in the backup data storage destination. As a result, transaction logs continue to accumulate in the data storage destination or the transaction log storage destination.

If action is not taken soon, the transaction log storage destination will become full, and operations may not be able to continue.

To prevent this, secure space in the backup data storage destination, so that archive logs can be stored.

There are two methods of taking action:

- 10.7.1.1 Using WebAdmin
- 10.7.1.2 Using Server Commands

10.7.1.1 Using WebAdmin

Follow the procedure below to recover the backup data storage disk.

1. Temporarily save backup data

   Move backup data to a different directory and temporarily save it, and secure space in the backup data storage destination directory.

   The reason for saving the backup data is so that the data in the data storage destination can be recovered even if it is corrupted before you perform recovery. If there is no disk at the save destination and you consider that there is no risk of corruption at the data storage destination, delete the backup data.

   The following example saves backup data from the backup data storage destination directory (E:\backup\inst1) under F:\mnt\usb \backup.

   Example
   ```
   > mkdir F:\mnt\usb\backup
   > move E:\backup\inst1\* F:\mnt\usb\backup
   ```

   Note: Place the temporary backup destination directory in a location where it will not impact on operating system resources or FUJITSU Enterprise Postgres resources.

2. Back up the database cluster

   Back up the latest resources at the data storage destination. Refer to "3.2.1 Using WebAdmin" for details.

3. Delete temporarily saved backup data

   If backup completes normally, the temporarily saved backup data becomes unnecessary and is deleted.

   The following example deletes backup data that was temporarily saved in F:\mnt\usb.

   Example
   ```
   > rmdir /S /Q F:\mnt\usb\backup
   ```

10.7.1.2 Using Server Commands

The following describes the procedure for recovering the backup storage disk.

There are two methods of taking action:

- Performing recovery while the instance is active
- Stopping the instance before performing recovery

The following table shows the different steps to be performed depending on whether you stop the instance.
<table>
<thead>
<tr>
<th>No</th>
<th>Step</th>
<th>Instance stopped</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1</td>
<td>Stop transaction log mirroring</td>
<td>Y</td>
</tr>
<tr>
<td>2</td>
<td>Stop output of archive logs</td>
<td>Y</td>
</tr>
<tr>
<td>3</td>
<td>Stop applications</td>
<td>N</td>
</tr>
<tr>
<td>4</td>
<td>Stop the instance</td>
<td>N</td>
</tr>
<tr>
<td>5</td>
<td>Temporarily save backup data</td>
<td>Y</td>
</tr>
<tr>
<td>6</td>
<td>Resume output of archive logs</td>
<td>Y</td>
</tr>
<tr>
<td>7</td>
<td>Resume transaction log mirroring</td>
<td>Y</td>
</tr>
<tr>
<td>8</td>
<td>Start an instance</td>
<td>N</td>
</tr>
<tr>
<td>9</td>
<td>Run backup</td>
<td>Y</td>
</tr>
<tr>
<td>10</td>
<td>Resume applications</td>
<td>N</td>
</tr>
<tr>
<td>11</td>
<td>Delete temporarily saved backup data</td>
<td>Y</td>
</tr>
</tbody>
</table>

Y: Required  
N: Not required

The procedure is as follows:

**Performing recovery while the instance is active**

1. Stop transaction log mirroring
   
   Stop transaction log mirroring.

   ```sql
   postgres=# SELECT pgx Pause_wal_multiplexing();
   LOG: multiplexing of transaction log files has been stopped
   pgx_pause_wal_multiplexing
   ------------------------------
   (1 row)
   ```

2. Stop output of archive logs

   Transaction logs may accumulate during replacement of backup storage disk, and if the data storage disk or the transaction log storage disk becomes full, there is a risk that operations may not be able to continue.

   To prevent this, use the following methods to stop output of archive logs.

   - Changing the archive_command parameter
     
     Specify a command that will surely complete normally, so that archive logs will be regarded as having been output.

     If you specify echo, a message is output to the server log, so it may be used as a reference when you conduct investigations.

   - Reloading the configuration file
     
     Run the `pg_ctl reload` command or the `pg_reload_conf` SQL function.

   If you simply want to stop output of errors without the risk that operations will not be able to continue, specify an empty string ("") in archive_command and reload the configuration file.

3. Temporarily save backup data

   Move backup data to a different directory and temporarily save it, and secure space in the backup data storage destination directory.

   The reason for saving the backup data is so that the data in the data storage destination can be recovered even if it is corrupted before you perform the next step. If there is no disk at the save destination and you consider that there is no risk of corruption at the data storage destination, delete the backup data.
The following example saves backup data from the backup data storage destination directory (E:\backup\inst1) under F:\mnt\usb \backup.

**Example**

```bash
> mkdir F:\mnt\usb\backup
> move E:\backup\inst1\* F:\mnt\usb\backup
```

Note: Place the temporary backup destination directory in a location where it will not impact on operating system resources or FUJITSU Enterprise Postgres resources.

4. Resume output of archive logs
   Return the archive_command setting to its original value, and reload the configuration file.

5. Resume transaction log mirroring
   Execute the `pgx_resume_wal_multiplexing` SQL function.

   **Example**
   ```sql
   SELECT pgx_resume_wal_multiplexing()
   ```

6. Run backup
   Use the `pgx_dmpall` command to back up the database cluster.
   Specify the following option in the `pgx_dmpall` command:
   - Specify the directory of the data storage destination in the -D option. If the -D option is omitted, the value of the PGDATA environment variable is used by default.

   **Example**
   ```bash
   > pgx_dmpall -D D:\database\inst1
   ```

7. Delete temporarily saved backup data
   If backup completes normally, the temporarily saved backup data becomes unnecessary and is deleted.
   The following example deletes backup data that was temporarily saved in F:\mnt\usb.

   **Example**
   ```bash
   > rmdir /S /Q F:\mnt\usb\backup
   ```

**If an instance has been stopped**

1. Stop applications
   Stop applications that are using the database.

2. Stop the instance
   Stop the instance. Refer to "2.1.2 Using Commands" for details.
   If the instance fails to stop, refer to "10.11 Actions in Response to Failure to Stop an Instance".

3. Temporarily save backup data
   Move backup data to a different directory and temporarily save it, and secure space in the backup data storage destination directory.
   The reason for saving the backup data is so that the data in the data storage destination can be recovered even if it is corrupted before you perform recovery. If there is no disk at the save destination and you consider that there is no risk of corruption at the data storage destination, delete the backup data.

   The following example saves backup data from the backup data storage destination directory (E:\backup\inst1) under F:\mnt\usb \backup.
Example

```
> mkdir F:\mnt\usb\backup
> move E:\backup\inst1\* F:\mnt\usb\backup
```

Note: Place the temporary backup destination directory in a location where it will not impact on operating system resources or FUJITSU Enterprise Postgres resources.

4. Start the instance

Start the instance. Refer to "2.1.2 Using Commands" for information on how to start an instance.

5. Run backup

Use the pgx_dmpall command to back up the database cluster.

Specify the following value in the pgx_dmpall command:

- Specify the data storage destination in the -D option. If the -D option is omitted, the value of the PGDATA environment variable is used by default.

Example

```
> pgx_dmpall -D D:\database\inst1
```

6. Resume applications

Resume applications that are using the database.

7. Delete temporarily saved backup data

If backup completes normally, the temporarily saved backup data becomes unnecessary and is deleted.

The following example deletes backup data that was temporarily saved in F:\mnt\usb.

Example

```
> rmdir /S /Q F:\mnt\usb\backup
```

See

- Refer to "pgx_rcvall" and "pgx_dmpall" in the Reference for information on the pgx_rcvall command and pgx_dmpall command.
- Refer to "Write Ahead Log" under "Server Administration" in the PostgreSQL Documentation for information on archive_command.
- Refer to "B.1 WAL Mirroring Control Functions" for information on the pgx_is_wal_multiplexing_paused and pgx_resume_wal_multiplexing.

---

## 10.7.2 Replacing the Disk with a Larger Capacity Disk

This method involves replacing the disk at the backup data storage destination with a larger capacity disk, so that it does not run out of free space again. After replacing the disk, back up data to obtain a proper backup.

There are two methods of performing backup:

- **10.7.2.1 Using WebAdmin**
- **10.7.2.2 Using Server Commands**

**Note**

Before replacing the disk, stop applications that are using the database.
10.7.2.1 Using WebAdmin

Follow the procedure below to recover the backup storage disk.

1. Back up files

   If the disk at the backup data storage destination contains any required files, back up the files. It is not necessary to back up the backup data storage destination.

2. Temporarily save backup data

   Save the backup data to a different directory.

   The reason for saving the backup data is so that the data in the data storage destination can be recovered even if it is corrupted before you perform the next step. If there is no disk at the save destination and you consider that there is no risk of corruption at the data storage destination, delete the backup data.

   The following example saves backup data from the backup data storage destination directory (E:\backup\inst1) under F:\mnt\usb\backup.

   **Example**

   ```
   > mkdir F:\mnt\usb\backup
   > move E:\backup\inst1\* F:\mnt\usb\backup
   ```

   **Note:** Place the temporary backup destination directory in a location where it will not impact on operating system resources or FUJITSU Enterprise Postgres resources.

3. Replace with a larger capacity disk

   Replace the disk. Then, recover the volume configuration information.

4. Run backup

   Log in to WebAdmin, and perform recovery operations. Refer to steps 2 ("Recover the backup data") and 3 ("Run backup") under "If failure occurred on the backup storage disk" in "10.1.1 Using WebAdmin".

5. Restore files

   Restore the files backed up in step 1.

6. Delete temporarily saved backup data

   If backup completes normally, the temporarily saved backup data becomes unnecessary and is deleted.

   The following example deletes backup data that was temporarily saved in F:\mnt\usb.

   **Example**

   ```
   > rmdir /S /Q F:\mnt\usb\backup
   ```

10.7.2.2 Using Server Commands

The procedure for recovering the backup data storage disk is described below.

There are two methods of taking action:

- Performing recovery while the instance is active
- Stopping the instance before performing recovery

The following table shows the different steps to be performed depending on whether you stop the instance.

<table>
<thead>
<tr>
<th>No</th>
<th>Step</th>
<th>Instance stopped</th>
</tr>
</thead>
<tbody>

<td>Y    Y</td>
</tr>
<tr>
<td>15</td>
<td>Delete temporarily saved backup data</td>
<td>Y    Y</td>
</tr>
</tbody>
</table>

Y: Required  
N: Not required

The procedure is as follows:

If an instance has not been stopped

1. Back up files
   
   If the disk at the backup data storage destination contains any required files, back up the files. It is not necessary to back up the
   backup data storage destination.

2. Temporarily save backup data
   
   Save the backup data to a different directory.
   
   The reason for saving the backup data is so that the data in the data storage destination can be recovered even if it is corrupted
   before you perform the next step. If there is no disk at the save destination and you consider that there is no risk of corruption at
   the data storage destination, delete the backup data.

   The following example saves backup data from the backup data storage destination directory (E:\backup\inst1) under F:\mnt\usb\ backup.

   **Example**

   ```
   > mkdir F:\mnt\usb\backup
   > move E:\backup\inst1\* F:\mnt\usb\backup
   ```

3. Confirm that transaction log mirroring has stopped

   Use the following SQL function to confirm that transaction log mirroring has stopped.

   ```
   postgres=# SELECT pgx_is_wal_multiplexing_paused();
   pgx_is_wal_multiplexing_paused
   -------------------
   t
   (1 row)
   ```

   If transaction log mirroring has not stopped, then stop it using the following SQL function.
4. Stop output of archive logs

Transaction logs may accumulate during replacement of backup storage disk, and if the data storage destination disk or the transaction log storage destination disk becomes full, there is a risk that operations may not be able to continue.

To prevent this, use the following methods to stop output of archive logs.

- Changing the archive_command parameter
  Specify a command that will surely complete normally, so that archive logs will be regarded as having been output.
  If you specify echo, a message is output to the server log, so it may be used as a reference when you conduct investigations.

- Reloading the configuration file
  Run the pg_ctl reload command or the pg_reload_conf SQL function.

If you simply want to stop output of errors without the risk that operations will not be able to continue, specify an empty string ("") in archive_command and reload the configuration file.

5. Replace with a larger capacity disk

Replace the disk. Then, recover the volume configuration information.

6. Create a backup data storage destination

Create a backup data storage destination.

In [Properties] in Windows(R) Explorer, set appropriate permissions so that only the instance administrator can access the backup data storage destination directory. (Refer to [Help and Support] in Windows(R) for information on [Properties].)

Refer to "3.2.2 Using Server Commands" for details.

7. Resume output of archive logs

Return the archive_command setting to its original value, and reload the configuration file.

8. Resume transaction log mirroring

Execute the pgx_resume_wal_multiplexing SQL function.

Example

```
SELECT pgx_resume_wal_multiplexing()
```

9. Run backup

Use the pgx_dmpall command to back up the database cluster.

Specify the following value in the pgx_dmpall command:

- Specify the data storage destination in the -D option. If the -D option is omitted, the value of the PGDATA environment variable is used by default.

Example

```
> pgx_dmpall -D D:\database\inst1
```

10. Restore files

Restore the files backed up in step 1.

11. Delete temporarily saved backup data

If backup completes normally, the temporarily saved backup data becomes unnecessary and is deleted.
The following example deletes backup data that was temporarily saved in F:\mnt\usb.

Example

```bash
> rmdir /S /Q F:\mnt\usb\backup
```

If an instance has been stopped

1. Back up files
   If the disk at the backup data storage destination contains any required files, back up the files. It is not necessary to back up the backup data storage destination.

2. Temporarily save backup data
   Save the backup data to a different directory.
   The reason for saving the backup data is so that the data in the data storage destination can be recovered even if it is corrupted before you perform the next step. If there is no disk at the save destination and you consider that there is no risk of corruption at the data storage destination, delete the backup data.

   The following example saves backup data from the backup data storage destination directory (E:\backup\inst1) under F:\mnt\usb\backup.

   Example

   ```bash
   > mkdir F:\mnt\usb\backup
   > move E:\backup\inst1\* F:\mnt\usb\backup
   ```
   Note: Place the temporary backup destination directory in a location where it will not impact on operating system resources or FUJITSU Enterprise Postgres resources.

3. Stop applications
   Stop applications that are using the database.

4. Stop the instance
   Stop the instance. Refer to "2.1.2 Using Commands" for information on how to stop an instance.
   If the instance fails to stop, refer to "10.11 Actions in Response to Failure to Stop an Instance".

5. Replace with a larger capacity disk
   Replace the disk. Then, recover the volume configuration information.

6. Create a backup data storage destination
   Create a backup data storage destination.

   In [Properties] in Windows(R) Explorer, set appropriate permissions so that only the instance administrator can access the backup data storage destination directory. (Refer to [Help and Support] in Windows(R) for information on [Properties].)

   Refer to "3.2.2 Using Server Commands" for details.

7. Start the instance
   Start the instance. Refer to "2.1.2 Using Commands" for information on how to start an instance.

8. Run backup
   Use the pgx_dmpall command to back up the database cluster.

   Specify the following value in the pgx_dmpall command:
   - Specify the data storage destination in the -D option. If the -D option is omitted, the value of the PGDATA environment variable is used by default.

   Example
9. Resume applications
   Resume applications that are using the database.

10. Restore files
   Restore the files backed up in step 1.

11. Delete temporarily saved backup data
   If backup completes normally, the temporarily saved backup data becomes unnecessary and is deleted.
   The following example deletes backup data that was temporarily saved in F:\mnt\usb.
   Example
   ```
   > rmdir /S /Q F:\mnt\usb\backup
   ```

See

- Refer to "pgx_rcvall" and "pgx_dmpall" in the Reference for information on the pgx_rcvall command and pgx_dmpall command.
- Refer to "Write Ahead Log" under "Server Administration" in the PostgreSQL Documentation for information on archive_command.
- Refer to "B.1 WAL Mirroring Control Functions" for information on the pgx_is_wal_multiplexing_paused and pgx_resume_wal_multiplexing.

10.8 Actions in Response to Insufficient Space on the Transaction Log Storage Destination

If the transaction log storage destination runs out of space, check if the disk contains any unnecessary files and delete them so that operations can continue.

If deleting unnecessary files does not solve the problem, you must migrate data to a disk with larger capacity.

10.8.1 Replacing the Disk with a Larger Capacity Disk

Before replacing the disk with a larger capacity disk, migrate resources at the transaction log storage destination using the backup and recovery features.

There are two methods of performing backup and recovery:
- 10.8.1.1 Using WebAdmin
- 10.8.1.2 Using Server Commands

The following sections describe procedures that use each of these methods to replace the disk and migrate resources at the transaction log storage destination.

Note

- Before replacing the disk, stop applications that are using the database.
- It is recommended that you back up the database cluster following recovery. Backup deletes obsolete archive logs (transaction logs copied to the backup data storage destination), freeing up disk space and reducing the recovery time.
10.8.1.1 Using WebAdmin

Follow the procedure below to replace the disk and migrate resources at the transaction log storage destination by using WebAdmin.

1. Back up files
   If the disk at the transaction log storage destination contains any required files, back up the files. It is not necessary to back up the transaction log storage destination.

2. Back up the database cluster
   Back up the latest data storage destination resources and transaction log storage destination resources (refer to "3.2.1 Using WebAdmin" for details).

3. Stop applications
   Stop applications that are using the database.

4. Stop the instance
   Stop the instance. Refer to "2.1.1 Using WebAdmin" for information on how to stop an instance. WebAdmin automatically stops instances if recovery of the database cluster is performed without stopping the instance.

5. Replace with a larger capacity disk
   Replace the disk. Then, recover the volume configuration information.

6. Create a tablespace directory
   If a tablespace was defined after backing up, create a directory for it.

7. Recover the keystore, and enable automatic opening of the keystore
   Do the following if the data in the database has been encrypted:
   - Restore the keystore to its state at the time of the database backup.
   - Enable automatic opening of the keystore.

8. Recover the database cluster
   Log in to WebAdmin, and perform recovery operations. Refer to steps 4 ("Create a tablespace directory") to 7 ("Run Recovery") under "If failure occurred in the data storage disk or the transaction log storage disk" in "10.1.1 Using WebAdmin" for information on the procedure. An instance is automatically started when recovery is successful.

9. Resume applications
   Resume applications that are using the database.

10. Restore files
    Restore the files backed up in step 1.

10.8.1.2 Using Server Commands

Follow the procedure below to replace the disk and migrate resources at the transaction log storage destination by using server commands.

1. Back up files
   If the disk at the transaction log storage destination contains any required files, back up the files. It is not necessary to back up the transaction log storage destination.

2. Back up the database cluster
   Use server commands to back up the latest data storage destination resources and transaction log storage destination resources. Refer to "3.2.2 Using Server Commands" for information on how to perform backup.

3. Stop applications
   Stop applications that are using the database.

4. Stop the instance
   After backup is complete, stop the instance. Refer to "2.1.2 Using Commands" for information on how to stop an instance.
If the instance fails to stop, refer to "10.11 Actions in Response to Failure to Stop an Instance".

5. Replace with a larger capacity disk
   Replace the disk. Then, recover the volume configuration information.

6. Create a transaction log storage destination
   Create a transaction log storage destination. If a tablespace was defined, also create a directory for it.

   In [Properties] in Windows(R) Explorer, set appropriate permissions so that only the instance administrator can access the transaction log destination directory. (Refer to [Help and Support] in Windows(R) for information on [Properties].)

7. Recover the keystore, and enable automatic opening of the keystore
   When the data in the database has been encrypted, restore the keystore to its state at the time of the database backup. Configure automatic opening of the keystore as necessary.

8. Recover the database cluster
   Use the pgx_rcvall command to recover the database cluster.
   - Specify the data storage destination in the -D option. If the -D option is omitted, the value of the PGDATA environment variable is used by default.
   - Specify the backup storage directory in the -B option.

   Example
   ```
   > pgx_rcvall -D D:\database\inst1 -B E:\backup\inst1
   ```

   Note
   If recovery fails, remove the cause of the error in accordance with the displayed error message and then re-execute the pgx_rcvall command.
   
   If the message "pgx_rcvall: an error occurred during recovery" is displayed, then the log recorded when recovery was executed is output after this message. The cause of the error is output in around the last fifteen lines of the log, so remove the cause of the error in accordance with the message and then re-execute the pgx_rcvall command.
   
   The following message displayed during recovery is output as part of normal operation of pgx_rcvall command (therefore the user does not need not be concerned).
   ```
   FATAL: The database system is starting
   ```

   See
   Refer to "pgx_rcvall" in the Reference for information on the pgx_rcvall command.

9. Start the instance
   Start the instance.
   Refer to "2.1.2 Using Commands" for information on how to start an instance.

   Note
   The pgx_rcvall command cannot accurately recover a hash index. If you are using a hash index, wait for the instance to start and then execute the REINDEX command for the appropriate index.

10. Resume applications
    Resume applications that are using the database.
11. Restore files
   Restore the files backed up in step 1.

10.9 Errors in More Than One Storage Disk

If an error occurs in the storage destination disks or resources are corrupted, determine the cause of the error from event logs and server logs and remove the cause.

If errors occur in either of the following combinations, you cannot recover the database.
Recreate the instance, and rebuild the runtime environment.

<table>
<thead>
<tr>
<th>Data storage disk</th>
<th>Transaction log storage disk</th>
<th>Backup data storage disk</th>
</tr>
</thead>
<tbody>
<tr>
<td>Error</td>
<td>-</td>
<td>Error</td>
</tr>
<tr>
<td>-</td>
<td>Error</td>
<td>Error</td>
</tr>
</tbody>
</table>

See
Refer to “Setup” in the Installation and Setup Guide for Server for information on how to create an instance and build the runtime environment.

10.10 Actions in Response to Instance Startup Failure

If an instance fails to start, refer to the event log and the server log, and determine the cause of the failure.
If using WebAdmin, remove the cause of the error. Then, click [Solution] and [Recheck the status] and confirm that the instance is in the normal state.
The following sections describe common causes of errors and the actions to take.

10.10.1 Errors in the Configuration File

If you have directly edited the configuration file using a text editor or changed the settings using WebAdmin, refer to the event log and the server log, confirm that no messages relating to the files below have been output.

- postgresql.conf
- pg_hba.conf

See
Refer to the following for information on the parameters in the configuration file:

- “Configuring Parameters” in the Installation and Setup Guide for Server
- “Appendix A Parameters”
- “Server Configuration” and “Client Authentication” under “Server Administration” in the PostgreSQL Documentation

10.10.2 Errors Caused by Power Failure or Mounting Issues

If mounting is cancelled after restarting the server, for example, because the disk device for each storage destination disk was not turned on, or because automatic mounting has not been set, then starting an instance will fail.
Refer to "10.14.2 Errors Caused by Power Failure or Mounting Issues", and take actions accordingly.
10.10.3 Other Errors

This section describes the recovery procedure to be used if you cannot take any action or the instance cannot start even after you have referred to the event log and the server log.

There are two methods of recovery:

- 10.10.3.1 Using WebAdmin
- 10.10.3.2 Using Server Commands

Note that recovery will not be possible if there is an error at the backup data storage destination. If the problem cannot be resolved, contact Fujitsu technical support.

10.10.3.1 Using WebAdmin

Follow the procedure below to perform recovery.

1. Delete the data storage destination directory and the transaction log storage destination directory
   - Back up the data storage destination directory and the transaction log storage destination directory before deleting them.
2. Reconfirm the status
   - Log in to WebAdmin, and in the [Instances] tab, click [Solution] for the error message.
   - Click [Recheck the status] to reconfirm the storage destination resources.
3. Run recovery
   - Restore the database cluster after WebAdmin detects an error.
   - Refer to "10.2.1 Using WebAdmin" for details.

10.10.3.2 Using Server Commands

Follow the procedure below to recover the database.

1. Delete the data storage destination directory and the transaction log storage destination directory
   - Save the data storage destination directory and the transaction log storage destination directory, and then delete them.
2. Execute recovery
   - Use the pgx_rcvall command to recover the database cluster.
   - Refer to "10.2.2 Using the pgx_rcvall Command" for details.

10.11 Actions in Response to Failure to Stop an Instance

If an instance fails to stop, refer to the event log and the server log, and determine the cause of the failure.

If the instance cannot stop despite taking action, perform the following operation to stop the instance.

There are two methods of recovery:

- 10.11.1 Using WebAdmin
- 10.11.2 Using Server Commands

10.11.1 Using WebAdmin

In the [Instances] tab, click [ ] and select the Fast stop mode or the Immediate stop mode to stop the instance. Forcibly terminate the server process from WebAdmin if the instance cannot be stopped.

Refer to "2.1.1 Using WebAdmin" for information on the stop modes.
### 10.11.2 Using Server Commands

There are three methods:

- **Stopping the Instance Using the Fast Mode**
  
  If backup is in progress, then terminate it, roll back all executing transactions, forcibly close client connections, and then stop the instance.

- **Stopping the Instance Using the Immediate Mode**
  
  Forcibly terminate the instance immediately. A crash recovery is run when the instance is restarted.

- **Forcibly Stopping the Server Process**
  
  Reliably stops the server process when the other methods are unsuccessful.

#### 10.11.2.1 Stopping the Instance Using the Fast Mode

Specify `-m fast` in the `pg_ctl` command to stop the instance.

If the instance fails to stop when you use this method, stop the instance as described in "10.11.2.2 Stopping the Instance Using the Immediate Mode" or "10.11.2.3 Forcibly Stopping the Server Process".

**Example**

```
> pg_ctl stop -D D:\database\inst1 -m fast
```

#### 10.11.2.2 Stopping the Instance Using the Immediate Mode

Specify `-m immediate` in the `pg_ctl` command to stop the instance.

If the instance fails to stop when you use this method, stop the instance as described in "10.11.2.3 Forcibly Stopping the Server Process".

**Example**

```
> pg_ctl stop -D D:\database\inst1 -m immediate
```

#### 10.11.2.3 Forcibly Stopping the Server Process

If both the Fast mode and the Immediate mode fail to stop the instance, use the `kill` parameter of the `pg_ctl` command to forcibly stop the server process.

The procedure is as follows:

1. Execute the `wmi` command to identify the process ID of the server process.

   ```
c:\>wmi
   wmic:root\cli>process where "name = \"postgres.exe\"" get CommandLine,Name,ProcessId
   CommandLine       Name          ProcessId
   "C:\Program Files\Fujitsu\fsepv<xy\server64\bin\postgres.exe" -D "D:\database\inst1"
   postgres.exe  896
   ```

   The `postgres.exe` process ID(896) that indicates the data storage destination directory of the applicable instance in the `-D` option becomes the server process.

2. Forcibly stop the server process

   As instance manager, forcibly stop the server process using the `pg_ctl` command.
10.12 Actions in Response to Failure to Create a Streaming Replication Standby Instance

When creating a streaming replication standby instance using WebAdmin, if the instance creation fails, refer to the event log and the server log, and determine the cause of the failure.

When an error occurs in the creation of the standby instance using WebAdmin, it is unlikely that the partially created standby instance can be resumed to complete the operation.

In such a scenario, fix the cause of the error, delete the partially created standby instance, and then create a new standby instance. This recommendation is based on the following assumptions:

- As the instance is yet to be created completely, there are no applications connecting to the database.
- The standby instance is in error state and is not running.
- There are no backups for the standby instance and as a result, it cannot be recovered.

Refer to “Deleting Instances” in the Installation and Setup Guide for details on how to delete an instance.

10.13 Actions in Response to Error in a Distributed Transaction

If a system failure (such as server failure) occurs in an application that uses distributed transactions (such as .NET TransactionScope), then transactions may be changed to the in-doubt state. At that point, resources accessed by the transaction will be locked, and rendered unusable by other transactions.

The following describes how to check for in-doubt transactions, and how to resolve them.

How to check for in-doubt transactions

The following shows how to check for them:

If the server fails

1. An in-doubt transaction will have occurred if a message similar to the one below is output to the log when the server is restarted.

   Example

   ```
   LOG: Restoring prepared transaction 2103.
   ```

2. Refer to system view `pg_prepared_xacts` to obtain information about the prepared transaction.

   If the transaction identifier of the prepared transaction in the list (in the transaction column of `pg_prepared_xacts`) is the same as the identifier of the in-doubt transaction obtained from the log output when the server was restarted, then that row is the information about the in-doubt transaction.

   Example

   ```
   postgres=# select * from pg_prepared_xacts;
   transaction |   gid     |   prepared |  owner   | database
    -------------+-----------+------------+----------+----------
                  2103 | 374cc221-f6dc-4b73-9d62-d4fec9b430cd | 2015-05-06 16:28:48.471+08 | postgres |
   postgres (1 row)
   ```

   Information about the in-doubt transaction is output to the row with the transaction ID 2103 in the transaction column.

If the client fails

If there are no clients connected and there is a prepared transaction in `pg_prepared_xacts`, then you can determine that the transaction is in the in-doubt state.
If at least one client is connected and there is a prepared transaction in pg_prepared_xacts, you cannot determine whether there is a transaction in the in-doubt state. In this case, use the following query to determine the in-doubt transaction from the acquired database name, user name, the time PREPARE TRANSACTION was executed, and the information about the table name accessed.

```sql
select gid,x.database,owner,prepared,l.relation::regclass as relation from pg_prepared_xacts x
left join pg_locks l on l.virtualtransaction = '-1/'||x.transaction and l.locktype='relation';
```

If it still cannot be determined from this information, wait a few moments and then check pg_prepared_xacts again.

If there is a transaction that has continued since the last time you checked, then it is likely that it is the one in the in-doubt state.

---

Point

As you can see from the explanations in this section, there is no one way to definitively determine in-doubt transactions.

Consider collecting other supplementary information (for example, logging on the client) or performing other operations (for example, allocating database users per job).

---

How to resolve in-doubt transactions

From the system view pg_prepared_xacts mentioned above, obtain the global transaction identifier (in the gid column of pg_prepared_xacts) for the in-doubt transaction, and issue either a ROLLBACK PREPARED statement or COMMIT PREPARED statement to resolve the in-doubt transaction.

---

Example

- Rolling back in-doubt transactions

```sql
postgres=# rollback prepared '374cc221-f6dc-4b73-9d62-d4fec9b430cd';
ROLLBACK PREPARED
```

- Committing in-doubt transactions

```sql
postgres=# commit prepared '374cc221-f6dc-4b73-9d62-d4fec9b430cd';
COMMIT PREPARED
```

---

10.14 I/O Errors Other than Disk Failure

Even if a disk is not defective, the same input-output error messages, as those generated when the disk is defective, may be output.

A few examples of such errors are given below. The appropriate action for each error is explained respectively.

- 10.14.1 Network Error with an External Disk
- 10.14.2 Errors Caused by Power Failure or Mounting Issues

---

10.14.1 Network Error with an External Disk

This is an error that occurs in the network path to/from an external disk.

Determine the cause of the error by checking the information in the event log and the server log, the disk access LED, network wiring, and network card status. Take appropriate action to remove the cause of the error, for example, replace problematic devices.

---

10.14.2 Errors Caused by Power Failure or Mounting Issues

These are errors that occur when the disk device is not turned on, automatic mounting of the disk was not set, or mounting was accidentally cancelled.

---
In this case, check the information in the event log and the server log, the disk access LED, and whether the disk is mounted correctly. If problems are detected, take appropriate action.

If mounting has been cancelled, it is possible that mounting was accidentally cancelled, or the existing setting (automatic mounting at the time of starting the operating system) has been changed so that mounting is not performed automatically. In this case, set the mounting to be performed automatically.

10.15 Anomaly Detection and Resolution

The following operations performed via the command line interface will result in an anomaly in WebAdmin:

- Changes to the port and backup_destination parameters in postgresql.conf
- Changes to Mirroring Controller configuration of cluster replication added via WebAdmin

This section describes when WebAdmin checks for such anomalies, and what takes place when an anomaly is detected.

10.15.1 Port Number and Backup Storage Path Anomalies

An anomaly occurs when the value of [Port number] and/or [Backup storage path] in WebAdmin is different from the value of its corresponding parameter in postgresql.conf - port and backup_destination, respectively.

WebAdmin checks for anomalies when an instance is selected for viewing or any instance operation is performed. Anomalies will be identified for the selected instance only.

The following occurs when an anomaly is detected in port number and/or backup storage path:

- All instance operation buttons are disabled, except for "Edit instance", "Refresh instance", and "Delete Mirroring Controller"
- A red error status indicator is displayed on the instance icon
- For an anomaly specific to backup storage path, a red error status indicator is displayed on the [Backup storage] disk icon, and [Backup storage status] is set to "Error"
- The message, "WebAdmin has detected an anomaly with...", is displayed in the [Message] section along with an associated [Solution] button

Click [Solution]. The [Anomaly Error] dialog box is displayed.
Select the required option, click [OK], and then resolve the anomaly error.

Note

Critical errors encountered during anomaly resolution will be displayed, however, rollback of the instance to its previous state is not supported.

10.15.2 Mirroring Controller Anomalies

The following conditions will cause a Mirroring Controller anomaly:

- The Mirroring Controller management folder or configuration files have been deleted
- The permissions to the Mirroring Controller management folder or configuration files have been changed such that:
  - The instance administrator’s access to Mirroring Controller configuration is denied
  - Users other than an instance administrator have access privileges to Mirroring Controller configuration files

WebAdmin checks for anomalies when Mirroring Controller status check is performed.

The following occurs when a Mirroring Controller anomaly is detected:

- All Mirroring Controller functionality is disabled for the replication cluster, except for “Delete Mirroring Controller”
- [Mirroring Controller status] is set to “Error”
- Either of the following messages is displayed in the [Message] section
  “Failed to access the Mirroring Controller management folder or configuration files ‘path’. Mirroring Controller functionality has been disabled. Consider deleting Mirroring Controller and adding it again.”
  “Failed to find the Mirroring Controller management folder or configuration files ‘path’. Mirroring Controller functionality has been disabled. Consider deleting Mirroring Controller and adding it again.”
Appendix A Parameters

This appendix describes the parameters to be set in the postgresql.conf file of FUJITSU Enterprise Postgres.

The postgresql.conf file is located in the data storage destination.

- core_directory (string)

  This parameter specifies the directory where the corefile is to be output. If this parameter is omitted, the data storage destination is used by default. This parameter can only be set when specified on starting an instance. It cannot be changed dynamically, while an instance is active.

- core_contents (string)

  This parameter specifies the contents to be included in the corefile.
  - full: Outputs all contents of the server process memory to the corefile.
  - none: Does not output a corefile.
  - minimum: Outputs only non-shared memory server processes to the corefile. This reduces the size of the corefile. However, in some cases, this file may not contain sufficient information for examining the factor that caused the corefile to be output.

  If this parameter is omitted, "minimum" is used by default. This parameter can only be set when specified on starting an instance. It cannot be changed dynamically, while an instance is active.

- keystore_location (string)

  This parameter specifies the directory that stores the keystore file. Specify a different location from other database clusters. This parameter can only be set when specified on starting an instance. It cannot be changed dynamically, while an instance is active.

- tablespace_encryption_algorithm (string)

  This parameter specifies the encryption algorithm for tablespaces that will be created. Valid values are AES128, AES256, and none. If you specify "none", encryption is not performed. The default value is "none". To perform encryption, it is recommended that you specify AES256. Only superusers can change this setting.

- backup_destination (string)

  This parameter specifies the absolute path of the directory where pgx_dmpall will store the backup data. Specify a different location from other database clusters. This parameter can only be set when specified on starting an instance. It cannot be changed dynamically, while an instance is active.

  Place this directory on a different disk from the data directory to be backed up and the tablespace directory. Ensure that users do not store arbitrary files in this directory, because the contents of this directory are managed by the database system.

- search_path (string)

  When using the SUBSTR function compatible with Oracle databases, set "oracle" and "pg_catalog" in the search_path parameter. You must specify "oracle" before "pg_catalog".

  **Example**

  ```
  search_path = "\$user", public, oracle, pg_catalog"
  ```

  **Information**

  - The search_path feature specifies the priority of the schema search path. The SUBSTR function in Oracle database is defined in the oracle schema.
  - Refer to "Statement Behavior" under "Server Administration" in the PostgreSQL Documentation for information on search_path.

- track_waits (string)

  This parameter enables collection of statistics for pgx_stat_lwlock and pgx_stat_latch.
- on: Enables collection of statistics.
- off: Disables collection of statistics.

If this parameter is omitted, "on" is assumed.
Only superusers can change this setting.

- track_sql (string)
  This parameter enables collection of statistics for pgx_stat_sql.
  - on: Enables collection of statistics.
  - off: Disables collection of statistics.

If this parameter is omitted, "on" is assumed.
Only superusers can change this setting.

Parameters for the in-memory feature

- reserve_buffer_ratio (numerical value)
  This parameter specifies the proportion of shared memory to be used for a stable buffer table.
  - Minimum value: 0
  - Maximum value: 80

If this parameter is omitted, 0 will be used.

- vci.cost_threshold (numerical value)
  This parameter specifies the lowest cost that selects an execution plan that uses a VCI. If the cost of the best execution plan that does not use a VCI is lower than this value, that execution plan will be selected.
  - Minimum value: 0
  - Maximum value: Maximum value that can be expressed as a 4-byte signed integer

If this parameter is omitted or a value outside this range is specified, 18000 will be used.

- vci.control_max_workers (numerical value)
  This parameter specifies the number of background workers that manage VCI. The number of workers for the entire instance is limited by max_worker_processes, so add the value specified here to max_worker_processes.
  - Minimum value: 1
  - Maximum value: 8388607

If this parameter is omitted or a value outside this range is specified, 8 will be used.

- vci.enable (string)
  This parameter enables or disables VCI.
  - on: Enables VCI.
  - off: Disables VCI.

If this parameter is omitted, "on" will be used.

- vci.log_query (string)
  This parameter enables or disables log output when VCI is not used due to insufficient memory specified by vci.max_local_ros.
  - on: Enables log output.
  - off: Disables log output.

If this parameter is omitted, "off" will be used.
- vci.maintenance_work_mem (numerical value)
  This parameter specifies the maximum memory size used for maintenance of VCI (when executing CREATE INDEX, for example).
  - Minimum value: 1 MB
  - Maximum value: Maximum value that can be expressed as a 4-byte signed integer / 1024
  If this parameter is omitted or a value outside this range is specified, 256 MB will be used.

- vci.max_local_ros (numerical value)
  This parameter specifies the maximum memory size used for VCI scan.
  - Minimum value: 64 MB
  - Maximum value: Maximum value that can be expressed as a 4-byte signed integer
  If this parameter is omitted or a value outside this range is specified, 64 MB will be used.

[Information]

The maximum value that can be expressed as a 4-byte signed integer changes according to the operating system. Follow the definition of the operating system in use.

- vci.max_parallel_degree (numerical value)
  This parameter specifies the maximum number of background workers used for parallel scan. The number of workers for the entire instance is limited by max_worker_processes, so add the value specified here to max_worker_processes.
  A value from -8388607 to 8388607 can be specified.
  - Integer (1 or greater): Parallel scan is performed using the specified degree of parallelism.
  - 0: Stops the parallel scan process.
  - Negative number: The specified value minus the maximum number of CPUs obtained from the environment is used as the degree of parallelism and parallel scan is performed.
  If this parameter is omitted or a value outside this range is specified, "0" will be used.

- vci.shared_work_mem (numerical value)
  This parameter specifies the maximum memory size used for VCI parallel scan.
  - Minimum value: 32 MB
  - Maximum value: Maximum value that can be expressed as a 4-byte signed integer
  If this parameter is omitted or a value outside this range is specified, 1 GB will be used.

- vci.smc_directory (string)
  This parameter specifies a directory name in which a temporary file is created as the dynamic shared memory during a scan using a VCI.
  If this parameter is omitted, a directory (dataStorageDir\base\pgsql_tmp) under the data storage directory will be used.

[Note]

Note the following when specifying the path:
  - Specify \ as the path delimiter.
  - Enclose the path in double quotes ("") if it contains spaces.
See

Refer to "Server Configuration" under "Server Administration" in the PostgreSQL Documentation for information on other postgresql.conf parameters.
Appendix B System Administration Functions

This appendix describes the system administration functions of FUJITSU Enterprise PostgreSQL.

See

Refer to "System Administration Functions" under "The SQL Language" in the PostgreSQL Documentation for information on other system administration functions.

B.1 WAL Mirroring Control Functions

The following table lists the functions that can be used for backup and recovery based on WAL mirroring.

Table B.1 WAL mirroring control functions

<table>
<thead>
<tr>
<th>Name</th>
<th>Return type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>pgx_pause_wal_multiplexing()</td>
<td>void</td>
<td>Stops WAL multiplexing</td>
</tr>
<tr>
<td>pgx_resume_wal_multiplexing()</td>
<td>void</td>
<td>Resumes WAL multiplexing</td>
</tr>
<tr>
<td>pgx_is_wal_multiplexing_paused()</td>
<td>boolean</td>
<td>Returns true if WAL multiplexing has stopped</td>
</tr>
</tbody>
</table>

If WAL multiplexing has not been configured, these functions return an error. Setting the backup_destination parameter in postgresql.conf configures WAL multiplexing.

Only superusers can execute these functions.

B.2 Transparent Data Encryption Control Functions

The following table lists the functions that can be used for transparent data encryption.

Table B.2 Transparent data encryption control functions

<table>
<thead>
<tr>
<th>Name</th>
<th>Return type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>pgx_open_keystore(passphrase)</td>
<td>void</td>
<td>Opens the keystore</td>
</tr>
<tr>
<td>pgx_set_master_key(passphrase)</td>
<td>void</td>
<td>Sets the master encryption key</td>
</tr>
<tr>
<td>pgx_set_keystore_passphrase(oldPassphrase, newPassphrase)</td>
<td>void</td>
<td>Changes the keystore passphrase</td>
</tr>
</tbody>
</table>

The pgx_open_keystore function uses the specified passphrase to open the keystore. When the keystore is opened, the master encryption key is loaded into the database server memory. In this way, you can access the encrypted data and create encrypted tablespaces. If the keystore is already open, this function returns an error.

Only superusers can execute this function. Also, this function cannot be executed within a transaction block.

The pgx_set_master_key function generates a master encryption key and stores it in the keystore. If the keystore does not exist, this function creates a keystore. If the keystore already exists, this function modifies the master encryption key. If the keystore has not been opened, this function opens it.

The passphrase is a string of 8 to 200 bytes.

Only superusers can execute this function. Also, this function cannot be executed within a transaction block. Processing is not affected by whether the keystore is open.
The `pgx_set_keystore_passphrase` function changes the keystore passphrase. Specify the current passphrase in `oldPassphrase`, and a new passphrase in `newPassphrase`.

The passphrase is a string of 8 to 200 bytes. Only superusers can execute this function. Also, this function cannot be executed within a transaction block. Processing is not affected by whether the keystore is open.

### B.3 Data Masking Control Functions

The table below lists the functions that can be used for data masking.

<table>
<thead>
<tr>
<th>Name</th>
<th>Return type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>pgx_alter_confidential_policy</code></td>
<td>boolean</td>
<td>Changes masking policies</td>
</tr>
<tr>
<td><code>pgx_create_confidential_policy</code></td>
<td>boolean</td>
<td>Creates masking policies</td>
</tr>
<tr>
<td><code>pgx_drop_confidential_policy</code></td>
<td>boolean</td>
<td>Deletes masking policies</td>
</tr>
<tr>
<td><code>pgx_enable_confidential_policy</code></td>
<td>boolean</td>
<td>Enables or disables masking policies</td>
</tr>
<tr>
<td><code>pgx_update_confidential_values</code></td>
<td>boolean</td>
<td>Changes replacement characters when full masking is specified for masking type</td>
</tr>
</tbody>
</table>

#### B.3.1 pgx_alter_confidential_policy

**Description**

Changes masking policies

**Format**

The format varies depending on the content to be changed. The format is shown below.

- **Common format**

  ```
  common_arg:
  [schema_name := 'schemaName',]
  table_name := 'tableName',
  policy_name := 'policyName'
  ```

- **Add a masking target to a masking policy**

  ```
  pgx_alter_confidential_policy(
  commonArg,
  [action := 'ADD_COLUMN', ]
  column_name := 'colName'
  [, function_type := 'FULL' ]
  [, function_type := 'PARTIAL', partialOpt ]
  [, function_type := 'REGEXP', regexpOpt ]
  )
  ```

  **partialOpt:**

  ```
  function_parameters := 'maskingFmt'
  ```

  **regexpOpt:**

  ```
  regexp_pattern := 'regexpPattern',
  regexp_replacement := 'regexpReplacementChar',
  [, regexp_flags := 'regexpFlags']
  ```
- Delete a masking target from a masking policy

```python
ggx_alter_confidential_policy(
    commonArg,
    action        := 'DROP_COLUMN',
    column_name    := 'colName'
)
```

- Change the masking condition

```python
ggx_alter_confidential_policy(
    commonArg,
    action        := 'MODIFY_EXPRESSION',
    expression    := 'expr'
)
```

- Change the content of a masking policy set for a masking target

```python
ggx_alter_confidential_policy(
    commonArg,
    action        := 'MODIFY_COLUMN',
    column_name    := 'colName'
    [, function_type    := 'FULL']   |
    [, function_type    := 'PARTIAL', partialOpt]   |
    [, function_type    := 'REGEXP', regexpOpt]   |
)
```

```python
partialOpt:
    function_parameters    := 'maskingFmt'
```

```python
regexpOpt:
    regexp_pattern        := 'regexpPattern',
    regexp_replacement    := 'regexpReplacementChar',
    [, regexp_flags        := 'regexpFlags']
```

- Change the masking policy description

```python
ggx_alter_confidential_policy(
    commonArg,
    action        := 'SET_POLICY_DESCRIPTION',
    policy_description    := 'policyDesc'
)
```

- Change the masking target description

```python
ggx_alter_confidential_policy(
    commonArg,
    action        := 'SET_COLUMN_DESCRIPTION',
    column_name    := 'colName',
    column_description    := 'colDesc'
)
```

**Argument**

The argument varies depending on the content to be changed. Details are as follows.

- **Common arguments**
### Masking type for which an argument can be specified

<table>
<thead>
<tr>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>schema_name</td>
<td>varchar(63)</td>
<td>Schema name of table for which a masking policy is applied</td>
<td>'public'</td>
</tr>
<tr>
<td>table_name</td>
<td>varchar(63)</td>
<td>Name of table for which a masking policy is applied</td>
<td>Mandatory</td>
</tr>
<tr>
<td>policy_name</td>
<td>varchar(63)</td>
<td>Masking policy name</td>
<td>Mandatory</td>
</tr>
</tbody>
</table>

**- Add a masking target to a masking policy**

<table>
<thead>
<tr>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>action</td>
<td>varchar(63)</td>
<td>'ADD_COLUMN'</td>
<td>'ADD_COLUMN'</td>
</tr>
<tr>
<td>column_name</td>
<td>varchar(63)</td>
<td>Masking target name</td>
<td>Mandatory</td>
</tr>
<tr>
<td>function_type</td>
<td>varchar(63)</td>
<td>Masking type</td>
<td>'FULL'</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- 'FULL': Full masking</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>- 'PARTIAL': Partial masking</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>- 'REGEXP': Regular expression masking</td>
<td></td>
</tr>
<tr>
<td>function_parameters</td>
<td>varchar(1024)</td>
<td>Masking format for partial masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td>regexp_pattern</td>
<td>varchar(1024)</td>
<td>Search pattern for regular expression masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td>regexp_replacement</td>
<td>varchar(1024)</td>
<td>Replacement character/string for regular expression masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td>regexp_flags</td>
<td>varchar(20)</td>
<td>Regular expression flags</td>
<td>NULL</td>
</tr>
</tbody>
</table>

**- Delete a masking target from a masking policy**

<table>
<thead>
<tr>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>action</td>
<td>varchar(63)</td>
<td>'DROP_COLUMN'</td>
<td>Mandatory</td>
</tr>
<tr>
<td>column_name</td>
<td>varchar(63)</td>
<td>Masking target name</td>
<td>Mandatory</td>
</tr>
</tbody>
</table>

**- Change the masking condition**

<table>
<thead>
<tr>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>action</td>
<td>varchar(63)</td>
<td>'MODIFY_EXPRESSION'</td>
<td>Mandatory</td>
</tr>
<tr>
<td>expression</td>
<td>varchar(1024)</td>
<td>Masking condition to be changed</td>
<td>Mandatory</td>
</tr>
</tbody>
</table>

**- Change the content of a masking policy set for a masking target**

<table>
<thead>
<tr>
<th>Masking type for which an argument can be specified</th>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>All</td>
<td>action</td>
<td>varchar(63)</td>
<td>'MODIFY_COLUMN'</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>column_name</td>
<td>varchar(63)</td>
<td>Masking target name</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>function_type</td>
<td>varchar(63)</td>
<td>Masking type</td>
<td>'FULL'</td>
</tr>
<tr>
<td></td>
<td>function_parameters</td>
<td>varchar(1024)</td>
<td>Masking format for partial masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td>Partial masking</td>
<td>function_parameters</td>
<td>varchar(1024)</td>
<td>Masking format for partial masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td>Regular expression masking</td>
<td>regexp_pattern</td>
<td>varchar(1024)</td>
<td>Search pattern for regular expression masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>regexp_replacement</td>
<td>varchar(1024)</td>
<td>Replacement character/string for regular expression masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>regexp_flags</td>
<td>varchar(20)</td>
<td>Regular expression flags</td>
<td>NULL</td>
</tr>
</tbody>
</table>

- Change the masking policy description

<table>
<thead>
<tr>
<th>Masking type for which an argument can be specified</th>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>All</td>
<td>action</td>
<td>varchar(63)</td>
<td>'SET_POLICY_DESCRIPTION'</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>policy_description</td>
<td>varchar(1024)</td>
<td>Masking policy description</td>
<td>Mandatory</td>
</tr>
</tbody>
</table>

- Change the masking target description

<table>
<thead>
<tr>
<th>Masking type for which an argument can be specified</th>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>All</td>
<td>action</td>
<td>varchar(63)</td>
<td>'SET_COLUMN_DESCRIPTION'</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>column_name</td>
<td>varchar(63)</td>
<td>Masking target name</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>column_description</td>
<td>varchar(1024)</td>
<td>Masking target description</td>
<td>Mandatory</td>
</tr>
</tbody>
</table>

Details about whether arguments can be omitted are as follows.

<table>
<thead>
<tr>
<th>Argument</th>
<th>Mandatory or optional</th>
<th>ADD_COLUMN</th>
<th>DROP_COLUMN</th>
<th>MODIFY_EXPRESSION</th>
<th>MODIFY_COLUMN</th>
<th>SET_POLICY_DESCRIPTION</th>
<th>SET_COLUMN_DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>Full masking</td>
<td>Partial masking</td>
<td>Regular expression masking</td>
<td>Full masking</td>
<td>Partial masking</td>
<td>Regular expression masking</td>
</tr>
<tr>
<td>schema_name</td>
<td></td>
<td>Y</td>
<td>Y</td>
<td>Y</td>
<td>Y</td>
<td>Y</td>
<td>Y</td>
</tr>
<tr>
<td>table_name</td>
<td></td>
<td>N</td>
<td>N</td>
<td>N</td>
<td>N</td>
<td>N</td>
<td>N</td>
</tr>
</tbody>
</table>
The table below lists the arguments for the `pgx_alter_confidential_policy` function, along with the mandatory or optional status for each argument.

<table>
<thead>
<tr>
<th>Argument</th>
<th>ADD_COLUMN</th>
<th>DROP_COLUMN</th>
<th>MODIFY_EXPRESSION</th>
<th>MODIFY_COLUMN</th>
<th>SET_POLICY_DESCRIPTION</th>
<th>SET_COLUMN_DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Y: Can be omitted; N: Cannot be omitted; -: Ignored when specified

### Return value

<table>
<thead>
<tr>
<th>Return value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TRUE</td>
<td>Ended normally</td>
</tr>
<tr>
<td>FALSE</td>
<td>Ended abnormally</td>
</tr>
</tbody>
</table>

#### Execution example 1

Adding masking policy p1 to masking target c2

```sql
```

```
pgx_alter_confidential_policy
--------------------------------
t
(1 row)
```

#### Execution example 2

Deleting masking target c1 from masking policy p1

```sql
postgres=# select pgx_alter_confidential_policy(table_name := 't1', policy_name := 'p1', action := 'DROP_COLUMN', column_name := 'c1');
```

```
pgx_alter_confidential_policy
--------------------------------
t
(1 row)
```
Execution example 3
Changing the masking condition for masking policy p1

postgres=# select pgx_alter_confidential_policy(table_name := 't1', policy_name := 'p1', action := 'MODIFY_EXPRESSION', expression := 'false');
pgx_alter_confidential_policy
--------------------------------
t
(1 row)

Execution example 4
Changing the content of masking policy p1 set for masking target c2

postgres=# select pgx_alter_confidential_policy(table_name := 't1', policy_name := 'p1', action := 'MODIFY_COLUMN', column_name := 'c2', function_type := 'FULL');
pgx_alter_confidential_policy
--------------------------------
t
(1 row)

Execution example 5
Changing the description of masking policy p1

postgres=# select pgx_alter_confidential_policy(table_name := 't1', policy_name := 'p1', action := 'SET_POLICY_DESCRIPTION', policy_description := 'this policy is an example.');
pgx_alter_confidential_policy
--------------------------------
t
(1 row)

Execution example 6
Changing the description of masking target c2

postgres=# select pgx_alter_confidential_policy(table_name := 't1', policy_name := 'p1', action := 'SET_COLUMN_DESCRIPTION', column_name := 'c2', column_description := 'c2 column is FULL.');
pgx_alter_confidential_policy
--------------------------------
t
(1 row)

Description
- The arguments for the pgx_alter_confidential_policy system management function can be specified in any order.
- The action parameters below can be specified. When action parameters are omitted, ADD_COLUMN is applied.

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADD_COLUMN</td>
<td>Adds a masking target to a masking policy.</td>
</tr>
<tr>
<td>DROP_COLUMN</td>
<td>Deletes a masking target from a masking policy.</td>
</tr>
<tr>
<td>MODIFY_EXPRESSION</td>
<td>Changes expression.</td>
</tr>
<tr>
<td>MODIFY_COLUMN</td>
<td>Changes the content of a masking policy set for a masking target.</td>
</tr>
<tr>
<td>SET_POLICY_DESCRIPTION</td>
<td>Changes policy_description.</td>
</tr>
<tr>
<td>SET_COLUMN_DESCRIPTION</td>
<td>Changes column_description.</td>
</tr>
</tbody>
</table>

- The function_parameters argument is enabled when the function_type is PARTIAL. If the function_type is other than PARTIAL, it will be ignored.
- The arguments below are enabled when the function_type is REGEXP. If the function_type is other than REGEXP, these arguments will be ignored.
  - regexp_pattern
  - regexp_replacement
  - regexp_flags

See

- Refer to "String Constants" in the PostgreSQL Documentation for information on the strings to specify for arguments.
- Refer to "POSIX Regular Expressions" in the PostgreSQL Documentation and check pattern, replacement, and flags for information on the values that can be specified for regexp_pattern, regexp_replacement, and regexp_flags.

B.3.2 pgx_create_confidential_policy

Description

Creates masking policies

Format

The format varies depending on the masking type. The format is shown below.

```sql
pgx_create_confidential_policy(
    [schema_name := 'schemaName',]
    table_name := 'tableName',
    policy_name := 'policyName',
    expression := 'expr',
    [, enable := 'policyStatus']
    [, policy_description := 'policyDesc']
    [, column_name := 'colName'
        [, function_type := 'FULL'] |
        [, function_type := 'PARTIAL', partialOpt] |
        [, function_type := 'REGEXP', regexpOpt]
        [, column_description := 'colDesc']
    ])
```

partialOpt:

```sql
function_parameters := 'maskingFmt'
```

regexpOpt:

```sql
regexp_pattern := 'regexpPattern',
regexp_replacement := 'regexpReplacementChar',
[, regexp_flags := 'regexpFlags']
```

Argument

Details are as follows.

<table>
<thead>
<tr>
<th>Masking type for which an argument can be specified</th>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>All</td>
<td>schema_name</td>
<td>varchar(63)</td>
<td>Schema name of table for which the masking policy is created</td>
<td>'public'</td>
</tr>
<tr>
<td></td>
<td>table_name</td>
<td>varchar(63)</td>
<td>Name of table for which the masking policy is created</td>
<td>Mandatory</td>
</tr>
<tr>
<td>Masking type for which an argument can be specified</td>

<td></td>
<td>expression</td>
<td>varchar(1024)</td>
<td>Masking condition</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>enable</td>
<td>boolean</td>
<td>Masking policy status</td>
<td>'t'</td>
</tr>
<tr>
<td></td>
<td>policy_description</td>
<td>varchar(1024)</td>
<td>Masking policy description</td>
<td>NULL</td>
</tr>
<tr>
<td></td>
<td>column_name</td>
<td>varchar(63)</td>
<td>Masking target name</td>
<td>NULL</td>
</tr>
<tr>
<td></td>
<td>function_type</td>
<td>varchar(63)</td>
<td>Masking type</td>
<td>'FULL'</td>
</tr>
<tr>
<td></td>
<td>column_description</td>
<td>varchar(1024)</td>
<td>Masking target description</td>
<td>NULL</td>
</tr>
<tr>
<td>Partial masking</td>
<td>function_parameters</td>
<td>varchar(1024)</td>
<td>Masking format for partial masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td>Regular expression masking</td>
<td>regexp_pattern</td>
<td>varchar(1024)</td>
<td>Search pattern for regular expression masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>regexp_replacement</td>
<td>varchar(1024)</td>
<td>Replacement character/string for regular expression masking</td>
<td>Mandatory</td>
</tr>
<tr>
<td></td>
<td>regexp_flags</td>
<td>varchar(20)</td>
<td>Regular expression flags</td>
<td>NULL</td>
</tr>
</tbody>
</table>

Details about whether arguments can be omitted are as follows.

<table>
<thead>
<tr>
<th>Argument</th>
<th>Mandatory or optional</th>
<th>Full masking</th>
<th>Partial masking</th>
<th>Regular expression masking</th>

</tbody>
</table>

Y: Can be omitted; N: Cannot be omitted; -: Ignored when specified
Return value

<table>
<thead>
<tr>
<th>Return value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TRUE</td>
<td>Ended normally</td>
</tr>
<tr>
<td>FALSE</td>
<td>Ended abnormally</td>
</tr>
</tbody>
</table>

Execution example 1
Creating masking policy p1 that does not contain a masking target

```sql
postgres=# select pgx_create_confidential_policy(table_name := 't1', policy_name := 'p1',
expression := '1=1');
pgx_create_confidential_policy
---------------------------------
t
(1 row)
```

Execution example 2
Creating masking policy p1 that contains masking target c1 of which the masking type is full masking

```sql
postgres=# select pgx_create_confidential_policy(schema_name := 'public', table_name := 't1',
policy_name := 'p1', expression := '1=1', enable := 't', policy_description := 'this policy is an
example.', column_name := 'c1', function_type := 'FULL', column_description := 'c1 column is FULL.');
pgx_create_confidential_policy
---------------------------------
t
(1 row)
```

Execution example 3
Creating masking policy p1 that contains masking target c2 of which the masking type is partial masking

```sql
postgres=# select pgx_create_confidential_policy( table_name := 't1', policy_name := 'p1',
expression := '1=1', column_name := 'c2', function_type := 'PARTIAL', function_parameters :=
'VVVFVVVFVVV, VVV-VVVV-VVV, *, 4, 11');
pgx_create_confidential_policy
---------------------------------
t
(1 row)
```

Execution example 4
Creating masking policy p1 that contains masking target c3 of which the masking type is regular expression masking

```sql
postgres=# select pgx_create_confidential_policy( table_name := 't1', policy_name := 'p1',
exprexion := '1=1', column_name := 'c3', function_type := 'REGEXP', regexp_pattern := '(.*)(@.*)',
regexp_replacement := 'xxx\2', regexp_flags := 'g');
pgx_create_confidential_policy
---------------------------------
t
(1 row)
```

Description

- The arguments for the `pgx_create_confidential_policy` system management function can be specified in any order.
- If column_name is omitted, only masking policies that do not contain masking target will be created.
- One masking policy can be created for each table. Use the `pgx_alter_confidential_policy` system management function to add a masking target to a masking policy.
- The function_parameters argument is enabled when the function_type is PARTIAL. If the function_type is other than PARTIAL, it will be ignored.

- The arguments below are enabled when the function_type is REGEXP. If the function_type is other than REGEXP, these arguments will be ignored.
  - regexp_pattern
  - regexp_replacement
  - regexp_flags

Note

If a table for which a masking policy is to be applied is deleted, delete the masking policy as well.

See

- Refer to "String Constants" in the PostgreSQL Documentation for information on the strings to specify for arguments.
- Refer to "POSIX Regular Expressions" in the PostgreSQL Documentation and check pattern, replacement, and flags for information on the values that can be specified for regexp_pattern, regexp_replacement, and regexp_flags.

B.3.3 pgx_drop_confidential_policy

Description
Deletes masking policies

Format

pgx_drop_confidential_policy(
  [schema_name := 'schemaName', ]
  table_name := 'tableName',
  policy_name := 'policyName'
)

Argument
Details are as follows.

<table>
<thead>
<tr>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>schema_name</td>
<td>varchar(63)</td>
<td>Schema name of table for which a masking policy is deleted</td>
<td>'public'</td>
</tr>
<tr>
<td>table_name</td>
<td>varchar(63)</td>
<td>Name of table for which a masking policy is deleted</td>
<td>Mandatory</td>
</tr>
<tr>
<td>policy_name</td>
<td>varchar(63)</td>
<td>Masking policy name</td>
<td>Mandatory</td>
</tr>
</tbody>
</table>

Details about whether arguments can be omitted are as follows.

<table>
<thead>
<tr>
<th>Argument</th>
<th>Mandatory or optional</th>
</tr>
</thead>
<tbody>
<tr>
<td>schema_name</td>
<td>Y</td>
</tr>
<tr>
<td>table_name</td>
<td>N</td>
</tr>
<tr>
<td>policy_name</td>
<td>N</td>
</tr>
</tbody>
</table>

Y: Can be omitted; N: Cannot be omitted
## Return value

<table>
<thead>
<tr>
<th>Return value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TRUE</td>
<td>Ended normally</td>
</tr>
<tr>
<td>FALSE</td>
<td>Ended abnormally</td>
</tr>
</tbody>
</table>

## Execution example

Deleting masking policy p1

```sql
postgres=# select pgx_drop_confidential_policy(table_name := 't1', policy_name := 'p1');
pgx_drop_confidential_policy
-----------------------------
t
(1 row)
```

## Description

The arguments for the `pgx_drop_confidential_policy` system management function can be specified in any order.

### Note

If a table for which a masking policy is to be applied is deleted, delete the masking policy as well.

### See

Refer to “String Constants” in the PostgreSQL Documentation for information on the strings to specify for arguments.

## B.3.4 pgx_enable_confidential_policy

### Description

Enables or disables masking policies

### Format

```sql
pgx_enable_confidential_policy(
   [schema_name    := 'schemaName', ]
   table_name     := 'tableName',
   policy_name    := 'policyName',
   enable        := 'policyStatus'
)
```

### Argument

Details are as follows.

<table>
<thead>
<tr>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>schema_name</td>
<td>varchar(63)</td>
<td>Schema name of table for which a masking policy is enabled or disabled</td>
<td>'public'</td>
</tr>
<tr>
<td>table_name</td>
<td>varchar(63)</td>
<td>Name of table for which a masking policy is enabled or disabled</td>
<td>Mandatory</td>
</tr>
<tr>
<td>policy_name</td>
<td>varchar(63)</td>
<td>Masking policy name</td>
<td>Mandatory</td>
</tr>
<tr>
<td>enable</td>
<td>boolean</td>
<td>Masking policy status</td>
<td>'t': Enabled</td>
</tr>
<tr>
<td>Argument</td>
<td>Data type</td>
<td>Description</td>
<td>Default value</td>
</tr>
<tr>
<td>------------------</td>
<td>-----------</td>
<td>----------------------</td>
<td>---------------</td>
</tr>
<tr>
<td>- 'f': Disabled</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Details about whether arguments can be omitted are as follows.

<table>
<thead>
<tr>
<th>Argument</th>
<th>Mandatory or optional</th>
</tr>
</thead>
<tbody>
<tr>
<td>schema_name</td>
<td>Y</td>
</tr>
<tr>
<td>table_name</td>
<td>N</td>
</tr>
<tr>
<td>policy_name</td>
<td>N</td>
</tr>
<tr>
<td>enable</td>
<td>N</td>
</tr>
</tbody>
</table>

Y: Can be omitted; N: Cannot be omitted

**Return value**

<table>
<thead>
<tr>
<th>Return value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TRUE</td>
<td>Ended normally</td>
</tr>
<tr>
<td>FALSE</td>
<td>Ended abnormally</td>
</tr>
</tbody>
</table>

**Execution example**

Enabling masking policy p1

```
postgres=# select pgx_enable_confidential_policy(table_name := 't1', policy_name := 'p1', enable := 't');

pgx_enable_confidential_policy
-----------------------------
t
(1 row)
```

**Description**

The arguments for the `pgx_enable_confidential_policy` system management function can be specified in any order.

---

Refer to "String Constants" in the PostgreSQL Documentation for information on the strings to specify for arguments.

---

### B.3.5 `pgx_update_confidential_values`

**Description**

Changes replacement characters when full masking is specified for masking type

**Format**

```
pgx_update_confidential_values(
  [number_value    := 'numberValue'
  [, char_value    := 'charValue'
  [, varchar_value    := 'varcharValue'
  [, date_value    := 'dateValue'
  [, ts_value    := 'tsValue'
  ]
)
```
Argument

Details are as follows.

<table>
<thead>
<tr>
<th>Argument</th>
<th>Data type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>number_value</td>
<td>integer</td>
<td>Replacement character in numeric type</td>
</tr>
<tr>
<td>char_value</td>
<td>varchar(1)</td>
<td>Replacement character in char type</td>
</tr>
<tr>
<td>varchar_value</td>
<td>varchar(1)</td>
<td>Replacement character in varchar type</td>
</tr>
<tr>
<td>date_value</td>
<td>date</td>
<td>Replacement character in date type</td>
</tr>
<tr>
<td>ts_value</td>
<td>timestamp</td>
<td>Replacement character in timestamp type</td>
</tr>
</tbody>
</table>

Return value

<table>
<thead>
<tr>
<th>Return value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TRUE</td>
<td>Ended normally</td>
</tr>
<tr>
<td>FALSE</td>
<td>Ended abnormally</td>
</tr>
</tbody>
</table>

Execution example

Using '*' as a replacement character in char type and varchar type

```sql
postgres=# select pgx_update_confidential_values(char_value := '*', varchar_value := '*');
pgx_update_confidential_values
--------------------
t
(1 row)
```

Description

- The arguments for the pgx_update_confidential_values system management function can be specified in any order.
- Specify one or more arguments for the pgx_update_confidential_values system management function. A replacement character is not changed for an omitted argument.

See

Refer to "String Constants" in the PostgreSQL Documentation for information on the strings to specify for arguments.

B.4 VCI Data Load Control Function

The table below lists the function that loads VCI data to buffer cache.

<table>
<thead>
<tr>
<th>Name</th>
<th>Return type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>pgx_prewarm_vci</td>
<td>int8</td>
<td>Loads the VCI data to buffer cache.</td>
</tr>
</tbody>
</table>

pgx_prewarm_vci loads the specified VCI data to buffer cache and returns the number of blocks of the loaded VCI data.

The aggregation process using VCI may take time immediately after an instance is started, because the VCI data has not been loaded to buffer cache. Therefore, the first aggregation process can be sped up by executing pgx_prewarm_vci after an instance is started.

The amount of memory required for preloading is the number of blocks returned by pgx_prewarm_vci multiplied by the size of one block.

This function can only be executed if the user has reference privilege to the VCI index and execution privilege to the pg_prewarm function.
Appendix C System Views

This appendix describes how to use the system views in FUJITSU Enterprise Postgres.

See

Refer to “System Views” under “Internals” in the PostgreSQL Documentation for information on other system views.

C.1 pgx_tablespaces

The pgx_tablespaces catalog provides information related to the encryption of tablespaces.

<table>
<thead>
<tr>
<th>Name</th>
<th>Type</th>
<th>References</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>spctablespace</td>
<td>oid</td>
<td>pg_tablespace.oid</td>
<td>Tablespace OID</td>
</tr>
<tr>
<td>spcencalgo</td>
<td>text</td>
<td></td>
<td>Tablespace encryption algorithm</td>
</tr>
</tbody>
</table>

The spcencalgo string displays one of the following values:
- none: Tablespace is not encrypted
- AES128: AES with key length of 128 bits
- AES256: AES with key length of 256 bits

C.2 pgx_stat_lwlock

The pgx_stat_lwlock view displays statistics related to lightweight locks, with each type of content displayed on a separate line.

Table C.1 pgx_stat_lwlock view

<table>
<thead>
<tr>
<th>Column</th>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>lwlock_name</td>
<td>name</td>
<td>Name of the lightweight lock</td>
</tr>
<tr>
<td>total_waits</td>
<td>bigint</td>
<td>Number of waits caused by the lightweight lock</td>
</tr>
<tr>
<td>total_wait_time</td>
<td>double precision</td>
<td>Number of milliseconds spent in waits caused by the lightweight lock</td>
</tr>
<tr>
<td>stats_reset</td>
<td>timestamp with timezone</td>
<td>Last time at which this statistics was reset</td>
</tr>
</tbody>
</table>

C.3 pgx_stat_latch

The pgx_stat_latch view displays statistics related to latches, with each type of wait information within FUJITSU Enterprise Postgres displayed on a separate line.

Table C.2 pgx_stat_latch view

<table>
<thead>
<tr>
<th>Column</th>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>latch_name</td>
<td>name</td>
<td>Name of the latch</td>
</tr>
<tr>
<td>total_waits</td>
<td>bigint</td>
<td>Number of waits caused a wait</td>
</tr>
<tr>
<td>total_wait_time</td>
<td>double precision</td>
<td>Number of milliseconds spent in waits caused by the latch</td>
</tr>
<tr>
<td>stats_reset</td>
<td>timestamp with timezone</td>
<td>Last time at which this statistic was reset</td>
</tr>
</tbody>
</table>

C.4 pgx_stat_walwriter

The pgx_stat_walwriter view display statistics related to WAL writing, in a single line.
Table C.3 pgx_stat_walwriter view

<table>
<thead>
<tr>
<th>Column</th>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>dirty_writes</td>
<td>bigint</td>
<td>Number of times old WAL buffers were written to the disk because the WAL buffer was full when WAL records were added</td>
</tr>
<tr>
<td>writes</td>
<td>bigint</td>
<td>Number of WAL writes</td>
</tr>
<tr>
<td>write_blocks</td>
<td>bigint</td>
<td>Number of WAL write blocks</td>
</tr>
<tr>
<td>total_write_time</td>
<td>double precision</td>
<td>Number of milliseconds spent on WAL writing</td>
</tr>
<tr>
<td>stats_reset</td>
<td>timestamp with timezone</td>
<td>Last time at which this statistic was reset</td>
</tr>
</tbody>
</table>

C.5 pgx_stat_sql

The pgx_stat_sql view displays statistics related to SQL statement executions, with each type of SQL statement displayed on a separate line.

Table C.4 pgx_stat_sql view

<table>
<thead>
<tr>
<th>Column</th>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>selects</td>
<td>bigint</td>
<td>Number of SELECT statements executed In database multiplexing mode, this number includes the SELECT statements executed in Mirroring Controller. Mirroring Controller executes the SELECT statement using the interval specified for the heartbeat_interval of the server definition file (milliseconds).</td>
</tr>
<tr>
<td>inserts</td>
<td>bigint</td>
<td>Number of INSERT statements executed</td>
</tr>
<tr>
<td>deletes</td>
<td>bigint</td>
<td>Number of DELETE statements executed</td>
</tr>
<tr>
<td>updates</td>
<td>bigint</td>
<td>Number of UPDATE statements executed</td>
</tr>
<tr>
<td>selects_with_parallelism</td>
<td>bigint</td>
<td>Number of times parallel scan was used in SELECT statements</td>
</tr>
<tr>
<td>inserts_with_parallelism</td>
<td>bigint</td>
<td>Not used</td>
</tr>
<tr>
<td>deletes_with_parallelism</td>
<td>bigint</td>
<td>Not used</td>
</tr>
<tr>
<td>updates_with_parallelism</td>
<td>bigint</td>
<td>Not used</td>
</tr>
<tr>
<td>copies_with_parallelism</td>
<td>bigint</td>
<td>Not used</td>
</tr>
<tr>
<td>declares</td>
<td>bigint</td>
<td>Number of DECLARE statements executed (number of cursor OPENs)</td>
</tr>
<tr>
<td>fetches</td>
<td>bigint</td>
<td>Number of FETCH statements executed</td>
</tr>
<tr>
<td>checkpoints</td>
<td>bigint</td>
<td>Number of CHECKPOINT statements executed</td>
</tr>
<tr>
<td>clusters</td>
<td>bigint</td>
<td>Number of CLUSTER statements executed</td>
</tr>
<tr>
<td>copies</td>
<td>bigint</td>
<td>Number of COPY statements executed</td>
</tr>
<tr>
<td>reindexes</td>
<td>bigint</td>
<td>Number of REINDEX statements executed</td>
</tr>
<tr>
<td>truncates</td>
<td>bigint</td>
<td>Number of TRUNCATE statements executed</td>
</tr>
<tr>
<td>locks</td>
<td>bigint</td>
<td>Number of times a lock occurred</td>
</tr>
<tr>
<td>stats_reset</td>
<td>timestamp with timezone</td>
<td>Last time at which this statistic was reset</td>
</tr>
</tbody>
</table>
Appendix D Tables Used by Data Masking

This appendix explains tables used by the data masking feature.

Note

These tables are updated by the data masking control function, so do not use SQL statements to directly update these tables.

D.1 pgx_confidential_columns

This table provides information on masking target for which masking policies are set.

<table>
<thead>
<tr>
<th>Name</th>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>schema_name</td>
<td>varchar(63)</td>
<td>Schema name of table for which a masking policy is applied</td>
</tr>
<tr>
<td>table_name</td>
<td>varchar(63)</td>
<td>Name of table for which a masking policy is applied</td>
</tr>
<tr>
<td>policy_name</td>
<td>varchar(63)</td>
<td>Masking policy name</td>
</tr>
<tr>
<td>column_name</td>
<td>varchar(63)</td>
<td>Masking target name</td>
</tr>
<tr>
<td>function_type</td>
<td>varchar(63)</td>
<td>Masking type</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- 'FULL': Full masking</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- 'PARTIAL': Partial masking</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- 'REGEXP': Regular expression masking</td>
</tr>
<tr>
<td>function_parameters</td>
<td>varchar(1024)</td>
<td>Masking format for partial masking</td>
</tr>
<tr>
<td>regexp_pattern</td>
<td>varchar(1024)</td>
<td>Search pattern for regular expression masking</td>
</tr>
<tr>
<td>regexp_replacement</td>
<td>varchar(1024)</td>
<td>Replacement character/string for regular expression masking</td>
</tr>
<tr>
<td>regexp_flags</td>
<td>varchar(20)</td>
<td>Regular expression flags</td>
</tr>
<tr>
<td>column_description</td>
<td>varchar(1024)</td>
<td>Masking target description</td>
</tr>
</tbody>
</table>

Execution example

```
postgres=# select * from pgx_confidential_columns;

<table>
<thead>
<tr>
<th>schema_name</th>
<th>table_name</th>
<th>policy_name</th>
<th>column_name</th>
<th>function_type</th>
<th>function_parameters</th>
<th>regexp_pattern</th>
<th>regexp_replacement</th>
<th>regexp_flags</th>
<th>column_description</th>
</tr>
</thead>
<tbody>
<tr>
<td>public</td>
<td>t1</td>
<td>p1</td>
<td>c1</td>
<td>FULL</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>public</td>
<td>t1</td>
<td>p1</td>
<td>c2</td>
<td>PARTIAL</td>
<td>VVVVVVVVVVVVVVVVVV, VVVVVVVVVVVVVVVVVVVVVVV,</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>* , 6, 11</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>(2 row)</td>
</tr>
</tbody>
</table>
```

D.2 pgx_confidential_policies

This table provides information on masking policies.

<table>
<thead>
<tr>
<th>Name</th>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>schema_name</td>
<td>varchar(63)</td>
<td>Schema name of table for which a masking policy is applied</td>
</tr>
<tr>
<td>Name</td>
<td>Type</td>
<td>Description</td>
</tr>
<tr>
<td>---------------</td>
<td>---------------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>table_name</td>
<td>varchar(63)</td>
<td>Name of table for which a masking policy is applied</td>
</tr>
<tr>
<td>policy_name</td>
<td>varchar(63)</td>
<td>Masking policy name</td>
</tr>
<tr>
<td>expression</td>
<td>varchar(1024)</td>
<td>Masking condition</td>
</tr>
<tr>
<td>enable</td>
<td>boolean</td>
<td>Masking policy status</td>
</tr>
<tr>
<td>policy_description</td>
<td>varchar(1024)</td>
<td>Masking policy description</td>
</tr>
</tbody>
</table>

**Execution example**

```sql
postgres=# select * from pgx_confidential_policies;
```

```text
<table>
<thead>
<tr>
<th>schema_name</th>
<th>table_name</th>
<th>policy_name</th>
<th>expression</th>
<th>enable</th>
<th>policy_description</th>
</tr>
</thead>
<tbody>
<tr>
<td>public</td>
<td>t1</td>
<td>p1</td>
<td>1=1</td>
<td>t</td>
<td></td>
</tr>
</tbody>
</table>
```

**D.3 pgx_confidential_values**

This table provides information on replacement characters when full masking is specified for masking type.

<table>
<thead>
<tr>
<th>Name</th>
<th>Data type</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>number_value</td>
<td>integer</td>
<td>Numeric</td>
<td>0</td>
</tr>
<tr>
<td>char_value</td>
<td>varchar(1)</td>
<td>char type</td>
<td>Spaces</td>
</tr>
<tr>
<td>varchar_value</td>
<td>varchar(1)</td>
<td>varchar type</td>
<td>Spaces</td>
</tr>
<tr>
<td>date_value</td>
<td>date</td>
<td>date type</td>
<td>'1970-01-01'</td>
</tr>
<tr>
<td>timestamp_value</td>
<td>timestamp</td>
<td>timestamp type</td>
<td>'1970-01-01 00:00:00'</td>
</tr>
</tbody>
</table>

**Execution example**

```sql
postgres=# select * from pgx_confidential_values;
```

```text
<table>
<thead>
<tr>
<th>number_value</th>
<th>char_value</th>
<th>varchar_value</th>
<th>date_value</th>
<th>ts_value</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td></td>
<td>1970-01-01</td>
<td>1970-01-01</td>
<td>00:00:00:00</td>
</tr>
</tbody>
</table>
```

Appendix E  Activating and Stopping the Web Server Feature of WebAdmin

To use WebAdmin for creating and managing a FUJITSU Enterprise Postgres instance on a server where FUJITSU Enterprise Postgres is installed, you must first activate the Web server feature of WebAdmin.

- Using WebAdmin in a single-server configuration
  You must start the Web server on the target server.
- Using WebAdmin in a multiserver configuration
  You must start the Web server on all servers on which WebAdmin has been installed.

This appendix describes how to activate and stop the Web server feature of WebAdmin.

Note that "<xy>" in paths indicates the product version and level.

See

Refer to "Installing WebAdmin in a Multiserver Configuration" in the Installation and Setup Guide for Server for information on multiserver installation.

E.1 Activating the Web Server Feature of WebAdmin

Follow the procedure below to activate the Web server feature of WebAdmin:

1. Display the [Services] window
   - Windows Server(R) 2012 or Windows Server(R) 2012 R2:
     In the [Start] screen, select [Administrative Tools], and then click [Services].
   - All other operating systems:
     In the [Start] menu, select [Administrative Tools], and then click [Services].

2. Start a service
   Select the displayed name "FUJITSU Enterprise Postgres WebAdmin version" , and then click [Start Service].

You can also start a service by specifying the service name of the Web server feature of WebAdmin in the net start command or sc start command.

E.2 Stopping the Web Server Feature of WebAdmin

This section describes how to stop the Web server feature of WebAdmin.

Follow the procedure below to stop the Web server feature of WebAdmin:

1. Display the [Services] window
   - Windows Server(R) 2012 or Windows Server(R) 2012 R2:
     In the [Start] screen, select [Administrative Tools], and then click [Services].
   - All other operating systems:
     In the [Start] menu, select [Administrative Tools], and then click [Services].

2. Stop a service
   Select the displayed name "FUJITSU Enterprise Postgres WebAdmin version" , and then click [Stop Service].
You can also stop a service by specifying the service name of the Web server feature of WebAdmin in the `net stop` command or `sc stop` command.
Appendix F  WebAdmin Wallet

This appendix describes how to use the Wallet feature of WebAdmin.

When a remote instance or a standby instance is created, it is necessary to provide user name and password for authentication with the remote machine or the database instance.

The Wallet feature in WebAdmin is a convenient way to create and store these credentials.

Once created, these credentials can be repeatedly used in one or more instances.

Note

It is not mandatory to create a credential in the Wallet. It is possible to create a remote instance or a standby instance without creating any credential in the Wallet.

If no credential is created beforehand, a user name and password can be entered in the instance creation page. When creating a "Remote" instance, if operating system credentials are entered without using a credential stored in the Wallet, WebAdmin automatically creates a credential with the given user name and password, and stores it in the user’s wallet for future use.

F.1 Creating a Credential

1. In the [My Wallet] tab, click . The [New credential] page will be displayed.

2. Enter the information for the credentials.

Enter the following items:

- [Credential name]: Name of the credential
  
The name must meet the conditions below:
  
  - Maximum of 16 characters
  - The first character must be an ASCII alphabetic character
  - The other characters must be ASCII alphanumeric characters

- [User name]: The operating system user name or database instance user name that will be used later
- [Password]: Password for the user
- [Confirm password]: Reenter the password.

3. Click to store the credential.

F.2 Using a Credential

Once a credential is created in the Wallet, it can be used during remote instance creation or standby instance creation.

The following page uses the credential that was created in the previous section.

When "Cred1" is selected in [Operating system credential], the user name and password are automatically populated from the credential.
Appendix G Collecting Failure Investigation Data

If the cause of an error that occurs while building the environment or during operations is unclear, data must be collected for initial investigation.

This appendix describes how to collect data for initial investigation.

Use FJQSS (Information Collection Tool) to collect data for initial investigation.

Refer to the following manual for information on how to use FJQSS:

- Windows Server(R) 2012 or later
  In the [Apps] menu, select [FJQSS (Information Collection Tool)], and then click [FJQSS User's Guide].

- Windows Server(R) 2008 R2 or earlier
  In the [Start] menu, select [FJQSS (Information Collection Tool)], and then click [FJQSS User's Guide].

Note

- When using FJQSS to collect data for initial investigation, a window will be displayed for you to set the following environment variables:
  - PGDATA
    Set the data storage destination.
  - PGPORT
    Set the instance port number. This does not need to be set if the default port number (27500) has not been changed.
  - PGUSER
    Set the database superuser.
    Set the database superuser so that client authentication is possible.
    FJQSS establishes a TCP/IP connection with the template1 database and collects data from the database.

In addition, when using database multiplexing, set the following environment variables:

- MCCONTROLDIR
  Refer to "Mirroring Controller Resources" in the Cluster Operation Guide for information on the Mirroring Controller management directory.

- The instance administrator user must perform FJQSS operations if using database multiplexing mode.

<td>The directory that stores the backup data.</td>
</tr>
<tr>
<td><strong>Client command</strong></td>
<td>A command that is executed from the client machine and used. Also known as a client application.</td>
</tr>
<tr>
<td><strong>Data storage destination</strong></td>
<td>The directory that stores the database clusters.</td>
</tr>
<tr>
<td><strong>Database cluster</strong></td>
<td>The database storage area on the database storage disk. Database clusters are a collection of databases managed by an instance.</td>
</tr>
<tr>
<td><strong>Data masking</strong></td>
<td>A feature that can change the returned data for queries generated by applications, to prevent exposing actual data.</td>
</tr>
<tr>
<td><strong>Database multiplexing</strong></td>
<td>Mechanism in which a database is made redundant on multiple servers, by transferring transaction logs (WAL) via the network to enable application jobs to be continued.</td>
</tr>
<tr>
<td><strong>Database superuser</strong></td>
<td>A user defined in the database with access privileges for all database objects.</td>
</tr>
<tr>
<td><strong>Encoding</strong></td>
<td>Indicates the character set.</td>
</tr>
<tr>
<td><strong>Instance</strong></td>
<td>A series of server processes for managing database clusters.</td>
</tr>
<tr>
<td><strong>Instance administrator</strong></td>
<td>The OS user account that owns the database cluster files and operates the database server processes.</td>
</tr>
<tr>
<td><strong>Instance name</strong></td>
<td>Indicates the instance name.</td>
</tr>
<tr>
<td><strong>Masking policy</strong></td>
<td>A method of changing data under specific conditions when it is returned for a query from an application. You can configure masking target, masking type, masking condition and masking format.</td>
</tr>
<tr>
<td><strong>Mirrored transaction log</strong></td>
<td>The log that mirrors the transaction log at the backup data storage destination.</td>
</tr>
<tr>
<td><strong>Primary server</strong></td>
<td>The server that processes the main database jobs during multiplexed database operation.</td>
</tr>
</tbody>
</table>
**Server command**
A command used on the database server. Also known as a server application.

**Standby server**
A server that generates a replicated database synchronized with the primary server, and that can run as an alternative server in case the primary server fails during multiplexed database operation.

**Transaction log**
Contains the history of updates made to the database by transactions. Also known as the WAL (Write-Ahead Log).

**Transaction log storage destination**
The directory that stores the transaction log.

**VCI (Vertical Clustered Index)**
An index with columnar data structure suitable for aggregation.

**WAL (Write-Ahead Log)**
Has the same meaning as 'transaction log'.

Preface

Purpose of This Document

This document is a command reference, and explains FUJITSU Enterprise PostgreSQL commands and options with features expanded on from PostgreSQL.

Intended Readers

This document is aimed at people who manage and operate FUJITSU Enterprise PostgreSQL. Readers of this document are also assumed to have general knowledge of:

- PostgreSQL
- SQL
- Oracle Solaris
- Linux
- Windows

Structure of This Document

This document is structured as follows:

Chapter 1 Command List and Specification Format

Lists commands and describes their specification format.

Chapter 2 Client Commands

Explains options not listed in "PostgreSQL Client Applications" in the PostgreSQL Documentation.

Chapter 3 Server Commands

Explains commands and options not listed in "PostgreSQL Server Applications" in the PostgreSQL Documentation.

Chapter 4 Mirroring Controller Commands

Explains the Mirroring Controller commands

How to Read This Document

Examples in this document are predominantly for UNIX/Linux.

For Windows, replace values (such as paths in the examples) as appropriate.

Export Restrictions

If this document is to be exported or provided overseas, confirm legal requirements for the Foreign Exchange and Foreign Trade Act as well as other laws and regulations, including U.S. Export Administration Regulations, and follow the required procedures.

Issue Date and Version

Chapter 1 Command List and Specification Format

This chapter lists commands and describes their specification format.

1.1 Command List

This chapter lists commands and options not explained in "PostgreSQL Client Applications" or "PostgreSQL Server Applications" in the PostgreSQL Documentation.

1.1.1 Client Commands

The commands below have options not explained in "PostgreSQL Client Applications" in the PostgreSQL Documentation.

<table>
<thead>
<tr>
<th>Command</th>
<th>Functional overview</th>
</tr>
</thead>
<tbody>
<tr>
<td>pg_dumpall</td>
<td>Extract a PostgreSQL database cluster into a script file</td>
</tr>
</tbody>
</table>

1.1.2 Server Commands

The commands below have options not explained in "PostgreSQL Server Applications" in the PostgreSQL Documentation.

<table>
<thead>
<tr>
<th>Command</th>
<th>Functional overview</th>
</tr>
</thead>
<tbody>
<tr>
<td>pg_ctl</td>
<td>Initialize, start, stop, or control a PostgreSQL server</td>
</tr>
<tr>
<td>postgres</td>
<td>PostgreSQL database server</td>
</tr>
</tbody>
</table>

The commands below are not explained in "PostgreSQL Server Applications" in the PostgreSQL Documentation.

<table>
<thead>
<tr>
<th>Command</th>
<th>Functional overview</th>
</tr>
</thead>
<tbody>
<tr>
<td>pgx_dmpall</td>
<td>Backs up the data directory, tablespaces, and configuration files.</td>
</tr>
<tr>
<td>pgx_keystore</td>
<td>Manages keystore</td>
</tr>
<tr>
<td>pgx_rcvall</td>
<td>Recovers the data directory, tablespaces, and configuration files.</td>
</tr>
</tbody>
</table>

1.1.3 Mirroring Controller Commands

Mirroring Controller has the following commands:

<table>
<thead>
<tr>
<th>Command</th>
<th>Functional overview</th>
</tr>
</thead>
<tbody>
<tr>
<td>mc_ctl</td>
<td>Start and stop Mirroring Controller, switch/disconnect the server, display the server status, build the standby server, or register and unregister from the Windows services</td>
</tr>
</tbody>
</table>

1.2 Command Specification Format

The table below shows the command specification format.

<table>
<thead>
<tr>
<th>Item</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ ]</td>
<td>Indicates optional element.</td>
</tr>
<tr>
<td>...</td>
<td>Indicates that the item can be specified repeatedly.</td>
</tr>
</tbody>
</table>
Chapter 2 Client Commands

This chapter explains options not listed in "PostgreSQL Client Applications" in the PostgreSQL Documentation.

2.1 pg_dumpall

Name

pg_dumpall -- Extract a PostgreSQL database cluster into a script file

Synopsis

pg_dumpall [connectionOption...] [option...]

Options

--no-tablespace-encryption

Do not output commands to encrypt tablespaces. Running the generated SQL script will restore the originally encrypted data without being encrypted.

See

Refer to "pg_dumpall" in the PostgreSQL Documentation for details.
Chapter 3 Server Commands

This chapter explains commands and options not listed in "PostgreSQL Server Applications" in the PostgreSQL Documentation.

3.1 pg_ctl

Name

pg_ctl -- Initialize, start, stop, or control a PostgreSQL server

Synopsis

```
pg_ctl start [-w] [-t seconds] [-s] [-D datadir] [-l filename]
            [-o options] [-p path] [-c] [--keystore-passphrase]

pg_ctl restart [-w] [-t seconds] [-s] [-D datadir] [-c]
            [-m s[mart] | f[ast] | i[mmediate] ] [-o options]
            [--keystore-passphrase]
```

Options

```
--keystore-passphrase

Prompt for the passphrase to open the keystore.
```

See

Refer to "pg_ctl" in the PostgreSQL Documentation for details.

3.2 pgx_dmpall

Name

pgx_dmpall - Backs up the data directory, tablespaces, and configuration files.

Synopsis

```
pgx_dmpall [option...]
```

Description

The pgx_dmpall command backs up the data directory, tablespaces, and configuration files. The backup data is stored in the directory specified by backup_destination parameter of postgresql.conf. The pgx_dmpall command also deletes archived Write Ahead Logs (WAL) that are no longer necessary for recovery when the backup completes successfully.

Options

```
-c

This option only backs up configuration files. The configuration files are as follows:

-  postgresql.conf (postgresql.conf)

-  File for host-based authentication (pg_hba.conf)

-  Configuration file for ident authentication (pg_ident.conf)

If an external reference, such as 'include' in postgresql.conf, is set, the reference destination files are also backed up.
```
Sets checkpoint mode to fast or spread (default).
If fast is specified, the checkpoint processing at the start of backup becomes quick, but the impact on performance of running applications gets larger due to intense I/O. In spread mode, the impact on applications is smaller but the backup takes longer, because the checkpoint is performed slowly.

Specify the data directory. If this option is omitted, the value of the environment variable PGDATA is used.

Specify the postgresql.conf configuration file. This option is set if the data directory and the configuration file set in the 'data_directory' parameter of the postgresql.conf file are running in separate directories.

Specify the user name of the database superuser. This defaults to the name of the effective user running pgx_dmpall.

Never issue a password prompt. If the server requires password authentication and a password is not available by other means such as a .pgpass file, the connection attempt will fail. This option can be useful in batch jobs and scripts where no user is present to enter a password.

Force pgx_dmpall to prompt for a password before connecting to a database.

This option is never essential, since pgx_dmpall will automatically prompt for a password if the server demands password authentication. However, pgx_dmpall will waste a connection attempt finding out that the server wants a password. In some cases it is worth typing -W to avoid the extra connection attempt.

Specifies the name of the database to connect to. If not specified, the postgres database will be used; if that does not exist, template1 will be used.

Any database can be specified as long as it can be connected to.

Specify the data directory. You can overwrite using the -D option.

0: Normal exit
Other than 0: Abnormal exit

This command can only be executed when the database server is running.
Execute this command as a PostgreSQL user account.
Do not update or delete files in the backup storage directory. Otherwise, you may not be able to recover the database.
Do not store other files in the backup storage directory.
This command uses one database connection. To establish a connection, this command uses the IPv4 loopback address 127.0.0.1 on Windows, and the UNIX domain socket on other operating systems. Therefore, permit these connections in pg_hba.conf.
This command cannot be executed on the standby server.

Example
In the following example, the data directory, tablespaces, and configuration files are backed up. At this time, stored WALs are no longer necessary because the backups are destroyed.

$ pgx_dmpall

Related item
pgx_rcvall

3.3 pgx_keystore

Name
pgx_keystore -- Manages keystore

Synopsis
pgx_keystore [option...] keystore_location

Description
pgx_keystore enables auto-open of a keystore.

Options
-a
--enable-auto-open

Enables auto-open of a keystore. This allows the keystore to open automatically without entering the passphrase when the database server starts.

When auto-open is enabled, an obfuscated copy keystore.aks is created in the same directory where the keystore file keystore.ks is stored. To disable auto-open, delete keystore.aks.

-P passphrase
--passphrase=passphrase

Specify the passphrase to open the keystore. If this option is omitted, the prompt to enter the passphrase is displayed.

keystore_location

Specify the absolute or relative path of the keystore file.

Diagnostics
0: Normal exit
Other than 0: Abnormal exit

Notes
This command can be executed whether the database server is running or stopped. It does not connect to the database server.

Example
Enables auto-open of a keystore.

$ pgx_keystore -a /key/store/location/keystore.ks
3.4 pgx_rcvall

Name
pgx_rcvall - Recovers the data directory, tablespaces, and configuration files.

Synopsis
pgx_rcvall [option...]

Description
The pgx_rcvall command recovers the data directory, tablespaces, and configuration files using the data that was backed up with pgx_dmpall command and archived Write-Ahead-Log (WAL). If none of the options that indicate the recovery point is specified, all archived WAL are applied and the data will be recovered to the latest point.

Options
-B backupdir
   Specify the backup storage directory. If the data directory is damaged, this option cannot be omitted.
-D datadir
   Specify the data directory. If this option is omitted, the value of the environment variable PGDATA is used.
-e targetTime
   Specify this option to recover the data as of the specified date and time.
   targetTime
      Specify the time at which the data is recovered. The format is as follows:
      "YYYY-MM-DD HH:MM:SS"
-l
   This option displays a list of the backup data information in the backup storage directory that was obtained using the pgx_dmpall command. This cannot be specified together with -p, -e or -n option.
-n restorePoint
   Specify this option to recover the data to the specified restore point. Restore points are created with SQL function pg_create_restore_point. If multiple restore points with the same names were created, the first one after the backup was taken is used for recovery. If the specified restore point does not exist, all archived WAL are applied. This cannot be specified together with -e or -p option.
-p
   Specify this option to recover the data as of the time when the last backup completed. This cannot be specified together with -e or -n option.
-s connectionString
   Construct a standby server from the backup created by pgx_dmpall. Specify as an argument a connection string for connecting to the primary server. This is the same as primary_conninfo parameter in recovery.conf. This option can only be specified together with -D and -B.
-x
   Specify this option if you do not want to include transactions committed at the time specified in the -e option as part of the recovery.
--keystore-passphrase
   Prompt for the passphrase to open the keystore.
Environment
PGDATA
Specify the data directory. You can overwrite using the -D option.

PGPORT
Specify the port number for connecting to the database.

PGUSER
Specify the user name of the database superuser. This defaults to the name of the effective user running pgx_dmpall.

Diagnosis
0: Normal exit
Other than 0: Abnormal exit

Backup data information
Date
Date the backup data was created using the pgx_dmpall command.

Dir
This is the name of the directory in the backup storage directory that is used to store the backup data.
Directory naming format: Time format (YYYY-MM-DD_HH-MM-SS)

Status
This is the status of the pgx_dmpall command backup data.
COMPLETE: Complete
INCOMPLETE: Incomplete

Notes
This command can only be executed when the database server is stopped, except when it is executed with -l option.
Execute this command as a PostgreSQL user account.
Use backup data that was taken from the recovery target data directory.
Before executing this command, disconnect all application database connections. Additionally, do not connect to the database during recovery.
Hash indexes cannot be recovered correctly in this command. If you are using the hash index, execute REINDEX for the corresponding index after this command finishes.
The configuration files are restored from those files that were taken by the last pgx_dmpall (including -c option).
This command connects to the database to determine whether the recovery has completed. So ensure that you set the port number with PGPORT environment variable in the environment where multiple instances exist.
Match the OS timezone setting when running pgx_dmpall/pgx_rcvall to the timezone specified by timezone parameter in postgresql.conf.
Otherwise, data might be recovered to an unexpected time when -e or -p is specified.
If you recover to a past point, a new timeline (history of database updates) begins at that point. That recovery point is the latest point in the new timeline when the recovery is completed. If you subsequently recover to the latest point, the database updates in the new timeline will be replayed.
Valid restore points are the ones that were created in the timeline where the backup had been taken. That means that if you recover to a past point, those restore points created thereafter are unavailable. Therefore, take a backup when you have restored the past data desired.
Example

In the following example, the data directory, tablespaces, and configuration files are recovered.

$ pgx_rcvall -B /home/pgsql/Backupdir

In the following example, the data directory and tablespaces are recovered at 10:00:00 on 01-05-2015. The configuration files are recovered at the point at which the last of the data is obtained.

$ pgx_rcvall -B /home/pgsql/Backupdir -e "2015-05-01 10:00:00"

In the following example, the data directory and tablespaces are recovered up to the time of restore point "before_match_20150510_1". The configuration files are restored from the latest backup.

$ pgx_rcvall -B /home/pgsql/Backupdir -n before_match_20150510_1

In the following example, the obtained backup data information in the backup storage directory is displayed in a list.

$ pgx_rcvall -l

Related item

pgx_dmpall

3.5 postgres

Name

postgres -- PostgreSQL database server

Synopsis

postgres [option...]

Options

-K

Prompt for the passphrase to open the keystore. This option works in single-user mode only, so you must also specify the --single option, as shown below:

postgres --single -K

See

Refer to "postgres" in the PostgreSQL Documentation for details.
Chapter 4 Mirroring Controller Commands

This chapter explains the Mirroring Controller commands.

4.1 mc_ctl

Name

mc_ctl - Start and stop Mirroring Controller, switch/disconnect the server, or display the server status.

mc_ctl - Start and stop Mirroring Controller, switch/disconnect the server, display the server status, or register and unregister from the Windows services.

Overview

mc_ctl start [-M mcdir] [-w] [-f] [--mc-only] [--local-server server_id]
mc_ctl stop [-M mcdir] [-a] [-e] [-mc-only] [-local-server server_id]
mc_ctl status [-M mcdir] [-local-server server_id]
mc_ctl switch [-M mcdir] [-local-server server_id]
mc_ctl enable-failover [-M mcdir] [-local-server server_id]
mc_ctl disable-failover [-M mcdir] [-local-server server_id]

mc_ctl register [-M mcdir] [-w] [-f] [-mc-only] -P password
[-S a[uto] | d[emand]] [-local-server server_id]

mc_ctl unregister [-M mcdir] [-local-server server_id]

Description

mc_ctl starts and stops Mirroring Controller, switches/disconnects the server, or displays the server status.

mc_ctl starts and stops Mirroring Controller, switches/disconnects the server, displays the server status, or registers and unregisters from the Windows services.

The start mode starts Mirroring Controller. If the --mc-only option is omitted, the command starts a database instance. Specify the -w option to get the status of this command.

The stop mode stops Mirroring Controller. If the --mc-only option is omitted, the database instance is stopped. If --mc-only option is not specified, database instance is also stopped. When executes on standby server without --mc-only, standby server will be detached from primary server.

The status mode displays the status of the servers, database instance processes, and disks monitored by Mirroring Controller.

The switch mode switches the primary server. When the server is switched, the database instance on the primary server stops, and the database instance on the standby server is upgraded to primary server and begins degrading operation.

The enable-failover mode enables automatic switching and disconnection.

The disable-failover mode disables automatic switching and disconnection.

The register mode registers Mirroring Controller in the Windows service. The -w, -f, --mc-only, and --local-server options are used when Mirroring Controller is started and stopped from the Windows services. If the mc_ctl command is used to start and stop Mirroring Controller, the option specified in the command will be valid.

The unregister mode unregisters Mirroring Controller from the Windows service.
If Mirroring Controller has not been started on the server that executes the command, commands for any mode other than the start mode, and status mode.

Execute this command as an instance administrator.

If Mirroring Controller has not been started on the server that executes the command, commands for any mode other than the start mode, status mode, register mode, and unregister mode terminate with an error.

Execute this command as an instance administrator user with the "Administrator" privilege (operating system user ID that belongs to the Administrator group).

Until you start Mirroring Controller of standby server after starting Mirroring Controller of the primary server, disconnect of the standby server occurs operation to be able to continue with only the primary server. Standby server is incorporated when you start the Mirroring Controller of standby server, and you should be able to operate in the multiplexing configuration.

Options

-a
  Specify this option to stop Mirroring Controller on all servers.

-e
  Specify this option to forcibly stop Mirroring Controller on the active server.

-f
  Specify this option to enable automatic switching and disconnection of Mirroring Controller immediately after startup.

--local-server server_id
  If you run a simulation build of the primary and standby servers in a single server (for system testing, for example), specify this option to identify the server to be operated.

  For server_id, specify the server identifier specified in the network.conf file. ASCII characters other than single-byte space can be specified in the server identifier. The operations will be executed as if the user has logged in to server_id.

--mc-only
  Specify this option to start and stop only Mirroring Controller processes. At the start mode, this option can be specified only while the database instance is running. If this option is omitted, the database instance is simultaneously started and stopped.

-M mcdir
  Specify the Mirroring Controller management directory.

ASCII characters other than halfwidth spaces can be specified in the directory path.

ASCII characters can be specified in the directory path.

If this option is omitted, the value of the environment variable MCCONTROLDIR is used.

-P password
  For the register mode, specify the password for the user who executed the command.

-S a[uto] | d[emand]
  Specify the start type for the Windows service to be registered. You can choose auto or demand as the start type by specifying the entire word or just its first letter. The default is auto.

-w
  Waits for operations to finish.
Environment variable

**MCCONTROLDIR**

Specifies the Mirroring Controller management directory.

ASCII characters other than halfwidth spaces can be specified in the directory path.

ASCII characters can be specified in the directory path.

You can specify the -M option to override this value.

**Diagnostics**

0: Normal end

Other: Abnormal end

**Notes**

The message under execution might be output though the mc_ctl command is not being executed and, besides, it terminate abnormally when the server is downed while processing execution of this command, an automatic switch, and an automatic separation, and the communication between a primary server and the standby server is cut off. Besides, please reactivate Mirroring Controller to solve this problem after confirming nobody is operating the mc_ctl command. Afterwards, please execute a necessary operation.

If a time-out error occurs when the mc_ctl command is in progress, the messages may be different from the processes. Take the actions described in the "Action" section of the message.

Automatic switching and disconnection by the enable-failover mode, the disable-failover mode, and the -f option of the start mode is effective only while Mirroring Controller is running. Therefore, please activate each time you start the Mirroring Controller if you want to enable automatic switching and disconnection.

Use the start mode and stop mode to start and stop the Windows services. To do this, use the register mode to register Mirroring Controller in the Windows services in advance.

In case of postgresql.conf has any incorrect parameter when this command is executed, this command will be abnormally terminated. If this is the case, please re-execute it again after correct the parameter in postgresql.conf.

In Windows Server(R) 2008, Windows Server(R) 2008 R2, Windows Server(R) 2012 or Windows Server(R) 2012 R2, the mc_ctl command must be executed from "Administrator: Command Prompt". Right-click [Command Prompt], and then select [Run as administrator] from the menu to display the [Administrator: Command Prompt] window.

**Example**

To start Mirroring Controller:

```
$ mc_ctl start -M /mcdir/inst1
```

To start Mirroring Controller:

```
> mc_ctl start -M D:\mcdir\inst1
```

Display details of mc_ctl status

```
mirroring status
-----------------
      server_id host_role          host            host_status  db_proc_status         disk_status
(1)        (2)                (3)             (4)          (5)                    (6)
(2)        (3)                (4)             (5)          (6)                    (7)
(1) Multiplexing status
switchable : Switchable
switching  : Switching
```
switched: Switched (displayed when switching has finished and the degrading operations status has been enabled)
not-switchable: Not switchable (displayed when a server is disconnected and switching is not possible)
unknown: Unknown (*1)
failover-disabled: Failover is disabled

(2) Server identifier
(3) Server role
primary: Primary
standby: Standby
none (inactivated primary): No role
(Primary is stopped or being defined as primary)
none (inactivated standby): No role
(Standby is stopped or being defined as primary)

(4) Host name or IP address
(5) Live/dead state of the server
normal: Normal operation
abnormal: Abnormal
unknown: Unknown (*1)

(6) DBMS process status
normal: Normal
abnormal (abnormal process name (*2)): Abnormal
unknown: Unknown (*1)

(7) Disk status
normal: Normal
abnormal (abnormal disk type (*3)): Abnormal
unknown: Unknown (*1)

*1: Displayed when Mirroring Controller is stop state, the management network is abnormal, or Mirroring Controller has failed or is unresponsive.

*2: The names of the DBMS processes in which the abnormality was detected are output separated by a comma. The name has the following meaning:
- postmaster: Process (postmaster) that accepts application connections
- wal_sender or wal_receiver: Process (WAL sender or WAL receiver) that sends and receives transaction logs

*3: The types of disks where the abnormality was detected are output separated by a comma. The type has the following meaning:
- data: Data storage disk
- tran_log: Transaction log storage disk
- tablespace: Tablespace storage disk
FUJITSU Enterprise Postgres 9.6

Message Guide
Preface

Purpose of this document
This document explains the messages output by FUJITSU Enterprise Postgres.

Intended readers
This document is intended for the following readers:
- Persons using FUJITSU Enterprise Postgres

Prerequisites
Knowledge of the following topics is required to read this document:
- A general understanding of computers
- Jobs
- PostgreSQL
- Linux
- Oracle Solaris
- Windows

Structure of this document
This document is structured as follows:

Chapter 1 Overview of Messages
This chapter explains the format in which messages are output.

Chapter 2 FUJITSU Enterprise Postgres Messages
This chapter explains messages output by FUJITSU Enterprise Postgres.

Chapter 3 Mirroring Controller Messages
This chapter explains messages output by Mirroring Controller.

Export Restrictions
Exportation/release of this document may require necessary procedures in accordance with the regulations of your resident country and/or US export control laws.

Issue Date and Version
Edition 1.0: September 2017

Copyright 2015-2017 FUJITSU LIMITED
Chapter 1 Overview of Messages

This chapter explains the format of messages.

1.1 Message Format

This section explains the format of messages.

- Output format
- Components

1.1.1 Output Format

The message output format is as follows:

**Format of messages returned to an application**

```
msgType: msgText (msgNumber)
```

**Format of messages output to the server message log**

```
SQLSTATE: date [processID]: [internalCode-1] user = userName, db = dbName, remote =
clientIpAddress(portNumber) app = appName msgType: msgText (msgNumber)
```

See

Refer to "PostgreSQL Error Codes" under "Appendixes" in the PostgreSQL Documentation for information on SQLSTATE.

Note

- Notes on monitoring messages output to the server message log
  
  Use SQLSTATE to monitor server messages, noting the following:
  
  - Configuration method
    
    Refer to "Error Log Settings" under "Setup" in the Installation and Setup Guide for Server for details.
  
  - Notes
    
    - The user name, client IP address (port number), and application name may sometimes be blank.
    
    - Multiple message numbers may be output.
  
  - Notes on monitoring messages returned to an application
    
    You can output SQLSTATE to a message to be returned to an application. The following explains how to configure the settings for outputting SQLSTATE and gives cautions to be observed when doing so.
    
    - How to configure the settings:
      
      - In the SET statement, set the log_error_verbosity parameter to VERBOSE.
      
      - For an application that uses the C language library, use the PQsetErrorVerbosity function to set message redundancy to PQERRORS_VERBOSE.

    - Cautions
      
      - SQLSTATE is output only to messages to be returned to applications that use the C language library.
- In some cases, userName, clientIpAddress(portNumber), and applicationName may be blank.
- Multiple message numbers may be output.
- If the email address "pgsql-bugs@postgresql.org" is output to the message and the cause of the error cannot be identified, contact Fujitsu technical support.

Example

Message output to the server message log

```
3D000: 2015-07-10 19:41:05 JST [13899]: [1-1] user = fepuser, db = fep, remote = 127.0.0.1(51902) app = [unknown] FATAL: database "fep" does not exist (10571)
```

1.1.2 Components

This section explains the components of a message.

Message type

The message type indicates the type of error denoted in the message. The message type will be one of the following:

- Information (INFO, NOTICE, LOG, DEBUG)
  
  This message type denotes a notification from the system, not an error. There is no need to take action.

- Warning (WARNING)
  
  This message type denotes that no error occurred but confirmation or action is required by the user. Take the actions described in the "Action" section of the message.

- Error (ERROR, FATAL, PANIC)
  
  This message type denotes that an error has occurred. Take the actions described in the "Action" section of the message.

- Supplementary information (DETAIL, HINT, QUERY, CONTEXT, LOCATION, STATEMENT)
  
  This message type denotes supplementary information relating to the previous message. If the message was output in English, the message type will also be in English. (Detail, hint, query, context, location, statement)

Message text

The text of the message reports the status of the system or an error in the system.

The notation "@numeric character@" that appears in "Chapter 2 FUJITSU Enterprise Postgres Messages" indicates an embedded character string. A character string is output to a message that is actually output.

If a message locale other than 'ja' is specified, messages added by FUJITSU Enterprise Postgres will be output in English.

For other message locales, the messages are output in English.

However, messages output by the pgx_jadmin command will always be displayed in English regardless of the message locale.

Message number

The message number uniquely identifies each message. It is output as a string of five single-byte numeric characters. Use the message number that is output to find the explanation of the corresponding message in this document. The message numbers may change, so do not use them as keywords for monitoring.

No message number is assigned to messages output by a PL/pgSQL RAISE statement.
The message number is only output if the message locale is 'ja' or 'en'. For other message locales, the message number is not output.

### 1.2 Mirroring Controller Message Format

This section explains the format of messages output by the Mirroring Controller.

Mirroring Controller messages are output to the following locations:

- System log
- Event log

#### Output format

```
programName[processId]: msgType: msgText (msgNumber)
```

For `programName`, use the value of the syslog_ident parameter or event_source parameter defined in the `serverIdentifier.conf` file.

The message types output by Mirroring Controller, their severity, and their corresponding value in the system log are shown in the table below.

<table>
<thead>
<tr>
<th>Message type</th>
<th>Severity</th>
<th>Meaning</th>
<th>System log</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFO</td>
<td>Information</td>
<td>Provides information not categorized as LOG or NOTICE.</td>
<td>INFO</td>
</tr>
<tr>
<td>LOG</td>
<td></td>
<td>Provides information recognized as a particularly important event in tracing the operation history. (Example: Automatic switch is complete)</td>
<td></td>
</tr>
<tr>
<td>NOTICE</td>
<td>Notice</td>
<td>Outputs information that takes into account the user instructions within the program in response to an executed or automatically executed process.</td>
<td>NOTICE</td>
</tr>
<tr>
<td>WARNING</td>
<td>Warning</td>
<td>Provides a warning, for example it will soon be impossible to maintain multiplexing capabilities.</td>
<td>WARNING</td>
</tr>
<tr>
<td>ERROR</td>
<td>Error</td>
<td>Reports that an error other than FATAL or PANIC has occurred.</td>
<td>ERROR</td>
</tr>
<tr>
<td>FATAL</td>
<td></td>
<td>Reports that an error has been detected requiring system recovery in one of the multiplexed database systems. It also reports the content and cause of the error.</td>
<td>CRIT</td>
</tr>
<tr>
<td>PANIC</td>
<td></td>
<td>Reports that an error has been detected requiring immediate system recovery in all multiplexed database systems. It also reports the content and cause of the error.</td>
<td>ALERT</td>
</tr>
</tbody>
</table>

The message types output by Mirroring Controller, their severity, and their corresponding value in the event log are shown in the table below.
Table 1.2 Message type, severity, and corresponding value in the event log

<table>
<thead>
<tr>
<th>Message type</th>
<th>Severity</th>
<th>Meaning</th>
<th>Event log</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFO</td>
<td>Information</td>
<td>Provides information not categorized as LOG or NOTICE.</td>
<td>INFORMATIO N</td>
</tr>
<tr>
<td>LOG</td>
<td>Notice</td>
<td>Provides information recognized as a particularly important event in tracing the operation history. (Example: Automatic switch is complete)</td>
<td></td>
</tr>
<tr>
<td>NOTICE</td>
<td>Notice</td>
<td>Outputs information that takes into account the user instructions within the program in response to an executed or automatically executed process.</td>
<td></td>
</tr>
<tr>
<td>WARNING</td>
<td>Warning</td>
<td>Provides a warning, for example it will soon be impossible to maintain multiplexing capabilities.</td>
<td>WARNING</td>
</tr>
<tr>
<td>ERROR</td>
<td>Error</td>
<td>Reports that an error other than FATAL or PANIC has occurred.</td>
<td>ERROR</td>
</tr>
<tr>
<td>FATAL</td>
<td>Reports that an error has been detected requiring system recovery in one of the multiplexed database systems. It also reports the content and cause of the error.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PANIC</td>
<td>Reports that an error has been detected requiring immediate system recovery in all multiplexed database systems. It also reports the content and cause of the error.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The message severity has the following meanings:

- **Information**
  
  Informational status. A message that was reported by the system is displayed. No action is required.

- **Notice**
  
  Informational status, but a message that should be noted is displayed. If necessary, take the actions described in the "Action" section of the message.

- **Warning**
  
  No error has occurred, but the user is requested to check, and take action. Take the actions described in the "Action" section of the message.

- **Error**
  
  An error has occurred. Take the actions described in the "Action" section of the message.
Chapter 2 FUJITSU Enterprise Postgres Messages

This chapter explains messages output by FUJITSU Enterprise Postgres.

2.1 Message Numbers Beginning with 10000

2.1.1 10001

no Snowball stemmer available for language "@1@" and encoding "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.2 10002

multiple StopWords parameters

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.3 10003

multiple Language parameters

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.4 10004

unrecognized Snowball parameter: "@1@"

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.5 10005

missing Language parameter

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.6 10006

could not determine which collation to use for index expression

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.7 10007

old GIN indexes do not support whole-index scans nor searches for nulls

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.8 10008

index row size @1@ exceeds maximum @2@ for index "@3@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.9  10009

"@1@" is an index
[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.10 10010

could not create archive status file "@1@": @2@
[Description]
  There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
  Processing will be aborted.

[Action]
  Delete user data stored in the database server to free up space on the disk.

2.1.11 10011

could not write archive status file "@1@": @2@
[Description]
  There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
  Processing will be aborted.

[Action]
  Delete user data stored in the database server to free up space on the disk.

2.1.12 10012

could not seek in log segment @1@ to offset @2@: @3@
[Description]
  An error occurred during I/O processing in the database server.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.
2.1.13 10013

could not write to log file @1@ at offset @2@, length @3@: @4@

[Description]
There are the following cases:
- failed to write transaction log file
- failed to write transaction log file on backup data storage destination

[System Processing]
Processing will be aborted.

[Action]
Lack of storage space or malfunction of storage allocating the file shown in this message is considered.
If it’s true, recover the database system according to “Actions when an Error Occurs” of “Operation Guide” or “Cluster Operation Guide”.
If it’s not true, identify the cause according to the informations in this message such as errno, and work around.
The following major causes are considered.
- the file has no permission or the permission has been changed
- power of the storage allocating the file has been turned off
- unmounted the storage allocating the file
- another process or human operated the file
- the storage allocating the file has crashed

2.1.14 10014

updated min recovery point to @1@/@2@ on timeline @3@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.1.15 10015

could not open file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.1.16 10016

could not create file "@1@": @2@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.1.17 10017

could not write to file "@1@": @2@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.1.18 10018

could not fsync file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.19 10019

could not close file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.20 10022
not enough data in file "@1@"
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.21 10025

could not close log file @1@: @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.22 10026

could not read file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.23 10027

could not remove file "@1@": @2@
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.1.24 10028

archive file "@1@" has wrong size: @2@ instead of @3@
An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.1.25 10029

restored log file "@1@" from archive

Terminated normally.

Continues processing.

No action required.

2.1.26 10030

could not restore file "@1@" from archive: @2@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.1.27 10032

could not open transaction log directory "@1@": @2@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.1.28 10033

recycled transaction log file "@1@"

Terminated normally.
2.1.29 10034

removing transaction log file "@1@"

[Description]
Terminated normally.

[Action]
No action required.

2.1.30 10035

could not rename old transaction log file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.31 10036

could not remove old transaction log file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.32 10037

required WAL directory "@1@" does not exist

[Description]
An error occurred during I/O processing in the database server.

[Action]
Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.1.33 10038

creating missing WAL directory "@1@"

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.

2.1.34 10039

could not create missing directory "@1@": @2@

[Description]
   There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
   Processing will be aborted.

[Action]
   Delete user data stored in the database server to free up space on the disk.

2.1.35 10040

removing transaction log backup history file "@1@"

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.

2.1.36 10043

incorrect resource manager data checksum in record at @1@/@2@

[Description]
   An error occurred during I/O processing in the database server.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.
2.1.37 10044

**invalid record offset at @1@/@2@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.38 10045

**contrecord is requested by @1@/@2@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.39 10048

**invalid record length at @1@/@2@: wanted @3@, got @4@**

[Description]
Invalid record length was found on archive log or transaction log data.

[System Processing]
The following causes could be considered.
- if the log level is information(INFO, NOTICE, LOG, DEBUG)
  Continue processing.
- if the log level is error(ERROR, FATAL, PANIC)
  Processing will be aborted.

[Action]
If the log level is information(INFO, NOTICE, LOG, DEBUG), no action is required.
When the log level is error(ERROR, FATAL, PANIC), take either of the following actions.
- if this message is output during starting instance
  Please restore according to "Deal at the time of abnormality" of "Operation Guide" or "Cluster Operation Guide".
- if this message is output during recovering
  Cannot continue to recover with the current backup data because an archive log in the backup has an error.
  Recover from the other backup data.
2.1.40 10049

**invalid resource manager ID @1@ at @2@/@3@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.41 10050

**record with incorrect prev-link @1@/@2@ at @3@/@4@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.42 10051

**record length @1@ at @2@/@3@ too long**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.43 10052

**there is no contrecord flag at @1@/@2@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.44 10053
invalid contrecord length @1@ at @2@/@3@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.45 10054

invalid magic number @1@ in log segment @2@, offset @3@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.46 10055

invalid info bits @1@ in log segment @2@, offset @3@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.47 10056

WAL file is from different database system: WAL file database system identifier is @1@, pg_control database system identifier is @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.48 10057

unexpected pageaddr @1@@2@ in log segment @3@, offset @4@
An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.1.49 10058**

unexpected timeline ID @1@ in log segment @2@, offset @3@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.1.50 10059**

out-of-sequence timeline ID @1@ (after @2@) in log segment @3@, offset @4@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.1.51 10060**

syntax error in history file: @1@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.1.52 10061**

invalid data in history file: @1@

An error occurred during I/O processing in the database server.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.1.53 10062

invalid data in history file "@1@"

[Description]
  An error occurred during I/O processing in the database server.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.1.54 10063

new timeline @1@ is not a child of database system timeline @2@

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.55 10064

new target timeline is @1@

[Description]
  Terminated normally.

[System Processing]
  Continues processing.

[Action]
  No action required.

2.1.56 10065

could not rename file "@1@" to "@2@": @3@

[Description]
  An error occurred during I/O processing in the database server.

[System Processing]
  Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.57 10066
could not link file "@1@" to "@2@": @3@
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.1.58 10067
could not create control file "@1@": @2@
[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.1.59 10068
could not write to control file: @1@
[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.1.60 10069
could not fsync control file: @1@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.61 10070
could not close control file: @1@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.62 10071
could not open control file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.63 10072
could not read from control file: @1@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.64 10073
database files are incompatible with server
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.1.65 10074

**Incorrect checksum in control file**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.66 10075

**Could not write bootstrap transaction log file: @1@**

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.1.67 10076

**Could not fsync bootstrap transaction log file: @1@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.68 10077

**Could not close bootstrap transaction log file: @1@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.69 10078
could not open recovery command file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.70 10079

parameter "@1@" requires a Boolean value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.71 10080

recovery_target_timeline is not a valid number: "@1@"

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.72 10081

recovery_target_xid is not a valid number: "@1@"

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.1.73 10082

recovery_target_name is too long (maximum @1@ characters)
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.74 10083

unrecognized recovery parameter "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.75 10084

recovery command file "@1@" specified neither primary_conninfo nor restore_command

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.1.76 10085

recovery command file "@1@" must specify restore_command when standby mode is not enabled

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.77 10086

recovery target timeline @1@ does not exist
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.78 10087

archive recovery complete

Terminated normally.

Continues processing.

No action required.

2.1.79 10088

recovery stopping after commit of transaction @1@, time @2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.1.80 10089

recovery stopping before commit of transaction @1@, time @2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.1.81 10090

recovery stopping after abort of transaction @1@, time @2@

An error occurred.
[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.1.82 10091

recovery stopping before abort of transaction @1@, time @2@

[Description]
    An error occurred.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.1.83 10092

recovery stopping at restore point "@1@", time @2@

[Description]
    An error occurred.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.1.84 10093

recovery has paused

[Description]
    An error occurred because execution is temporarily impossible.

[Action]
    Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.1.85 10095

recovery is in progress

[Description]
    An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.86 10096

hot standby is not possible because @1@ = @2@ is a lower setting than on the master server (its value was @3@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.87 10097

WAL was generated with wal_level=minimal, data may be missing

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.1.88 10098

hot standby is not possible because wal_level was not set to "replica" or higher on the master server

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.1.89 10099

control file contains invalid data

[Description]
An error occurred during I/O processing in the database server.
2.2 Message Numbers Beginning with 10100

2.2.1 10100

**database system was shut down at @1@**

**[Description]**
Terminated normally.

**[System Processing]**
Continues processing.

**[Action]**
No action required.

2.2.2 10101

**database system was shut down in recovery at @1@**

**[Description]**
Displaying the date and time that the standby server is shut down last time.

**[System Processing]**
Continues processing.

**[Action]**
No action is required.

2.2.3 10102

**database system shutdown was interrupted; last known up at @1@**

**[Description]**
An error occurred.

**[System Processing]**
Processing will be aborted.

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

2.2.4 10103

**database system was interrupted while in recovery at @1@**

**[Description]**
An error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.2.5 10104

**database system was interrupted while in recovery at log time @1@**

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.2.6 10105

**database system was interrupted; last known up at @1@**

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.2.7 10106

**requested timeline @1@ is not a child of this server's history**

[Description]
  An error occurred during I/O processing in the database server.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.2.8 10107

**entering standby mode**

[Description]
  Terminated normally.

[System Processing]
  Continues processing.

2.2.13 10112

**checkpoint record is at @1@/@2@**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.14 10113

**could not find redo location referenced by checkpoint record**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.15 10114

**could not locate required checkpoint record**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.16 10115

**could not locate a valid checkpoint record**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
using previous checkpoint record at @1@/@2@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.18 10121
invalid next transaction ID

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.19 10122
invalid redo in checkpoint record

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.20 10123
invalid redo record in shutdown checkpoint

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.21 10124
database system was not properly shut down; automatic recovery in progress
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.2.22 10125

initializing for hot standby
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.23 10126

redo starts at @1@/@2@
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.24 10127

redo done at @1@/@2@
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.25 10128

last completed transaction was at log time @1@
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.26 10129

redo is not required

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.2.27 10130

requested recovery stop point is before consistent recovery point

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.28 10131

WAL ends before end of online backup

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.29 10132

WAL ends before consistent recovery point
An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.2.30 10133

selected new timeline ID: @1@

Terminated normally.

Continues processing.

No action required.

2.2.31 10134

consistent recovery state reached at @1@/@2@

Terminated normally.

Continues processing.

No action required.

2.2.32 10135

invalid primary checkpoint link in control file

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.2.33 10136

invalid secondary checkpoint link in control file

An error occurred during I/O processing in the database server.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.34 10137
invalid checkpoint link in backup_label file

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.35 10138
invalid primary checkpoint record

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.36 10139
invalid secondary checkpoint record

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.37 10140
invalid checkpoint record

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.38 10141
invalid resource manager ID in primary checkpoint record
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.39 10142
invalid resource manager ID in secondary checkpoint record
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.40 10143
invalid resource manager ID in checkpoint record
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.41 10144
invalid xl_info in primary checkpoint record
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.2.42 10145

invalid xl_info in secondary checkpoint record

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.43 10146

invalid xl_info in checkpoint record

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.44 10147

invalid length of primary checkpoint record

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.45 10148

invalid length of secondary checkpoint record

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.46 10149
invalid length of checkpoint record

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.47 10150
shutting down

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.48 10151
database system is shut down

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.49 10152
concurrent transaction log activity while database system is shutting down

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.50 10153
skipping restartpoint, recovery has already ended
2.2.51 10154

skipping restartpoint, already performed at @1@/@2@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.52 10155

recovery restart point at @1@/@2@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.53 10156

restore point "@1@" created at @2@/@3@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.54 10157

unexpected timeline ID @1@ (after @2@) in checkpoint record

[Description]
An error occurred during I/O processing in the database server.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.2.55 10158

unexpected timeline ID @1@ (should be @2@) in checkpoint record

[Description]
  An error occurred during I/O processing in the database server.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.2.56 10159

could not fsync log segment @1@: @2@

[Description]
  An error occurred during I/O processing in the database server.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.2.57 10160

could not fsync write-through log file @1@: @2@

[Description]
  An error occurred during I/O processing in the database server.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.2.58 10161

could not fdatasync log file @1@: @2@

[Description]
  An error occurred during I/O processing in the database server.

[System Processing]
  Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

### 2.2.59 10163

**recovery is not in progress**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.2.60 10164

**WAL level not sufficient for making an online backup**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.2.61 10165

**backup label too long (max @1@ bytes)**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.2.62 10166

**a backup is already in progress**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.2.63 10167

could not stat file "@1@": @2@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.2.64 10168

a backup is not in progress

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.2.65 10169

invalid data in file "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.2.66 10170

pg_stop_backup cleanup done, waiting for required WAL segments to be archived

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.67 10171
pg_stop_backup still waiting for all required WAL segments to be archived (@1@ seconds elapsed)

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.2.68 10172
pg_stop_backup complete, all required WAL segments have been archived

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.69 10173
WAL archiving is not enabled; you must ensure that all required WAL segments are copied through other means to complete the backup

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.2.70 10176
WAL level not sufficient for creating a restore point

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.2.71 10177

value too long for restore point (maximum @1@ characters)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.2.72 10179

could not read from log segment @1@, offset @2@: @3@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.2.73 10180

received promote request

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.74 10181

trigger file found: @1@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.75 10182
database is not accepting commands to avoid wraparound data loss in database "@1@"

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.2.76 10183

database is not accepting commands to avoid wraparound data loss in database with OID @1@

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.2.77 10184

database "@1@" must be vacuumed within @2@ transactions

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.2.78 10185

database with OID @1@ must be vacuumed within @2@ transactions

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.2.79 10186

transaction ID wrap limit is @1@, limited by database with OID @2@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.2.80 10187

transaction identifier "@1@" is too long

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.2.81 10188

prepared transactions are disabled

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.2.82 10189

transaction identifier "@1@" is already in use

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.2.83 10190
**maximum number of prepared transactions reached**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.2.84 10191**

**prepared transaction with identifier "@1@" is busy**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.2.85 10192**

**permission denied to finish prepared transaction**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.2.86 10193**

**prepared transaction belongs to another database**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.2.87 10194**

**prepared transaction with identifier "@1@" does not exist**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.2.88 10195
two-phase state file maximum length exceeded

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.2.89 10197
could not write two-phase state file: @1@

There was insufficient free space in the disk of the database server during execution of the application.

Processing will be aborted.

Delete user data stored in the database server to free up space on the disk.

2.2.90 10199
could not close two-phase state file: @1@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.3 Message Numbers Beginning with 10200

2.3.1 10200
could not open two-phase state file "@1@": @2@
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.2 10201

`could not stat two-phase state file "@1@": @2@`

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.3 10202

`could not read two-phase state file "@1@": @2@`

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.4 10204

`could not remove two-phase state file "@1@": @2@`

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.5 10205
could not recreate two-phase state file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.3.6 10206
could not fsync two-phase state file: @1@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.3.7 10209
removing future two-phase state file "@1@"
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.8 10210
removing corrupt two-phase state file "@1@"
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.9 10211
removing stale two-phase state file "@1@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.10 10212

recovering prepared transaction @1@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.3.11 10213

file "@1@" doesn't exist, reading as zeroes

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.12 10214

could not access status of transaction @1@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.3.13 10215
could not truncate directory ": apparent wraparound

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.14 10216

removing file ":

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.3.15 10217

cannot have more than 2^32-2 commands in a transaction

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.16 10218

maximum number of committed subtransactions (extraneous) exceeded

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.17 10219

cannot PREPARE a transaction that has operated on temporary tables
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.18 10220

@1@ cannot run inside a transaction block

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.19 10221

@1@ cannot run inside a subtransaction

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.20 10222

@1@ cannot be executed from a function or multi-command string

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.21 10223

@1@ can only be used in transaction blocks

An error occurred during execution of the application or command.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.22 10224

**there is already a transaction in progress**

[Description]
  Terminated normally but a warning was output.

[System Processing]
  Continues processing.

[Action]
  Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.23 10225

**there is no transaction in progress**

[Description]
  Terminated normally but a warning was output.

[System Processing]
  Continues processing.

[Action]
  Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.3.24 10226

**no such savepoint**

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.25 10227

**cannot have more than 2^32-1 subtransactions in a transaction**

[Description]
  An error occurred during execution of the application or command.
2.3.26 10228

**index "]1@]" is not a btree**

[Description]
An error occurred during I/O processing in the database server.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.27 10229

**version mismatch in index "]1@]: file version ]2@, code version ]3@**

[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.3.28 10230

**index "]1@]: contains unexpected zero page at block ]2@**

[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.3.29 10231

**index "]1@]: contains corrupted page at block ]2@**

[Description]
An error occurred during I/O processing in the database server.

[Action]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.3.30 10232
duplicate key value violates unique constraint "@1@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.31 10233
failed to re-find tuple within index "@1@"
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.3.32 10234
row is too big: size @1@, maximum size @2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.33 10235
"@1@" is not an index
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.3.34 10236

"@1@" is a composite type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.35 10237

could not obtain lock on row in relation "@1@"

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.3.36 10238

hash indexes do not support whole-index scans

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.37 10239

index "@1@" is not a hash index

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.3.38 10240
index "@1@" has wrong hash version
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.3.39 10241
out of overflow pages in hash index "@1@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.40 10242
index row size @1@ exceeds hash maximum @2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.41 10243
column "@1@" cannot be declared SETOF
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.42 10244
number of columns (@1@) exceeds limit (@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.43 10245

user-defined relation parameter types limit exceeded

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.44 10246

RESET must not include values for parameters

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.45 10247

unrecognized parameter namespace "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.46 10248

unrecognized parameter "@1@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.47 10249

`parameter "@1@" specified more than once`
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.48 10250

`invalid value for boolean option "@1@": @2@`
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.49 10251

`invalid value for integer option "@1@": @2@`
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.50 10252

value @1@ out of bounds for option "@2@"
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.51 10253

invalid value for floating point option "@1@": @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.52 10254

unsupported format code: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.53 10255

number of index columns (@1@) exceeds limit (@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.54 10256

index row requires @1@ bytes, maximum size is @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.55 10257

picksplit method for column @1@ of index "@2@" failed

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.3.56 10259

index "@1@" contains an inner tuple marked as invalid

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.57 10260

aggregate @1@ needs to have compatible input type and transition type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.58 10261

could not create exclusion constraint "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.3.59 10262

conflicting key value violates exclusion constraint "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.60 10263

RIGHT JOIN is only supported with merge-joinable join conditions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.61 10264

FULL JOIN is only supported with merge-joinable join conditions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.62 10265

could not determine actual type of argument declared @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.63 10266
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.68 10271
return type @1@ is not supported for SQL functions

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.69 10272
cannot change sequence "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.70 10273
cannot change TOAST relation "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.71 10274
cannot insert into view "@1@"

An error occurred during execution of the application or command.

### 2.3.72 10275

**cannot update view "@1@"**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.73 10276

**cannot copy from view "@1@"**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.74 10278

**cannot change relation "@1@"**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.3.75 10279

**cannot lock rows in sequence "@1@"**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.76 10280

cannot lock rows in TOAST relation "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.77 10281

cannot lock rows in view "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.78 10282

cannot lock rows in foreign table "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.79 10283

cannot lock rows in relation "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
null value in column "@1@" violates not-null constraint

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

new row for relation "@1@" violates check constraint "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

could not serialize access due to concurrent update

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

ON COMMIT can only be used on temporary tables

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
cannot create temporary table within security-restricted operation

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.85 10289

could not rewind hash-join temporary file: @1@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.3.86 10290

could not write to hash-join temporary file: @1@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.3.87 10291

could not read from hash-join temporary file: @1@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.3.88 10292

relation "@1@" does not exist
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.3.89 10293**

**cursor "@1@" is not a SELECT query**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.3.90 10294**

**cursor "@1@" is held from a previous transaction**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.3.91 10295**

**cursor "@1@" has multiple FOR UPDATE/SHARE references to table "@2@"**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.3.92 10296**

**cursor "@1@" does not have a FOR UPDATE/SHARE reference to table "@2@"**

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.93 10297

**cursor "@1@" is not positioned on a row**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.94 10298

**cursor "@1@" is not a simply updatable scan of table "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.3.95 10299

**type of parameter @1@ (@2@) does not match that when preparing the plan (@3@)**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4 Message Numbers Beginning with 10300

2.4.1 10300

**no value found for parameter @1@**

[Description]
An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.2 10301

*more than one row returned by a subquery used as an expression*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.3 10302

*frame starting offset must not be null*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.4 10303

*frame starting offset must not be negative*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.5 10304

*frame ending offset must not be null*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.6 10305
frame ending offset must not be negative
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.7 10306
transaction left non-empty SPI stack
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.4.8 10307
subtransaction left non-empty SPI stack
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.4.9 10308
cannot open multi-query plan as cursor
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.4.10 10309**

**cannot open @1@ query as cursor**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.4.11 10310**

**DECLARE SCROLL CURSOR ... FOR UPDATE/SHARE is not supported**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.4.12 10311**

**number of array dimensions (@1@) exceeds the maximum allowed (@2@)**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.4.13 10312**

**array subscript in assignment must not be null**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.4.14 10313

attribute @1@ has wrong type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.15 10314

table row type and query-specified row type do not match

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.16 10315

cannot pass more than @1@ argument to a function
cannot pass more than @2@ arguments to a function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.17 10316

functions and operators can take at most one set argument

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.4.18 10317

**function returning setof record called in context that cannot accept type record**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.19 10318

**function return row and query-specified return row do not match**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.20 10319

**table-function protocol for materialize mode was not followed**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.21 10320

**unrecognized table-function returnMode: @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
rows returned by function are not all of the same row type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.23 10323

IS DISTINCT FROM does not support set arguments

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.24 10324

op ANY/ALL (array) does not support set arguments

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.25 10325

cannot merge incompatible arrays

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.26 10326

multidimensional arrays must have array expressions with matching dimensions
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.27 10327

**NULLIF does not support set arguments**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.28 10328

**domain @1@ does not allow null values**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.29 10329

**value for domain @1@ violates check constraint "@2@"**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.30 10330

**aggregate function calls cannot be nested**

An error occurred during execution of the application or command.
[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.31 10331

window function calls cannot be nested

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.32 10332

target type is not an array

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.33 10333

ROW() column has type @1@ instead of type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.34 10334

could not identify a comparison function for type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.35 10335

**OFFSET must not be negative**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.36 10336

**LIMIT must not be negative**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.37 10337

@1@

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.38 10338

**could not find array type for data type @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.4.39 10339

**cannot assign to system column "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.40 10340

**cannot set an array element to DEFAULT**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.41 10341

**cannot set a subfield to DEFAULT**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.42 10342

**column "@1@" is of type @2@ but default expression is of type @3@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.43 10343
row expansion via "*" is not supported here

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.44 10344
cannot assign to field "@1@" of column "@2@" because its type @3@ is not a composite type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.45 10345
cannot assign to field "@1@" of column "@2@" because there is no such column in data type @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.46 10346
array assignment requires type @1@ but expression is of type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.47 10347
column "@1@" is of type @2@ but expression is of type @3@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.48 10348

cannot cast type @1@ to @2@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.49 10349

column ",@1@" of relation ",@2@" does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.50 10350

column name ",@1@" specified more than once

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.51 10351

column reference ",@1@" is ambiguous

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.52 10352

cross-database references are not implemented: "@1@.@2@.@3@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.53 10353

improper qualified name (too many dotted names): @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.54 10354

SELECT * with no tables specified is not valid

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.55 10355

there is no parameter $@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.56 10356

**inconsistent types deduced for parameter $@1@$**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.57 10357

**could not determine data type of parameter $@1@$**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.58 10358

**identifier "@1@" will be truncated to "@2@"**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.4.59 10363

**aggregate functions are not allowed in DEFAULT expressions**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.60 10365

**column name "@1@" appears more than once in USING clause**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.61 10366

**common column name "@1@" appears more than once in left table**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.62 10367

**column "@1@" specified in USING clause does not exist in left table**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.63 10368

**common column name "@1@" appears more than once in right table**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.4.64 10369

column "@1@" specified in USING clause does not exist in right table

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.65 10370

column alias list for "@1@" has too many entries

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.66 10371

argument of @1@ must not contain variables

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.67 10372

aggregate functions are not allowed in @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.68 10374
@1@ "@2@" is ambiguous
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.69 10375

non-integer constant in @1@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.70 10376

@1@ position @2@ is not in select list
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.71 10377

window "@1@" is already defined
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.72 10378

schema "@1@" does not exist
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.73 10379

cannot override PARTITION BY clause of window "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.74 10380

cannot override ORDER BY clause of window "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.75 10382

in an aggregate with DISTINCT, ORDER BY expressions must appear in argument list

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.76 10383

for SELECT DISTINCT, ORDER BY expressions must appear in select list

An error occurred during execution of the application or command.
SELECT DISTINCT ON expressions must match initial ORDER BY expressions

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

extension "@1" already exists, skipping

[Description]
Terminated normally but a warning was output.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

array of serial is not implemented

[Description]
An error occurred during execution of the application or command.

2.4.81 10388

@1@ will create implicit sequence "@2@" for serial column "@3@.@4@"

Description
Terminated normally.

System Processing
Continues processing.

Action
No action required.

2.4.82 10389

conflicting NULL/NOT NULL declarations for column "@1@" of table "@2@"

Description
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.

Action
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.83 10390

multiple default values specified for column "@1@" of table "@2@"

Description
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.

Action
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.84 10391

referenced relation "@1@" is not a table

Description
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.85 10392

multiple primary keys for table "@1@" are not allowed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.86 10393

cannot use an existing index in CREATE TABLE

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.87 10394

conversion "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.88 10395

index "@1@" is already associated with a constraint

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.4.89 10396

index "@1@" does not belong to table "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.90 10397

index "@1@" is not valid

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.4.91 10399

"@1@" is not a unique index

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5 Message Numbers Beginning with 10400

2.5.1 10400

index "@1@" contains expressions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.5.2 10401

"@1@" is a partial index

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.3 10402

"@1@" is a deferrable index

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.4 10403

index "@1@" does not have default sorting behavior

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.5 10404

column "@1@" named in key does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.6 10405
column "@1@" appears twice in primary key constraint

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.7 10406

column "@1@" appears twice in unique constraint

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.8 10407

index expression cannot return a set

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.9 10408

index expressions and predicates can refer only to the table being indexed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.10 10409

rule WHERE condition cannot contain references to other relations
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.11 10412
rules with WHERE conditions can only have SELECT, INSERT, UPDATE, or DELETE actions

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.12 10413
conditional UNION/INTERSECT/EXCEPT statements are not implemented

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.13 10414
ON SELECT rule cannot use OLD

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.14 10415
ON SELECT rule cannot use NEW

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.15 10416

ON INSERT rule cannot use OLD

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.16 10417

ON DELETE rule cannot use NEW

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.17 10418

cannot refer to OLD within WITH query

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.18 10419

cannot refer to NEW within WITH query

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.5.19 10420

**misplaced DEFERRABLE clause**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.5.20 10421

**multiple DEFERRABLE/NOT DEFERRABLE clauses not allowed**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.5.21 10422

**misplaced NOT DEFERRABLE clause**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.5.22 10423

**constraint declared INITIALLY DEFERRED must be DEFERRABLE**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.5.23 10424

misplaced INITIALLY DEFERRED clause

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.24 10425

multiple INITIALLY IMMEDIATE/DEFERRED clauses not allowed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.25 10426

misplaced INITIALLY IMMEDIATE clause

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.26 10427

collations are not supported by type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.27 10428
CREATE specifies a schema (@1@) different from the one being created (@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.28 10429

**table reference "@1@" is ambiguous**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.29 10430

**table reference @1@ is ambiguous**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.30 10431

**table name "@1@" specified more than once**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.31 10432

**WITH query "@1@" has @2@ columns available but @3@ columns specified**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.32 10434

relation "@@1@.@2@@" does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.33 10435

type "@@1@@" does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.34 10436

a column definition list is only allowed for functions returning "record"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.35 10437

a column definition list is required for functions returning "record"

An error occurred during execution of the application or command.
Function "@1@" in FROM has unsupported return type @2@

Description
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.

Action
Check the message text and confirm that the application is written correctly and the command is being used correctly.

VALUES lists "@1@" have @2@ columns available but @3@ columns specified

Description
An error occurred during execution of execution of the application or command.

System Processing
Processing will be aborted.

Action
Check the message text and confirm that the application is written correctly and the command is being used correctly.

Tables can have at most @1@ columns

Description
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.

Action
Check the message text and confirm that the application is written correctly and the command is being used correctly.

WITH query "@1@" does not have a RETURNING clause

Description
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.
2.5.40 10442

*column @1@ of relation "@2@" does not exist*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.41 10443

*invalid reference to FROM-clause entry for table "@1@"*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.42 10444

*missing FROM-clause entry for table "@1@"*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.43 10445

*unrecognized role option "@1@"*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.5.44 10446

**current database cannot be renamed**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.45 10447

**time zone interval must be HOUR or HOUR TO MINUTE**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.46 10449

**MATCH PARTIAL not yet implemented**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.47 10451

**CREATE ASSERTION is not yet implemented**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.48 10452
**DROP ASSERTION is not yet implemented**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.5.49 10453**

**RECHECK is no longer required**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.5.50 10454**

**missing argument**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.5.51 10457**

**number of columns does not match number of values**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.5.52 10458**

**LIMIT #,# syntax is not supported**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.53 10459

VALUES in FROM must have an alias

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.54 10460

subquery in FROM must have an alias

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.5.55 10461

precision for type float must be at least 1 bit

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.56 10462

precision for type float must be less than 54 bits

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.57 10463

**UNIQUE predicate is not yet implemented**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.58 10464

**RANGE PRECEDING is only supported with UNBounded**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.59 10465

**RANGE FOLLOWING is only supported with UNBounded**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.60 10466

**frame start cannot be UNBounded FOLLOWing**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.61 10467

frame starting from following row cannot end with current row

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.62 10468

frame end cannot be UNBOUNDED PRECEDING

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.63 10469

frame starting from current row cannot have preceding rows

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.64 10470

frame starting from following row cannot have preceding rows

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.5.65 10471

**type modifier cannot have parameter name**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.66 10472

**wrong number of parameters on left side of OVERLAPS expression**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.67 10473

**wrong number of parameters on right side of OVERLAPS expression**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.68 10474

**syntax error**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.69 10475
multiple ORDER BY clauses not allowed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.70 10476

multiple OFFSET clauses not allowed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.71 10477

multiple LIMIT clauses not allowed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.72 10478

multiple WITH clauses not allowed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.73 10479

OUT and INOUT arguments aren’t allowed in TABLE functions
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.5.74 10480**

*multiple COLLATE clauses not allowed*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.5.75 10481**

*operator does not exist: @1@*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.5.76 10482**

*could not identify an ordering operator for type @1@*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.5.77 10483**

*could not identify an equality operator for type @1@*

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.78 10484

operator requires run-time type coercion: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.79 10485

operator @1@ is not commutative

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.80 10486

operator is only a shell: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.81 10487

op ANY/ALL (array) requires array on right side

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.82 10488

op ANY/ALL (array) requires operator to yield boolean

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.83 10489

op ANY/ALL (array) requires operator not to return a set

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.84 10490

column "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.85 10491

column "@1@" not found in data type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.5.86 10492

could not identify column "@1@" in record data type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.87 10493

column notation .@1@ applied to type @2@, which is not a composite type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.88 10494

function @1@ does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.89 10495

NULLIF requires = operator to yield boolean

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.5.90 10498
subquery must return only one column

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6 Message Numbers Beginning with 10500

2.6.1 10500

subquery has too many columns

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.2 10501

subquery has too few columns

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.3 10502

cannot determine type of empty array

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.6.4 10503  

could not find range type for data type @1@  

[Description]  
An error occurred during execution of the application or command.  

[System Processing]  
Processing will be aborted.  

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.5 10504  
unnamed XML attribute value must be a column reference  

[Description]  
An error occurred during execution of the application or command.  

[System Processing]  
Processing will be aborted.  

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.6 10505  
unnamed XML element value must be a column reference  

[Description]  
An error occurred during execution of the application or command.  

[System Processing]  
Processing will be aborted.  

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.7 10506  
XML attribute name "@1@" appears more than once  

[Description]  
An error occurred during execution of the application or command.  

[System Processing]  
Processing will be aborted.  

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.8 10507
cannot cast XMLSERIALIZE result to @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.9 10508

unequal number of entries in row expressions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.10 10509

cannot compare rows of zero length

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.11 10510

row comparison operator must yield type boolean, not type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.12 10511

row comparison operator must not return a set
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.6.13 10512**

could not determine interpretation of row comparison operator @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.6.14 10513**

IS DISTINCT FROM requires = operator to yield boolean

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.6.15 10515**

VALUES lists must all be the same length

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.6.16 10520**

INSERT has more expressions than target columns

An error occurred during execution of the application or command.
2.6.17 10521

**INSERT has more target columns than expressions**

*[Description]*

An error occurred during execution of the application or command.

*[System Processing]*

Processing will be aborted.

*[Action]*

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.18 10522

**DEFAULT can only appear in a VALUES list within INSERT**

*[Description]*

An error occurred during execution of the application or command.

*[System Processing]*

Processing will be aborted.

*[Action]*

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.19 10525

**invalid UNION/INTERSECT/EXCEPT ORDER BY clause**

*[Description]*

An error occurred during execution of the application or command.

*[System Processing]*

Processing will be aborted.

*[Action]*

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.20 10526

**INTO is only allowed on first SELECT of UNION/INTERSECT/EXCEPT**

*[Description]*

An error occurred during execution of the application or command.

*[System Processing]*

Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.21 10527

UNION/INTERSECT/EXCEPT member statement cannot refer to other relations of same query level

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.22 10528

each @1@ query must have the same number of columns

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.23 10535

cannot specify both SCROLL and NO SCROLL

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.24 10537

DECLARE CURSOR must not contain data-modifying statements in WITH

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.25 10538

DECLARE CURSOR WITH HOLD ... @1@ is not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.26 10539

DECLARE INSENSITIVE CURSOR ... @1@ is not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.27 10552

aggregate function calls cannot contain window function calls

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.28 10558

window functions are not allowed in JOIN conditions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.6.29 10562

column "@1.@2@" must appear in the GROUP BY clause or be used in an aggregate function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.30 10563

subquery uses ungrouped column "@1.@2@" from outer query

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.31 10564

parameter name "@1@" used more than once

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.32 10565

positional argument cannot follow named argument

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.6.33 10566

@1(*) specified, but @2@ is not an aggregate function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.34 10567

DISTINCT specified, but @1@ is not an aggregate function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.35 10568

ORDER BY specified, but @1@ is not an aggregate function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.36 10569

OVER specified, but @1@ is not a window function nor an aggregate function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.37 10570
function @1@ is not unique

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.38 10571
database "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.39 10572
@1@(*) must be used to call a parameterless aggregate function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.40 10573
aggregates cannot return sets

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.41 10574
aggregates cannot use named arguments
2.6.42 10576

DISTINCT is not implemented for window functions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.43 10577

aggregate ORDER BY is not implemented for window functions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.44 10578

window functions cannot return sets

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.45 10580

extension "@1@" does not exist

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.46 10582
aggregate @1@(*) does not exist
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.47 10583
server "@1@" does not exist
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.48 10584
function "@1@" is an aggregate function
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.49 10585
argument of @1@ must be a type name
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.50 10586

argument of @1@ must not return a set

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.51 10587

argument of @1@ must be type boolean, not type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.52 10588

@1@ types @2@ and @3@ cannot be matched

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.53 10589

@1@ could not convert type @2@ to @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.6.54 10590

arguments declared "anymember" are not all alike

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.55 10591

arguments declared "anymember" are not all alike

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.56 10592

argument declared "anymember" is not an array but type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.57 10593

argument declared "anymember" is not consistent with argument declared "anymember"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.58 10594
could not determine polymorphic type because input has type "unknown"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.59 10595

type matched to anynonarray is an array type: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.60 10596

type matched to anyenum is not an enum type: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.61 10597

recursive reference to query "@1@" must not appear within its non-recursive term

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.6.62 10598

recursive reference to query "@1@" must not appear within a subquery
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.6.63 10599**

recursive reference to query "@1@" must not appear within an outer join

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.7 Message Numbers Beginning with 10600**

**2.7.1 10600**

recursive reference to query "@1@" must not appear within INTERSECT

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.7.2 10601**

recursive reference to query "@1@" must not appear within EXCEPT

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.7.3 10602**

WITH query name "@1@" specified more than once
2.7.4 10604

WITH clause containing a data-modifying statement must be at the top level

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.5 10605

recursive query "@1@" column @2@ has type @3@ in non-recursive term but type @4@ overall

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.6 10606

recursive query "@1@" column @2@ has collation "@3@" in non-recursive term but collation "@4@" overall

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.7 10607

table "@1@" has @2@ columns available but @3@ columns specified
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.8 10608

**mutual recursion between WITH items is not implemented**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.9 10609

**recursive query "@1@" must not contain data-modifying statements**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.10 10610

**recursive query "@1@" does not have the form non-recursive-term UNION [ALL] recursive-term**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.11 10611

**ORDER BY in a recursive query is not implemented**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.12 10612
OFFSET in a recursive query is not implemented

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.13 10613
LIMIT in a recursive query is not implemented

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.14 10614
FOR UPDATE/SHARE in a recursive query is not implemented

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.15 10615
recursive reference to query "@1@" must not appear more than once

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.16 10616

unsafe use of string constant with Unicode escapes

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.17 10617

invalid Unicode escape

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.18 10618

unsafe use of  in a string literal

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.19 10619

@1@ at end of input

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.20 10620

@1@ at or near "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.21 10621

nonstandard use of \ in a string literal

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.22 10622

nonstandard use of \ in a string literal

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.23 10623

nonstandard use of escape in a string literal

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.7.24 10624
collation mismatch between implicit collations "@@1@@" and "@@2@@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.25 10625
collation mismatch between explicit collations "@@1@@" and "@@2@@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.26 10626
target lists can have at most @1@ entries

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.27 10627
cannot subscript type @1@ because it is not an array

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.7.28 10628

array subscript must have type integer

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.29 10629

array assignment to "@1@" requires type @2@ but expression is of type @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.30 10630

improper @1@TYPE reference (too few dotted names): @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.31 10631

improper @1@TYPE reference (too many dotted names): @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.7.32 10632

**type reference @1@ converted to @2@**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.7.33 10633

**return type @1@ is only a shell**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.34 10634

**type modifier cannot be specified for shell type "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.35 10635

**type modifier is not allowed for type "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.7.36 10636

**type modifiers must be simple constants or identifiers**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.37 10637

**invalid type name "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.38 10638

**canceling the wait for synchronous replication and terminating connection due to administrator command**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.7.39 10639

**canceling wait for synchronous replication due to user request**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
**2.7.40 10640**

**standby "@1@" now has synchronous standby priority @2@**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.7.41 10642**

could not connect to the primary server: @1@

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

**2.7.42 10643**

could not receive database system identifier and timeline ID from the primary server: @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.
[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.7.43 10644
invalid response from primary server
[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.7.44 10645
database system identifier differs between the primary and standby
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.45 10646
highest timeline @1@ of the primary is behind recovery timeline @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.7.46 10647
could not start WAL streaming: @1@
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.
2.7.47 10649

invalid socket: @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.7.48 10650

select() failed: @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.7.49 10651

could not receive data from WAL stream: @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.7.50 10652

replication terminated by primary server

[Description]
Primary server has stopped.

[System Processing]
Processing will be aborted.

[Action]
No action is required.

2.7.51 10653
could not send data to WAL stream: @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.7.52 10654

syntax error: unexpected character "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.53 10655

base backup could not send data, aborting backup

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.7.54 10656

duplicate option "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.55 10658

could not stat file or directory "@1@": @2@
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.7.56 10659
could not remove symbolic link "@1@": @2@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.7.57 10660
skipping special file "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.7.58 10663
unexpected EOF on standby connection

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.7.59 10664
**invalid standby message type "@1@"**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

**2.7.60 10667**

**terminating walsender process due to replication timeout**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

**2.7.61 10668**

**standby "@1@" has now caught up with primary**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.7.62 10669**

**number of requested standby connections exceeds max_wal_senders (currently @1@)**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.7.63 10670**

**requested WAL segment @1@ has already been removed**
An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.7.64 10671**

*could not read from log segment @1@, offset @2@, length @3@: @4@*

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.7.65 10672**

*materialize mode required, but it is not allowed in this context*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.7.66 10673**

*terminating walreceiver process due to administrator command*

Terminated normally.

Continues processing.

No action required.

**2.7.67 10674**

*cannot continue WAL streaming, recovery has already ended*

An unexpected error occurred.
[System Processing] 
Processing will be aborted.

[Action] 
Contact Fujitsu technical support.

2.7.68 10675

*authentication failed for user "@1@": host rejected*

[Description] 
An error occurred during execution of the application or command.

[System Processing] 
Processing will be aborted.

[Action] 
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.69 10677

"trust" authentication failed for user "@1@"

[Description] 
An error occurred during execution of the application or command.

[System Processing] 
Processing will be aborted.

[Action] 
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.70 10678

*Ident authentication failed for user "@1@"*

[Description] 
An error occurred during execution of the application or command.

[System Processing] 
Processing will be aborted.

[Action] 
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.71 10679

*Peer authentication failed for user "@1@"*

[Description] 
An error occurred during execution of the application or command.

[System Processing] 
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.72 10680

password authentication failed for user "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.73 10681

GSSAPI authentication failed for user "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.74 10682

SSPI authentication failed for user "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.75 10683

PAM authentication failed for user "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.7.76 10684

LDAP authentication failed for user "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.77 10685

certificate authentication failed for user "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.78 10686

RADIUS authentication failed for user "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.79 10687

authentication failed for user "@1@": invalid authentication method

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
connection requires a valid client certificate

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.81 10690

pg_hba.conf rejects replication connection for host "@1@", user "@2@", @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.82 10691

pg_hba.conf rejects replication connection for host "@1@", user "@2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.83 10692

pg_hba.conf rejects connection for host "@1@", user "@2@", database "@3@", @4@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.84 10693

pg_hba.conf rejects connection for host "@1@", user "@2@", database "@3@"
2.7.85 10694

**no pg_hba.conf entry for replication connection from host "@1@", user "@2@", @3@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.86 10695

**no pg_hba.conf entry for replication connection from host "@1@", user "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.87 10696

**no pg_hba.conf entry for host "@1@", user "@2@", database "@3@", @4@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.88 10697

**no pg_hba.conf entry for host "@1@", user "@2@", database "@3@"**

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.89 10698

**MD5 authentication is not supported when "db_user_namespace" is enabled**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.7.90 10699

**expected password response, got message type @1@**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8 Message Numbers Beginning with 10700

2.8.1 10700

**invalid password packet size**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8.2 10707

**GSSAPI is not supported in protocol version 2**

[Description]
An error occurred during execution of the application or command.
Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.8.3 10708

**Out of Memory**

**Description**

There was insufficient free space in the server's memory during execution of the application.

**System Processing**

Processing will be aborted.

**Action**

Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

### 2.8.4 10709

**Expected GSS Response, Got Message Type @1@**

**Description**

An error occurred during communication between the application and the database server.

**System Processing**

Processing will be aborted.

**Action**

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

### 2.8.5 10710

**SSPI is not supported in protocol version 2**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.8.6 10711

**Expected SSPI Response, Got Message Type @1@**

**Description**

An error occurred during communication between the application and the database server.
[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8.7 10712

**could not create socket for Ident connection: @1@**

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.8.8 10713

**could not bind to local address "@1@": @2@**

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.8.9 10714

could not connect to Ident server at address "@1@", port @2@: @3@

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.8.10 10715

could not send query to Ident server at address "@1@", port @2@: @3@

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.8.11 10716

could not receive response from ident server at address "@1@", port @2@: @3@

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.8.12 10717

invalidly formatted response from ident server: "@1@

[Description]
An error occurred.
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.13 10718

peer authentication is not supported on this platform

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.8.14 10719

could not get peer credentials: @1@

[Description]
The database server was disconnected during execution of the application.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.
  b) If the total number of update records in a single transaction is high, split it into short transactions.
  c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.8.20 10725

pam_set_item(PAM_CONV) failed: @1@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.8.21 10726

pam_authenticate failed: @1@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.8.22 10727

pam acct_mgmt failed: @1@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.8.23 10728

could not release PAM authenticator: @1@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.8.24 10729

could not initialize LDAP: error code @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.25 10730

could not set LDAP protocol version: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.26 10731

could not load wldap32.dll

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.27 10732

could not load function _ldap_start_tls_sA in wldap32.dll

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.8.28 10733

could not start LDAP TLS session: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.29 10734

LDAP server not specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.8.30 10735

invalid character in user name for LDAP authentication

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.8.31 10736

could not perform initial LDAP bind for ldapbinddn "@1@" on server "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.32 10737
could not search LDAP for filter "@1@" on server "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.33 10738

LDAP search for filter "@1@" on server "@2@" returned no entries.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.8.34 10740

could not get dn for the first entry matching "@1@" on server "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.35 10741

could not unbind after searching for user "@1@" on server "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.36 10742

LDAP login failed for user "@1@" on server "@2@": @3@
<table>

2.8.41 10747

**RADIUS authentication does not support passwords longer than @1@ characters**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.8.42 10748

could not generate random encryption vector

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.43 10749

could not perform MD5 encryption of password

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.44 10750

could not create RADIUS socket: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.45 10751
could not bind local RADIUS socket: @1@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.46 10752
could not send RADIUS packet: @1@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.47 10753
timeout waiting for RADIUS response
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.48 10754
could not check status on RADIUS socket: @1@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.8.49 10755

could not read RADIUS response: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.50 10756

RADIUS response was sent from incorrect port: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.51 10757

RADIUS response too short: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.52 10759

RADIUS response is to a different request: @1@ (should be @2@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.53 10760
could not perform MD5 encryption of received packet

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.54 10761

RADIUS response has incorrect MD5 signature

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.55 10762

RADIUS response has invalid code (@1@) for user "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.56 10763

SSL error: @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8.57 10764

unrecognized SSL error code: @1@
An error occurred during communication between the application and the database server.

Processing will be aborted.

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8.58 10767

could not create SSL context: @1@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.8.59 10768

could not load server certificate file "@1@": @2@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.8.60 10769

could not access private key file "@1@": @2@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.8.61 10770

private key file "@1@" has group or world access

An error occurred during I/O processing in the database server.
[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.8.62 10771

could not load private key file "@1@": @2@

[Description]
    An error occurred during I/O processing in the database server.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.8.63 10772

check of private key failed: @1@

[Description]
    An error occurred during I/O processing in the database server.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.8.64 10774

could not load root certificate file "@1@": @2@

[Description]
    An error occurred during I/O processing in the database server.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.8.65 10775

SSL certificate revocation list file "@1@" ignored

[Description]
    Terminated normally but a warning was output.

[System Processing]
    Continues processing.
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.8.66 10776**

**could not load SSL certificate revocation list file "@1@": @2@**

**[Description]**
Terminated normally but a warning was output.

**[System Processing]**
Continues processing.

**[Action]**
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.8.67 10777**

**could not initialize SSL connection: @1@**

**[Description]**
An error occurred during communication between the application and the database server.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

**2.8.68 10778**

**could not set SSL socket: @1@**

**[Description]**
An error occurred during communication between the application and the database server.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

**2.8.69 10779**

**could not accept SSL connection: @1@**

**[Description]**
An error occurred during communication between the application and the database server.

**[System Processing]**
Processing will be aborted.
[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8.70 10780
could not accept SSL connection: EOF detected
[Description]
An error occurred during communication between the application and the database server.
[System Processing]
Processing will be aborted.
[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8.71 10781
could not accept SSL connection: @1@
[Description]
An error occurred during communication between the application and the database server.
[System Processing]
Processing will be aborted.
[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8.72 10782
SSL certificate's common name contains embedded null
[Description]
An error occurred during communication between the application and the database server.
[System Processing]
Processing will be aborted.
[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8.73 10783
SSL connection from "@1@"
[Description]
Terminated normally.
[System Processing]
Continues processing.
[Action]
No action required.
2.8.74 10784

could not translate host name "@1@", service "@2@" to address: @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.8.75 10785

could not translate service "@1@" to address: @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.8.76 10786

could not bind to all requested addresses: MAXLISTEN (@1@) exceeded

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.8.77 10787

could not create @1@ socket: @2@

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

---

**2.8.78 10788**

**setsockopt(SO_REUSEADDR) failed: @1@**

**[Description]**

The database server was disconnected during execution of the application.

**[System Processing]**

Processing will be aborted.

**[Action]**

Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

---

**2.8.79 10789**

**setsockopt(IPV6_V6ONLY) failed: @1@**

**[Description]**

The database server was disconnected during execution of the application.

**[System Processing]**

Processing will be aborted.
[Action]

Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.8.80 10790

could not bind @1@ socket: @2@

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.8.81 10791

could not listen on @1@ socket: @2@
The database server was disconnected during execution of the application.

Processing will be aborted.

Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
    a) Confirm that the database server has not stopped.
    b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.8.82 10792

type @1@ does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.8.83 10793

could not set group of file "@1@": @2@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.8.84 10794
could not set permissions of file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.8.85 10795
could not accept new connection: @1@
[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.8.86 10796
could not set socket to nonblocking mode: @1@
[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.
2.8.87 10798

could not receive data from client: @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.8.88 10799

unexpected EOF within message length word

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.9 Message Numbers Beginning with 10800

2.9.1 10800

invalid message length

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.9.2 10801

incomplete message from client

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.
2.9.3 10802

could not send data to client: @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.9.4 10803

authentication file token too long, skipping: "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.9.5 10804

could not open secondary authentication file "@@1@@" as "@@2@@": @3@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.9.6 10806

authentication option "@1@" is only valid for authentication methods @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.9.7 10807

authentication method "@1@" requires argument "@2@" to be set

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.9.8 10808

local connections are not supported by this build

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.9.9 10809

hostssl requires SSL to be turned on

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.10 10810

hostssl is not supported by this build

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.
invalid connection type "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.12 10812

end-of-line before database specification

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.13 10813

deadline before role specification

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.14 10814

end-of-line before IP address specification

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.15 10815

invalid IP address "@1@": @2@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.16 10816

Specifying both host name and CIDR mask is invalid: "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.17 10817

Invalid CIDR mask in address "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.18 10818

End-of-line before netmask specification

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.19 10819

Invalid IP mask "@1@": @2@

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.20 10820

IP address and mask do not match

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.21 10821

end-of-line before authentication method

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.22 10822

invalid authentication method "@1@"

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.23 10823

invalid authentication method "@1@": not supported by this build

[Description]
An unexpected error occurred.

[Action]
Processing will be aborted.
2.9.24 10825

gssapi authentication is not supported on local sockets

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.25 10826

peer authentication is only supported on local sockets

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.26 10827

cert authentication is only supported on hostssl connections

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.27 10828

authentication option not in name=value format: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.9.28 10829

clientcert can only be configured for "hostssl" rows

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.29 10830

client certificates can only be checked if a root certificate store is available

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.9.30 10831

clientcert can not be set to 0 when using "cert" authentication

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.31 10832

invalid LDAP port number: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.9.32 10833

**invalid RADIUS port number: "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.33 10834

**unrecognized authentication option name: "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.34 10835

**cannot use ldapbasedn, ldapbinddn, ldapbindpasswd, ldapsearchattribute, or ldapurl together with ldapprefix**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.35 10836

**authentication method "ldap" requires argument "ldapbasedn", "ldapprefix", or "ldapsuffix" to be set**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.9.36 10837

could not open configuration file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.9.37 10838

invalid regular expression "@1@": @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.38 10839

regular expression match for "@1@" failed: @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.39 10840

regular expression "@1@" has no subexpressions as requested by backreference in "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.40 10841
missing entry in file "@1@" at end of line @2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.41 10842

provided user name (@1@) and authenticated user name (@2@) do not match
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.42 10843

no match in usermap "@1@" for user "@2@" authenticated as "@3@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.43 10844

could not open server file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.9.44 10845

invalid large-object descriptor: @1@
An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.45 10846

permission denied for large object @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.46 10847

large object descriptor @1@ was not opened for writing

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.47 10848

must be owner of large object @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.48 10849

must be superuser to use server-side lo_import()

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.49 10850

could not read server file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.9.50 10851

could not create server file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.9.51 10852

must be superuser to use server-side lo_export()

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.52 10853

could not write server file "@1@": @2@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.
[Action]
Delete user data stored in the database server to free up space on the disk.

2.9.53 10854

could not write file "@1@": @2@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.9.54 10855

no data left in message

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.9.55 10856

insufficient data left in message

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.56 10857

invalid string in message

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.
2.9.57 10858

invalid message format

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.9.58 10859

"@1@" is not a sequence

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.59 10860

shared tables cannot be toasted after initdb

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.60 10861

cannot drop @1@ because it is required by the database system

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
role @1@ was concurrently dropped

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.62 10863
tablespace @1@ was concurrently dropped

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.63 10864
database @1@ was concurrently dropped

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.64 10865
cannot drop objects owned by @1@ because they are required by the database system

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.65 10866
permission denied to create "@1@.@2@"
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.66 10867

joins can have at most @1@ columns

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.67 10868

column name "@1@" conflicts with a system column name

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.68 10869

column "@1@" specified more than once

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.69 10870

column "@1@" has type "unknown"

Terminated normally but a warning was output.
Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.9.70 10871
column "@1@" has pseudo-type @2@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.71 10872
composite type @1@ cannot be made a member of itself

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.72 10873
no collation was derived for column "@1@" with collatable type @2@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.73 10874
relation "@1@" already exists

An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.74 10875

**type "@1@" already exists**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.75 10876

**check constraint "@1@" already exists**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.76 10877

**constraint "@1@" for relation "@2@" already exists**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.77 10878

**merging constraint "@1@" with inherited definition**

**Description**
Terminated normally.

**System Processing**
Continues processing.
2.9.78 10879

**cannot use column references in default expression**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.79 10880

**default expression must not return a set**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.80 10881

**cannot use subquery in DEFAULT expression**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.81 10882

**aggregate functions are not allowed in index expressions**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.9.82 10883
aggregate functions are not allowed in transform expressions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.83 10884
subfield "@1@" is of type @2@ but expression is of type @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.84 10885
only table "@1@" can be referenced in check constraint

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.85 10886
cannot use subquery in check constraint

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
aggregate functions are not allowed in check constraints
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.87 10888

window functions are not allowed in check constraints
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.88 10889

unsupported ON COMMIT and foreign key combination
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.89 10890

cannot truncate a table referenced in a foreign key constraint
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.90 10891

invalid type internal size @1@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.91 10892

alignment "@1@" is invalid for passed-by-value type of size @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.92 10893

internal size @1@ is invalid for passed-by-value type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.93 10894

alignment "@1@" is invalid for variable-length type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.94 10895

fixed-size types must have storage PLAIN

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.95 10896
could not form array type name for type "@1@"

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.96 10897
cannot determine transition data type

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.97 10898
return type of transition function @1@ is not @2@

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.9.98 10899
must not omit initial value when transition function is strict and transition type is not compatible with input type

[Description]
An error occurred during execution of the application or command.
2.10 Message Numbers Beginning with 10900

2.10.1 10900
cannot determine result data type
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.2 10901
unsafe use of pseudo-type "internal"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.3 10902
sort operator can only be specified for single-argument aggregates
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.4 10903
function @1@ returns a set
[Description]
An error occurred during execution of the application or command.
2.10.5 10904

function @1@ requires run-time type coercion

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.6 10905

large object @1@ does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.7 10906

primary keys cannot be expressions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.8 10907

user-defined indexes on system catalog tables are not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

2.10.13 10912

**invalid enum label "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.14 10913

"@1@" is not an existing enum label

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.15 10914

**ALTER TYPE ADD BEFORE/AFTER is incompatible with binary upgrade**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.16 10915

"@1@" is already an attribute of type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.17 10916
function "@1@" already exists with same argument types

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.18 10917
cannot change return type of existing function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.19 10918
cannot change name of input parameter "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.20 10919
cannot remove parameter defaults from existing function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.21 10920
cannot change data type of existing parameter default value
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.22 10921

function "@1@" is not an aggregate function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.23 10922

"@1@" is an aggregate function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.24 10923

function "@1@" is a window function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.25 10924

function "@1@" is not a window function

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.26 10925

there is no built-in function named "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.27 10926

SQL functions cannot return type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.28 10927

SQL functions cannot have arguments of type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.29 10928

invalid fork name

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.30 10929

cannot drop @1@ because @2@ requires it

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.31 10930

drop auto-cascades to @1@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.10.32 10931

cannot drop @1@ because other objects depend on it

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.33 10932

cannot drop desired object(s) because other objects depend on them

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.10.34 10934

constraint "@1@" for domain @2@ already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.35 10935

table "@1@" has multiple constraints named "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.36 10936

constraint "@1@" for table "@2@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.37 10937

grant options can only be granted to roles

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.38 10938
no privileges were granted for column "@1@" of relation "@2@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.10.39 10939

no privileges were granted for "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.10.40 10940

not all privileges were granted for column "@1@" of relation "@2@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.10.41 10941

not all privileges were granted for "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.10.42 10942

no privileges could be revoked for column "@1@" of relation "@2@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.10.43 10943

no privileges could be revoked for "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.10.44 10944

not all privileges could be revoked for column "@1@" of relation "@2@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.10.45 10945

not all privileges could be revoked for "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
[Action]
  Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.10.46 10946
invalid privilege type @1@ for relation

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.47 10947
invalid privilege type @1@ for sequence

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.48 10948
invalid privilege type @1@ for database

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.49 10949
invalid privilege type @1@ for domain

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.50 10950

invalid privilege type @1@ for function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.51 10951

invalid privilege type @1@ for large object

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.52 10952

invalid privilege type @1@ for language

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.53 10953

invalid privilege type @1@ for schema

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.10.54 10954

**invalid privilege type @1@ for foreign-data wrapper**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.55 10955

**invalid privilege type @1@ for foreign server**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.56 10956

**column privileges are only valid for relations**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.57 10957

**conflicting or redundant options**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.58 10958
**default privileges cannot be set for columns**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.59 10959**

"@1@" is not a domain

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.60 10960**

sequence "@1@" only supports USAGE, SELECT, and UPDATE privileges

**Description**
Terminated normally but a warning was output.

**System Processing**
Continues processing.

**Action**
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.10.61 10961**

invalid privilege type USAGE for table

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.62 10962**

invalid privilege type @1@ for tablespace
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.63 10963**

*sequence "@1@" only supports SELECT column privileges*

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.10.64 10964**

*language "@1@" is not trusted*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.65 10965**

*unrecognized privilege type "@1@"*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.66 10966**

*permission denied for column @1@*
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.67 10967

permission denied for relation @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.68 10968

permission denied for sequence @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.69 10969

permission denied for database @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.70 10970

permission denied for function @1@

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.71 10971

permission denied for operator @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.72 10972

permission denied for type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.73 10973

permission denied for language @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.74 10974

permission denied for large object @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.75 10975

permission denied for schema @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.76 10976

permission denied for operator class @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.77 10977

permission denied for operator family @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.78 10978

permission denied for collation @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.10.79 10979

permission denied for conversion @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.80 10980

permission denied for tablespace @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.81 10981

permission denied for text search dictionary @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.82 10982

permission denied for text search configuration @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.83 10983
permission denied for foreign-data wrapper @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.84 10984

permission denied for foreign server @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.85 10985

permission denied for extension @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.86 10986

must be owner of relation @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.87 10987

must be owner of sequence @1@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.88 10988**  
*must be owner of database @1@*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.89 10989**  
*must be owner of function @1@*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.90 10990**  
*must be owner of operator @1@*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.10.91 10991**  
*must be owner of type @1@*

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.92 10992

must be owner of language @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.93 10993

must be owner of large object @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.94 10994

must be owner of schema @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.95 10995

must be owner of operator class @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.96 10996

**must be owner of operator family @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.97 10997

**must be owner of collation @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.98 10998

**must be owner of conversion @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.10.99 10999

**must be owner of tablespace @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.11 Message Numbers Beginning with 11000

2.11.1 11000

must be owner of text search dictionary @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.2 11001

must be owner of text search configuration @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.3 11002

must be owner of foreign-data wrapper @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.4 11003

must be owner of foreign server @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.11.5 11004

must be owner of extension @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.6 11005

permission denied for column "@1@" of relation "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.7 11007

attribute @1@ of relation with OID @2@ does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.8 11008

relation with OID @1@ does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.9 11009

- 226 -
database with OID @1@ does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.10 11010

function with OID @1@ does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.11 11011

language with OID @1@ does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.12 11012

schema with OID @1@ does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.13 11013

tablespace with OID @1@ does not exist
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.14 11014

**foreign-data wrapper with OID @1@ does not exist**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.15 11015

**foreign server with OID @1@ does not exist**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.16 11016

**type with OID @1@ does not exist**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.17 11017

**operator with OID @1@ does not exist**

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.18 11018
operator class with OID @1@ does not exist
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.19 11019
operator family with OID @1@ does not exist
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.20 11020
text search dictionary with OID @1@ does not exist
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.21 11021
text search configuration with OID @1@ does not exist
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.22 11022

**collation with OID @1@ does not exist**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.23 11023

**conversion with OID @1@ does not exist**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.24 11024

**extension with OID @1@ does not exist**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.25 11025

**conversion "@1@" already exists**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.11.26 11026

default conversion for @1@ to @2@ already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.27 11027

cross-database references are not implemented: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.28 11028

temporary tables cannot specify a schema name

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.29 11029

no schema has been selected to create in

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.30 11030
text search parser "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.31 11031

text search dictionary "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.32 11032

text search template "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.33 11033

text search configuration "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.34 11035
cannot move objects into or out of temporary schemas
2.11.35 11036

**cannot move objects into or out of TOAST schema**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.36 11037

**language "@1@" does not exist**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.37 11038

**improper relation name (too many dotted names): @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.38 11039

**collation "@1@" for encoding "@2@" does not exist**

[Description]
An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.39 11040
cursor 
"@1@" does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.40 11041
permission denied to create temporary tables in database 
"@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.41 11042
cannot create temporary tables during recovery

An error occurred because execution is temporarily impossible.

Processing will be aborted.

Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.11.42 11043
database name cannot be qualified

An error occurred during execution of the application or command.
2.11.43 11044

extension name cannot be qualified

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.44 11045

"@1@" is not a table

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.45 11046

"@1@" is not a foreign table

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.46 11047

must be owner of type @1@ or type @2@

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.47 11048

must be superuser

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.48 11049

must have CREATEROLE privilege

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.49 11050

schema "@1@" already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.50 11051

@1@ is not a valid encoding name

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
Only binary operators can have commutators

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

Only binary operators can have join selectivity

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

Only binary operators can merge join

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

Only binary operators can hash

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

- 237 -
only boolean operators can have negators

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.56 11057

only boolean operators can have restriction selectivity

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.57 11058

only boolean operators can have join selectivity

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.58 11059

only boolean operators can merge join

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.59 11060

only boolean operators can hash
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.60 11061
operator @1@ already exists

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.61 11062
operator cannot be its own negator or sort operator

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.62 11063
cannot remove dependency on @1@ because it is a system object

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.63 11064
collation "@1@" for encoding "@2@" already exists

An error occurred during execution of the application or command.
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.11.64 11065

**collation "@1@" already exists**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.11.65 11066

**cannot access temporary or unlogged relations during recovery**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.11.66 11068

**could not implement GROUP BY**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.11.67 11069

**could not implement DISTINCT**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.11.68 11070**

could not implement window PARTITION BY

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.11.69 11071**

could not implement window ORDER BY

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.11.70 11072**

could not implement recursive UNION

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.11.71 11073**

could not implement @1@

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.11.72 11074

**FULL JOIN is only supported with merge-joinable or hash-joinable join conditions**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.73 11075

**unexpected EOF on client connection**

**[Description]**
An error occurred during communication between the application and the database server.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.11.74 11076

**invalid frontend message type @1@**

**[Description]**
An error occurred during communication between the application and the database server.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.11.75 11077

**statement: @1@**

**[Description]**
Terminated normally.

**[System Processing]**
Continues processing.

**[Action]**
No action required.

2.11.76 11078
current transaction is aborted, commands ignored until end of transaction block

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.77 11079

duration: @1@ ms

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.11.78 11080

duration: @1@ ms statement: @2@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.11.79 11081

parse @1@: @2@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.11.80 11082

cannot insert multiple commands into a prepared statement
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.81 11083
duration: @1@ ms parse @2@: @3@

Terminated normally.

Continues processing.

No action required.

2.11.82 11084
bind @1@ to @2@

Terminated normally.

Continues processing.

No action required.

2.11.83 11085
prepared statement "@1@" does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.84 11086
bind message has @1@ parameter formats but @2@ parameters

An error occurred during communication between the application and the database server.
Processing will be aborted.

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.11.85 11087

**bind message supplies @1@ parameters, but prepared statement "@2@" requires @3@**

**Description**
An error occurred during communication between the application and the database server.

Processing will be aborted.

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.11.86 11088

**incorrect binary data format in bind parameter @1@**

**Description**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.87 11089

**duration: @1@ ms bind @2@ @3@ @4@: @5@**

**Description**
Terminated normally.

Continues processing.

No action required.

2.11.88 11090

**table "@1@" does not exist**

**Description**
An error occurred during execution of the application or command.

Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.89 11091

@1@ @2@@3@@4@@: @5@
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.11.90 11092

duration: @1@ ms @2@ @3@@4@@5@@: @6@
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.11.91 11094

floating-point exception
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.11.92 11095

terminating autovacuum process due to administrator command
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
2.11.93 11096

terminating connection due to conflict with recovery

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.11.94 11097

terminating connection due to administrator command

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.11.95 11098

canceling authentication due to timeout

[Description]
Timeout occurred during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Check the following:
- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.11.96 11099

canceling statement due to statement timeout
[Description]
Timeout occurred during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Check the following:
- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.12 Message Numbers Beginning with 11100

2.12.1 11100

canceling autovacuum task

[Description]
Processing was canceled.

[System Processing]
Processing will be aborted.

[Action]
Check the message text.

2.12.2 11101

canceling statement due to conflict with recovery

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, check if there are any problems in the database server.

2.12.3 11102

canceling statement due to user request
[Description]
Processing was canceled.

[System Processing]
Processing will be aborted.

[Action]
Check the message text.

2.12.4 11103

stack depth limit exceeded

[Description]
The depth of the execution stack exceeded the allowable value during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
If executing a complex SQL, modify it to a simple SQL.

2.12.5 11104

--@1@ requires a value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.6 11105

-c @1@ requires a value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.7 11107

@1@: invalid command-line arguments

[Description]
An error occurred during execution of the application or command.
2.12.8 11108
@1@: no database nor user name specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.9 11109
invalid CLOSE message subtype @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.10 11110
invalid DESCRIBE message subtype @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.12.11 11111
disconnection: session time: @1@:@2@:@3@.@4@ user=@5@ database=@6@
host=@7@@8@@9@

[Description]
An error occurred during communication between the application and the database server.
Processing will be aborted.

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

**2.12.12 11112**

(permission denied: "@1@" is a system catalog)

[Description]
Terminated normally.

[Action]
No action required.

**2.12.13 11113**

cannot execute @1@ in a read-only transaction

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.12.14 11114**

cannot execute @1@ during recovery

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.12.15 11115**

cannot execute @1@ within security-restricted operation

[Description]
An error occurred during execution of the application or command.

[Action]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.16 11116
must be superuser to do CHECKPOINT

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.17 11117
invalid argument size @1@ in function call message

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.12.18 11118
fastpath function call: ":@1@" (OID @2@)

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.12.19 11119
duration: @1@ ms fastpath function call: ":@2@" (OID @3@)

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
2.12.20 11120

**function call message contains @1@ arguments but function requires @2@**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.12.21 11121

**function call message contains @1@ argument formats but @2@ arguments**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.12.22 11122

**incorrect binary data format in function argument @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.23 11123

**bind message has @1@ result formats but query has @2@ columns**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.12.24 11124
portal "@1@" cannot be run

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.25 11125
cursor can only scan forward

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.26 11126
could not open usermap file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.12.27 11127
unexpected delimiter

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.28 11128
unexpected end of line or lexeme
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.12.29 11129**

*unexpected end of line*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.12.30 11130**

*thesaurus sample word "@1@" isn't recognized by subdictionary (rule @2@)*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.12.31 11131**

*thesaurus sample word "@1@" is a stop word (rule @2@)*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.12.32 11132**

*thesaurus substitute word "@1@" is a stop word (rule @2@)*

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.33 11133

thesaurus substitute word "@1@" isn't recognized by subdictionary (rule @2@)
[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.34 11134

thesaurus substitute phrase is empty (rule @1@)
[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.35 11135

multiple DictFile parameters
[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.36 11136

multiple Dictionary parameters
[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.37 11137

unrecognized Thesaurus parameter: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.38 11138

missing DictFile parameter

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.39 11139

missing Dictionary parameter

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.40 11140

invalid text search configuration file name "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.12.41 11141

**could not open statistics file "@1@": @2@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.12.42 11142

**unrecognized headline parameter: "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.43 11143

**MinWords should be less than MaxWords**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.44 11144

**MinWords should be positive**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
ShortWord should be >= 0

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.46 11146

MaxFragments should be >= 0

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.47 11147

string is too long for tsvector (@1@ bytes, max @2@ bytes)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.48 11148

multiple Accept parameters

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.49 11149

unrecognized simple dictionary parameter: "@1@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.50 11150

could not open log file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.12.51 11151

invalid regular expression: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.52 11153

could not open synonym file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.12.53 11154

Ispell dictionary supports only "default", "long", and "num" flag values

[Description]
An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.54 11155

affix file contains both old-style and new-style commands

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.55 11156

unrecognized synonym parameter: "@1@"

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.56 11157

missing Synonyms parameter

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.57 11158

could not open thesaurus file "@1@": @2@

[Description]
   An error occurred during I/O processing in the database server.

[System Processing]
   Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.12.58 11159

**word is too long to be indexed**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.12.59 11160

**conversion from wchar_t to server encoding failed: @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.60 11161

**text search parser does not support headline creation**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.61 11162

**multiple AffFile parameters**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.12.62 11163

unrecognized Ispell parameter: "@1@

2.12.63 11164

missing AffFile parameter

2.12.64 11166

WAL streaming (max_wal_senders > 0) requires wal_level "replica" or "logical"

2.12.65 11167

invalid list syntax in parameter "@1@"
2.12.66 11168

could not create listen socket for "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.12.67 11169

could not create any TCP/IP sockets

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.12.68 11170

could not create Unix-domain socket in directory "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.12.69 11171

no socket created for listening

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.
2.12.70 11172

could not create I/O completion port for child queue

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.12.71 11173

could not load pg_hba.conf

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.12.72 11174

@1@: could not locate matching postgres executable

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.12.73 11175

could not open directory "@1@": @2@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
**2.12.74 11176**

**directory "@1@" does not exist**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.12.75 11177**

could not read permissions of directory "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.12.76 11178**

**specified data directory "@1@" is not a directory**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.12.77 11179**

data directory "@1@" has wrong ownership

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.12.78 11180**
data directory "@1@" has group or world access

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.79 11181

select() failed in postmaster: @1@

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.
  b) If the total number of update records in a single transaction is high, split it into short transactions.
  c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.12.80 11182

incomplete startup packet

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.
2.12.81 11183

*invalid length of startup packet*

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.12.82 11184

*failed to send SSL negotiation response: @1@*

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.12.83 11185

*unsupported frontend protocol @1@.@2@: server supports @3@.0 to @4@.@5@*

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.84 11187

*invalid startup packet layout: expected terminator as last byte*

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.12.85 11188
no PostgreSQL user name specified in startup packet

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.12.86 11189

the database system is starting up

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.12.87 11190

the database system is shutting down

[Description]
The database system is shutting down.

[System Processing]
Processing will be aborted.

[Action]
Retry any necessary applications or commands after restarting the database system.

2.12.88 11191

the database system is in recovery mode

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.12.89 11192
**sorry, too many clients already**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.12.90 11193**

**wrong key in cancel request for process @1@**

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

---

**2.12.91 11194**

**PID @1@ in cancel request did not match any process**

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

---

**2.12.92 11195**

**received SIGHUP, reloading configuration files**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

---

**2.12.93 11196**

**pg_hba.conf not reloaded**
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.12.94 11197

received smart shutdown request

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.12.95 11198

received fast shutdown request

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.12.96 11199

aborting any active transactions

[Description]
Rollback any active transactions because the database system is being requested to shut down.

[System Processing]
Continues processing.

[Action]
Retry any necessary applications or commands after restarting the database system.

2.13 Message Numbers Beginning with 11200

2.13.1 11200
received immediate shutdown request

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.2 11201

aborting startup due to startup process failure

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.3 11202

database system is ready to accept connections

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.4 11203

terminating any other active server processes

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.5 11204

@1@ (PID @2@) exited with exit code @3@
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.6 11205

@1@ (PID @2@) was terminated by exception 0x@3@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.7 11206

@1@ (PID @2@) was terminated by signal @3@: @4@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.8 11207

@1@ (PID @2@) was terminated by signal @3@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.9 11208

@1@ (PID @2@) exited with unrecognized status @3@

[Description]
Terminated normally.
[System Processing]
Continues processing.

[Action]
No action required.

2.13.10 11209

**abnormal database system shutdown**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.11 11210

**all server processes terminated; reinitializing**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.12 11211

**could not fork new process for connection: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.13 11212

**connection received: host=@1@ port=@2@**

[Description]
Terminated normally.

[System Processing]
Continues processing.
2.13.14 11213

**connection received: host=@1@**

**[Description]**
Terminated normally.

**[System Processing]**
Continues processing.

**[Action]**
No action required.

2.13.15 11214

**could not execute server process "@1@": @2@**

**[Description]**
An error occurred.

**[System Processing]**
Processing will be aborted.

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

2.13.16 11215

**database system is ready to accept read only connections**

**[Description]**
Terminated normally.

**[System Processing]**
Continues processing.

**[Action]**
No action required.

2.13.17 11216

**could not fork startup process: @1@**

**[Description]**
An error occurred.

**[System Processing]**
Processing will be aborted.

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.
2.13.18 11217

**could not fork background writer process: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.19 11218

**could not fork WAL writer process: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.20 11219

**could not fork WAL receiver process: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.21 11220

**could not fork archiver: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
could not duplicate socket @1@ for use in backend: error code @2@

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
   a) If the COMMIT process is not executed after update, add the COMMIT process.
   b) If the total number of update records in a single transaction is high, split it into short transactions.
   c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
   - If none of the above situations applies, perform the following:
     a) Confirm that the database server has not stopped.
     b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.13.23 11223

transaction log switch forced (archive_timeout=@1@)

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.24 11224

checkpoint request failed

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.
2.13.25 11225

**compacted fsync request queue from @1@ entries to @2@ entries**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.26 11226

**could not resolve "localhost": @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.13.27 11227

**trying another address for the statistics collector**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.13.28 11228

**could not create socket for statistics collector: @1@**

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

---

**2.13.29 11229**

**could not bind socket for statistics collector: @1@**

**[Description]**
The database server was disconnected during execution of the application.

**[System Processing]**
Processing will be aborted.

**[Action]**
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

---

**2.13.30 11230**

**could not get address of socket for statistics collector: @1@**

**[Description]**
The database server was disconnected during execution of the application.

**[System Processing]**
Processing will be aborted.
[Action]

Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.
  b) If the total number of update records in a single transaction is high, split it into short transactions.
  c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.13.31 11231

could not connect socket for statistics collector: @1@

[Description]

The database server was disconnected during execution of the application.

[System Processing]

Processing will be aborted.

[Action]

Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.
  b) If the total number of update records in a single transaction is high, split it into short transactions.
  c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.13.32 11232

could not send test message on socket for statistics collector: @1@
The database server was disconnected during execution of the application.

Processing will be aborted.

Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.
  b) If the total number of update records in a single transaction is high, split it into short transactions.
  c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
    - If none of the above situations applies, perform the following:
      a) Confirm that the database server has not stopped.
      b) If the database server is starting or stopping, re-execute the command after the database server starts.

select() failed in statistics collector: @1@

The database server was disconnected during execution of the application.

Processing will be aborted.

Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.
  b) If the total number of update records in a single transaction is high, split it into short transactions.
  c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
    - If none of the above situations applies, perform the following:
      a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.13.34 11234
test message did not get through on socket for statistics collector
[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.13.35 11235
could not receive test message on socket for statistics collector: @1@
[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.
  b) If the total number of update records in a single transaction is high, split it into short transactions.
  c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.13.36 11236
incorrect test message transmission on socket for statistics collector
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.
[Action]
Contact Fujitsu technical support.

2.13.37 11237

could not set statistics collector socket to nonblocking mode: @1@
[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.
  b) If the total number of update records in a single transaction is high, split it into short transactions.
  c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.13.38 11238

disabling statistics collector for lack of working socket
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.13.39 11239

could not fork statistics collector: @1@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.40 11241

unrecognized reset target: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.13.41 11243

could not read statistics message: @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.13.42 11244

could not open temporary statistics file ":@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.43 11245

could not write temporary statistics file ":@1@": @2@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.
[Action]
Delete user data stored in the database server to free up space on the disk.

2.13.44 11246

could not close temporary statistics file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.45 11247

could not rename temporary statistics file "@1@" to "@2@": @3@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.46 11248

could not open dictionary file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.47 11249

corrupted statistics file "@1@
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.13.48 11250
database hash table corrupted during cleanup --- abort

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.49 11252
could not read from logger pipe: @1@

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.
  b) If the total number of update records in a single transaction is high, split it into short transactions.
  c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.13.50 11253
logger shutting down

[Description]
Terminated normally.
2.13.51 11254

**could not create pipe for syslog:**

**Description**
An error occurred during communication between the application and the database server.

**System Processing**
Processing will be aborted.

**Action**
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.13.52 11255

**could not fork system logger:**

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

2.13.53 11256

**could not redirect stdout:**

**Description**
An unexpected error occurred.

**System Processing**
Processing will be aborted.

**Action**
Contact Fujitsu technical support.

2.13.54 11257

**could not redirect stderr:**

**Description**
An unexpected error occurred.

**System Processing**
Processing will be aborted.
[Action]
Contact Fujitsu technical support.

2.13.55 11258
could not open affix file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.56 11259
disabling automatic rotation (use SIGHUP to re-enable)
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.13.57 11260
could not fork process: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.58 11261
archive_mode enabled, yet archive_command is not set
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.13.59 11262

Archiving transaction log file "@1@" failed too many times, will try again later

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.13.60 11263

Archive command failed with exit code @1@

[Description]

An error occurred during executing the command specified by archive_command parameter at postgresql.conf.

[System Processing]

Processing will be aborted.

[Action]

Identify the cause according to the messages shown before this message and the return code shown in this message. And then work around if necessary.

2.13.61 11264

Archive command was terminated by exception 0x@1@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.

[Action]

Contact Fujitsu technical support.

2.13.62 11265

Archive command was terminated by signal @1@: @2@

[Description]

An unexpected error occurred.

[System Processing]

Processing will be aborted.
2.13.63 11266

archive command was terminated by signal @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.13.64 11267

archive command exited with unrecognized status @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.13.65 11268

archived transaction log file “@1@”

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.66 11269

could not open archive status directory “@1@”: @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.13.67 11270

could not fork autovacuum launcher process: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.68 11271

autovacuum launcher started

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.69 11272

autovacuum launcher shutting down

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.70 11273

could not fork autovacuum worker process: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.71 11274
autovacuum: processing database "@1@"

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.13.72 11275

autovacuum: dropping orphan temp table "@1@"."@2@" in database "@3@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.13.73 11276

autovacuum: found orphan temp table "@1@"."@2@" in database "@3@"

[Description]
Uncollected garbage of the temporary table was found during automatic vacuuming.

[System Processing]
Continues processing.

[Action]
No action required. The garbage of the temporary table will be collected automatically later. 
If you want to collect it and obtain the storage space immediately, drop the schema derived from @1 with the database user having superuser permission.

2.13.74 11277

autovacuum not started because of misconfiguration

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.13.75 11278

**no empty local buffer available**

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.13.76 11279

**cannot cluster temporary tables of other sessions**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.13.77 11280

**unexpected data beyond EOF in block @1@ of relation @2@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.78 11281

**Continues processing past damaged page headers.**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.13.79 11283

**could not write block @1@ of @2@**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.13.80 11284

**could not truncate file "@1@": @2@**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.13.81 11285

**cannot extend file "@1@" beyond @2@ blocks**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.13.82 11286

**could not seek to block @1@ in file "@2@": @3@**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.13.83 11287

could not extend file "@1@": @2@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.13.84 11288

could not extend file "@1@": wrote only @2@ of @3@ bytes at block @4@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.13.85 11289

could not read block @1@ in file "@2@": @3@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.86 11290

could not read block @1@ in file "@2@": read only @3@ of @4@ bytes

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.87 11291
**could not write block @1@ in file "@2@": @3@**

**Description**
There was insufficient free space in the disk of the database server during execution of the application.

**System Processing**
Processing will be aborted.

**Action**
Delete user data stored in the database server to free up space on the disk.

---

**2.13.88 11292**

**could not write block @1@ in file "@2@": wrote only @3@ of @4@ bytes**

**Description**
There was insufficient free space in the disk of the database server during execution of the application.

**System Processing**
Processing will be aborted.

**Action**
Delete user data stored in the database server to free up space on the disk.

---

**2.13.89 11293**

**could not truncate file "@1@" to @2@ blocks: it's only @3@ blocks now**

**Description**
An error occurred during I/O processing in the database server.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.13.90 11294**

**could not truncate file "@1@" to @2@ blocks: @3@**

**Description**
An error occurred during I/O processing in the database server.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.13.91 11295**

**could not fsync file "@1@" but retrying: @2@**
An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.13.92 11296
could not forward fsync request because request queue is full
[Description]
Terminated normally.

[Action]
No action required.

2.13.93 11297
could not open file "@1@" (target block @2@): @3@
[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.94 11298
could not seek to end of file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.13.95 11299
memory for serializable conflict tracking is nearly exhausted
[Description]
Terminated normally but a warning was output.
Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14 Message Numbers Beginning with 11300

2.14.1 11300

not enough shared memory for data structure "@1@" (@2@ bytes requested)

[Description]
There was insufficient free space in the database server’s shared memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.14.2 11301

deferrable snapshot was unsafe; trying a new one

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.3 11302

out of shared memory

[Description]
There was insufficient free space in the database server’s shared memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
2.14.4 11303

could not serialize access due to read/write dependencies among transactions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.5 11304
deadlock detected

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.14.6 11305
cannot acquire lock mode @1@ on database objects while recovery is in progress

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.7 11306
could not send signal to process @1@: @2@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.8 11307

process @1@ avoided deadlock for @2@ on @3@ by rearranging queue order after @4@.@5@ ms

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.9 11308

process @1@ detected deadlock while waiting for @2@ on @3@ after @4@.@5@ ms

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.10 11309

process @1@ still waiting for @2@ on @3@ after @4@.@5@ ms

[Description]

Terminated normally but a warning was output.

[System Processing]

Continues processing.

[Action]

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.11 11310

process @1@ acquired @2@ on @3@ after @4@.@5@ ms

[Description]

Terminated normally.
[System Processing]
Continues processing.

[Action]
No action required.

2.14.12 11311

**process @1@ failed to acquire @2@ on @3@ after @4@.@5@ ms**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.13 11314

**getrlimit failed: @1@**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.14 11315

**insufficient file descriptors available to start server process**

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.14.15 11316

**out of file descriptors: @1@; release and retry**

[Description]
An unexpected error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  Contact Fujitsu technical support.

2.14.16 11317

temporary file: path "@1@", size @2@

[Description]
  Terminated normally.

[System Processing]
  Continues processing.

[Action]
  No action required.

2.14.17 11318

could not read directory "@1@": @2@

[Description]
  Terminated normally but a warning was output.

[System Processing]
  Continues processing.

[Action]
  Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.18 11320

could not create directory "@1@": @2@

[Description]
  There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
  Processing will be aborted.

[Action]
  Delete user data stored in the database server to free up space on the disk.

2.14.19 11321

not enough shared memory for elements of data structure "@1@" (@2@ bytes requested)

[Description]
  There was insufficient free space in the database server’s shared memory during execution of the application.
[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.14.20 11322
could not create ShmemIndex entry for data structure "@1@

[Description]
There was insufficient free space in the database server's shared memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.14.21 11323
ShmemIndex entry size is wrong for data structure "@1": expected @2@, actual @3@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.14.22 11324
requested shared memory size overflows size_t

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.23 11325
corrupted page pointers: lower = @1@, upper = @2@, special = @3@
An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.14.24 11326

corrupted item pointer: @1@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.14.25 11327

corrupted item lengths: total @1@, available space @2@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.14.26 11328

corrupted item pointer: offset = @1@, size = @2@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.14.27 11329

could not write block @1@ of temporary file: @2@

There was insufficient free space in the disk of the database server during execution of the application.
[System Processing]
   Processing will be aborted.

[Action]
   Delete user data stored in the database server to free up space on the disk.

2.14.28 11330

could not read block @1@ of temporary file: @2@

[Description]
   An error occurred during I/O processing in the database server.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.14.29 11331

could not create unique index @1@

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.30 11332

could not find function @1@ in file @2@

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.31 11333

could not access file @1@: @2@

[Description]
   An error occurred during I/O processing in the database server.

[System Processing]
   Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.14.32 11334

could not load library "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.14.33 11335

incompatible library "@1@": missing magic block

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.34 11336

incompatible library "@1@": version mismatch

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.35 11337

incompatible library "@1@": magic block mismatch

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.14.36 11338

access to library "@1@" is not allowed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.37 11339

invalid macro name in dynamic library path: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.38 11340

zero-length component in parameter "dynamic_library_path"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.39 11341

component in parameter "dynamic_library_path" is not an absolute path

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.40 11342
could not determine actual result type for function "@1@" declared to return type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.41 11343

number of aliases does not match number of columns

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.42 11344

no column alias was provided

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.43 11345

could not determine row description for function returning record

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.44 11346

internal function "@1@" is not in internal lookup table
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.14.45 11347

**unrecognized API version @1@ reported by info function "@2@"**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.14.46 11348

**function @1@ has too many arguments (@2@, maximum is @3@)**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.14.47 11349

**cached plan must not change result type**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.14.48 11350

**"@1@" is not a type**

**Description**
An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.49 11351

record type has not been registered

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.50 11352

@1@ is not an enum

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.51 11353

could not create relation-cache initialization file "@1@": @2@

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.52 11354

cannot PREPARE a transaction that modified relation mapping

An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.53 11355

could not open relation mapping file "@1@": @2@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.14.54 11356

could not read relation mapping file "@1@": @2@

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.14.55 11357

relation mapping file "@1@" contains invalid data

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.14.56 11358

relation mapping file "@1@" contains incorrect checksum

An error occurred during I/O processing in the database server.

Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.14.57 11359
could not write to relation mapping file "@1@": @2@
[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.14.58 11360
could not fsync relation mapping file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.14.59 11361
could not close relation mapping file "@1@": @2@
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.14.60 11362
argument type @1@ is only a shell
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.14.61 11363

no binary input function available for type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.62 11364

no binary output function available for type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.63 11365

no input function available for type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.64 11366

no output function available for type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.65 11367
could not reopen file "@1@" as stderr: @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.14.66 11368

could not reopen file "@1@" as stdout: @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.14.67 11369
cursor "@1@" already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.68 11370
closing existing cursor "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.69 11371
cannot drop active portal "@1@"
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.70 11372

cannot PREPARE a transaction that has created a cursor WITH HOLD

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.71 11373

word is too long (@1@ bytes, max @2@ bytes)

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.72 11374

string is too long for tsvector (@1@ bytes, max @2@ bytes)

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.73 11375

argument of ntile must be greater than zero

An error occurred during execution of the application or command.
2.14.74 11376

**argument of nth_value must be greater than zero**

**Description**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.75 11379

**integer out of range**

**Description**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.76 11380

**argument must be empty or one-dimensional array**

**Description**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.77 11381

**cannot concatenate incompatible arrays**

**Description**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.78 11382

Invalid number of dimensions: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.79 11383

Could not determine input data type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.80 11384

Invalid input syntax for type boolean: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.14.81 11385

Division by zero

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
invalid time zone name: "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

timestamp out of range

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

cannot convert abstime "invalid" to timestamp

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

invalid status in external "tinterval" value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
cannot convert reltime "invalid" to interval

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

invalid input syntax for type money: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

PID @1@ is not a PostgreSQL server process

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

failed to send signal to postmaster: @1@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.14.90 11397

rotation not possible because log collection not active

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.91 11398

global tablespace never has databases

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.14.92 11399

@1@ is not a tablespace OID

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.15 Message Numbers Beginning with 11400

2.15.1 11400

invalid input syntax for integer: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.2 11401

**syntax error in tsquery: "@1@"**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.3 11402

**syntax error in tsvector: "@1@"**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.4 11403

**there is no escaped character: "@1@"**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.5 11404

**wrong position info in tsvector: "@1@"**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.15.6 11405

**sequence "@1@" does not exist**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.7 11406

**more than one function named "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.8 11407

**more than one operator named @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.9 11408

**too many arguments**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
invalid name syntax

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.11 11410

expected a left parenthesis

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.12 11411

expected a right parenthesis

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.13 11412

expected a type name

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.14 11413

improper type name
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.15.15 11414**

*invalid type modifier*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.15.16 11415**

*TIME(@1@)@2@ precision must not be negative*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.15.17 11416**

*TIME(@1@)@2@ precision reduced to maximum allowed, @3@*

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.15.18 11417**

*date out of range: ":@1@"*
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.19 11418

date/time value "current" is no longer supported

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.20 11419

timestamp cannot be NaN

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.21 11420

timestamp(@1@) precision must be between @2@ and @3@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.22 11421

interval out of range

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.23 11422

invalid INTERVAL type modifier

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.24 11423

TIMESTAMP(@1@)@2@ precision must not be negative

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.25 11424

TIMESTAMP(@1@)@2@ precision reduced to maximum allowed, @3@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.15.26 11425

interval(@1@) precision must be between @2@ and @3@

[Description]
An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.27 11426

cannot subtract infinite timestamps

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.28 11427

timestamp units "@1@" not supported

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.29 11428

"time" units "@1@" not recognized

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.30 11429

timestamp with time zone units "@1@" not supported

An error occurred during execution of the application or command.

Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.31 11430
"time with time zone" units "@1@" not recognized

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.32 11431
interval units "@1@" not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.33 11432
timestamp units "@1@" not recognized

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.34 11434
time zone "@1@" not recognized

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.15.35 11435

interval time zone "@1@" must not include months or days

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.36 11436

step size cannot equal zero

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.37 11437

invalid input syntax for uuid: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.38 11438

value "@1@" is out of range for type bigint

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.39 11439
**bigint out of range**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.15.40 11440**

**smallint out of range**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.15.41 11441**

**OID out of range**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.15.42 11442**

**input of anonymous composite types is not implemented**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.15.43 11443**

**malformed record literal: "@1@"**
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.44 11444

wrong number of columns: @1@, expected @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.45 11445

wrong data type: @1@, expected @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.46 11446

improper binary format in record column @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.47 11447

cannot compare dissimilar column types @1@ and @2@ at record column @3@

[Description]
An error occurred during execution of the application or command.
[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.48 11448  
cannot compare record types with different numbers of columns  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.49 11449  
int2vector has too many elements  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.50 11450  
invalid int2vector data  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.51 11451  
oidvector has too many elements  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.52 11452

invalid input syntax for type @1@: "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.53 11453

invalid cidr value: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.54 11454

could not format inet value: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.55 11455

invalid address family in external "@1@" value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.15.56 11456

**invalid bits in external "@1@" value**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.57 11457

**invalid length in external "@1@" value**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.58 11458

**invalid external "cidr" value**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.59 11459

**invalid mask length: @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.60 11460
could not format cidr value: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.61 11461

cannot AND inet values of different sizes

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.62 11462

cannot OR inet values of different sizes

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.63 11463

input is out of range

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.64 11464

cannot subtract inet values of different sizes
<table>
<thead>
<tr>
<th>Error Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.15.65</td>
<td>invalid Datum pointer</td>
</tr>
<tr>
<td>2.15.66</td>
<td>dimension values cannot be null</td>
</tr>
<tr>
<td>2.15.67</td>
<td>&quot;[&quot; must introduce explicitly-specified array dimensions.</td>
</tr>
<tr>
<td>2.15.68</td>
<td>upper bound cannot be less than lower bound</td>
</tr>
</tbody>
</table>
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.69 11469

Array value must start with "{" or dimension information.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.70 11471

Specified array dimensions do not match array contents.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.71 11472

malformed array literal: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.72 11473

array size exceeds the maximum allowed (@1@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.73 11474

invalid array flags

[Description]
An error occurred during execution of the application or command.

[system Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.74 11475

wrong element type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.75 11476

improper binary format in array element @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.76 11477

slices of fixed-length arrays not implemented

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.15.77 11478

**wrong number of array subscripts**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.78 11479

**array subscript out of range**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.79 11480

**cannot assign null value to an element of a fixed-length array**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.80 11481

**updates on slices of fixed-length arrays not implemented**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
source array too small

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.82 11483

null array element not allowed in this context

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.83 11484

cannot compare arrays of different element types

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.84 11485

could not identify a hash function for type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.85 11486

dimension array or low bound array cannot be null
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.86 11487

**wrong range of array subscripts**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.87 11489

**value out of range: overflow**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.88 11490

**value out of range: underflow**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.15.89 11491

**invalid input syntax for type real: "@1@"**

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.90 11492

"@1@" is out of range for type real

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.91 11493

invalid input syntax for type double precision: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.92 11494

"@1@" is out of range for type double precision

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.93 11495

cannot take square root of a negative number

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.94 11496

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.95 11497

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.96 11498

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.15.97 11499

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.16 Message Numbers Beginning with 11500

2.16.1 11500

result is out of range

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.2 11501

count must be greater than zero

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.3 11502

operand, lower bound, and upper bound cannot be NaN

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.4 11503

lower and upper bounds must be finite

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.16.5 11504

**lower bound cannot equal upper bound**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.6 11505

**requested length too large**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.7 11506

**requested character too large**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.8 11507

**requested character too large for encoding: @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.9 11508
null character not permitted

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.10 11509
typmod array must be type cstring[]

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.11 11510
typmod array must be one-dimensional

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.12 11511
typmod array must not contain nulls

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.13 11512
suppress_redundant_updates_trigger: must be called as trigger
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.14 11513

**suppress_redundant_updates_trigger: must be called on update**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.15 11514

**suppress_redundant_updates_trigger: must be called before update**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.16 11515

**suppress_redundant_updates_trigger: must be called for each row**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.17 11517

**value "@1@" is out of range for type integer**

An error occurred during execution of the application or command.
[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.18 11518

invalid oidvector data

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.19 11519

invalid line specification: must be two distinct points

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.20 11520

date/time value "@1@" is no longer supported

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.21 11521

date/time field value out of range: "@1@"

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.
[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.22 11522

interval field value out of range: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.23 11523

time zone displacement out of range: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.24 11524

unrecognized encoding: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.25 11525

invalid hexadecimal digit: "@1@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.16.26 11526

invalid hexadecimal data: odd number of digits

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.27 11527

unexpected "=" while decoding base64 sequence

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.28 11528

invalid symbol "@1@" while decoding base64 sequence

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.29 11529

invalid base64 end sequence

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.30 11530
invalid input syntax for type bytea

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.31 11531

ts_stat query must return one tsvector column

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.32 11532

tsvector column "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.33 11533

column "@1@" is not of tsvector type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.34 11534

column configuration column "@1@" does not exist
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.35 11535

column "@1@" is not of regconfig type

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.36 11536

configuration column "@1@" must not be null

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.37 11537

text search configuration name "@1@" must be schema-qualified

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.38 11538

column "@1@" is not of a character type

An error occurred during execution of the application or command.
[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.39 11539

`ts_rewrite` query must return two `tsquery` columns

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.40 11540

`encoding conversion from @1@ to ASCII not supported`

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.41 11541

"@1@" is not a valid encoding name

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.42 11542

@1@ is not a valid encoding code

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.43 11543

insert or update on table "@1@" violates foreign key constraint "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.44 11544

function "@1@" was not called by trigger manager

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.45 11545

function "@1@" must be fired AFTER ROW

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.46 11546

function "@1@" must be fired for INSERT

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.16.47 11547

**function "@1@" must be fired for UPDATE**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.48 11548

**function "@1@" must be fired for INSERT or UPDATE**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.49 11549

**function "@1@" must be fired for DELETE**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.50 11550

**no pg_constraint entry for trigger "@1@" on table "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.51 11551
referential integrity query on "@1@" from constraint "@2@" on "@3@" gave unexpected result

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.16.52 11552
update or delete on table "@1@" violates foreign key constraint "@2@" on table "@3@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.53 11553
invalid input value for enum @1@: "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.54 11554
invalid internal value for enum: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.55 11555
could not determine actual enum type
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.56 11556

**enum @1@ contains no values**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.57 11557

**invalid format specification for an interval value**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.58 11558

**"EEEE" must be the last pattern used**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.59 11559

**"9" must be ahead of "PR"**

[Description]
An error occurred during execution of the application or command.
2.16.60 11560
"0" must be ahead of "PR"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.61 11561
multiple decimal points

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.62 11562
cannot use "V" and decimal point together

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.63 11563
cannot use "S" twice

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.16.64 11564

cannot use "S" and "PL"/"MI"/"SG"/"PR" together

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.65 11565

cannot use "S" and "MI" together

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.66 11566

cannot use "S" and "PL" together

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.67 11567

cannot use "S" and "SG" together

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.16.68 11568

cannot use "PR" and "S"/"PL"/"MI"/"SG" together

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.69 11569

cannot use "EEEE" twice

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.70 11570

"EEEE" is incompatible with other formats

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.71 11571

"@1@" is not a view

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
could not determine which collation to use for regular expression

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.73 11573

could not determine which collation to use for lower() function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.74 11574

could not determine which collation to use for upper() function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.75 11575

invalid combination of date conventions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.76 11576

conflicting values for "@1@" field in formatting string
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.77 11577

source string too short for "@1@" formatting field

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.78 11578

invalid argument for @1@: "@2@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.79 11579

value for "@1@" in source string is out of range

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.80 11580

"TZ"/"tz"/"OF" format patterns are not supported in to_date

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.81 11581

invalid input string for "Y,YYY"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.82 11582

hour "@1@" is invalid for the 12-hour clock

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.83 11584

cannot calculate day of year without year information

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.84 11585

"EEEE" not supported for input

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.85 11586
"RN" not supported for input
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.86 11587
could not open directory "@1@": @2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.87 11588
array of weight must be one-dimensional
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.88 11589
array of weight is too short
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.16.89 11590

array of weight must not contain nulls

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.90 11591

weight out of range

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.91 11592

regular expression failed: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.92 11593

invalid regexp option: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.93 11594
invalid escape string

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.94 11595

regexp_split does not support the global option

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.95 11596

unsupported XML feature

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.96 11597

invalid encoding name "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.97 11598

invalid XML comment
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.16.98 11599

not an XML document

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17 Message Numbers Beginning with 11600

2.17.1 11600

invalid XML processing instruction

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.2 11601

xmlvalidate is not implemented

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.3 11602

could not initialize XML library
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.17.4 11603
date out of range
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.5 11604
invalid query
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.6 11605
invalid array for XML namespace mapping
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.7 11606
empty XPath expression
[Description]
An error occurred during execution of the application or command.
2.17.8 11607

**neither namespace name nor URI may be null**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.9 11608

**could not register XML namespace with name "@1@" and URI "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.10 11609

**value "@1@" is out of range for type smallint**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.11 11610

**value "@1@" is out of range for type oid**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.17.12 11611

value "@1@" is out of range for 8-bit integer

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.13 11612

gtsvector_in not implemented

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.14 11613

identifier too long

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.15 11615

no operand in tsquery: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.17.16 11616

**value is too big in tsquery: "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.17 11617

**operand is too long in tsquery: "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.18 11618

**word is too long in tsquery: "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.19 11619

**text-search query doesn't contain lexemes: "@1@"**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.17.20 11620
length for type @1@ must be at least 1

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.21 11621

length for type @1@ cannot exceed @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.22 11622

value too long for type character(@1@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.23 11623

value too long for type character varying(@1@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.24 11624

reference to parent directory ("..") not allowed
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.25 11625

**absolute path not allowed**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.26 11626

**path must be in or below the current directory**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.27 11627

**could not open file "@1@" for writing: @2@**

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.17.28 11628

**could not seek in file "@1@": @2@**

An error occurred during I/O processing in the database server.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.17.29 11629

**must be superuser to read files**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.30 11630

**requested length cannot be negative**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.31 11631

**must be superuser to get file information**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.32 11632

**must be superuser to get directory listings**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.33 11633

too many points requested

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.34 11639

invalid number of points in external "path" value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.35 11641

invalid input syntax for type macaddr: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.36 11642

function "dist_lb" not implemented

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.17.37 11643

function "close_lb" not implemented

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.38 11644

cannot create bounding box for empty polygon

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.39 11645

invalid input syntax for type tinterval: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.40 11646

invalid number of points in external "polygon" value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.41 11647
function "poly_distance" not implemented
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.42 11648

function "path_center" not implemented
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.43 11649

open path cannot be converted to polygon
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.44 11650

invalid input syntax for type numeric: "@1@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.45 11652

invalid radius in external "circle" value
2.17.46 11653

cannot convert circle with radius zero to polygon

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.47 11654

must request at least 2 points

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.48 11655

cannot convert empty polygon to circle

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.49 11656

bit string length @1@ does not match type bit(@2@)

[Description]
An error occurred during execution of the application or command.
2.17.50 11657

"@1@" is not a valid binary digit

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.51 11658

"@1@" is not a valid hexadecimal digit

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.52 11659

invalid length in external bit string

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.53 11660

bit string too long for type bit varying(@1@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.54 11661

negative substring length not allowed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.55 11662

cannot AND bit strings of different sizes

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.56 11663

cannot OR bit strings of different sizes

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.57 11664

cannot XOR bit strings of different sizes

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.17.58 11665

bit index @1@ out of valid range (0..@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.59 11666

new bit must be 0 or 1

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.60 11667

unrecognized key word: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.61 11668

missing name

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.62 11669
missing "=" sign

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.63 11670

Invalid mode character: must be one of "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.64 11671

A name must follow the "/" sign

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.65 11672

defaulting grantor to user ID @1@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.17.66 11673

ACL array contains wrong data type
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.67 11674

**ACL arrays must be one-dimensional**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.68 11675

**ACL arrays must not contain null values**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.69 11676

**extra garbage at the end of the ACL specification**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.70 11677

**grant options cannot be granted back to your own grantor**

[Description]
An error occurred during execution of the application or command.
dependent privileges exist

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.72 11679

daclinsert is no longer supported

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.73 11680

daclremove is no longer supported

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.74 11681

unrecognized privilege type: "@1@"

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.75 11682

must be member of role "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.76 11683

view "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.77 11684

INTERVAL(@1@) precision must not be negative

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.78 11685

INTERVAL(@1@) precision reduced to maximum allowed, @2@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.17.79 11686

timestamp out of range: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.80 11687

cannot subtract infinite dates

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.81 11688

date out of range for timestamp

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.82 11689

cannot convert reserved abstime value to date

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.83 11690

time out of range

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.84 11691

interval units "@1@" not recognized

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.85 11692

time zone displacement out of range

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.86 11693

timestamp with time zone units "@1@" not recognized

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.17.87 11695

"@1@" is not a composite type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.88 11696

invalid input syntax for type oid: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.89 11697

invalid octet value in "macaddr" value: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.90 11698

could not determine which collation to use for initcap() function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.17.91 11699
could not convert string to UTF-16: error code @1@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18 Message Numbers Beginning with 11700

2.18.1 11700
could not compare Unicode strings: @1@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.2 11701
index @1@ out of valid range, 0..@2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.3 11702
field position must be greater than zero
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.18.4 11703

unrecognized format() type specifier "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.5 11705

format specifies argument 0, but arguments are numbered from 1

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.6 11706

could not create locale "@1@": @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.7 11707

collations with different collate and ctype values are not supported on this platform

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.8 11708
nondefault collations are not supported on this platform

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.9 11709

invalid multibyte character for locale

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.10 11710

could not determine which collation to use for ILIKE

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.11 11711

text-search query contains only stop words or doesn’t contain lexemes, ignored

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.18.12 11712

invalid input syntax for type tid: "@1@"
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.13 11714

invalid sign in external "numeric" value

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.14 11715

invalid digit in external "numeric" value

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.15 11716

NUMERIC precision @1@ must be between 1 and @2@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.16 11717

NUMERIC scale @1@ must be between 0 and precision @2@

An error occurred during execution of the application or command.
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.17 11718

invalid NUMERIC type modifier

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.18 11719

value overflows numeric format

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.19 11720

cannot convert NaN to integer

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.20 11721

cannot convert NaN to bigint

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.21 11722

**cannot convert NaN to smallint**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.22 11723

**numeric field overflow**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.23 11725

**cannot accept a value of type any**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.24 11726

**cannot display a value of type any**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.18.25 11727

cannot accept a value of type anyarray

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.26 11728

cannot accept a value of type anyenum

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.27 11729

cannot accept a value of type anyrange

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.28 11730

cannot accept a value of type trigger

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.29 11731
cannot accept a value of type language_handler

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.30 11732

cannot display a value of type trigger

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.31 11733

cannot accept a value of type fdw_handler

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.32 11734

cannot display a value of type language_handler

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.33 11735

cannot accept a value of type internal
cannot display a value of type fdw_handler

2.18.34 11736

cannot accept a value of type opaque

2.18.35 11737

cannot display a value of type internal

2.18.36 11738

cannot accept a value of type anyelement

2.18.37 11739
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.38 11740

cannot display a value of type opaque

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.39 11741

cannot accept a value of type anynonarray

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.40 11742

cannot display a value of type anyelement

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.41 11743

cannot accept a value of a shell type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.18.42 11744

cannot display a value of type anynonarray

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.43 11745

cannot accept a value of type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.44 11746

"char" out of range

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.45 11747

LIKE pattern must not end with escape character

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.18.46 11748

case insensitive matching not supported on type bytea

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.47 11749

regular-expression matching not supported on type bytea

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.48 11750

function @1@ is not an aggregate

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.49 11751

rule "@1@" has unsupported event type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.50 11752
replication connection authorized: user=@1@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.18.51 11753

connection authorized: user=@1@ database=@2@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.18.52 11754

database "@1@" has disappeared from pg_database

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.53 11755

database "@1@" is not currently accepting connections

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.54 11756

permission denied for database "@1@"
An error occurred during execution of the application or command.
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.55 11757
too many connections for role "@1@
An error occurred during execution of the application or command.
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.56 11758
database locale is incompatible with operating system
An error occurred during execution of the application or command.
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.57 11759
no roles are defined in this database system
Terminated normally but a warning was output.
Continues processing.
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.18.58 11760
new replication connections are not allowed during database shutdown
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.59 11761

must be superuser to connect during database shutdown

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.60 11762

must be superuser to connect in binary upgrade mode

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.61 11763

remaining connection slots are reserved for non-replication superuser connections

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.62 11765

template database "@1@" does not exist

An error occurred during execution of the application or command.
2.18.63 11766

database @1@ does not exist

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.64 11767

could not stat directory "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.18.65 11768

could not change directory to "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.18.66 11769

cannot set parameter "@1@" within security-restricted operation

[Description]
An error occurred during execution of the application or command.

[Action]
Processing will be aborted.
Action

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.67 11770

role "@1@" is not permitted to log in
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.68 11771

too many connections for database "@1@"
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.69 11772

permission denied to set session authorization
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.70 11773

invalid role OID: @1@
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.18.71 11774

could not create lock file "@1@": @2@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.18.72 11775

could not open stop-word file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.18.73 11776

could not open lock file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.18.74 11777

lock file "@1@" already exists

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.18.75 11778
**pre-existing shared memory block (key @1@, ID @2@) is still in use**

**[Description]**
An error occurred because execution is temporarily impossible.

**[System Processing]**
Processing will be aborted.

**[Action]**
Restart the application. If the same error occurs when you restart the application, check if there are any problems in the database server.

**2.18.76 11779**

**could not remove old lock file "@1@": @2@**

**[Description]**
An error occurred during I/O processing in the database server.

**[System Processing]**
Processing will be aborted.

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

**2.18.77 11780**

**could not read lock file "@1@": @2@**

**[Description]**
There was insufficient free space in the disk of the database server during execution of the application.

**[System Processing]**
Processing will be aborted.

**[Action]**
Delete user data stored in the database server to free up space on the disk.

**2.18.78 11781**

**could not read from file "@1@": @2@**

**[Description]**
An error occurred during I/O processing in the database server.

**[System Processing]**
Processing will be aborted.

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

**2.18.79 11782**

"@1@" is not a valid data directory
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.80 11784

loaded library "@1@"

Terminated normally.

No action required.

2.18.81 11785

unexpected encoding ID @1@ for WIN character sets

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.18.82 11786

unexpected encoding ID @1@ for ISO 8859 character sets

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.18.83 11787

conversion between @1@ and @2@ is not supported

An error occurred during execution of the application or command.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.84 11788

default conversion function for encoding "@1@" to "@2@" does not exist

[Description]
  Terminated normally but a warning was output.

[System Processing]
  Continues processing.

[Action]
  Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.18.85 11789

invalid source encoding name "@1@"

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.86 11790

invalid destination encoding name "@1@"

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.87 11791

invalid byte value for encoding "@1@": 0x@2@

[Description]
  An error occurred during execution of the application or command.
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.88 11792

**encoding name too long**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.89 11793

**invalid byte sequence for encoding "@1@": @2@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.90 11795

**invalid encoding number: @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.91 11796

**unrecognized configuration parameter "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.92 11797

**parameter "@1@" cannot be changed**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.93 11798

**parameter "@1@" cannot be changed without restarting the server**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.18.94 11799

**parameter "@1@" cannot be changed now**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19 Message Numbers Beginning with 11800

2.19.1 11800

**parameter "@1@" cannot be set after connection start**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.19.2 11801

**permission denied to set role "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.3 11802

**cannot set parameter "@1@" within security-definer function**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.4 11803

**invalid value for parameter "@1@": "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.5 11804

**@1@ is outside the valid range for parameter "@2@" (@3@ .. @4@)**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.19.6 11805

@1@ requires a numeric value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.7 11806

@1@ is outside the valid range for parameter "@2@" (@3@ .. @4@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.8 11807

must be superuser to examine "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.9 11808

SET @1@ takes only one argument

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.10 11809
**SET requires parameter name**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.11 11810**

**attempt to redefine parameter "@1@"**

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

---

**2.19.12 11811**

**could not parse setting for parameter "@1@"**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.19.13 11812**

**invalid value for parameter "@1@": @2@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.14 11813**

**invalid value for parameter "@1@": @2@**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.15 11814

**parameter@@1@@ removed from configuration file, reset to default**

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.16 11815

**parameter@@1@@ changed to@@2@@**

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.17 11816

**could not open configuration file@@1@@: maximum nesting depth exceeded**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.18 11817

**syntax error in file@@1@@ line@@2@@, near end of line**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.19 11818

syntax error in file "@1@" line @2@, near token "@3@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.20 11819

user mapping not found for "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.21 11820

foreign-data wrapper "@1@" has no handler

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.22 11821

invalid option "@1@"

An error occurred during execution of the application or command.
foreign-data wrapper "@1@" does not exist

2.19.23 11822

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

index "@1@" does not exist

2.19.24 11823

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

could not create shared memory segment: @1@

2.19.25 11824

There was insufficient free space in the database server's shared memory during execution of the application.

Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

could not stat data directory "@1@": @2@

2.19.26 11825

An error occurred during I/O processing in the database server.
[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.19.27 11826

could not create semaphore: error code @1@

[Description]
   An unexpected error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   Contact Fujitsu technical support.

2.19.28 11827

could not lock semaphore: error code @1@

[Description]
   An error occurred because execution is temporarily impossible.

[System Processing]
   Processing will be aborted.

[Action]
   Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.19.29 11828

could not unlock semaphore: error code @1@

[Description]
   An unexpected error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   Contact Fujitsu technical support.

2.19.30 11829

could not try-lock semaphore: error code @1@

[Description]
   An error occurred because execution is temporarily impossible.
[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.19.31 11830

could not create semaphores: @1@
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.19.32 11832

pre-existing shared memory block is still in use
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.19.33 11833

oldest xmin is far in the past
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.34 11834

some databases have not been vacuumed in over 2 billion transactions
[Description]
Terminated normally but a warning was output.
[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.35 11835

**skipping analyze of \"@1\" --- lock not available**

[Description]
Terminated normally but a warning was output.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.36 11836

**skipping \"@1\" --- only superuser can analyze it**

[Description]
Terminated normally but a warning was output.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.37 11837

**skipping \"@1\" --- only superuser or database owner can analyze it**

[Description]
Terminated normally but a warning was output.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.38 11838

**skipping \"@1\" --- only table or database owner can analyze it**
Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.39 11839

skipping "@1@" --- cannot analyze non-tables or special system tables

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.40 11840

operator class "@1@" does not exist for access method "@2@", skipping

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.41 11841

operator family "@1@" does not exist for access method "@2@", skipping

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.42 11842

operator family "@1@" for access method "@2@" already exists
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.19.43 11843

**access method "@1@" does not exist**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.19.44 11844

**must be superuser to create an operator class**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.19.45 11845

**invalid operator number @1@, must be between 1 and @2@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.19.46 11846

**invalid procedure number @1@, must be between 1 and @2@**

An error occurred during execution of the application or command.
2.19.47 11847

**storage type specified more than once**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.48 11848

**storage type cannot be different from data type for access method "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.49 11849

**operator class "@1@" for access method "@2@" already exists**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.50 11850

**could not make operator class "@1@" be default for type @2@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.51 11851

must be superuser to create an operator family

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.52 11852

must be superuser to alter an operator family

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.53 11853

operator argument types must be specified in ALTER OPERATOR FAMILY

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.54 11854

STORAGE cannot be specified in ALTER OPERATOR FAMILY

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.19.55 11855

**one or two argument types must be specified**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.56 11856

**index operators must be binary**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.57 11857

**access method "@1@" does not support ordering operators**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.58 11858

**index search operators must return boolean**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.59 11859
btree comparison procedures must have two arguments

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.60 11860

btree comparison procedures must return integer

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.61 11861

hash procedures must have one argument

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.62 11862

hash procedures must return integer

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.63 11863

associated data types must be specified for index support procedure
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.64 11864

**procedure number @1@ for (@2@,@3@) appears more than once**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.65 11865

**operator number @1@ for (@2@,@3@) appears more than once**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.66 11866

**operator @1@(@2@,@3@) already exists in operator family "@4@"**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.67 11867

**function @1@(@2@,@3@) already exists in operator family "@4@"**

An error occurred during execution of the application or command.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.68 11868

operator @1@(@2@,@3@) does not exist in operator family "@4@"

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.69 11869

function @1@(@2@,@3@) does not exist in operator family "@4@"

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.70 11870

operator class "@1@" for access method "@2@" already exists in schema "@3@"

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.71 11871

operator family "@1@" for access method "@2@" already exists in schema "@3@"

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.72 11872

no security label providers have been loaded

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.73 11873

must specify provider when multiple security label providers have been loaded

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.74 11874

security label provider "@1@" is not loaded

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.75 11875

"@1" is not a table, view, materialized view, composite type, or foreign table

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.19.76 11876
aggregate attribute "@1@" not recognized

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.77 11877
parameter "lc_collate" must be specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.78 11878
database "@1@" does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.79 11879
collation "@1@" for encoding "@2@" already exists in schema "@3@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.19.80 11880

function @1@ already exists in schema "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.81 11881

unrecognized value for EXPLAIN option "@1@": "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.82 11882

unrecognized EXPLAIN option "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.83 11883

EXPLAIN option BUFFERS requires ANALYZE

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.84 11884
**type "@1@" already exists in schema "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.85 11885**

**collation attribute "@1@" not recognized**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.19.86 11886**

**aggregate stype must be specified**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.87 11887**

**aggregate sfunc must be specified**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.19.88 11888**

**aggregate input type must be specified**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.89 11889

basetype is redundant with aggregate input type specification

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.90 11890

aggregate transition data type cannot be @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.91 11891

function @1@(@2@) does not exist, skipping

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.92 11892

collation "@1@" already exists in schema "@2@"
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.19.93 11894

vacuuming "@1@.@2@"

Terminated normally.

No action required.

2.19.94 11895

relation "@1@" page @2@ is uninitialized --- fixing

Terminated normally but a warning was output.

No action required.

2.19.95 11896

"@1@": removed @2@ row versions in @3@ pages

Terminated normally.

No action required.

2.19.96 11897

"@1@": found @2@ removable, @3@ nonremovable row versions in @4@ pages
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.19.97 11898

"@1@": removed @2@ row versions in @3@ pages

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.19.98 11899

scanned index "@1@" to remove @2@ row versions

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.20 Message Numbers Beginning with 11900

2.20.1 11900

index "@1@" now contains @2@ row versions in @3@ pages

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.20.2 11901
"@1@": truncated @2@ to @3@ pages

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.20.3 11902

option "@1@" not found

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.4 11903

option "@1@" provided more than once

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.5 11904

permission denied to change owner of foreign-data wrapper "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.6 11905

function @1@ must return type @2@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.7 11906**

*permission denied to create foreign-data wrapper "@1@"*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.8 11907**

*foreign-data wrapper "@1@" already exists*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.9 11908**

*permission denied to alter foreign-data wrapper "@1@"*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.10 11909**

*changing the foreign-data wrapper handler can change behavior of existing foreign tables*

Terminated normally but a warning was output.
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.11 11910
changing the foreign-data wrapper validator can cause the options for dependent objects to become invalid

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.12 11912
foreign-data wrapper "@1@" does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.13 11913
server "@1@" already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.14 11914
type "@1@" does not exist, skipping
Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.20.15 11915**

**user mapping "@1@" already exists for server @2@**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.16 11916**

**user mapping "@1@" does not exist for the server**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.17 11917**

**server "@1@" does not exist, skipping**

**Description**

Terminated normally but a warning was output.

**System Processing**

Continues processing.

**Action**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.20.18 11918**

**user mapping "@1@" does not exist for the server, skipping**
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.19 11919

_foreign table "@1@" does not exist_

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.20 11920

_collation "@1@" does not exist, skipping_

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.21 11921

_tablespace "@1@" does not exist_

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.22 11922

_conversion "@1@" does not exist, skipping_
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.23 11923
constraint "@1@" does not exist
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.24 11924
schema "@1@" does not exist, skipping
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.25 11925
extension "@1@" does not exist, skipping
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.26 11926
operator @1@ does not exist, skipping
Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.27 11927

@1@ is not a domain

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.28 11929

Table "@1@" does not exist, skipping

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.29 11931

Only shared relations can be placed in pg_global tables.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.30 11933

Truncate cascades to table "@1@"
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.20.31 11934
cannot vacuum temporary tables of other sessions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.32 11935
cannot inherit from temporary relation "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.33 11936
relation "@1@" would be inherited from more than once

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.34 11937
merging multiple inherited definitions of column "@1@"

[Description]
Terminated normally.
2.20.35 11938

**inherited column "@1@" has a type conflict**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.36 11939

**inherited column "@1@" has a collation conflict**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.37 11940

**inherited column "@1@" has a storage parameter conflict**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.38 11941

**merging column "@1@" with inherited definition**

[Description]
Terminated normally.

[System Processing]
Continues processing.
[Action]
No action required.

2.20.39 11942

column "@1@" has a type conflict

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.40 11943

column "@1@" has a collation conflict

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.41 11944

column "@1@" has a storage parameter conflict

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.42 11945

column "@1@" inherits conflicting default values

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.20.43 11946
check constraint name "@1@" appears multiple times but with different expressions
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.44 11947
cannot rename column of typed table
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.45 11948
"@1@" is not a table, view, materialized view, composite type, index, or foreign table
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.46 11949
inherited column "@1@" must be renamed in child tables too
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.47 11950
cannot rename system column "]@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.48 11951

cannot rename inherited column "]@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.49 11952

column "]@1@" of relation "]@2@" already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.50 11953

cannot @1@ "]@2@" because it is being used by active queries in this session

[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.20.51 11954

cannot @1@ "]@2@" because it has pending trigger events
[Description]
An error occurred because execution is temporarily impossible.

[System Processing]
Processing will be aborted.

[Action]
Restart the application. If the same error occurs when you restart the application, to check if there are any problems in the database server.

2.20.52 11955

**type @1@ is not a composite type**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.53 11956

**cannot rewrite system relation "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.54 11957

**cannot truncate temporary tables of other sessions**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.55 11958

**rewriting table "@1@"**
Terminated normally.
Continues processing.
No action required.

2.20.56 11959

verifying table "@1@"
Terminated normally.
Continues processing.
No action required.

2.20.57 11960

column "@1@" contains null values
An error occurred during execution of the application or command.
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.58 11961

check constraint "@1@" is violated by some row
An error occurred during execution of the application or command.
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.59 11962

"@1@" is not a table, materialized view, or index
An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.60 11963

"@1@" is not a table or view

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.61 11964

"@1@" is not a table or foreign table

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.62 11965

"@1@" is not a table, composite type, or foreign table

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.63 11966

"@1@" is of the wrong type

An error occurred during execution of the application or command.

Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.64 11967
cannot alter type "@1@" because it is the type of a typed table
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.65 11968
type @1@ is not a domain
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.66 11969
cannot add column to typed table
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.67 11970
child table "@1@" has different type for column "@2@"
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.20.68 11971

child table "@1@" has different collation for column "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.69 11972

child table "@1@" has a conflicting "@2@" column

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.70 11973

merging definition of column "@1@" for child "@2@"

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.20.71 11974

column must be added to child tables too

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.72 11975
cannot alter system column "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.73 11976

column "@1@" is in a primary key

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.74 11977

statistics target @1@ is too low

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.75 11978

lowering statistics target to @1@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.76 11979

invalid storage type "@1@"
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.77 11980

column data type @1@ can only have storage PLAIN

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.78 11981

cannot drop column from typed table

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.20.79 11982

column "@1@" of relation "@2@" does not exist, skipping

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.20.80 11983

cannot drop system column "@1@"
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.81 11984**

*cannot drop inherited column "@1@"*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.82 11985**

*ALTER TABLE / ADD CONSTRAINT USING INDEX will rename index "@1@" to "@2@"*

Terminated normally.

Continues processing.

No action required.

**2.20.83 11986**

*constraint must be added to child tables too*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.84 11987**

*inherited relation "@1@" is not a table or foreign table*

An error occurred during execution of the application or command.

**2.20.85 11988**

**constraints on permanent tables may reference only permanent tables**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.86 11989**

**constraints on unlogged tables may reference only permanent or unlogged tables**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.87 11990**

**constraints on temporary tables may reference only temporary tables**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.88 11991**

**number of referencing and referenced columns for foreign key disagree**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.89 11992**

**foreign key constraint "@1@" cannot be implemented**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.90 11993**

**constraint "@1@" of relation "@2@" does not exist**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.91 11994**

**column "@1@" referenced in foreign key constraint does not exist**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.20.92 11995**

**cannot have more than @1@ keys in a foreign key**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
cannot use a deferrable primary key for referenced table "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

there is no primary key for referenced table "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

cannot use a deferrable unique constraint for referenced table "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

there is no unique constraint matching given keys for referenced table "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.21 Message Numbers Beginning with 12000

2.21.1 12000
validating foreign key constraint "@1@"
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.21.2 12001
cannot drop inherited constraint "@1@" of relation "@2@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.3 12002
constraint "@1@" of domain "@2@" does not exist
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.4 12003
constraint "@1@" of relation "@2@" does not exist, skipping
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.21.5 12004

cannot alter column type of typed table
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.6 12005

cannot alter inherited column "@1@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.7 12006

transform expression must not return a set
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.8 12007

cannot use subquery in index expression
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
column "@1@" cannot be cast automatically to type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.10 12011
type of inherited column "@1@" must be changed in child tables too

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.11 12012
cannot alter type of column "@1@" twice

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.12 12013
default for column "@1@" cannot be cast automatically to type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.13 12014
cannot alter type of a column used by a view or rule
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.14 12015

cannot alter type of a column used in a trigger definition

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.15 12016

cannot change owner of index "@1@"

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.21.16 12017

cannot change owner of sequence "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.17 12018

"@1@" is not a table, materialized view, index, or foreign table
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.18 12019

**index "@1@" for table "@2@" does not exist**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.19 12020

**cannot have multiple SET TABLESPACE subcommands**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.20 12021

"@1@" is not a table, view, materialized view, index, or TOAST table

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.21 12022

**cannot move system relation "@1@"**

An error occurred during execution of the application or command.
[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.22 12023
cannot rewrite temporary tables of other sessions
[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.23 12024
cannot change inheritance of typed table
[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.24 12025
circular inheritance not allowed
[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.25 12026
table "@1@" without OIDs cannot inherit from table "@2@" with OIDs
[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.
2.21.26 12027

column "@1@" in child table must be marked NOT NULL

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.27 12028

child table is missing column "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.28 12029

child table "@1@" has different definition for check constraint "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.29 12030

child table is missing constraint "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.21.30 12031
relation "@1@" is not a parent of relation "@2@"
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.31 12032
typed tables cannot inherit
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.32 12033
table is missing column "@1@"
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.33 12034
table has column "@1@" where type requires "@2@"
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
**table "@1@" has different type for column "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.21.35 12036**

**table has extra column "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.21.36 12037**

"@1@" is not a typed table

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.21.37 12038**

cannot move an owned sequence into another schema

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.21.38 12039**

conversion "@1@" already exists in schema "@2@"
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.39 12040

_unlogged sequences are not supported_

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.40 12041

_nextval: reached maximum value of sequence "@1@" @2@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.41 12042

_nextval: reached minimum value of sequence "@1@" @2@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.42 12043

_currval of sequence "@1@" is not yet defined in this session_

An error occurred during execution of the application or command.
2.21.43 12044

**lastval is not yet defined in this session**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.44 12045

**setval: value @1@ is out of bounds for sequence "@2@" (@3@..@4@)**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.45 12046

**INCREMENT must not be zero**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.46 12047

**MINVALUE (@1@) must be less than MAXVALUE (@2@)**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.47 12048

START value (@1@) cannot be less than MINVALUE (@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.48 12049

START value (@1@) cannot be greater than MAXVALUE (@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.49 12050

RESTART value (@1@) cannot be less than MINVALUE (@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.50 12051

RESTART value (@1@) cannot be greater than MAXVALUE (@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.21.51 12052

**CACHE (@1@) must be greater than zero**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.52 12053

**invalid OWNED BY option**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.53 12054

**sequence must have same owner as table it is linked to**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.54 12055

**sequence must be in same schema as table it is linked to**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.55 12056
invalid cursor name: must not be empty
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.56 12057
utility statements cannot be prepared
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.57 12058
prepared statement is not a SELECT
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.58 12059
wrong number of parameters for prepared statement "@1@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.59 12060
cannot use subquery in EXECUTE parameter
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.60 12061
aggregate functions are not allowed in EXECUTE parameters

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.61 12062
window functions are not allowed in EXECUTE parameters

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.62 12063
parameter $@1@ of type @2@ cannot be coerced to the expected type @3@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.63 12064
prepared statement "@1@" already exists

An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.64 12065
unnamed prepared statement does not exist

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.65 12066
skipping vacuum of "@1@" --- lock not available

Terminated normally but a warning was output.

Continue processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.21.66 12067
skipping "@1@" --- only superuser or database owner can vacuum it

Terminated normally but a warning was output.

Continue processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.21.67 12068
skipping "@1@" --- only superuser or database owner can vacuum it

Terminated normally but a warning was output.
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.21.68 12069

skipping "@1@" --- only table or database owner can vacuum it

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.21.69 12070

skipping "@1@" --- cannot vacuum non-tables or special system tables

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.21.70 12071

analyzing "@1@.@2@" inheritance tree

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.21.71 12072

analyzing "@1@.@2@"

[Description]
Terminated normally.
2.21.72 12073

**automatic analyze of table "@1.@2.@3.0" system usage: @4**

[Description]
Terminated normally.

[Action]
No action required.

2.21.73 12074

"@1": scanned @2 of @3 pages, containing @4 live rows and @5 dead rows; @6 rows in sample, @7 estimated total rows

[Description]
Terminated normally.

[Action]
No action required.

2.21.74 12075

**cannot move temporary tables of other sessions**

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.75 12076

**there is no previously clustered index for table "@1.0"**

[Description]
An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.76 12077

cannot cluster a shared catalog

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.77 12078

cannot access temporary tables of other sessions

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.78 12079

"@1@" is not an index for table "@2@"

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.79 12080

cannot cluster on index "@1@" because access method does not support clustering

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.21.80 12081**

cannot cluster on partial index "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.21.81 12082**

cannot cluster on invalid index "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.21.82 12083**

clustering "@1@.@2@" using index scan on "@3@"

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.21.83 12084**

clustering "@1@.@2@" using sequential scan and sort

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
2.21.84 12086

invalid statement name: must not be empty

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.85 12088

SQL function cannot return shell type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.86 12089

type "@1@" is only a shell

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.21.87 12090

type "@1@" is not yet defined

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.21.88 12091

SQL function cannot accept shell type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.89 12092

type @1@ is only a shell

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.21.90 12093

token type "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.91 12094

functions cannot accept set arguments

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.21.92 12095

**VARIADIC parameter must be the last input parameter**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.93 12096

**VARIADIC parameter must be an array**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.94 12097

**argument name "@1@" used more than once**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.95 12098

**only input parameters can have default values**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.21.96 12099
cannot use table references in parameter default value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22 Message Numbers Beginning with 12100

2.22.1 12103
input parameters after one with a default value must also have defaults

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.2 12104
no function body specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.3 12105
no language specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.22.4 12106

**COST must be positive**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.5 12107

**ROWS must be positive**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.6 12108

**unrecognized function attribute "@1@" ignored**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.22.7 12109

**only one AS item needed for language "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.22.8 12110

role "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.9 12111

function result type must be @1@ because of OUT parameters

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.10 12112

function result type must be specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.11 12113

ROWS is not applicable when function does not return a set

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.12 12114
aggregate @1@(@2@) does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.22.13 12116

source data type @1@ is a pseudo-type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.14 12117

target data type @1@ is a pseudo-type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.15 12118

cast function must take one to three arguments

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.16 12119

argument of cast function must match or be binary-coercible from source data type
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.17 12120

second argument of cast function must be type integer

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.18 12121

third argument of cast function must be type boolean

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.19 12122

return data type of cast function must match or be binary-coercible to target data type

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.20 12123

cast function must not be volatile

An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.21 12124

**cast function must not be an aggregate function**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.22 12125

**cast function must not be a window function**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.23 12126

**cast function must not return a set**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.24 12127

**must be superuser to create a cast WITHOUT FUNCTION**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.22.25 12128**

source and target data types are not physically compatible

*Description*

An error occurred during execution of the application or command.

*System Processing*

Processing will be aborted.

*Action*

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.22.26 12129**

composite data types are not binary-compatible

*Description*

An error occurred during execution of the application or command.

*System Processing*

Processing will be aborted.

*Action*

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.22.27 12130**

data types are not binary-compatible

*Description*

An error occurred during execution of the application or command.

*System Processing*

Processing will be aborted.

*Action*

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.22.28 12131**

array data types are not binary-compatible

*Description*

An error occurred during execution of the application or command.

*System Processing*

Processing will be aborted.

*Action*

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.22.29 12132

domain data types must not be marked binary-compatible

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.30 12133

source data type and target data type are the same

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.31 12134

cast from type @1@ to type @2@ already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.32 12135

cast from type @1@ to type @2@ does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.22.33 12136

cast from type @1@ to type @2@ does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.34 12138

no inline code specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.35 12139

language "@1@" does not support inline code execution

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.36 12140

channel name cannot be empty

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
channel name too long

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.38 12142

payload string too long

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.39 12143

cannot PREPARE a transaction that has executed LISTEN, UNLISTEN, or NOTIFY

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.40 12144

too many notifications in the NOTIFY queue

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.41 12145

NOTIFY queue is @@1@@2@ full
[Description]  
Terminated normally but a warning was output.

[System Processing]  
Continues processing.

[Action]  
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.22.42 12147

must be superuser to create text search parsers  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.43 12148

text search parser parameter "@1@" not recognized  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.44 12149

text search parser start method is required  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.45 12150

text search parser gettoken method is required
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.22.46 12151**

text search parser end method is required

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.22.47 12152**

text search parser lextypes method is required

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.22.48 12153**

must be superuser to rename @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.22.49 12154**

text search parser "@1@" does not exist, skipping

Terminated normally but a warning was output.
Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.22.50 12156

text search parser "@1@" already exists in schema "@2@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.51 12157

text search template "@1@" does not accept options

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.52 12158

text search template is required

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.53 12159

text search dictionary "@1@" already exists in schema "@2@"

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.54 12160

text search dictionary "@1@" does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.22.55 12161

must be superuser to create text search templates

[Description]
An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.56 12162

text search template parameter "@1@" not recognized

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.57 12163

text search template lexize method is required

[Description]
An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.58 12165

text search template "@1@" already exists in schema "@2@"

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.59 12167

text search template "@1@" does not exist, skipping

[Description]
   Terminated normally but a warning was output.

[System Processing]
   Continues processing.

[Action]
   Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.22.60 12168

text search configuration parameter "@1@" not recognized

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.61 12169

cannot specify both PARSER and COPY options

[Description]
   An error occurred during execution of the application or command.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.62 12170

text search parser is required
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.63 12171

text search configuration "@1@" already exists in schema "@2@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.64 12172

text search configuration "@1@" does not exist, skipping
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.22.65 12174

mapping for token type "@1@" does not exist
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.66 12175

mapping for token type "@1@" does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.22.67 12176

invalid parameter list format: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.68 12177

group "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.69 12178

invalid extension name: "@1@"

[Description]
An error occurred during execution of the application or command.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.70 12179

invalid extension version name: "@1@"

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.71 12180

could not open extension control file "@1@": @2@

[Description]
  An error occurred during I/O processing in the database server.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.22.72 12181

parameter "@1@" cannot be set in a secondary extension control file

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.73 12183

parameter "@1@" must be a list of extension names

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.74 12184

unrecognized parameter "@1@" in file "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.75 12185

parameter "schema" cannot be specified when "relocatable" is true

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.76 12186

transaction control statements are not allowed within an extension script

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.77 12187

permission denied to create extension "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.22.78 12188

permission denied to update extension "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.79 12189

extension "@1@" has no update path from version "@2@" to version "@3@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.80 12190

relation "@1@" already exists, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.22.81 12191

extension "@1@" already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.22.82 12192

nested CREATE EXTENSION is not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.83 12193

version to install must be specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.84 12194

FROM version must be different from installation target version "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.85 12195

extension "@1@" must be installed in schema "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.22.86 12196
**required extension "@1@" is not installed**

*Description*
An error occurred during execution of the application or command.

*System Processing*
Processing will be aborted.

*Action*
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.22.87 12197**

**language "@1@" does not exist, skipping**

*Description*
Terminated normally but a warning was output.

*System Processing*
Continues processing.

*Action*
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

---

**2.22.88 12198**

**OID @1@ does not refer to a table**

*Description*
An error occurred during execution of the application or command.

*System Processing*
Processing will be aborted.

*Action*
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.22.89 12199**

**table "@1@" is not a member of the extension being created**

*Description*
An error occurred during execution of the application or command.

*System Processing*
Processing will be aborted.

*Action*
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.23 Message Numbers Beginning with 12200

2.23.1 12200

extension "@1@" does not support SET SCHEMA

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.2 12201

nested ALTER EXTENSION is not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.3 12202

version "@1@" of extension "@2@" is already installed

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.23.4 12203

@1@ is already a member of extension "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.23.5 12204

@1@ is not a member of extension "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.6 12205

using pg_pltemplate information instead of CREATE LANGUAGE parameters

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.23.7 12206

must be superuser to create procedural language "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.8 12208

unsupported language "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.9 12209
must be superuser to create custom procedural language
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.10 12210
changing return type of function @1@ from "opaque" to "language_handler"
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.23.11 12211
language "@1@" already exists
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.12 12212
relation "@1@" does not exist, skipping
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
unacceptable schema name "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.14 12214

sequence "@1@" does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.23.15 12215

source encoding "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.16 12216

destination encoding "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.17 12217

encoding conversion function @1@ must return type @2@
### 2.23.18 12218

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**Message**

view "@1@" does not exist, skipping

**2.23.19 12219**

**Description**

Terminated normally but a warning was output.

**System Processing**

Continues processing.

**Action**

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**Message**

relation "@1@" already exists in schema "@2@"

**2.23.20 12220**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**Message**

could not remove directory "@1@": @2@

**2.23.21 12221**

**Message**

"@1@" exists but is not a directory
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.23.22 12222**

**permission denied to create tablespace "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.23.23 12223**

**tablespace location cannot contain single quotes**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.23.24 12224**

**tablespace location must be an absolute path**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.23.25 12225**

**tablespace location "@1@" is too long**

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.26 12226

**unacceptable tablespace name "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.27 12227

**tablespace "@1@" already exists**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.28 12228

**tablespaces are not supported on this platform**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.23.29 12229

**window "@1@" does not exist**

[Description]
An error occurred during execution of the application or command.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.30 12230

**index ”@1@” does not exist, skipping**

[Description]
  Terminated normally but a warning was output.

[Action]
  Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.23.31 12231

**tablespace ”@1@” is not empty**

[Description]
  An error occurred during execution of the application or command.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.32 12232

**aggregate @1@ does not exist**

[Description]
  An error occurred during execution of the application or command.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.33 12233

**could not set permissions on directory ”@1@”: @2@**

[Description]
  An error occurred during I/O processing in the database server.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.23.34 12234

some useless files may be left behind in old database directory "@1@"

[Description]
Terminated normally but a warning was output.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.23.35 12235

directory "@1@" already in use as a tablespace

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.36 12236

could not create symbolic link "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.23.37 12237

could not read symbolic link "@1@": @2@

[Description]
There was insufficient free space in the disk of the database server during execution of the application.
Processing will be aborted.

Delete user data stored in the database server to free up space on the disk.

2.23.38 12238

could not read directory "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.23.39 12239

"@1@" is a foreign table

[Description]
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.40 12240

"@1@" is a view

[Description]
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.41 12241

TRUNCATE FOR EACH ROW triggers are not supported

[Description]
An error occurred during execution of the application or command.

Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.42 12242

INSTEAD OF triggers must be FOR EACH ROW

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.43 12243

INSTEAD OF triggers cannot have WHEN conditions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.44 12244

INSTEAD OF triggers cannot have column lists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.45 12245

cannot use subquery in trigger WHEN condition

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

DELETE trigger's WHEN condition cannot reference NEW values
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.51 12251

BEFORE trigger's WHEN condition cannot reference NEW system columns
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.52 12252

changing return type of function @1@ from "opaque" to "trigger"
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.23.53 12254

trigger "@1@" for relation "@2@" already exists
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.54 12255

ignoring incomplete trigger group for constraint "@1@" @2@
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.23.55 12256

converting trigger group into constraint "@1@" @2@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.23.56 12257

trigger "@1@" for relation "@2@" does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.23.57 12258

trigger "@1@" for table "@2@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.58 12259

permission denied: "@1@" is a system trigger
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.59 12260

trigger function @1@ returned null value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.60 12261

BEFORE STATEMENT trigger cannot return a value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.61 12262

constraint '@1@' is not deferrable

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.62 12263

rule '@1@' does not exist

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.63 12264

SYSID can no longer be specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.64 12265

invalid connection limit: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.65 12266

must be superuser to create superusers

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.66 12267

must be superuser to create replication users

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.67 12268

.permission denied to create database

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.68 12269

.role name "@1@" is reserved

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.69 12270

.role "@1@" already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.70 12271

.must be superuser to alter superusers

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
must be superuser to alter replication users

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

permission denied

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

permission denied to create role

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

tablespace "@1@" does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.23.75 12276

current user cannot be dropped

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.76 12277

session user cannot be dropped

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.77 12278

must be superuser to drop superusers

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.78 12279

role "@1@" cannot be dropped because some objects depend on it

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.79 12280
session user cannot be renamed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.80 12281

current user cannot be renamed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.81 12282

must be superuser to rename superusers

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.82 12283

permission denied to rename database

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.83 12284

MD5 password cleared because of role rename
Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.23.84 12285

*column names cannot be included in GRANT/REVOKE ROLE*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.85 12286

*permission denied to drop role*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.86 12287

*permission denied to drop objects*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.23.87 12288

*must have admin option on role "@1@"*
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.23.88 12289**

**must be superuser to set grantor**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.23.89 12290**

**role "@1@" is a member of role "@2@"**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.23.90 12291**

**role "@1@" is already a member of role "@2@"**

Terminated normally.

Processing continues.

No action required.

**2.23.91 12292**

**role "@1@" is not a member of role "@2@"**

Terminated normally but a warning was output.
Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.23.92 12293**

**COPY BINARY is not supported to stdout or from stdin**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.23.93 12294**

`could not write to COPY file: @1@`

**Description**
There was insufficient free space in the disk of the database server during execution of the application.

**System Processing**
Processing will be aborted.

**Action**
Delete user data stored in the database server to free up space on the disk.

**2.23.94 12295**

**connection lost during COPY to stdout**

**Description**
The database server was disconnected during execution of the application.

**System Processing**
Processing will be aborted.

**Action**
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
   - If none of the above situations applies, perform the following:
   a) Confirm that the database server has not stopped.
   b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.23.95 12296

could not read from COPY file: @1@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.23.96 12297

COPY from stdin failed: @1@

[Description]
Processing was canceled.

[System Processing]
Processing will be aborted.

[Action]
Check the message text.

2.23.97 12298

unexpected message type 0x@1@ during COPY from stdin

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.23.98 12299

must be superuser to COPY to or from a file

[Description]
An error occurred during execution of the application or command.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24 Message Numbers Beginning with 12300

2.24.1 12300
COPY format "@1@" not recognized
[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.2 12301
argument to option "@1@" must be a list of column names
[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.3 12302
argument to option "@1@" must be a valid encoding name
[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.4 12303
option "@1@" not recognized
[Description]
  An unexpected error occurred.
[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.24.5 12304

cannot specify DELIMITER in BINARY mode

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.6 12305

cannot specify NULL in BINARY mode

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.7 12306

COPY delimiter must be a single one-byte character

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.8 12307

COPY delimiter cannot be newline or carriage return

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.9 12308

COPY null representation cannot use newline or carriage return

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.10 12309

COPY delimiter cannot be "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.11 12310

COPY HEADER available only in CSV mode

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.12 12311

COPY quote available only in CSV mode

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.24.13 12312

**COPY quote must be a single one-byte character**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.14 12313

**COPY delimiter and quote must be different**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.15 12314

**COPY escape available only in CSV mode**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.16 12315

**COPY escape must be a single one-byte character**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.17 12316
**COPY force quote available only in CSV mode**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.18 12317**

**COPY force quote only available using COPY TO**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.19 12318**

**COPY force not null available only in CSV mode**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.20 12319**

**COPY force not null only available using COPY FROM**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.21 12320**

**COPY delimiter must not appear in the NULL specification**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.22 12321**

**CSV quote character must not appear in the NULL specification**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.23 12322**

**table "@1@" does not have OIDs**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.24 12323**

**COPY (query) WITH OIDS is not supported**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.25 12324**

**COPY (SELECT INTO) is not supported**

An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.26 12325

FORCE_QUOTE column "@1@" not referenced by COPY

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.27 12326

FORCE_NOT_NULL column "@1@" not referenced by COPY

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.28 12327

cannot copy from sequence "@1@"

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.29 12328

cannot copy from foreign table "@1@"

An error occurred during execution of the application or command.

Check the message text and confirm that the application is written correctly and the command is being used correctly.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.30 12329

cannot copy to sequence "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.31 12330

cannot copy from non-table relation "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.32 12331

relative path not allowed for COPY to file

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.33 12332

could not open file "@1@" for reading: @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.24.34 12333

"@1@" is a directory

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.35 12334

cannot copy to view "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.36 12335

cannot copy to foreign table "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.37 12337

cannot copy to non-table relation "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.38 12338
COPY file signature not recognized
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.39 12339
invalid COPY file header (missing flags)
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.40 12340
unrecognized critical flags in COPY file header
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.41 12341
invalid COPY file header (missing length)
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.42 12342
invalid COPY file header (wrong length)
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.43 12343**

extra data after last expected column

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.44 12344**

missing data for OID column

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.45 12345**

null OID in COPY data

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.24.46 12346**

invalid OID in COPY data

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.47 12347

**missing data for column "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.48 12348

**received copy data after EOF marker**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.49 12349

**row field count is @1@, expected @2@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.50 12350

**literal carriage return found in data**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.51 12351

unquoted carriage return found in data

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.52 12352

literal newline found in data

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.53 12353

unquoted newline found in data

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.54 12354

end-of-copy marker does not match previous newline style

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.24.55 12355

end-of-copy marker corrupt

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.56 12356

unterminated CSV quoted field

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.57 12357

unexpected EOF in COPY data

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.58 12358

invalid field size

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.59 12359
incorrect binary data format
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.60 12360

must specify at least one column
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.61 12361

cannot use more than @1@ columns in an index
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.62 12362

cannot create index on foreign table "@1@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.63 12363

cannot create indexes on temporary tables of other sessions

### 2.24.64 12364

**substituting access method "gist" for obsolete method "rtree"**

[Description]
Terminated normally.

[Action]
No action required.

### 2.24.65 12365

**access method "@1@" does not support unique indexes**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.24.66 12366

**access method "@1@" does not support multicolumn indexes**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.24.67 12367

**access method "@1@" does not support exclusion constraints**

[Description]
An error occurred during execution of the application or command.
[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.68 12368

@1@ @2@ will create implicit index "@3@" for table "@4@"

[Description]
    Terminated normally.

[System Processing]
    Continues processing.

[Action]
    No action required.

2.24.69 12369

cannot use subquery in index predicate

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.70 12370

aggregate functions are not allowed in index predicates

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.71 12371

functions in index predicate must be marked IMMUTABLE

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.72 12372

cannot use subquery in transform expression

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.73 12374

functions in index expression must be marked IMMUTABLE

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.74 12375

could not determine which collation to use for string comparison

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.75 12376

operator is not unique: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.24.76 12377

**operator @1@ is not a member of operator family "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.77 12378

**access method "@1@" does not support ASC/DESC options**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.78 12379

**access method "@1@" does not support NULLS FIRST/LAST options**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.79 12380

**data type @1@ has no default operator class for access method "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.80 12381
Operator class "@1@" does not accept data type @2@

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.81 12382

There are multiple default operator classes for data type @1@

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.82 12383

Table "@1@" has no indexes

[Description]
    Terminated normally.

[System Processing]
    Continues processing.

[Action]
    No action required.

2.24.83 12384

Can only reindex the currently open database

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.84 12385

Table "@1@.@2@" was reindexed
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.24.85 12386

@1@ requires a parameter

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.86 12387

@1@ requires a Boolean value

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.87 12389

argument of @1@ must be a name

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.88 12391

@1@ requires an integer value

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.89 12393

LOCATION is not supported anymore

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.24.90 12396

permission denied to copy database "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.91 12397

invalid server encoding @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.24.92 12399

new encoding (@1@) is incompatible with the encoding of the template database (@2@)

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.25 Message Numbers Beginning with 12400

#### 2.25.1 12400

**new collation (@1@) is incompatible with the collation of the template database (@2@)**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.25.2 12401

**new LC_CTYPE (@1@) is incompatible with the LC_CTYPE of the template database (@2@)**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.25.3 12402

**pg_global cannot be used as default tablespace**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.25.4 12403

**cannot assign new default tablespace "@1@"**

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.5 12404
database "@1@" already exists
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.6 12405
source database "@1@" is being accessed by other users
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.7 12406
encoding "@1@" does not match locale "@2@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.8 12407
role "@1@" does not exist, skipping
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.25.9 12408

cannot drop a template database
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.10 12409

cannot drop the currently open database
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.11 12410

database "@1@" is being accessed by other users
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.12 12411

permission denied to rename role
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.13 12412

current database cannot be changed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.14 12413
cannot change the tablespace of the currently open database

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.15 12414
some relations of database "@1@" are already in tablespace "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.16 12415
permission denied to change owner of database

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.25.17 12417

**SETOF type not allowed for operator argument**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.18 12418

**operator attribute "@1@" not recognized**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.25.19 12419

**operator procedure must be specified**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.20 12420

**at least one of leftarg or rightarg must be specified**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.25.21 12421

**restriction estimator function @1@ must return type @2@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.22 12422

**join estimator function @1@ must return type**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.23 12424

**must be superuser to create a base type**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.24 12425

**type attribute "@1@" not recognized**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.25.25 12426

**invalid type category "@1@": must be simple ASCII**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.26 12427

**array element type cannot be @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.27 12428

**alignment "@1@" not recognized**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.28 12429

**storage "@1@" not recognized**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.29 12430
**type input function must be specified**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.25.30 12431**

**type output function must be specified**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.25.31 12432**

**type modifier output function is useless without a type modifier input function**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.25.32 12433**

**changing return type of function @1@ from @2@ to @3@**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.25.33 12434**

**type input function @1@ must return type @2@**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.34 12436

**type output function @1@ must return type @2@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.35 12437

**type receive function @1@ must return type @2@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.36 12438

**type send function @1@ must return type @2@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.37 12439

"@1@" is not a number

An error occurred during execution of the application or command.
[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.38 12440

"@1@" is not a valid base type for a domain

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.39 12441

multiple default expressions

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.40 12442

conflicting NULL/NOT NULL constraints

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.41 12443

unique constraints not possible for domains

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.42 12444

**primary key constraints not possible for domains**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.43 12445

**exclusion constraints not possible for domains**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.44 12446

**foreign key constraints not possible for domains**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.45 12447

**specifying constraint deferrability not supported for domains**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.25.46 12448

changing argument type of function @1@ from "opaque" to "cstring"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.25.47 12449

changing argument type of function @1@ from "opaque" to @2@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.25.48 12450

typmod_in function @1@ must return type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.49 12451

typmod_out function @1@ must return type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.25.50 12452

**type analyze function @1@ must return type @2@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.51 12453

**column "@1@" of table "@2@" contains null values**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.52 12454

**column "@1@" of table "@2@" contains values that violate the new constraint**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.53 12456

**cannot use table references in domain check constraint**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.54 12457
@1@ is a table's row type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.55 12458
cannot alter array type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.56 12460
could not obtain lock on relation "@1@.@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.57 12462
could not determine which collation to use for view column "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.58 12463
view must have at least one column
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.59 12464

`cannot drop columns from view`

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.60 12465

`cannot change name of view column "@1@" to "@2@"`

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.61 12466

`cannot change data type of view column "@1@" from @2@ to @3@`

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.62 12467

`views must not contain SELECT INTO`

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.63 12468

**views must not contain data-modifying statements in WITH**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.64 12469

**CREATE VIEW specifies more column names than columns**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.65 12470

**view "@1@" will be a temporary view**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.25.66 12471

**views cannot be unlogged because they do not have storage**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.67 12472

rule "@1@" for relation "@2@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.68 12473

portal "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.69 12474

there are multiple rules named "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.70 12475

rule "@1@" for relation "@2@" does not exist, skipping

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.25.71 12476

WITH query name "@1@" appears in both a rule action and the query being rewritten

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.72 12477

cannot have RETURNING lists in multiple rules

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.73 12478

multiple assignments to same column "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.74 12479

infinite recursion detected in rules for relation "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.75 12480

DO INSTEAD NOTHING rules are not supported for data-modifying statements in WITH

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.76 12481

conditional DO INSTEAD rules are not supported for data-modifying statements in WITH

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.77 12482

DO ALSO rules are not supported for data-modifying statements in WITH

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.78 12483

multi-statement DO INSTEAD rules are not supported for data-modifying statements in WITH

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
cannot perform INSERT RETURNING on relation "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

cannot perform UPDATE RETURNING on relation "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

cannot perform DELETE RETURNING on relation "@1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

WITH cannot be used in a query that is rewritten by rules into multiple queries

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
conditional utility statements are not implemented

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

WHERE CURRENT OF on a view is not implemented

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

rule "@1@" for relation "@2@" already exists

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

rule actions on OLD are not implemented

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

rule actions on NEW are not implemented
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.25.88 12493**

**INSTEAD NOTHING rules on SELECT are not implemented**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.25.89 12494**

**multiple actions for rules on SELECT are not implemented**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.25.90 12495**

**rules on SELECT must have action INSTEAD SELECT**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.25.91 12496**

**rules on SELECT must not contain data-modifying statements in WITH**

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.92 12497

*event qualifications are not implemented for rules on SELECT*

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.93 12498

"@1@" is already a view

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.25.94 12499

view rule for "@1@" must be named "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26 Message Numbers Beginning with12500

2.26.1 12500

could not convert table "@1@" to a view because it is not empty

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.2 12501

**could not convert table "@1@" to a view because it has triggers**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.3 12502

**could not convert table "@1@" to a view because it has indexes**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.4 12503

**could not convert table "@1@" to a view because it has child tables**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.5 12504

**cannot have multiple RETURNING lists in a rule**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.6 12505

RETURNING lists are not supported in conditional rules

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.7 12506

RETURNING lists are not supported in non-INSTEAD rules

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.8 12507

SELECT rule's target list has too many entries

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.9 12508

RETURNING list has too many entries

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.26.10 12509  
**cannot convert relation containing dropped columns to view**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.11 12510  
**SELECT rule's target entry @1@ has different column name from column "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.12 12511  
**SELECT rule's target entry @1@ has different type from column "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.13 12512  
**RETURNING list's entry @1@ has different type from column "@2@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
SELECT rule's target entry @1@ has different size from column "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.15 12514

RETURNING list's entry @1@ has different size from column "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.16 12515

SELECT rule's target list has too few entries

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.17 12516

RETURNING list has too few entries

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.18 12517

@1@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.26.19 12518**

**Perl hash contains nonexistent column "@1@"**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.26.20 12519**

**number of array dimensions (@1@) exceeds the maximum allowed (@2@)**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.26.21 12520**

**multidimensional arrays must have array expressions with matching dimensions**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.26.22 12521**

**PL/Perl function must return reference to hash or array**

An error occurred during execution of the application or command.
2.26.23 12522

$_TD->{new} does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.24 12523

$_TD->{new} is not a hash reference

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.25 12524

PL/Perl functions cannot return type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.26 12525

PL/Perl functions cannot accept type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.26.27 12526

didn't get a CODE reference from compiling function "@1@"

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.26.28 12527

set-valued function called in context that cannot accept a set

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.29 12528

set-returning PL/Perl function must return reference to array or use return_next

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.30 12529

function returning record called in context that cannot accept type record

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.26.31 12530

ignoring modified row in DELETE trigger

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.26.32 12531

result of PL/Perl trigger function must be undef, "SKIP", or "MODIFY"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.33 12532

out of memory

[Description]
There was insufficient free space in the server’s memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.26.34 12533

trigger functions can only be called as triggers

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.26.35 12534

cannot use return_next in a non-SETOF function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.36 12535

SETOF-composite-returning PL/Perl function must call return_next with reference to hash

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.37 12536

PL/pgSQL functions cannot accept type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.38 12537

could not determine actual return type for polymorphic function "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.39 12538
trigger functions can only be called as triggers

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.40 12539

PL/pgSQL functions cannot return type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.41 12540

trigger functions cannot have declared arguments

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.42 12541

parameter name "@1@" used more than once

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.43 12542

column reference "@1@" is ambiguous
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.44 12543

record "@1@" has no field "@2@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.45 12544

variable "@1@" does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.46 12545

relation "@1@" does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.47 12546

variable "@1@" has pseudo-type @2@

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.48 12547

relation "@1@" is not a table

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.49 12548

type "@1@" is only a shell

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.50 12549

unrecognized exception condition "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.51 12550

could not determine actual argument type for polymorphic function "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.52 12551

**CONTINUE cannot be used outside a loop**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.53 12552

**control reached end of function without RETURN**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.54 12553

**set-valued function called in context that cannot accept a set**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.55 12554

**control reached end of trigger procedure without RETURN**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.26.56 12555

**trigger procedure cannot return a set**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.57 12556

**variable "@1@" declared NOT NULL cannot default to NULL**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.58 12557

**case not found**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.59 12558

**lower bound of FOR loop cannot be null**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.60 12559
upper bound of FOR loop cannot be null

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.61 12560

BY value of FOR loop cannot be null

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.62 12561

BY value of FOR loop must be greater than zero

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.63 12562

cursor "@1@" already in use

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.64 12563

arguments given for cursor without arguments
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.65 12564

arguments required for cursor

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.66 12565

FOREACH expression must not be null

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.67 12566

FOREACH expression must yield an array, not type @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.68 12567

slice dimension (@1@) is out of the valid range 0..@2@

An error occurred during execution of the application or command.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

2.26.69 12568

**FOREACH ... SLICE loop variable must be of an array type**

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

2.26.70 12569

**FOREACH loop variable must not be of an array type**

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

2.26.71 12570

**cannot use RETURN NEXT in a non-SETOF function**

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

2.26.72 12571

**wrong result type supplied in RETURN NEXT**

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.73 12572

record "@1@" is not assigned yet

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.74 12573

wrong record type supplied in RETURN NEXT

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.75 12574

RETURN NEXT must have a parameter

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.76 12575

cannot use RETURN QUERY in a non-SETOF function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.26.77 12576

**RAISE without parameters cannot be used outside an exception handler**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.78 12577

**too few parameters specified for RAISE**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.79 12578

**too many parameters specified for RAISE**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.80 12579

**RAISE statement option cannot be null**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.81 12580
RAISE option already specified: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.82 12581
cannot COPY to/from client in PL/pgSQL

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.83 12582
cannot begin/end transactions in PL/pgSQL

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.84 12583
INTO used with a command that cannot return data

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.85 12584
query returned no rows
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.86 12585

query returned more than one row

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.87 12586

query has no destination for result data

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.88 12587

query string argument of EXECUTE is null

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.89 12588

EXECUTE of SELECT ... INTO is not implemented

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.90 12589

cursor variable "@1@" is null

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.91 12590

cursor "@1@" does not exist

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.92 12591

relative or absolute cursor position is null

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.93 12592

null value cannot be assigned to variable "@1@" declared NOT NULL

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.26.94 12593

cannot assign non-composite value to a row variable

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.95 12594

cannot assign non-composite value to a record variable

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.96 12595

number of array dimensions (@1@) exceeds the maximum allowed (@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.97 12596

subscripted object is not an array

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.26.98 12597
array subscript in assignment must not be null
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.26.99 12598
query "@1@" did not return data
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27 Message Numbers Beginning with 12600

2.27.1 12600
row or record variable cannot be NOT NULL
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.2 12601
default value for row or record variable is not supported
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
<table>
<thead>
<tr>
<th>Error Code</th>

<td>2.27.6 12606</td>
<td>Cursor FOR loop must use a bound cursor variable</td>
</tr>
</tbody>
</table>

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.
integer FOR loop must have only one target variable

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.8 12608

cannot specify REVERSE in query FOR loop

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.9 12609

loop variable of FOREACH must be a known variable or list of variables

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.10 12610

FETCH statement cannot return multiple rows

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.11 12611

cursor variable must be a simple variable
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.12 12612

variable "@1@" must be of type cursor or refcursor

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.13 12613

"@1@" is not a known variable

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.14 12614

missing "@1@" at end of SQL expression

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.15 12615

missing "@1@" at end of SQL statement

An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.16 12616

RETURN cannot have a parameter in function returning set

[Description]
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.

Action
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.17 12617

RETURN cannot have a parameter in function with OUT parameters

[Description]
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.

Action
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.18 12618

RETURN cannot have a parameter in function returning void

[Description]
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.

Action
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.19 12620

RETURN NEXT cannot have a parameter in function with OUT parameters

[Description]
An error occurred during execution of the application or command.

System Processing
Processing will be aborted.
[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.20 12622

"@1@" is declared CONSTANT

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.21 12623

record or row variable cannot be part of multiple-item INTO list

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.22 12624

too many INTO variables specified

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.23 12625

end label "@1@" specified for unlabelled block

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.27.24 12626

end label "@1@" differs from block's label "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.25 12627

cursor "@1@" has no arguments

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.26 12628

cursor "@1@" has arguments

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.27 12629

@1@ at end of input

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.28 12630
unexpected return value from trigger procedure

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.29 12631

PL/Python trigger function returned "MODIFY" in a DELETE trigger -- ignored

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.27.30 12632

TD["new"] deleted, cannot modify row

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.31 12633

TD["new"] is not a dictionary

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.32 12634

TD["new"] dictionary key at ordinal position @1@ is not a string
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.33 12635

key "@1@" found in TD["new"] does not exist as a column in the triggering row

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.34 12636

unsupported set function return mode

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.35 12637

returned object cannot be iterated

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.36 12638

PL/Python function with return type "void" did not return None

An error occurred during execution of the application or command.
2.27.37 12639
forcibly aborting a subtransaction that has not been exited

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.27.38 12640
function returning record called in context that cannot accept type record

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.39 12641
trigger functions can only be called as triggers

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.40 12642
PL/Python functions cannot return type @1@

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.41 12643

PL/Python functions cannot accept type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.42 12644

cannot convert multidimensional array to Python list

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.43 12645

could not convert Python object into cstring: Python string representation appears to contain null bytes

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.44 12646

key "@1@" not found in mapping

[Description]
An error occurred during execution of the application or command.
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.27.45 12647

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.27.46 12648

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.27.47 12649

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.27.48 12652

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.49 12653

@1@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.50 12654

out of memory
[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.27.51 12655

trigger functions can only be called as triggers
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.52 12656

PL/Tcl functions cannot return type @1@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.27.53 12657

PL/Tcl functions cannot return composite types
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.28 Message Numbers Beginning with 12700

2.28.1 12704

function ”@1@” does not exist
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.28.2 12725

operator @1@ is not a valid ordering operator
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.29 Message Numbers Beginning with 12900

2.29.1 12908

could not remove cache file “@1@”: @2@
[Description]
An error occurred during I/O processing in the database server.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.29.2 12909**

could not open tablespace directory "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.30 Message Numbers Beginning with13000**

**2.30.1 13092**

too few arguments for format()

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.30.2 13094**

null values cannot be formatted as an SQL identifier

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.31 Message Numbers Beginning with13300**

**2.31.1 13359**
online backup was canceled, recovery cannot continue

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.31.2 13362

online backup mode canceled

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.31.3 13363

online backup mode was not canceled

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.32 Message Numbers Beginning with 13400

2.32.1 13449

cannot convert whole-row table reference

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.32.2 13452

cannot alter type "@1@" because column "@2.@3@" uses it

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.3 13453

cannot alter foreign table "@1@" because column "@2.@3@" uses its row type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.4 13454

cannot alter table "@1@" because column "@2.@3@" uses its row type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.5 13478

parameter "lc_ctype" must be specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.6 13481
operator family "@1@" does not exist for access method "@2@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.32.7 13490
directories for tablespace @1@ could not be removed

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.32.8 13497
cannot drop extension "@1@" because it is being modified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.32.9 13499
pg_extension_config_dump() can only be called from an SQL script executed by CREATE EXTENSION

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
### 2.33 Message Numbers Beginning with 13500

#### 2.33.1 13508

**must be superuser to set schema of @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.33.2 13580

**cannot PREPARE while holding both session-level and transaction-level locks on the same object**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.33.3 13589

**sending cancel to blocking autovacuum PID @1@**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

#### 2.33.4 13597

**not enough elements in RWConflictPool to record a read/write conflict**

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

**2.33.5 13598**

**not enough elements in RWConflictPool to record a potential read/write conflict**

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

**2.34 Message Numbers Beginning with 13700**

**2.34.1 13761**

**cannot move extension "@1@" into schema "@2@" because the extension contains the schema**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.35 Message Numbers Beginning with 13800**

**2.35.1 13833**

**column @1@**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.35.2 13860**
symbolic link "@1@" target is too long

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.35.3 13864

unexpected message type "@1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.35.4 13884

could not create signal listener pipe for PID @1@: error code @2@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.36 Message Numbers Beginning with 13900

2.36.1 13922

could not close handle to backend parameter variables: error code @1@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.36.2 13941

**conflicting constraint properties**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.36.3 13943

@1@ constraints cannot be marked DEFERRABLE

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.36.4 13944

@1@ constraints cannot be marked NOT VALID

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.37 Message Numbers Beginning with 14000

2.37.1 14024

**column name must be qualified**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.37.2 14028

**cannot create relations in temporary schemas of other sessions**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.37.3 14029

**cannot create temporary relation in non-temporary schema**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.37.4 14030

**only temporary relations may be created in temporary schemas**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.37.5 14042

**cannot reassign ownership of objects owned by @1@ because they are required by the database system**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.38 Message Numbers Beginning with 14100

2.38.1 14104

cannot convert Perl array to non-array type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.38.2 14105

cannot convert Perl hash to non-composite type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.39 Message Numbers Beginning with 14200

2.39.1 14211

PL/Tcl functions cannot accept type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.39.2 14218

"@1@" is a table

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.39.3 14282  
cannot add schema "@1@" to extension "@2@" because the schema contains the extension

[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.39.4 14284  
could not identify current directory: @1@

[Description]  
An unexpected error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
Contact Fujitsu technical support.

2.39.5 14285  
invalid binary "@1@"

[Description]  
An unexpected error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
Contact Fujitsu technical support.

2.39.6 14286  
could not read binary "@1@"

[Description]  
An unexpected error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
Contact Fujitsu technical support.
2.39.7 14287

could not find a "@1@" to execute

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.39.8 14289

could not read symbolic link "@1@"

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.39.9 14290

child process exited with exit code @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.39.10 14291

child process was terminated by exception 0x@1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.39.11 14292
child process was terminated by signal @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.39.12 14293

child process was terminated by signal @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.39.13 14294

could not identify current directory: @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.39.14 14295

invalid binary "@1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.
An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.39.16 14297

could not read binary "@1@"

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.39.17 14298

could not find a "@1@" to execute

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.39.18 14299

could not change directory to "@1@": @2@

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.40 Message Numbers Beginning with 14300

2.40.1 14300

could not read symbolic link "@1@"
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.2 14301

child process exited with exit code @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.3 14302

child process was terminated by exception 0x@1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.4 14303

child process was terminated by signal @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.5 14304

child process was terminated by signal @1@

[Description]
An unexpected error occurred.
Processing will be aborted.

Contact Fujitsu technical support.

2.40.6 14305

child process exited with unrecognized status @1@

An unexpected error occurred.

Contact Fujitsu technical support.

2.40.7 14306

could not identify current directory: @1@

An unexpected error occurred.

Contact Fujitsu technical support.

2.40.8 14307

invalid binary "@1@"

An unexpected error occurred.

Contact Fujitsu technical support.

2.40.9 14308

could not read binary "@1@"

An unexpected error occurred.

Contact Fujitsu technical support.
[Action]
Contact Fujitsu technical support.

2.40.10 14309

could not find a "@1@" to execute

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.11 14310

could not change directory to "@1@": @2@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.12 14311

could not read symbolic link "@1@"

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.13 14318

could not identify current directory: @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.
2.40.14 14319

invalid binary "@1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.15 14320

could not read binary "@1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.16 14321

could not find a "@1@" to execute

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.17 14322

could not change directory to "@1@": @2@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.18 14323
An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.40.23 14328

auto-open of the keystore has been enabled

Enabled automatic opening of the keystore.

Continues processing.

No action required.

2.40.24 14329

could not identify current directory: @1@

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.40.25 14330

invalid binary "@1@"

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.40.26 14331

could not read binary "@1@"

An unexpected error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  Contact Fujitsu technical support.

2.40.27 14332

could not find a "@1@" to execute

[Description]
  An unexpected error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  Contact Fujitsu technical support.

2.40.28 14333

could not change directory to "@1@": @2@

[Description]
  An unexpected error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  Contact Fujitsu technical support.

2.40.29 14334

could not read symbolic link "@1@"

[Description]
  An unexpected error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  Contact Fujitsu technical support.

2.40.30 14335

child process exited with exit code @1@

[Description]
  An unexpected error occurred.

[System Processing]
  Processing will be aborted.
[Action]
Contact Fujitsu technical support.

2.40.31 14336

child process was terminated by exception 0x1

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.32 14337

child process was terminated by signal 1

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.33 14338

child process was terminated by signal 1

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.34 14339

1: no database directory specified and environment variable PGDATA unset

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.
2.40.35 14340

could not identify current directory: @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.36 14341

invalid binary "@1@"

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.37 14342

could not read binary "@1@"

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.38 14343

could not find a "@1@" to execute

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.39 14344
could not change directory to "@1@": @2@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.40 14345

could not read symbolic link "@1@"

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.41 14346

child process exited with exit code @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.42 14347

child process was terminated by exception 0x@1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.43 14348

child process was terminated by signal @1@
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.44 14349

child process was terminated by signal @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.40.45 14351

could not access directory for core file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.40.46 14352

path specified by configuration parameter "@1@" is invalid: "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.47 14353

WAL archiving is not active

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.48 14354

could not set permissions on path specified by configuration parameter "@1@": "@2@": @3@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.40.49 14366

a failure has occurred while multiplexing transaction log files

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.40.50 14367

multiplexing of transaction log files has been stopped

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.40.51 14368

must be superuser to control WAL multiplexing

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.52 14369

WAL multiplexing is not configured
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.53 14370

WAL multiplexing is already paused
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.54 14371

WAL multiplexing is not paused
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.55 14372

could not fork XLog multiplexer process: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.40.56 14373

could not set junction for "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.40.57 14374

could not set junction for "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.40.58 14375

could not remove file or directory "@1@": @2@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.40.59 14376

could not remove file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.40.60 14377

`could not set junction for "@1@": @2@`

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

2.40.61 14378

`could not get junction for "@1@": @2@`

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

2.40.62 14379

`could not open directory "@1@": @2@`

**Description**
Terminated normally but a warning was output.

**System Processing**
Continues processing.

**Action**
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.40.63 14380

`could not read directory "@1@": @2@`

**Description**
Terminated normally but a warning was output.

**System Processing**
Continues processing.

**Action**
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.40.64 14381

could not stat file or directory "@1@": @2@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.40.65 14384

could not determine encoding for locale "@1@": codeset is "@2@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.40.66 14385

could not remove file or directory "@1@": @2@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.40.67 14388

@1@ at or near "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
**2.40.68 14390**

query "@1@" returned more than one row

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.40.69 14391**

query "@1@" is not a SELECT

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.40.70 14392**

block label must be placed before DECLARE, not after

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.40.71 14393**

collations are not supported by type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.40.72 14394**
row or record variable cannot be CONSTANT

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.40.73 14395
cannot use serializable mode in a hot standby

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.41 Message Numbers Beginning with 14400

2.41.1 14419
could not write lock file "@1@": @2@

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.41.2 14421

Expected 1 tuple with 2 fields, got @1@ tuples with @2@ fields.

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.
2.41.3 14422

**The primary's identifier is @1@, the standby's identifier is @2@.**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.41.4 14423

**The transaction has already committed locally, but might not have been replicated to the standby.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.5 14424

**You can choose the collation by applying the COLLATE clause to one or both expressions.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.6 14425

**Query has too few columns.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.41.7 14426

**Cannot cast type @1@ to @2@ in column @3@.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.8 14427

**Query has too many columns.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.9 14430

**No aggregate function matches the given name and argument types. Perhaps you misplaced ORDER BY; ORDER BY must appear after all regular arguments of the aggregate.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.10 14431

**No function matches the given name and argument types. You might need to add explicit type casts.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.41.11 14432

There is a WITH item named "@1@", but it cannot be referenced from this part of the query.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.12 14433

Use WITH RECURSIVE, or re-order the WITH items to remove forward references.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.13 14434

Perhaps you meant to reference the table alias "@1@".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.14 14435

There is an entry for table "@1@", but it cannot be referenced from this part of the query.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.15 14436
String constants with Unicode escapes cannot be used when standard_conforming_strings is off.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.16 14437

Unicode escapes must be `\uXXXX` or `\UXXXXXXXX`.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.17 14438

Use `"` to write quotes in strings. `\` is insecure in client-only encodings.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.18 14439

Use `"` to write quotes in strings, or use the escape string syntax (E'...').

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.19 14440

Use the escape string syntax for backslashes, e.g., E'\\'.

- 645 -
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.20 14441

*Use the escape string syntax for escapes, e.g., E'\r\n'.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.21 14442

*Cast the output of the non-recursive term to the correct type.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.22 14443

*Use the COLLATE clause to set the collation of the non-recursive term.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.23 14444

*Explicitly cast to the desired type, for example ARRAY[]::integer[].*

[Description]
Supplementary information was output.
2.41.24 14445

Row comparison operators must be associated with btree operator families.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.25 14446

There are multiple equally-plausible candidates.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.26 14447

You will need to rewrite or cast the expression.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.27 14448

Use an explicit ordering operator or modify the query.

[Description]
Supplementary information was output.

[System Processing]
None.
[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.28 14449

Could not choose a best candidate operator. You might need to add explicit type casts.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.29 14450

No operator matches the given name and argument type(s). You might need to add explicit type casts.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.30 14451

Aggregates with DISTINCT must be able to sort their inputs.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.31 14452

Constraint "@1@" contains a whole-row reference to table "@2@".

[Description]
Supplementary information was output.

[System Processing]
None.
[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.32 14453

Index "@1@" contains a whole-row table reference.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.33 14454

Cannot create a primary key or unique constraint using such an index.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.34 14455

Cannot create a non-deferrable constraint using a deferrable index.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.35 14456

Ordering operators must be ",<" or ",>" members of btree operator families.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
**2.41.36 14457**

*Update your data type.*

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.41.37 14458**

*Use NONE to denote the missing argument of a unary operator.*

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.41.38 14459**

*Use separate LIMIT and OFFSET clauses.*

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.41.39 14460**

*For example, FROM (VALUES ...) [AS] foo.*

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

---

**2.41.40 14461**
For example, FROM (SELECT ...) [AS] foo.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.41 14463

The insertion source is a row expression containing the same number of columns expected by the INSERT. Did you accidentally use extra parentheses?

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.42 14464

Only result column names can be used, not expressions or functions.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.43 14465

Add the expression/function to every SELECT, or move the UNION into a FROM clause.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.44 14466

Scrollable cursors must be READ ONLY.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.45 14467

**Holdable cursors must be READ ONLY.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.46 14468

**Insensitive cursors must be READ ONLY.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.47 14469

**Valid options in this context are: @1@**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.48 14470

**Specify OWNED BY table.column or OWNED BY NONE.**

[Description]
Supplementary information was output.
[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.49 14471

Extension names must not be empty.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.50 14472

Extension names must not contain "--".
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.51 14473

Extension names must not begin or end with "-".
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.52 14474

Extension names must not contain directory separator characters.
[Description]
Supplementary information was output.

[System Processing]
None.
[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.53 14475

Version names must not be empty.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.54 14476

Version names must not contain "--".
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.55 14477

Version names must not begin or end with "-".
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.56 14478

Version names must not contain directory separator characters.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.41.57 14479

Must be superuser to create this extension.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.58 14480

Must be superuser to update this extension.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.59 14481

@1@ is not in the extension's schema "@2@"

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.60 14482

Consider using tablespaces instead.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.61 14483
Use the same encoding as in the template database, or use template0 as template.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.62 14484

Use the same encoding as in the template database, or use template0 as template.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.63 14485

Use the same LC_CTYPE as in the template database, or use template0 as template.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.64 14486

There is a conflict because database "@1@" already has some tables in this tablespace.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.41.65 14487

The chosen LC_CTYPE setting requires encoding "@1@".
The chosen LC_COLLATE setting requires encoding "@1@".

You must move them back to the database's default tablespace before using this command.

There are @1@ other session(s) and @2@ prepared transaction(s) using the database.

@1@ dead row versions cannot be removed yet.@2@.
The prefix "pg_" is reserved for system schemas.

The server process with PID @1@ is among those with the oldest transactions.

The NOTIFY queue cannot be emptied until that process ends its current transaction.

Use the COLLATE clause to set the collation explicitly.
Refer to this message together with the message that was output immediately beforehand.

2.41.74 14499

The supported languages are listed in the pg_pltemplate system catalog.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.42 Message Numbers Beginning with 14500

2.42.1 14500

Anyone can COPY to stdout or from stdin. psql’s \copy command also works for anyone.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.42.2 14501

Try the COPY (SELECT ...) TO variant.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.42.3 14502

COPY @1@, line @2@, column @3@

Supplementary information was output.

None.
Refer to this message together with the message that was output immediately beforehand.

2.42.4 14503

COPY @1@, line @2@

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.5 14504

COPY @1@, line @2@, column @3@: ":@4@"

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.6 14505

COPY @1@, line @2@, column @3@: null input

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.7 14506

COPY @1@, line @2@: ":@3@"

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
Use "\r" to represent carriage return.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

Use quoted CSV field to represent carriage return.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

Use "\n" to represent newline.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

Use quoted CSV field to represent newline.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.12 14512
2.42.13 14513

@1@ index row versions were removed. @2@ index pages have been deleted, @3@ are currently reusable. @4@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.14 14514

Operator class "@1@" already is the default.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.15 14515

Must be superuser to change owner of a foreign-data wrapper.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.16 14516

The owner of a foreign-data wrapper must be a superuser.
2.42.17 14517

Must be superuser to create a foreign-data wrapper.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.18 14518

Must be superuser to alter a foreign-data wrapper.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.19 14520

Expected @1@ parameters but got @2@.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.20 14521

Close open transactions soon to avoid wraparound problems.
2.42.21 14522

You might have already suffered transaction-wraparound data loss.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.22 14523

Must be superuser to create a tablespace.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.23 14524

The prefix "pg_" is reserved for system tablespaces.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.24 14525

Create this directory for the tablespace before restarting the server.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.
You can remove the directories manually if necessary.

You can alter type @1@, which will alter the array type as well.

Tables cannot have INSTEAD OF triggers.

Views cannot have row-level BEFORE or AFTER triggers.
2.42.29 14531

**Views cannot have TRUNCATE triggers.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.30 14532

`"@1@" versus "@2@"

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.31 14533

**To resolve the conflict, specify a default explicitly.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.32 14534

**Use ALTER TYPE instead.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.33 14535
Use ALTER ... CASCADE to alter the typed tables too.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.34 14536

Key columns "@1@" and "@2@" are of incompatible types: @3@ and @4@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.35 14537

@1@ depends on @2@

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.36 14538

Change the ownership of the index's table, instead.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.37 14539

Sequence "@1@" is linked to table "@2@".
"@1@" is already a child of "@2@".

Only commutative operators can be used in exclusion constraints.

The exclusion operator must be related to the index operator class for the constraint.

You must specify an operator class for the index or define a default operator class for the data type.
2.42.42 14544

Creating a shell type definition.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.43 14545

Use CREATE LANGUAGE to load the language into the database.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.44 14546

Use DROP AGGREGATE to drop aggregate functions.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.45 14549

Key @1@ is duplicated.

[Description]
Supplementary information was output.
2.42.46 14551

Perhaps you need a different "datestyle" setting.

[Description]
Supplementary information was output.

2.42.47 14552

The operating system could not find any locale data for the locale name "@1@".

[Description]
Supplementary information was output.

2.42.48 14553

The server’s LC_CTYPE locale is probably incompatible with the database encoding.

[Description]
Supplementary information was output.

2.42.49 14554

Provide two argument types for operator.

[Description]
Supplementary information was output.
[Action]
   Refer to this message together with the message that was output immediately beforehand.

2.42.50 14555

Missing left parenthesis.
[Description]
   Supplementary information was output.

[System Processing]
   None.

[Action]
   Refer to this message together with the message that was output immediately beforehand.

2.42.51 14556

Too few columns.
[Description]
   Supplementary information was output.

[System Processing]
   None.

[Action]
   Refer to this message together with the message that was output immediately beforehand.

2.42.52 14557

Unexpected end of input.
[Description]
   Supplementary information was output.

[System Processing]
   None.

[Action]
   Refer to this message together with the message that was output immediately beforehand.

2.42.53 14558

Too many columns.
[Description]
   Supplementary information was output.

[System Processing]
   None.

[Action]
   Refer to this message together with the message that was output immediately beforehand.
Junk after right parenthesis.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

Intervals are not tied to specific calendar dates.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

"EEEE" may only be used together with digit and decimal point patterns.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

Do not mix Gregorian and ISO week date conventions in a formatting template.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
This value contradicts a previous setting for the same field type.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.59 14564

Field requires @1@ characters, but only @2@ remain.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.60 14565

If your source string is not fixed-width, try using the "FM" modifier.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.61 14566

Field requires @1@ characters, but only @2@ could be parsed.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.62 14567

Value must be an integer.
2.42.63 14568

Value must be in the range @1@ to @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.64 14569

The given value did not match any of the allowed values for this field.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.65 14570

Use the 24-hour clock, or give an hour between 1 and 12.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.66 14571

Escape string must be empty or one character.

[Description]
Supplementary information was output.
2.42.67 14572

Value has bits set to right of mask.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.68 14573

Target must be "archiver" or "bgwriter".

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.69 14574

Identifier must be less than @1@ characters.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.70 14575

This functionality requires the server to be built with libxml support.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.
You need to rebuild PostgreSQL using --with-libxml.

XML processing instruction target name cannot be "@1@".

libxml2 has incompatible char type: sizeof(char)=@1@, sizeof(xmlChar)=@2@.
2.42.75 14580

**XML does not support infinite date values.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.76 14581

**XML does not support infinite timestamp values.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.77 14582

**The array must be two-dimensional with length of the second axis equal to 2.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.78 14583

**ACL key word must be "group" or "user".**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
A name must follow the "group" or "user" key word.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.80 14585

Use CASCADE to revoke them too.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.81 14586

Dimension array must be one dimensional.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.82 14587

Lower bound of dimension array must be one.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.83 14588

Low bound array has different size than dimensions array.
2.42.84 14589

MATCH FULL does not allow mixing of null and nonnull key values.

2.42.85 14590

Remove this referential integrity trigger and its mates, then do ALTER TABLE ADD CONSTRAINT.

2.42.86 14591

This is most likely due to a rule having rewritten the query.

2.42.87 14593

Key (@1@)=(@2@) is not present in table "@3@".
2.42.88 14594

Key (@1@)=(@2@) is still referenced from table "@3@".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.89 14595

A field with precision @1@, scale @2@ must round to an absolute value less than @3@.@4@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.90 14596

Arrays with element types @1@ and @2@ are not compatible for concatenation.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.91 14597

Arrays of @1@ and @2@ dimensions are not compatible for concatenation.

[Description]
Supplementary information was output.
[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.92 14598

Arrays with differing element dimensions are not compatible for concatenation.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.42.93 14599

Arrays with differing dimensions are not compatible for concatenation.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43 Message Numbers Beginning with 14600

2.43.1 14600

Is another postgres (PID @1@) running in data directory "@2@"?
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.2 14601

Is another postmaster (PID @1@) running in data directory "@2@"?
[Description]
Supplementary information was output.
2.43.3 14602

Is another postgres (PID @1@) using socket file "@2@"?

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.4 14603

Is another postmaster (PID @1@) using socket file "@2@"?

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.5 14604

If you're sure there are no old server processes still running, remove the shared memory block or just delete the file "@1@".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.6 14605

The file seems accidentally left over, but it could not be removed. Please remove the file by hand and try again.

[Description]
Supplementary information was output.
[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.43.7 14606

File "@1@" is missing.

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.43.8 14607

File "@1@" does not contain valid data.

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.43.9 14608

You might need to initdb.

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.43.10 14609

The data directory was initialized by PostgreSQL version @1@.@2@, which is not compatible with this version @3@.

[Description]
  Supplementary information was output.
[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.11 14610

**Specify an absolute path.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.12 14611

**Set up WAL archiving when you configure "@1@" parameter.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.13 14612

**Database OID @1@ now seems to belong to "@2@".**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.14 14613

**User does not have CONNECT privilege.**

[Description]
Supplementary information was output.

[System Processing]
None.
2.43.15 14614

The database was initialized with LC_COLLATE "@1@", which is not recognized by setlocale().

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.16 14615

Recreate the database with another locale or install the missing locale.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.17 14616

The database was initialized with LC_CTYPE "@1@", which is not recognized by setlocale().

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.18 14617

You should immediately run CREATE USER "@1@" SUPERUSER;.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.43.19 14618

It seems to have just been dropped or renamed.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.20 14619

The database subdirectory "@1@" is missing.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.21 14620

String of @1@ bytes is too long for encoding conversion.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.22 14621

Continuing anyway, but there's something wrong.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.23 14622
Failed while creating memory context "@1@".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.24 14623

Failed on request of size @1@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.25 14624

Extension libraries are required to use the PG_MODULE_MAGIC macro.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.26 14625

Server is version @1@.@2@, library is version @3@.@4@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.27 14626

Specify a relation name as well as a rule name.
You need an unconditional ON INSERT DO INSTEAD rule with a RETURNING clause.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

You need an unconditional ON UPDATE DO INSTEAD rule with a RETURNING clause.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

You need an unconditional ON DELETE DO INSTEAD rule with a RETURNING clause.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

Use views or triggers instead.

Supplementary information was output.
2.43.32 14631

**Use triggers instead.**

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.

2.43.33 14632

**Use views instead.**

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.

2.43.34 14633

**In particular, the table cannot be involved in any foreign key relationships.**

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.

2.43.35 14634

**Failed system call was shmget(key=@@1@@, size=@@2@@, @@3@@).**

**Description**
Supplementary information was output.

**System Processing**
None.
2.43.36 14638

Failed system call was `CreateFileMapping(size=1, name=2)`.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.37 14639

Check if there are any old server processes still running, and terminate them.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.38 14640

Failed system call was `DuplicateHandle`.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.39 14641

Failed system call was `MapViewOfFileEx`.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.43.40 14642

Failed system call was semget(@1@, @2@, 0@3@).

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.41 14643

This error does *not* mean that you have run out of disk space. It occurs when either the system limit for the maximum number of semaphore sets (SEMMNI), or the system wide maximum number of semaphores (SEMMNS), would be exceeded. You need to raise the respective kernel parameter. Alternatively, reduce PostgreSQL's consumption of semaphores by reducing its max_connections parameter. The PostgreSQL documentation contains more information about configuring your system for PostgreSQL.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.42 14644

You possibly need to raise your kernel's SEMVMX value to be at least @1@. Look into the PostgreSQL documentation for details.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.43 14645

Some of the datatypes only support hashing, while others only support sorting.

[Description]
Supplementary information was output.

[System Processing]
None.
Refer to this message together with the message that was output immediately beforehand.

**2.43.44 14646**

*Window partitioning columns must be of sortable datatypes.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.43.45 14647**

*Window ordering columns must be of sortable datatypes.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.43.46 14648**

*SQL function "@1@" during startup*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.43.47 14649**

*All column datatypes must be hashable.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.43.48 14650

See server log for query details.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.49 14651

Client IP address resolved to "@1@", forward lookup matches.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.50 14652

Client IP address resolved to "@1@", forward lookup not checked.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.51 14653

Client IP address resolved to "@1@", forward lookup does not match.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.52 14654
LDAP over SSL is not supported on this platform.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.53 14655

Is another postmaster already running on port @1@? If not, remove socket file "@2@" and retry.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.54 14656

Is another postmaster already running on port @1@? If not, wait a few seconds and retry.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.55 14657

Anyone can use the client-side lo_import() provided by libpq.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.56 14658

Anyone can use the client-side lo_export() provided by libpq.
2.43.57 14659

File must have permissions u=rw (0600) or less if owned by the database user, or permissions u=rw,g=r (0640) or less if owned by root.

2.43.58 14660

SSL library does not support certificate revocation lists.

2.43.59 14662

line @1@ of configuration file "@2@"

2.43.60 14663

Set ssl = on in postgresql.conf.
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.43.61 14664**

*Compile with --with-openssl to use SSL connections.*

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.43.62 14666**

*Cannot enlarge string buffer containing @1@ bytes by @2@ more bytes.*

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.43.63 14667**

*Please REINDEX it.*

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.43.64 14668**

*Values larger than 1/3 of a buffer page cannot be indexed. Consider a function index of an MD5 hash of the value, or use full text indexing.*
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.65 14669

Key @1@ already exists.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.66 14670

This may be because of a non-immutable index expression.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.67 14671

To fix this, do REINDEX INDEX "@1@".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.68 14672

This is caused by an incomplete page split at crash recovery before upgrading to PostgreSQL 9.1.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.69 14673

The index is not optimal. To optimize it, contact a developer, or try to use the column as the second one in the CREATE INDEX command.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.70 14674

Could not open file "@1@": @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.71 14675

Could not seek in file "@1@" to offset @2@: @3@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.72 14676

Could not read from file "@1@" at offset @2@: @3@.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.73 14677

Could not write to file "@1@" at offset @2@: @3@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.74 14678

Could not fsync file "@1@": @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.75 14679

Could not close file "@1@": @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.76 14680

Set max_prepared_transactions to a nonzero value.

[Description]
Supplementary information was output.
2.43.77 14681

Increase max_prepared_transactions (currently @1@).

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.78 14682

Must be superuser or the user that prepared the transaction.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.79 14683

Connect to the database where the transaction was prepared to finish it.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.80 14687

Expected a numeric timeline ID.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.
Refer to this message together with the message that was output immediately beforehand.

2.43.81 14688

**Timeline IDs must be in increasing sequence.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.82 14689

**Timeline IDs must be less than child timeline’s ID.**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.83 14690

**The database cluster was initialized with PG_CONTROL_VERSION @1@ (0x@2@), but the server was compiled with PG_CONTROL_VERSION @3@ (0x@4@).**

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.43.84 14691

**This could be a problem of mismatched byte ordering. It looks like you need to initdb.**

[Description]

Supplementary information was output.

[System Processing]

None.
[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.85 14692
The database cluster was initialized with PG_CONTROL_VERSION @1@, but the server was compiled with PG_CONTROL_VERSION @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.86 14693
It looks like you need to initdb.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.87 14694
The database cluster was initialized with CATALOG_VERSION_NO @1@, but the server was compiled with CATALOG_VERSION_NO @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.88 14695
The database cluster was initialized with MAXALIGN @1@, but the server was compiled with MAXALIGN @2@.

[Description]
Supplementary information was output.

[System Processing]
None.
[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.89 14696

The database cluster appears to use a different floating-point number format than the server executable.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.90 14697

The database cluster was initialized with BLCKSZ @1@, but the server was compiled with BLCKSZ @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.91 14698

It looks like you need to recompile or initdb.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.43.92 14699

The database cluster was initialized with RELSEG_SIZE @1@, but the server was compiled with RELSEG_SIZE @2@.

[Description]
Supplementary information was output.

[System Processing]
None.
2.44 Message Numbers Beginning with 14700

2.44.1 14700

The database cluster was initialized with XLOG_BLCKSZ @1@, but the server was compiled with XLOG_BLCKSZ @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.2 14701

The database cluster was initialized with XLOG_SEG_SIZE @1@, but the server was compiled with XLOG_SEG_SIZE @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.3 14702

The database cluster was initialized with NAMEDATALEN @1@, but the server was compiled with NAMEDATALEN @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.4 14703

The database cluster was initialized with INDEX_MAX_KEYS @1@, but the server was compiled with INDEX_MAX_KEYS @2@.
2.44.5 14704

The database cluster was initialized with TOAST_MAX_CHUNK_SIZE @1@, but the server was compiled with TOAST_MAX_CHUNK_SIZE @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.6 14705

The database cluster was initialized without HAVE_INT64_TIMESTAMP but the server was compiled with HAVE_INT64_TIMESTAMP.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.7 14706

The database cluster was initialized with HAVE_INT64_TIMESTAMP but the server was compiled without HAVE_INT64_TIMESTAMP.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.8 14707
The database cluster was initialized without USE_FLOAT4_BYVAL but the server was compiled with USE_FLOAT4_BYVAL.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.9 14708

The database cluster was initialized with USE_FLOAT4_BYVAL but the server was compiled without USE_FLOAT4_BYVAL.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.10 14709

The database cluster was initialized without USE_FLOAT8_BYVAL but the server was compiled with USE_FLOAT8_BYVAL.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.11 14710

The database cluster was initialized with USE_FLOAT8_BYVAL but the server was compiled without USE_FLOAT8_BYVAL.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.44.12 14711

**The database server will regularly poll the pg_xlog subdirectory to check for files placed there.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.13 14712

**Execute pg_xlog_replay_resume() to continue.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.14 14713

**Recovery control functions can only be executed during recovery.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.15 14714

**This happens if you temporarily set wal_level=minimal without taking a new base backup.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.16 14715
Either set wal_level to "replica" on the master, or turn off hot_standby here.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

### 2.44.17 14716

This probably means that some data is corrupted and you will have to use the last backup for recovery.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

### 2.44.18 14717

If this has occurred more than once some data might be corrupted and you might need to choose an earlier recovery target.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

### 2.44.19 14718

If you are not restoring from a backup, try removing the file "@1@/backup_label".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

### 2.44.20 14719
Online backup started with pg_start_backup() must be ended with pg_stop_backup(), and all WAL up to that point must be available at recovery.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.21 14720

WAL control functions cannot be executed during recovery.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.22 14721

wal_level must be set to "replica" or "logical" at server start.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.23 14722

Run pg_stop_backup() and try again.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.24 14723

If you're sure there is no backup in progress, remove file "@1@" and try again.
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.25 14724

Check that your archive_command is executing properly. pg_stop_backup can be canceled safely, but the database backup will not be usable without all the WAL segments.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.26 14725

pg_xlogfile_name_offset() cannot be executed during recovery.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.27 14726

pg_xlogfile_name() cannot be executed during recovery.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.28 14727

xlog redo at @1@/@2@ for @3@
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.29 14731

To avoid a database shutdown, execute a database-wide VACUUM in that database. You might also need to commit or roll back old prepared transactions.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.30 14732

Values larger than a buffer page cannot be indexed.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.31 14733

Valid values are between \"@1@\" and \"@2@\".

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.32 14734

Valid values are between \"@1@\" and \"@2@\".
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.44.33 14735**

*Returned type @1@ does not match expected type @2@ in column @3@.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.44.34 14736**

*Number of returned columns (@1@) does not match expected column count (@2@).*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.44.35 14737**

*Attribute "@1@" of type @2@ does not match corresponding attribute of type @3@.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.44.36 14738**

*Attribute "@1@" of type @2@ does not exist in type @3@.*

[Description]
Supplementary information was output.
2.44.37 14739

To enable inserting into the view, provide an INSTEAD OF INSERT trigger or an unconditional ON INSERT DO INSTEAD rule.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.38 14740

To enable updating the view, provide an INSTEAD OF UPDATE trigger or an unconditional ON UPDATE DO INSTEAD rule.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.39 14741

To enable deleting from the view, provide an INSTEAD OF DELETE trigger or an unconditional ON DELETE DO INSTEAD rule.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.40 14742

SQL function "@1@" statement @2@

[Description]
Supplementary information was output.
2.44.41 14743

**SQL function "@1@"**

[Description]

Supplementary information was output.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.42 14744

**SQL function "@1@" during inlining**

[Description]

Supplementary information was output.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.43 14745

**Function's final statement must be SELECT or INSERT/UPDATE/DELETE RETURNING.**

[Description]

Supplementary information was output.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.44.44 14746

**Final statement must return exactly one column.**

[Description]

Supplementary information was output.

[Action]

Refer to this message together with the message that was output immediately beforehand.
2.44.45 14747

**Actual return type is @1@.**

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.

2.44.46 14748

**Final statement returns too many columns.**

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.

2.44.47 14749

**Final statement returns @1@ instead of @2@ at column @3@.**

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.

2.44.48 14750

**Final statement returns too few columns.**

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.
2.44.49 14751

**Input has too many columns.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.50 14752

**Table has type @1@ at ordinal position @2@, but query expects @3@.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.51 14753

**Query provides a value for a dropped column at ordinal position @1@.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.52 14754

**Input has too few columns.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.53 14755
Check for missing "SPI_finish" calls.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.54 14756

SQL statement "@1@"

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.55 14757

Table has type @1@, but query expects @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.56 14758

Table row contains @1@ attribute, but query expects @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.57 14759

Physical storage mismatch on dropped attribute at ordinal position @1@.
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.44.58 14760**

*Returned row contains @1@ attribute, but query expects @2@.*

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.44.59 14761**

*Returned type @1@ at ordinal position @2@, but query expects @3@.*

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.44.60 14762**

*Array with element type @1@ cannot be included in ARRAY construct with element type @2@.*

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.44.61 14763**

*Key @1@ conflicts with key @2@.*

Supplementary information was output.
Key @1@ conflicts with existing key @2@.

This has been seen to occur with buggy kernels; consider updating your system.

Multiple failures --- write error might be permanent.

writing block @1@ of relation @2@
[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.44.66 14768**

*Only RowExclusiveLock or less can be acquired on database objects during recovery.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.44.67 14769**

*You might need to increase max_locks_per_transaction.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.44.68 14771**

*You might need to run fewer transactions at a time or increase max_connections.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.44.69 14772**

*There might be an idle transaction or a forgotten prepared transaction causing this.*

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.44.70 14773

"default_transaction_isolation" is set to "serializable".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.71 14774

You can use "SET default_transaction_isolation = 'repeatable read'" to change the default.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.72 14775

You might need to increase max_pred_locks_per_transaction.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.73 14776

The transaction might succeed if retried.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.74 14778
**User transaction caused buffer deadlock with recovery.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

---

**2.44.75 14779**

**System allows @1@, we need at least @2@.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

[Action]
Refer to this message together with the message that was output immediately beforehand.

---

**2.44.77 14783**

**Consider increasing the configuration parameter "max_wal_size".**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

---

**2.44.78 14784**

**Consult recent messages in the server log for details.**
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.79 14785

This may indicate an incomplete PostgreSQL installation, or that the file "@1@" has been moved away from its proper location.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.80 14786

The server must be started by the user that owns the data directory.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.81 14787

Permissions should be u=rwx (0700).

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.44.82 14788

See C include file "ntstatus.h" for a description of the hexadecimal value.
2.44.83 14789

**automatic vacuum of table "@1@.@2@.@3@"**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.84 14790

**automatic analyze of table "@1@.@2@.@3@"**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.85 14791

**Enable the "track_counts" option.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.86 14792

**The failed archive command was: @1@**

[Description]
Supplementary information was output.
2.44.87 14793

Some of the transaction logs were lost that are necessary to recover the database completely.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.88 14794

Fix the problem by referring to the messages prior to this one. Then take a full backup of the database.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.89 14795

line @1@ of configuration file "@2@": "@3@"

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.44.90 14796

Words longer than @1@ characters are ignored.

[Description]
Supplementary information was output.
[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.44.91 14797

Use "??" to represent a stop word within a sample phrase.

[Description]
  Supplementary information was output.

  Refer to this message together with the message that was output immediately beforehand.

2.44.92 14798

Declare it with SCROLL option to enable backward scan.

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.44.93 14799

prepare: @1@

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.45 Message Numbers Beginning with 14800

2.45.1 14800

parameters: @1@

[Description]
  Supplementary information was output.
2.45.2 14801

abort reason: recovery conflict

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.3 14802

User was holding shared buffer pin for too long.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.4 14803

User was holding a relation lock for too long.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.5 14804

User was or might have been using tablespace that must be dropped.

[Description]
Supplementary information was output.

[Action]
Refer to this message together with the message that was output immediately beforehand.
[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.45.6 14805

User query might have needed to see row versions that must be removed.

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.45.7 14806

User was connected to a database that must be dropped.

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.45.8 14808

In a moment you should be able to reconnect to the database and repeat your command.

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.45.9 14809

An invalid floating-point operation was signaled. This probably means an out-of-range result or an invalid operation, such as division by zero.

[Description]
  Supplementary information was output.

[System Processing]
  None.
Increase the configuration parameter "max_stack_depth" (currently @1kB), after ensuring the platform's stack depth limit is adequate.

System Processing
None.

Refer to this message together with the message that was output immediately beforehand.

Try "@1 --help" for more information.

System Processing
None.

Refer to this message together with the message that was output immediately beforehand.

An aggregate returning a polymorphic type must have at least one polymorphic argument.

System Processing
None.

Refer to this message together with the message that was output immediately beforehand.

A function returning "internal" must have at least one "internal" argument.

System Processing
None.
[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.14 14814

Use DROP FUNCTION @1@ first.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.15 14815

Row type defined by OUT parameters is different.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.16 14816

System catalog modifications are currently disallowed.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.17 14817

Proceeding with relation creation anyway.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.45.18 14818

A relation has an associated type of the same name, so you must use a name that doesn't conflict with any existing type.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.19 14819

Table "@1@" references "@2@", but they do not have the same ON COMMIT setting.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.20 14820

Table "@1@" references "@2@".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.21 14821

Truncate table "@1@" at the same time, or use TRUNCATE ... CASCADE.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.45.49 14851

**PL/Python only supports one-dimensional arrays.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.50 14852

**To return null in a column, add the value None to the mapping with the key named after the column.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.45.51 14853

To return null in a column, let the returned object have an attribute named after column with value None.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.52 14856

The arguments of the trigger can be accessed through TG_NARGS and TG_ARGV instead.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.53 14857

Compilation of PL/pgSQL function "@1@" near line @2@

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.54 14858

It could refer to either a PL/pgSQL variable or a table column.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.45.55 14859

**PL/pgSQL function @1@ line @2@ @3@**

**[Description]**
Supplementary information was output.

**[System Processing]**
None.

**[Action]**
Refer to this message together with the message that was output immediately beforehand.

2.45.56 14860

**PL/pgSQL function @1@ @2@**

**[Description]**
Supplementary information was output.

**[System Processing]**
None.

**[Action]**
Refer to this message together with the message that was output immediately beforehand.

2.45.57 14861

**PL/pgSQL function @1@ line @2@ at @3@**

**[Description]**
Supplementary information was output.

**[System Processing]**
None.

**[Action]**
Refer to this message together with the message that was output immediately beforehand.

2.45.58 14862

**PL/pgSQL function @1@**

**[Description]**
Supplementary information was output.

**[System Processing]**
None.

**[Action]**
Refer to this message together with the message that was output immediately beforehand.

2.45.59 14863
CASE statement is missing ELSE part.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.60 14864

The tuple structure of a not-yet-assigned record is indeterminate.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.61 14865

@1@

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.62 14866

Use a BEGIN block with an EXCEPTION clause instead.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.45.63 14867

If you want to discard the results of a SELECT, use PERFORM instead.
2.45.64 14868

You might want to use EXECUTE ... INTO or EXECUTE CREATE TABLE ... AS instead.

2.45.65 14869

Use RETURN NEXT or RETURN QUERY.

2.45.66 14870

@1@ in PL/Tcl function "@2@"

2.45.67 14871

could not translate host name "@1@" to address: @2@

An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.68 14873

class out of memory
[Description]
   There was insufficient free space in the client's memory during execution of the application.

[System Processing]
   Processing will be aborted.

[Action]
   Estimate memory usage and take the following action:
   - Modify the application to reduce memory usage.

2.45.69 14877

class host name must be specified
[Description]
   The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
   Processing will be aborted.

[Action]
   Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.45.70 14881

class GSSAPI continuation error
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.45.71 14882

class duplicate GSS authentication request
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.45.72 14883

GSSAPI name import error

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.45.73 14884

SSPI continuation error

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.45.74 14885

could not acquire SSPI credentials

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.75 14886

SCM_CRED authentication method not supported

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.76 14887

Kerberos 4 authentication not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.77 14888

Kerberos 5 authentication not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.78 14889

GSSAPI authentication not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.79 14890

SSPI authentication not supported

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.80 14891

Crypt authentication not supported
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.81 14892

authentication method @1@ not supported
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.82 14893

invalid sslmode value: "@1@"
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.83 14894

sslmode value "@1@" invalid when SSL support is not compiled in
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.45.84 14895
could not set socket to TCP no delay mode: @1@  
[Description]  
An error occurred during execution of the application or command.  
[System Processing]  
Processing will be aborted.  
[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.85 14896
could not connect to server: @1@ Is the server running locally and accepting connections on Unix domain socket "@2@"?  
[Description]  
An error occurred during execution of the application or command.  
[System Processing]  
Processing will be aborted.  
[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.86 14897
could not connect to server: @1@ Is the server running on host "@2@" (@3@) and accepting TCP/IP connections on port @4@?  
[Description]  
An error occurred during execution of the application or command.  
[System Processing]  
Processing will be aborted.  
[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.45.87 14898
could not connect to server: @1@ Is the server running on host "@2@" and accepting TCP/IP connections on port @3@?  
[Description]  
An error occurred during execution of the application or command.  
[System Processing]  
Processing will be aborted.  
[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.45.88 14899

setsockopt(TCP_KEEPIDLE) failed: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46 Message Numbers Beginning with 14900

2.46.1 14900

setsockopt(TCP_KEEPALIVE) failed: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.2 14901

setsockopt(TCP_KEEPINTVL) failed: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.3 14902

setsockopt(TCP_KEEPCNT) failed: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
### 2.46.4 14903

**WSAioct1(SIO_KEEPALIVE_VALS) failed: @1@**

**[Description]**
An error occurred.

**[System Processing]**
Processing will be aborted.

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.46.5 14904

**invalid port number: "@1@"**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.46.6 14905

**could not find a suitable target server**

**[Description]**
Could not find a suitable target server.

**[System Processing]**
Processing is aborted.

**[Action]**
Check following settings (host, IP address, port number, or targetServer):
- Connection string
- Connection service file
- Data source of JDBC or ODBC
- Environment variables for default connection parameter values (ex. PGHOST)
- Arguments of functions of libpq
- Options of command

### 2.46.7 14906

**could not translate Unix-domain socket path "@1@" to address: @2@**

**[Description]**
An error occurred during execution of the application or command.
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.8 14907
invalid connection state, probably indicative of memory corruption

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.46.9 14908
could not create socket: @1@

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.46.10 14909
could not set socket to nonblocking mode: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.11 14910
could not set socket to close-on-exec mode: @1@

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.12 14911

**keepalives parameter must be an integer**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.13 14912

**setsockopt(SO_KEEPALIVE) failed: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.14 14913

**could not get socket error status: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.15 14914

**could not get client address from socket: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.46.16 14915

requirepeer parameter is not supported on this platform

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.17 14916

could not get peer credentials: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.18 14918

requirepeer specifies "@1@", but actual peer user name is "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.19 14919

could not send startup packet: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.46.20 14920

server does not support auto connection switching

[Description]
The server does not support auto connection switching.

[System Processing]
Processing is aborted.

[Action]
Specify servers that support auto connection switching.

2.46.21 14921

unexpected message from server during startup

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.22 14922

could not send SSL negotiation packet: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.23 14923

server does not support SSL, but SSL was required

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.24 14924
received invalid response to SSL negotiation: @1@
[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.25 14925

expected authentication request from server, but received @1@
[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.26 14926

out of memory allocating GSSAPI buffer (@1@)
[Description]
There was insufficient free space in the client's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- Modify the application to reduce memory usage.

2.46.27 14927

invalid connection state @1@, probably indicative of memory corruption
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.46.28 14928

PGEventProc "@1@" failed during PGEVT_CONNRESET event
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.46.29 14929

invalid LDAP URL "@1@": scheme must be ldap://

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.30 14930

invalid LDAP URL "@1@": missing distinguished name

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.31 14931

invalid LDAP URL "@1@": must have exactly one attribute

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.32 14932

invalid LDAP URL "@1@": must have search scope (base/one/sub)

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.33 14933
invalid LDAP URL "@1@": no filter

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.34 14934
invalid LDAP URL "@1@": invalid port number

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.35 14935
could not create LDAP structure

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.36 14936
lookup on LDAP server failed: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.46.37 14937
more than one entry found on LDAP lookup

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.38 14938
no entry found on LDAP lookup

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.39 14939
attribute has no values on LDAP lookup

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.40 14940
missing "=" after "@1@" in connection info string

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.
[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.41 14941

invalid connection option "@1@"

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.42 14942

unterminated quoted string in connection info string

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.43 14943

could not get home directory to locate service definition file

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.44 14944

definition of service "@1@" not found

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.45 14945

service file "@1@" not found

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.46 14946

line @1@ too long in service file "@2@"

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.47 14947

syntax error in service file "@1@", line @2@

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.46.48 14948

connection pointer is NULL
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.49 14951

password retrieved from file "@1@"

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.46.50 14952

command string is a null pointer

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.51 14953

statement name is a null pointer

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.52 14954

function requires at least protocol version 3.0

[System Processing]
  Processing will be aborted.

[Action]
  Contact Fujitsu technical support.

2.46.57 14959

PGEvtProc "@1@" failed during PGEVT_RESULTCREATE event

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.46.58 14960

COPY terminated by new PQexec

[Description]
  Processing was canceled.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text.

2.46.59 14961

COPY IN state must be terminated first

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.60 14962

COPY OUT state must be terminated first

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.61 14963

**PQexec not allowed during COPY BOTH**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.62 14964

**no COPY in progress**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.63 14965

**connection in wrong state**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.64 14966

**invalid ExecStatusType code**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.46.65 14967

column number @1@ is out of range 0..@2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.66 14968

row number @1@ is out of range 0..@2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.67 14969

parameter number @1@ is out of range 0..@2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.68 14970

could not interpret result from server: @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.69 14971
incomplete multibyte character

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.70 14972
cannot determine OID of function lo_truncate

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.71 14973
cannot determine OID of function lo_create

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.72 14974
could not open file "@1@": @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.73 14975
could not read from file "@1@": @2@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.46.74 14976**

*could not write to file "@1@": @2@*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.46.75 14977**

*query to initialize large object functions did not return data*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.46.76 14978**

*cannot determine OID of function lo_open*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.46.77 14979**

*cannot determine OID of function lo_close*

An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.78 14980

cannot determine OID of function lo_creat
[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.79 14981

cannot determine OID of function lo_unlink
[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.80 14982

cannot determine OID of function lo_lseek
[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.81 14983

cannot determine OID of function lo_tell
[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.82 14984

cannot determine OID of function loread

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.83 14985

cannot determine OID of function lowrite

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.84 14986

integer of size @1@ not supported by pqGetInt

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.85 14987

integer of size @1@ not supported by pqPutInt

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.46.86 14988

**connection not open**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.46.87 14989

**server closed the connection unexpectedly** This probably means the server terminated abnormally before or while processing the request.

**[Description]**
An error occurred.

**[System Processing]**
Processing will be aborted.

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

2.46.88 14990

**timeout expired**

**[Description]**
Timeout occurred during execution of the application.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the following:
- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.46.89 14991

**invalid socket**
2.46.90 14992

select() failed: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.46.91 14993

invalid setenv state @1@, probably indicative of memory corruption

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.46.92 14994

invalid state @1@, probably indicative of memory corruption

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.46.93 14995

message type 0x@1@ arrived from server while idle

[Description]
Terminated normally but a warning was output.
Continues processing.

Action
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.46.94 14996

unexpected character @1@ following empty query response ("I" message)

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.95 14997

server sent data ("D" message) without prior row description ("T" message)

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.96 14998

server sent binary data ("B" message) without prior row description ("T" message)

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.46.97 14999

unexpected response from server; first received character was "@1@"

[Description]
An error occurred during communication between the application and the database server.
Processing will be aborted.

**Action**
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

### 2.47 Message Numbers Beginning with 15000

#### 2.47.1 15000

**Out of memory for query result**

**Description**
There was insufficient free space in the client's memory during execution of the application.

**System Processing**
Processing will be aborted.

**Action**
Estimate memory usage and take the following action:
- Modify the application to reduce memory usage.

#### 2.47.2 15001

**Lost synchronization with server, resetting connection**

**Description**
The database server was disconnected during execution of the application.

**System Processing**
Processing will be aborted.

**Action**
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.
2.47.3 15002

**protocol error: id=0x@1@**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.47.4 15003

**server sent data ("D" message) without prior row description ("T" message)**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.47.5 15004

**message contents do not agree with length in message type "@1@"**

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.47.6 15005

**lost synchronization with server: got message type "@1@", length @2@**

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.47.7 15006
unexpected field count in "D" message
[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.47.8 15007
PQgetline: not doing text COPY OUT
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.47.9 15008
could not establish SSL connection: @1@
[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.47.10 15009

**SSL SYSCALL error: @1@**

**[Description]**
An error occurred.

**[System Processing]**
Processing will be aborted.

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

2.47.11 15010

**SSL SYSCALL error: EOF detected**

**[Description]**
An error occurred.

**[System Processing]**
Processing will be aborted.

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

2.47.12 15011

**SSL error: @1@**

**[Description]**
An error occurred.

**[System Processing]**
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.13 15012
SSL connection has been closed unexpectedly
[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.47.14 15013
unrecognized SSL error code: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.15 15014
could not receive data from server: @1@
[Description]
The database server was disconnected during execution of the application.
[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.
2.47.17 15016

could not get server's host name from server certificate

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.18 15017

SSL certificate's name contains embedded null

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.19 15018

host name must be specified for a verified SSL connection

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.20 15019

server certificate for "@1@" does not match host name "@2@"

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.
[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.21 15020

**could not create SSL context: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.22 15021

**could not open certificate file "@1@": @2@**

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.23 15022

**could not read certificate file "@1@": @2@**

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.24 15023

**could not load SSL engine "@1@": @2@**

[Description]
An error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.47.25 15024

could not initialize SSL engine "@1@": @2@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.47.26 15025

could not read private SSL key "@1@" from engine "@2@": @3@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.47.27 15026

could not load private SSL key "@1@" from engine "@2@": @3@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.47.28 15027

certificate present, but not private key file "@1@"

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.47.29 15028

private key file "@1@" has group or world access; permissions should be u=rw (0600) or less

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.30 15029

could not load private key file "@1@": @2@

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.31 15030

certificate does not match private key file "@1@": @2@

[Description]
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

[System Processing]
Processing will be aborted.

[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.32 15031

could not read root certificate file "@1@": @2@
The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

Processing will be aborted.

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

**2.47.33 15032**

SSL library does not support CRL certificates (file "@1@")

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.47.34 15033**

could not get home directory to locate root certificate file Either provide the file or change sslmode to disable server certificate verification.

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

Processing will be aborted.

Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

**2.47.35 15034**

root certificate file "@1@" does not exist Either provide the file or change sslmode to disable server certificate verification.

The operating environment such as the status of the connection definition file and the connection method specification is abnormal.

Processing will be aborted.
[Action]
Confirm that the operating environment such as the status of the connection definition file and the connection method specification is normal.

2.47.36 15035
certificate could not be obtained: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.37 15036
no SSL error reported
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.38 15037
SSL error code @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.39 15038
@1@: vacuuming database "@2"
[Description]
Terminated normally.

[System Processing]
Continues processing.
2.47.40 15042

**skipped creating .ready file for multiplexed transaction log file "@1@"**

**[Description]**
Terminated normally but a warning was output.

**[System Processing]**
Continues processing.

**[Action]**
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.47.41 15043

**skipped recycling multiplexed transaction log file "@1@"**

**[Description]**
Terminated normally but a warning was output.

**[System Processing]**
Continues processing.

**[Action]**
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.47.42 15044

**skipped removing multiplexed transaction log file "@1@"**

**[Description]**
Terminated normally but a warning was output.

**[System Processing]**
Continues processing.

**[Action]**
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.47.43 15045

**no data found on line @1@**

**[Description]**
An error occurred.

**[System Processing]**
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.47.44 15046

**out of memory on line @1@**

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.47.45 15047

**unsupported type "@1@" on line @2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.46 15048

**too many arguments on line @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.47 15049

**too few arguments on line @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.48 15050

invalid input syntax for type int: "@1@", on line @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.49 15051

invalid input syntax for type unsigned int: "@1@", on line @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.50 15052

invalid input syntax for floating-point type: "@1@", on line @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.51 15053

invalid syntax for type boolean: "@1@", on line @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.47.52 15054

could not convert boolean value: size mismatch, on line @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.53 15055

empty query on line @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.54 15056

null value without indicator on line @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.55 15057

variable does not have an array type on line @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.56 15058
data read from server is not an array on line @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.57 15059

inserting an array of variables is not supported on line @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.58 15060

connection "@1@" does not exist on line @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.59 15061

not connected to connection "@1@" on line @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.60 15062

invalid statement name "@1@" on line @2@
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.61 15063

descriptor "@1@" not found on line @2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.62 15064

descriptor index out of range on line @1@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.63 15065

unrecognized descriptor item "@1@" on line @2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.64 15066

variable does not have a numeric type on line @1@

An error occurred.
variable does not have a character type on line @1@

error in transaction processing on line @1@

could not connect to database "@1@" on line @2@

SQL error @1@ on line @2@
To investigate the cause of the occurrence from the message, and remove cause.

2.47.69 15071
**the connection to the server was lost**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.70 15072
**empty message text**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.71 15074
**SP-GiST inner tuple size @1@ exceeds maximum @2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.72 15075
**backup_label contains data inconsistent with control file**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.47.73 15076
WAL generated with full_page_writes=off was replayed since last restartpoint

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.74 15077
the standby was promoted during online backup

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.75 15078
WAL generated with full_page_writes=off was replayed during online backup

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.76 15080
cannot set privileges of array types

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.77 15081
drop cascades to @1@ other object
drop cascades to @2@ other objects

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.47.78 15082**

constraint "@1@" conflicts with non-inherited constraint on relation "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.47.79 15083**

DROP INDEX CONCURRENTLY must be first action in transaction

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.47.80 15084**

foreign-data wrapper name cannot be qualified

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.47.81 15085**

domain "@1@" has multiple constraints named "@2@"
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.82 15086

`functions cannot have more than @1@ argument
functions cannot have more than @2@ arguments`

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.83 15087

`skipping "@1" --- cannot analyze this foreign table`

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.47.84 15088

`could not convert row type`

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.47.85 15089

`unexpected EOF on client connection with an open transaction`
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.86 15090

**EXPLAIN** option TIMING requires **ANALYZE**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.87 15091

**only superuser can define a leakproof function**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.88 15092

**cast will be ignored because the source data type is a domain**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.47.89 15093

**cast will be ignored because the target data type is a domain**

An error occurred.
[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

**2.47.90 15094**

**btree sort support procedures must accept type "internal"**

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

**2.47.91 15095**

**btree sort support procedures must return void**

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

**2.47.92 15096**

**Use DROP TABLE to remove a table.**

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

**2.47.93 15097**

**Use DROP SEQUENCE to remove a sequence.**

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.94 15098

Use DROP VIEW to remove a view.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.47.95 15099

Use DROP INDEX to remove an index.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48 Message Numbers Beginning with 15100

2.48.1 15100

Use DROP TYPE to remove a type.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.2 15101

Use DROP FOREIGN TABLE to remove a foreign table.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.3 15102

DROP INDEX CONCURRENTLY does not support dropping multiple objects
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.4 15103

DROP INDEX CONCURRENTLY does not support CASCADE
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.5 15104

cannot inherit from temporary relation of another session
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.6 15105

constraints on temporary tables must involve temporary tables of this session
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.48.7 15106

**constraint must be validated on child tables too**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.8 15107

**cannot inherit to temporary relation of another session**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.9 15108

**constraint "@1@" conflicts with non-inherited constraint on child table "@2@"**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.10 15109

**Found referenced table's UPDATE trigger.**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.11 15110
Found referenced table's DELETE trigger.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.12 15111

Found referencing table's trigger.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.13 15112

@1@ constraints cannot be marked NO INHERIT

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.14 15113

type attribute "subtype" is required

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.15 15114

range collation specified but subtype does not support collation
2.48.16 15115

range canonical function @1@ must be immutable

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.17 15116

range subtype diff function @1@ must return type @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.18 15117

range subtype diff function @1@ must be immutable

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.19 15118

constraint "@1@" of domain "@2@" does not exist, skipping

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.20 15119

"@1@": suspending truncate due to conflicting lock request

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.21 15120

cannot set transaction read-write mode inside a read-only transaction

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.22 15121

transaction read-write mode must be set before any query

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.23 15122

cannot set transaction read-write mode during recovery

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.48.24 15123

**SET TRANSACTION ISOLATION LEVEL must be called before any query**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.25 15124

**SET TRANSACTION ISOLATION LEVEL must not be called in a subtransaction**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.26 15125

**SET TRANSACTION [NOT] DEFERRABLE cannot be called within a subtransaction**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.27 15126

**SET TRANSACTION [NOT] DEFERRABLE must be called before any query**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.48.28 15127

**cannot delete from view "@1@"**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.29 15128

**GLOBAL is deprecated in temporary table creation**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.30 15129

**duplicate trigger events specified**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.48.31 15130

**unrecognized configuration parameter "@1@" in file "@2@" line @3@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
configuration file "@1@" contains errors

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

configuration file "@1@" contains errors; unaffected changes were applied

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

configuration file "@1@" contains errors; no changes were applied

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

too many syntax errors found, abandoning file "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
accepting GSS security context failed

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.37 15136

retrieving GSS user name failed

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.38 15137

could not acquire SSPI credentials

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.39 15138

could not accept SSPI security context

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.40 15139

could not get token from SSPI security context

[Action]
No action required.

2.48.48 15147

**configuration file "@1@" contains no entries**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.49 15148

Unix-domain socket path "@1@" is too long (maximum @2@ bytes)
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.50 15149

@1@: WSAStartup failed: @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.51 15150

@1@: real and effective user IDs must match
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.52 15151

could not look up effective user ID @1@: @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.48.53 15153
too many range table entries
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.54 15154
SELECT ... INTO is not allowed here
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.55 15155
arguments declared "anyrange" are not all alike
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.56 15156
argument declared "anyrange" is not consistent with argument declared "anyclement"
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.57 15157
could not load dbghelp.dll, cannot write crash dump

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.58 15158

could not load required functions in dbghelp.dll, cannot write crash dump

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.59 15159

could not open crash dump file "@@" for writing: error code @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.60 15160

could not write crash dump to file "@@": error code @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.61 15161

could not open process token: error code @1@
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.62 15162

could not get SID for Administrators group: error code @1@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.63 15163

could not get SID for PowerUsers group: error code @1@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.64 15164

could not create signal listener pipe: error code @1@; retrying

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.65 15165

could not create signal dispatch thread: error code @1@

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.66 15166

@1@: superuser_reserved_connections must be less than max_connections

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.67 15167

@1@: max_wal_senders must be less than max_connections

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.68 15168

@1@: invalid datetoken tables, please fix

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.69 15169

@1@: could not change permissions of external PID file "@2@": @3@

An error occurred.

Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.48.70 15170

@1@: could not write external PID file "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.71 15171
could not fork new process for connection:

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.72 15172

could not read exit code for process

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.73 15173
could not post child completion status

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.48.74 15174

could not write to log file: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.75 15175

invalid streaming start location

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.76 15176

unterminated quoted string

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.77 15177

unexpected WAL file size "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.78 15178
**unterminated bit string literal**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.48.79 15179**

**unterminated hexadecimal string literal**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.48.80 15180**

**invalid Unicode surrogate pair**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.48.81 15181**

**unterminated dollar-quoted string**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.48.82 15182**

**zero-length delimited identifier**
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.83 15183

Unterminated quoted identifier

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.84 15184

Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.85 15185

Invalid Unicode escape value

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.48.86 15186

Invalid Unicode escape character
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.48.87 15187**

Temporary file size exceeds temp_file_limit (@1@kB)

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.48.88 15188**

A snapshot-importing transaction must not be READ ONLY DEFERRABLE

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.48.89 15189**

Could not import the requested snapshot

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.48.90 15190**

Connection to client lost

The database server was disconnected during execution of the application.
[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.48.91 15191
invalid command-line argument for server process: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.92 15194
range constructor flags argument must not be null

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.93 15195
result of range difference would not be contiguous
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.94 15196

result of range union would not be contiguous

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.95 15197

range lower bound must be less than or equal to range upper bound

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.96 15198

invalid range bound flags

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.48.97 15199

could not set up XML error handler

[Description]
An error occurred.
[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.49 Message Numbers Beginning with 15200

2.49.1 15200
   **keystore_location is not supported by this build**
   [Description]
   An error occurred.
   [System Processing]
   Processing will be aborted.
   [Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.49.2 15201
   **keystore location is not configured**
   [Description]
   An error occurred.
   [System Processing]
   Processing will be aborted.
   [Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.49.3 15202
   **could not encrypt or decrypt data because the keystore is not open**
   [Description]
   An error occurred.
   [System Processing]
   Processing will be aborted.
   [Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.49.4 15203
   **keystore is already open**
   [Description]
   An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.5 15204

**passphrase is too short or too long**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.6 15205

**passphrase-based key derivation failed: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.7 15206

**a new master encryption key has been set**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.8 15207

**passphrase of the keystore has been changed**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.49.9 15208

**encryption or decryption of data in tablespace @1@ failed: @2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.10 15209

**encryption or decryption of data failed: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.11 15210

**could not open keystore "@1@": necessary master encryption key does not exist in the keystore**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.12 15211

**decryption of the auto-open keystore "@1@" failed: error code = @2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

**2.49.13 15212**

**encryption of the auto-open keystore "@1@" failed: error code = @2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.49.14 15213**

**keystore "@1@" is corrupted: size = @2@ bytes, expected size = @3@ bytes**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.49.15 15214**

could not open keystore "@1@": passphrase is wrong, or the auto-open keystore was created by another computer or user

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.49.16 15215**

**keystore "@1@" is corrupted: invalid CRC**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

**2.49.17 15216**

*encryption or decryption of the keystore "@1@" failed: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.49.18 15217**

*character with byte sequence @1@ in encoding "@2@" has no equivalent in encoding "@3@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.49.19 15218**

*Enables the planner's use of sequential-scan plans.*

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.49.20 15219**

*Enables the planner's use of index-scan plans.*

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
2.49.21 15220

Enables the planner's use of index-only-scan plans.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.22 15221

Enables the planner's use of bitmap-scan plans.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.23 15222

Enables the planner's use of TID scan plans.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.24 15223

Enables the planner's use of explicit sort steps.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

</table>
2.49.30 15229

Enables genetic query optimization.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.31 15230

Shows whether the current user is a superuser.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.32 15231

Enables advertising the server via Bonjour.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.33 15232

Enables SSL connections.

[Description]
Terminated normally.
[System Processing]
Continues processing.

[Action]
No action required.

2.49.34 15233

Forces synchronization of updates to disk.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.35 15235

Writes full pages to WAL when first modified after a checkpoint.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.36 15236

Logs each checkpoint.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.37 15237

Logs each successful connection.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.49.38 15238  
Logs end of a session, including duration.  
[Description]  
An error occurred.  
[System Processing]  
Processing will be aborted.  
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.49.39 15239  
Shows whether the running server has assertion checks enabled.  
[Description]  
An error occurred.  
[System Processing]  
Processing will be aborted.  
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.49.40 15240  
Terminate session on any error.  
[Description]  
An error occurred.  
[System Processing]  
Processing will be aborted.  
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.49.41 15241  
Restarts all server processes on WAL multiplexing errors.  
[Description]  
An error occurred.  
[System Processing]  
Processing will be aborted.  
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.
2.49.42 15242

Enables fast WAL multiplexing.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.43 15243

Enables encryption of temporary files used in large queries.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.44 15244

Reinitialize server after backend crash.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.45 15245

Logs the duration of each completed SQL statement.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
2.49.47 15247

Logs each query's parse tree.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.48 15248

Logs each query's rewritten parse tree.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.49 15249

Indents parse and plan tree displays.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.50 15250

Writes parser performance statistics to the server log.
Terminated normally.

Continues processing.

No action required.

2.49.51 15251

**W**rites planner performance statistics to the server log.

Terminated normally.

Continues processing.

No action required.

2.49.52 15252

**W**rites executor performance statistics to the server log.

Terminated normally.

Continues processing.

No action required.

2.49.53 15253

**W**rites cumulative performance statistics to the server log.

Terminated normally.

Continues processing.

No action required.

2.49.54 15255

**C**ollects information about executing commands.

Terminated normally.
2.49.55 15256

**Collects statistics on database activity.**

**[Description]**
Terminated normally.

**[System Processing]**
Continues processing.

**[Action]**
No action required.

2.49.56 15257

**Collects timing statistics for database I/O activity.**

**[Description]**
Terminated normally.

**[System Processing]**
Continues processing.

**[Action]**
No action required.

2.49.57 15258

**Updates the process title to show the active SQL command.**

**[Description]**
Terminated normally.

**[System Processing]**
Continues processing.

**[Action]**
No action required.

2.49.58 15259

**Starts the autovacuum subprocess.**

**[Description]**
Terminated normally.

**[System Processing]**
Continues processing.
Generates debugging output for LISTEN and NOTIFY.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

Logs long lock waits.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

Logs the host name in the connection logs.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

Causes subtables to be included by default in various commands.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.49.63 15264

**Encrypt passwords.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.64 15265

**Treats "expr=NULL" as "expr IS NULL".**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.65 15266

**Enables per-database user names.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.66 15268

**Sets the default read-only status of new transactions.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
Sets the current transaction's read-only status.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.68 15270

Sets the default deferrable status of new transactions.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.69 15271

Whether to defer a read-only serializable transaction until it can be executed with no possible serialization failures.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.70 15272

Check function bodies during CREATE FUNCTION.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.71 15273

Enable input of NULL elements in arrays.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.72 15274

Create new tables with OIDs by default.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.73 15275

Start a subprocess to capture stderr output and/or csvlogs into log files.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.74 15276

Truncate existing log files of same name during log rotation.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.75 15277

Emit information about resource usage in sorting.

[Description]
Terminated normally.
2.49.76 15278

**Generate debugging output for synchronized scanning.**

**Description**
Terminated normally.

**System Processing**
Continues processing.

**Action**
No action required.

2.49.77 15279

**Enable bounded sorting using heap sort.**

**Description**
Terminated normally.

**System Processing**
Continues processing.

**Action**
No action required.

2.49.78 15280

**Emit WAL-related debugging output.**

**Description**
Terminated normally.

**System Processing**
Continues processing.

**Action**
No action required.

2.49.79 15281

**Datetimes are integer based.**

**Description**
Terminated normally.

**System Processing**
Continues processing.
[Action]
No action required.

2.49.80 15282

Sets whether Kerberos and GSSAPI user names should be treated as case-insensitive.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.81 15283

Warn about backslash escapes in ordinary string literals.

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.49.82 15284

Causes '...' strings to treat backslashes literally.

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.49.83 15285

Enable synchronized sequential scans.

[Description]
Terminated normally.

[System Processing]
Continues processing.
2.49.84 15286

**Allows archiving of WAL files using archive_command.**

[Action]
No action required.

2.49.85 15287

**Allows connections and queries during recovery.**

[Action]
No action required.

2.49.86 15288

**Allows feedback from a hot standby to the primary that will avoid query conflicts.**

[Action]
No action required.

2.49.87 15289

**Allows modifications of the structure of system tables.**

[Action]
No action required.
2.49.88 15290

Disables reading from system indexes.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.89 15291

Enables backward compatibility mode for privilege checks on large objects.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.90 15292

When generating SQL fragments, quote all identifiers.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.91 15293

Forces a switch to the next xlog file if a new file has not been started within N seconds.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.49.92 15294
Waits N seconds on connection startup after authentication.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.93 15295

Sets the default statistics target.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.94 15296

Sets the FROM-list size beyond which subqueries are not collapsed.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.95 15297

Sets the FROM-list size beyond which JOIN constructs are not flattened.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.49.96 15298

Sets the threshold of FROM items beyond which GEQO is used.
**Terminated normally.**

**System Processing**
Continues processing.

**Action**
No action required.

### 2.49.97 15299

**GEQO**: effort is used to set the default for other GEQO parameters.

**Description**
Terminated normally.

**System Processing**
Continues processing.

**Action**
No action required.

### 2.50 Message Numbers Beginning with 15300

#### 2.50.1 15300

**GEQO**: number of individuals in the population.

**Description**
Terminated normally.

**System Processing**
Continues processing.

**Action**
No action required.

#### 2.50.2 15301

**GEQO**: number of iterations of the algorithm.

**Description**
Terminated normally.

**System Processing**
Continues processing.

**Action**
No action required.

#### 2.50.3 15302

Sets the time to wait on a lock before checking for deadlock.
### 2.50.4 15303

Sets the maximum delay before canceling queries when a hot standby server is processing archived WAL data.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

### 2.50.5 15304

Sets the maximum delay before canceling queries when a hot standby server is processing streamed WAL data.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

### 2.50.6 15305

Sets the maximum interval between WAL receiver status reports to the primary.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

### 2.50.7 15306

Sets the maximum number of concurrent connections.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.8 15307

Sets the number of connection slots reserved for superusers.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.9 15308

Sets the number of shared memory buffers used by the server.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.10 15309

Sets the maximum number of temporary buffers used by each session.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.11 15310

Sets the TCP port the server listens on.

[Description]
Terminated normally.
2.50.12 15311

Sets the access permissions of the Unix-domain socket.

[Description]
Terminated normally.

2.50.13 15312

Sets the file permissions for log files.

[Description]
Terminated normally.

2.50.14 15313

Sets the maximum memory to be used for query workspaces.

[Description]
Terminated normally.

2.50.15 15314

Sets the maximum memory to be used for maintenance operations.

[Description]
Terminated normally.
2.50.16 15315

Sets the maximum stack depth, in kilobytes.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.17 15316

Limits the total size of all temporary files used by each process.

[Description]
There was insufficient free space in the disk of the database server during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Delete user data stored in the database server to free up space on the disk.

2.50.18 15317

Vacuum cost for a page found in the buffer cache.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.19 15318

Vacuum cost for a page not found in the buffer cache.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
**2.50.20 15319**

**Vacuum cost for a page dirtied by vacuum.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.50.21 15320**

**Vacuum cost amount available before napping.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.50.22 15321**

**Vacuum cost delay in milliseconds.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.50.23 15322**

**Vacuum cost delay in milliseconds, for autovacuum.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.50.24 15323**
**Vacuum cost amount available before napping, for autovacuum.**

-[Description]
Terminated normally.

-[System Processing]
Continues processing.

-[Action]
No action required.

**2.50.25 15324**

Sets the maximum number of simultaneously open files for each server process.

-[Description]
Terminated normally.

-[System Processing]
Continues processing.

-[Action]
No action required.

**2.50.26 15325**

Sets the maximum number of simultaneously prepared transactions.

-[Description]
Terminated normally.

-[System Processing]
Continues processing.

-[Action]
No action required.

**2.50.27 15326**

Sets the maximum allowed duration of any statement.

-[Description]
Terminated normally.

-[System Processing]
Continues processing.

-[Action]
No action required.

**2.50.28 15327**

Minimum age at which VACUUM should freeze a table row.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.29 15328

Age at which VACUUM should scan whole table to freeze tuples.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.30 15329

Number of transactions by which VACUUM and HOT cleanup should be deferred, if any.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.31 15330

Sets the maximum number of locks per transaction.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.32 15331

Sets the maximum number of predicate locks per transaction.

[Description]
Terminated normally.
[System Processing]
Continues processing.

[Action]
No action required.

2.50.33 15332

Sets the maximum allowed time to complete client authentication.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.34 15333

Waits N seconds on connection startup before authentication.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.35 15334

Sets the number of WAL files held for standby servers.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.36 15336

Sets the maximum time between automatic WAL checkpoints.

[Description]
Terminated normally.

[System Processing]
Continues processing.
2.50.37 15337

Enables warnings if checkpoint segments are filled more frequently than this.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.38 15338

Sets the number of disk-page buffers in shared memory for WAL.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.39 15339

Time between WAL flushes performed in the WAL writer.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.40 15340

Sets the maximum number of simultaneously running WAL sender processes.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
2.50.41 15341

Sets the maximum time to wait for WAL replication.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.42 15342

Sets the delay in microseconds between transaction commit and flushing WAL to disk.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.43 15343

Sets the minimum concurrent open transactions before performing commit_delay.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.44 15344

Sets the number of digits displayed for floating-point values.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.45 15345
Sets the minimum execution time above which statements will be logged.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.46 15346

Sets the minimum execution time above which autovacuum actions will be logged.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.47 15347

Background writer sleep time between rounds.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.48 15348

Background writer maximum number of LRU pages to flush per round.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.49 15349

Number of simultaneous requests that can be handled efficiently by the disk subsystem.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.50 15350

Automatic log file rotation will occur after N minutes.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.51 15351

Automatic log file rotation will occur after N kilobytes.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.52 15352

Shows the maximum number of function arguments.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.53 15353

Shows the maximum number of index keys.

[Description]
Terminated normally.
[System Processing]
Continues processing.

[Action]
No action required.

2.50.54 15354

Shows the maximum identifier length.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.55 15355

Shows the size of a disk block.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.56 15356

Shows the number of pages per disk file.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.57 15357

Shows the block size in the write ahead log.

[Description]
Terminated normally.

[System Processing]
Continues processing.
[Action]
   No action required.

2.50.58 15358

**Shows the number of pages per write ahead log segment.**

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.

2.50.59 15359

**Time to sleep between autovacuum runs.**

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.

2.50.60 15360

**Minimum number of tuple updates or deletes prior to vacuum.**

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.

2.50.61 15361

**Minimum number of tuple inserts, updates, or deletes prior to analyze.**

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.
2.50.62 15362

**Age at which to autovacuum a table to prevent transaction ID wraparound.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.63 15363

**Sets the maximum number of simultaneously running autovacuum worker processes.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.64 15364

**Time between issuing TCP keepalives.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.65 15365

**Time between TCP keepalive retransmits.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
SSL renegotiation is no longer supported; this can only be 0.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.67 15367

Maximum number of TCP keepalive retransmits.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.68 15368

Sets the maximum allowed result for exact search by GIN.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.69 15369

Sets the planner’s assumption about the size of the disk cache.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.70 15370

Shows the server version as an integer.
Terminated normally.

Continues processing.

No action required.

2.50.71 15371

Log the use of temporary files larger than this number of kilobytes.

Terminated normally.

Continues processing.

No action required.

2.50.72 15372

Sets the size reserved for pg_stat_activity.query, in bytes.

Terminated normally.

Continues processing.

No action required.

2.50.73 15373

Sets the planner’s estimate of the cost of a sequentially fetched disk page.

Terminated normally.

Continues processing.

No action required.

2.50.74 15374

Sets the planner’s estimate of the cost of a nonsequentially fetched disk page.

Terminated normally.
Sets the planner’s estimate of the cost of processing each tuple (row).

Terminated normally.

No action required.

Sets the planner’s estimate of the cost of processing each index entry during an index scan.

Terminated normally.

No action required.

Sets the planner’s estimate of the cost of processing each operator or function call.

Terminated normally.

No action required.

Sets the planner’s estimate of the fraction of a cursor’s rows that will be retrieved.

Terminated normally.
No action required.

2.50.79 15379

**GEQO: selective pressure within the population.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.80 15380

**GEQO: seed for random path selection.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.81 15381

**Multiple of the average buffer usage to free per round.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.82 15382

**Sets the seed for random-number generation.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
2.50.83 15383

Number of tuple updates or deletes prior to vacuum as a fraction of reltuples.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.84 15384

Number of tuple inserts, updates, or deletes prior to analyze as a fraction of reltuples.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.85 15385

Time spent flushing dirty buffers during checkpoint, as fraction of checkpoint interval.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.86 15386

Sets the shell command that will be called to archive a WAL file.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.87 15387
Sets the client's character set encoding.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.88 15388

Controls information prefixed to each log line.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.89 15389

Sets the time zone to use in log messages.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.90 15390

Sets the display format for date and time values.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.91 15391

Sets the default tablespace to create tables and indexes in.
2.50.92 15392

Sets the tablespace(s) to use for temporary tables and sort files.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.93 15393

Sets the path for dynamically loadable modules.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.94 15394

Sets the location of the Kerberos server key file.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.95 15396

Sets the Bonjour service name.

[Description]
Terminated normally.
[System Processing]
Continues processing.

[Action]
No action required.

2.50.96 15397

Shows the collation order locale.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.97 15398

Shows the character classification and case conversion locale.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.50.98 15399

Sets the language in which messages are displayed.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51 Message Numbers Beginning with 15400

2.51.1 15400

Sets the locale for formatting monetary amounts.
[Description]
Terminated normally.
2.51.2 15401

Sets the locale for formatting numbers.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.3 15402

Sets the locale for formatting date and time values.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.4 15403

Lists shared libraries to preload into server.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.5 15404

Lists shared libraries to preload into each backend.

[Description]
Terminated normally.

[System Processing]
Continues processing.
2.51.6 15405

Sets the schema search order for names that are not schema-qualified.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.7 15406

Sets the server (database) character set encoding.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.8 15407

Shows the server version.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.9 15408

Sets the current role.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.
2.51.10 15409

Sets the session user name.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.11 15410

Sets the destination for server log output.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.12 15411

Sets the destination directory for log files.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.13 15412

Sets the file name pattern for log files.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.14 15413
Sets the program name used to identify PostgreSQL messages in syslog.
[Description]
   Terminated normally.
[System Processing]
   Continues processing.
[Action]
   No action required.

2.51.15 15414

Sets the application name used to identify PostgreSQL messages in the event log.
[Description]
   Terminated normally.
[System Processing]
   Continues processing.
[Action]
   No action required.

2.51.16 15415

Sets the time zone for displaying and interpreting time stamps.
[Description]
   Terminated normally.
[System Processing]
   Continues processing.
[Action]
   No action required.

2.51.17 15416

Selects a file of time zone abbreviations.
[Description]
   Terminated normally.
[System Processing]
   Continues processing.
[Action]
   No action required.

2.51.18 15417

Sets the current transaction's isolation level.
2.51.19 15418

Sets the owning group of the Unix-domain socket.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.20 15419

Sets the directories where Unix-domain sockets will be created.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.21 15420

Sets the host name or IP address(es) to listen to.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.22 15421

Sets the server's data directory.

[Description]
Terminated normally.
[System Processing]
Continues processing.

[Action]
No action required.

2.51.23 15422

Sets the server's backup directory.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.24 15423

Sets the directory where multiplexed transaction log files are stored.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.25 15424

Sets the directory where server's core files are dumped.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.26 15425

Sets the location where the keystore is stored

[Description]
Terminated normally.

[System Processing]
Continues processing.
[Action]
   No action required.

2.51.27 15426

Sets the server's main configuration file.

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.

2.51.28 15427

Sets the server's "hba" configuration file.

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.

2.51.29 15428

Sets the server's "ident" configuration file.

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.

2.51.30 15429

Writes the postmaster PID to the specified file.

[Description]
   Terminated normally.

[System Processing]
   Continues processing.

[Action]
   No action required.
2.51.31 15430

Location of the SSL server certificate file.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.32 15431

Location of the SSL server private key file.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.33 15432

Location of the SSL certificate authority file.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.34 15433

Location of the SSL certificate revocation list file.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.35 15434
**2.51.36 15435**

**Number of synchronous standbys and list of names of potential synchronous ones.**

[**Description**]
Terminated normally.

[**System Processing**]
Continues processing.

[**Action**]
No action required.

---

**2.51.37 15436**

**Sets default text search configuration.**

[**Description**]
Terminated normally.

[**System Processing**]
Continues processing.

[**Action**]
No action required.

---

**2.51.38 15437**

**Sets the list of allowed SSL ciphers.**

[**Description**]
Terminated normally.

[**System Processing**]
Continues processing.

[**Action**]
No action required.

---

**2.51.39 15438**

**Sets the application name to be reported in statistics and logs.**
Terminated normally.

Continues processing.

No action required.

### 2.51.40 15439

Sets whether "\\" is allowed in string literals.

Terminated normally.

Continues processing.

No action required.

### 2.51.41 15440

Sets the output format for bytea.

Terminated normally.

Continues processing.

No action required.

### 2.51.42 15441

Sets the message levels that are sent to the client.

Terminated normally.

Continues processing.

No action required.

### 2.51.43 15442

Enables the planner to use constraints to optimize queries.

Terminated normally.
2.51.44 15443

Sets the transaction isolation level of each new transaction.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.45 15444

Sets the display format for interval values.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.46 15445

Sets the verbosity of logged messages.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.47 15446

Sets the message levels that are logged.

[Description]
Terminated normally.

[System Processing]
Continues processing.
2.51.48 15447

**Causes all statements generating error at or above this level to be logged.**

**[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

2.51.49 15448

**Sets the type of statements logged.**

**[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

2.51.50 15449

**Sets the syslog “facility” to be used when syslog enabled.**

**[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.

2.51.51 15450

**Sets the session’s behavior for triggers and rewrite rules.**

**[Description]**

Terminated normally.

**[System Processing]**

Continues processing.

**[Action]**

No action required.
2.51.52 15451

**Sets the current transaction's synchronization level.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.53 15452

**Enables logging of recovery-related debugging information.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.54 15453

**Collects function-level statistics on database activity.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.55 15454

**Set the level of information written to the WAL.**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.56 15455
Selects the method used for forcing WAL updates to disk.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.57 15456

Sets how binary values are to be encoded in XML.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.58 15457

Sets whether XML data in implicit parsing and serialization operations is to be considered as documents or content fragments.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.59 15458

Sets what to dump in core files.

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.51.60 15459

Selects the algorithm for encrypting tablespace.
[Description]
 Terminated normally.

[System Processing]
 Continues processing.

[Action]
 No action required.

2.51.61 15460

@1@: could not access the server configuration file "@2@": @3@

[Description]
 An error occurred.

[System Processing]
 Processing will be aborted.

[Action]
 To investigate the cause of the occurrence from the message, and remove cause.

2.51.62 15461

SET LOCAL TRANSACTION SNAPSHOT is not implemented

[Description]
 An error occurred.

[System Processing]
 Processing will be aborted.

[Action]
 To investigate the cause of the occurrence from the message, and remove cause.

2.51.63 15464

Bonjour is not supported by this build

[Description]
 An error occurred.

[System Processing]
 Processing will be aborted.

[Action]
 To investigate the cause of the occurrence from the message, and remove cause.

2.51.64 15465

SSL is not supported by this build

[Description]
 An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

2.51.65 15466

**internal error: unrecognized run-time parameter type**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

---

2.51.66 15467

**time zone abbreviation "@1@" is too long (maximum @2@ characters) in time zone file "@3@", line @4@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

---

2.51.67 15468

**invalid number for time zone offset in time zone file "@1@", line @2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

---

2.51.68 15469

**time zone offset @1@ is out of range in time zone file "@2@", line @3@**

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.69 15470

missing time zone abbreviation in time zone file "@1@", line @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.70 15471

missing time zone offset in time zone file "@1@", line @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.71 15473

invalid syntax in time zone file "@1@", line @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.72 15474

time zone abbreviation "@1@" is multiply defined

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.51.73 15475

**invalid time zone file name "@1@"**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.74 15476

**time zone file recursion limit exceeded in file "@1@"**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.75 15477

**line is too long in time zone file "@1@", line @2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.76 15478

**@INCLUDE without file name in time zone file "@1@", line @2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.51.77 15479

cannot export a snapshot from a subtransaction

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.78 15480

invalid snapshot data in file "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.79 15481

SET TRANSACTION SNAPSHOT must be called before any query

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.80 15482

a snapshot-importing transaction must have isolation level SERIALIZABLE or REPEATABLE READ

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.51.81 15483

**invalid snapshot identifier: "@1@"**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.82 15484

**a serializable transaction cannot import a snapshot from a non-serializable transaction**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.83 15485

**a non-read-only serializable transaction cannot import a snapshot from a read-only transaction**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.84 15486

**cannot import a snapshot from a different database**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.51.85 15487

out of memory

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.51.86 15488

@1@: could not open file "@2@" for reading: @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.87 15489

@1@: could not open file "@2@" for writing: @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.88 15490

@1@: could not write file "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.51.89 15491
@1@: could not execute command "@2@": @3@
[Description]
   An error occurred.
[System Processing]
   Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.51.90 15492
@1@: removing data directory "@2@"
[Description]
   An error occurred.
[System Processing]
   Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.51.91 15493
@1@: failed to remove data directory
[Description]
   An error occurred.
[System Processing]
   Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.51.92 15494
@1@: removing contents of data directory "@2@"
[Description]
   An error occurred.
[System Processing]
   Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.51.93 15495
@1@: failed to remove contents of data directory
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.94 15496

@1@: removing transaction log directory "@2@"
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.95 15497

@1@: failed to remove transaction log directory
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.96 15498

@1@: removing contents of transaction log directory "@2@"
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.51.97 15499

@1@: failed to remove contents of transaction log directory
2.52 Message Numbers Beginning with 15500

2.52.1 15500

@1@: data directory "@2@" not removed at user's request

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.2 15501

@1@: transaction log directory "@2@" not removed at user's request

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

@1@: unrecognized link indicator "@2@"

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.52.62 15576

@1@: could not set permissions on file "@2@": @3@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.63 15577
@1@: COPY stream ended before last file was finished
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.64 15578
@1@: could not send replication command "@2@": @3@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.65 15579
@1@: could not identify system: got @2@ rows and @3@ fields, expected @4@ rows and @5@ or more fields
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.66 15580
@1@: could not initiate base backup: @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.67 15581

@1@: no data returned from server

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.68 15582

@1@: could not get backup header: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.69 15584

@1@: can only write single tablespace to stdout, database has @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.70 15585

@1@: starting background WAL receiver

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.52.71 15586

@1@: could not get transaction log end position from server: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.72 15587

@1@: no transaction log end position returned from server

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.73 15588

@1@: final receive failed: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.74 15589

@1@: could not send command to background pipe: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.75 15590
@1@: could not wait for child process: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.76 15591

@1@: child @2@ died, expected @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.77 15592

@1@: child process did not exit normally

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.78 15593

@1@: child process exited with error @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.79 15594

@1@: could not wait for child thread: @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.80 15595
@1@: could not get child thread exit status: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.81 15596
@1@: child thread exited with error @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.82 15597
@1@: invalid output format "@2", must be "plain" or "tar"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.52.83 15598
@1@: cannot specify both --xlog and --xlog-method

[Description]
An error occurred.
2.52.84 15599

@1@: invalid compression level "@2@"

[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53 Message Numbers Beginning with 15600

2.53.1 15600

@1@: invalid checkpoint argument "@2@", must be "fast" or "spread"

[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.2 15601

@1@: invalid status interval "@2@

[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.3 15602

@1@: too many command-line arguments (first is "@2@")

[Description]
An error occurred.

To investigate the cause of the occurrence from the message, and remove cause.

2.53.8 15607

@1@: finished segment at @2@/@3@ (timeline @4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.9 15608

@1@: received interrupt signal, exiting

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.10 15609

@1@: could not open directory "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.11 15611

@1@: could not stat file "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.53.12 15612

@1@: segment file "@2@" has incorrect size @3@, skipping

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.13 15613

@1@: starting log streaming at @2@/@3@ (timeline @4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.14 15614

@1@: invalid port number "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.15 15615

@1@: disconnected

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
@1@: disconnected; waiting @2@ seconds to try again
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.17 15617

@1@: could not open transaction log file "@2@": @3@ 
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.18 15618

@1@: could not stat transaction log file "@2@": @3@ 
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.19 15619

@1@: transaction log file "@2@" has @3@ bytes, should be 0 or @4@ 
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.20 15620

@1@: could not pad transaction log file "@2@": @3@
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

@1@: could not open file "@2@" for reading: @3@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.53.44 15649

@1@: could not read file "@2@": @3@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.53.45 15652

child process exited with unrecognized status @1@

An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.46 15653

@1@: could not open PID file "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.47 15654

@1@: invalid data in PID file "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.48 15655

@1@: -w option is not supported when starting a pre-9.1 server

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.49 15656

@1@: -w option cannot use a relative socket directory specification

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.50 15658

@1@: cannot set core file size limit; disallowed by hard limit

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.51 15659

@1@: could not read file "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.52 15660

@1@: option file "@2@" must have exactly one line

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.53 15661

The program "@1@" is needed by @2@ but was not found in the same directory as "@3@". Check your installation.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.54 15662

The program "@1@" was found by "@2@" but was not the same version as @3@. Check your installation.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.55 15663

@1@: database system initialization failed

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.56 15664

@1@: another server might be running; trying to start server anyway

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.57 15666

@1@: could not start server Examine the log output.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.58 15667

@1@: could not wait for server because of misconfiguration

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.59 15668

@1@: PID file "@2@" does not exist

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.60 15669

Is server running?

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.61 15670

@1@: cannot stop server; single-user server is running (PID: @2@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.53.62 15671

@1@: could not send stop signal (PID: @2@): @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.63 15673

@1@: server does not shut down

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.64 15674

@1@: cannot restart server; single-user server is running (PID: @2@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.65 15675

@1@: old server process (PID: @2@) seems to be gone

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.66 15676
@1@: cannot reload server; single-user server is running (PID: @2@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.67 15677

@1@: could not send reload signal (PID: @2@): @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.68 15678

@1@: cannot promote server; single-user server is running (PID: @2@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.69 15679

@1@: cannot promote server; server is not in standby mode

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

@1@: could not allocate SIDs: error code @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.86 15697

@1@: could not create restricted token: error code @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.53.87 15699
@1@: unrecognized shutdown mode "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54 Message Numbers Beginning with 15700

2.54.1 15700

@1@: unrecognized signal name "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.2 15701

@1@: unrecognized start type "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.3 15702

@1@: could not determine the data directory using command "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.54.4 15703

@1@: -S option not supported on this platform

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.5 15704

@1@: too many command-line arguments (first is "@2@")

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.6 15705

@1@: missing arguments for kill mode

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.7 15706

@1@: unrecognized operation mode "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.8 15707
@1@: no operation specified

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.9 15708

child process exited with unrecognized status @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.10 15709

failed sanity check, parent OID @1@ of table "@2@" (OID @3@) not found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.11 15710

could not parse numeric array "@1@": too many numbers

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.12 15711

could not parse numeric array "@1@": invalid character in number
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.54.13 15712

invalid compression code: @1@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.54.14 15713

not built with zlib support

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.54.15 15714

could not initialize compression library: @1@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.54.16 15715

could not close compression stream: @1@

An error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.54.17 15716

could not compress data: @1@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.54.18 15718

could not uncompress data: @1@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.54.19 15719

could not close compression library: @1@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.54.20 15720

cannot duplicate null pointer (internal error)

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.54.21 15721

@1@: unrecognized section name: "@2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.22 15722

out of on_exit_nicely slots

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.23 15723

could not close output file: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.24 15725

unexpected section code @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.54.25 15726

text

parallel restore is not supported with this archive file format

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.26 15727

text

parallel restore is not supported with archives made by pre-8.0 pg_dump

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.27 15728

text

cannot restore from compressed archive (compression not supported in this installation)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.28 15729

text

connecting to database for restore

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.54.29 15730
direct database connections are not supported in pre-1.3 archives

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.30 15731

warning from original dump file: @1@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.54.31 15732

internal error -- WriteData cannot be called outside the context of a DataDumper routine

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.32 15733

large-object output not supported in chosen format

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.33 15734

restored @1@ large object
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.54.34 15736**

*could not create large object @1@: @2@*

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

**2.54.35 15737**

*could not open large object @1@: @2@*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.54.36 15738**

*could not open TOC file "@1@": @2@*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.54.37 15740**

*could not find entry for ID @1@*

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.38 15741

could not close TOC file: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.39 15742

could not open output file "@1@": @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.40 15743

could not open output file: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.41 15744

wrote @1@ byte of large object data (result = @2@)
[Description]
Terminated normally.

[System Processing]
Continues processing.
[Action]
No action required.

2.54.42 15746

could not write to large object (result: @1@, expected: @2@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.43 15748

Error while INITIALIZING:

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.44 15749

Error while PROCESSING TOC:

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.45 15750

Error while FINALIZING:

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.54.46 15751

Error from TOC entry @1@; @2@ @3@ @4@ @5@ @6@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.47 15752

bad dumpId

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.48 15753

bad table dumpId for TABLE DATA item

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.49 15754

unexpected data offset flag @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.50 15755
file offset in dump file is too large

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.51 15757

directory name too long: "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.52 15758

directory "@1@" does not appear to be a valid archive ("toc.dat" does not exist)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.53 15759

could not open input file "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.54 15760

could not open input file: @1@

could not set default_tablespace to @1@: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.71 15779

- 948 -
did not find magic string in file header

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.72 15780

unsupported version (@1@.@2@) in file header

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.73 15781

sanity check on integer size (@1@) failed

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.74 15783

expected format (@1@) differs from format found in file (@2@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.75 15786

a worker process died unexpectedly
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.54.76 15787**

*processing missed item @1@ @2@ @3@*

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.54.77 15789**

*could not create worker process: @1@*

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.54.78 15791**

*no item ready*

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.54.79 15792**

*could not find slot of finished worker*

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.54.80 15793
worker process failed: exit code @1@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.81 15794
transferring dependency @1@ -> @2@ to @3@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.82 15795
table "@1@" could not be created, will not restore its data
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.83 15796
invalid OID for large object
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.84 15797

unrecognized data block type (@1@) while searching archive
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.85 15798

error during file seek: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.54.86 15799

could not find block ID @1@ in archive -- possibly due to out-of-order restore request, which cannot be handled due to lack of data offsets in archive
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55 Message Numbers Beginning with 15800

2.55.1 15800

could not find block ID @1@ in archive -- possibly due to out-of-order restore request, which cannot be handled due to non-seekable input file
[Description]
An error occurred.
2.55.2 15801

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

---

2.55.3 15802

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

---

2.55.4 15803

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

---

2.55.5 15804

**Description**
An error occurred.

**System Processing**
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.6 15805
could not read from input file: @1@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.7 15807
could not close archive file: @1@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.8 15808
can only reopen input archives
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.9 15809
parallel restore from standard input is not supported
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.55.10 15810

**parallel restore from non-seekable file is not supported**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.11 15811

could not determine seek position in archive file: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.12 15812

could not set seek position in archive file: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.13 15814

@1@: could not parse server version "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.14 15815
could not get server_version from libpq

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.15 15816

aborting because of server version mismatch

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.16 15817

failed to reconnect to database

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.17 15818

could not reconnect to database: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.18 15819

connection needs password
2.55.19 15820

already connected to a database

2.55.20 15821

failed to connect to database

2.55.21 15822

connection to database "@1@" failed: @2@

2.55.22 15823

query failed: @1@
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.23 15824

query was: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.24 15825

@1@: @2@ Command was: @3@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.25 15826

could not execute query
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.26 15827

error returned by PQputCopyData: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.55.27 15828

error returned by PQputCopyEnd: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.28 15829

COPY failed for table "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.29 15830

could not start database transaction

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.30 15831

could not commit database transaction

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.55.31 15832

no output directory specified

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.32 15833

could not create directory "/@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.33 15834

could not close data file: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.34 15835

could not open large object TOC file "/@1@" for input: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.35 15836
invalid line in large object TOC file "@1@": "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.36 15837

error reading large object TOC file "@1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.37 15838

could not close large object TOC file "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.38 15840

could not write to blobs TOC file

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.39 15841

file name too long: "@1@"
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.55.40 15842

**this format cannot be read**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.55.41 15843

**could not open TOC file "@1@" for output: @2@**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.55.42 15844

**could not open TOC file for output: @1@**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.55.43 15845

**compression is not supported by tar archive format**

An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.44 15846

could not open TOC file "@1@" for input: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.45 15847

could not open TOC file for input: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.46 15848

could not find file "@1@" in archive

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.47 15849

could not generate temporary file name: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.55.48 15850
could not open temporary file
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.49 15851
could not close tar member
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.50 15852
internal error -- neither th nor fh specified in tarReadRaw()
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.51 15856
invalid OID for large object (@1@)
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.55.52 15858

could not close temporary file: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.53 15859

actual file length (@1@) does not match expected (@2@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.54 15861

could not find header for file "@1@" in tar archive

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.55 15862

skipping tar member @1@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.55.56 15863

restoring data out of order is not supported in this archive format: "@1@" is required, but comes before "@2@" in the archive file.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.57 15864

incomplete tar header found (@1@ byte)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.58 15866

TOC Entry @1@ at @2@ (length @3@, checksum @4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.59 15867

corrupt tar header found in @1@ (expected @2@, computed @3@) file position @4@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.55.60 15868
@1@: too many command-line arguments (first is "@2@")

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.61 15870
no matching schemas were found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.62 15871
no matching tables were found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.63 15872
invalid client encoding "@1@" specified

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.64 15873
invalid output format "@1@" specified

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.65 15874

server version must be at least 7.3 to use schema selection switches

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.66 15875
dumping contents of table "@1@.@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.67 15876

Dumping the contents of table "@1@" failed: PQgetCopyData() failed.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.68 15877

Dumping the contents of table "@1@" failed: PQgetResult() failed.
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

2.55.69 15878

**error reading large object @1@: @2@**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

2.55.70 15879

**could not find parent extension for @1@**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

2.55.71 15881

**schema with OID @1@ does not exist**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

2.55.72 15889

**failed sanity check, parent table OID @1@ of pg_rewrite entry OID @2@ not found**

An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.73 15890

query produced null referenced table name for foreign key trigger "@1@" on table "@2@" (OID of table: @3@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.74 15891

invalid column numbering in table "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.75 15892

invalid adnum value @1@ for table "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.55.76 15893

expected @1@ check constraint on table "@2@" but found @3@

[Description]
An error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.55.77 15895

(The system catalogs might be corrupted.)

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.56 Message Numbers Beginning with 15900

2.56.1 15902

unrecognized provolatile value for function "@1@"

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.56.2 15907

could not parse default ACL list (@1@)

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.56.3 15908

could not parse GRANT ACL list (@1@) or REVOKE ACL list (@2@) for object "@3@" (@4@)

[Description]
  An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.4 15909

query to obtain definition of view "@1@" returned no data

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.5 15910

query to obtain definition of view "@1@" returned more than one definition

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.6 15911

definition of view "@1@" appears to be empty (length zero)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.7 15912

invalid column number @1@ for table "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.8 15913

missing index for constraint "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.9 15914

unrecognized constraint type: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.10 15915

query to get data of sequence "@1@" returned @2@ row (expected 1)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.11 15917

query to get data of sequence "@1@" returned name "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.56.12 15918

unexpected tgtype value: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.13 15919

invalid argument string (@1@) for trigger "@2@" on table "@3@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.14 15920

query to get rule "@1@" for table "@2@" failed: wrong number of rows returned

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.15 15921

query returned @1@ row instead of one: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
Invalid dumpID @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.17 15924

Invalid dependency @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.18 15925

Could not identify dependency loop

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.19 15927

The program "pg_dump" is needed by @1@ but was not found in the same directory as "@2@". Check your installation.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.20 15928
The program "pg_dump" was found by "@1@" but was not the same version as @2@. Check your installation.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.21 15929

@1@: could not connect to database "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.22 15930

@1@: could not connect to databases "postgres" or "template1" Please specify an alternative database.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.23 15931

@1@: could not open the output file "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.24 15932
@1@: could not parse ACL list (@2@) for tablespace "@3@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.25 15933

@1@: could not parse ACL list (@2@) for database "@3@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.26 15934

@1@: pg_dump failed on database "@2@", exiting

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.27 15935

@1@: could not re-open the output file "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.28 15936

@1@: running "@2@"
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.29 15937

@1@: could not connect to database "@2@": @3@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.30 15938

@1@: could not get server version

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.31 15941

@1@: executing @2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.32 15942

@1@: query failed: @2@

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.33 15943

@1@: query was: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.34 15944

unrecognized archive format "@1@"; please specify "c", "d", or "t"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.35 15946

@1@: invalid argument for option @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.36 15947

@1@: transaction ID epoch (-e) must not be -1

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.37 15949

@1@: transaction ID (-x) must not be 0
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.38 15951

@1@: OID (-o) must not be 0
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.39 15953

@1@: multitransaction ID (-m) must not be 0
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.40 15955

@1@: multitransaction offset (-O) must not be -1
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.56.41 15957

@1@: no data directory specified

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.42 15958

@1@: cannot be executed by "root"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.43 15959

@1@: could not change directory to "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.44 15960

@1@: could not open file "@2@" for reading: @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.45 15961
If these values seem acceptable, use -f to force reset.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.46 15962

Transaction log reset
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.47 15963

@1@: could not read file "@2@": @3@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.48 15964

@1@: pg_control exists but has invalid CRC; proceed with caution
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.49 15965

@1@: pg_control exists but is broken or unknown version; ignoring it
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.50 15966

@1@: internal error -- sizeof(ControlFileData) is too large ... fix PG_CONTROL_SIZE

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.51 15967

@1@: could not create pg_control file: @2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.52 15968

@1@: could not write pg_control file: @2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

@1@: fsync error: @2@

An error occurred.
2.56.54 15970

@1@: could not open directory "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.55 15971

@1@: could not read directory "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.56 15972

@1@: could not delete file "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.57 15973

@1@: could not open file "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.58 15974

@1@: could not write file "@2@": @3@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.59 15975

could not create directory "@1@": @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.60 15976

could not open directory "@1@": @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.61 15977

could not stat file "@1@": @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.56.62 15978

could not read symbolic link "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.63 15979

could not create symbolic link "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.64 15980

out of memory

[Description]
There was insufficient free space in the server’s memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.56.65 15981

could not open file "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.56.66 15982

could not create file "@1@": @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.67 15983

could not read file "@1@": @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.68 15984

could not write to file "@1@": @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.69 15985

could not fsync file "@1@": @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.70 15986
could not close file "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.71 15987

@1@: could not find own program executable

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.72 15988

@1@: invalid checkpoint argument "@2@", must be "fast" or "spread"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.73 15989

@1@: invalid argument @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.74 15990

@1@: option @2@ conflicts with option @3@
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.75 15991

The configured database storage directory differs from the data_directory parameter

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.76 15992

An invalid value was specified for the option -@2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.77 15993

Backup data "@2@" is lost

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.56.78 15994

Cannot be run as root

An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.79 15995

@1@: invalid option --@2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.80 15996

@1@: invalid option -@2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.81 15997

@1@: backup of the database has not yet been performed, or an incorrect backup storage directory was specified

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.82 15998

@1@: the database storage directory and the $PGDATA environment variable have not been specified

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.56.83 15999

@1@: option @2@ is necessary for option @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57 Message Numbers Beginning with16000

2.57.1 16000

@1@: the requested recovery point is earlier than the date and time that the backup finished

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.2 16001

@1@: the specified backup does not exist

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.3 16002

@1@: the directory "@2@" for the tablespace with OID "@3@" does not exist

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.4 16003

@1@: the specified backup storage directory "@2@" is not correct

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.5 16004

@1@: the specified database storage directory is not correct

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.6 16005

@1@: the token in the file "pg_hba.conf" is too long and will be skipped: "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.7 16006

the directory "@1@" for storing WAL does not exist

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.57.8 16007

@1@: "@2@" is being executed by another user
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.9 16008

@1@: the "@2@" parameter was not found
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.10 16009

@1@: could not find the configuration file "@2@"
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.11 16010

@1@: could not open the configuration file "@2@": maximum nesting depth exceeded
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.57.12 16011

@1@: the PID file "@2@" does not exist

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.13 16012

@1@: the server is running

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.14 16013

@1@: the server is not running

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.15 16014

@1@: caught signal @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.16 16015
@1@: failed to build the absolute path "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.17 16016

@1@: failed to check the completion of archiving WAL files

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.18 16017

@1@: failed to connect to the database

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.19 16018

@1@: failed to get the database OID : @2@ (@3@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.20 16019

@1@: failed to remove old backup data
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.21 16020

@1@: failed to restore the database storage directory "@2@"

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.22 16021

@1@: failed to restore the tablespace directory "@2@"

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.23 16022

@1@: retried backup @2@ times, but failed

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.24 16023

@1@: SQL command failed (@2@)

An error occurred.
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.25 16024

@1@: the database with OID @2@ was created during backup
[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.26 16025

@1@: backup control function "@2@" failed
[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.27 16026

@1@: command failed: "@2@
[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.28 16027

@1@: could not close the file "@2@": @3@ (errno=@4@)
[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.29 16028
@1@: could not close the PID file "@2@": @3@ (errno=@4@)
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.30 16029
@1@: could not create the directory "@2@": @3@ (errno=@4@)
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.31 16030
@1@: could not create the file "@2@": @3@ (errno=@4@)
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.32 16031
@1@: could not create the PID file "@2@": @3@ (errno=@4@)
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.57.33 16032

@1@: could not create the symbolic link "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.34 16033

@1@: could not identify the current directory: @2@ (errno=@3@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.35 16034

@1@: could not open the directory "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.36 16035

@1@: could not open the file "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.37 16036
@1@: could not open the PID file "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.38 16037

@1@: could not read the file "@2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.39 16038

@1@: could not read the PID file "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.40 16039

@1@: could not read the symbolic link "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.41 16040

@1@: could not remove the file "@2@": @3@ (errno=@4@)
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.42 16041

@1@: could not remove the PID file "@2@": @3@ (errno=@4@)

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.43 16042

@1@: could not rename the directory "@2@" to "@3@"

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.44 16043

@1@: could not rename the file "@2@" to "@3@": @4@ (errno=@5@)

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.45 16044

@1@: could not write the file "@2@": @3@ (errno=@4@)

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.46 16045

@1@: could not write the PID file "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.47 16046

@1@: failed to find the internal file "@2@"

[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.48 16047

@1@: failed to parse the internal file "@2@"

[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.49 16048

@1@: failed to parse the internal file: "@2@" (@3@)

[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.50 16049

@1@: failed to parse the configuration file “@2@”

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.51 16050

@1@: failed to remove archived transaction log files

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.52 16051

@1@: failed to replace the contents of the pg_xlog directory

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.53 16052

@1@: failed to restore the configuration files

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.57.54 16053

@1@: invalid data in the PID file "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.55 16054

@1@: out of memory

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.57.56 16055

@1@: cannot find the server process (PID: @2@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.57 16056

@1@: an error occurred during recovery

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.57.58 16057

@1@: could not remove the directory "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.59 16058

@1@: target "@2@" mismatch (internal error)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.60 16059

the program "@1@" is needed by @2@ but was not found in the same directory as "@3@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.61 16060

the program "@1@" was found in "@2@" but was not the same version as @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.62 16061
@1@: failed to get port number (internal error)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.63 16062

backup of configuration files completed successfully

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.57.64 16063

backup of database and configuration files completed successfully

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.57.65 16064

Confirm that the specified directory is correct. If it is correct, the backup data may be corrupted. Copy the backup data to the backup storage directory from backup media.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.66 16065

Check the installation.
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.67 16066

Continue the backup.

Terminated normally.

Continues processing.

No action required.

2.57.68 16067

Create an empty directory "@1@" on which the database administrator has full permissions, and retry.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.69 16068

Create an empty directory "@1@" on which the database administrator has full permissions.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.70 16069

Recover the corrupt resource.
2.57.71 16070

Is the server running?

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.72 16071

Please check whether the backup data exists or is not in the backup storage directory.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.73 16072

Please decrease the length of the path and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.74 16073

Please decrease the number of digits and retry.

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.57.75 16074**

Please log in as the user that owns the server process.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.57.76 16075**

Please remove the cause of the error, and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.57.77 16076**

Please set the database storage directory "@1@" to -D option, and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.57.78 16077**

Please set the recovery point to be after the date and time that the backup finished, and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.79 16078

Please set the backup storage directory to the 'backup_destination' parameter and restart the server.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.80 16079

Please specify the database storage directory as "@1@" and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.81 16080

Please specify the database storage directory correctly and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.82 16081

Please specify the port number correctly and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.83 16082

Please specify an integer greater than 0, and try again.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.84 16083

Please specify an integer greater than 0, or the 'all' keyword, and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.85 16084

Please specify an integer greater than or equal to 0, and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.86 16085

Please specify the backup storage directory correctly and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.57.87 16086

Please specify the time stamp using the correct length and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.88 16087

Please start the server and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.89 16088

Please stop the server and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.90 16089

Please wait for a short period and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.91 16090
Recovery of database completed successfully.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.92 16091

Retrying backup. (@1@ times).

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.93 16092

Specify the backup storage directory with the -B option, and retry.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.94 16093

Refer to "@1@ --help" for more information.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.95 16094

Retry after the other process terminates.
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.96 16095

Failed to identify backup data.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.97 16096

restore point name is too long (maximum @1@ bytes)

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.98 16097

Try "@1@ --help" for more information.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.57.99 16098

@1@: keystore location is not specified

An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.57.100 16099

@1@: too many command-line arguments (first is "@2@")
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58 Message Numbers Beginning with 16100

2.58.1 16100

@1@: no operation is specified
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.2 16101

@1@: could not open file "@2@": @3@ (errno=@4@)
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.3 16102

@1@: could not read file "@2@": @3@ (errno=@4@)
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.4 16103

@1@: keystore "@2@" is corrupted: size = @3@ bytes, expected size = @4@ bytes

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.5 16104

@1@: file "@2@" is not a keystore

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.6 16105

@1@: key is too long

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.7 16106

@1@: key is wrong

An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.8 16107

@1@: passphrase-based key derivation failed: @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.9 16108

@1@: decryption of the keystore failed: @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.10 16109

@1@: decryption of the keystore failed: passphrase is wrong
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.11 16110

@1@: keystore "@2@" is corrupted: invalid CRC
[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.12 16111
@1@: encryption of the keystore failed: error code = @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.13 16112
@1@: encryption of the keystore failed: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.14 16113
@1@: could not create file "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.15 16114
@1@: could not write file "@2@": @3@ (errno=@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.58.16 16115

**child process exited with unrecognized status @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.17 16116

**Invalid command \@1@. Try \? for help.**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.18 16117

**invalid command \@1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.19 16118

**\@1@: extra argument "@2@" ignored**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.20 16119
could not get home directory for user ID @1@: @2@

[Description]
 An error occurred.

[System Processing]
 Processing will be aborted.

[Action]
 To investigate the cause of the occurrence from the message, and remove cause.

2.58.21 16120

\@1@: could not change directory to "@2@": @3@

[Description]
 An error occurred.

[System Processing]
 Processing will be aborted.

[Action]
 To investigate the cause of the occurrence from the message, and remove cause.

2.58.22 16121

You are currently not connected to a database.

[Description]
 An error occurred.

[System Processing]
 Processing will be aborted.

[Action]
 To investigate the cause of the occurrence from the message, and remove cause.

2.58.23 16122

no query buffer

[Description]
 An error occurred.

[System Processing]
 Processing will be aborted.

[Action]
 To investigate the cause of the occurrence from the message, and remove cause.

2.58.24 16123

@1@: invalid encoding name or conversion procedure not found
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.25 16124

\@1@: missing required argument

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.26 16125

Passwords didn’t match.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.27 16126

Password encryption failed.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.28 16127

\@1@: error while setting variable

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.29 16128

out of memory

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.30 16129

\@1@: environment variable name must not contain "="

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.31 16130

The server (version \@1@) does not support showing function source.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.58.32 16131

function name is required

An error occurred.

Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.58.33 16132

@1@: @2@

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.58.34 16137

environment variable PSQL_EDITOR_LINENUMBER_ARG must be set to specify a line number

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.58.35 16138

could not start editor "@1@"

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.58.36 16139

could not start /bin/sh

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.37 16140
could not locate temporary directory: @1@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.38 16141
could not open temporary file "@1@": @2@
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.39 16142
\pset: allowed formats are unaligned, aligned, wrapped, html, asciidoc, latex, latex-longtable, troff-ms
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.40 16143
\pset: allowed line styles are ascii, old-ascii, unicode
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

**2.58.41 16144**

\pset unknown option: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.58.42 16145**

**: failed**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.58.43 16146**

cannot duplicate null pointer (internal error)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.58.44 16147**

connection to server was lost

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.58.45 16148

**Failed.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.58.46 16149

**unexpected PQresultStatus: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.47 16150

**The server (version @1@) does not support savepoints for ON_ERROR_ROLLBACK.**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.48 16151

**unexpected transaction status (@1@)**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.49 16152
\copy: arguments required

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.50 16153

\copy: parse error at "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.51 16154

\copy: parse error at end of line

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.52 16155

@1@: cannot copy from/to a directory

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.53 16156

could not write COPY data: @1@
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.54 16158

Enter data to be copied followed by a newline. End with a backslash and a period on a line by itself.  

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.55 16159

aborted because of read failure

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.56 16160

The server (version @1@) does not support tablespaces.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.57 16161

\(\text{df only takes [antwS+] as options}\)
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.58 16162

`\df does not take a "w" option with server version @1@`

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.59 16163

The server (version @1@) does not support altering default privileges.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.60 16164

Did not find any relation named "@1@".

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.61 16165

Did not find any relation with OID @1@.

[Description]
An error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.58.62 16166

**No per-database role settings support in this server version.**

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.58.63 16167

**No matching settings found.**

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.58.64 16168

**No settings found.**

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.58.65 16169

**No matching relations found.**

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.58.66 16170

No relations found.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.67 16171

The server (version @1@) does not support collations.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.68 16172

The server (version @1@) does not support full text search.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.69 16173

Did not find any text search configuration named "@1@".

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.58.70 16174

The server (version @1@) does not support foreign-data wrappers.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.71 16175

The server (version @1@) does not support foreign servers.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.72 16176

The server (version @1@) does not support user mappings.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.73 16177

The server (version @1@) does not support foreign tables.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.74 16178
The server (version \texttt{1}) does not support extensions.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

\textbf{2.58.75 16179}

Did not find any extension named "\texttt{1}".

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

\textbf{2.58.76 16180}

Did not find any extensions.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

\textbf{2.58.77 16181}

user name lookup failure: error code \texttt{1}

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

\textbf{2.58.78 16182}

could not read from input file: \texttt{1}
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.58.79 16183**

*could not save history to file "@1@": @2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.58.80 16184**

*history is not supported by this installation*

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.58.81 16185**

*@1@: not connected to a database*

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.58.82 16186**

*@1@: current transaction is aborted*

An error occurred.
[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.58.83 16187

@1@: unknown transaction status

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.58.84 16188

Cannot add header to table content: column count of @1@ exceeded.

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.58.85 16189

Cannot add cell to table content: total cell count of @1@ exceeded.

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.58.86 16190

invalid output format (internal error): @1@

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.58.87 16191

skipping recursive expansion of variable "@1@"

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.58.88 16192

unterminated quoted string

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.58.89 16193

@1@: out of memory

[Description]
   There was insufficient free space in the server’s memory during execution of the application.

[System Processing]
   Processing will be aborted.

[Action]
   Estimate memory usage and take the following action:
   - If the number of simultaneous connections from client applications is high, reduce it.
   - If the number of simultaneous SQL executions is high, reduce it.

2.58.90 16194

cannot escape without active connection

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.91 16195

@1@: could not open log file "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.92 16196

@1@: could not set printing parameter "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.93 16197

@1@: could not delete variable "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.58.94 16198

@1@: could not set variable "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.58.95 16199

@1@: warning: extra command-line argument "@2@" ignored

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59 Message Numbers Beginning with 16200

2.59.1 16200

tab completion query failed: @1@Query was:@2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.2 16201

unrecognized value "@1@" for "@2@"; assuming "@3@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.3 16202

Try "@1@ --help" for more information.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.59.4 16203
@1@: too many command-line arguments (first is "@2@")

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.5 16204
@1@: cannot cluster all databases and a specific one at the same time

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.6 16205
@1@: cannot cluster specific table(s) in all databases

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.7 16206
@1@: clustering of table "@2@" in database "@3@" failed: @4@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.8 16207
@1@: clustering of database "@2@" failed: @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.9 16208

@1@: clustering database "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.10 16213

@1@: could not connect to database @2@: @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.11 16214

@1@: query failed: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.12 16215

cannot duplicate null pointer (internal error)
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.59.13 16216

out of memory

There was insufficient free space in the server's memory during execution of the application.

Processing will be aborted.

Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.59.14 16217

Cancel request sent

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.59.15 16218

Could not send cancel request: @1@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.59.16 16219

@1@: only one of --locale and --lc-ctype can be specified
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.17 16220

@1@: only one of --locale and --lc-collate can be specified

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.18 16221

@1@: "/@2@/" is not a valid encoding name

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.19 16222

@1@: database creation failed: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.20 16223

@1@: comment creation failed (database was created): @2@

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.21 16224

Procedural Languages
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.22 16225

@1@: missing required argument language name
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.23 16226

@1@: language "@2@" is already installed in database "@3@"
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.24 16227

@1@: language installation failed: @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.25 16228

**Passwords didn't match.**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.26 16229

**Password encryption failed.**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.27 16230

@1@: creation of new role failed: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.28 16231

@1@: missing required argument database name

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
Database "@1@" will be permanently removed.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

@1@: database removal failed: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

@1@: language "@2@" is not installed in database "@3@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

@1@: language removal failed: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

@1@: language removal failed: @2@
@1@: missing required argument role name

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.34 16237

Role "@1@" will be permanently removed.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.35 16238

@1@: removal of role "@2@" failed: @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.36 16239

@1@: cannot reindex all databases and a specific one at the same time

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.37 16240

@1@: cannot reindex all databases and system catalogs at the same time
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.38 16241
@1@: cannot reindex specific table(s) in all databases

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.39 16242
@1@: cannot reindex specific index(es) in all databases

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.40 16243
@1@: cannot reindex specific table(s) and system catalogs at the same time

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.41 16244
@1@: cannot reindex specific index(es) and system catalogs at the same time

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.42 16245
@1@: reindexing of table "@2@" in database "@3@" failed: @4@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.43 16246
@1@: reindexing of index "@2@" in database "@3@" failed: @4@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.44 16247
@1@: reindexing of database "@2@" failed: @3@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.45 16248
@1@: reindexing database "@2@"
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

### 2.59.46 16249

@1@: reindexing of system catalogs failed: @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

### 2.59.47 16250

@1@: cannot use the "@2@" option when performing only analyze

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

### 2.59.48 16252

@1@: cannot vacuum all databases and a specific one at the same time

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

### 2.59.49 16253

@1@: cannot vacuum specific table(s) in all databases

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.59.50 16254

@1@: vacuuming of table "@2@" in database "@3@" failed: @4@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.51 16255

@1@: vacuuming of database "@2@" failed: @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.52 16256

SQL error: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.53 16257

variable "@1@" must have a numeric type

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.54 16258
descriptor "@1@" does not exist

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.55 16259

descriptor header item "@1@" does not exist

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.56 16260

nullable is always 1

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.57 16261

key_member is always 0

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.58 16262

descriptor item "@1@" is not implemented
### An error occurred.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

#### 2.59.59 16263

**descriptor item "@1@" cannot be set**

**Description**

An error occurred.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

#### 2.59.60 16264

**@1@: could not open file "@2@": @3@**

**Description**

An error occurred.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

#### 2.59.61 16265

**Try "@1@ --help" for more information.**

**Description**

An error occurred.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

#### 2.59.62 16266

**@1@: parser debug support (-d) not available**

**Description**

An error occurred.
[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.59.63 16268

@1@: no input files specified

[Description]
    An error occurred.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.59.64 16269

cursor "@1@" has been declared but not opened

[Description]
    An error occurred.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.59.65 16270

could not remove output file "@1@"

[Description]
    An error occurred.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.59.66 16272

invalid bit string literal

[Description]
    An error occurred.

[System Processing]
    Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.59.67 16273

**unterminated bit string literal**

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

2.59.68 16274

**unterminated hexadecimal string literal**

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

2.59.69 16275

**unterminated quoted string**

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

2.59.70 16276

**zero-length delimited identifier**

**Description**
An error occurred.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.
2.59.71 16277

untreated quoted identifier

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.72 16278

missing identifier in EXEC SQL UNDEF command

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.73 16279

missing matching "EXEC SQL IFDEF" / "EXEC SQL IFNDEF"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.74 16280

missing "EXEC SQL ENDF;"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.75 16281
more than one EXEC SQL ELSE
[Description]
   An error occurred.
[System Processing]
   Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.59.76 16282

unmatched EXEC SQL ENDIF
[Description]
   An error occurred.
[System Processing]
   Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.59.77 16283

too many nested EXEC SQL IFDEF conditions
[Description]
   An error occurred.
[System Processing]
   Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.59.78 16284

missing identifier in EXEC SQL IFDEF command
[Description]
   An error occurred.
[System Processing]
   Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.59.79 16285

missing identifier in EXEC SQL DEFINE command
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.59.80 16286

**syntax error in EXEC SQL INCLUDE command**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.59.81 16287

**internal error: unreachable state; If the cause of errors cannot be found, contact the Fujitsu Systems Engineer (SE).**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause. If the cause of errors cannot be found, contact the Fujitsu Systems Engineer (SE).

2.59.82 16288

**Error: include path "@1@/@2@" is too long on line @3@, skipping**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.59.83 16289

**could not open include file "@1@" on line @2@**
2.59.84 16290

cursor "@1@" does not exist

2.59.85 16291

initializer not allowed in type definition

2.59.86 16292

type name "string" is reserved in Informix mode

2.59.87 16293

type "@1@" is already defined
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.88 16294

**multidimensional arrays for simple data types are not supported**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.89 16295

**AT option not allowed in CLOSE DATABASE statement**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.90 16296

**AT option not allowed in CONNECT statement**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.91 16297

**AT option not allowed in DISCONNECT statement**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.92 16298

AT option not allowed in SET CONNECTION statement

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.59.93 16299

AT option not allowed in TYPE statement

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60 Message Numbers Beginning with 16300

2.60.1 16300

AT option not allowed in VAR statement

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.2 16301

AT option not allowed in WHENEVER statement

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.60.3 16302  
**unsupported feature will be passed to server**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.4 16303  
**SHOW ALL is not implemented**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.5 16304  
**COPY FROM STDIN is not implemented**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.6 16308  
**using variable "@1@" in different declare statements is not supported**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.60.7 16309

cursor "@1@" is already defined

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.8 16310

no longer supported LIMIT #,# syntax passed to server

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.9 16311

subquery in FROM must have an alias

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.10 16312

CREATE TABLE AS cannot specify INTO

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.11 16313
expected "@", found "@1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.12 16314

only protocols "tcp" and "unix" and database type "postgresql" are supported

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.13 16315

expected "://", found "@1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.14 16316

Unix-domain sockets only work on "localhost" but not on "@1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.15 16317

expected "postgresql", found "@1@"
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.60.16 16318**

*invalid connection type: @1@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.60.17 16319**

*expected "@" or ":/", found "@1@"

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.60.18 16320**

*invalid data type

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.60.19 16321**

*incomplete statement

An error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.60.20 16322

unrecognized token "@1@"

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.60.21 16323

only data types numeric and decimal have precision/scale argument

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.60.22 16324

interval specification not allowed here

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.60.23 16325

too many levels in nested structure/union definition

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.
[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.60.24 16326

pointers to varchar are not implemented
[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.60.25 16327

using unsupported DESCRIBE statement
[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.60.26 16328

initializer not allowed in EXEC SQL VAR command
[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.60.27 16329

arrays of indicators are not allowed on input
[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.
2.60.28 16330

@1@ at or near "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.29 16331

out of memory

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.60.30 16332

unrecognized variable type code @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.31 16333

variable "@1@" is hidden by a local variable of a different type

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
variable "@1@" is hidden by a local variable

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

indicator variable "@1@" is hidden by a local variable of a different type

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

indicator variable "@1@" is hidden by a local variable

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

indicator for array/pointer has to be array/pointer

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.36 16338
nested arrays are not supported (except strings)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.37 16339

indicator for struct has to be a struct

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.38 16340

indicator for simple data type has to be simple

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.39 16341

unrecognized descriptor item code @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.40 16342

incorrectly formed variable "@1@"
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.41 16343

variable "@1@" is not a pointer

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.42 16344

variable "@1@" is not a pointer to a structure or a union

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.43 16345

variable "@1@" is neither a structure nor a union

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.44 16346

variable "@1@" is not an array

An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.49 16351

*multilevel pointers (more than 2 levels) are not supported; found @1@ level*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.50 16353

*pointer to pointer is not supported for this data type*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.51 16354

*multidimensional arrays for structures are not supported*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.52 16355

*invalid URI propagated to internal parser routine: "@1@"*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
end of string reached when looking for matching "}" in IPv6 host address in URI: "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

IPv6 host address may not be empty in URI: "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

unexpected character "@1@" at position @2@ in URI (expected ";" or "/"): "@3@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

extra key/value separator "=" in URI query parameter: "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
missing key/value separator "=" in URI query parameter: "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.58 16361

invalid URI query parameter: "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.59 16362

invalid percent-encoded token: "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.60 16363

forbidden value @1@00 in percent-encoded value: "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.61 16364

insufficient data in "T" message
An error occurred.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.62 16365

e XAlternatively in "T" message

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.63 16366

insufficient data in "D" message

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.64 16367

e XAlternatively in "D" message

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.65 16368

at character @1@

An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.66 16369

unrecognized socket error: 0x@1@/@2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.67 16370

If true, trusted and untrusted Perl code will be compiled in strict mode.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.68 16371

Perl initialization code to execute when a Perl interpreter is initialized.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.69 16372

Perl initialization code to execute once when plperl is first used.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.60.70 16373

Perl initialization code to execute once when plperlu is first used.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.71 16374

duplicate declaration

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.72 16375

diagnostics item @1@ is not allowed in GET STACKED DIAGNOSTICS

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.73 16376

diagnostics item @1@ is not allowed in GET CURRENT DIAGNOSTICS

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.60.74 16377

unrecognized GET DIAGNOSTICS item

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.75 16378

unexpected end of function definition

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.76 16379

syntax error

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.77 16380

invalid SQLSTATE code

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.78 16381
syntax error, expected "FOR"
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.60.79 16382

mismatched parentheses
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.60.80 16383

missing expression
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.60.81 16384

missing SQL statement
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.60.82 16385

incomplete data type declaration

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.83 16386

missing data type declaration

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.84 16387

INTO specified more than once

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.85 16388

expected FROM or IN

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.86 16389

cursor "@1@" has no argument named "@2@"

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.87 16390

value for parameter "@1@" of cursor "@2@" specified more than once

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.88 16391

unrecognized RAISE statement option

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.89 16392

syntax error, expected "="

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.60.90 16393

during initialization of execution state

An error occurred.

Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.60.91 16394

while storing call arguments into local variables

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.92 16395
during function entry

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.93 16396
while casting return value to function’s return type

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.60.94 16397
returned record type does not match expected record type

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.60.95 16398

during function exit
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.60.96 16399

returned row structure does not match the structure of the triggering table
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61 Message Numbers Beginning with 16400

2.61.1 16400

during statement block local variable initialization
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61.2 16401

during statement block entry
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.
2.61.3 16402

during statement block exit

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.4 16403

during exception cleanup

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.5 16404

structure of query does not match function result type

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.6 16405

query "@1@" returned @2@ column
query "@3@" returned @4@ columns

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.61.7 16406

Sets handling of conflicts between PL/pgSQL variable names and table column names.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.8 16407

plpy.cursor expected a query or a plan

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.9 16408

plpy.cursor takes a sequence as its second argument

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.10 16409

could not execute plan

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.11 16410
2.61.12 16412

iterating a closed cursor

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.13 16413

iterating a cursor in an aborted subtransaction

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.14 16414

fetch from a closed cursor

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.15 16415

closing a cursor in an aborted subtransaction
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.61.16 16416

**error fetching next item from iterator**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.61.17 16417

**PyList_SetItem() failed, while setting up arguments**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.61.18 16418

**PyDict_SetItemString() failed, while setting up arguments**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.61.19 16419

**could not create new dictionary while building trigger arguments**

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.61.20 16420

untrapped error in initialization

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.61.21 16421

could not import "__main__" module

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.61.22 16422

could not create globals

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.61.23 16423

plan.status takes no arguments

An error occurred.

Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.24 16424

could not import "plpy" module
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.25 16425

could not add the spiexceptions module
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.26 16427

could not generate SPI exceptions
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.27 16428

could not unpack arguments in plpy.elog
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.61.28 16429

could not parse error message in plpy.elog

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.29 16430

could not compile PL/Python function "@1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.30 16431

could not compile anonymous PL/Python code block

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.31 16432

command did not produce a result set

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.32 16433
second argument of plpy.prepare must be a sequence
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61.33 16434

plpy.execute expected a query or a plan
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61.34 16435

plpy.execute takes a sequence as its second argument
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61.35 16437

this subtransaction has already been entered
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61.36 16438

this subtransaction has already been exited
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.37 16439

this subtransaction has not been entered

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.38 16440

there is no subtransaction to exit from

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.39 16441

could not create new dictionary

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.40 16442

could not create new Python list

[Description]
An error occurred.
[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

**2.61.41 16443**

could not create bytes representation of Python object

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

**2.61.42 16444**

could not create string representation of Python object

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

**2.61.43 16445**

return value of function with array return type is not a Python sequence

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

**2.61.44 16446**

could not extract bytes from encoded string

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.45 16447

The name: @1@ is invalid.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.46 16448

";:" is not permitted in COBOL

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.47 16449

"END-EXEC" is not permitted in C

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.48 16450

missing "EXEC SQL ENDF IF END-EXEC."

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.61.49 16451

**debug line with EXEC SQL is not permitted**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.50 16452

**SQL string literal cannot continue multiline by COBOL syntax**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.51 16453

**COBOL string literal cannot continue multiline by SQL syntax**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.52 16454

**syntax error at or near "END-EXEC" in declare section**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.53 16455
syntax error in include file

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.54 16456

internal error: unreachable state;

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.55 16457

could not open temporary file "@1@" for continue line

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.56 16458

FILLER or implicit FILLER is not available in EXEC SQL TYPE statement

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.57 16459

VALUE clause is not available in EXEC SQL TYPE statement
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.61.58 16460**

**REDEFINES clause is not available in EXEC SQL TYPE statement**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.61.59 16461**

**FILLER or implicit FILLER is not available in EXEC SQL VAR statement**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.61.60 16462**

**VALUE clause is not available in EXEC SQL VAR statement**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.61.61 16463**

**syntax error in WHENEVER statement**

An error occurred.
[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61.62 16464

**FILLER or implicit FILLER is not available in TYPEDEF statement**

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61.63 16465

**VALUE clause is not available in TYPEDEF statement**

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61.64 16466

**REDEFINES clause is not available in TYPEDEF statement**

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.61.65 16467

**FILLER or implicit FILLER can use only for elementary item in group item**

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.
[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.66 16468

**USAGE clause is not available for group item name**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.67 16469

**SIGN clause is not available for group item name**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.68 16470

**VALUE clause is not available for group item name**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.61.69 16471

**more than one USAGE clause**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.61.70 16472

more than one OCCURS clause

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.71 16473

more than one VALUE clause

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.72 16474

more than one SIGN clause

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.73 16475

more than one REDEFINES clause

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.74 16476
Syntax error at or near "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.75 16477

Length of varchar type is not assined

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.76 16478

Invalid NULL is set

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.61.77 16479

You can not be set to more than 1024 bytes of the string

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.61.78 16480

Group item is too deep
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.79 16481

multidimensional array is not supported

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.80 16482

syntax is not available

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.81 16483

there is a character code that can not be determined

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.82 16484

the number of variables reached the max number 1000000

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.83 16485

host array variable is needed when using FOR ARRAY_SIZE

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.84 16486

unsupported datatype found at FOR statement

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.85 16487

FOR value should be positive integer

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.86 16488

SELECT..INTO returns too many rows on line @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.61.87 16491

@1@ failed

[Description]
Aborted the processing of this operation because an error occurred.

[System Processing]
Processing will be aborted.

[Action]
Identify the cause according to the messages shown before this message, and then work around if necessary.

2.61.88 16492

CREATE TRIGGER will create implicit function "@1"."@2"() for TRIGGER "@3" on TABLE "@4"

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.61.89 16493

The cursor is invalid on line @1@

[Description]
An error occurred during execution of the command.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.61.90 16494

Constraint trigger "@1" for relation "@2" cannot be replaced with non-constraint trigger

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.61.91 16495

**Trigger "@1@" for relation "@2@" cannot be replaced with constraint trigger**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.61.92 16496

**invalid value for targetserver: "@1@"**

[Description]

value of targetserver is invalid.

[System Processing]

Processing is aborted.

[Action]

Set one of the following:
- primary
- standby
- prefer_standby
- any(can be specified only JDBC)

2.61.93 16497

**unterminated /*+ comment for hint of pg_hint_plan**

[Description]

An unterminated /*+ comment for hint of pg_hint_plan is detected.

[System Processing]

Processing will be aborted.

[Action]

Terminate /*+ comment for hint of pg_hint_plan.

2.61.94 16498

**trigger created with EXECUTE PROCEDURE cannot be replaced by DO block**

[Description]

Trigger created with EXECUTE PROCEDURE cannot be replaced by DO block.
[System Processing]
Processing is aborted.

[Action]
Please redefine it after deleting the trigger.

2.61.95 16499

trigger created with DO block cannot be replaced by EXECUTE PROCEDURE

[Description]
Trigger created with DO block cannot be replaced by EXECUTE PROCEDURE.

[System Processing]
Processing is aborted.

[Action]
Please redefine it after deleting the trigger.

2.62 Message Numbers Beginning with 16500

2.62.1 16500

the connection is not the same as the connection in DECLARE STATEMENT, on line @1@

[Description]
The connection is not the same as the connection in DECLARE STATEMENT, on line @1@.

[System Processing]
Processing is aborted.

[Action]
Please do not specify the connection when you use SQL statement identifier declared with DECLARE STATEMENT.

2.62.2 16501

cannot copy window "@1@" because it has a frame clause

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.62.3 16502

could not find any WAL files

[Description]
An error occurred.
[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.62.4 16503

exceeded maxAllocatedDescs (@1@) while trying to open file "@2@"

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.62.5 16504

exceeded maxAllocatedDescs (@1@) while trying to open directory "@2@"

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.62.6 16505

tsquery is too large

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.62.7 16506

bit string length exceeds the maximum allowed (@1@)

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.62.8 16507

**error occurred at @1@:@2@ before error message processing is available**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.62.9 16508

**language validation function @1@ called for language @2@ instead of @3@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.62.10 16510

**The sslservercertcn "@1@" could not be verified**

[Description]
value of sslservercertcn is different from common name in the server certificate.

[System Processing]
Processing is aborted.

[Action]
Set SSL certificate's common name to sslservercertcn.

2.62.11 16511

**@1@: must be superuser to run this command**

[Description]
Must be superuser to run this command.

[System Processing]
Processing will be aborted.

[Action]
Re-execute the command by the superuser.
2.62.12 16512

@1@: must be database super user to run this command

[Description]
Must be database super user to run this command.

[System Processing]
Processing will be aborted.

[Action]
Re-execute the command by the database super user.

2.62.13 16513

@1@: no subcommand specified

[Description]
No subcommand specified.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct options or operands.

2.62.14 16514

@1@: unrecognized subcommand "@2@"

[Description]
Unknown subcommand is specified.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct subcommand.

2.62.15 16515

@1@: too many command-line arguments (first is "@2@")

[Description]
Too many command-line arguments.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct options or operands.

2.62.16 16516
@1@: argument to an option "@2@" must be a list of port numbers

[Description]
Argument to the option must be a list of port numbers.

[System Processing]
Processing will be aborted.

[Action]
Specify multiple port number, separated by commas argument to an option, and re-execute the command. Specify a number from 1024 to 32767 for the port number.

2.62.17 16517

@1@: invalid argument for an option "@2@"

[Description]
Invalid argument for an option.

[System Processing]
Processing will be aborted.

[Action]
Check the options specified in command-line, and re-execute the command with correct operands.

2.62.18 16518

@1@: option "@2@" is required

[Description]
The indispensable option is not specified.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct options or confirm the indispensable option is being used correctly.

2.62.19 16519

@1@: requires an option "@2@" or setting the "@3@" environment variable

[Description]
Requires an option or setting the environment variable.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct options. Or, set a correct value to the environment variable, and re-execute the command.
2.62.20 16520

@1@: successfully completed

[Description]
Command successfully completed.

[System Processing]
Continues processing.

[Action]
No action required.

2.62.21 16521

@1@: user "@2@" does not exist

[Description]
The user is not registered into OS.

[System Processing]
Processing will be aborted.

[Action]
Register the user into OS, and re-execute the command. Or, re-execute the command which specified the registered user.

2.62.22 16522

@1@: data directory "@2@" does not exist

[Description]
The data directory does not exist.

[System Processing]
Processing will be aborted.

[Action]
Confirm that an option "--cluster-standbynode" is being used correctly. Or, check the command-line, and re-execute the command with existing data directory.

2.62.23 16523

@1@: "@2@" is not a valid data directory

[Description]
The data directory is not valid.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with valid data directory.
2.62.24 16524
@1@: database cluster is not stopped
[Description]
   Database cluster is not stopped.

[System Processing]
   Processing will be aborted.

[Action]
   Stop the database cluster, and re-execute the command.

2.62.25 16525
@1@: domain root "@2@" already exists
[Description]
   The domain root already exists.

[System Processing]
   Processing will be aborted.

[Action]
   Check the command-line, and re-execute the command with correct domain root.

2.62.26 16526
@1@: could not create directory "@2@"
[Description]
   Could not create the directory.

[System Processing]
   Processing will be aborted.

[Action]
   Check the following and eliminate the cause of errors, and re-execute the command.
   - the state of a disk and file system to creating the directory
   - permission of the upper directory of specified directory

2.62.27 16527
@1@: start of PL/extJava has timed out : @2@
[Description]
   Timed out waiting for start of PL/extJava.

[System Processing]
   Processing will be aborted.

[Action]
   Re-execute the command after the load on the system has decreased.
2.62.28 16528

@1@: stop of PL/extJava has timed out : @2@

[Description]
Timed out waiting for stop of PL/extJava.

[System Processing]
Processing will be aborted.

[Action]
Re-execute the command after the load on the system has decreased.

2.62.29 16529

@1@: port number "@2@" is already in use

[Description]
The port number is already in use.

[System Processing]
Processing will be aborted.

[Action]
Re-execute the command with a port number which is not used in other processes.

2.62.30 16530

@1@: domain name can only be specified "domain1"

[Description]
Domain name can only be specified "domain1".

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct domain name.

2.62.31 16531

@1@: domain "@2@" has already been created

[Description]
The domain has already been created.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct domain name.

2.62.32 16532
@1@: domain "@2@" has not been created

[Description]
The domain has not been created.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct domain name.

2.62.33 16533

@1@: permission denied to update file "@2@"

[Description]
Permission denied to update the file.

[System Processing]
Processing will be aborted.

[Action]
Permit writing to the file by execution user, and re-execute the command.

2.62.34 16534

@1@: container for database "@2@" does not exist

[Description]
Container for database does not exist.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct database name.

2.62.35 16535

@1@: container for database "@2@" already exists

[Description]
Container for database already exists.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct database name.

2.62.36 16536

@1@: command error occurred
[Description]
Internal command error occurred.

[System Processing]
Processing will be aborted.

[Action]
Fix the problem by referring to the messages prior to this one.

**2.62.37 16537**

@1@: the domain was not able to be deleted because there was a container

[Description]
The domain was not able to be deleted because the domain have a container.

[System Processing]
Processing will be aborted.

[Action]
Delete all containers on the domain, and re-execute the command. Or, re-execute the command with "--force" option.

**2.62.38 16538**

@1@: could not access the data directory

[Description]
Could not access the data directory.

[System Processing]
Processing will be aborted.

[Action]
Confirm that an option "--cluster-standbynode" is being used correctly. Or, specify database super user in "--dbadminuser" option and re-execute the command.

**2.62.39 16539**

@1@: server instance "@2@" does not exist

[Description]
Server instance does not exist.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct server instance.

**2.62.40 16540**

@1@: specified database name "@2@" does not follow the naming rules
Specified database name does not follow the naming rules.

Processing will be aborted.

Check the command-line, and re-execute the command with correct database name.

2.62.41 16541

@1@: all the server instances of the container cannot be deleted

All the server instances of the container cannot be deleted.

Processing will be aborted.

Check the command-line, and re-execute the command with correct database name.

2.62.42 16542

@1@: the mount does the shared-file system of the domain root or the data directory

A command executing node is not a standby node.

Processing will be aborted.

Execute the command on standby node.

2.62.43 16543

@1@: cannot execute this subcommand on standby node

Cannot execute this subcommand on standby node.

Processing will be aborted.

Execute the command on primary node.

2.62.44 16544

@1@: cannot execute this command concurrently

Cannot execute this command concurrently.
Processing will be aborted.

Re-execute the command after a command executing was finished.

2.62.45 16545

@1@: domain root "@2@" does not exist

Domain root does not exist.

Confirm that the shared-file system of the domain root is mounted. Or, restore domain root from backup and re-execute the command.

2.62.46 16546

parameter "@1@" necessary for the PL/extJava environment was not set

PL/extJava environment was not set.

Set the PL/extJava environment.

2.62.47 16547

mismatched parentheses

Missing parenthesis '('or')' in Java function definition.

Check the definition of Java function.

2.62.48 16548

invalid format specification for Java function

Invalid format specification for Java function.
[System Processing]
Processing will be aborted.

[Action]
Check the definition of Java function.
Java function definition format is [package].[class].[method].

2.62.49 16549

Java function cannot return type @1@

[Description]
The specified data type is not supported as Java function.

[System Processing]
Processing will be aborted.

[Action]
Check the data type of return value.

2.62.50 16550

Java function cannot accept type @1@

[Description]
The specified data type is not supported as Java function arguments.

[System Processing]
Processing will be aborted.

[Action]
Check the data type of arguments value.

2.62.51 16551

could not execute the Java function at the application server: HTTP status code @1@ details: "%@2@"

[Description]
The application server could not execute the Java function.

[System Processing]
Processing will be aborted.

[Action]
Check the Java function of registered in application server.
Check the details.
- The classpath is not found. (plextjava_lib_dir=%s2)
  %s2: directory
  The directory that stores the Java function is not in the application server.Check the directory and register the Java function.
- The return type is different. (%s3)
The return value of the Java function is not corresponding to the CREATE FUNCTION definition. Check the data type of Java function.

- The method is not found. (%s4)

The Java function to which the data type is corresponding is not found. Check the data type of Java function.

- The class is not found. (%s5)

The Java function to which the class name is corresponding is not found. Check the class name of Java function.

- The method is not static modifier. (%s6)

The Java function is not defined by "Static". Check the Java function definition.

here is no executed authority. (%s7)

The Java function is not defined by "Public". Check the Java function definition.

- Java application throws exception(%s8).

The exception was generated by the Java function. Check the Java function definition.

- no message

The following causes are thought.

- There is a possibility that the container is not made. Make the container in application server.

  a) There is a possibility where the number of server instances is insufficient. Add server instance (JavaVM) to the application server.

  b) There is a possibility that memory shortage occurs. Check the Java application.

  c) There is a possibility that the time-out is generated. Check the Java application.

  d) There is a possibility that abnormality occurs by the application server. Check the following logs.

     - Event log (For Windows(R))/system log (For Solaris/Linux).

     - Server log of container

     - JavaVM log of container

     - Trace log of Web server

     - Internal log of Web server

---

**2.62.52 16552**

**could not connect to application server: @1@**

**[Description]**

Could not connect to application server.

**[System Processing]**

Processing will be aborted.

**[Action]**

Check the plexjava.http_port parameter in postgresql.conf.
2.62.53 16553

could not create socket for application server connection: @1@

[Description]
Could not create socket.

[System Processing]
Processing will be aborted.

[Action]
There is possible where an open number of files that can be used with the system is insufficient. Please confirm the total of the file that can be used with the system.

2.62.54 16554

could not send data to application server: @1@

[Description]
The application server was disconnected during execution of the Java function.

[System Processing]
Processing will be aborted.

[Action]
Check the message of application server.

2.62.55 16555

could not receive data from application server

[Description]
The application server was disconnected during execution of the Java function.

[System Processing]
Processing will be aborted.

[Action]
Check the message of application server.

2.62.56 16556

could not receive data from application server: @1@

[Description]
The application server was disconnected during execution of the Java function.

[System Processing]
Processing will be aborted.

[Action]
Check the message of application server.
2.62.57 16563

@1@: at least one option of "@2@" must be specified

[Description]
Must specify at least one option.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct options.

2.62.58 16574

@1@: could not write directory "@2@"

[Description]
Could not write the directory.

[System Processing]
Processing will be aborted.

[Action]
Check that the disk of the directory has free space, and check that the abnormalities of the disk have not occurred.

2.62.59 16575

@1@: cannot execute with "@2@" option in primary server

[Description]
Do not specify the option to execute the command in primary server.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct options.
Restore it because PL/extJava environment may be corrupted when the server is member nodes of the cluster.

2.62.60 16576

@1@: specify "@2@" option in standby server

[Description]
Specify the option to execute the command in standby server.

[System Processing]
Processing will be aborted.

[Action]
Check the command-line, and re-execute the command with correct options.
restore it because PL/extJava environment may be corrupted when the server is member nodes of the cluster.
2.62.61 16577

**Could not translate client host name "@1@" to IP address: @2@.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.62.62 16578

**Could not resolve client IP address to a host name: @1@.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.62.63 16579

**SELECT target entry is named "@1@".**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.62.64 16580

**SELECT target entry has type @1@, but column has type @2@.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.62.65 16581
RETURNING list entry has type @1@, but column has type @2@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.62.66 16582

pg_largeobject entry for OID @1@, page @2@ has invalid data field size @3@.

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.62.67 16583

could not close directory "@1@": @2@

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.62.68 16584

could not create shared memory segment "@1@": @2@

[Description]
Could not create shared memory segment.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.62.69 16585

could not open shared memory segment "@1@": @2@
Could not open shared memory segment.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause

2.62.70 16586
could not map shared memory segment "@1@": @2@

Could not map shared memory segment.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause

2.62.71 16587
could not unmap shared memory segment "@1@": @2@

Could not unmap shared memory segment.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause

2.62.72 16588
could not remove shared memory segment "@1@": @2@

Could not remove shared memory segment.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause

2.62.73 16589

background worker "@1@": must attach to shared memory in order to request a database connection
[Description]
Could not register background worker.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.62.74 16590

background worker "@1@": cannot request database access if starting at postmaster start

[Description]
Could not register background worker.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.62.75 16591

background worker "@1@": invalid restart interval

[Description]
Could not register background worker.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.62.76 16592

terminating background worker "@1@" due to administrator command

[Description]
Could not register background worker.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.62.77 16595

dynamic shared memory is disabled

[Description]
dynamic shared memory is disabled.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

**2.62.78 16596**

dynamic shared memory control segment is not valid

[Description]
dynamic shared memory control segment is not valid.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

**2.62.79 16597**

too many dynamic shared memory segments

[Description]
Too many dynamic shared memory segments exist.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

**2.62.80 16599**

could not stat shared memory segment "@1@": @2@

[Description]
Could not get details about dynamic shared memory segment.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

**2.63 Message Numbers Beginning with16600**

**2.63.1 16600**

could not resize shared memory segment "@1@" to @2@ bytes: @3@

[Description]
Could not resize shared memory segment.
2.63.2 16601

could not get shared memory segment: @1@

[Description]
Could not get shared memory segment.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.3 16604

cannot add more timeout reasons

[Description]
cannot add more timeout reasons

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.4 16606

aborting because lock on relation "@1@"."@2@" is not available

[Description]
Aborting because lock on relation is not available.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.5 16607

affix file contains both old-style and new-style commands

[Description]
Affix file contains commands in both old and new format.

[Action]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.6 16608

aggregate cannot accept shell type @1@

[Description]
aggregate cannot accept shell type.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.7 16609

aggregate functions are not allowed in a recursive query’s recursive term

[Description]
aggregate functions are not allowed in a recursive query’s recursive term.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.8 16610

aggregate functions are not allowed in check constraints

[Description]
aggregate functions are not allowed in check constraints.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.9 16611

aggregate functions are not allowed in DEFAULT expression

[Description]
aggregate functions are not allowed in DEFAULT expressions.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.63.10 16612

aggregate functions are not allowed in EXECUTE parameters

[Description]
aggregate functions are not allowed in EXECUTE parameter.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.11 16613

aggregate functions are not allowed in FROM clause of their own query level

[Description]
Should only be possible in a LATERAL subquery.aggregate functions are not allowed in FROM clause of their own query level.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.12 16614

aggregate functions are not allowed in functions in FROM

[Description]
aggregate functions are not allowed in functions in FROM.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.13 16615

aggregate functions are not allowed in index expression

[Description]
aggregate functions are not allowed in index expression.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.63.14 16616

aggregate functions are not allowed in index predicates

[Description]
aggregate functions are not allowed in index predicates.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.15 16617

aggregate functions are not allowed in JOIN conditions

[Description]
aggregate functions are not allowed in JOIN conditions.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.16 16618

aggregate functions are not allowed in @1@

[Description]
aggregate functions are not allowed in some kinds of expressions we are parsing such as EXPR_KIND_WHERE,EXPR_KIND_FILTER, EXPR_KIND_INSERT_TARGET, EXPR_KIND_UPDATE_SOURCE, EXPR_KIND_UPDATE_TARGET, EXPR_KIND_GROUP_BY, EXPR_KIND_LIMIT, EXPR_KIND_OFFSET, EXPR_KIND_RETURNING,EXPR_KIND_VALUES.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.17 16620

aggregate functions are not allowed in trigger WHEN conditions

[Description]
aggregate functions are not allowed in trigger WHEN conditions.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.63.18 16621

aggregate functions are not allowed in window RANGE

[Description]
aggregate functions are not allowed in window RANGE.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.19 16622

aggregate functions are not allowed in window ROWS

[Description]
aggregate functions are not allowed in window ROWS.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.20 16623

aggregate mfinalfunc must not be specified without mstype

[Description]
aggregate mfinalfunc must not be specified without mstype.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.21 16624

aggregate minitcond must not be specified without mstype

[Description]
aggregate minitcond must not be specified without mstype.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
aggregate minvfunc must be specified when mstype is specified

[Description]
aggregate minvfunc must be specified when mstype is specified. If mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.23 16626

aggregate minvfunc must not be specified without mstype

[Description]
aggregate minvfunc must not be specified without mstype. If mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.24 16627

aggregate msfunc must be specified when mstype is specified

[Description]
aggregate msfunc must be specified when mstype is specified. If mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.25 16628

aggregate msfunc must not be specified without mstype

[Description]
aggregate msfunc must not be specified without mstype. If mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.63.26 16629

aggregate msspace must not be specified without mstype

[Description]
aggregate msspace must not be specified without mstype. If mtransType is given, mtransfuncName and minvtransfuncName must be as well; if not, then none of the moving-aggregate options should have been given.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.27 16630

aggregates cannot accept set arguments

[Description]
aggregates cannot accept set arguments.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.28 16631

aggregates cannot have more than @1@ argument

[Description]
aggregates cannot have more than 99 argument. Aggregates can have at most FUNC_MAX_ARGS-1 args, else the transfnand/or finalfn will be unrepresentable in pg_proc. We must check now to protect fixed-size arrays here and possibly in called functions.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.29 16632

aggregates cannot have output arguments

[Description]
aggregates cannot have output arguments.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.63.30 16633

**a hypothetical-set aggregate must have direct arguments matching its aggregated arguments**

[Description]

a hypothetical-set aggregate must have direct arguments matching its aggregated arguments.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.31 16634

**All connection parameters must be supplied because no database connection exists**

[Description]

All connection parameters must be supplied because no database connection exists. We don't know the supplied connection parameters and don't want to connect to the wrong database by using defaults, so require all parameters to be specified.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.32 16635

**all replication slots are in use**

[Description]

all replication slots are in use.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.63.33 16636

**an aggregate with DISTINCT must have at least one argument**

[Description]

an aggregate with DISTINCT must have at least one argument. Returning an empty list would cause the parsed Query to look like it didn't have DISTINCT, with results that would probably surprise the user. Note: this case is presently impossible for aggregates because of grammar restrictions, but we check anyway.

[System Processing]

Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.34 16637

an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type

[Description]
an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.35 16638

argument declared "anyrange" is not a range type but type @1@

[Description]
argument declared \"anyrange\" is not a range type but type format type of range_type.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.36 16639

argument list must have even number of elements

[Description]
argument list must have even number of elements.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.37 16640

argument of lo_read exceeds integer range

[Description]
argument of lo_read exceeds integer range. Long ago, somebody thought it'd be a good idea to declare this function as taking size_t ... but the underlying backend function only accepts a signed int32 length. So throw error if the given value overflows int32.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.38 16641

**argument of lo_truncate exceeds integer range**

[Description]
argument of lo_truncate exceeds integer range. Long ago, somebody thought it'd be a good idea to declare this function as taking size_t... but the underlying backend function only accepts a signed int32 length. So throw error if the given value overflows int32. (A possible alternative is to automatically redirect the call to lo_truncate64; but if the caller wanted to rely on that backend function being available, he could have called lo_truncate64 for himself.)

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.39 16642

**argument of lo_write exceeds integer range**

[Description]
argument of lo_write exceeds integer range. Long ago, somebody thought it'd be a good idea to declare this function as taking size_t... but the underlying backend function only accepts a signed int32 length. So throw error if the given value overflows int32.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.40 16643

**argument of @1@ must be an array of objects**

[Description]
argument of funcname must be an array of objects.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.41 16644

**Array contents must start with ""{'"**
Array contents must start with `\{`. intuit dimensions from brace structure -- it better match what we were given.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.63.42 16645**

array must be one-dimensional

array must be one-dimensional.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.63.43 16646**

array must have even number of elements

array must have even number of elements.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.63.44 16647**

array must have two columns

array must have two columns.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.63.45 16648**

array must not contain nulls

array must not contain nulls.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.46 16649

Array value must start with "{" or dimension information

[Description]
Array value must start with \"{\" or dimension information. No array dimensions, so intuit dimensions from brace structure.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.47 16650

authentication file line too long

[Description]
authentication file line too long. Line too long!

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.48 16651

a variadic ordered-set aggregate must use VARIADIC type ANY

[Description]
a variadic ordered-set aggregate must use VARIADIC type ANY. An ordered-set aggregate that is VARIADIC must be VARIADIC ANY. In principle we could support regular variadic types, but it would make things much more complicated because we'd have to assemble the correct subsets of arguments into array values. Since no standard aggregates have use for such a case, we aren't bothering for now.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.49 16652

a worker process died unexpectedly
[Description]
a worker process died unexpectedly.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.50 16653
canceling statement due to lock timeout

[Description]
canceling statement due to lock timeout. If LOCK_TIMEOUT and STATEMENT_TIMEOUT indicators are both set, we prefer to report the former; but be sure to clear both.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.51 16654
cannot extract elements from an object

[Description]
cannot extract elements from an object.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.52 16655
cannot extract elements from a scalar

[Description]
cannot extract elements from a scalar.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.53 16656
cannot get array length of a non-array
cannot get array length of a non-array.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.54 16657
cannot get array length of a scalar

cannot get array length of a scalar.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.55 16658
cannot have more than $2^{32}-2$ commands in a transaction

cannot have more than $2^{32}-2$ commands in a transaction.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.56 16659
cannot insert into column "@1@" of view "@2@"

cannot insert into column non_updatable_col of view RelationGetRelationName(view). This is a different error, caused by an attempt to update a non-updatable column in an otherwise updatable view.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.62 16665

cannot refresh materialized view "@1@" concurrently

cannot refresh materialized view matviewname concurrently.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.63 16666

cannot rename inherited constraint "@1@"

cannot rename inherited constraint oldconname.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.64 16667

cannot return non-composite value from function returning composite type

cannot return non-composite value from function returning composite type.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.65 16668

cannot rewrite table "@1@" used as a catalog table

cannot rewrite table Relation name used as a catalog table.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.66 16669

cannot update column "@1@" of view "@2@"

[Description]
cannot update column non_updatable_col of view RelationGetRelationName(view).

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.67 16670

cannot update foreign table "@1@"

[Description]
cannot update foreign table resultRel relation name.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.68 16671

cannot use a logical replication slot for physical replication

[Description]
Logical replication slots, similar to physical slots except that they are attached to a single database.cannot use a logical replication slot for physical replication.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.69 16672

cannot use DISTINCT with WITHIN GROUP

[Description]
cannot use DISTINCT with WITHIN GROUP. The order clause for WITHIN GROUP and the one for plain-aggregate ORDER BY share a field, so we have to check here that at most one is present. We also check for DISTINCT here to give a better error location.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.63.70 16673

cannot use expression index "@1@" as replica identity

[Description]
  cannot use expression index Relation name of indexRel as replica identity. Expression indexes aren't supported.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.63.71 16674

cannot use invalid index "@1@" as replica identity

[Description]
  cannot use invalid index Relation name of indexRel as replica identity.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.63.72 16675

cannot use ldapbasedn, ldapbinddn, ldapbindpasswd, ldapsearchattribute, or ldapurl together with ldapprefix

[Description]
  cannot use ldapbasedn, ldapbinddn, ldapbindpasswd, ldapsearchattribute, or ldapurl together with ldapprefix. LDAP can operate in two modes: either with a direct bind, using ldapprefix and ldapsuffix, or using a search+bind, using ldapbasedn, ldapbinddn, ldapbindpasswd and ldapsearchattribute. Disallow mixing these parameters.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.63.73 16676

cannot use multiple ORDER BY clauses with WITHIN GROUP

[Description]
  cannot use multiple ORDER BY clauses with WITHIN GROUP.
[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.63.74 16677

cannot use non-immediate index "@1@" as replica identity

[Description]
    cannot use non-immediate index Relation name of indexRel as replica identity. Deferred indexes are not guaranteed to be always unique.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.63.75 16678

cannot use non-unique index "@1@" as replica identity

[Description]
    cannot use non-unique index Relation name of indexRel as replica identity. The Access Method must support uniqueness, and the index must in fact be unique.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.63.76 16679

cannot use partial index "@1@" as replica identity

[Description]
    cannot use partial index Relation name of indexRel as replica identity.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.63.77 16680

cannot use physical replication slot for logical decoding

[Description]
    cannot use physical replication slot for logical decoding.
[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.63.78 16681
cannot use subquery in DEFAULT expression

[Description]
cannot use subquery in DEFAULT expression. Check to see if the sublink is in an invalid place within the query. We allow sublinks everywhere in SELECT/INSERT/UPDATE/DELETE, but generally not in utility statements.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.63.79 16682
cannot use VARIADIC with WITHIN GROUP

[Description]
cannot use VARIADIC with WITHIN GROUP.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.63.80 16683
check constraints for domains cannot be marked NO INHERIT

[Description]
check constraints for domains cannot be marked NO INHERIT. Check constraints are handled after domain creation, as they require the Oid of the domain; at this point we can only check that they're not marked NO INHERIT, because that would be bogus.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.63.81 16684
CONCURRENTLY and WITH NO DATA options cannot be used together
CONCURRENTLY and WITH NO DATA options cannot be used together. Check that conflicting options have not been specified.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.63.82 16685**

CONCURRENTLY cannot be used when the materialized view is not populated

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.63.83 16687**

constraint "@1@" of relation "@2@" is not a foreign key or check constraint

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.63.84 16688**

could not change directory to "@1@": @2@

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.63.85 16689**

could not close directory "@1@": @2@
could not close directory ctx->directory and the corresponding error will be printed.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.86 16690

could not close log file @1@: @2@

could not close log file XLogFileNameP(ThisTimeLineID, openLogSegNo) and the reason failure also printed along with error.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.87 16691

could not close log segment @1@: @2@

could not close log segment XLogFileNameP(recvFileTLI, recvSegNo) and the reason for failure also printed along with error.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.88 16692

could not close pipe to external command: @1@

could not close pipe to external command and the reason for failure also printed along with error.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.89 16693

could not close pipe to external command: @1@
could not close pipe to external command: strerror(errno).

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.90 16694

could not complete SSL handshake on renegotiation, too many failures

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.91 16695

could not create any Unix-domain sockets

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.92 16696

could not create communication channels: strerror(errno).

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.63.93 16697

could not create shared memory segment "@1@": strerror(errno).
[Description]
could not create shared memory segment name and reason for failure also printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.94 16698
could not create Unix-domain socket in directory "@1@

[Description]
could not create Unix-domain socket in one of the Unix_socket_directories.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.63.95 16699
could not determine data type for argument @1@

[Description]
could not determine data type for argument 1. since json_object_agg() is declared as taking type "any", the parser will not do any type conversion on unknown-type literals (that is, undecorated strings or NULLs). Such values will arrive here as type UNKNOWN, which fortunately does not matter to us, since unknownout() works fine.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64 Message Numbers Beginning with 16700

2.64.1 16700
could not determine encoding for codeset "@1@"

[Description]
could not determine encoding for codeset cp followed by the provided unsigned integer.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.64.2 16701

could not duplicate handle for "@1@": @2@

[Description]

could not duplicate handle for handle name and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.3 16702

could not execute command "@1@": @2@

[Description]

could not execute command filename and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.4 16703

could not execute command "@1@": @2@

[Description]

could not execute command options->file and the strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.5 16704

could not fdatasync log file @1@: @2@

[Description]

could not fdatasync log file XLogFileNameP(ThisTimeLineID, segno) and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.64.6 16705

could not fork worker process: @1@

[Description]
could not fork worker process. The reason for failure also printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.7 16706

could not fsync log file @1@: @2@

[Description]
could not fsync log file XLogFileNameP(ThisTimeLineID, segno) and reason for failure also printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.8 16707

could not fsync log segment @1@: @2@

[Description]
could not fsync log segment XLogFileNameP(ThisTimeLineID, openLogSegNo) and reason for failure also printed along with error. XLogFileNameP(ThisTimeLineID, openLogSegNo) currently open log segment (if any). Also, if the open flag is changing, close the log file so it will be reopened (with new flag bit) at next use.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.9 16708

could not fsync write-through log file @1@: @2@

[Description]
could not fsync write-through log file XLogFileNameP(ThisTimeLineID, segno) and the reason for failure also printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.64.10 16709

could not get current working directory: @1@

[Description]

could not get current working directory: strerror(errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.11 16710

could not get home directory for user ID @1@: @2@

[Description]

could not get home directory for user ID user_id and strerror(errno) if errno set otherwise print "_"("user does not exist").

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.12 16711

could not get junction for "@1@": @2@

[Description]

could not get junction for path :msg.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.13 16712

could not get relation name for OID @1@: @2@

[Description]

could not get relation name for OID te->catalogId.oid, PQerrorMessage(AH->connection).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.14 16713
could not get shared memory segment: @1@

[Description]
could not get shared memory segment and reason for failure also printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.15 16714

Could not identify system: got @1@ rows and @2@ fields, expected @3@ rows and @4@ or more fields

[Description]
Could not identify system: got res->ntups rows and res->numAttributes fields, expected 3 rows and 1 or more fields.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.16 16715

could not import a module for Decimal constructor

[Description]
could not import a module for Decimal constructor. Try to import cdecimal. If it doesn't exist, fall back to decimal.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.17 16716

could not initialize LDAP: @1@

[Description]
could not initialize LDAP and reason for failure also printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.18 16719

could not look up local user ID @1@: @2@
[Description]
could not look up local user ID geteuid() and error string for the corresponding errno will be printed or if it is unknown error it will print "Unknown error".

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.19 16720
could not look up local user ID @1@: @2@

[Description]
could not look up local user ID (long)uid and if errno is set error string for the corresponding errno will be printed otherwise "user does not exist" will be printed.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.20 16721
could not map anonymous shared memory: @1@

[Description]
could not map anonymous shared memory and the reason for failure will be printed along with error. If errno is ENOMEM means This error usually means that PostgreSQL’s request for a shared memory segment exceeded available memory, swap space, or huge pages. To reduce the request size (currently size bytes), reduce PostgreSQL’s shared memory usage, perhaps by reducing shared_buffers or max_connections.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.21 16722
could not map shared memory segment "@1@": @2@

[Description]
could not map shared memory segment handle name and reason for failure also printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.64.22 16723

could not obtain lock on relation "@1@"

[Description]
could not obtain lock on relation relation name. Lock relation. This will also accept any pending invalidation messages.
If we got back InvalidOid, indicating not found, then there's nothing to lock, but we accept invalidation messages anyway,
to flush any negative catcache entries that may be lingering.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.23 16724

could not open backend variables file "@1@": @2@

[Description]
could not open backend variables file id and strerror(errno).

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.24 16725

could not open configuration directory "@1@": @2@

[Description]
could not open configuration directory absolute location of includedir and the reason for failure also be printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.25 16726

could not open shared memory segment "@1@": @2@

[Description]
could not open shared memory segment dsm handle name and reason for failure also printed.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.64.26 16727

could not open transaction log file "@1@": @2@

[Description]
could not open transaction log file path and reason for failure also printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.27 16728

could not parse file name "@1@

[Description]
could not parse file name path name. Temporary filenames from SnapBuildSerialize() include the LSN and everything but are postfixed by .Spid.tmp. We can just remove them the same as other files because there can be none that are currently being written that are older than cutoff. We just log a message if a file doesn't fit the pattern, it's probably some editors lock/state file or similar...

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.28 16729

could not parse LDAP URL "@1@": @2@

[Description]
could not parse LDAP URL val and ldap_err2string on the return value of ldap_url_parse.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.29 16730

could not perform initial LDAP bind for ldapbinddn "@1@" on server "@2@": @3@

[Description]
could not perform initial LDAP bind for ldapbinddn port->hba->ldapbinddn on server port->hba->ldapserver and ldap_err2string on the return value of ldap_simple_bind_s. Bind with a pre-defined username/password (if available) for searching. If none is specified, this turns into an anonymous bind.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.30 16731
could not read directory "@1@": @2@
[Description]
could not read directory path and strerror(erno).
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.31 16732
could not read file "@1@", read @2@ of @3@: @4@
[Description]
could not read file path, readBytes of (int) SnapBuildOnDiskConstantSize) and the reason for failure also printed along with error. This error can occur during reading statically sized portion of snapshot or reading SnapBuild or during restore running xacts information or during restore committed xacts information.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.32 16733
could not read file "@1@", read @2@ of @3@: @4@
[Description]
could not read file path, readBytes of (uint32) ReplicationSlotOnDiskConstantSize) and the reason for failure also printed along with the error.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.33 16734
could not read from backend variables file "@1@": @2@
[Description]
could not read from backend variables file id and strerror(erno).
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.34 16735

`could not read from file "@1@": read @2@ instead of @3@ bytes`

[Description]
could not read from file path: read bytesRead instead of (int32) sizeof(LogicalRewriteMappingData) bytes.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.35 16736

`could not read from log segment @1@, offset @2@, length @3@: @4@`

[Description]
could not read from log segment XLogFileNameP(curFileTimeLine, sendSegNo), offset sendOff, length (unsigned long) segbytes) and the reason for failure also printed along with the error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.36 16737

`could not read from log segment @1@, offset @2@: @3@`

[Description]
could not read from log segment fname, offset readOff and reason for failure also printed along with error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.37 16738

`could not read from reorderbuffer spill file: @1@`

[Description]
could not read from reorderbuffer spill file and the reason for failure also be printed along with the error.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

**2.64.38 16739**

could not read from reorderbuffer spill file: read @1@ instead of @2@ bytes

**Description**

could not read from reorderbuffer spill file: readBytes instead of (uint32) sizeof(ReorderBufferDiskChange) bytes.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.64.39 16740**

could not read from tuplestore temporary file: @1@

**Description**

could not read from tuplestore temporary file and reason for failure also printed along with error.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.64.40 16741**

could not read time zone file "@1@": @2@

**Description**

could not read time zone file filename and the reason for failure also be printed along with error.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.64.41 16742**

could not receive timeline history file from "the primary server: @1@

**Description**

could not receive timeline history file from "the primary server:PQerrorMessage(streamConn).

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.
2.64.42 16743

could not remove directory "@1@"

[Description]

could not remove directory tmppath. If removing the directory fails, the worst thing that will happen is that the user won’t be able to create a new slot with the same name until the next server restart. If we crashed while a slot was being setup or deleted, clean up. If we crashed with an ephemeral slot active, don’t restore but delete it.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.43 16744

could not remove shared memory segment "@1@": @2@

[Description]

could not remove shared memory segment name and reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.44 16746

could not resize shared memory segment "@1@" to @2@ bytes: @3@

[Description]

could not resize shared memory segment name to request_size bytes.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.45 16747

Could not resolve client IP address to a host name: @1@

[Description]

Could not resolve client IP address to a host name gai_strerror(port->remote_hostname_errno).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.64.46 16748

could not restore file "@1@" from archive: @2@

[Description]

could not restore file xlogfname from archive: Returns a human-readable string explaining the reason a child process
terminated by taking the argument as rc.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.47 16749

could not search LDAP for filter "@1@" on server "@2@": @3@

[Description]

could not search LDAP for filter filter on server port->hba->ldapserver: ldap_err2string(return value of ldap_search_s).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.48 16750

could not seek in log file @1@ to offset @2@: @3@

[Description]

could not seek in log file XLogFileNameP(ThisTimeLineID, openLogSegNo) to offset startoffset and reason for failure
also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.49 16751

could not seek in log segment @1@ to offset @2@: @3@

[Description]

could not seek in log segment fname to offset readOff: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.64.50 16752

could not seek in tuplestore temporary file: @1@
[Description]

could not seek in tuplestore temporary file and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.51 16753

could not seek to beginning of file "@1@": @2@
[Description]

could not seek to beginning of file path and the reason for failure also printed along with error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.52 16754

could not send end-of-streaming message to primary: @1@
[Description]

could not send end-of-streaming message to primary: PQerrorMessage(streamConn).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.53 16755

could not set LDAP protocol version: @1@
[Description]

could not set LDAP protocol version: ldap_err2string(return value of ldap_set_option).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.54 16756
could not set socket to nonblocking mode: @1@

[Description]

could not set socket to nonblocking mode: the reason for failure also printed along with the error.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.55 16757

could not set socket to nonblocking mode: @1@

[Description]

could not set socket to nonblocking mode: SOCK_STRERROR(SOCK_ERRNO, sebuf, sizeof(sebuf)).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.56 16758

could not set variable "@1@"

[Description]

could not set variable varname.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.57 16759

could not start LDAP TLS session: @1@

[Description]

could not start LDAP TLS session: ldap_err2string(return value of _ldap_start_tls_sA).

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.64.58 16760

could not stat control file "@1@": @2@
[Description]
could not stat control file XLOG_CONTROL_FILE and reason for failure also printed along with the error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.59 16761
could not stat file or directory "@1@": @2@

[Description]
could not stat file or directory path/TABLESPACE_VERSION_DIRECTORY :the reason for failure printed along with the error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.60 16762
could not stat file "@1@": @2@

[Description]
could not stat file options->file,strerror(erno).

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.61 16763
could not stat shared memory segment "@1@": @2@

[Description]
could not stat shared memory segment name:the reason for failure also printed along with the error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.62 16764
could not stat trigger file "@1@": @2@
[Description]
Check to see whether the user-specified trigger file exists and whether apromote request has arrived. If either condition holds, return true.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.63 16765

Could not translate client host name "@1@" to IP address: @2@

[Description]
could not translate the client host name to ip address.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.64 16766

could not truncate file "@1@" to @2@: @3@

[Description]
Truncate all data that's not guaranteed to have been safely fsynced (by previous record or by the last checkpoint).

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.65 16767

could not unmap shared memory segment "@1@": @2@

[Description]
could not unmap shared memory segment name: the reason for failure also printed along with the error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.66 16768

could not write to COPY program: @1@
[Description]
could not write to COPY program: the reason for failure is printed along with the error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.67 16769

could not write to data file for XID @1@: @2@
[Description]
could not write to data file for XID txn->xid) and the reason for failure is also printed along with the error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.68 16770

could not write to file "@1@", wrote @2@ of @3@: @4@
[Description]
could not write to file src->path, wrote written of len: the reason for failure also printed along with the error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.69 16771

could not write to log file @1@ at offset @2@, length @3@: @4@
[Description]
could not write to log file XLogFileNameP(ThisTimeLineID, openLogSegNo) at offset openLogOff length nbytes: the reason for failure also printed along with the error.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.70 16772

could not write to log segment @1@ at offset @2@, length @3@: @4@
if write didn't set errno, assume no disk space

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.64.71 16773
could not write to the communication channel: @1@

1. This function is executed in the worker process. It sends a message to the master on the communication channel.
2. This function is executed in the master process. It sends a message to a certain worker on the communication channel. If we're already aborting anyway, don't care if we succeed or not. The child might have gone already.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.64.72 16774
could not write to tuplestore temporary file: @1@

could not write to tuplestore temporary file

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.64.73 16775
database connection requirement not indicated during registration

This flag means the bgworker requires a database connection. The connection is not established automatically; the worker must establish it later. It requires that BGWORKER_SHMEM_ACCESS was passed too.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.64.74 16776
database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database "@1@"

[Description]

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database Execute a database-wide VACUUM in that database. You might also need to commit or roll back old prepared transactions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

2.64.75 16777

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database with OID

[Description]

Execute a database-wide VACUUM in that database. You might also need to commit or roll back old prepared transactions.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

2.64.76 16778

database "@1@" is used by a logical replication slot

[Description]

Check whether there are, possibly unconnected, logical slots that refer to the to-be-dropped database. The database lock we are holding prevents the creation of new slots using the database. ReplicationSlotsCountDBSlots -- count the number of slots that refer to the passed database oid. Returns true if there are any slots referencing the database. *nslots will be set to the absolute number of slots in the database, *nactive to ones currently active.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

---

2.64.77 16779

date field value out of range: @1@-@2@-@3@

[Description]

date field value out of range Note: we'll reject zero or negative year values. Perhaps negativeshould be allowed to represent BC years?

[System Processing]

Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.78 16780
date out of range: @1@-@2@-@3@
[Description]
date out of range
Note: we'll reject zero or negative year values. Perhaps negativeshould be allowed to represent BC years?

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.79 16781
DECLARE CURSOR WITH HOLD ... @1@ is not supported
[Description]
DECLARE CURSOR WITH HOLD is not supported .FOR UPDATE and WITH HOLD are not compatible

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.80 16782
DECLARE INSENSITIVE CURSOR ... @1@ is not supported
[Description]
DECLARE INSENSITIVE CURSOR is not supported FOR UPDATE and INSENSITIVE are not compatible

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.81 16783
DECLARE SCROLL CURSOR ... @1@ is not supported
[Description]
DECLARE SCROLL CURSOR is not supported FOR UPDATE and SCROLL are not compatible

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

**2.64.82 16784**

**ECDH: could not create key**

**Description**

ECDH: could not create key

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.64.83 16785**

**ECDH: unrecognized curve name: @1@**

**Description**

ECDH: unrecognized curve name

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.64.84 16786**

**enum label ”@1@” already exists**

**Description**

Check if label is already in use. The unique index on pg_enum would catch this anyway, but we prefer a friendlier error message, and besides we need a check to support IF NOT EXISTS.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.64.85 16788**

**error processing a parallel work item**

**Description**

error processing a parallel work itemIt looks for an idle worker process and only returns if there is one.

**System Processing**

Processing will be aborted.
2.64.86 16789

**error reading result of streaming command: @1@**

[Description]
error reading result of streaming command

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.87 16790

**event trigger functions cannot have declared arguments**

[Description]
event trigger functions cannot have declared argumentsshouldn't be any declared arguments

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.88 16791

**event trigger name cannot be qualified**

[Description]
event trigger name cannot be qualifiedThe types of names handled by this function are not permitted to beschema-qualified or catalog-qualified.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.89 16792

**event trigger "@1@" already exists**

[Description]
An event trigger of same name is already exist

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.64.90 16793

**event triggers are not supported for @1@**

**Description**
Validate DDL command tags.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

2.64.91 16794

**event trigger "@1@" does not exist**

**Description**
event trigger does not exist.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

2.64.92 16795

**event trigger "@1@" does not exist, skipping**

**Description**
Generate a NOTICE stating that the named object was not found, and is being skipped. This is only relevant when "IF EXISTS" is used; otherwise, get_object_address() in RemoveObjects would have thrown an ERROR.

**System Processing**
Processing will be aborted.

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

2.64.93 16796

**event trigger with OID @1@ does not exist**

**Description**
event trigger with OID does not exist

**System Processing**
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.94 16797

exceeded maxAllocatedDescs (@1@) while trying to execute command "]@2@\"

[Description]
exceeded maxAllocatedDescs while trying to execute command

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.95 16798

Expected 1 tuple with 2 fields, got @1@ tuples with @2@ fields.

[Description]
Expected 1 tuple with 2 fields

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.64.96 16799

Expected array element or "]"", but found "@1@\"

[Description]
The context of the parser is maintained by the recursive descent mechanism, but is passed explicitly to the error reporting routine for better diagnostics.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65 Message Numbers Beginning with 16800

2.65.1 16800

Expected a transaction log switchpoint location.

[Description]
Expected a transaction log switchpoint location.
2.65.2 16801

Expected ":", but found "@1@"

[Description]
invalid input syntax for type json The context of the parser is maintained by the recursive descent mechanism, but is passed explicitly to the error reporting routine for better diagnostics.

2.65.3 16802

extended query protocol not supported in a replication connection

[Description]
'firstchar' specifies what kind of a forbidden message was received, and is used to construct the error message.

2.65.4 16803

fastpath function calls not supported in a replication connection

[Description]
'firstchar' specifies what kind of a forbidden message was received, and is used to construct the error message.

2.65.5 16804

field name must not be null

[Description]
If function is not marked "proisstrict" in pg_proc, it must check for null arguments using this macro. Do not try to GETARG a null argument!
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.65.6 16805**

**FILTER is not implemented for non-aggregate window functions**

[Description]
FILTER is not yet supported with true window functions

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.65.7 16806**

**filters not supported in LDAP URLs.**

[Description]
filters not supported in LDAP URLs.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.65.8 16807**

**FILTER specified, but @1@ is not an aggregate function**

[Description]
FILTER specified, but the function is not an aggregate function

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.65.9 16808**

**filter value "@1@" not recognized for filter variable "@2@"**

[Description]
Validate DDL command tags

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.65.10 16809

**filter variable "@1@" specified more than once**

**Description**

Complain about a duplicate filter variable.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

2.65.11 16810

**final function with extra arguments must not be declared STRICT**

**Description**

When finalfnExtraArgs is specified, the finalfn will certainly be passed at least one null argument, so complain if it’s strict.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

2.65.12 16811

**first argument of @1@ must be a row type**

**Description**

Convenience function to determine whether a type OID represents a "rowtype" type --- either RECORD or a named composite type.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

2.65.13 16812

**FORCE NULL column "@1@" not referenced by COPY**

**Description**

Convert FORCE NULL name list to per-column flags, check validity.

**System Processing**

Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.14 16813

**foreign key referenced-columns list must not contain duplicates**

[Description]
Reject duplicate appearances of columns in the referenced-columns list. Such a case is forbidden by the SQL standard, and even if we thought it useful to allow it, there would be ambiguity about how to match the list to unique indexes (in particular, it'd be unclear which indexopclass goes with which FK column).

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.15 16814

**Foreign tables cannot have constraint triggers.**

[Description]
Foreign key table does not contain constraint triggers

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.16 16815

**Foreign tables cannot have INSTEAD OF triggers.**

[Description]
Foreign tables cannot have INSTEAD OF triggers.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.17 16816

**Foreign tables cannot have TRUNCATE triggers.**

[Description]
Foreign tables cannot have TRUNCATE triggers.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.65.18 16817

**foreign table "@1@" does not allow deletes**

[Description]
foreign table does not allow deletes

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.19 16818

**foreign table "@1@" does not allow inserts**

[Description]
foreign table does not allow inserts

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.20 16819

**foreign table "@1@" does not allow updates**

[Description]
foreign table "%s" does not allow updates

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.21 16820

**foreign table "@1@" does not exist, skipping**

[Description]
the foreign table is not existing.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.65.22 16821

**format specifies argument 0, but arguments are numbered from 1**

[Description]
Explicit 0 for argument index is immediately refused

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.23 16822

**function returning record called in context that cannot accept type record**

[Description]
1. failed to determine actual type of RECORD function returning record called in context that cannot accept type record
2. get the tupdesc from the result set info - it must be a record type because we already checked that arg1 is a record type, or we're in ato_record function which returns a setof record.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.24 16823

**function @1@ must accept VARIADIC ANY to be used in this aggregate**

[Description]
If the agg is declared to take VARIADIC ANY, the underlying functions had better be declared that way too, else they may receive too many parameters; but func_get_detail would have been happy with plain ANY.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.25 16824

**function "@1@" must return type "event_trigger"**

[Description]
Find and validate the trigger function.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.65.26 16825

**hot standby is not possible because wal_level was not set to "hot_standby" or higher on the master server**

[Description]
For Hot Standby, the WAL must be generated with 'hot_standby' mode, and we must have at least as many backend slots as the primary.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.27 16826

**huge pages not supported on this platform**

[Description]
huge pages not supported on this platform if the value is 1

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.28 16827

**huge TLB pages not supported on this platform**

[Description]
huge pages not supported on this platform if the value is 1

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.29 16829

**index row size @1@ exceeds hash maximum @2@**

[Description]
Check whether the item can fit on a hash page at all. (Eventually, we ought to try to apply TOAST methods if not.) Note that at this point, itemsz doesn’t include the ItemId.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.65.30 16830

**Index row size @1@ exceeds maximum @2@ for index "@3@"**

[Description]
If the tuple would be too big to be stored, function throws a suitable error if errorTooBig is TRUE, or returns NULL if errorTooBig is FALSE.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.31 16831

**Index "@1@" cannot be used as replica identity because column "@2@" is nullable**

[Description]
Check index for nullable columns.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.32 16832

**Index "@1@" contains a half-dead internal page**

[Description]
Pre-9.4 page deletion only marked internal pages as half-dead, but now we only use that flag on leaf pages.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.33 16833

**Interval time zone "@1@" must not include months or days**

[Description]

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.34 16834

**Interval units "@1@" not supported because months usually have fractional weeks**
[Description]
  default condition of the switch statement with condition val

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.65.35 16835

invalid backup block size in record at @1@/@2@

[Description]
  Add in the backup blocks, if any

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.65.36 16836

invalid contrecord length @1@ at @2@/@3@

[Description]
  Cross-check that xlp_rem_len agrees with how much of the record we expect there to be left.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.65.37 16837

invalid flags for opening a large object: @1@

[Description]
  Large object descriptor, appropriately filled in. The descriptor and subsidiary data are allocated in the specified memory context, which must be suitably long-lived for the caller's purposes.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.65.38 16839

invalid input syntax for numeric time zone: "@1@"
Note pg_tzset happily parses numeric input that DecodeTimezone would reject. To avoid having it accept input that would otherwise be seen as invalid, it's enough to disallow having a digit in the first position of our input string.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.39 16840

invalid input syntax for type json

Per RFC4627, these characters MUST be escaped. Since *s isn't printable, exclude it from the context string.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.40 16841

invalid input syntax for type pg_lsn: "@1@"

Sanity check input format.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.41 16842

invalid large object write request size:@1@

the addition in the condition can't overflow because nbytes is only int32

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.42 16843

invalid line number: @1@
[Description]
validating the line number.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.43 16844

invalid line specification: A and B cannot both be zero
[Description]
invalid line specification: A and B cannot both be zero

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.44 16845

invalid line specification: must be two distinct points
[Description]
invalid line specification: must be two distinct points

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.45 16846

invalid locale name: "@1@"
[Description]
Check that the chosen locales are valid, and get canonical spellings

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.46 16847

invalid magic number @1@ in log segment @2@, offset @3@
[Description]
invalid magic number in log segment.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.65.47 16848**

**invalid message received from worker:@1@**

[Description]

Invalid message received from worker.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.65.48 16849**

**invalid MultiXactId: @1@**

[Description]

No work except at first MultiXactId of a page. But beware: just after wraparound, the first MultiXactId of page zero is FirstMultiXactId.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.65.49 16850**

**invalid page in block @1@ of relation @2@**

[Description]

verifying the page in block of relations

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.65.50 16851**

**invalid page in block @1@ of relation @2@; zeroing out page**

[Description]

invalid page in block of relation, zeroing out page
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.51 16852

invalid processing mode in background worker

it had better not gotten out of "init" mode yet

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.52 16853

invalid scale in external "numeric" value

invalid scale in external

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.53 16854

invalid timeline @1@

invalid timeline

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.54 16855

invalid value for "buffering" option

Validator for "buffering" reloption on GiST indexes. Allows "on", "off" and "auto" values.

Processing will be aborted.
[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.55 16856

invalid value for "check_option" option

[Description]

Validator for "check_option" reloption on views. The allowed values are "local" and "cascaded".

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.56 16857

invalid value for parameter "replication"

[Description]

Try to interpret value as boolean value. Valid values are: true,false, yes, no, on, off, 1, 0; as well as unique prefixes thereof. If the string parses okay, return true, else false. If okay and result is not NULL, return the value in *result.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.57 16858

invalid value for recovery parameter "recovery_target"

[Description]

the recovery parameter name should be "recovery_target" and the recovery parameter value should be "immediate".

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.58 16859

invalid value "@1@" for "@2@

[Description]

1. checking if the parsed character is greater than 0 and that parsed character is less than required.
2. check if the source is equal to init
3. if the length is not valid
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.59 16860

invalid whence setting: @1@

[Description]
Note: overflow in the additions is possible, but since we will reject negative results, we don't need any extra test for that.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.60 16861

JSON does not support infinite date values.

[Description]
XSD doesn't support infinite values. Infinity and minus infinity must be the max and min values of DateADT. We could use INT_MIN and INT_MAX here, but seems better to not assume that int32 == int.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.61 16862

JSON does not support infinite timestamp values

[Description]
XSD doesn't support infinite values

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.62 16863

Junk after closing right brace

[Description]
only whitespace is allowed after the closing brace. We used to use isspace() for parsing array values, but that has undesirable results: an array value might be silently interpreted differently depending on the locale setting. Now we just hard-wire the traditional ASCII definition of isspace().
2.65.63 16864

Junk view columns are not updatable

[Description]
the only updatable columns we support are those that are Vars referring to user columns of the underlying base relation. The view targetlist may contain resjunk columns (e.g., a view defined like "SELECT * FROM t ORDER BY a + b" is auto-updatable) but such columns are not auto-updatable, and in fact should never appear in the outer query’s targetlist.

2.65.64 16865

large object read request is too large

[Description]
A result_length calculated from loSize may not fit in a size_t. Check that the size will satisfy this and subsequently-enforced size limits.

2.65.65 16866

LIKE is not supported for creating foreign tables

[Description]
we could support LIKE in many cases, but worry about it another day

2.65.66 16867

lock file "@1@" is empty
Either another server is starting, or the lock file is the remnant of a previous server startup crash.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.67 16868

**logical decoding cannot be used while in recovery**

We check shared state each time only until we leave recovery mode. We can't re-enter recovery, so there's no need to keep checking after the shared variable has once been seen false. Note: We don't need a memory barrier when we're still in recovery. We might exit recovery immediately after return, so the caller can't rely on 'true' meaning that we're still in recovery anyway.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.68 16869

**logical decoding requires a database connection**

Make sure the current settings & environment are capable of doing logical decoding.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.69 16870

**logical decoding requires wal_level >= logical**

Make sure the current settings & environment are capable of doing logical decoding.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.70 16871

**lo_lseek result out of range for large-object descriptor @1@**
[Description]

guard against result overflow

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.71 16872

lo_tell result out of range for large-object descriptor @1@

[Description]

guard against result overflow

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.72 16873

malformed range literal: "@1@"

[Description]

first check for the empty range and then the rest should be whitespace, and then check if the string is not null terminated

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.73 16874

materialized views may not be defined using bound parameters

[Description]

A materialized view would either need to save parameters for use in maintaining/loading the data or prohibit them entirely. The latter seems safer and more sane.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.65.74 16875

materialized views must not use data-modifying statements in WITH
Prohibit a data-modifying CTE in the query used to create a materialized view. It's not sufficiently clear what the user would want to happen if the MV is refreshed or incrementally maintained.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.75 16876

materialized views must not use temporary tables or views

Check whether any temporary database objects are used in the creation query. It would be hard to refresh data or incrementally maintain it if a source disappeared.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.76 16877

mismatched array dimensions

take separate key and value arrays of text to construct a json object pairwise.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.77 16878

Missing array dimension value

Missing array dimension value

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.78 16879

more than one row returned for \gset
[Description]
StoreQueryTuple: assuming query result is OK, save data into variables

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.79 16880

moving-aggregate implementation returns type @1@, but plain implementation returns type @2@

[Description]
check if the moving-aggregate implementation returns type is not same as that of plain implementation returns type

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.80 16881

moving-aggregate transition function must not return null

[Description]
Moving-aggregate transition functions must not return null, for more see advance_windowaggregate_base().

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.81 16882

Multidimensional arrays must have sub-arrays with matching dimensions

[Description]
Multidimensional arrays must have sub-arrays with matching dimensions. ArrayCount will determines the dimensions for an array string.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.82 16883

multiple column definition lists are not allowed for the same function
check if the codelist and the range functions codelist i.e., the multiple column definition list for the same function

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.83 16884

MultiXactId @1@ does no longer exist -- apparent wraparound

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.84 16885

MultiXactId @1@ has not been created yet -- apparent wraparound

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.85 16886

must be owner of event trigger @1@

the MAX_ACL_KIND object types that can have privilege errors

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.65.86 16887

must be superuser or replication role to start walsender

Check replication permissions needed for walsender processes.
must be superuser or replication role to use replication slots

must be superuser or replication role to use replication slots

Must be superuser to alter settings globally

Must be superuser to alter settings globally.

must be superuser to COPY to or from an external program

Disallow COPY to/from file or program except to superusers.

Must be superuser to create an event trigger

It would be nice to allow database owners or even regular users to do this, but there are obvious privilege escalation risks which would have to somehow be plugged first.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.65.91 16892**

**must be superuser to execute ALTER SYSTEM command**

**Description**

must be superuser to execute ALTER SYSTEM command

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.65.92 16894**

**new data for "@1@" contains duplicate rows without any null columns**

**Description**

Note that this ereport() is returning data to the user. Generally, we would want to make sure that the user has been granted access to this data. However, REFRESH MAT VIEW is only able to be run by the owner of the mat view (or a superuser) and therefore there is no need to check for access to data in the mat view.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.65.93 16895**

**new row violates WITH CHECK OPTION for view "@1@"**

**Description**

WITH CHECK OPTION checks are intended to ensure that the new tuple is visible in the view. If the view’s qual evaluates to NULL, then the new tuple won’t be included in the view. Therefore we need to tell ExecQual to return FALSE for NULL (the opposite of what we do above for CHECK constraints).

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.65.94 16896**

**no Decimal attribute in module**
[Description]
the module is not contain any Decimal attribute.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.95 16897

no matching relations in tablespace "@1@" found

[Description]
there is no matching relations in tablespace.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.96 16898

no rows returned for \gset

[Description]
StoreQueryTuple: assuming query result is OK, save data into variables Returns true if successful, false otherwise.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.65.97 16899

not enough arguments for cursor "@1@"

[Description]
check the syntax immediately, instead of checking the final expression that may have the arguments reordered. Trailing whitespace must not be trimmed, because otherwise input of the form (param -- comment\n, param) would be translated into a form where the second parameter is commented out.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.66 Message Numbers Beginning with 16900

2.66.1 16900

not enough shared memory for data structure "@1@" (@2@ bytes requested)

[Description]
If the shmem index doesn't exist, we are bootstrapping: we must be trying to init the shmem index itself. Notice that the ShmemIndexLock is released before the shmem index has been initialized. This should be OK because no other process can be accessing shared memory yet.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.2 16901

not enough shared memory for elements of data structure "@1@" (@2@ bytes requested)

[Description]
not enough shared memory for elements of data structure

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.3 16902

null value not allowed for object key

[Description]
null value not allowed for object key

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.4 16903

number is out of range

[Description]
check if the number is coming out of range ie., in between 0 and 9.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.66.5 16904

**number of jsonb array elements exceeds the maximum allowed (@1@)**

[Description]

number of jsonb array elements exceeds the maximum allowed

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.6 16905

**number of jsonb object pairs exceeds the maximum allowed (@1@)**

[Description]

number of jsonb object pairs exceeds the maximum allowed

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.7 16906

**number of parameters must be between 0 and 65535**

[Description]

number of parameters must be between 0 and 65535

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.66.8 16907

**Numeric time zones must have "-" or "+" as first character.**

[Description]

The starting character of the numeric time zone should not digit.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.66.9 16908

numeric time zone "@1@" out of range

[Description]
DecodeTimezone()-Interpret string as a numeric timezone. Return 0 if okay (and set *tzp), a D Terraria code if not okay.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.10 16909

Object keys should be text

[Description]
If function is not marked "proisstrict" in pg_proc, it must check for null arguments using this macro. Do not try to GETARG a null argument!

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.11 16910

only ordered-set aggregates can be hypothetical

[Description]
Symbolic values for aggkind column. We distinguish normal aggregates from ordered-set aggregates (which have two sets of arguments, namely direct and aggregated arguments) and from hypothetical-set aggregates (which are a subclass of ordered-set aggregates in which the last direct arguments have to match up in number and datatypes with the aggregated arguments).

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.12 16911

only tables, indexes, and materialized views exist in tablespaces

[Description]
only tables, indexes, and materialized views exist in tablespaces

[System Processing]
Processing will be aborted.
2.66.13 16912

**operator not allowed in variable definition**

**[Description]**

operator not allowed in variable definition

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

2.66.14 16913

**option --if-exists requires option -c/--clean**

**[Description]**

option --if-exists requires option -c/--clean

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

2.66.15 16914

**outer-level aggregate cannot contain a lower-level variable in its direct arguments**

**[Description]**

Now check for vars/aggs in the direct arguments, and throw error if needed. Note that we allow a Var of the agg's semantic level, but not an Agg of that level. In principle such Aggs could probably be supported, but it would create an ordering dependency among the aggregates at execution time. Since the case appears neither to be required by spec nor particularly useful, we just treat it as a nested-aggregate situation.

**[System Processing]**

Processing will be aborted.

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

2.66.16 16915

**out-of-sequence timeline ID @1@ (after @2@) in log segment @3@, offset @4@**

**[Description]**

Since child timelines are always assigned a TLI greater than their immediate parent's TLI, we should never see TLI go backwards across successive pages of a consistent WAL sequence.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.17 16916

**OVER is not supported for ordered-set aggregate @1@**

[Description]
Window functions must be called with a window definition.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.18 16917

**page verification failed, calculated checksum @1@ but expected @2@**

[Description]
Throw a WARNING if the checksum fails, but only after we've checked for the all-zeroes case.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.19 16918

**parallel backup only supported by the directory format**

[Description]
Parallel backup only in the directory archive format so far

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.20 16919

**parameter "@1@" requires a temporal value**

[Description]
Parameter recovery_min_apply_delay requires a temporal value

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.66.21 16920

percentile value @1@ is not between 0 and 1

[Description]
percentile value should be in between 0 and 1.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.22 16921

permission denied for event trigger @1@

[Description]
the no_priv_msg array object is ACL_KIND_EVENT_TRIGGER

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.23 16922

permission denied to change owner of event trigger "@1"

[Description]
New owner must be a superuser

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.24 16923

permission denied to create event trigger "@1"

[Description]
It would be nice to allow database owners or even regular users to do this, but there are obvious privilege escalation risks which would have to somehow be plugged first.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.25 16924

**pg_largeobject entry for OID @1@, page @2@ has invalid data field size @3@**

[Description]
The size of the data field of pg_largeobject entry is less than 0 or greater than LOBLKSIZE.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.26 16926

**range constructor flags argument must not be null**

[Description]
range constructor flags argument must not be null

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.27 16927

**relation "@1@" in @2@ clause not found in FROM clause**

[Description]
The list cell is NULL for ensuring the SQL row locking clause such as FOR UPDATE is not found in FROM clause

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.28 16928

**removing elements from multidimensional arrays is not supported**

[Description]
We can't remove elements from multi-dimensional arrays, since the result might not be rectangular.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.66.29 16929

*renaming an ON SELECT rule is not allowed*

[Description]
We disallow renaming ON SELECT rules, because they should always be named ".RETURN".

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.30 16930

*replication slot file @1@: checksum mismatch, is @2@, should be @3@

[Description]
verify the CRCs.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.31 16931

*replication slot file "@1@" has corrupted length @2@

[Description]
boundary check on length

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.32 16932

*replication slot file "@1@" has unsupported version

[Description]
verify version

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.33 16933
replication slot file "@1@" has wrong magic @2@ instead of @3@

[Description]
verify magic

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.34 16934

replication slot name "@1@" contains invalid character

[Description]
Replication slot names may only contain letters, numbers, and the underscore character

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.35 16935

replication slot name "@1@" is too long

[Description]
Maximum length for identifiers (e.g. table names, column names, function names). Names actually are limited to one less byte than this, because the length must include a trailing zero byte.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.36 16936

replication slot name "@1@" is too short

[Description]
Check whether the passed slot name is valid and report errors at elevel.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.37 16937

Replication slot names may only contain letters, numbers, and the underscore character.
Replication slot names may only contain letters, numbers, and the underscore character.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.66.38 16938

replication slot "@1@" already exists

Check for name collision, and identify an allocatable slot. We need to hold ReplicationSlotControlLock in shared mode for this, so that nobody else can change the in_use flags while we're looking at them.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.66.39 16939

replication slots can only be used if max_replication_slots > 0.

replication slots can only be used if max_replication_slots > 0

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.66.40 16940

replication slots can only be used if wal_level >= archive

replication slots can only be used if wal_level >= archive

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.66.41 16941

replication slot "@1@" does not exist
[Description]
replication slot does not exist

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.42 16942

replication slot "@1@" is already active

[Description]
replication slot is already active

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.43 16943

replication slot "@1@" was not created in this database

[Description]
replication slot was not created in this database

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.44 16944

requested character not valid for encoding: @1@

[Description]
requested character not valid for encoding

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.45 16945

requested starting point @1@/@2@ is ahead of the WAL flush position of this server @3@/@4@
[Description]
requested starting point is ahead of the WAL flush position of this server

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.46 16946

requested starting point @1@/@2@ on timeline @3@ is not in this server's history

[Description]
requested starting point on timeline is not in this server's history

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.47 16947

requested timeline @1@ does not contain minimum recovery point @2@/@3@ on timeline @4@

[Description]
requested timeline does not contain minimum recovery point on timeline

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.48 16948

requested timeline @1@ is not a child of this server's history

[Description]
requested timeline is not a child of this server's history

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.49 16949

requested timeline @1@ is not in this server's history
[Description]
requested timeline is not in this server's history

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.50 16950

RETURNING list entry has type @1@, but column has type @2@.
[Description]
RETURNING list entry and column are of different types.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.51 16951

RETURNING must have at least one column
[Description]
RETURNING must have at least one column.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.52 16952

return type of inverse transition function @1@ is not @2@
[Description]
return type of inverse transition function must exactly match declared mtranstype

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.53 16953

row is too big: size @1@, maximum size @2@
[Description]
row is too big.

- 1211 -
[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

### 2.66.54 16954

**ROWS FROM() with multiple functions cannot have a column definition list**

[Description]
   ROWS FROM() with multiple functions cannot have a column definition list

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

### 2.66.55 16955

**rules on materialized views are not supported**

[Description]
   rules on materialized views are not supported

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

### 2.66.56 16956

**@1@ cannot be applied to a function**

[Description]
   cannot be applied to a function

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

### 2.66.57 16957

**@1@ cannot be applied to a join**

[Description]
   cannot be applied to a join

[System Processing]
   Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.58 16958
@1@ cannot be applied to a WITH query
[Description]
cannot be applied to a WITH query

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.59 16959
@1@ cannot be applied to the nullable side of an outer join
[Description]
cannot be applied to the nullable side of an outer join

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.60 16960
@1@ cannot be applied to VALUES
[Description]
cannot be applied to VALUES

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.61 16961
@1@: cannot cluster specific table(s) in all databases
[Description]
cannot cluster specific table(s) in all databases

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.66.62 16962

@1@: cannot reindex specific index(es) and system catalogs at the same time

[Description]
cannot reindex specific index(es) and system catalogs at the same time

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.63 16963

@1@: cannot reindex specific index(es) in all databases

[Description]
cannot reindex specific index(es) in all databases

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.64 16964

@1@: cannot reindex specific table(s) and system catalogs at the same time

[Description]
cannot reindex specific table(s) and system catalogs at the same time

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.65 16965

@1@: cannot reindex specific table(s) in all databases

[Description]
cannot reindex specific table(s) in all databases

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.66 16966
@1@: cannot use --create-slot or --drop-slot together with --startpos

[Description]
cannot use create-slot or drop-slot together with startpos

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.67 16967

@1@: cannot use --create-slot or --start together with --drop-slot

[Description]
cannot use create-slot or start-slot together while doing a drop-slot

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.68 16968

@1@: cannot vacuum specific table(s) in all databases

[Description]
cannot vacuum specific table(s) in all databases

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.69 16969

@1@ can only be called in a sql_drop event trigger function

[Description]
can only be called in a sql_drop event trigger function

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.70 16970

@1@: could not access directory "@2@": @3@
[Description]
Trouble in accessing directory

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.71 16971

@1@: could not allocate SIDs: error code @2@

[Description]
could not allocate security identifier(SID) and displays the last error returned by GetLastError(). (GetLastError() is a windows specific call which returns one of the 500 System Error Codes)

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.72 16972

@1@: could not change permissions of directory "@2@": @3@

[Description]
could not change permissions of directory

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.73 16973

@1@: could not change permissions of "@2@": @3@

[Description]
Here chmod takes the PGPATH as path and options as S_IRUSR | S_IWUSR

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.74 16974

@1@: could not close directory "@2@": @3@
[Description]
closedir syscall called and errno set accordingly

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.75 16975

@1@: could not create archive status file "<<@2@>>": @3@

[Description]
This open syscall takes a temporary path name and flags O_WRONLY | O_CREAT | PG_BINARY and mode as S_IRUSR | S_IWUSR

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.76 16976

@1@: could not create replication slot "<<@2@>>": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields

[Description]
could not create replication slot as rows is not equal to 1 and fields is not greater than or equal to 4

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.77 16977

@1@: could not create symbolic link "<<@2@>>": @3@

[Description]
while creating symbolic path for a Xlog directory or tablespace path

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.78 16978

@1@: could not create timeline history file "<<@2@>>": @3@
[Description]
This open syscall takes a temporary path name and flags O_WRONLY | O_CREAT | PG_BINARY and mode as S_IRUSR | S_IWUSR.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.79 16979

@1@: could not drop replication slot "@2@": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields

[Description]
could not drop replication slot as rows and fields are not equal to zero

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.80 16980

@1@: could not fetch default options

[Description]
The function Pqconndefaults() Constructs a default connection options array, which identifies all the available options and shows any default values that are available from the environment etc. On error (eg out of memory), NULL is returned.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.81 16981

@1@: could not find own program executable

[Description]
find_my_exec() finds an absolute path to a valid executable

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.82 16982

@1@: could not fsync file "@2@": @3@
[Description]
could not fsync file

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.83 16983

@1@: could not fsync log file "@2@": @3@

[Description]
could not fsync Log file.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.84 16984

@1@: could not identify system: got @2@ rows and @3@ fields, expected @4@ rows and @5@ or more fields

[Description]
Could not identify system as expected number of rows is not equal to 1 and number of fields is not greater than or equal to 3

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.85 16985

@1@: could not locate my own executable path

[Description]
find_my_exec() finds an absolute path to a valid executable

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.86 16986

@1@: could not open directory "@2@": @3@
[Description]
could not open directory

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.87 16987
@1@: could not open file "@2@": @3@

[Description]
could not open file

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.88 16988
@1@: could not open log file "@2@": @3@

[Description]
could not open log file

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.89 16989
@1@: could not open timeline history file "@2@": @3@

[Description]
could not open timeline history file

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.90 16990
@1@: could not parse next timeline's starting point "@2@"

[Description]
could not parse next timeline's starting point
[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.66.91 16991

@1@: could not parse start position "@2@"

[Description]
   could not parse start position

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.66.92 16992

@1@: could not read directory "@2@": @3@

[Description]
   could not read directory

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.66.93 16993

@1@: could not remove promote signal file "@2@": @3@

[Description]
   could not remove promote signal file

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.66.94 16994

@1@: could not rename file "@2@" to "@3@": @4@

[Description]
   could not rename file(Here we move the completed history file into place with its final name)

[System Processing]
   Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.95 16995

@1@: could not send copy-end packet: @2@

[Description]
PQputCopyEnd - send EOF indication to the backend during COPY IN. After calling this, use PQgetResult() to check command completion status. Returns 1 if successful, 0 if data could not be sent (only possible in nonblock mode), or -1 if an error occurs.
pqFlush - send any data waiting in the output buffer. Return 0 on success, -1 on failure and 1 when not all data could be sent because the socket would block and the connection is non-blocking.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.96 16996

@1@: could not stat file "@2@": @3@

[Description]
could not stat file

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.97 16997

@1@: could not write timeline history file "@2@": @3@

[Description]
This write operation happens while writing the history file to pg_xlog or Writing the history file to disk

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.66.98 16998

@1@: could not write @2@ bytes to log file "@3@": @4@

[Description]
could not write the bytes to log file
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.66.99 16999

@1@: directory name too long
[Description]

directory name too long

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.67 Message Numbers Beginning with 17000

2.67.1 17000

@1@: directory "@2@" does not exist
[Description]

directory does not exist, The errno ENOENT indicates that component of path does not exist, or path is an empty string.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.67.2 17001

@1@: directory "@2@" is not a database cluster directory
[Description]

directory is not a database cluster directory

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.67.3 17002

SELECT rule's target entry @1@ has different column name from column "@2@" cluster directory
rename is required to represent the correct column name in non-resjunk entries of top-level SELECT target lists, since it will be used as the column title sent to the frontend.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause

**2.67.4 17003**

**SELECT target entry has type @1@, but column has type @2@.**

SELECT column does not match target entry

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause

**2.67.5 17004**

**ShmemIndex entry size is wrong for data structure "@1@": expected @2@, actual @3@**

ShmemIndex entry size is wrong for data structure.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause

**2.67.6 17005**

**@1@: incompatible server version @2@; client does not support streaming from server versions newer than @3@**

incompatible server version, client does not support streaming from server. ServerMajor and maxServerMajor are calculated as follows; (serverMajor = PQserverVersion(conn) / 100 and maxServerMajor = PG_VERSION_NUM / 100); where PG_VERSION_NUM is 90401 and PQserverVersion returns the sversion; /* server version, e.g. 70401 for 7.4.1 */

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause
2.67.7 17006

@1@: incompatible server version @2@; client does not support streaming from server versions older than @3@

[Description]

incompatible server version; client does not support streaming from server. ServerMajor and minServerMajor are calculated as follows; (serverMajor = PQserverVersion(conn) / 100 and minServerMajor = 903; where PQserverVersion returns the server version; /* server version, e.g. 70401 for 7.4.1 */

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.8 17007

@1@: incompatible server version @2@

[Description]

incompatible server version; ServerMajor and maxServerMajor are calculated as follows; (minServerMajor = 903, serverMajor = PQserverVersion(conn) / 100 and maxServerMajor = PG_VERSION_NUM / 100; where PG_VERSION_NUM is 90401 and PQserverVersion returns the server version; /* server version, e.g. 70401 for 7.4.1 */

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.9 17008

@1@: invalid --max-rate unit: "@2@"

[Description]

after_num is obtained by passing src string to strtod

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.10 17009

@1@: invalid number of parallel jobs

[Description]

invalid number of parallel jobs

[System Processing]

Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.67.11 17010

@1@: invalid tablespace mapping format "@2@", must be "OLDDIR=NEWDIR"
[Description]
invalid tablespace mapping format

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.67.12 17011

@1@: invalid transfer rate "@2@": @3@
[Description]
invalid transfer rate

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.67.13 17012

@1@: invalid xlog-method option "@2@", must be "fetch" or "stream"
[Description]
invalid xlog-method option

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause

2.67.14 17013

@1@ is not allowed with aggregate functions
[Description]
The return type of function LCS_asString is not allowed with aggregate functions. In this error case, the return type of LCS_asString is "FOR some"

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause

2.67.15 17014

@1@ is not allowed with DISTINCT clause

[Description]

The return type of function LCS_asString is not allowed with aggregate functions. In this error case, the return type of LCS_asString is "FOR some"

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause

2.67.16 17015

@1@ is not allowed with GROUP BY clause

[Description]

The return string of LCS_asString() is not allowed with GROUP BY clause

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.17 17016

@1@ is not allowed with HAVING clause

[Description]

The return string of LCS_asString() is not allowed with HAVING clause

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.67.18 17017

@1@ is not allowed with set-returning functions in the target list

[Description]

The return string of LCS_asString() is not allowed with set-returning functions in the target list

[System Processing]

Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.67.19 17018

@1@ is not allowed with UNION/INTERSECT/EXCEPT

[Description]
The return string of LCS_asString() is not allowed with UNION/INTERSECT/EXCEPT

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.20 17019

@1@ is not allowed with window functions

[Description]
The return string of LCS_asString() is not allowed with window functions

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.21 17020

"@1@" is not a materialized view

[Description]
The Relation that is returned by RelationGetRelationName() is not a materialized view

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.22 17021

@1@ is not an ordered-set aggregate, so it cannot have WITHIN GROUP

[Description]
Normal aggregate, so it can't have WITHIN GROUP

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.67.23 17022

"@1@" is not a table, materialized view, composite type, or foreign table

[Description]
If the particular relation is not a table, materialized view, composite type, or foreign table

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.24 17023

"@1@" is not a table, materialized view, index, or foreign table

[Description]
The relation returned by the function RelationGetRelationName() is not a table, materialized view, index, or foreign table

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.25 17024

"@1@" is not a table, materialized view, or index

[Description]
The relation is not a table, materialized view, or index

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.26 17025

"@1@" is not a table or materialized view

[Description]
The relation is not a table or materialized view

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.27 17026
"@1@" is not a table, view, materialized view, composite type, index, or foreign table
[Description]
The relation is not a table, view, materialized view, composite type, index, or foreign table.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.28 17027

"@1@" is not a table, view, materialized view, composite type, or foreign table
[Description]
The relation is not a table, view, materialized view, composite type, or foreign table.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.29 17028

"@1@" is not a table, view, materialized view, index, or TOAST table
[Description]
The relation is not a table, view, materialized view, index, or TOAST table.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.30 17030

"@1@" is not a table, view, materialized view, sequence, or foreign table
[Description]
The relation is not a table, view, materialized view, sequence, or foreign table. Note: Don't allow ALTER TABLE. SET SCHEMA on relations that can't be moved to a different schema, such as indexes and TOAST tables.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.31 17031

"@1@" is not a table, view, or foreign table
The relation is not a table, view, or foreign table

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.67.32 17032

"@1@" is not a table, view, sequence, or foreign table

The relation is not a table, view, sequence, or foreign table

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.67.33 17033

@1@ must specify unqualified relation names

The return type of LCS_asString() must specify unqualified relation names

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.67.34 17034

snapbuild state file @1@: checksum mismatch, is @2@, should be @3@

snapbuild state file: checksum mismatch

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.67.35 17035

snapbuild state file "@1@" has unsupported version @2@ instead of @3@

snapbuild state file has unsupported version.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.67.36 17036

snapbuild state file "@1@" has wrong magic @2@ instead of @3@

[Description]
  snapbuild state file has wrong magic number

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.67.37 17037

@1@: new directory is not an absolute path in tablespace mapping: @2@

[Description]
  new directory is not an absolute path in tablespace mapping

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.67.38 17038

@1@: no database specified

[Description]
  no database specified for the given program name

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.67.39 17039

@1@: no slot specified

[Description]
  no slot specified for the given program name

[System Processing]
  Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.40 17040

SP-GiST inner tuple size @1@ exceeds maximum @2@

[Description]
SPGiST leaf tuple carries a datum and a heap tuple TID. Inner tuple should be small enough to fit on a page. Values larger than a buffer page cannot be indexed.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.41 17041

SSL failed to renegotiate connection before limit expired

[Description]
SSL failed to renegotiate connection before limit expired

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.42 17042

@1@: symlinks are not supported on this platform

[Description]
symlinks are not supported on this platform. Note: Define to 1 if you have the 'symlink' function.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.43 17043

@1@: transaction log directory location can only be specified in plain mode

[Description]
transaction log directory location can only be specified in plain mode

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.44 17044

@1@: transaction log directory location must be an absolute path

[Description]
transaction log directory location must be an absolute path

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.45 17045

@1@: transfer rate must be greater than zero

[Description]
transfer rate must be greater than zero

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.46 17046

@1@: transfer rate "@2@" exceeds integer range

[Description]
transfer rate exceeds integer range

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.47 17047

@1@: transfer rate "@2@" is not a valid value

[Description]
transfer rate is not a valid value Note: The second parameter is a out - parameter.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.67.48 17049

strictness of aggregate's forward and inverse transition functions must match

[Description]
strictness of aggregate's forward and inverse transition functions must match. Note: Insist that forward and inverse transition functions have the same strictness setting. Allowing them to differ would require handling more special cases in advance_windowaggregate and advance_windowaggregate_base, for no discernible benefit. This should have been checked at agg definition time, but we must check again in case either function's strictness property has been changed.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.49 17050

string too long to represent as jsonb string

[Description]
string too long to represent as jsonb string. Note: Due to an implementation restriction, jsonb strings cannot exceed 0xffffffff

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.50 17051

@1@: unexpected response to TIMELINE_HISTORY command: got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields

[Description]
unexpected response to TIMELINE_HISTORY command. Note: The response to TIMELINE_HISTORY is a single row result set with two fields: filename and content

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.51 17052

@1@: unexpected result set after end-of-timeline: got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields

[Description]
unexpected result set after end-of-timeline

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

**2.67.52 17053**

@1@: WAL streaming can only be used in plain mode

**Description**

WAL streaming can only be used in plain mode

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.67.53 17054**

system column "@1@" reference in check constraint is invalid

**Description**

system column reference in check constraint is invalid

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.67.54 17055**

time field value out of range: @1@:@2@:@3@

**Description**

time field value out of range

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.67.55 17056**

timestamp out of range: @1@-@2@-@3@ @4@:@5@:@6@

**Description**

timestamp out of range

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.
2.67.56 17057

too many background workers

[Description]
too many background workers

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.57 17058

too many column names were specified

[Description]
too many column names were specified

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.58 17059

too many dynamic shared memory segments

[Description]
too many dynamic shared memory segments

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.59 17060

too many lexemes in thesaurus entry

[Description]
too many lexemes in thesaurus entry. Note: currently, tsearch_readline can't return lines exceeding 4KB, so overflow of the word counts is impossible. But that may not always be true, so let's check.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.67.60 17061
too many replication slots active before shutdown

[Description]
too many replication slots active before shutdown

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.61 17062
total size of jsonb array elements exceeds the maximum of @1@ bytes

[Description]
Total size of jsonb array elements exceeds the maximum of 0xFFFFFFFF bytes

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.62 17063
total size of jsonb object elements exceeds the maximum of @1@ bytes

[Description]
total size of jsonb object elements exceeds the maximum of 0xFFFFFFFF bytes

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.63 17064
tuple to be updated was already modified by an operation triggered by the current command

[Description]
tuple to be updated was already modified by an operation triggered by the current command

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.64 17065
type modifier cannot have ORDER BY

[Description]
    type modifier cannot have ORDER BY

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.67.65 17066

"TZ"/"tz"/"OF" format patterns are not supported in to_date

[Description]
    format patterns are not supported in to_date

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.67.66 17067

\u0000 cannot be converted to text.

[Description]
    \u0000 cannot be converted to text. Note: The function report_json_context() reports a CONTEXT line for bogus JSON input.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.67.67 17068

Unexpected array element.

[Description]
    Unexpected array element.

[System Processing]
    Processing will be aborted.

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.67.68 17070

unexpected pageaddr @1@/@2@ in log segment @3@, offset @4@
unexpected pageaddr in log segment offset

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

unexpected previous timeline ID @1@ (current timeline ID @2@) in checkpoint record

unexpected previous timeline ID in checkpoint record

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

unexpected result after CommandComplete: @1@

unexpected result after CommandComplete

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

unexpected result set after end-of-streaming

unexpected result set after end-of-streaming

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

---

unexpected result status for \watch

unexpected result status for \watch
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.67.73 17075

unexpected standby message type "@1@", after receiving CopyDone

[Description]
  unexpected standby message type ,after receiving CopyDone . Note :If we already received a CopyDone from the frontend, the frontend should not send us anything until we've closed our end of the COPY.XXX: In theory, the frontend could already send the next command before receiving the CopyDone, but libpq doesn't currently allow that.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.67.74 17076

unexpected timeline ID @1@ in checkpoint record, before reaching minimum recovery point @2@/@3@ on timeline @4@

[Description]
  unexpected timeline ID %u in checkpoint record, before reaching minimum recovery point %X/%X on timeline %u

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.67.75 17077

unexpected timeline ID @1@ in log segment @2@, offset @3@

[Description]
  unexpected timeline ID in log segment.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.67.76 17078

Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8.
Unicode escape values cannot be used for code point values above 007F when the server encoding is not UTF8.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.67.77 17079**

**Unicode high surrogate must not follow a high surrogate.**

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.67.78 17080**

**Unicode low surrogate must follow a high surrogate.**

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.67.79 17081**

**UNNEST() with multiple arguments cannot have a column definition list**

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.67.80 17082**

**unsupported LDAP URL scheme: @1@**

unsupported LDAP URL scheme
2.67.81 17083

**unsupported Unicode escape sequence**

[Description]
unsupported Unicode escape sequence

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.82 17084

**unterminated format specifier**

[Description]
unterminated format specifier

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.83 17085

**UTC timezone offset is out of range.**

[Description]
UTC timezone offset is out of range.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.84 17086

**variable "@1@" shadows a previously defined variable**

[Description]
shadows a previously defined variable

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.85 17087

VARIADIC argument must be an array
[Description]
VARIADIC argument must be an array

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.86 17088

\watch cannot be used with an empty query
[Description]
\watch cannot be used with an empty query.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.87 17089

\watch cannot be used with COPY
[Description]
\watch cannot be used with COPY

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.88 17090

WHERE CURRENT OF is not supported for this table type
[Description]
WHERE CURRENT OF is not supported for this table type

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.67.89 17091

**window functions are not allowed in check constraints**

[Description]
window functions are not allowed in check constraints.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.90 17092

**window functions are not allowed in DEFAULT expressions**

[Description]
window functions are not allowed in DEFAULT expressions.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.91 17093

**window functions are not allowed in EXECUTE parameters**

[Description]
window functions are not allowed in EXECUTE parameters

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.92 17094

**window functions are not allowed in functions in FROM**

[Description]
window functions are not allowed in functions in FROM

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.93 17095
window functions are not allowed in index expressions

[Description]
window functions are not allowed in index expressions

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.94 17096

window functions are not allowed in index predicates

[Description]
window functions are not allowed in index predicates

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.95 17097

window functions are not allowed in JOIN conditions

[Description]
window functions are not allowed in JOIN conditions

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.96 17098

window functions are not allowed in expression kind

[Description]
window functions are not allowed in expression kind

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.67.97 17099

window functions are not allowed in transform expressions
window functions are not allowed in transform expressions

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.68 Message Numbers Beginning with 17100

2.68.1 17100

window functions are not allowed in trigger WHEN conditions

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.68.2 17101

window functions are not allowed in window definitions

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.68.3 17102

window function @1@ cannot have WITHIN GROUP

processing cannot have WITHIN GROUP Note: And, per spec, WITHIN GROUP isn't allowed.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.68.4 17103

window function @1@ requires an OVER clause
window function requires an OVER clause. Note: True window functions must be called with a window definition.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.68.5 17104

WITH CHECK OPTION is supported only on automatically updatable views

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.68.6 17105

WITH CHECK OPTION not supported on recursive views

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.68.7 17106

WITHIN GROUP is required for ordered-set aggregate @1@

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.68.8 17107

WITHIN GROUP specified, but @1@ is not an aggregate function

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.68.9 17108

WITH ORDINALITY cannot be used with a column definition list

[Description]
  WITH ORDINALITY cannot be used with a column definition list

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.68.10 17109

tablespace encryption algorithm option can not be changed

[Description]
  tablespace_encryption_algorithm option can not be changed with alter tablespace.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.68.11 17110

result of USING clause for column "@1@" cannot be cast automatically to type @2@

[Description]
  USING clause column value cannot be typecasted automatically to new column type specified.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.68.12 17111

could not parse contents of file "@1@"

[Description]
  Postgresql auto configuration file cannot be parsed

[System Processing]
  Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.13 17114

**must be a superuser to cancel superuser query**

[Description]
Only super user can execute this function

[System Processing]
processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.14 17115

**could not change directory to "@1@": @2@**

[Description]
pg_resetxlog process cannot change the directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.15 17116

**pclose failed: @1@**

[Description]
pclose system call failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.16 17117

**cannot duplicate null pointer (internal error)**

[Description]
Null pointer cannot be duplicated

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.68.17 17118

**out of memory**

[Description]
Process runs out of memory

[System Processing]
Process aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.18 17119

@1@: **WARNING: cannot create restricted tokens on this platform**

[Description]
Restricted Tokens cannot be created

[System Processing]
WARNING is issued

[Action]
To investigate the cause of the occurrence from the message, and remove cause for the WARNING.

2.68.19 17120

@1@: **could not open process token: error code @2@**

[Description]
Cannot open the process Token

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.20 17121

@1@: **could not allocate SIDs: error code @2@**

[Description]
Cannot allocate the SIDs

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.21 17122
@1@: could not create restricted token: error code @2@

[Description]
Restricted token could not be created

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.22 17123

@1@: could not start process for command "@2@": error code @3@

[Description]
Process could not be started

[System Processing]
Processing could not be initiated

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.23 17124

@1@: could not re-execute with restricted token: error code @2@

[Description]
Restricted Token cannot be re-executed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.24 17125

@1@: could not get exit code from subprocess: error code @2@

[Description]
Cannot exit from the sub process

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.25 17126

user does not exist
user does not exist

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.26 17127

user name lookup failure: error code @1@

user does not exist

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.27 17128

command not found

Command cannot be found

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.28 17129

command not executable

Command is not executable

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.29 17130

could not determine encoding for codeset "@1"

Corresponding local could not found in PostgreSQL.
Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.30 17131

could not get junction for "@1@": @2@

could not get junction

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.31 17132

could not get junction for "@1@": @2@

could not get junction

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.32 17133

lock violation

Antivirus software or some other similar software has locked the database file

Process trying to access the file continues and retries after every 30 seconds

To investigate the cause of the occurrence from the message, and remove cause.

2.68.33 17134

sharing violation

Antivirus software or some other similar software has locked the database file

Process trying to access the file continues and retries after every 30 seconds
To investigate the cause of the occurrence from the message, and remove cause.

2.68.34 17135

could not get current working directory: @1@

[Description]
The current working directory path cannot be found

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.35 17136

unrecognized error @1@

[Description]
Error could not be recognized

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.36 17138

index row size @1@ exceeds maximum @2@ for index "@3@"

[Description]
The row size of the Index exceeded the maximum limit

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.37 17139

unexpected page type 0x@1@ in BRIN index "@2@" block @3@

[Description]
Unexpected page type in BRIN index

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
**2.68.38 17141**

invalid value for "tablespace encryption algorithm" option

[Description]
Value specified for tablespace encryption algorithm is invalid. Acceptable values are "none", "AES128" and "AES256".

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.68.39 17142**

invalid value for "buffering" option

[Description]
Invalid value provided for reloption on buffering of Gist Indexes. Acceptable valid values are "on", "off", and "auto"

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.68.40 17143**

cannot access temporary tables during a parallel operation

[Description]
Temporary tables cannot be accessed during parallel operation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.68.41 17144**

cannot insert tuples during a parallel operation

[Description]
Tuples cannot be inserted during the parallel operation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.68.42 17146

attemped to delete invisible tuple

[Description]

An attempt has been made to delete an invisible tuple

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.43 17147

cannot update tuples during a parallel operation

[Description]

Tuples cannot be updated during the parallel operation

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.44 17148

attemped to update invisible tuple

[Description]

An attempt has been made to update an invisible tuple

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.45 17149

could not truncate file "@1@" to @2@: @3@

[Description]

File could not be truncated due to inaccessibility of the file or file's location

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.68.46 17150
index "@1@" contains a half-dead internal page

[Description]
Index page is corrupted. This is no harm for processes performing searches. This can be fixed by RE-INDEXING.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.47 17151

sample percentage must be between 0 and 100

[Description]
Sample percentage for sample scan must be between 0 and 100

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.48 17152

cannot retrieve commit timestamp for transaction @1@

[Description]
Cannot retrieve commit timestamp for uncommitted transactions

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.49 17153

could not get commit timestamp data

[Description]
Could not get commit timestamp data. "track_commit_timestamp" parameter must be configured

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.50 17154

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database "@1@"
Database is not accepting any commands due to transaction wrap around issue. This can be fixed by vacuuming the database and committing/rolling-back the old unfinished prepared transactions.

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.68.51 17155**

database is not accepting commands that generate new MultiXactIds to avoid wraparound data loss in database with OID @1@

Database is not accepting any commands due to transaction wrap around issue. This can be fixed by vacuuming the database and committing/rolling-back the old unfinished prepared transactions.

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.68.52 17156**
multixact "members" limit exceeded

Multixact members limit exceeded. Execute a database-wide VACUUM in database with OID %u with reduced vacuum_multixact_freeze_min_age and vacuum_multixact_freeze_table_age settings.

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.68.53 17157**

MultiXactId @1@ does no longer exist -- apparent wraparound

MultiXactID does not exist. Transaction wrap around completed

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.
2.68.54 17158

**MultiXactId @1@ has not been created yet -- apparent wraparound**

[Description]
multixactId has not been created. Possible transaction wrap around has happened.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.55 17160

**postmaster exited during a parallel transaction**

[Description]
postmaster exited during a parallel transaction

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.56 17165

**cannot PREPARE a transaction that has exported snapshots**

[Description]
cannot PREPARE a transaction that has exported snapshots

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.57 17166

**cannot commit during a parallel operation**

[Description]
cannot commit during a parallel operation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.58 17167
cannot abort during a parallel operation

[Description]
cannot abort during a parallel operation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.59 17168

cannot define savepoints during a parallel operation

[Description]
cannot define savepoints during a parallel operation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.60 17169

cannot release savepoints during a parallel operation

[Description]
cannot release savepoints during a parallel operation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.61 17170

cannot rollback to savepoints during a parallel operation

[Description]
cannot rollback to savepoints during a parallel operation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.62 17171

cannot start subtransactions during a parallel operation
cannot start subtransactions during a parallel operation

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.63 17172

cannot commit subtransactions during a parallel operation

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.64 17173

could not open transaction log file "$@1@$": $@2@$

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.65 17174

new timeline $@1@$ forked off current database system timeline $@2@$ before current recovery point $@3@$/$@4@$

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.66 17177

parameter "$@1@$" requires a temporal value
[Description]
recovery_min_apply_delay parameter requires a temporal value

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.67 17178

requested timeline @1@ does not contain minimum recovery point @2@/@3@ on timeline @4@

[Description]
minimum recovery point must be part of requested timeline's history

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.68 17179

This means that the backup is corrupted and you will have to use another backup for recovery.

[Description]
This means that the backup is corrupted and you will have to use another backup for recovery

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.69 17180

unexpected previous timeline ID @1@ (current timeline ID @2@) in checkpoint record

[Description]
unexpected previous timeline ID in checkpoint record. Check that the checkpoint record agrees with the current time line.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.70 17181

unexpected timeline ID @1@ in checkpoint record, before reaching minimum recovery point @2@/@3@ on timeline @4@
unexpected timeline ID in checkpoint record, before reaching minimum recovery point on timeline

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.71 17182

could not fsync log file @1@: @2@

could not fsync the log file. Check that the file exists and is available/accessible with appropriate permissions

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.72 17183

could not stat trigger file "@1@": @2@

Could not stat trigger file. Checking for the existence of trigger file. Ensure that the trigger file exists with appropriate permissions

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.73 17184

invalid privilege type @1@ for type

invalid privilege type for object

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.74 17185

invalid privilege type @1@ for column
Invalid privilege type for the column

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.75 17186

permission denied for event trigger @1@

permission denied on the trigger

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.76 17187

event trigger with OID @1@ does not exist

Trigger being accessed does not exist

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.77 17188

constant of the type "regrole" cannot be used here

constant of the type regrole cannot be used here

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.68.78 17189

pg_class index OID value not set when in binary upgrade mode

pg_class index OID value not set when in binary upgrade mode
2.68.79 17190

could not obtain lock on relation "@1@"

[Description]
Lock on a relation could not be obtained. Check the blocking process

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.80 17191

cannot create temporary tables in parallel mode

[Description]
cannot create temporary tables in parallel mode

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.81 17192

role name cannot be qualified

[Description]
role name cannot be qualified

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.68.82 17193

schema name cannot be qualified

[Description]
schema name cannot be qualified

[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.68.83 17194**

`language name cannot be qualified`

**[Description]**
language name cannot be qualified

**[System Processing]**
Processing aborts

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

**2.68.84 17195**

`server name cannot be qualified`

**[Description]**
server name cannot be qualified

**[System Processing]**
Processing aborts

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

**2.68.85 17196**

`event trigger name cannot be qualified`

**[Description]**
event trigger name cannot be qualified

**[System Processing]**
Processing aborts

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

**2.68.86 17197**

"@1@" is not a materialized view

**[Description]**
The object type being accessed is not a materialized view

**[System Processing]**
Processing aborts

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.
2.68.87 17198

**default value for column "@1@" of relation "@2@" does not exist**

*Description*

default value for column of relation does not exist

*System Processing*

Processing aborts

*Action*

To investigate the cause of the occurrence from the message, and remove cause.

2.68.88 17199

**operator @1@ (@2@, @3@) of @4@ does not exist**

*Description*

operator does not exist

*System Processing*

Processing aborts

*Action*

To investigate the cause of the occurrence from the message, and remove cause.

2.69 Message Numbers Beginning with 17200

2.69.1 17200

**function @1@ (@2@, @3@) of @4@ does not exist**

*Description*

function being accessed does not exist. Check if the function is existing with appropriate permissions and search_path settings

*System Processing*

Processing aborts

*Action*

To investigate the cause of the occurrence from the message, and remove cause.

2.69.2 17201

**user mapping for user "@1@" on server "@2@" does not exist**

*Description*

user mapping for user in server does not exists. Check the mapping user while creating foreign tables

*System Processing*

Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.69.3 17202

unrecognized default ACL object type @1@

[Description]
ACL object type is unrecognized. Valid object types are \"r\", \"S\", \"f\", and \"T\"

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.4 17203

default ACL for user \"@1@\" in schema \"@2@\" on @3@ does not exist

[Description]
default ACL for user in schema on does not exist

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.5 17204

default ACL for user \"@1@\" on @2@ does not exist

[Description]
default ACL for user on does not exist

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.6 17205

name or argument lists may not contain nulls

[Description]
name or argument lists may not contain nulls

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.69.7 17206

unsupported object type "@1@

[Description]
unsupported object type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.8 17207

name list length must be exactly @1@

[Description]
name list length must be exactly 1

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.9 17208

large object OID may not be null

[Description]
large object OID may not be null

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.10 17210

argument list length must be exactly @1@

[Description]
argument list length must be exactly 1

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.11 17211
name list length must be at least 1

[Description]
name list length must be at least 1

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.12 17212

unrecognized object type "@1@"

[Description]
unrecognized object type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.13 17213

aggregates cannot have more than 1 argument

[Description]
aggregates cannot have more than 1 argument

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.14 17215

a variadic ordered-set aggregate must use VARIADIC type ANY

[Description]
a variadic ordered-set aggregate must use VARIADIC type ANY

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.15 17216

a hypothetical-set aggregate must have direct arguments matching its aggregated arguments
[Description]
a hypothetical-set aggregate must have direct arguments matching its aggregated arguments

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.16 17218

strictness of aggregate's forward and inverse transition functions must match

[Description]
strictness of aggregate's forward and inverse transition functions must match

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.17 17219

final function with extra arguments must not be declared STRICT

[Description]
final function with extra arguments must not be declared STRICT

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.18 17220

moving-aggregate implementation returns type @1@, but plain implementation returns type @2@

[Description]
moving-aggregate implementation returns type one type but plain implementation returns type other type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.19 17221

function @1@ must accept VARIADIC ANY to be used in this aggregate
The function must accept VARIADIC ANY to be used in this aggregate

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.69.20 17222**

```markdown
constraint "@1@" for domain "@2@" does not exist
```

The constraint for domain does not exist. Check the constraint name

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.69.21 17223**

```markdown
enum label "@1@" already exists
```

enum label already exists

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.69.22 17224**

```markdown
pg_enum OID value not set when in binary upgrade mode
```

pg_enum OID value not set when in binary upgrade mode

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.69.23 17225**

```markdown
pg_type OID value not set when in binary upgrade mode
```

pg_type OID value not set when in binary upgrade mode
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.24 17226

"@1@" is not a table or materialized view

[Description]
The object referenced by pg_stattuple utility is not a table or materialized view

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.25 17227

only ordered-set aggregates can be hypothetical

[Description]
only ordered-set aggregates can be hypothetical

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.26 17228

aggregate msfunc must be specified when mstype is specified

[Description]
aggregate msfunc must be specified when mstype is specified

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.27 17229

aggregate minvfunc must be specified when mstype is specified

[Description]
aggregate minvfunc must be specified when mstype is specified

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.28 17230
aggregate msfunc must not be specified without mstype

[Description]
aggregate msfunc must not be specified without mstype

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.29 17231
aggregate minvfunc must not be specified without mstype

[Description]
aggregate minvfunc must not be specified without mstype

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.30 17232
aggregate msspace must not be specified without mstype

[Description]
aggregate msspace must not be specified without mstype

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.31 17233
aggregate minitcond must not be specified without mstype

[Description]
aggregate minitcond must not be specified without mstype

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.69.32 17234

**event trigger "@1@" already exists**

[Description]

event trigger already exists

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.33 17236

**could not write to COPY program: @1@**

[Description]

could not write to COPY program: %m

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.34 17237

**must be superuser to COPY to or from an external program**

[Description]

Only superuser can COPY to or from an external program

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.35 17238

**COPY FROM not supported with row-level security**

[Description]

COPY FROM an external file is not supported when row level security is enabled. Use INSERT statements instead

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.69.36 17239
COPY force null available only in CSV mode

[Description]
COPY force null available only in CSV mode

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.37 17240

COPY force null only available using COPY FROM

[Description]
COPY force null only available using COPY FROM

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.38 17241

relation referenced by COPY statement has changed

[Description]
relation referenced by COPY statement has changed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.39 17242

could not close pipe to external command: @1@

[Description]
could not close pipe to external command

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.40 17243

program "@1" failed
[Description]
program has failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.41 17244

could not execute command "@1@": @2@

[Description]
could not execute command

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.42 17245

cannot copy to materialized view "@1@"

[Description]
cannot copy to materialized view

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.43 17246

cannot perform FREEZE because of prior transaction activity

[Description]
cannot perform FREEZE because of prior transaction activity

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.44 17247

cannot perform FREEZE because the table was not created or truncated in the current subtransaction
cannot perform FREEZE because the table was not created or truncated in the current subtransaction

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.69.45 17248

too many column names were specified

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.69.46 17249

policies not yet implemented for this command

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.69.47 17250

invalid locale name: "@@1@@"

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.69.48 17251

database "@@1@@" is used by a logical replication slot

The database referenced is used by a logical replication slot.
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.49 17252

option "@1@" cannot be specified with other options

[Description]
When invoking alter database command option cannot be specified with other options

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.50 17253

cannot disallow connections for current database

[Description]
cannot disallow connections for current database

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.51 17254

permission denied to create event trigger "@1@"

[Description]
Permission denied to create event trigger. Must be superuser to create an event trigger.Check permissions on trigger

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.52 17255

unrecognized event name "@1@"

[Description]
Unrecognized event name. Acceptable event name must be provided

[System Processing]
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.69.53 17256

unrecognized filter variable "@1@

[Description]
unrecognized filter variable

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.54 17259

event triggers are not supported for @1@

[Description]
event triggers are not supported for certain type of SQL statements

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.55 17260

filter variable "@1@" specified more than once

[Description]
filter variable specified more than once

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.56 17261

event trigger "@1@" does not exist

[Description]
Referenced event trigger does not exist

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.69.57 17262

**permission denied to change owner of event trigger "@1@"**

[Description]
permission denied to change owner of event trigger. The owner of an event trigger must be a superuser

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.58 17263

@1@ can only be called in a sql_drop event trigger function

[Description]
The function pg_event_trigger_dropped_objects() can only be called in a sql_drop event trigger function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.59 17264

@1@ can only be called in a table_rewrite event trigger function

[Description]
The function pg_event_trigger_table_rewrite_oid() can only be called in a table_rewrite event trigger function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.60 17265

@1@ can only be called in an event trigger function

[Description]
The function pg_event_trigger_ddl_commands() can only be called in a event trigger function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.61 17267
aggregates cannot accept set arguments
[Description]
aggregates cannot accept set arguments
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.62 17268
transform function must not be volatile
[Description]
transform function must not be volatile
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.63 17269
transform function must not be an aggregate function
[Description]
transform function must not be an aggregate function
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.64 17270
transform function must not be a window function
[Description]
transform function must not be a window function
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.65 17271
transform function must not return a set
transform function must not return a set

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.66 17272

transform function must take one argument

[Description]
transform function must take one argument

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.67 17273

first argument of transform function must be type "internal"

[Description]
first argument of transform function must be type internal

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.68 17274

data type @1@ is a pseudo-type

[Description]
data type referenced is a pseudo-type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.69 17275

data type @1@ is a domain

[Description]
data type is a domain
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.69.70 17276**

*return data type of FROM SQL function must be "internal"*

[Description]
return data type of FROM SQL function must be internal

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.69.71 17277**

*return data type of TO SQL function must be the transform data type*

[Description]
return data type of TO SQL function must be the transform data type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.69.72 17278**

*transform for type @1@ language "@2@" already exists*

[Description]
transform for type language already exists

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.69.73 17279**

*transform for type @1@ language "@2@" does not exist*

[Description]
transform for type language does not exist

[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.74 17280

operator class "@1@" does not exist for access method "@2@"

[Description]
operator class does not exist for access method

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.75 17281

CONCURRENTLY cannot be used when the materialized view is not populated

[Description]
CONCURRENTLY cannot be used when the materialized view is not populated

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.76 17282

CONCURRENTLY and WITH NO DATA options cannot be used together

[Description]
CONCURRENTLY and WITH NO DATA options cannot be used together

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.77 17283

new data for materialized view "@1@" contains duplicate rows without any null columns

[Description]
new data for materialized view contains duplicate rows without any null columns

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.69.78 17284

**WITH CHECK cannot be applied to SELECT or DELETE**

[Description]
WITH CHECK cannot be applied to SELECT or DELETE

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.79 17285

**only WITH CHECK expression allowed for INSERT**

[Description]
only WITH CHECK expression allowed for INSERT

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.80 17286

**policy "@1@" for table "@2@" already exists**

[Description]
policy attempted to create for table already exists

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.81 17287

**policy "@1@" for table "@2@" does not exist**

[Description]
Policy being attempted to alter does not exist

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.82 17288
only USING expression allowed for SELECT, DELETE

[Description]
only USING expression allowed for SELECT, DELETE

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.83 17289

referenced relation "@1@" is not a table or foreign table

[Description]
Relation referenced by CREATE OR ALTER TABLE is not a regular table or foreign table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.84 17290

materialized view "@1@" does not exist

[Description]
materialized view "@1@" does not exist

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.85 17291

Use DROP MATERIALIZED VIEW to remove a materialized view.

[Description]
Use DROP MATERIALIZED VIEW to remove a materialized view

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.86 17293

inherited constraint "@1@" must be renamed in child tables too
[Description]
inherited constraint must be renamed in child tables too

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.87 17294

cannot rename inherited constraint "@1@

[Description]
cannot rename inherited constraint

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.88 17295

cannot rewrite table "@1@" used as a catalog table

[Description]
cannot rewrite table used as a catalog table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.89 17296

"@1@" is not a table, view, or foreign table

[Description]
this is not a table, view, or foreign table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.90 17297

"@1@" is not a table, view, materialized view, or index

[Description]
object referenced is not a table, view, materialized view, or index
2.69.91 17298
"@1@" is not a table, materialized view, or foreign table
[Description]
object referenced is not of a type table, materialized view, or foreign table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.69.92 17299
constraint "@1@" of relation "@2@" is not a foreign key or check constraint
[Description]
constraint of relation is not a foreign key or check constraint

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70 Message Numbers Beginning with17300

2.70.1 17301
"@1@" is not a table, view, sequence, or foreign table
[Description]
object type is not a table, view, sequence, or foreign table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.2 17302
WITH CHECK OPTION is supported only on automatically updatable views
[Description]
WITH CHECK OPTION is supported only on automatically updatable views
Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.70.3 17303**

*only tables, indexes, and materialized views exist in tablespaces*

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.70.4 17304**

cannot move relations in to or out of pg_global tablespace

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.70.5 17305**

aborting because lock on relation "@1@.@2@" is not available

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.70.6 17306**

no matching relations in tablespace "@1@" found

Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.70.7 17307

invalid page in block @1@ of relation @2@

[Description]
invalid page in block of relation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.8 17308

cannot use non-unique index "@1@" as replica identity

[Description]
cannot use non-unique index as replica identity

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.9 17309

cannot use non-immediate index "@1@" as replica identity

[Description]
cannot use non-immediate index as replica identity

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.10 17310

cannot use expression index "@1@" as replica identity

[Description]
cannot use expression index as replica identity

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.70.11 17311

**cannot use partial index "@1@" as replica identity**

[Description]

cannot use partial index "%s" as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.12 17312

**cannot use invalid index "@1@" as replica identity**

[Description]

cannot use invalid index as replica identity

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.13 17313

**index "@1@" cannot be used as replica identity because column "@2@" is nullable**

[Description]

index "%s" cannot be used as replica identity because column "%s" is nullable

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.70.14 17319

**could not create an encrypted tablespace because the keystore is not open**

[Description]

could not create an encrypted tablespace because the keystore is not open. Open the existing keystore, or set the master encryption key to create and open a new keystore

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.70.15 17321

**tablespace encryption algorithm option cannot be changed**

[Description]
- tablespace encryption algorithm option cannot be changed

[System Processing]
- Processing aborts

[Action]
- To investigate the cause of the occurrence from the message, and remove cause.

2.70.16 17323

**Foreign tables cannot have INSTEAD OF triggers.**

[Description]
- Foreign tables cannot have INSTEAD OF triggers.

[System Processing]
- Processing aborts

[Action]
- To investigate the cause of the occurrence from the message, and remove cause.

2.70.17 17326

**tuple to be updated was already modified by an operation triggered by the current command**

[Description]
- Tuple to be updated was already modified by an operation triggered by the current command. Consider using an AFTER trigger instead of a BEFORE trigger to propagate changes to other rows.

[System Processing]
- Processing aborts

[Action]
- To investigate the cause of the occurrence from the message, and remove cause.

2.70.18 17327

**function @1@ should return type @2@**

[Description]
- Function should return an acceptable type

[System Processing]
- Processing aborts

[Action]
- To investigate the cause of the occurrence from the message, and remove cause.
**2.70.19 17328**

**check constraints for domains cannot be marked NO INHERIT**

[Description]
check constraints for domains cannot be marked NO INHERIT

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.70.20 17329**

**range subtype cannot be @1@**

[Description]
range subtype cannot be of psuedo type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.70.21 17330**

**range canonical function @1@ must return range type**

[Description]
range canonical function must return range type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.70.22 17331**

**pg_type array OID value not set when in binary upgrade mode**

[Description]
pg_type array OID value not set when in binary upgrade mode

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.70.23 17332**
constraint "@1@" of domain "@2@" is not a check constraint

[Description]
constraint of domain is not a check constraint

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.24 17333

constraint "@1@" for domain "@2@" already exists

[Description]
constraint for domain already exists

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.25 17334

must be superuser to change bypassrls attribute

[Description]
must be superuser to change bypassrls attribute

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.26 17335

pg_authid OID value not set when in binary upgrade mode

[Description]
pg_authid OID value not set when in binary upgrade mode

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.27 17336

must be superuser to alter settings globally
must be superuser to alter settings globally

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.70.28 17338

@1@ cannot be executed from VACUUM or ANALYZE

commands VACUUM or ANALYZE cannot be executed from VACUUM or ANALYZE

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.70.29 17339

invalid value for "check_option" option

invalid value for "check_option" option. Valid values are "local" and "cascaded".

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.70.30 17340

ON CONFLICT does not support deferrable unique constraints/exclusion constraints as arbiters

ON CONFLICT does not support deferrable unique constraints/exclusion constraints as arbiters

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.70.31 17341

cannot change materialized view "@1@"
cannot change materialized view

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.70.32 17342

cannot insert into foreign table "@1@"

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.70.33 17343

foreign table "@1@" does not allow inserts

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.70.34 17344

cannot update foreign table "@1@"

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.70.35 17345

foreign table "@1@" does not allow updates

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.36 17346
cannot delete from foreign table "@1@"
[Description]
cannot delete from foreign table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.37 17347
foreign table "@1@" does not allow deletes
[Description]
foreign table does not allow deletes

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.38 17348
cannot lock rows in materialized view "@1@
[Description]
cannot lock rows in materialized view

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.39 17349
new row violates check option for view "@1@
[Description]
new row violates check option for view

[System Processing]
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

**2.70.40 17350**

**new row violates row-level security policy "@1@" for table "@2@"**

[Description]
new row violates row-level security policy for table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.70.41 17351**

**new row violates row-level security policy for table "@1@"**

[Description]
new row violates row-level security policy for table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.70.42 17352**

**new row violates row-level security policy "@1@" (USING expression) for table "@2@"**

[Description]
new row violates row-level security policy (USING expression) for table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.70.43 17353**

**new row violates row-level security policy (USING expression) for table "@1@"**

[Description]
new row violates row-level security policy (USING expression) for table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.70.44 17354

WHERE CURRENT OF is not supported for this table type

[Description]
WHERE CURRENT OF is not supported for this table type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.45 17355

materialized view "@1@" has not been populated

[Description]
materialized view has not been populated. Use the REFRESH MATERIALIZED VIEW command

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.46 17356

custom scan "@1@" does not support MarkPos

[Description]
custom-scan does not support MarkPos

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.47 17357

lossy distance functions are not supported in index-only scans

[Description]
lossy distance functions are not supported in index-only scans

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.48 17358
ON CONFLICT DO UPDATE command cannot affect row a second time

[Description]
ON CONFLICT DO UPDATE command cannot affect row a second time. Ensure that no rows proposed for insertion within the same command have duplicate constrained values

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.49 17359

TABLESAMPLE parameter cannot be null

[Description]
TABLESAMPLE parameter cannot be null

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.50 17360

TABLESAMPLE REPEATABLE parameter cannot be null

[Description]
TABLESAMPLE REPEATABLE parameter cannot be null

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.51 17361

moving-aggregate transition function must not return null

[Description]
moving-aggregate transition function must not return null

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.52 17362

could not open configuration directory "@1@": @2@
[Description]  
could not open configuration directory

[System Processing]  
Processing aborts

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.70.53 17363

could not initialize LDAP: @1@

[Description]  
could not initialize LDAP

[System Processing]  
Processing aborts

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.70.54 17364

LDAP user "@1@" does not exist

[Description]  
LDAP user does not exist

[System Processing]  
Processing aborts

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.70.55 17365

LDAP user "@1@" is not unique

[Description]  
LDAP user is not unique

[System Processing]  
Processing aborts

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.70.56 17367

lo_lseek result out of range for large-object descriptor @1@

[Description]  
lo_lseek result out of range for large-object descriptor %d
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.57 17368

`io_tell result out of range for large-object descriptor @1@`

[Description]
`io_tell result out of range for large-object descriptor`

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.58 17369

`large object read request is too large`

[Description]
`large object read request is too large`

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.59 17370

`ECDH: unrecognized curve name: @1@`

[Description]
`ECDH: unrecognized curve name`

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.60 17371

`ECDH: could not create key`

[Description]
`ECDH: could not create key`

[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.61 17372
authentication file line too long
[Description]
authentication file line too long
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.62 17373
could not parse LDAP URL "@1@": @2@
[Description]
could not parse LDAP URL.
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.63 17374
unsupported LDAP URL scheme: @1@
[Description]
unsupported LDAP URL scheme
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.64 17375
filters not supported in LDAP URLs
[Description]
filters not supported in LDAP URLs
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.
**2.70.65 17376**

**LDAP URLs not supported on this platform**

**[Description]**

LDAP URLs not supported on this platform

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.70.66 17377**

**unrecognized address family @1@**

**[Description]**

unrecognized address family

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.70.67 17378**

**there is no client connection**

**[Description]**

there is no client connection

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.

---

**2.70.68 17379**

**terminating connection because protocol synchronization was lost**

**[Description]**

terminating connection because protocol sync was lost

**[System Processing]**

Processing aborts

**[Action]**

To investigate the cause of the occurrence from the message, and remove cause.
@1@ cannot be applied to the nullable side of an outer join
[Description]
SQL row locking clause cannot be applied to the nullable side of an outer join
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.70 17384

constraint in ON CONFLICT clause has no associated index
[Description]
constraint in ON CONFLICT clause has no associated index
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.71 17385

ON CONFLICT DO UPDATE not supported with exclusion constraints
[Description]
ON CONFLICT DO UPDATE not supported with exclusion constraints
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.72 17386

there is no unique or exclusion constraint matching the ON CONFLICT specification
[Description]
there is no unique or exclusion constraint matching the ON CONFLICT specification
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.73 17387

@1@ cannot be applied to VALUES
SQL row locking cannot be applied to VALUES

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.70.74 17388**

**RETURNING must have at least one column**

RETURNING must have at least one column

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.70.75 17389**

**DECLARE SCROLL CURSOR ... @1@ is not supported**

DECLARE SCROLL CURSOR ... is not supported

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.70.76 17390**

**materialized views must not use data-modifying statements in WITH**

materialized views must not use data-modifying statements in WITH

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.70.77 17391**

**materialized views must not use temporary tables or views**

materialized views must not use temporary tables or views
2.70.78 17392

**materialized views may not be defined using bound parameters**

[Description]
materialized views may not be defined using bound parameters

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.79 17393

**materialized views cannot be UNLOGGED**

[Description]
materialized views cannot be UNLOGGED

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.80 17394

**@1@ is not allowed with DISTINCT clause**

[Description]
SQL row locking clause such as "FOR UPDATE" is not allowed with DISTINCT clause

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.81 17395

**@1@ is not allowed with GROUP BY clause**

[Description]
SQL row locking clause such as "FOR UPDATE" is not allowed with GROUP BY clause

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
To investigate the cause of the occurrence from the message, and remove cause.

2.70.82 17396

@1@ is not allowed with HAVING clause

[Description]
SQL row locking clause such as "FOR UPDATE" is not allowed with HAVING clause

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.83 17397

@1@ is not allowed with aggregate functions

[Description]
% is not allowed with aggregate functions

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.84 17398

@1@ is not allowed with window functions

[Description]
SQL row locking clause such as "FOR UPDATE" is not allowed with window functions

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.70.85 17399

@1@ is not allowed with set-returning functions in the target list

[Description]
SQL row locking clause such as "FOR UPDATE" is not allowed with set-returning functions in the target list

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.71 Message Numbers Beginning with 17400

2.71.1 17400

@1@ must specify unqualified relation names

[Description]
SQL row locking clause such as "FOR UPDATE" must specify unqualified relation names

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.2 17401

@1@ cannot be applied to a join

[Description]
SQL row locking clause such as "FOR UPDATE" cannot be applied to a join

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.3 17402

@1@ cannot be applied to a function

[Description]
SQL row locking clause such as "FOR UPDATE" cannot be applied to a function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.4 17403

@1@ cannot be applied to a WITH query

[Description]
SQL row locking clause such as "FOR UPDATE" cannot be applied to a WITH query

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.71.5 17404

relation "@1@" in @2@ clause not found in FROM clause

[Description]
Relation referenced by the SQL in FROM clause is not found

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.6 17405

outer join operator (+) cannot be used with joined table

[Description]
outer join operator (+) cannot be used with joined table

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.7 17406

outer join operator (+) cannot be used with subquery

[Description]
outer join operator (+) cannot be used with subquery

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.8 17407

outer join operator (+) is not allowed in operand OR or IN predicate

[Description]
outer join operator (+) is not allowed in operand OR or IN predicate

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.9 17408
**incorrect specification in outer join operator(+)**

**Description**
incorrect specification in outer join operator(+) 

**System Processing**
Processing aborts 

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.71.10 17409**

**outer join operator(+) cannot refer to other relations of same query level**

**Description**
outer join operator(+) cannot refer to other relations of same query level 

**System Processing**
Processing aborts 

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.71.11 17410**

**a table may be outer joined to at most one other table**

**Description**
a table may be outer joined to at most one other table 

**System Processing**
Processing aborts 

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.71.12 17411**

**multiple outer join operators (+) cannot be specified for one table**

**Description**
multiple outer join operators (+) cannot be specified for one table 

**System Processing**
Processing aborts 

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.71.13 17412**

**two tables cannot be outer-joined to each other**
two tables cannot be outer-joined to each other

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.14 17413**

invalid combination of outer join operator (+) and logical operators

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.15 17414**

GROUPING must have fewer than 32 arguments

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.16 17415**

aggregate functions are not allowed in JOIN conditions

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.17 17416**

grouping operations are not allowed in JOIN conditions

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.18 17417

aggregate functions are not allowed in FROM clause of their own query level

[Description]
aggregate functions are not allowed in FROM clause of their own query level

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.19 17418

grouping operations are not allowed in FROM clause of their own query level

[Description]
grouping operations are not allowed in FROM clause of their own query level

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.20 17419

aggregate functions are not allowed in functions in FROM

[Description]
aggregate functions are not allowed in functions in FROM

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.21 17420

grouping operations are not allowed in functions in FROM

[Description]
grouping operations are not allowed in functions in FROM

[System Processing]
Processing aborts
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

### 2.71.22 17421

**aggregate functions are not allowed in policy expressions**

[Description]  
aggregate functions are not allowed in policy expressions

[System Processing]  
Processing aborts

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

### 2.71.23 17422

**grouping operations are not allowed in policy expressions**

[Description]  
grouping operations are not allowed in policy expressions

[System Processing]  
Processing aborts

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

### 2.71.24 17423

**aggregate functions are not allowed in window RANGE**

[Description]  
aggregate functions are not allowed in window RANGE

[System Processing]  
Processing aborts

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

### 2.71.25 17424

**grouping operations are not allowed in window RANGE**

[Description]  
grouping operations are not allowed in window RANGE

[System Processing]  
Processing aborts

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.
2.71.26 17425

**aggregate functions are not allowed in window ROWS**

[Description]
aggregate functions are not allowed in window ROWS

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.27 17426

**grouping operations are not allowed in window ROWS**

[Description]
grouping operations are not allowed in window ROWS

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.28 17427

**grouping operations are not allowed in check constraints**

[Description]
grouping operations are not allowed in check constraints

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.29 17428

**grouping operations are not allowed in DEFAULT expressions**

[Description]
grouping operations are not allowed in DEFAULT expressions

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.30 17429
grouping operations are not allowed in index expressions

[Description]

grouping operations are not allowed in index expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.31 17430

grouping operations are not allowed in index predicates

[Description]

(grouping operations are not allowed in index predicates)

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.32 17431

grouping operations are not allowed in transform expressions

[Description]

(grouping operations are not allowed in transform expressions)

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.33 17432

grouping operations are not allowed in EXECUTE parameters

[Description]

(grouping operations are not allowed in EXECUTE parameters)

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.34 17433

grouping operations are not allowed in trigger WHEN conditions
grouping operations are not allowed in trigger WHEN conditions

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.71.35 17434**

grouping operations are not allowed in @1@

[Description]
grouping operations are not allowed in the SQL constructs like GROUP BY

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.71.36 17435**

outer-level aggregate cannot contain a lower-level variable in its direct arguments

[Description]
outer-level aggregate cannot contain a lower-level variable in its direct arguments

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.71.37 17436**

window functions are not allowed in functions in FROM

[Description]
window functions are not allowed in functions in FROM

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.71.38 17437**

window functions are not allowed in policy expressions

[Description]
window functions are not allowed in policy expressions
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.39 17438

*window functions are not allowed in window definitions*

[Description]
window functions are not allowed in window definitions

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.40 17439

*window functions are not allowed in DEFAULT expressions*

[Description]
window functions are not allowed in DEFAULT expressions

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.41 17440

*window functions are not allowed in index expressions*

[Description]
window functions are not allowed in index expressions

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.42 17441

*window functions are not allowed in index predicates*

[Description]
window functions are not allowed in index predicates

[System Processing]
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

**2.71.43 17442**

*window functions are not allowed in transform expressions*

[Description]

window functions are not allowed in transform expressions

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.44 17443**

*window functions are not allowed in @1@*

[Description]

window functions are not allowed in the SQL constructs like GROUP BY

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.45 17444**

*aggregate functions are not allowed in a recursive query's recursive term*

[Description]

aggregate functions are not allowed in a recursive query's recursive term

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.46 17445**

*Direct arguments of an ordered-set aggregate must use only grouped columns.*

[Description]

Direct arguments of an ordered-set aggregate must use only grouped columns

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.71.47 17446
arguments to GROUPING must be grouping expressions of the associated query level

[Description]
arguments to GROUPING must be grouping expressions of the associated query level

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.48 17447
multiple column definition lists are not allowed for the same function

[Description]
multiple column definition lists are not allowed for the same function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.49 17448
ROWS FROM() with multiple functions cannot have a column definition list

[Description]
ROWS FROM() with multiple functions cannot have a column definition list. Put a separate column definition list for each function inside ROWS FROM()

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.50 17449
WITH ORDINALITY cannot be used with a column definition list

[Description]
WITH ORDINALITY cannot be used with a column definition list. Put the column definition list inside ROWS FROM().

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.71.51 17450

tablesample method @1@ does not exist

[Description]
tablesample method does not exist

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.52 17452

tablesample method @1@ does not support REPEATABLE

[Description]
tablesample method does not support REPEATABLE

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.53 17453

TABLESAMPLE clause can only be applied to tables and materialized views

[Description]
TABLESAMPLE clause can only be applied to tables and materialized views

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.54 17454

CUBE is limited to 12 elements

[Description]
CUBE is limited to 12 elements

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.55 17455
Omit the parentheses in this OVER clause.

[Description]
Omit the parentheses in this OVER clause

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.56 17456

an aggregate with DISTINCT must have at least one argument

[Description]
an aggregate with DISTINCT must have at least one argument

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.57 17457

SELECT DISTINCT must have at least one column

[Description]
SELECT DISTINCT must have at least one column

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.58 17458

ASC/DESC is not allowed in ON CONFLICT clause

[Description]
ASC/DESC is not allowed in ON CONFLICT clause

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.59 17459

NULLS FIRST/LAST is not allowed in ON CONFLICT clause
NULLS FIRST/LAST is not allowed in ON CONFLICT clause

ON CONFLICT DO UPDATE requires inference specification or constraint name

ON CONFLICT is not supported with system catalog tables

ON CONFLICT is not supported on table "@1@" used as a catalog table

argument of @1@ must be type @2@, not type @3@
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.64 17464

argument declared "anyrange" is not a range type but type @1@

[Description]
argument declared "anyrange" is not a range type but type %s

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.65 17465

column @1@.@2@ does not exist

[Description]
column does not exist. Re-check the column name referenced.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.66 17466

syntax error at or near "(+)"

[Description]
syntax error at or near "(+)"

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.67 17467

could not find element type for data type @1@

[Description]
could not find element type for data type

[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.68 17468

WITHIN GROUP specified, but @1@ is not an aggregate function

[Description]
WITHIN GROUP specified, but the function is not an aggregate function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.69 17469

FILTER specified, but @1@ is not an aggregate function

[Description]
FILTER specified, but the function is not an aggregate function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.70 17470

WITHIN GROUP is required for ordered-set aggregate @1@

[Description]
WITHIN GROUP is required for ordered-set aggregate

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.71 17471

OVER is not supported for ordered-set aggregate @1@

[Description]
OVER is not supported for ordered-set aggregate

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.71.72 17472

@1@ is not an ordered-set aggregate, so it cannot have WITHIN GROUP

[Description]
The function is not an ordered-set aggregate, so it cannot have WITHIN GROUP.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.73 17476

VARIADIC argument must be an array

[Description]
VARIADIC argument must be an array

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.74 17479

system column "@1@" reference in check constraint is invalid

[Description]
System column reference in check constraint is invalid

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.75 17480

primary key constraints are not supported on foreign tables

[Description]
Primary key constraints are not supported on foreign tables

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.76 17481
unique constraints are not supported on foreign tables

[Description]
unique constraints are not supported on foreign tables

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.77 17482

foreign key constraints are not supported on foreign tables

[Description]
foreign key constraints are not supported on foreign tables

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.78 17483

exclusion constraints are not supported on foreign tables

[Description]
exclusion constraints are not supported on foreign tables

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.79 17484

LIKE is not supported for creating foreign tables

[Description]
LIKE is not supported for creating foreign tables

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.80 17485

rules on materialized views are not supported
rules on materialized views are not supported

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.81 17486**

poll() failed: @1@

function call for poll() failed

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.82 17488**

could not map anonymous shared memory: @1@

could not map anonymous shared memory

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.83 17489**

huge pages not supported on this platform

huge pages not supported on this platform

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.71.84 17490**

could not create shared memory segment: error code @1@

could not create shared memory segment
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.85 17491

@1@: invalid argument: "@2@

[Description]
invalid argument

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.86 17492

WAL archival cannot be enabled when wal_level is "minimal"

[Description]
WAL archival cannot be enabled when wal_level is "minimal"

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.87 17493

postmaster became multithreaded during startup

[Description]
postmaster became multithreaded during startup

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.88 17494

data directory "@1@" does not exist

[Description]
data directory does not exist

[System Processing]
Processing aborts
[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.71.89 17495

performing immediate shutdown because data directory lock file is invalid

[Description]
performing immediate shutdown because data directory lock file is invalid

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.90 17497

invalid processing mode in background worker

[Description]
invalid processing mode in background worker

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.91 17498

could not create inherited socket: error code @1@

[Description]
could not create inherited socket

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.71.92 17499

could not open backend variables file "@1@": @2@

[Description]
could not open backend variables file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.72 Message Numbers Beginning with 17500

2.72.1 17500
could not read from backend variables file "@1@": @2@

[Description]
could not read from backend variables file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.2 17501
could not map view of backend variables: error code @1@

[Description]
could not map view of backend variables

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.3 17502
could not unmap view of backend variables: error code @1@

[Description]
could not unmap view of backend variables

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.4 17503
could not open file "@1@": @2@

[Description]
could not open WAL file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.72.5 17504

could not write to log segment @1@ at offset @2@, length @3@: @4@

[Description]
could not write to log segment

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.6 17505

could not link file "@1@" to log segment "@2@" for initialization of log file : @3@

[Description]
could not link file to log segment for initialization of log file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.7 17506

could not rename file "@1@" to log segment "@2@" for initialization of log file : @3@

[Description]
could not rename file to log segment for initialization of log file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.8 17507

invalid timeline @1@

[Description]
invalid timeline

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.9 17508
could not stat control file "@1@": @2@

[Description]
could not stat control file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.10 17509

could not find WAL file "@1@"

[Description]
could not find WAL file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.11 17510

could not stat file or directory "@1@": @2@

[Description]
could not stat file or directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.12 17511

file name too long for tar format: "@1@"

[Description]
file name too long for tar format

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.13 17512

could not send end-of-streaming message to primary: @1@
could not send end-of-streaming message to primary

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.14 17513

error reading result of streaming command: @1@

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.15 17514

unexpected result after CommandComplete: @1@

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.16 17515

could not receive timeline history file from the primary server: @1@

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.17 17516

logical decoding requires wal_level >= logical

logical decoding requires wal_level >= logical
2.72.18 17517

logical decoding requires a database connection

[Description]
logical decoding requires a database connection

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.19 17518

logical decoding cannot be used while in recovery

[Description]
logical decoding cannot be used while in recovery

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.20 17519

cannot use physical replication slot for logical decoding

[Description]
cannot use physical replication slot for logical decoding

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.21 17520

replication slot "@1@" was not created in this database

[Description]
replication slot was not created in this database

[System Processing]
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

### 2.72.22 17521

**cannot create logical replication slot in transaction that has performed writes**

**Description**

cannot create logical replication slot in transaction that has performed writes

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

### 2.72.23 17522

**must be superuser or replication role to use replication slots**

**Description**

must be superuser or replication role to use replication slots

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

### 2.72.24 17523

**array must be one-dimensional**

**Description**

The provided input array must be one-dimensional

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

### 2.72.25 17524

**array must not contain nulls**

**Description**

The provided input array must not contain nulls

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.
2.72.26 17525
array must have even number of elements
[Description]
The provided input array must have even number of elements
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.27 17526
logical decoding output plugin "@1@" produces binary output, but function "@2@" expects textual data
[Description]
logical decoding output plugin produces binary output, but function expects textual data
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.28 17527
only superusers can query or manipulate replication origins
[Description]
only superusers can query or manipulate replication origins
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.29 17528
cannot query or manipulate replication origin when max_replication_slots = 0
[Description]
cannot query or manipulate replication origin when max_replication_slots = 0
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.72.30 17529
cannot manipulate replication origins during recovery
[Description]
cannot manipulate replication origins during recovery
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.31 17530
could not find free replication origin OID
[Description]
could not find free replication origin OID
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.32 17531
could not drop replication origin with OID @1@, in use by PID @2@
[Description]
could not drop replication origin with OID as it is in use by a process
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.33 17532
replication checkpoint has wrong magic @1@ instead of @2@
[Description]
replication checkpoint has wrong magic number instead of a correct magic number provided
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.34 17533
could not read file "@1@": read @2@ of @3@

[Description]
could not read file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.35 17534

could not find free replication state, increase max_replication_slots

[Description]
could not find free replication state, increase max_replication_slots

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.36 17535

replication slot checkpoint has wrong checksum @1@, expected @2@

[Description]
replication slot checkpoint has wrong checksum value, expected value is shown

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.37 17536

replication origin with OID @1@ is already active for PID @2@

[Description]
replication origin with OID is already active for process with PID

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.38 17537

could not find free replication state slot for replication origin with OID @1@
could not find free replication state slot for replication origin with OID %u

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.39 17538

replication identifier @1@ is already active for PID @2@

replication identifier is already active for process PID

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.40 17539

no replication origin is configured

no replication origin is configured

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.41 17540

could not write to data file for XID @1@: @2@

could not write to data file for XID

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.42 17541

could not read from reorderbuffer spill file: @1@

could not read from reorderbuffer spill file
Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.43 17542

could not read from reorderbuffer spill file: read @1@ instead of @2@ bytes

Description

could not read from reorderbuffer spill file: read instead of bytes

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.44 17543

could not read from file "@1@": read @2@ instead of @3@ bytes

Description

could not read from file : read some bytes instead of actual bytes

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.45 17544

could not read file "@1@", read @2@ of @3@: @4@

Description

could not read file read some bytes instead of actual bytes

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.72.46 17545

snapbuild state file "@1@" has wrong magic number: @2@ instead of @3@

Description

snapbuild state file has wrong magic number: instead of actual magic number

Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.72.47 17546

**snapbuild state file "@1@" has unsupported version: @2@ instead of @3@**

**Description**

snapbuild state file has unsupported version: instead of actual version number

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

2.72.48 17547

**checksum mismatch for snapbuild state file "@1@": is @2@, should be @3@**

**Description**

checksum mismatch for snapbuild state file

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

2.72.49 17548

**replication slot name "@1@" is too short**

**Description**

replication slot name is too short

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

2.72.50 17549

**replication slot name "@1@" is too long**

**Description**

replication slot name \"%\s\" is too long

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.
2.72.51 17550

replication slot name "@1@" contains invalid character

[Description]
replication slot name \"%s\" contains invalid character

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.52 17551

replication slot "@1@" already exists

[Description]
replication slot already exists invalid character

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.53 17552

all replication slots are in use

[Description]
all replication slots are in use character

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.54 17553

replication slot "@1@" does not exist

[Description]
replication slot does not exist

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.55 17554
replication slot "@1@" is active for PID @2@

[Description]
replication slot \"%s\" is already active for PID

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.56 17555

could not remove directory "@1@"

[Description]
could not remove directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.57 17556

replication slots can only be used if max_replication_slots > 0

[Description]
replication slots can only be used if max_replication_slots > 0

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.58 17557

replication slots can only be used if wal_level >= replica

[Description]
replication slots can only be used if wal_level >= archive

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.59 17558

could not read file "@1@", read @2@ of @3@: @4@
replication slot file "@1@" has wrong magic number: @2@ instead of @3@
[Description]
replication slot file has wrong magic number
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

replication slot file "@1@" has unsupported version @2@
[Description]
replication slot file has unsupported version
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

replication slot file "@1@" has corrupted length @2@
[Description]
replication slot file has corrupted length
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

checksum mismatch for replication slot file "@1@": is @2@, should be @3@
[Description]
checksum mismatch for replication slot file "@1@": is @2@, should be @3@
[System Processing]
    Processing aborts

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.72.64 17563
too many replication slots active before shutdown
[Description]
    too many replication slots active before shutdown

[System Processing]
    Processing aborts

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.72.65 17564
terminating walreceiver due to timeout
[Description]
    terminating walreceiver due to timeout

[System Processing]
    Processing aborts

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.72.66 17566
could not seek to beginning of file "@1@": @2@
[Description]
    could not seek to beginning of file

[System Processing]
    Processing aborts

[Action]
    To investigate the cause of the occurrence from the message, and remove cause.

2.72.67 17567
cannot use a logical replication slot for physical replication
[Description]
    cannot use a logical replication slot for physical replication

[System Processing]
    Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.68 17568

requested starting point @1@/@2@ on timeline @3@ is not in this server's history

[Description]
While streaming WALs during standby recovery. Requested starting point on timeline is not in this server's history

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.69 17570

could not convert table "@1@" to a view because it has row security enabled

[Description]
could not convert table to a view because it has row security enabled

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.70 17571

could not convert table "@1@" to a view because it has row security policies

[Description]
could not convert table to a view because it has row security policies

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.71 17573

renaming an ON SELECT rule is not allowed

[Description]
renaming an ON SELECT rule is not allowed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.72.72 17574

infinite recursion detected in policy for relation "@1@"
[Description]
infinite recursion detected in policy for relation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.73 17575
cannot insert into column "@1@" of view "@2@"
[Description]
cannot insert into column of view

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.74 17576
cannot update column "@1@" of view "@2@"
[Description]
cannot update column of view

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.75 17577

INSERT with ON CONFLICT clause cannot be used with table that has INSERT or UPDATE rules
[Description]
INSERT with ON CONFLICT clause cannot be used with table that has INSERT or UPDATE rules

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.76 17578
NEW variables in ON UPDATE rules cannot reference columns that are part of a multiple assignment in the subject UPDATE command

[Description]
NEW variables in ON UPDATE rules cannot reference columns that are part of a multiple assignment in the subject UPDATE command

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.77 17579

exceeded maxAllocatedDescs (@1@) while trying to execute command "@2@"

[Description]
exceeded maxAllocatedDescs while trying to execute command

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.78 17580

could not duplicate handle for "@1@": @2@

[Description]
could not duplicate handle for the segment

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.79 17581

invalid flags for opening a large object: @1@

[Description]
invalid flags for opening a large object

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.80 17582
invalid whence setting: @1@

[Description]
invalid whence setting

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.81 17583

invalid large object write request size: @1@

[Description]
invalid large object write request size

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.82 17584

canceling statement due to lock timeout

[Description]
canceling statement due to lock timeout. Check the process holding the lock.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.83 17585

@1@: invalid command-line argument: @2@

[Description]
invalid command-line argument

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.84 17586

fastpath function calls not supported in a replication connection
[Description]
fastpath function calls not supported in a replication connection

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.85 17587
extended query protocol not supported in a replication connection

[Description]
extended query protocol not supported in a replication connection

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.86 17588
cannot execute @1@ during a parallel operation

[Description]
cannot execute SQL commands such as CREATE during a parallel operation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.87 17589
too many lexemes in thesaurus entry

[Description]
too many lexemes in thesaurus entry

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.88 17590
input data type is not an array

[Description]
input data type is not an array
Searching for elements in multidimensional arrays is not supported

Data type @1@ is not an array type

cannot accumulate null arrays

cannot accumulate empty arrays
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.93 17596

cannot accumulate arrays of different dimensionality

[Description]
cannot accumulate arrays of different dimensionality

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.94 17597

removing elements from multidimensional arrays is not supported

[Description]
removing elements from multidimensional arrays is not supported

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.95 17598

thresholds must be one-dimensional array

[Description]
thresholds must be one-dimensional array

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.72.96 17599

thresholds array must not contain NULLs

[Description]
thresholds array must not contain NULLs

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.73 Message Numbers Beginning with 17600

2.73.1 17600

date field value out of range: @1@-@2@-@3@

[Description]
date field value out of range

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.2 17601

date out of range: @1@-@2@-@3@

[Description]
date out of range

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.3 17602

time field value out of range: @1@:@2@:@3@

[Description]
time field value out of range

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.4 17608

localized string format value too long

[Description]
localized string format value too long

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.73.5 17610

**invalid line specification: A and B cannot both be zero**

[Description]
invalid line specification: A and B cannot both be zero

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.6 17611

**function "close_sl" not implemented**

[Description]
function \"close_sl\" not implemented

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.7 17612

**invalid input syntax for type json**

[Description]
invalid input syntax for type json

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.8 17613

**"\u" must be followed by four hexadecimal digits.**

[Description]
must be followed by four hexadecimal digits. Check the syntax

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.9 17614
unsupported Unicode escape sequence

[Description]
unsupported Unicode escape sequence

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.73.10 17615**

**key value must be scalar, not array, composite, or json**

[Description]
key value must be scalar, not array, composite, or json

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.73.11 17616**

could not determine data type for argument 1

[Description]
could not determine data type for argument 1

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.73.12 17617**

could not determine data type for argument 2

[Description]
could not determine data type for argument 2

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.73.13 17618**

field name must not be null
field name must not be null

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.14 17619**

**argument list must have even number of elements**

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.15 17620**

**could not determine data type for argument @1@**

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.16 17621**

**argument @1@ cannot be null**

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.17 17622**

**array must have two columns**

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

### 2.73.18 17623
null value not allowed for object key

**Description**
null value not allowed for object key

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.73.19 17624
mismatched array dimensions

**Description**
mismatched array dimensions

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.73.20 17625
string too long to represent as jsonb string

**Description**
string too long to represent as jsonb string

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.73.21 17626
invalid number of arguments: object must be matched key value pairs

**Description**
invalid number or arguments: object must be matched key value pairs

**System Processing**
Processing aborts
2.73.22 17629

**object keys must be strings**

**Description**

object keys must be strings

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

2.73.23 17630

**number of jsonb object pairs exceeds the maximum allowed (@1@)**

**Description**

number of jsonb object pairs exceeds the maximum allowed

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

2.73.24 17631

**number of jsonb array elements exceeds the maximum allowed (@1@)**

**Description**

number of jsonb array elements exceeds the maximum allowed

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

2.73.25 17632

**total size of jsonb array elements exceeds the maximum of @1@ bytes**

**Description**

total size of jsonb array elements exceeds the maximum number of bytes

**System Processing**

Processing aborts

**Action**

To investigate the cause of the occurrence from the message, and remove cause.
**2.73.26 17633**

**total size of jsonb object elements exceeds the maximum of @1@ bytes**

[Description]

total size of jsonb object elements exceeds the maximum number of bytes

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.27 17634**

**cannot call @1@ on a scalar**

[Description]

cannot call this function on a scalar input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.28 17635**

**cannot call @1@ on an array**

[Description]

cannot call this function on an array input

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.29 17636**

**cannot get array length of a scalar**

[Description]

cannot get array length of a scalar

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.30 17637**
cannot get array length of a non-array
[Description]
cannot get array length of a non-array
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.31 17639

function returning record called in context that cannot accept type record
[Description]
function returning record called in context that cannot accept type record
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.32 17640
cannot deconstruct an array as an object
[Description]
cannot deconstruct an array as an object
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.33 17641
cannot deconstruct a scalar
[Description]
cannot deconstruct a scalar
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.34 17642
cannot extract elements from a scalar
cannot extract elements from a scalar

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.73.35 17643

cannot extract elements from an object

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.73.36 17644

cannot call @1@ on a non-array

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.73.37 17645

first argument of @1@ must be a row type

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.73.38 17646

argument of @1@ must be an array of objects

argument of must be an array of objects
Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.73.39 17647

cannot call @1@ on an object

[Description]
cannot call this function on an object input

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.73.40 17648

cannot delete from scalar

[Description]
cannot delete from scalar

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.73.41 17649

cannot delete from object using integer index

[Description]
cannot delete from object using integer subscript

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.73.42 17650

cannot set path in scalar

[Description]
cannot set path in scalar

Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.73.43 17651

cannot delete path in scalar
[Description]
cannot delete path in scalar
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.44 17652

invalid concatenation of jsonb objects
[Description]
invalid concatenation of jsonb objects
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.45 17656

must be a member of the role whose query is being canceled or member of pg_signal_backend
[Description]
must be a member of the role whose query is being canceled
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.46 17657

must be a superuser to terminate superuser process
[Description]
must be a superuser to terminate superuser process
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.
must be a member of the role whose process is being terminated or member of pg_signal_backend

[Description]
must be a member of the role whose process is being terminated

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

cannot merge addresses from different families

[Description]
cannot merge addresses from different families

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

invalid scale in external "numeric" value

[Description]
invalid scale in external \"numeric\" value

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

start value cannot be NaN

[Description]
While generating a numeric series - start value cannot be NaN

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.73.51 17662
stop value cannot be NaN

[Description]
stop value cannot be NaN

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.52 17663
step size cannot be NaN

[Description]
step size cannot be NaN

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.53 17664
percentile value @1@ is not between 0 and 1

[Description]
percentile value %g is not between 0 and 1

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.54 17665
invalid input syntax for type pg_lsn: "@1@"

[Description]
invalid input syntax for type pg_lsn

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.55 17666
function can only be called when server is in binary upgrade mode

[Description]
function can only be called when server is in binary upgrade mode

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.56 17667

cannot accept a value of type event_trigger

[Description]
cannot accept a value of type event_trigger

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.57 17668

cannot display a value of type event_trigger

[Description]
cannot display a value of type event_trigger

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.58 17669

cannot accept a value of type tsm_handler

[Description]
cannot accept a value of type tsm_handler

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.59 17670

cannot display a value of type tsm_handler
cannot display a value of type tsm_handler

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.60 17672**

cannot output a value of type @1@

cannot output a value of type pg_dll_command

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.61 17673**

malformed range literal: "@1@"

malformed range literal. Check the input string format

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.62 17674**

invalid input syntax for numeric time zone: "@1@"

invalid input syntax for numeric time zone

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.73.63 17675**

numeric time zone "@1@" out of range

numeric time zone out of range
2.73.64 17676

timestamp out of range: @1@-@2@-@3@ @4@:@5@:@6@

[Description]

timestamp out of range

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.65 17677

interval units "@1@" not supported because months usually have fractional weeks

[Description]

interval units \"%s\" not supported because months usually have fractional weeks

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.66 17678

invalid external txid_snapshot data

[Description]

invalid external txid_snapshot data

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.73.67 17679

unterminated format() type specifier

[Description]

unterminated format specifier

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.73.68 17680**

**number is out of range**

[Description]
number is out of range

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.73.69 17681**

**width argument position must be ended by "$"**

[Description]
width argument position must be ended by \"$\"

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.73.70 17682**

**type @1@ is not composite**

[Description]
type is not composite

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.73.71 17683**

**keystore location "@1@" is too long**

[Description]
While configuring a keystore, the error is "keystore location mentioned is too long".

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.73.72 17684

keystore does not exist

[Description]
keystore does not exist. Make sure keystore_location points to the correct location. If the setting is correct, set the master encryption key to create the keystore.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.73 17685

must be superuser to manipulate keystore

[Description]
must be superuser to manipulate keystore

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.74 17686

function "@1@" is not supported by this build

[Description]
function "%s" is not supported by this build

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.75 17687

file "@1@" is not a keystore

[Description]
file "%s" is not a keystore

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.73.76 17688

**lock file "@1@" is empty**

[Description]
lock file is empty. Check if the lockfile is corrupt.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.77 17689

**could not access directory "@1@": @2@**

[Description]
could not access directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.78 17690

**bind_textdomain_codeset failed**

[Description]
bind_textdomain_codeset failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.79 17691

**parameter "@1@" requires a numeric value**

[Description]
parameter "\%s" requires a numeric value

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.80 17692
cannot set parameters during a parallel operation
[Description]
cannot set parameters during a parallel operation
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.81 17693
permission denied to set parameter "@1@"
[Description]
permission denied to set parameter
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.82 17694
must be superuser to execute ALTER SYSTEM command
[Description]
must be superuser to execute ALTER SYSTEM command
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.83 17696
parameter "@1@" could not be set
[Description]
parameter could not be set
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.84 17698
could not seek in tuplestore temporary file: @1@
[Description]
could not seek in tuplestore temporary file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.73.85 17699
could not read from tuplestore temporary file: @1@

[Description]
could not read from tuplestore temporary file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74 Message Numbers Beginning with 17700

2.74.1 17700
could not write to tuplestore temporary file: @1@

[Description]
could not write to tuplestore temporary file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.2 17703
user does not exist

[Description]
user does not exist

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.3 17704
@1@: could not open directory "@2@": @3@

- 1376 -
could not open directory

could not read directory

could not stat file

directory name too long
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.8 17709

@1@: multiple "=" signs in tablespace mapping

[Description]
multiple signs in tablespace mapping

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.9 17710

@1@: invalid tablespace mapping format "@2@", must be "OLDDIR=NEWDIR"

[Description]
invalid tablespace mapping format must be OLDDIR=NEWDIR

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.10 17711

@1@: old directory is not an absolute path in tablespace mapping: @2@

[Description]
old directory is not an absolute path in tablespace mapping

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.11 17712

@1@: new directory is not an absolute path in tablespace mapping: @2@

[Description]
new directory is not an absolute path in tablespace mapping

[System Processing]
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.74.12 17713

@1@: transfer rate "@2@" is not a valid value

[Description]
backup transfer rate is not a valid value

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.13 17714

@1@: invalid transfer rate "@2@": @3@

[Description]
invalid transfer rate

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.14 17715

@1@: transfer rate must be greater than zero

[Description]
transfer rate must be greater than zero

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.15 17716

@1@: invalid --max-rate unit: "@2@"

[Description]
invalid --max-rate unit

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.74.16 17717
@1@: transfer rate "@2@" exceeds integer range
[Description]
Transfer rate exceeds integer range
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.17 17718
@1@: transfer rate "@2@" is out of range
[Description]
Transfer rate is out of range
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.18 17719
@1@: incompatible server version @2@
[Description]
incompatible server version
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.19 17720
@1@: server returned unexpected response to BASE_BACKUP command; got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields
[Description]
server returned unexpected response to BASE_BACKUP command; got rows and fields, expected rows and fields
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.74.20 17721

@1@: invalid xlog-method option "@2@", must be "fetch" or "stream"

[Description]
invalid xlog-method option : must be fetch or stream

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.21 17722

@1@: transaction log directory location can only be specified in plain mode

[Description]
transaction log directory location can only be specified in plain mode

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.22 17723

@1@: could not create symbolic link "@2@": @3@

[Description]
could not create symbolic link

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.23 17724

@1@: symlinks are not supported on this platform

[Description]
symlinks are not supported on this platform

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.24 17725
@1@: cannot use --create-slot together with --drop-slot

[Description]
cannot use --create-slot together with --drop-slot

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.25 17726

@1@: @2@ needs a slot to be specified using --slot

[Description]
needs a slot to be specified using --slot

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.26 17727

@1@: could not fsync log file "@2@": @3@

[Description]
could not fsync log file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.27 17728

@1@: could not open log file "@2@": @3@

[Description]
could not open log file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.28 17729

@1@: invalid fsync interval "@2@"
2.74.29 17730

@1@: could not parse start position "@2@"

[Description]
could not parse start position

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.30 17731

@1@: no slot specified

[Description]
no slot specified

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.31 17732

@1@: no target file specified

[Description]
no target file specified

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.32 17733

@1@: no database specified

[Description]
no database specified
[System Processing]
  Processing aborts

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.74.33 17734

@1@: at least one action needs to be specified
[Description]
  at least one action needs to be specified

[System Processing]
  Processing aborts

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.74.34 17735

@1@: cannot use --create-slot or --start together with --drop-slot
[Description]
  cannot use --create-slot or --start together with --drop-slot

[System Processing]
  Processing aborts

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.74.35 17736

@1@: cannot use --create-slot or --drop-slot together with --startpos
[Description]
  cannot use --create-slot or --drop-slot together with --startpos

[System Processing]
  Processing aborts

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.74.36 17737

@1@: could not establish database-specific replication connection
[Description]
  could not establish database-specific replication connection

[System Processing]
  Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.74.37 17738

@1@: could not create archive status file 

[Description]
could not create archive status file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.38 17739

@1@: could not open timeline history file 

[Description]
could not open timeline history file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.39 17740

@1@: server reported unexpected history file name for timeline 

[Description]
server reported unexpected history file name for timeline

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.40 17741

@1@: could not create timeline history file 

[Description]
could not create timeline history file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.74.41 17742

@1@: could not write timeline history file "@2@": @3@

[Description]

could not write timeline history file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.42 17743

@1@: could not rename file "@2@" to "@3@": @4@

[Description]

could not rename file

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.43 17744

@1@: incompatible server version @2@; client does not support streaming from server versions older than @3@

[Description]

incompatible server version; client does not support streaming from server versions older than

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.44 17745

@1@: incompatible server version @2@; client does not support streaming from server versions newer than @3@

[Description]

incompatible server version; client does not support streaming from server versions newer than

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.74.45 17746

@1@: starting timeline @2@ is not present in the server

[Description]
starting timeline is not present in the server

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.46 17747

@1@: server reported unexpected next timeline @2@, following timeline @3@

[Description]
server reported unexpected next timeline, following timeline

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.47 17748

@1@: server stopped streaming timeline @2@ at @3@/@4@, but reported next timeline @5@ to begin at @6@/@7@

[Description]
server stopped streaming a timeline, but reported next timeline

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.48 17749

@1@: unexpected result set after end-of-timeline: got @2@ rows and @3@ fields, expected @4@ rows and @5@ fields

[Description]
unexpected result set after end-of-timeline: got unexpected rows and fields

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.74.49 17750

@1@: could not parse next timeline's starting point "@2@"

[Description]

could not parse next timeline's starting point

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.50 17751

@1@: invalid socket: @2@

[Description]

socket not open

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.51 17752

@1@: could not send copy-end packet: @2@

[Description]

could not send copy-end packet

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.52 17753

@1@: could not connect to server: @2@

[Description]

could not connect to server

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.53 17754
could not create replication slot "@2@": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields

[Description]

could not create replication slot : got unexpected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.54 17755

could not drop replication slot "@2@": got @3@ rows and @4@ fields, expected @5@ rows and @6@ fields

[Description]

could not drop replication slot : got rows and fields mismatch with, expected rows and fields

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.55 17758

@1@: WSAStartup failed: @2@

[Description]

WSAStartup failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.56 17759

could not create communication channels: @1@

[Description]

could not create communication channels

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.74.57 17761
unrecognized command received from master: "]1@]"
[Description]
unrecognized command on communication channel

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.58 17762
invalid message received from worker: "]1@]"
[Description]
invalid message received from worker

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.59 17763
error processing a parallel work item
[Description]
error processing a parallel work item

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.60 17764
could not write to the communication channel: @1@
[Description]
could not write to the communication channel

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.61 17765
select() failed: @1@
[Description]
   error in ListenToWorkers()

[System Processing]
   Processing aborts

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.74.62 17766

`pgpipe: could not create socket: error code @1@`

[Description]
   `pgpipe: could not create socket`

[System Processing]
   Processing aborts

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.74.63 17767

`pgpipe: could not bind: error code @1@`

[Description]
   `pgpipe: could not bind`

[System Processing]
   Processing aborts

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.74.64 17768

`pgpipe: could not listen: error code @1@`

[Description]
   `pgpipe: could not listen`

[System Processing]
   Processing aborts

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.74.65 17769

`pgpipe: getsockname() failed: error code @1@`

[Description]
   `pgpipe: getsockname() failed`
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.66 17770

pgpipe: could not create second socket: error code @1@

[Description]
pgpipe: could not create second socket

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.67 17771

pgpipe: could not connect socket: error code @1@

[Description]
pgpipe: could not connect socket

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.68 17772

error during backup

[Description]
error during backup

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.69 17773

unexpected COPY statement syntax: "@1@"

[Description]
unexpected COPY statement syntax

[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.70 17774

options -s/--schema-only and -a/--data-only cannot be used together

[Description]
options -s/--schema-only and -a/--data-only cannot be used together

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.71 17775

options -c/--clean and -a/--data-only cannot be used together

[Description]
options -c/--clean and -a/--data-only cannot be used together

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.72 17776

option --if-exists requires option -c/--clean

[Description]
option --if-exists requires option -c/--clean

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.73 17777

@1@: invalid number of parallel jobs

[Description]
%: invalid number of parallel jobs

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.74.74 17778

**parallel backup only supported by the directory format**

[Description]
parallel backup only supported by the directory format

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.75 17779

**Exported snapshots are not supported by this server version.**

[Description]
Exported snapshots are not supported by this server version

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.76 17780

**unexpected policy command type: "@1@"**

[Description]
unexpected policy command type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.77 17781

**@1@: options -g/--globals-only and -r/--roles-only cannot be used together**

[Description]
options -g/--globals-only and -r/--roles-only cannot be used together

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.78 17782
@1@: options -g/--globals-only and -t/--tablespaces-only cannot be used together

[Description]
options -g/--globals-only and -t/--tablespaces-only cannot be used together

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.79 17783

@1@: option --if-exists requires option -c/--clean

[Description]
option --if-exists requires option -c/--clean

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.80 17784

@1@: options -r/--roles-only and -t/--tablespaces-only cannot be used together

[Description]
options -r/--roles-only and -t/--tablespaces-only cannot be used together

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.81 17785

@1@: options -d/--dbname and -f/--file cannot be used together

[Description]
options -d/--dbname and -f/--file cannot be used together

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.82 17786

@1@: options -c/--clean and -a/--data-only cannot be used together
options -c/--clean and -a/--data-only cannot be used together

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.74.83 17787

@1@: cannot specify both --single-transaction and multiple jobs

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.74.84 17788

@1@: could not start server: @2@

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.74.85 17789

@1@: could not start server: error code @2@

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.74.86 17790

encoding conversion error on line @1@

encoding conversion error on line
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.87 17791
invalid value for numeric type "@1@" on line @2@
[Description]
invalid value for numeric type on line

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.88 17793
@1@: could not locate my own executable path
[Description]
could not locate my own executable path

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.89 17794
lookup failed for type @1@
[Description]
lookup failed for type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.74.90 17795
didn’t get a return item from function
[Description]
didn’t get a return item from function

[System Processing]
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.74.91 17796

couldn't fetch $_TD  
[Description]  
couldn't fetch $_TD  
[System Processing]  
Processing aborts  
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.74.92 17797

didn't get a return item from trigger function  
[Description]  
didn't get a return item from trigger function  
[System Processing]  
Processing aborts  
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.74.93 17798

event trigger functions cannot have declared arguments  
[Description]  
event trigger functions cannot have declared arguments  
[System Processing]  
Processing aborts  
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

2.74.94 17799

GET STACKED DIAGNOSTICS cannot be used outside an exception handler  
[Description]  
GET STACKED DIAGNOSTICS cannot be used outside an exception handler  
[System Processing]  
Processing aborts  
[Action]  
To investigate the cause of the occurrence from the message, and remove cause.
2.75 Message Numbers Beginning with 17800

2.75.1 17800

cannot return non-composite value from function returning composite type

[Description]
cannot return non-composite value from function returning composite type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.2 17804

@1@ cannot be used as a role name here

[Description]
Reserved name cannot be used as a role name here

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.3 17805

@1@ is not allowed with UNION/INTERSECT/EXCEPT

[Description]
Locking clause is not allowed with UNION/INTERSECT/EXCEPT

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.4 17806

@1@: could not access directory "@2@": @3@

[Description]
Failure in accessing directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.75.5 17807
@1@: could not allocate SIDs: error code @2@
[Description]
Failure in allocating SIDs

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.6 17808
@1@: could not change permissions of "@2@": @3@
[Description]
Failure in changing the permissions of a file/directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.7 17809
@1@: could not close directory "@2@": @3@
[Description]
Failure in closing directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.8 17810
@1@: could not close directory "@2@": @3@
[Description]
Failure in closing a directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.9 17811
@1@: could not create restricted token: error code @2@
[Description]
Failure in creating restricted token
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.10 17812

@1@: could not fsync file "@2@": @3@
[Description]
Failure in syncing the file
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.11 17813

@1@: could not get exit code from subprocess: error code @2@
[Description]
Failure in getting the exit code of a child process
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.12 17816

@1@: could not open process token: error code @2@
[Description]
Failure in opening process token
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.13 17818

@1@: could not read directory "@2@": @3@
[Description]
Failure in reading from a directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.14 17819

@1@: could not read file "@2@": @3@

[Description]
Failure in reading the file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.15 17821

@1@: could not re-execute with restricted token: error code @2@

[Description]
re-executing with a restricted token is not allowed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.16 17822

@1@: could not remove promote signal file "@2@": @3@

[Description]
Failure in removing promote signal file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.17 17823

@1@: could not start process for command "@2@": error code @3@

[Description]
Process start failed
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.18 17824

@1@: could not write @2@ bytes to log file "@3@": @4@

[Description]
Failure in writing to a file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.19 17825

@1@: directory "@2@" does not exist

[Description]
directory doesn't exist

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.20 17826

@1@: directory "@2@" is not a database cluster directory

[Description]
directory is not a database cluster directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.21 17827

@1@: invalid argument for option -f: "@2@"

[Description]
Invalid argument

[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.22 17828
@1@: invalid argument for option `-t`: "@2@"
[Description]
Invalid argument
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.23 17829
@1@: keystore location "@2@" is too long
[Description]
keystore location is more than 1024 characters
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.24 17830
@1@: oldest multitransaction ID (-m) must not be 0
[Description]
The provided oldest multitransaction ID (-m) must not be 0
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.25 17832
@1@: out of memory
[Description]
out of memory
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

[Description]
Response from server to TIMELINE_HISTORY command is wrong from the expected

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.31 17838
"@1@" is a symbolic link, but symbolic links are not supported on this platform

[Description]
Symbolic links are not supported in this platform

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.32 17839
"@1@" is not a BRIN index

[Description]
The provided index is not a BRIN index

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.33 17840
"@1@" is not a directory or symbolic link

[Description]
Specified path is not a directory or symbolic link

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.34 17841
"@1@" is not a directory
The specified path is not a directory

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.75.35 17842

"@1@" is not a regular file

The specified file is not a regular file

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.75.36 17843

"@1@" is not a symbolic link

The specified path/file is not a symbolic link

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.75.37 17844

"@1@" is not a table, view, materialized view, sequence, or foreign table

Object is not a table, view, materialized view, sequence, or foreign table to do the alter relation

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.75.38 17845

"@1@": stopping truncate due to conflicting lock request

Truncating table is stopped due to conflicting lock request by vacuum
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.39 17846

\watch cannot be used with an empty query

[Description]
\watch command cannot be used with an empty query

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.40 17847

\watch cannot be used with COPY

[Description]
\watch command cannot be used along with COPY command

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.41 17848

aggregate cannot accept shell type @1@

[Description]
Shell type is not allowed in aggregate functions

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.42 17849

aggregates cannot have output arguments

[Description]
Defining aggregates with output arguments is not supported

[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.43 17850

an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type

[Description]
an ordered-set aggregate with a VARIADIC direct argument must have one VARIADIC aggregated argument of the same data type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.44 17851

argument @1@: could not determine data type

[Description]
Could not determine input data type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.45 17852

**argument of lo_truncate exceeds integer range**

**Description**
The length argument of lo_truncate exceeds integer range

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.75.48 17855

**argument of lo_write exceeds integer range**

**Description**
The provided index is not a BRIN index

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.75.49 17856

**background worker "@1@": only dynamic background workers can request notification**

**Description**
only dynamic background workers can request notification

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.75.50 17857

**BKPBLOCK_HAS_DATA not set, but data length is @1@ at @2@/@3@**

**Description**
BKPBLOCK_HAS_DATA not set, but data length is present in WAL record

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.
2.75.51 17858

**BKPBLOCK_HAS_DATA** set, but no data included at @1@/@2@

[Description]
BKPBLOCK_HAS_DATA set, but no data in WAL record

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.52 17859

**BKPBLOCK_SAME_REL** set but no previous rel at @1@/@2@

[Description]
BKPBLOCK_SAME_REL set but no previous rel is provided in WAL record

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.53 17860

**BKPIMAGE_HAS_HOLE** not set, but hole offset @1@ length @2@ at @3@/@4@

[Description]
BKPIMAGE_HAS_HOLE not set, but hole offset is provided

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.54 17861

**BKPIMAGE_HAS_HOLE** set, but hole offset @1@ length @2@ block image length @3@ at @4@/@5@

[Description]
BKPIMAGE_HAS_HOLE set, but hole offset is not provided

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.75.55 17862

**BKPIIMAGE_IS_COMPRESSED set, but block image length @1@ at @2@/@3@**

[Description]

BKPIIMAGE_IS_COMPRESSED set, but block image length is not provided.

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.56 17863

**cannot allocate multiple Perl interpreters on this platform**

[Description]

cannot allocate multiple Perl interpreters on this platform

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.57 17864

**cannot alter type of a column used in a policy definition**

[Description]

cannot alter type of a column used in a policy definition

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.58 17865

**cannot call @1@ on a non-object**

[Description]

The parameter is not a Json Object

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.75.59 17866
cannot change logged status of table "@1@" because it is temporary

[Description]
Temporary table logged status cannot be changed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.60 17867

cannot copy from materialized view "@1@"

[Description]
Copy command cannot be executed on a materialized view

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.61 17868

cannot delete tuples during a parallel operation

[Description]
Delete operation is not allowed in parallel mode

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.62 17869

cannot determine OID of function lo_lseek64

[Description]
lo_lseek64 function is not defined

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.63 17870

cannot determine OID of function lo_tell64
[Description]
lo_tell64 function is not defined

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.64 17871

cannot determine OID of function lo_truncate64

[Description]
lo_truncate64 function is not defined

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.65 17872

cannot display a value of a shell type

[Description]
Shell type cannot be displayed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.66 17873

cannot duplicate null pointer (internal error)

[Description]
The given input is a null pointer

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.67 17874

cannot refresh materialized view "@1@" concurrently

[Description]
Cannot refresh materialized view concurrently
2.75.68 17875

**cannot set system attribute”@1@”**

[Description]
Cannot set system attributes

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.69 17876

**cannot setup replication origin when one is already setup**

[Description]
replication origin is already setup

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.70 17877

**cannot use DISTINCT with WITHIN GROUP**

[Description]
cannot use DISTINCT with WITHIN GROUP

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.71 17878

**cannot use multiple ORDER BY clauses with WITHIN GROUP**

[Description]
cannot use multiple ORDER BY clauses with WITHIN GROUP sql query

[System Processing]
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.75.72 17879

cannot use special role specifier in DROP ROLE

[Description]
cannot use special role specifier in DROP ROLE

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.73 17880

cannot use VARIADIC with WITHIN GROUP

[Description]
cannot use VARIADIC with WITHIN GROUP

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.74 17881

constraint "@1@" of relation "@2@" is not a foreign key constraint

[Description]
constraint is not a foreign key constraint

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.75 17882

conversion from numeric to Decimal failed

[Description]
conversion from numeric to Decimal failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.75.76 17883

**COPY data transfer failed: @1@**

**[Description]**
Failed in data transfer of COPY command

**[System Processing]**
Processing aborts

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

2.75.77 17884

**corrupted item pointer: offset = @1@, length = @2@**

**[Description]**
item pointer of a page is corrupted

**[System Processing]**
Processing aborts

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

2.75.78 17885

**could not change table ")+1@" to logged because it references unlogged table ")+2@"**

**[Description]**
could not change table logged status because it references unlogged table

**[System Processing]**
Processing aborts

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

2.75.79 17886

**could not change table ")+1@" to unlogged because it references logged table ")+2@"**

**[Description]**
could not change table logged status because it references logged table

**[System Processing]**
Processing aborts

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

2.75.80 17887
could not close directory "@1@": @2@
[Description]
   Failure in closing a directory

[System Processing]
   Processing aborts

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.75.81 17888

could not close directory "@1@": @2@
[Description]
   Failure in closing a directory

[System Processing]
   Processing aborts

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.75.82 17889

could not close file "@1@": @2@
[Description]
   Failure in file close

[System Processing]
   Processing aborts

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.75.83 17890

could not close pipe to external command: @1@
[Description]
   Failure in closing the pipe command to external command

[System Processing]
   Processing aborts

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.75.84 17891

could not close target file "@1@": @2@
Failure in closing target file

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.75.85 17892

could not convert Python Unicode object to bytes

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.75.86 17893

could not create any Unix-domain sockets

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.75.87 17894

could not create directory "@1@": @2@

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.75.88 17895

could not create internal procedure "@1@": @2@

could not create internal procedure
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.89 17896

could not create symbolic link at "@1@": @2@
[Description]
Failure in creating a symbolic link

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.90 17897

could not execute command "@1@": @2@
[Description]
could not execute command if it is not copy stream

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.91 17898

could not import a module for Decimal constructor
[Description]
Non decimal data found

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.75.92 17899

could not initialize globals
[Description]
could not initialize globals in pl/python function

[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76 Message Numbers Beginning with 17900

2.76.1 17900

could not load module "unknown": @1@

[Description]
Failed in loading a module

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.2 17901

could not look up effective user ID @1@: @2@

[Description]
Getting the current user details failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.3 17902

could not look up local user ID @1@: @2@

[Description]
Lookup user name failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.4 17903

could not map dynamic shared memory segment

[Description]
Attaching to a dynamic shared memory segment failed.

[System Processing]
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.76.5 17904
could not open directory "@1@": @2@
[Description]
Failure in opening the directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.6 17905
could not open file "@1@" for reading: @2@
[Description]
Failure in opening a file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.7 17906
could not open file "@1@" for truncation: @2@
[Description]
Failure in opening a file for truncating it's size

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.8 17907
could not open file "@1@": @2@
[Description]
Failure in opening the file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.76.9 17908

could not open parent table of index @1@

[Description]
Failure in opening the parent relation of an index

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.10 17909

could not open source file "@1@": @2@

[Description]
Failure in opening a source file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.11 17910

could not open target file "@1@": @2@

[Description]
Failure in opening target file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.12 17911

could not read directory "@1@": @2@

[Description]
Failure in reading from a directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.13 17912
could not read directory "@1@": @2@

[Description]
Failure in reading from a directory

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.14 17913

could not read file "@1@": @2@

[Description]
Failure in reading a file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.15 17914

could not read symbolic link "@1@": @2@

[Description]
Failure in reading a symbolic link

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.16 17915

could not read time zone file "@1@": @2@

[Description]
Failure in reading timezone file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.17 17916

could not remove directory "@1@": @2@
Failure in removing a directory

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.18 17917

could not remove file "@1@": @2@

Failure in removing a file

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.19 17918

could not remove symbolic link "@1@": @2@

Failure in removing a symbolic link

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.20 17919

could not seek in log file @1@ to offset @2@: @3@

File seek operation is failed

Processed aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.21 17920

could not seek in source file: @1@

Failure in executing seek system call in source file
Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.22 17921

could not seek in target file "@1@": @2@

Failure in executing seek system call in target file

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.23 17922

could not set variable "@1@"

Setting of psql variable is failed

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.24 17923

could not split return value from trigger: @1@

Trigger return value couldn't be splitted

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.25 17924

could not stat file "@1@": @2@

stat system call failed on a file

Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.26 17925
could not stat file "@1@": @2@
[Description]
Failure in stat system call

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.27 17926
could not truncate file "@1@" to @2@: @3@
[Description]
Failure in truncating a file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.28 17927
could not write file "@1@": @2@
[Description]
Failure in writing to a file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.29 17928
could not write to file "@1@", wrote @2@ of @3@: @4@
[Description]
Failure in writing to a file.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.76.30 17929
data file "@1@" in source is not a regular file

[Description]
The data file is not a regular file

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.31 17930
database connection requirement not indicated during registration

[Description]
database connection requirement not indicated during background worker registration

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.32 17931
declared name @1@ is already defined

[Description]
declared name has been defined already

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.33 17934
EVP error code @1@

[Description]
Non zero error message. The error number returned by ERR_get_error

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.34 17935
**EVP error code @1@**

[Description]
EVP error code

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.76.35 17936**

**FOR value should be positive integer**

[Description]
FOR loop value should be positive integer

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.76.36 17937**

**foreign key referenced-columns list must not contain duplicates**

[Description]
The provided foreign key referenced-columns list contain duplicates

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.76.37 17938**

**foreign-data wrapper "@1@" does not support IMPORT FOREIGN SCHEMA**

[Description]
IMPORT FOREIGN SCHEMA doesn't supported by the foreign data wrapper

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

---

**2.76.38 17939**

**improper use of "*"**
improper use of \"\*\" in the indirection reference

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.39 17941

initial position must not be null

First member of the array must not be null

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.40 17942

invalid action (CREATE) for regular file

Regular files are created with open_target_file function, not with this

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.41 17943

invalid block_id @1@ at @2@/@3@

Invalid block_id in WAL record

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.42 17944

Invalid character value.

Invalid XML character value.
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.43 17945

invalid compressed image at @1/@2@, block @3@

[Description]
The provided index is not a BRIN index

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.44 17947

invalid input syntax for type txid_snapshot: "@1@"

[Description]
invalid input syntax for type txid_snapshot

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.45 17948

invalid line number: @1@

[Description]
Provided line number is wrong in the sql query

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.46 17949

invalid magic number in dynamic shared memory segment

[Description]
Invalid dynamic shared memory segment

[System Processing]
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

### 2.76.47 17950

**invalid MultiXactId: @1@**

**Description**
Invalid multiXactId parameter

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.76.48 17951

**invalid value "@1@" for "@2@"**

**Description**
Invalid argument

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.76.49 17952

**invalid value for recovery parameter "@1@": "@2@"**

**Description**
Invalid recovery configuration parameter

**System Processing**
Processing aborts

**Action**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.76.50 17953

**invalid value in ECOBPG_NCHAR on line @1@. The valid value is UTF16LE/UTF16BE/UTF32LE/UTF32BE/SJIS/COBOL_EUC.**

**Description**
Invalid ECOBPG_NCHAR environment variable value

**System Processing**
Processing aborts
2.76.51 17954

Junk view columns are not updatable.

[Description]
Write operation Junk view columns are not updatable.

[System Processing]
Processing aborts

[Action]

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.67 17970

number of parameters must be between 0 and 65535

[Description]
number of parameters must be between 0 and 65535
Operating System Error @1@

Description:
The error number passed to this function may be an out of range error number. So `strerror` function returns an empty string.

System Processing:
Processing aborts

Action:
To investigate the cause of the occurrence from the message, and remove cause.

Operator Not Allowed in Variable Definition

Description:
Only `sizeof` operation is allowed in variable definition.

System Processing:
Processing aborts

Action:
To investigate the cause of the occurrence from the message, and remove cause.

Operator Too Long

Description:
The length of the operator is more than or equal to 64 characters.

System Processing:
Processing aborts

Action:
To investigate the cause of the occurrence from the message, and remove cause.

Out of Memory

Description:
Out of memory

System Processing:
Processing aborts
To investigate the cause of the occurrence from the message, and remove cause.

2.76.72 17975

out of memory

[Description]

out of memory

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.73 17976

out-of-order block_id @1@ at @2@/@3@

[Description]

Out-of-order blocks in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.74 17977

Parsing XML declaration: `?>` expected.

[Description]

Provided XML declaration is unfinished

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.76.75 17978

pclose failed: @1@

[Description]

pclose system call failed

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.76.76 17979

**permission denied to reassign objects**

[Description]
Insufficient privileges on the object

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.77 17980

**pgpipe: could not accept connection: error code @1@**

[Description]
Failure in reading a symbolic link

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.78 17981

**record with invalid length at @1@/@2@**

[Description]
record with invalid length in WAL record

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.79 17982

**requested character not valid for encoding: @1@**

[Description]
Invalid character for the encoding

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.80 17984
source file list is empty
[Description]
Source file list is empty

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.81 17985

Space required.
[Description]
Space required in the specified location of XML content.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.82 17986

SPI_execute failed: @1@
[Description]
Failure in SPI_execute function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.83 17987

SPI_execute_plan failed: @1@
[Description]
Failure in SPI_execute_plan function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.84 17988

SSL error code @1@
SSL has reported some error

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.85 17989

standalone accepts only 'yes' or 'no'.

XML standalone accepts only 'yes' or 'no'.

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.86 17990

STDIN/STDOUT not allowed with PROGRAM

STDIN/STDOUT not allowed with PROGRAM in copy command

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.87 17991

symbolic link "@1@" target is too long

Symolic link target length is more than the specified length

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.76.88 17992

symbolic link target too long for tar format: file name "@1@", target "@2@"

provided symbolic link target name is too long for tar format
2.76.89 17993

tablesample method @1@ requires @2@ argument, not @3@

[Description]
Invalid number of tablesample arguments

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.90 17994

tablespace name cannot be qualified

[Description]
The provided tablespace name is not valid

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.91 17995

The server (version @1@) does not support editing function source.

[Description]
The server does not support editing function source.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.92 17996

time zone "@1@" appears to use leap seconds

[Description]
The provided timezone appears to have leap seconds

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.93 17997
too many arguments for cursor "@1@"
[Description]
syntax error
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.94 17998
trigger's return list must have even number of elements
[Description]
Trigger can return only even number of elements
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.76.95 17999
type modifier cannot have ORDER BY
[Description]
type modifier cannot have ORDER BY clause
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77 Message Numbers Beginning with 18000

2.77.1 18000
unexpected EOF while reading file "@1@"
[Description]
unexpected EOF reach while reading file
[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.2 18001

unexpected page modification for directory or symbolic link "@1@"
[Description]
unexpected page modification for directory or symbolic link

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.3 18002

unexpected result set after end-of-streaming
[Description]
unexpected data after end-of-streaming

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.4 18003

unexpected result status for \watch
[Description]
unexpected result status for \watch command

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.5 18004

unexpected standby message type "@1@", after receiving CopyDone
[Description]
unexpected standby message type after copyDone

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.77.6 18005

Unix-domain socket path "@1@" is too long (maximum @2@ bytes)

[Description]
unix-domain socket path has crossed more than 100 bytes

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.7 18006

UNNEST() with multiple arguments cannot have a column definition list

[Description]
UNNEST() with multiple arguments cannot have a column definition list

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.8 18007

unrecognized attribute "@1@"

[Description]
Unrecognized attribute in the trigger function

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.9 18008

Unrecognized libxml error code: @1@.

[Description]
Unknown code error - the default error

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
unrecognized object type in default privileges: @1@

[Description]
Unrecognized object type

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.11 18010

unterminated /* comment

[Description]
unterminated /* comment in the sql query

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.12 18011

User "@1@" has an expired password.

[Description]
user's password has been expired

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.13 18012

User "@1@" has no password assigned.

[Description]
no password has assigned to user

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.14 18013

user name lookup failure: error code @1@
Lookup user name failed

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.77.15 18014

View columns that are not columns of their base relation are not updatable.

Write operation View columns that are not columns of their base relation are not updatable.

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.77.16 18015

View columns that refer to system columns are not updatable.

Write operation View columns that refer to system columns are not updatable.

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.77.17 18016

View columns that return whole-row references are not updatable.

Write operation View columns that return whole-row references are not updatable.

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.77.18 18017

Views containing DISTINCT are not automatically updatable.

Write operation Views containing DISTINCT clause are not automatically updatable.
[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.19 18018

Views containing GROUP BY are not automatically updatable.

[Description]
Write operation Views containing GROUP BY clause are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.20 18019

Views containing HAVING are not automatically updatable.

[Description]
Write operation Views containing HAVING clause are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.21 18020

Views containing LIMIT or OFFSET are not automatically updatable.

[Description]
Write operation Views containing LIMIT or OFFSET are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.22 18021

Views containing TABLESAMPLE are not automatically updatable.

[Description]
Write operation Views containing TABLESAMPLE are not automatically updatable.

[System Processing]
Processing aborts
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.23 18022

Views containing UNION, INTERSECT, or EXCEPT are not automatically updatable.

[Description]
Write operation Views containing UNION, INTERSECT, or EXCEPT are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.24 18023

Views containing WITH are not automatically updatable.

[Description]
Write operation Views containing WITH are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.25 18024

Views that do not select from a single table or view are not automatically updatable.

[Description]
Write operation Views that do not select from a single table or view are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.26 18025

Views that have no updatable columns are not automatically updatable.

[Description]
Write operation Views that have no updatable columns are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
Views that return aggregate functions are not automatically updatable.
[Description]
Write operation Views that return aggregate functions are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

Views that return set-returning functions are not automatically updatable.
[Description]
Write operation Views that return set-returning functions are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

Views that return window functions are not automatically updatable.
[Description]
Write operation Views that return window functions are not automatically updatable.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

WAL file is from different database system: incorrect XLOG_BLCKSZ in page header
[Description]
WAL file is from a different database not generated by these binaries because of mismatch in WAL block size

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

WAL file is from different database system: incorrect XLOG_BLCKSZ in page header
[Description]
WAL file is from a different database not generated by these binaries because of mismatch in WAL block size

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
WAL file is from different database system: incorrect XLOG_SEG_SIZE in page header

[Description]
WAL file is from a different database not generated by these binaries because of mismatch in WAL segment size

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.32 18031

WHERE CURRENT OF is not supported on a view with grouping or aggregation

[Description]
WHERE CURRENT OF syntax is not supported on view where there exists grouping or aggregation in the view query

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.33 18032

WHERE CURRENT OF is not supported on a view with more than one underlying relation

[Description]
WHERE CURRENT OF syntax is not supported on view where there are more than one underlying relation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.34 18033

WHERE CURRENT OF is not supported on a view with no underlying relation

[Description]
WHERE CURRENT OF syntax is not supported on view where there is no underlying relation

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.35 18034

window function @1@ cannot have WITHIN GROUP
window function cannot have WITHIN GROUP

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.77.36 18035

window function @1@ requires an OVER clause

True window functions must be called with a window definition

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.77.37 18036

WITH CHECK OPTION not supported on recursive views

WITH CHECK OPTION not supported on recursive views

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

2.77.38 18038

"@1@" must be registered in shared_preload_libraries and session_preload_libraries

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.77.39 18039

"@1@" must be registered in shared_preload_libraries

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.77.40 18044

duplicate lock detected

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.77.41 18049

internal error. memory not allocated.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.77.42 18050

internal error. unknown code.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.77.43 18058

ROS has not been formatted yet.

An error occurred.

Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.77.44 18061

could not read from SMC evacuating temporary file: @1@

[Description]
   An error occurred during I/O processing in the database server.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.77.45 18066

vci_index_size requires 1 argument

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.77.46 18067

cannot alter table because the table is indexed by VCI

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.47 18068

ALTER INDEX SET TABLESPACE is not supported for VCI

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.77.48 18069

**REINDEX is not supported for VCI**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.49 18072

**access method "@1@" does not support EXCLUDE clause**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.50 18073

**access method "@1@" does not support index on temporary table**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.51 18074

**access method "@1@" does not support to CREATE INDEX on the expression**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.52 18075
access method "@1@" does not support concurrent index drop

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.53 18076

access method "@1@" does not support concurrent index build

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.54 18077

access method "@1@" does not support partial-index

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.55 18078

access method "@1@" does not support index on materialized view

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.77.56 18079

compression buffer is full
An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

### 2.77.57 18091

**could not start background process : postmaster died**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

### 2.77.58 18092

**could not stop background process**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

### 2.77.59 18093

**could not register background process**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

### 2.77.60 18097

**could not open file "@1@": @2@**

An error occurred during I/O processing in the database server.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.77.61 18099

**out of memory**

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.78 Message Numbers Beginning with 18100

2.78.1 18103

**could not identify a comparison function for type @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.2 18104

**aggregate @1@ needs to have compatible input type and transition type**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.3 18105

**aggregate function calls cannot be nested**
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.4 18106

cannot pass more than @1@ argument to a function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.5 18108

value out of range: underflow

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.6 18109

value out of range: overflow

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.7 18112

access method "@1@" does not work under full_page_writes=off

[Description]
An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.78.8 18113

**slot name must not be null**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.9 18114

**options array must not be null**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.10 18115

**cannot create a RETURNING list for a relation containing dropped columns**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.11 18116

**path element at position @1@ is null**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.
[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.12 18117

path element at position @1@ is not an integer: "@2@"

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.13 18118

role with OID @1@ does not exist

[Description]

An error occurred during DB Server processing in the database.

[System Processing]

Processing will be aborted.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.78.14 18119

BKPBLOCK_HAS_DATA not set, but data length is @1@ at @2@/@3@

[Description]

BKPBLOCK_HAS_DATA not set, but data length is present in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

2.78.15 18120

BKPBLOCK_HAS_DATA set, but no data included at @1@/@2@

[Description]

BKPBLOCK_HAS_DATA set, but no data in WAL record

[System Processing]

Processing aborts

[Action]

To investigate the cause of the occurrence from the message, and remove cause.
2.78.16 18121

**BKPBLOCK_SAME_REL set but no previous rel at @1@/@2@**

[Description]
BKPBLOCK_SAME_REL set but no previous rel is provided in WAL record

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.17 18122

**BKPIMAGE_HAS_HOLE not set, but hole offset @1@ length @2@ at @3@/@4@**

[Description]
BKPIMAGE_HAS_HOLE not set, but hole offset is provided

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.18 18123

**BKPIMAGE_HAS_HOLE set, but hole offset @1@ length @2@ block image length @3@ at @4@/@5@**

[Description]
BKPIMAGE_HAS_HOLE set, but hole offset is not provided

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.19 18124

**BKPIMAGE_IS_COMPRESSED set, but block image length @1@ at @2@/@3@**

[Description]
BKPIMAGE_IS_COMPRESSED set, but block image length is not provided.

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
invalid block_id @1@ at @2@/@3@

[Description]
invalid block_id in WAL record

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

neither BKPIMAGE_HAS_HOLE nor BKPIMAGE_IS_COMPRESSED set, but block image length is @1@ at @2@/@3@

[Description]
neither BKPIMAGE_HAS_HOLE nor BKPIMAGE_IS_COMPRESSED set, but block image length is provided

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

out-of-order block_id @1@ at @2@/@3@

[Description]
Out-of-order blocks in WAL record

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

could not look up effective user ID @1@: @2@

[Description]
Getting the current user details failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.78.24 18130

could not look up effective user ID @1@: @2@

[Description]
Getting the current user details failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.25 18131

pclose failed: @1@

[Description]
pclose system call failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.26 18132

pclose failed: @1@

[Description]
pclose system call failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.27 18133

pclose failed: @1@

[Description]
pclose system call failed

[System Processing]
Processing aborts

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.28 18134
**pclose failed: @1@**

**[Description]**
pclose system call failed

**[System Processing]**
Processing aborts

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.78.29 18135

**Valid values are "none", "AES128" and "AES256".**

**[Description]**
Wrong tablespace encryption algorithm is passed during CREATE TABLESPACE command.

**[System Processing]**
Processing will be aborted

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.78.30 18136

**parameter "parallel" must be SAFE, RESTRICTED, or UNSAFE**

**[Description]**
Invalid parallel option is passed for the function to be created with CREATE FUNCTION command.

**[System Processing]**
Processing will be aborted

**[Action]**
To investigate the cause of the occurrence from the message, and remove cause.

### 2.78.31 18137

**Sets the maximum number of parallel processes per executor node.**

**[Description]**
Terminated normally.

**[System Processing]**
Continues processing.

**[Action]**
No action required.

### 2.78.32 18139

**Sets the planner’s estimate of the cost of passing each tuple (row) from worker to master backend.**
Terminated normally.

Continues processing.

No action required.

**2.78.33 18140**

*Sets the planner’s estimate of the cost of starting up worker processes for parallel query.*

Terminated normally.

Continues processing.

No action required.

**2.78.34 18144**

*no EVP error reported*

The errorcode returned by ERR_get_error() function is zero.

Processing aborts

To investigate the cause of the occurrence from the message, and remove cause.

**2.78.35 18145**

*WARNING: password file "@1@" has group or world access; permissions should be u=rw (0600) or less*

Password file has group or world access.

To investigate the cause of the occurrence from the message, and remove cause for the WARNING.

**2.78.36 18146**

*WARNING: password file "@1@" is not a plain file*
[Description]
Password file is not a plain file.

[System Processing]
WARNING is issued

[Action]
To investigate the cause of the occurrence from the message, and remove cause for the WARNING.

2.78.37 18147

nested /* ... */ comments

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.38 18148

@1@: cannot be run as rootPlease log in (using, e.g., "su") as the (unprivileged) user that will own the server process.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.39 18149

@1@: could not change permissions of directory "@2@": @3@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.40 18150

@1@: input file "@2@" does not belong to PostgreSQL @3@Check your installation or specify the correct path using the option -L.
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.41 18151
@1@: invalid locale settings; check LANG and LC_* environment variables
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.42 18152
@1@: no data directory specified
You must identify the directory where the data for this database system will reside. Do this with either the invocation option -D or the environment variable PGDATA.
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.78.43 18153
Data page checksums are disabled.
[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.78.44 18154
Data page checksums are enabled.
Terminated normally.

Continues processing.

No action required.

**2.78.45 18155**

index "@1@" cannot be used as replica identity because column @2@ is a system column

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.78.46 18157**

parameter value for ALTER SYSTEM must not contain a newline

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.78.47 18162**

multiple Python libraries are present in session

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.78.48 18163**

Only one Python major version can be used in one session.

An error occurred during execution of the application or command.
Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.78.49 18164**

**syncing target data directory**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.78.50 18166**

The program "initdb" was found by "@1@"but was not the same version as @2@. Check your installation.  

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.78.51 18167**

**sync of target directory failed**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.78.52 18168**

**reading user-defined tables**

[Description]

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.78.53 18169

**WARNING:** requested compression not available in this installation -- archive will be uncompressed

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.78.54 18170

**WARNING:** unexpected extra results during COPY of table "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.78.55 18171

**Synchronized snapshots are not supported on standby servers.** Run with --no-synchronized-snapshots instead if you do not needsynchronized snapshots.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.78.56 18172

**TCP user timeout**

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.57 18173

Cancel queries that conflict with recovery during hot standby promotion.
[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.58 18174

could not load library "vci.so": @1@

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.59 18175

ddebug_helper must be loaded via shared_preload_libraries

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.60 18176

ddebug_helper injects error

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.61 18177

More details may be available in the server log.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.62 18178

Kill all remaining database processes and restart the database.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.63 18179

deadlock detected

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.64 18180

VCI parallel execution is blocked by other operation.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.78.65 18181

not enough maximum share memory for parallel query (@1@ bytes requested)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.66 18182

You possibly need to raise the configuration parameter "vci.shared_work_mem" value to be at least @1@kB.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.67 18183

You may need to increase max_worker_processes.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.68 18184

unable to map dynamic shared memory segment

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.78.69 18185

too many workers already @1/@2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.70 18186

Failed while creating memory context "@1@".

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.71 18187

Failed on request of size @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.72 18188

failed to shm_open()

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.73 18189
could not open file "@1@": @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.74 18190

could not get process AffinityMask: error code @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.75 18191

Failed system call was DuplicateHandle.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.76 18192

could not create semaphore: error code @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.77 18193

Failed system call was GetModuleHandle("ntdll.dll").
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.78 18194

could not get address of "NtQuerySystemInformation": error code @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.79 18195

Failed system call was GetModuleHandle("NtQuerySystemInformation").

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.80 18196

could not get system processor performance information : error code @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.81 18197

Failed system call was NtQuerySystemInformation.

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.82 18198

cannot find vci.smc_directory: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.78.83 18199

could not create shared memory segment: error code @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79 Message Numbers Beginning with 18200

2.79.1 18200

Failed system call was OpenFileMapping(name=@1@).

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.2 18201

Failed system call was MapViewOfFileEx.

[Description]
An error occurred during execution of the application or command.
2.79.3 18202

could not map shared memory segment

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.4 18203

could not initialize security descriptor: error code @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.5 18204

Failed system call was InitializeSecurityDescriptor.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.6 18205

could not set security descriptor DACL: error code @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.7 18206

Failed system call was SetSecurityDescriptorDacl.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.8 18207

Failed system call was CreateFileMapping(size=\@1\@, name=\@2\@).

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.9 18208

could not get priority class: error code \@1\@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.10 18209

Failed system call was GetPriorityClass.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.79.11 18210

could not set priority class=@1@: error code @2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.12 18211

Failed system call was SetPriorityClass.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.13 18212

pgx_prewarm_vci requires one argument
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.14 18213

relation cannot be null
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.15 18214
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.16 18215

extension '@1@$' does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.17 18216

function '@1@.@2@$' does not exist

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.18 18217

Disable VCI by 'SELECT vci_disable();'
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.20 18219

**internal error. unsupported compression format.**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.21 18220

**column missed in VCI index creation**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.22 18221

**This must never happen. Give up to use VCI index.**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.23 18222

**internal error: unsupported compression type**

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.24 18223

relation full

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.25 18224

internal error. unsupported compression type

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.26 18225

Use DROP INDEX "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.27 18226

unexpected index access method call : "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.28 18227
duplicated columns in vci index creation: @1@
[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.29 18228
duplicated columns are specified
[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.30 18229
data type @1@ is not supported for access method "@2@"
[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.31 18230
unexpected attribute length
[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
### 2.79.32 18231

**You must drop index "@1@" before using this command.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.79.33 18232

**DROP INDEX and CREATE INDEX instead**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.79.34 18233

**only VCI index is supported**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.79.35 18234

**extension "@1@" cannot specify a schema name**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

### 2.79.36 18235
cannot cluster tables including @1@ index(es)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.37 18236

Use DROP INDEX @1@ first

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.38 18237

Use DROP INDEX to remove an vci index and try again without CONCURRENTLY option

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.39 18238

Try again without CONCURRENTLY option

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.40 18239

extension "@1@" prohibits this operation
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.41 18240

extension "@1@" prohibits this operation on access method "@2@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.42 18241

extension "@1@" prohibits this operation on operation class "@2@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.43 18242

extension "@1@" prohibits this operation on operation family "@2@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.44 18243

extension "@1@" prohibits this operation on view "@2@"

An error occurred during execution of the application or command.
2.79.45 18244

database @1@ does not exist
[Description]
An error occurred during execution of the application or command.

2.79.46 18245

undefined lock state
[Description]
An error occurred during execution of the application or command.

2.79.47 18246

This might happen when CREATE INDEX fails. "DROP INDEX @1@;" and CREATE INDEX again may help.

2.79.48 18247

incompatible VCI version: expected (@1@, @2@), stored (@3@, @4@).
[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.49 18248

This can happen when accessing old database with newer VCI modules. DROP and CREATE INDEX may help.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.50 18249

internal error. unsupported parameter.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.51 18250

Normally relations of VCI index are smaller than the table relation, therefore this error must not happen. Disable VCI by 'SELECT vci_disable();'

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.52 18251

data relation full

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.53 18252

vci index "@1@" corrupted
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.54 18253

TID (@1@,@2@) has been deleted from table "@3@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.55 18254

try to insert TID (@1@,@2@) into ROS twice: extentId=@3@, index=@4@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.56 18255

try to delete TID (@1@,@2@) into local delete list
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.57 18256

try to delete TID (@1@,@2@) into delete vector twice

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.58 18257

too many WOS rows over estimation

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.59 18258

The number of devices exceeds the upper bound

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.60 18259

database connection requirement not indicated during registration

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
invalid processing mode in background worker

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

terminating VCI worker process due to administrator command

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

"@1@" is not directory

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

could not create directory "@1@": @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
could not stat directory "@1@": @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.66 18265

needs to set at least @1@ to "max_worker_processes"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.67 18266

You will specify more than vci.control_max_workers + (# of CPU cores) * @1@ + 1 to the configuration parameter "max_worker_processes".

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.68 18267

extension "$1$" cannot be installed under this version of PostgreSQL

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.69 18268

crash_emulation must be loaded via shared_preload_libraries
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.70 18269

standby mode is not supported by single-user servers

[Description]
An error occurred during DB Server processing in the database.

[System Processing]
Processing will be aborted.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.79.71 18270

constraint "@1@" conflicts with inherited constraint on relation "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.72 18271

constraint "@1@" conflicts with NOT VALID constraint on relation "@2@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.73 18272

constraint "@1@" conflicts with NOT VALID constraint on child table "@2@"

[Description]
An error occurred during execution of the application or command.
Process will be aborted.

Action
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.74 18273

**could not set up connection context: @1@**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.75 18274

**@1@: only one of --source-pgdata or --source-server can be specified**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.76 18275

**internal error. failed to split**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.77 18276

**invalid attribute number @1@**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.78 18277

duplicated columns in vci index creation: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.79 18278

duplicated columns are specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.80 18279

cannot use "ctid" column with other columns

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.81 18280

The "vci_column_ids" option is required when "ctid" column is specified

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly
The "vci_column_ids" option cannot be used without "ctid" column

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

index name cannot be null

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

table oid cannot be null

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

array of column names cannot be null

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.86 18285
storage option cannot be null
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.87 18286

column name cannot be null
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.88 18287
column "@1@" does not exist
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.89 18288
SPI_connect failed
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.90 18289
SPI_prepare failed
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.91 18290

cannot execute multi-query in vci_create()

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.92 18291

You might fold the index name with double quotation marks.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.93 18292

SPI_execp failed

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.94 18293

SPI_finish failed

An error occurred during execution of the application or command.
[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.95 18294

unterminated quoted string

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.96 18295

failed to parse vci_create() options.

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.97 18296

failed to parse a vci_create() options: an invalid pair

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.79.98 18297

unrecognized options: @1@

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.
2.79.99 18298

WARNING: could not find where to insert IF EXISTS in statement "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.79.100 18299

could not find function definition for function with OID @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.80 Message Numbers Beginning with 18300

2.80.1 18300

could not create the spiexceptions module

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.80.2 18301

could not create exception "@1@"

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.3 18302
exclusive backup not in progress

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.4 18303
USING expression contains a whole-row table reference.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.5 18304
cannot COPY to/from client in a SQL function

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.6 18305
calculated CRC checksum does not match value stored in file

[Description]
An error occurred reading the pg_control file.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

**2.80.7 18306**

**byte ordering mismatch**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.80.8 18307**

**brin operator family "@1@" contains function @2@ with invalid support number @3@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.80.9 18308**

**brin operator family "@1@" contains function @2@ with wrong signature for support number @3@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.80.10 18309**

**brin operator family "@1@" contains operator @2@ with invalid strategy number @3@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.11 18310

brin operator family "@1@" contains invalid ORDER BY specification for operator @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.12 18311

brin operator family "@1@" contains operator @2@ with wrong signature

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.13 18312

brin operator family "@1@" is missing operator(s) for types @2@ and @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.14 18313

brin operator family "@1@" is missing support function(s) for types @2@ and @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.80.15 18314

**brin operator class "@1@" is missing operator(s)**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.16 18315

**brin operator class "@1@" is missing support function @2@**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.17 18316

**posting list is too long**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Reduce the value of maintenance_work_mem.

2.80.18 18317

**Reduce maintenance_work_mem.**

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.
GIN pending list cannot be cleaned up during recovery.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.80.20 18319

"@1@" is not a GIN index

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.21 18320

cannot access temporary indexes of other sessions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.22 18321

gin operator family "@1@" contains support procedure @2@ with cross-type registration

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.23 18322

gin operator family "@1@" contains function @2@ with invalid support number @3@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.80.28 18327**

```plaintext
gin operator class "@1@" is missing support function @2@
```

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.80.29 18328**

```
gin operator class "@1@" is missing support function @2@ or @3@
```

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.80.30 18329**

Valid values are "on", "off", and "auto".

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.80.31 18330**

```
gist operator family "@1@" contains support procedure @2@ with cross-type registration
```

An error occurred during execution of the application or command.
Processing will be aborted.

**2.80.32 18331**

gist operator family "@1@" contains function @2@ with invalid support number @3@

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.80.33 18332**

gist operator family "@1@" contains function @2@ with wrong signature for support number @3@

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.80.34 18333**

gist operator family "@1@" contains operator @2@ with invalid strategy number @3@

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.80.35 18334**

gist operator family "@1@" contains unsupported ORDER BY specification for operator @2@

**Description**
An error occurred during execution of the application or command.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.36 18335

gist operator family "@1@" contains incorrect ORDER BY opfamily specification for operator @2@

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.37 18336

gist operator family "@1@" contains operator @2@ with wrong signature

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.38 18337

gist operator class "@1@" is missing support function @2@

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.39 18338

hash operator family "@1@" contains support procedure @2@ with cross-type registration

[Description]
  An error occurred during execution of the application or command.
2.80.40 18339

hash operator family "@1@" contains function @2@ with wrong signature for support number @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.41 18340

hash operator family "@1@" contains function @2@ with invalid support number @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.42 18341

hash operator family "@1@" contains operator @2@ with invalid strategy number @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.43 18342

hash operator family "@1@" contains invalid ORDER BY specification for operator @2@

[Description]
An error occurred during execution of the application or command.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.44 18343

hash operator family "@1@" contains operator @2@ with wrong signature

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.45 18344

hash operator family "@1@" lacks support function for operator @2@

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.46 18345

hash operator family "@1@" is missing operator(s) for types @2@ and @3@

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.47 18346

hash operator class "@1@" is missing operator(s)

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing is aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.48 18347

hash operator family "@1@" is missing cross-type operator(s)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.49 18348

access method "@1@" is not of type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.50 18349

index access method "@1@" does not have a handler

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.51 18350

This can be caused by an interrupted VACUUM in version 9.3 or older, before upgrade. Please REINDEX it.

[Description]
Supplementary information was output.

[System Processing]
None.
Refer to this message together with the message that was output immediately beforehand.

2.80.52 18351

btree operator family "@1@" contains function @2@ with invalid support number @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.53 18352

btree operator family "@1@" contains function @2@ with wrong signature for support number @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.54 18353

btree operator family "@1@" contains operator @2@ with invalid strategy number @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.55 18354

btree operator family "@1@" contains invalid ORDER BY specification for operator @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.56 18355

*btree operator family "@1@" contains operator @2@ with wrong signature*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing is aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.57 18356

*btree operator family "@1@" is missing operator(s) for types @2@ and @3@*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing is aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.58 18357

*btree operator family "@1@" is missing support function for types @2@ and @3@*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing is aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.59 18358

*btree operator class "@1@" is missing operator(s)*

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing is aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.80.60 18359

**btree operator family "@1@" is missing cross-type operator(s)**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.61 18360

**spgist operator family "@1@" contains support procedure @2@ with cross-type registration**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.62 18361

**spgist operator family "@1@" contains function @2@ with invalid support number @3@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.63 18362

**spgist operator family "@1@" contains function @2@ with wrong signature for support number @3@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.80.64 18363

spgist operator family "@1@" contains operator @2@ with invalid strategy number @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.65 18364

spgist operator family "@1@" contains invalid ORDER BY specification for operator @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.66 18365

spgist operator family "@1@" contains operator @2@ with wrong signature

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.67 18366

spgist operator family "@1@" is missing operator(s) for types @2@ and @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.68 18367
spgist operator family "@1@" is missing support function @2@ for type @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.69 18368

spgist operator class "@1@" is missing operator(s)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.70 18369

Make sure the configuration parameter "@1@" is set on the master server.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.80.71 18370

Make sure the configuration parameter "@1@" is set.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.80.72 18371

Execute a database-wide VACUUM in that database. You might also need to commit or roll back old prepared transactions.
2.80.73 18372

**database "@1@" must be vacuumed before @2@ more MultiXactId is used**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.80.74 18373

**database with OID @1@ must be vacuumed before @2@ more MultiXactId is used**

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.80.75 18374

**This command would create a multixact with @1@ members, but the remaining space is only enough for @2@ member.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.80.76 18375

**Execute a database-wide VACUUM in database with OID @1@ with reduced vacuum_multixact_freeze_min_age and vacuum_multixact_freeze_table_age settings.**
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.80.77 18376

**database with OID @1@ must be vacuumed before @2@ more multixact member is used**

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.80.78 18377

**Execute a database-wide VACUUM in that database with reduced vacuum_multixact_freeze_min_age and vacuum_multixact_freeze_table_age settings.**

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.80.79 18378

**Expected a transaction log switchpoint location.**

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.80.80 18379

**requested timeline @1@ is not in this server's history**
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.80.81 18380

Failed while allocating an XLog reading processor.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.80.82 18381
could not read two-phase state from xlog at @1@/@2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.80.83 18382

expected two-phase state data is not present in xlog at @1@/@2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.80.84 18383

Stop the postmaster and vacuum that database in single-user mode. You might also need to commit or roll back old prepared transactions.
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.80.85 18384**

The database cluster was initialized with LOBLKSIZE @1@, but the server was compiled with LOBLKSIZE @2@.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.80.86 18385**

Valid values are "pause", "promote", and "shutdown".

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.80.87 18386**

The only allowed value is "immediate".

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.80.88 18387**

@1@ "@2@": @3@
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.80.89 18388

aborting backup due to backend exiting before pg_stop_backup was called

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.80.90 18389

a backup is already in progress in this session

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.80.91 18390

non-exclusive backup in progress

An error occurred.

Processing will be aborted.

Try using pg_stop_backup('f') to stop a non-exclusive backup.

2.80.92 18391

non-exclusive backup is not in progress

An error occurred.
[System Processing]
Processing will be aborted.

[Action]
Try using pg_stop_backup('t') to stop an exclusive backup.

2.80.93 18392

pg_class heap OID value not set when in binary upgrade mode

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.80.94 18393

return type of inverse transition function @1@ is not @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.95 18394

return type of combine function @1@ is not @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.96 18395

combine function with "@1@" transition type must not be declared STRICT

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.97 18396

return type of serialization function @1@ is not @2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.98 18397

return type of deserialization function @1@ is not @2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.99 18398

aggregate mfinalfunc must not be specified without mstype
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.80.100 18399

serialization functions may be specified only when the aggregate transition data type is @1@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.81 Message Numbers Beginning with 18400

2.81.1 18400

must specify both or neither of serialization and deserialization functions

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.2 18401

permission denied to create access method "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.3 18402

must be superuser to drop access methods

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.4 18403

handler function is not specified

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.5 18404

**DO INSTEAD NOTHING rules are not supported for COPY**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.6 18405

**conditional DO INSTEAD rules are not supported for COPY**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.7 18406

**DO ALSO rules are not supported for the COPY**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.8 18407

**multi-statement DO INSTEAD rules are not supported for COPY**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.81.9 18408

**COPY query must have a RETURNING clause**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.10 18409

**FORCE_NULL column "@1@" not referenced by COPY**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.11 18410

**There is @1@ slot, @2@ of them active.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.12 18411

**There is @1@ other session using the database.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.13 18412
There is @1@ prepared transaction using the database.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.14 18413

access method "@1@" does not exist, skipping

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.81.15 18414

Must be superuser to create an event trigger.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.16 18415

filter value "@1@" not recognized for filter variable "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.17 18416

The owner of an event trigger must be a superuser.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.18 18417

Use CREATE EXTENSION ... CASCADE to install required extensions too.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.19 18418

file "@1@" is too large

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.20 18419

hash indexes are not WAL-logged and their use is discouraged

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.81.21 18420

index creation on system columns is not supported
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.81.22 18421**

Create a unique index with no WHERE clause on one or more columns of the materialized view.

Supplementary information was output.

Refer to this message together with the message that was output immediately beforehand.

**2.81.23 18422**

join estimator function @1@ must return type @2@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.81.24 18423**

operator attribute "@1@" cannot be changed

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.81.25 18424**

All roles are members of the PUBLIC role.

Supplementary information was output.
[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.26 18425

role "@1@" could not be removed from policy "@2@" on "@3@"

[Description]
A warning has occurred during execution of the application or command.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.27 18426

You might need to add an explicit cast.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.28 18427

You might need to specify "USING @1@::@2@".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.29 18428

@1@ depends on column "@2@"

[Description]
Supplementary information was output.

[System Processing]
None.
Refer to this message together with the message that was output immediately beforehand.

**2.81.30 18429**

**tablespace location should not be inside the data directory**

**Description**

A warning has occurred during execution of the application or command.

**System Processing**

Continues processing.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.81.31 18430**

**Open the existing keystore, or set the master encryption key to create and open a new keystore**

**Description**

Supplementary information was output.

**System Processing**

None.

**Action**

Refer to this message together with the message that was output immediately beforehand.

**2.81.32 18431**

**Tablespace "@1@" does not exist.**

**Description**

An error occurred during execution of the application or command.

**System Processing**

Processing will be aborted.

**Action**

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.81.33 18432**

**Foreign tables cannot have TRUNCATE triggers.**

**Description**

Supplementary information was output.

**System Processing**

None.

**Action**

Refer to this message together with the message that was output immediately beforehand.
2.81.34 18433

**Foreign tables cannot have constraint triggers.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.35 18434

**Consider using an AFTER trigger instead of a BEFORE trigger to propagate changes to other rows.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.36 18435

**type input function @1@ should not be volatile**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that functions are not marked as volatile.

2.81.37 18436

**type output function @1@ should not be volatile**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that functions are not marked as volatile.
2.81.38 18437

**type receive function @1@ should not be volatile**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that functions are not marked as volatile.

2.81.39 18438

**type send function @1@ should not be volatile**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that functions are not marked as volatile.

2.81.40 18439

**type modifier input function @1@ should not be volatile**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that functions are not marked as volatile.

2.81.41 18440

**type modifier output function @1@ should not be volatile**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that functions are not marked as volatile.

2.81.42 18441
You must specify an operator class for the range type or define a default operator class for the subtype.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.43 18442

Use ALTER TABLE instead.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.44 18443

VACUUM option DISABLE_PAGE_SKIPPING cannot be used with FULL

[Description]
The DISABLE_PAGE_SKIPPING option cannot be used with VACUUM FULL or ANALYZE commands.

[System Processing]
Processing is aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.45 18444

oldest multixact is far in the past

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Close open transactions with multixacts soon to avoid wraparound problems.

2.81.46 18445

Close open transactions with multixacts soon to avoid wraparound problems.
2.81.47 18446

Unrecognized key word: "@1@".

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.48 18447

Conflicting "datestyle" specifications.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.49 18448

Cannot specify months in time zone interval.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.50 18449

Cannot specify days in time zone interval.

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.51 18450

**PostgreSQL does not support leap seconds.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.52 18451

**UTC timezone offset is out of range.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.53 18452

**You can use REPEATABLE READ instead.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.54 18453

**Conversion between @1@ and @2@ is not supported.**

[Description]
Supplementary information was output.

[System Processing]
None.
2.81.55 18454

Cannot change "client_encoding" now.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.56 18455

cannot change client_encoding in a parallel worker
[Description]
This error occurs if a function wants to set client_encoding and is invoked by the parallel query.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that client_encoding is not set by the parallel query operation.

2.81.57 18456

Valid values are "local" and "cascaded".
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.58 18457

Key conflicts exist.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.81.59 18458

**Key conflicts with existing key.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.60 18459

**Failing row contains @1@.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.61 18460

**Use the REFRESH MATERIALIZED VIEW command.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.62 18461

**combine function for aggregate @1@ must be declared as STRICT**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.63 18462
Ensure that no rows proposed for insertion within the same command have duplicate constrained values.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.64 18463

**could not send tuple to shared-memory queue**

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.81.65 18464

**BSD authentication failed for user "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.66 18465

**Connection matched pg_hba.conf line @1@: "@2@"**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.67 18466

**could not translate name**
An error occurred while translating domain name to Kerberos realm name in SSL.

Processing will be aborted.

Check the message text and confirm that the domain name is written correctly.

2.81.68 18467

realm name too long

An error occurred while translating domain name to Kerberos realm name in SSL.

Processing will be aborted.

Check the message text and confirm that the domain name is written correctly.

2.81.69 18468

translated account name too long

An error occurred while translating account name to Kerberos user name in SSL.

Processing will be aborted.

Check the message text and confirm that the account name is written correctly.

2.81.70 18469

pam_set_item(PAM_RHOST) failed: @1@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.81.71 18470

LDAP search for filter "@1@" on server "@2@" returned @3@ entry.

Supplementary information was output.
[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.72 18471

RADIUS response has corrupt length: @1@ (actual length @2@)
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.73 18472

private key file "@1@" is not a regular file
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.74 18473

private key file "@1@" must be owned by the database user or root
[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.75 18474

terminating connection due to unexpected postmaster exit
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the server is still running.

2.81.76 18475

Role "@1@" does not exist.

[Description]
The user does not exist.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.77 18476

User "@1@" has an empty password.

[Description]
The password is blank.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.78 18477

Password does not match for user "@1@".

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.79 18478

Specify exactly one connection type per line.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
**2.81.80 18479**

**Specify one address range per line.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.81.81 18480**

**Specify an address range in CIDR notation, or provide a separate netmask.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.81.82 18481**

**Specify exactly one authentication type per line.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

**2.81.83 18482**

**extensible node type "@1@" already exists**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.81.84 18483**
ExtensibleNodeMethods "@1@" was not registered

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.85 18484

whole row unique index inference specifications are not supported

[Description]
The whole row unique index inference specifications are not supported.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.81.86 18485

It is SQL to which the outer joined operator is not supported. Please change to SQL that is using the joined table.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.87 18486

too many grouping sets present (maximum 4096)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the items in the GROUPING SET are less than the maximum allowable value.

2.81.88 18487

Put a separate column definition list for each function inside ROWS FROM().
Use separate UNNEST() calls inside ROWS FROM(), and attach a column definition list to each one.

For example, ON CONFLICT (column_name).

operator precedence change: @1@ is now lower precedence than @2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.81.93 18492

There is an ordered-set aggregate @1@, but it requires @2@ direct arguments, not @3@.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.94 18493

To use the hypothetical-set aggregate @1@, the number of hypothetical direct arguments (here @2@) must match the number of ordering columns (here @3@).

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.95 18494

There is an ordered-set aggregate @1@, but it requires at least @2@ direct arguments.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.81.96 18495

Could not choose a best candidate function. You might need to add explicit type casts.
FILTER is not implemented for non-aggregate window functions

**Description**
FILTER is not yet supported with true window functions.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

The combining JOIN type must be INNER or LEFT for a LATERAL reference.

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.

Perhaps you meant to reference the column "@1.@2@".

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.

There is a column named "@1@" in table "@2@", but it cannot be referenced from this part of the query.
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

## 2.82 Message Numbers Beginning with 18500

### 2.82.1 18500

*Perhaps you meant to reference the column "@1.@2@" or the column "@3.@4@".*

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

### 2.82.2 18501

This error usually means that PostgreSQL's request for a shared memory segment exceeded your kernel's SHMMAX parameter, or possibly that it is less than your kernel's SHMMIN parameter. The PostgreSQL documentation contains more information about shared memory configuration.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

### 2.82.3 18502

This error usually means that PostgreSQL's request for a shared memory segment exceeded your kernel's SHMALL parameter. You might need to reconfigure the kernel with larger SHMALL. The PostgreSQL documentation contains more information about shared memory configuration.

Supplementary information was output.

None.
2.82.4 18503

This error does *not* mean that you have run out of disk space. It occurs either if all available shared memory IDs have been taken, in which case you need to raise the SHMMNI parameter in your kernel, or because the system's overall limit for shared memory has been reached. The PostgreSQL documentation contains more information about shared memory configuration.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.5 18504

This error usually means that PostgreSQL's request for a shared memory segment exceeded available memory, swap space, or huge pages. To reduce the request size (currently @1@ bytes), reduce PostgreSQL's shared memory usage, perhaps by reducing shared_buffers or max_connections.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.6 18505

wrote crash dump to file "@1@"

[Description]
An error occurred.

[System Processing]
None.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.82.7 18506

background worker "@1@": must be registered in shared_preload_libraries

[Description]
The background worker must be registered in shared_preload_libraries.
[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.8 18507

too many background workers

[Description]
  Up to max_worker_processes background worker can be registered with the current settings.

[System Processing]
  Processing will be aborted.

[Action]
  Consider increasing the value of configuration parameter max_worker_processes.

2.82.9 18508

Up to @1@ background worker can be registered with the current settings.

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.82.10 18509

Consider increasing the configuration parameter "max_worker_processes".

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.82.11 18510

checkpoints are occurring too frequently (@1@ second apart)

[Description]
  Checkpoints are occurring too frequently.

[System Processing]
  Continues processing.
[Action]

Consider increasing the value of configuration parameter max_wal_size.

2.82.12 18511

using stale statistics instead of current ones because stats collector is not responding

[Description]

Using stale statistics instead of current ones because the statistics collector is not responding.

[System Processing]

Continues processing.

[Action]

Contact Fujitsu technical support.

2.82.13 18512

ending log output to stderr

[Description]

Ending log output to stderr.

[System Processing]

Continues processing.

[Action]

Future log output will be output to the log destination.

2.82.14 18513

Future log output will go to log destination "@1@".

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.

2.82.15 18514

Set the LC_ALL environment variable to a valid locale.

[Description]

Supplementary information was output.

[System Processing]

None.

[Action]

Refer to this message together with the message that was output immediately beforehand.
2.82.16 18515

@1@: could not find the database system
Expected to find it in the directory "@2@", but could not open file "@3@": @4@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.82.17 18516

Valid values are: "false", 0, "true", 1, "database".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.18 18517

pg_ident.conf not reloaded

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.82.19 18518

shutdown at recovery target

[Description]
Terminated normally, but a log message was output.

[System Processing]
None

[Action]
No action required.
2.82.20 18519

Failed process was running: @1@

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.21 18520

could not fork checkpointer process: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.82.22 18521

could not fork worker process: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.82.23 18522

could not parse connection string: @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.82.24 18523
Could not identify system: got @1@ rows and @2@ fields, expected @3@ rows and @4@ or more fields.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.25 18524

Increase max_replication_slots and try again.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.26 18525

logical decoding found consistent point at @1@/@2@

[Description]
Transaction ID has finished. There are no more running transactions.

[System Processing]
Continues processing.

[Action]
No action required.

2.82.27 18526

Transaction ID @1@ finished; no more running transactions.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.28 18527

There are no running transactions.
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.29 18528

logical decoding found initial starting point at @1@/@2@

[Description]
The transaction needs to finish before building a snapshot.

[System Processing]
Continues processing.

[Action]
No action required.

2.82.30 18529

@1@ transaction needs to finish.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.31 18530

Logical decoding will begin using saved snapshot.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.32 18531

could not parse file name "@1@"

[Description]
Could not parse file name in pg_logical/snapshots.
Continues processing.

No action required.

**2.82.33 18532**

Replication slot names may only contain lower case letters, numbers, and the underscore character.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.82.34 18533**

Free one or increase max_replication_slots.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.82.35 18534**

standby ":@1@:\" is now a synchronous standby with priority @2@

Inform the user that the standby server is now a synchronous standby with priority number.

Continues processing.

No action required.

**2.82.36 18535**

synchronous_standby_names parser failed

An error occurred during execution of the application or command.
Processing will be aborted.

Check the value of synchronous_standby_names, which may come from postgresql.conf or the SQL command line.

2.82.37 18536

End of WAL reached on timeline @1@ at @2@/@3@.

Supplementary information was output.

Refer to this message together with the message that was output immediately beforehand.

2.82.38 18537

primary server contains no more WAL on requested timeline @1@.

The primary server contains no more WALs on the requested timeline.

Continues processing.

No action required.

2.82.39 18538

could not close log segment @1@: @2@.

An error occurred during I/O processing in the database server.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.82.40 18539

This server's history forked from timeline @1@ at @2@/@3@.

Supplementary information was output.

None.
Refer to this message together with the message that was output immediately beforehand.

2.82.41 18540

requested starting point @1@/@2@ is ahead of the WAL flush position of this server @3@/@4@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.42 18541

terminating walsender process after promotion

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.82.43 18542

invalid page in block @1@ of relation @2@; zeroing out page

[Description]
In invalid page was found in the relation.

[System Processing]
Continues processing.

[Action]
No action required.

2.82.44 18543

snapshot too old

[Description]
The snapshot is too old.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.82.45 18544

could not flush dirty data: @1@

[Description]
Terminated normally.

[System Processing]
Continues processing.

[Action]
No action required.

2.82.46 18545

could not determine dirty data size: @1@

[Description]
Could not determine dirty data size when flushing data.

[System Processing]
Continues processing.

[Action]
No action required.

2.82.47 18546

could not munmap() while flushing data: @1@

[Description]
An error is returned from the munmap function.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.82.48 18547

dynamic shared memory control segment is corrupt

[Description]
Dynamic shared memory control segment is corrupt.

[System Processing]
Continues processing.

[Action]
No action required.
2.82.49 18548

Set dynamic_shared_memory_type to a value other than "none".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.50 18549

epoll_ctl() failed: @1@

[Description]
An error occurred for epoll_ctl.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.82.51 18550

epoll_wait() failed: @1@

[Description]
An error occurred for epoll_wait.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.82.52 18551

while updating tuple (@1@,@2@) in relation "@3@"

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.53 18552
while deleting tuple (@1@,@2@) in relation "@3@"
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.54 18553

while locking tuple (@1@,@2@) in relation "@3@"
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.55 18554

while locking updated version (@1@,@2@) of tuple in relation "@3@"
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.56 18555

while inserting index tuple (@1@,@2@) in relation "@3@"
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.57 18556

while checking uniqueness of tuple (@1@,@2@) in relation "@3@"
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.82.58 18557

while rechecking updated tuple (@1@, @2@) in relation "@3@"

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.82.59 18558

while checking exclusion constraint on tuple (@1@, @2@) in relation "@3@"

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.82.60 18559

The source transaction @1@ is not running anymore.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.82.61 18560

Process @1@ waits for @2@ on @3@.

Supplementary information was output.
[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.62 18561

**page verification failed, calculated checksum @1@ but expected @2@**

[Description]
The calculated checksum is different from the checksum in the page head.

[System Processing]
Continues processing.

[Action]
No action required.

2.82.63 18562

**could not open file "@1@" (target block @2@): previous segment is only @3@ blocks**

[Description]
An error occurred during I/O processing in the database server.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.82.64 18563

**terminating connection because of crash of another server process**

[Description]
The postmaster has commanded this server process to roll back the current transaction and exit, because another server process exited abnormally and possibly corrupted shared memory.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.82.65 18564

The postmaster has commanded this server process to roll back the current transaction and exit, because another server process exited abnormally and possibly corrupted shared memory.
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

**2.82.66 18565**

*terminating connection due to idle-in-transaction timeout*

Processing was canceled.

Processing will be aborted.

Check the message text.

**2.82.67 18566**

"max_stack_depth" must not exceed @1@kB.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.82.68 18567**

*Increase the platform’s stack depth limit via "ulimit -s" or local equivalent.*

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.82.69 18568**

*invalid affix flag "@1@"

An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.70 18569

affix flag "@1@" is out of range

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.71 18570

invalid character in affix flag "@1@"

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.72 18571

invalid affix flag "@1@" with "long" flag value

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.73 18572

invalid affix alias "@1@"

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.74 18573

**invalid number of flag vector aliases**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.75 18574

**Missing array dimension value.**

**[Description]**
Supplementary information was output.

**[System Processing]**
None.

**[Action]**
Refer to this message together with the message that was output immediately beforehand.

2.82.76 18575

**Missing "@1@" after array dimensions.**

**[Description]**
Supplementary information was output.

**[System Processing]**
None.

**[Action]**
Refer to this message together with the message that was output immediately beforehand.

2.82.77 18576

**Array contents must start with ":".**

**[Description]**
Supplementary information was output.

**[System Processing]**
None.

**[Action]**
Refer to this message together with the message that was output immediately beforehand.
2.82.78 18577

**Unexpected "@1@" character.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.79 18578

**Unexpected array element.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.80 18579

**Unmatched "@1@" character.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.81 18580

**Multidimensional arrays must have sub-arrays with matching dimensions.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.82.82 18581
Array slice subscript must provide both boundaries

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
When assigning to a slice of an empty array value, slice boundaries must be fully specified.

---

When assigning to a slice of an empty array value, slice boundaries must be fully specified.

**Description**
Supplementary information was output.

**System Processing**
None.

**Action**
Refer to this message together with the message that was output immediately beforehand.

---

Abstime out of range for date

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

This time zone name appears in the configuration file for time zone abbreviation "@1@".
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.82.87 18586

invalid size: "@1@"

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.82.88 18587

Invalid size unit: "@1@".

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.82.89 18588

Valid units are "bytes", "kB", "MB", "GB", and "TB".

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

2.82.90 18589

Input data is missing padding, is truncated, or is otherwise corrupted.

Supplementary information was output.
Character with value 0x@1@ must be escaped.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

Unicode high surrogate must not follow a high surrogate.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

Unicode low surrogate must follow a high surrogate.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

\u0000 cannot be converted to text.

[Description]
Supplementary information was output.

[System Processing]
None.

Expected string or ")", but found "@1@".

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.83.4 18603

Expected ":", but found "@1@".

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.83.5 18604

Expected "," or ")", but found "@1@".

[Description]
  Supplementary information was output.

[System Processing]
  None.

[Action]
  Refer to this message together with the message that was output immediately beforehand.

2.83.6 18605

Token "@1@" is invalid.

[Description]
  Supplementary information was output.

[System Processing]
  None.
[Action] Refer to this message together with the message that was output immediately beforehand.

2.83.7 18606

JSON data, line @1@: @2@@3@@4@

[Description] Supplementary information was output.

[System Processing] None.

[Action] Refer to this message together with the message that was output immediately beforehand.

2.83.8 18607

The arguments of json_build_object() must consist of alternating keys and values.

[Description] Supplementary information was output.

[System Processing] None.

[Action] Refer to this message together with the message that was output immediately beforehand.

2.83.9 18608

Object keys should be text.

[Description] Supplementary information was output.

[System Processing] None.

[Action] Refer to this message together with the message that was output immediately beforehand.

2.83.10 18609

Due to an implementation restriction, jsonb strings cannot exceed @1@ bytes.

[Description] Supplementary information was output.

[System Processing] None.

[Action] Refer to this message together with the message that was output immediately beforehand.
2.83.11 18610

Try calling the function in the FROM clause using a column definition list.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.12 18611

cannot replace existing key

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Try using the function jsonb_set to replace the key value.

2.83.13 18612

Try using the function jsonb_set to replace key value.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.14 18613

levenshtein argument exceeds maximum length of @1@ characters

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.15 18614
cannot use advisory locks during a parallel operation

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.16 18615

string is not a valid identifier: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
The string may have unclosed double quotation marks.

2.83.17 18616

String has unclosed double quotes.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.18 18617

Quoted identifier must not be empty.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.19 18618

No valid identifier before ".".
[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.20 18619

No valid identifier after ".".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.21 18620

Apply system library package updates.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.22 18621

invalid command name: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.23 18622

cannot accept a value of type index_am_handler

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.24 18623

cannot display a value of type index_am_handler

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.25 18624

Valid values are "[", "[", "]", and "]".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.26 18625

Junk after "empty" key word.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.27 18626

Missing left parenthesis or bracket.

[Description]
Supplementary information was output.

[System Processing]
None.
[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.28 18627

**Missing comma after lower bound.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.29 18628

**Too many commas.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.30 18629

**Junk after right parenthesis or bracket.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.31 18630

**Key is not present in table "@1@".**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
2.83.32 18631

Key is still referenced from table "@1@".

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.33 18632

Numeric time zones must have "-" or "+" as first character.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.34 18633

timestamp out of range: "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.35 18634

distance in phrase operator should not be greater than @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.36 18635
**distance in phrase operator should be non-negative and less than @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.83.37 18636**

**lexeme array may not contain nulls**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.83.38 18637**

**weight array may not contain nulls**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.83.39 18638**

**unrecognized weight: "@1@"**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.83.40 18639**

**For a single "@1@" use "@2@@3@".**
This probably indicates that the version of libxml2 being used is not compatible with the libxml2 header files that PostgreSQL was built with.

Make sure keystore_location points to the correct location. If the setting is correct, set the master encryption key to create the keystore.

keystore has been opened

auto-open keystore has been opened
Terminated normally.

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.83.65 18665

@1@: could not access directory "@2@": @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.66 18666

Run initdb or pg_basebackup to initialize a PostgreSQL data directory.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.67 18667

@1@ does not know where to find the server configuration file. You must specify the --config-file or -D invocation option or set the PGDATA environment variable.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.68 18668

@1@ does not know where to find the database system data. This can be specified as "data_directory" in "@2@", or by the -D invocation option, or by the PGDATA environment variable.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.83.69 18669

@1@ does not know where to find the "hba" configuration file. This can be specified as "hba_file" in "@2@", or by the -D invocation option, or by the PGDATA environment variable.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.70 18670

@1@ does not know where to find the "ident" configuration file. This can be specified as "ident_file" in "@2@", or by the -D invocation option, or by the PGDATA environment variable.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.71 18671

Value exceeds integer range.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.72 18672

"temp_buffers" cannot be changed after any temporary tables have been accessed in the session.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.83.73 18673

Cannot enable parameter when "log_statement_stats" is true.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.74 18674

Cannot enable "log_statement_stats" when "log_parser_stats", "log_planner_stats", or "log_executor_stats" is true.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.75 18675

query-specified return tuple and function return type are not compatible

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.83.76 18676

query would be affected by row-level security policy for table "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
To disable the policy for the table owner, use ALTER TABLE NO FORCE ROW LEVEL SECURITY.
2.83.77 18677

**To disable the policy for the table's owner, use ALTER TABLE NO FORCE ROW LEVEL SECURITY.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.78 18678

**Entry in time zone file "@1@", line @2@, conflicts with entry in file "@3@", line @4@.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.83.79 18679

**cannot have more than @1@ runs for an external sort**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.80 18680

**Duplicate keys exist.**

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.
The source transaction is not running anymore.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

@1@: WARNING: cannot create restricted tokens on this platform

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

@1@: could not open process token: error code @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

@1@: could not allocate SIDs: error code @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
@1@: could not create restricted token: error code @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.86 18686

@1@: could not start process for command "@2@": error code @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.87 18687

@1@: could not re-execute with restricted token: error code @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.88 18688

@1@: could not get exit code from subprocess: error code @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.89 18689

You must run @1@ as the PostgreSQL superuser.
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.83.90 18690
@1@: lock file "@2@" exists.Is a server running? If not, delete the lock file and try again.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.83.91 18691
The database server was not shut down cleanly. Resetting the transaction log might cause data to be lost. If you want to proceed anyway, use -f to force reset.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.83.92 18692
If you are sure the data directory path is correct, execute touch @1@ and try again.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.83.93 18693
user does not exist
[Description]
user does not exist.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.83.94 18694
command not executable
[Description]
The command cannot be executed.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.83.95 18695
command not found
[Description]
The command cannot be found.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.83.96 18696
The server (version @1@) does not support editing view definitions.
[Description]
The server does not support editing the view function.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.83.97 18697
out of memory
[Description]
There was insufficient free space in the server's memory during execution of the application.
[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.83.98 18698

There is no previous error.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.83.99 18699

Query buffer is empty.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84 Message Numbers Beginning with 18700

2.84.1 18700

The server (version @1@) does not support showing view definitions.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.2 18701

view name is required
[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

### 2.84.3 18702

\texttt{pset: allowed Unicode column line styles are single, double}

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

### 2.84.4 18703

\texttt{pset: allowed Unicode header line styles are single, double}

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

### 2.84.5 18704

\texttt{Pager won't be used for less than @1@ line.}

[Description]  
An error occurred.

[System Processing]  
Processing will be aborted.

[Action]  
To investigate the cause of the occurrence from the message, and remove cause.

### 2.84.6 18705

\texttt{could not parse reloptions array}

[Description]  
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.7 18706

The connection to the server was lost. Attempting reset:

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.8 18707
canceled by user

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.9 18708

trying to exit copy mode

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.10 18709
\crosstabview: statement did not return a result set

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.84.11 18710

\crosstabview: query must return at least three columns
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.12 18711

\crosstabview: vertical and horizontal headers must be different columns
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.13 18712

\crosstabview: data column must be specified when query returns more than three columns
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.14 18713

\crosstabview: maximum number of columns (@1@) exceeded
[Description]
An error occurred.
[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.84.15 18714

\crosstabview: query result contains multiple data values for row "@1@", column "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.16 18715

\crosstabview: column number @1@ is out of range 1..@2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.17 18716

\crosstabview: ambiguous column name: "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.18 18717

\crosstabview: column name not found: "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.19 18718
The server (version @1@) does not support access methods.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.20 18719

Did not find any text search parser named "@1@".

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.21 18720

@1@: could not find own program executable

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.22 18721

@1@: buffer size is wrong

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.23 18722

@1@: source or destination file is not specified
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.84.24 18723**

@1@: too many command-line arguments (first is "@2")

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.84.25 18724**

out of memory

There was insufficient free space in the server's memory during execution of the application.

Processing will be aborted.

Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

**2.84.26 18725**

could not create file "@1": @2@

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.84.27 18726**

could not read file "@1": @2@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.28 18727
could not write to file "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.29 18728
could not fsync file "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.30 18729
could not close file "@1@": @2@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.31 18730
user does not exist

[Description]
user does not exist.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.32 18731

user name lookup failure: error code @1@
[Description]
User name lookup failed.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.33 18732

Cannot add header to table content: column count of @1@ exceeded.
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.34 18733

Cannot add cell to table content: total cell count of @1@ exceeded.
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.35 18734

invalid output format (internal error): @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.84.36 18735

@1@: could not connect to database @2@: out of memory

[Description]
There was insufficient free space in the server’s memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.84.37 18736

@1@: cannot reindex specific schema(s) in all databases

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.38 18737

@1@: cannot reindex specific schema(s) and system catalogs at the same time

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.39 18738

@1@: reindexing of schema "@2@" in database "@3@" failed: @4@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.40 18739

@1@: number of parallel jobs must be at least 1
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.41 18740

@1@: too many parallel jobs requested (maximum: @2@)
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.42 18741

out of memory
[Description]
There was insufficient free space in the client's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- Modify the application to reduce memory usage.

2.84.43 18742

could not obtain lock on relation "@1@"This usually means that someone requested an ACCESS EXCLUSIVE lock on the table after the pg_dump parent process had gotten the initial ACCESS SHARE lock on the table.

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.44 18743

schema "@1@" not found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.45 18744

table "@1@" not found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.46 18745

index "@1@" not found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.47 18746

function "@1@" not found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.84.48 18747

trigger "@1@" not found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.49 18748

WARNING: don't know how to set owner for object type @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.50 18749

WARNING: archive was made on a machine with larger integers, some operations might fail

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.51 18750

WARNING: archive is compressed, but this installation does not support compression -- no data will be available

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.52 18751

**WARNING: invalid creation date in header**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.53 18752

(The INSERT command cannot set OIDs.)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.54 18753

Synchronized snapshots are not supported by this server version. Run with --no-synchronized-snapshots instead if you do not need synchronized snapshots.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.55 18754

no matching tables were found for pattern "@1@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.56 18755

Error message from server: @1@

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.57 18756

WARNING: owner of schema "@1@" appears to be invalid

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.58 18757

WARNING: owner of data type "@1@" appears to be invalid

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.59 18758

WARNING: owner of operator "@1@" appears to be invalid

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.60 18759

WARNING: owner of operator class "@1@" appears to be invalid

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.61 18760

WARNING: owner of operator family "@1@" appears to be invalid

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.62 18761

WARNING: owner of aggregate function "@1@" appears to be invalid

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.63 18762

WARNING: owner of function "@1@" appears to be invalid

[Description]
Terminated normally but a warning was output.
Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.84.64 18763**

**WARNING: owner of table "@1@" appears to be invalid**

[Description]
Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.84.65 18764**

**WARNING: typtype of data type "@1@" appears to be invalid**

[Description]
Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.84.66 18765**

**WARNING: bogus value in proargmodes array**

[Description]
Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

**2.84.67 18766**

**WARNING: could not parse proallargtypes array**
[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.68 18767

WARNING: could not parse proargmodes array

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.69 18768

WARNING: could not parse proargnames array

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.70 18769

WARNING: could not parse proconfig array

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.71 18770
unrecognized proparallel value for function "@1@"

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.72 18771

WARNING: bogus value in pg_cast.castfunc or pg_cast.castmethod field

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.73 18772

WARNING: bogus value in pg_cast.castmethod field

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.74 18773

WARNING: bogus transform definition, at least one of trffromsql and trftosql should be nonzero

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.
2.84.75 18774

**WARNING: bogus value in pg_transform.trffromsql field**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.76 18775

**WARNING: bogus value in pg_transform.trftosql field**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.77 18776

**WARNING: could not find operator with OID @1@**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.78 18777

**WARNING: invalid type "@1@" of access method "@2@"**

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.
[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.79 18778

WARNING: aggregate function @1@ could not be dumped correctly for this database version; ignored

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.80 18779

could not parse initial GRANT ACL list (@1@) or initial REVOKE ACL list (@2@) for object "@3@" (@4@)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.84.81 18780

WARNING: could not parse roptions array

[Description]
Terminated normally but a warning was output.

[System Processing]
Continues processing.

[Action]
Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.84.82 18781

could not connect to server: @1@

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.83 18782
source server must not be in recovery mode
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.84 18783
full_page_writes must be enabled in the source server
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.85 18784
error running query (@1@) in source server: @2@
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.86 18785
unexpected result set from query
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.87 18786

unrecognized result "@1@" for current WAL insert location

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.88 18787

could not fetch file list: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.89 18788

unexpected result set while fetching file list

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.90 18789

could not send query: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

</table>
unexpected result format while fetching remote files

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.96 18795

unexpected null values in result while fetching remote files

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.97 18796

unexpected result length while fetching remote files

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.98 18797

could not fetch remote file "@1@": @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.99 18798

unexpected result set while fetching remote file "@1@"
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.84.100 18799

could not send COPY data: @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85 Message Numbers Beginning with 18800

2.85.1 18800

could not create temporary table: @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.2 18801

could not send file list: @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.85.3 18802

could not send end-of-COPY: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.4 18803

unexpected result while sending file list: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.5 18804

could not read WAL record at @1@/@2@: @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.6 18805

could not read WAL record at @1@/@2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.7 18806
could not find previous WAL record at @1@/@2@: @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.8 18807
could not find previous WAL record at @1@/@2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.9 18808
WAL record modifies a relation, but record type is not recognized
lsn: @1@/@2@, rmgr: @3@, info: @4@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.10 18809
cannot be executed by "root"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.11 18810
You must run @1@ as the PostgreSQL superuser.
2.85.12 18811

**source and target clusters are from different systems**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.85.13 18812

**clusters are not compatible with this version of pg_rewind**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.85.14 18813

**target server needs to use either data checksums or "wal_log_hints = on"**

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.85.15 18814

**target server must be shut down cleanly**

An error occurred.
[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.85.16 18815

source data directory must be shut down cleanly

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.85.17 18816

invalid control file

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.85.18 18817

could not find common ancestor of the source and target cluster’s timelines

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.85.19 18818

backup label buffer too small

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

### 2.85.20 18819

**unexpected control file CRC**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.85.21 18820

**unexpected control file size @1@, expected @2@**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.85.22 18821

**The program "initdb" is needed by @1@ but was not found in the same directory as "@2@". Check your installation.**

[Description]

An error occurred.

[System Processing]

Processing will be aborted.

[Action]

To investigate the cause of the occurrence from the message, and remove cause.

### 2.85.23 18822

**syntax error in history file: @1@**

[Description]

An error occurred during I/O processing in the database server.

[System Processing]

Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.85.24 18823

**Expected a numeric timeline ID.**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.25 18824

**Expected a transaction log switchpoint location.**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.26 18825

**Invalid data in history file: @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.27 18826

**Timeline IDs must be in increasing sequence.**

[Description]
An error occurred.

[System Processing]
Processing will be abandoned.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.85.28 18827

**Invalid data in history file**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.29 18828

**Timeline IDs must be less than child timeline’s ID.**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.30 18829

**Invalid record offset at @1@/@2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.31 18830

**Contrecord is requested by @1@/@2@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.32 18831
record length @1@ at @2@/@3@ too long

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.85.33 18832

there is no contrecord flag at @1@/@2@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.85.34 18833

invalid contrecord length @1@ at @2@/@3@

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

2.85.35 18834

invalid resource manager ID @1@ at @2@/@3@

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.36 18835

record with incorrect prev-link @1@/@2@ at @3@/@4@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.85.37 18836**

**incorrect resource manager data checksum in record at @1@/@2@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.85.38 18837**

**invalid magic number @1@ in log segment @2@, offset @3@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.85.39 18838**

**invalid info bits @1@ in log segment @2@, offset @3@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.85.40 18839**

**WAL file is from different database system: WAL file database system identifier is @1@, pg_control database system identifier is @2@**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.41 18840

WAL file is from different database system: incorrect XLOG_SEG_SIZE in page header

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.42 18841

WAL file is from different database system: incorrect XLOG_BLCKSZ in page header

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.43 18842

unexpected pageaddr @1@@2@ in log segment @3@, offset @4@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.44 18843

out-of-sequence timeline ID @1@ (after @2@) in log segment @3@, offset @4@

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.45 18844

**record with invalid length at @1@/@2@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.46 18845

**invalid compressed image at @1@/@2@, block @3@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.47 18846

**calculated CRC checksum does not match value stored in file**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.48 18847

**WARNING: Calculated CRC checksum does not match value stored in file.Either the file is corrupt, or it has a different layout than this programis expecting. The results below are untrustworthy.**

[Description]
An error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

**2.85.49 18848**

byte ordering mismatch

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

**2.85.50 18849**

*WARNING: possible byte ordering mismatch* The byte ordering used to store the pg_control file might not match the one used by this program. In that case the results below would be incorrect, and the PostgreSQL installation would be incompatible with this data directory.

[Description]
  An error occurred.

[System Processing]
  Processing will be aborted.

[Action]
  To investigate the cause of the occurrence from the message, and remove cause.

**2.85.51 18850**

@1@: too many command-line arguments (first is "@2@")

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.85.52 18851**

out of memory

[Description]
  There was insufficient free space in the client's memory during execution of the application.
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- Modify the application to reduce memory usage.

2.85.53 18852
cannot duplicate null pointer (internal error)
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.54 18853
command not executable
[Description]
The command cannot be executed.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.55 18854
command not found
[Description]
The command cannot be found.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.56 18855
WARNING: online backup mode is active Shutdown will not complete until pg_stop_backup() is called.

[Description]
Terminated normally but a warning was output.
Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.85.57 18856

@1@: WARNING: cannot create restricted tokens on this platform

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.85.58 18857

@1@: WARNING: could not locate all job object functions in system API

Terminated normally but a warning was output.

Continues processing.

Check the message text and confirm that the event indicated in supplementary information reported by the system is a planned event.

2.85.59 18858

@1@: cannot be run as root Please log in (using, e.g., "su") as the (unprivileged) user that will own the server process.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.85.60 18859

out of memory
[Description]
There was insufficient free space in the client's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- Modify the application to reduce memory usage.

2.85.61 18860

cannot duplicate null pointer (internal error)
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.62 18861

@1@: out of memory
[Description]
There was insufficient free space in the client's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- Modify the application to reduce memory usage.

2.85.63 18862

@1@: replication slots can only be used with WAL streaming
[Description]
Replication slots can only be used with WAL streaming.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.85.64 18863

@1@: transaction log directory location must be an absolute path
[Description]
   The transaction log directory location must be an absolute path.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.85.65 18864

@1@: Make sure the WAL archive area specified by archive_command parameter is writable and not full.

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.66 18865

query result has too many rows to fit in a Perl array

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.67 18866

module "unknown" not found in pltcl_modules

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.85.68 18867

query result has too many rows to fit in a Python list
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.85.69 18868

'@1@' is an invalid keyword argument for this function

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.85.70 18869

invalid SQLSTATE code

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.85.71 18870

PGresult is not an error result

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.85.72 18871

extraneous data in "t" message

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86 Message Numbers Beginning with 20000

2.86.1 20000

listagg_transfn called in non-aggregate context

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.2 20002

median4_transfn called in non-aggregate context

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.3 20003

lock request error

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.4 20004

event registration error

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.86.5 20005**

*event name is NULL*

**Description**

An error occurred.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.86.6 20006**

*feature not supported*

**Description**

An error occurred.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.86.7 20007**

*not called by trigger manager*

**Description**

An error occurred.

**System Processing**

Processing will be aborted.

**Action**

To investigate the cause of the occurrence from the message, and remove cause.

**2.86.8 20008**

*not called on valid event*

**Description**

An error occurred.

**System Processing**

Processing will be aborted.
[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.9 20009

SPI_connect failed

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.10 20010

not called with valid relation

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.11 20011

attribute event not found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.12 20012

attribute message not found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.86.13 20013

**SPI_prepare failed**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.14 20014

**can't execute sql**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.15 20015

**SPI execute error**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.16 20016

**invalid value for @1@**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.17 20017
date out of range
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.86.18 20018

timestamp out of range
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.86.19 20019

invalid cursor number
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.86.20 20020

failed to execute SQL statement
[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.86.21 20021

SQL is empty string
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.22 20022

host variable name "@1@" is too long

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.23 20023

host variable name is NULL

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.24 20024

no statement parsed

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.25 20025

host variable does not exist

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.26 20026
invalid length for host variable name

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.27 20027
invalid length for variable character string

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.28 20028
not all variables bound

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.29 20029
no statement execute

[Description]
An error occurred.

[System Processing]
Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.86.30 20030

**not supported data type**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.31 20031

**mismatch column_value data type and define_column data type**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.32 20032

**mismatch select data type and define_column data type**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.33 20033

[@1@]

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.86.34 20034
**invalid parameter**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.35 20035
**null value not allowed**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.36 20036
**invalid encoding name "@1@"**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.37 20037
**program limit exceeded**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.38 20038
no data found

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.39 20039

SPI_prepare_failed

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.40 20040

start_line must be positive (@1@ passed)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.41 20041

end_line must be positive (@1@ passed)

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.42 20042

return type must be a row type
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.86.43 20043**

failed to retrieve the default LC_COLLATE value

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.86.44 20044**

failed to set the requested LC_COLLATE value [@1@]

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.86.45 20045**

failed to set back the default LC_COLLATE value [@1@]

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

**2.86.46 20046**

unknown format

An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.47 20047

function is called from invalid context

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.48 20048

argument is NULL

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.49 20049

out of memory

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.86.50 20050

insufficient privilege

[Description]
An error occurred.
[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.51 20051

datatype mismatch
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.52 20052

unexpected type: @1@
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.53 20053

pipe name is NULL
[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.54 20054

pipe creation error
[Description]
An error occurred.

[System Processing]
Processing will be aborted.
[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.86.55 20055

message is NULL

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.86.56 20056

could not determine data type of input

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.86.57 20057

unknown equal operand for datatype

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.

2.86.58 20058

cannot set range to negative number

[Description]
   An error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   To investigate the cause of the occurrence from the message, and remove cause.
2.86.59 20059

*date is out of range*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.60 20060

*nonbizday registration error*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.61 20061

*nonbizday unregistration error*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.62 20062

*pivlex.tokens is not available in the built*

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.63 20063
**too few parameters specified for template string**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.86.64 20064**

**substitution is NULL**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.86.65 20065**

**buffer overflow**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.86.66 20066**

**internal error**

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

**2.86.67 20067**

**Limit decreased to @1@ bytes.**
An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.68 20068

Limit increased to @1@ bytes.

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.69 20069

unknown option '@1@'

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.70 20070

too much large memory block request

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.71 20071

corrupted pointer

An error occurred.
Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.72 20072

Unsafe use of string constant with Unicode escapes

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.73 20073

Invalid Unicode escape

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.74 20074

Unsafe use of \ in a string literal

An error occurred.

Processing will be aborted.

To investigate the cause of the occurrence from the message, and remove cause.

2.86.75 20075

@1@ at end of input

An error occurred.

Processing will be aborted.
To investigate the cause of the occurrence from the message, and remove cause.

2.86.76 20076

@1@ at or near "@2@"

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.77 20077

dbms_yylex_init() failed: @1@.

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.78 20078

invalid hexadecimal digit

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.79 20079

nonstandard use of \ in a string literal

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.
2.86.80 20080

nonstandard use of `\` in a string literal

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.81 20081

nonstandard use of escape in a string literal

[Description]
An error occurred.

[System Processing]
Processing will be aborted.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.86.82 20082

SQL is NULL

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.86.83 20083

input value length is @1@; too long for type nvarchar2(@2@)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly

2.86.84 20084
input value too long for type nvarchar2(1)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.86.85 20085

input value length is 1; too long for type varchar2(2)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.86.86 20086

input value length is 1; too long for type varchar2(2)

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.86.87 20087

String constants with Unicode escapes cannot be used when standard_conforming_strings is off.

[Description]
Supplementary information was output.

[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.86.88 20088

Unicode escapes must be \uXXXX or \Uxxxxxxxx.
Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

Use " to write quotes in strings. \ is insecure in client-only encodings.

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

Use " to write quotes in strings, or use the escape string syntax (E'...').

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

Use the escape string syntax for backslashes, e.g., E"\\\".

Supplementary information was output.

None.

Refer to this message together with the message that was output immediately beforehand.

Use the escape string syntax for escapes, e.g., E"\r".

Supplementary information was output.
[System Processing]
None.

[Action]
Refer to this message together with the message that was output immediately beforehand.

2.86.93 20093

cannot to parse timezone "@1@"

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87 Message Numbers Beginning with 70000

2.87.1 70001

Error loading default settings from driverconfig.properties

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.87.2 70002

Your security policy has prevented the connection from being attempted. You probably need to grant the connect java.net.SocketPermission to the database server host and port that you wish to connect to.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.3 70003

Something unusual has occurred to cause the driver to fail. Please report this exception.
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.87.4 70004

Connection attempt timed out.

[Description]
Timeout occurred during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Check the following:
- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.87.5 70005

Interrupted while attempting to connect.

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
   a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

   a) Confirm that the database server has not stopped.

   b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.87.6 70006

Method @1@ is not yet implemented.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.7 70007

Requested CopyIn but got @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.8 70008

Requested CopyOut but got @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.9 70009

Copying from database failed: @1@

[Description]
An unexpected error occurred.
This copy stream is closed.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

Read from copy failed.

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

Cannot write to copy a byte of value @1@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.13 70013

A connection could not be made using the requested protocol @1@.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.14 70014

Premature end of input stream, expected @1@ bytes, but only read @2@.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.15 70015

Expected an EOF from server, got: @1@

An error occurred during communication between the application and the database server.

Processing will be aborted.

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.16 70016

An unexpected result was returned by a query.

An error occurred during communication between the application and the database server.
[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.17 70017

Illegal UTF-8 sequence: byte @1@ of @2@ byte sequence is not 10xxxxxx: @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.18 70018

Illegal UTF-8 sequence: @1@ bytes used to encode a @2@ byte value: @3@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.19 70019

Illegal UTF-8 sequence: initial byte is @1@: @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.20 70020

Illegal UTF-8 sequence: final value is out of range: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.21 70021

Illegal UTF-8 sequence: final value is a surrogate value: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.22 70022

Zero bytes may not occur in string parameters.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.23 70023

Zero bytes may not occur in identifiers.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.24 70024

Cannot convert an instance of @1@ to type @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.87.25 70025

Connection to @1@ refused. Check that the hostname and port are correct and that the postmaster is accepting TCP/IP connections.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.26 70026

The connection attempt failed.

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.87.27 70027

The server does not support SSL.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.28 70028

An error occurred while setting up the SSL connection.

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.29 70030

The server requested password-based authentication, but no password was provided.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.30 70031

The authentication type @1@ is not supported. Check that you have configured the pg_hba.conf file to include the client’s IP address or subnet, and that it is using an authentication scheme supported by the driver.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.31 70032

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.
[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.32 70034

The column index is out of range: @1@, number of columns: @2@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.33 70035

No value specified for parameter @1@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.34 70036

Expected command status BEGIN, got @1@.

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.35 70037

Unexpected command status: @1@.

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.
2.87.36 70038

An I/O error occurred while sending to the backend.

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.37 70039

Unknown Response Type @1@.

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.38 70040

Ran out of memory retrieving query results.

[Description]
There was insufficient free space in the server's memory during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Estimate memory usage and take the following action:
- If the number of simultaneous connections from client applications is high, reduce it.
- If the number of simultaneous SQL executions is high, reduce it.

2.87.39 70041

Unable to interpret the update count in command completion tag: @1@.

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.
2.87.40 70044

CommandComplete expected COPY but got:

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.41 70045

Tried to obtain lock while already holding it

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.42 70046

Tried to break lock on database connection

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.43 70047

Interrupted while waiting to obtain lock on database connection

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.44 70048
Unable to bind parameter values for statement.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.45 70049

Database connection failed when starting copy

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.87.46 70050

Tried to cancel an inactive copy operation

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.87.47 70051

Database connection failed when canceling copy operation

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.87.48 70052

Missing expected error response to copy cancel request

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.49 70053

Got @1@ error responses to single copy cancel request

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.
[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

**2.87.50 70054**

**Tried to end inactive copy**

**Description**
An error occurred during execution of the application or command.

**System Processing**
Processing will be aborted.

**Action**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.87.51 70055**

**Database connection failed when ending copy**

**Description**
The database server was disconnected during execution of the application.

**System Processing**
Processing will be aborted.

**Action**
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
  a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

**2.87.52 70056**

**Tried to write to an inactive copy operation**

**Description**
An error occurred during execution of the application or command.
[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.53 70057

**Database connection failed when writing to copy**

[Description]
    The database server was disconnected during execution of the application.

[System Processing]
    Processing will be aborted.

[Action]
    Communication may have been disconnected for the following reasons:
    - An error occurred in the communication line (TCP/IP etc.)
    - The database server terminated abnormally.

Take the following actions:
    - Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
    a) Confirm that the database server has not stopped.
    b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.87.54 70058

**Tried to read from inactive copy**

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.55 70059

**Database connection failed when reading from copy**

- 1679 -
[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.

b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

  a) Confirm that the database server has not stopped.

  b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.87.56 70060

Received CommandComplete "@1@" without an active copy operation

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.57 70061

Got CopyInResponse from server during an active @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.58 70062
Got CopyOutResponse from server during an active @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.59 70063

Got CopyData without an active copy operation

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.60 70064

Unexpected copydata from server for @1@

[Description]
An error occurred during communication between the application and the database server.

[System Processing]
Processing will be aborted.

[Action]
Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.87.61 70065

Unexpected packet type during copy: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.62 70066

Bind message length @1@ too long. This can be caused by very large or incorrect length specifications on InputStream parameters.
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.87.63 70067**

The server’s client_encoding parameter was changed to @1@. The JDBC driver requires client_encoding to be UTF8 for correct operation.

An error occurred during communication between the application and the database server.

Processing will be aborted.

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

**2.87.64 70068**

The server’s DateStyle parameter was changed to @1@. The JDBC driver requires DateStyle to begin with ISO for correct operation.

An error occurred during communication between the application and the database server.

Processing will be aborted.

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

**2.87.65 70069**

The server’s standard_conforming_strings parameter was reported as @1@. The JDBC driver expected on or off.

An error occurred during communication between the application and the database server.

Processing will be aborted.

Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

**2.87.66 70070**

The driver currently does not support COPY operations.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.67 70071
This PooledConnection has already been closed.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.68 70072
Connection has been closed automatically because a new connection was opened for the same PooledConnection or the PooledConnection has been closed.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.69 70073
Connection has been closed.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.70 70074
Statement has been closed.
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.71 70075

Failed to setup DataSource.

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.87.72 70076

DataSource has been closed.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.73 70077

Fastpath call @1@ - No result was returned and we expected an integer.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.74 70078

The fastpath function @1@ is unknown.

An error occurred during execution of the application or command.
2.87.75 70079

Conversion to type @1@ failed: @2@.

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.76 70080

Cannot tell if path is open or closed: @1@.

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.77 70081

GSS Authentication failed

[Description]
The database server was disconnected during execution of the application.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.
Take the following actions:
- Eliminate the cause of the communication disconnection.
Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
  a) If the COMMIT process is not executed after update, add the COMMIT process.

- 1685 -
b) If the total number of update records in a single transaction is high, split it into short transactions.

c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:

a) Confirm that the database server has not stopped.

b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.87.78 70082

The array index is out of range: @1@  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.79 70083

The array index is out of range: @1@, number of elements: @2@.  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.80 70084

Truncation of large objects is only implemented in 8.3 and later servers.  
[Description]  
An error occurred during execution of the application or command.

[System Processing]  
Processing will be aborted.

[Action]  
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.81 70085

Cannot truncate LOB to a negative length.  
[Description]  
An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.82 70086

PostgreSQL LOBs can only index to: @1@

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.83 70087

LOB positioning offsets start at 1.

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.84 70088

free() was called on this LOB previously

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.85 70089

Unsupported value for stringtype parameter: @1@

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.86 70091

No results were returned by the query.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.87 70092

A result was returned when none was expected.
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.87.88 70093

Custom type maps are not supported.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.87.89 70094

Failed to create object for: @1@.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
Unable to load the class @1@ responsible for the datatype @2@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

Cannot change transaction read-only property in the middle of a transaction.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

Cannot commit when autoCommit is enabled.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

This connection has been closed.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
**Cannot rollback when autoCommit is enabled.**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88 Message Numbers Beginning with 70100

2.88.1 70100

**Cannot change transaction isolation level in the middle of a transaction.**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.2 70101

**Transaction isolation level @1@ not supported.**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.3 70102

**Unable to translate data into the desired encoding.**

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.88.4 70103

Unable to determine a value for MaxIndexKeys due to missing system catalog data.

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.88.5 70104

Unable to find name datatype in the system catalogs.

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.88.6 70105

Operation requires a scrollable ResultSet, but this ResultSet is FORWARD_ONLY.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.7 70106

Unexpected error while decoding character data from a large object.

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.88.8 70107
Can’t use relative move methods while on the insert row.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.9 70108

Invalid fetch direction constant: @1@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.10 70109

Cannot call cancelRowUpdates() when on the insert row.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.11 70110

Cannot call deleteRow() when on the insert row.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.12 70111

Currently positioned before the start of the ResultSet. You cannot call deleteRow() here.
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.13 70112

Currently positioned after the end of the ResultSet. You cannot call deleteRow() here.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.14 70113

There are no rows in this ResultSet.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.15 70114

Not on the insert row.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.16 70115

You must specify at least one column value to insert a row.

An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.17 70116

The JVM claims not to support the encoding: @1@

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.

[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.18 70117

Provided InputStream failed.

[Description]
   An unexpected error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   Contact Fujitsu technical support.

2.88.19 70118

Provided Reader failed.

[Description]
   An unexpected error occurred.

[System Processing]
   Processing will be aborted.

[Action]
   Contact Fujitsu technical support.

2.88.20 70119

Can't refresh the insert row.

[Description]
   An error occurred during execution of the application or command.

[System Processing]
   Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.21 70120

Cannot call updateRow() when on the insert row.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.22 70121

Cannot update the ResultSet because it is either before the start or after the end of the results.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.23 70122

ResultSets with concurrency CONCUR_READ_ONLY cannot be updated.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.24 70123

No primary key found for table @1@.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
**2.88.25 70124**

**Fetch size must be a value greater to or equal to 0.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.88.26 70125**

**Invalid character data was found. This is most likely caused by stored data containing characters that are invalid for the character set the database was created in. The most common example of this is storing 8bit data in a SQL_ASCII database.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.88.27 70126**

**Bad value for type @1@ : @2@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.88.28 70127**

**The column name @1@ was not found in this ResultSet.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.88.29 70128

**ResultSet is not updateable. The query that generated this result set must select only one table, and must select all primary keys from that table. See the JDBC 2.1 API Specification, section 5.6 for more details.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.30 70129

**This ResultSet is closed.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.31 70130

**ResultSet not positioned properly, perhaps you need to call next.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.32 70131

**Can’t use query methods that take a query string on a PreparedStatement.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.88.33 70132

Multiple ResultSets were returned by the query.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.34 70133

A CallableStatement was executed with nothing returned.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.35 70134

A CallableStatement was executed with an invalid number of parameters

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.36 70135

A CallableStatement function was executed and the out parameter @1@ was of type @2@ however type @3@ was registered.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.88.37 70136

**Maximum number of rows must be a value greater than or equal to 0.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.38 70137

**Query timeout must be a value greater than or equals to 0.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.39 70138

**The maximum field size must be a value greater than or equal to 0.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.40 70139

**Unknown Types value.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.41 70140
Invalid stream length @1@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.42 70141

The JVM claims not to support the @1@ encoding.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.43 70142

Unknown type @1@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.44 70143

Cannot cast an instance of @1@ to type @2@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.45 70144

Unsupported Types value: @1@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.46 70145

Can’t infer the SQL type to use for an instance of @1@. Use setObject() with an explicit Types value to specify the type to use.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.47 70146

This statement does not declare an OUT parameter. Use '{ ?= call ... '}' to declare one.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.48 70147

wasNull cannot be call before fetching a result.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.49 70148

Malformed function or procedure escape syntax at offset @1@.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.50 70149
Parameter of type @1@ was registered, but call to get@2@ (sqltype=@3@) was made.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.51 70150
A CallableStatement was declared, but no call to registerOutParameter(1, <some type>) was made.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.52 70151
No function outputs were registered.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.53 70152
Results cannot be retrieved from a CallableStatement before it is executed.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.54 70153

This statement has been closed.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.55 70154

Too many update results were returned.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.56 70155

Batch entry @1@ @2@ was aborted: @3@ Call getNextException to see other errors in the batch.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.57 70156

Unexpected error writing large object to database.
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.88.58 70157

@1@ function takes one and only one argument.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.59 70158

@1@ function takes two and only two arguments.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.60 70159

@1@ function takes four and only four argument.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.61 70160

@1@ function takes two or three arguments.

[Description]
An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.62 70161

@1@ function doesn’t take any argument.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.63 70162

@1@ function takes three and only three arguments.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.64 70163

Interval @1@ not yet implemented

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.65 70164

Infinite value found for timestamp/date. This cannot be represented as time.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.66 70166

Unknown ResultSet holdability setting: @1@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.67 70167

Server versions prior to 8.0 do not support savepoints.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.68 70168

Cannot establish a savepoint in auto-commit mode.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.69 70169

Returning autogenerated keys is not supported.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.88.70 70170

**The parameter index is out of range**: @1@, **number of parameters**: @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.71 70172

**Returning autogenerated keys by column index is not supported.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.72 70173

**Cannot reference a savepoint after it has been released.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.73 70174

**Cannot retrieve the id of a named savepoint.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.74 70175
Cannot retrieve the name of an unnamed savepoint.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.75 70176

Invalid UUID data.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.76 70177

Unable to find server array type for provided name @1@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.77 70178

Failed to set ClientInfo property: @1@

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.88.78 70179

ClientInfo property not supported.
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.88.79 70180**

**Unable to decode xml data.**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.88.80 70181**

**Unknown XML Source class: @1@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.88.81 70182**

**Unable to create SAXResult for SQLXML.**

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

---

**2.88.82 70183**

**Unable to create StAXResult for SQLXML**

An unexpected error occurred.
[System Processing]
  Processing will be aborted.

[Action]
  Contact Fujitsu technical support.

2.88.83 70184

**Unknown XML Result class: @1@**

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.84 70185

**This SQLXML object has already been freed.**

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.85 70186

**This SQLXML object has not been initialized, so you cannot retrieve data from it.**

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.

[Action]
  Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.86 70187

**Failed to convert binary xml data to encoding: @1@.**

[Description]
  An error occurred during execution of the application or command.

[System Processing]
  Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.87 70188

Unable to convert DOMResult SQLXML data to a string.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.88 70189

This SQLXML object has already been initialized, so you cannot manipulate it further.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.88.89 70190

Failed to initialize LargeObject API
[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.88.90 70191

Large Objects may not be used in auto-commit mode.
[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
**2.88.91 70192**

The SSLSocketFactory class provided @1@ could not be instantiated.

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.88.92 70193**

Conversion of interval failed

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.88.93 70194**

Conversion of money failed.

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.88.94 70195**

Transaction control methods setAutoCommit(true), commit, rollback and setSavePoint not allowed while an XA transaction is active.

**[Description]**
An error occurred during execution of the application or command.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the message text and confirm that the application is written correctly and the command is being used correctly.
**2.88.95 70196**

**Invalid flags**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.88.96 70197**

**xid must not be null**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.88.97 70198**

**Connection is busy with another transaction**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.88.98 70199**

**suspend/resume not implemented**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.89 Message Numbers Beginning with 70200

2.89.1 70200

Transaction interleaving not implemented

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.2 70201

Error disabling autocommit

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.89.3 70202

tried to call end without corresponding start call

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.4 70203

Not implemented: Prepare must be issued using the same connection that started the transaction

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

Error during recover

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.89.10 70209

Error rolling back prepared transaction

[Description]
An unexpected error occurred.

[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.89.11 70210

Not implemented: one-phase commit must be issued using the same connection that was used to start it

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.12 70211

commit called before end

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.13 70212

Error during one-phase commit
An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.89.14 70213

Not implemented: 2nd phase commit must be issued using an idle connection

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.15 70214

Error committing prepared transaction

An unexpected error occurred.

Processing will be aborted.

Contact Fujitsu technical support.

2.89.16 70215

Heuristic commit/rollback not supported

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.17 70221

Could not find a server with specified targetServerType: @1@

Could not find a suitable target server.
Processing is aborted.

Check following settings (host, IP address, port number, or targetServer):
- Connection string
- Connection service file
- Data source of JDBC or ODBC
- Environment variables for default connection parameter values (ex. PGHOST)
- Arguments of functions of libpq
- Options of command

**2.89.18 70222**

Invalid timeout (@1@<0).

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.89.19 70225**

Invalid targetServerType value: @1@.

value of targetserver is invalid.

Processing is aborted.

Set one of the following:
- primary
- standby
- prefer_standby
- any (can be specified only JDBC)

**2.89.20 70226**

The sslservercertcn @1@ could not be verified.

value of sslservercertcn is different from common name in the server certificate.
[Action]
Set SSL certificate's common name to sslservercertcn.

2.89.21 70227

The sslservercertcn @1@ could not be verified by hostnameverifier @2@.

[Description]
value of sslservercertcn is different from common name in the server certificate.

[Action]
- Set SSL certificate's common name to sslservercertcn.
- Check the program of class specified by hostnameverifier.

2.89.22 70228

Properties for the driver contains a non-string value for the key

[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.89.23 70229

(pgjdbc: autodetected server-encoding to be @1@, if the message is not readable, please check database logs and/or host, port, dbname, user, password, pg_hba.conf)

[Description]
An error occurred.

[Action]
To investigate the cause of the occurrence from the message, and remove cause.

2.89.24 70230

Object is too large to send over the protocol.

[Description]
An error occurred during execution of the application or command.
[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.25 70231

No IOException expected from StringBuffer or StringBuilder

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.26 70232

oid type @1@ not known and not a number

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.27 70233

The SocketFactory class provided @1@ could not be instantiated.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.28 70234

Added parameters index out of range: @1@, number of columns: @2@.

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.89.29 70235**

**Invalid sslmode value: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.89.30 70236**

**The connection url is invalid.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.89.31 70237**

**Unsupported property name: @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.89.32 70238**

**Fastpath call @1@ - No result was returned and we expected a numeric.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.89.33 70239

Fastpath call @1@ - No result was returned or wrong size while expecting an integer.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.34 70240

Fastpath call @1@ - No result was returned and we expected a long.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.35 70241

Fastpath call @1@ - No result was returned or wrong size while expecting a long.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.36 70242

@1@ parameter value must be an integer but was: @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.37 70243
The ssffactoryarg property may not be empty.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.38 70244

The environment variable containing the server’s SSL certificate must not be empty.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.39 70245

The system property containing the server’s SSL certificate must not be empty.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.40 70246

The ssffactoryarg property must start with the prefix file:, classpath:, env:, sys:, or -----BEGIN CERTIFICATE-----.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.41 70247

An error occurred reading the certificate
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.42 70248

No X509TrustManager found

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.43 70249

Could not find a java cryptographic algorithm: X.509 CertificateFactory not available.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.44 70250

Could not open SSL certificate file @1@.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.45 70251

Loading the SSL certificate @1@ into a KeyManager failed.

An error occurred during execution of the application or command.
[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.46 70252

Could not read password for SSL key file, console is not available.

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.47 70253

Could not read password for SSL key file by callbackhandler @1@.

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.48 70254

Could not decrypt SSL key file @1@.

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.

[Action]
    Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.49 70255

Could not read SSL key file @1@.

[Description]
    An error occurred during execution of the application or command.

[System Processing]
    Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.50 70256

Could not find a java cryptographic algorithm: @1@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.51 70257

The password callback class provided @1@ could not be instantiated.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.52 70258

Could not open SSL root certificate file @1@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.53 70259

Could not read SSL root certificate file @1@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.89.54 70260

Loading the SSL root certificate @1@ into a TrustManager failed.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.55 70261

Could not initialize SSL context.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.56 70262

SSL error: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.57 70263

The HostnameVerifier class provided @1@ could not be instantiated.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.58 70264
The hostname @1@ could not be verified by hostnameverifier @2@.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.59 70265

The hostname @1@ could not be verified.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.60 70266

One ore more ClientInfo failed.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.61 70267

Can’t use executeWithFlags(int) on a Statement.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.62 70268

Bad value for type timestamp/date/time: @2@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.63 70269

Unsupported binary encoding of @1@.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.64 70270

Cannot convert the column of type @1@ to requested type @2@.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.65 70271

No hstore extension installed.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.66 70272

Unsupported properties: @1@.

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.89.67 70273

Fetch size must be a value greater to or equal to 0.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90 Message Numbers Beginning with 80000

2.90.1 80001

The connection configuration file cannot be opened. detail: '@1@

[Description]
The process to open the connection configuration file failed.

[System Processing]
Processing is aborted.

[Action]
This messages is output in the case of HA Database Ready.
Check the state of the connection configuration file, remove the cause of the error, and restart the application.

2.90.2 80002

Invalid definition statement format in connection configuration file. line number: '@1@

[Description]
The format of a parameter definition statement in the connection configuration file is invalid.

[System Processing]
Processing is aborted.

[Action]
This messages is output in the case of HA Database Ready.
Correct the connection configuration file and restart the application.

2.90.3 80003
The same server name is specified by two or more SERVER parameters in the connection configuration file.

[Description]
The same server name is specified in multiple SERVER parameters in the connection configuration file.

[System Processing]
Processing is aborted.

[Action]
This message is output in the case of HA Database Ready.
Correct the server name specified in the SERVER parameter of the connection configuration file, and restart the application.

2.90.4 80004

I/O error occurred during the reading of connection configuration file. file name: '@1@

detail: '@2@'

[Description]
An I/O error occurred during loading of the connection configuration file.

[System Processing]
Processing is aborted.

[Action]
This message is output in the case of HA Database Ready.
Check the state of the connection configuration file, remove the cause of the error, and restart the application.

2.90.5 80005

CommandTimeout can't be less than zero.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.6 80006

The Connection is broken.

[Description]
The database server was disconnected during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.

a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.

- If none of the above situations applies, perform the following:
a) Confirm that the database server has not stopped.
b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.90.7 80007

**The Connection is not open.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.8 80008

**Parameter @1@ not found in query.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.9 80009

**The Connection property can't be changed with an uncommitted transaction.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.10 80010

There is already an open DataReader associated with this Command which must be closed first.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.11 80011

@1@ does not exist in pg_proc

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.12 80012

Invalid parameter type: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.13 80013

Connection is not open

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.14 80014

**Connection already open**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.15 80015

**Invalid database name: @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.16 80016

**Connection string argument missing!**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.17 80017

**Nested/Concurrent transactions aren't supported.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.90.18 80018

**numeric value @1@ in ConnectionString exceeds maximum value @2@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.19 80019

**numeric value @1@ in ConnectionString is below minimum value @2@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.20 80020

**expecting @1@=[True/False] value in ConnectionString**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.21 80021

**expecting @1@=[Numeric] value in ConnectionString**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.22 80022
expecting @1@=[Protocol Version] value in ConnectionString

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.23 80023

key=value argument incorrect in ConnectionString

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.24 80024

Attempt to set compatibility with version @1@ when using version @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.25 80025

There is already an open DataReader associated with this Command which must be closed first.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.26 80026

ApplicationName not supported.
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.27 80027

Timeout while getting a connection from pool.

Timeout occurred during execution of the application.

Processing will be aborted.

Check the following:
- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.90.28 80028

Connection pool exceeds maximum size.

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.29 80029

Not a COPY IN query: @1@

An error occurred during execution of the application or command.

Processing will be aborted.
[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.30 80030

Copy can only start in Ready state, not in @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.31 80031

Tried to set Position of network stream @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.32 80032

Tried to read non-readable @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.33 80033

Tried to seek non-seekable @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.90.34 80034

**Tried to set length of network stream @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.35 80035

**Not a COPY OUT query, not in @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.36 80036

**Copy can only start in Ready state, not in @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.37 80037

**Tried to set Position of network stream @1@**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
Tried to write non-writable @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.39 80039

Tried to flush read-only @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.40 80040

Tried to seek non- seekable @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.41 80041

Tried to set length of network stream @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.42 80042

Do not change stream of an active @1@
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.90.43 80043**

Do not change delimiter of an active @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.90.44 80044**

Do not change separator of an active @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.90.45 80045**

Do not change escape symbol of an active @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.90.46 80046**

Do not change null symbol of an active @1@

An error occurred during execution of the application or command.

[Action]
Check following settings (host, IP address, port number, or targetServer):
- Connection string
- Connection service file
- Data source of JDBC or ODBC
- Environment variables for default connection parameter values (e.g., PGHOST)
- Arguments of functions of libpq
- Options of command

2.90.51 80051

**server does not support auto connection switching**

[Description]
The server does not support auto connection switching.

[System Processing]
Processing is aborted.

[Action]
Specify servers that support auto connection switching.

2.90.52 80052

**Only AuthenticationClearTextPassword and AuthenticationMD5Password supported for now.**

Received: @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.53 80053

**A timeout has occurred. If you were establishing a connection, increase Timeout value in ConnectionString. If you were executing a command, increase the CommandTimeout value in ConnectionString or in your NpgsqlCommand object.**

[Description]
Timeout occurred during execution of the application.

[System Processing]
Processing will be aborted.

[Action]
Check the following:
- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.90.54 80054

**Connection establishment timeout. Increase Timeout value in ConnectionString.**

**[Description]**
Timeout occurred during execution of the application.

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the following:
- If executing SQL that outputs a large volume of search results, add a conditional expression to filter the results further.
- If numerous SQLs are being simultaneously executed, reduce the number of simultaneously executed SQLs.
- If a large volume of data is to be updated in a single transaction, modify the SQL to reduce the volume of data to be updated in a single transaction.
- If executing a complex SQL, modify it to a simple SQL.
- Check if there are any problems in the network.
- Before conducting maintenance that involves the processing of a large volume of data, use the SET statement to temporarily increase the value of maintenance_work_mem.

2.90.55 80055

**Failed to establish a connection to '@1@'.**

**[Description]**
The database server was disconnected during execution of the application.

**[System Processing]**
Processing will be aborted.

**[Action]**
Communication may have been disconnected for the following reasons:
- An error occurred in the communication line (TCP/IP etc.)
- The database server terminated abnormally.

Take the following actions:
- Eliminate the cause of the communication disconnection.

Examine the application and check whether the transaction for implementing update is a long transaction. Judge whether it is a long transaction from the following viewpoints and modify the application.
a) If the COMMIT process is not executed after update, add the COMMIT process.
b) If the total number of update records in a single transaction is high, split it into short transactions.
c) If search was conducted for a long period of time after update, execute COMMIT after update or review the search SQL statement.
   - If none of the above situations applies, perform the following:
   a) Confirm that the database server has not stopped.
   b) If the database server is starting or stopping, re-execute the command after the database server starts.

2.90.56 80056

Ssl connection requested. No Ssl enabled connection from this host is configured.
[Description]
   An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.
[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.57 80057

Backend sent unrecognized response type: @1@
[Description]
   An error occurred during communication between the application and the database server.
[System Processing]
   Processing will be aborted.
[Action]
   Check if there are any problems in the network, eliminate the cause of any error and re-execute the command.

2.90.58 80058

Store does not support specified edm type
[Description]
   An error occurred during execution of the application or command.
[System Processing]
   Processing will be aborted.
[Action]
   Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.59 80059

Can't cast @1@ into any valid DbType.
[Description]
   An error occurred during execution of the application or command.
2.90.60 80060

Cannot set NpgsqlDbType to just Array, Binary-Or with the element type (e.g. Array of Box is NpgsqlDbType.Array | NpgsqlDbType.Box).

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.61 80061

Can't cast @1@ into NpgsqlParameter

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.62 80062

Invalid attempt to read from column ordinal '@1@'. With CommandBehavior.SequentialAccess, you may only read from column ordinal '@2@' or greater.

[Description]
An error occurred during execution of the application or command.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.63 80063

this[] index value

[Description]
An unexpected error occurred.
[System Processing]
Processing will be aborted.

[Action]
Contact Fujitsu technical support.

2.90.64 80064

Field not found

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.65 80065

No transaction in progress.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.66 80066

Savepoint is not supported by backend.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.67 80067

Savepoint name cannot have semicolon.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.
2.90.68 80068

The collection is read-only

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.69 80069

NotSupported @1@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.70 80070

Require primitive EdmType

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.71 80071

NotSupported: @1@ @2@

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.90.72 80072

**The authData parameter can only be null at the first call to continue!**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.73 80073

**SSPI returned invalid number of output buffers**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.74 80074

**Dns hostname lookup timeout. Increase Timeout value in ConnectionString.**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.75 80075

**Could not load Npgsql.EntityFrameworkLegacy assembly, is it installed?**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.76 80076
**Npgsql.EntityFrameworkLegacy assembly does not seem to contain the correct type!**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.90.77 80077

**Invalid parameter name: @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.90.78 80078

**Parameter not found**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.90.79 80079

**The parameter already belongs to a collection**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

#### 2.90.80 80080

**No parameter with the specified name exists in the collection**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.81 80081

Only AuthenticationClearTextPassword and AuthenticationMD5Password supported for now. Received: @1@

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.82 80082

key=value argument incorrect in ConnectionString

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.83 80083

expecting @1@=[True/False] value in ConnectionString

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.84 80084

expecting @1@=[Numeric] value in ConnectionString
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.90.85 80085**

**numeric value @1@ in ConnectionString exceeds maximum value @2@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.90.86 80086**

**numeric value @1@ in ConnectionString is below minimum value @2@**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.90.87 80087**

**expecting @1@=[Protocol Version] value in ConnectionString**

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

---

**2.90.88 80088**

**The Transaction property can’t be changed with an uncommited transaction.**

An error occurred during execution of the application or command.
[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.89 80089

Only Text and StoredProcedure types supported!

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.90 80090

There have been errors reported by the backend.

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.91 80091

There have been errors on @1@():

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.92 80092

There have been errors on @1@(@2@):
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.93 80093

**The Connection is not set.**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.94 80094

**Multiple queries not supported for this command type**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.95 80095

**Cannot derive function parameter of type VARIADIC**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.90.96 80096

**Cannot derive function parameter of type TABLE**

[Description]

An error occurred during execution of the application or command.

[System Processing]

Processing will be aborted.

[Action]

Check the message text and confirm that the application is written correctly and the command is being used correctly.
**2.90.97 80097**

*ConnectionString cannot be empty.*

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.90.98 80098**

*A SocketException occured*

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.90.99 80099**

*There have been errors on Open()*

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.91 Message Numbers Beginning with 80100**

**2.91.1 80100**

*Error in Close()*

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.
2.91.2 80101

**Insufficient backend data to describe dimension count in binary array header**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.3 80102

**Invalid array dimension count encountered in binary array header**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.4 80103

**Insufficient backend data to describe all expected dimensions in binary array header**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.5 80104

**Out of backend data while reading binary array**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.6 80105
**2.91.7 80106**

**Expected a hex character, got @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.91.8 80107**

**Expected an octal character, got @1@**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.91.9 80108**

**Object is immutable**

[Description]
An error occurred during execution of the application or command.

[System Processing]
Processing will be aborted.

[Action]
Check the message text and confirm that the application is written correctly and the command is being used correctly.

**2.91.10 80109**

**Unexpected integer binary field length**
An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.11 80110

Unexpected float binary field length

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.12 80111

Unable to cast data to NpgsqlPoint type

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.13 80112

Unable to cast data to Rectangle type

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.14 80113

Type already mapped

An error occurred during execution of the application or command.
Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.15 80114

NpgsqlDbType already aliased

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.16 80115

DbType already aliased

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.

2.91.17 80116

Type already aliased

An error occurred during execution of the application or command.

Processing will be aborted.

Check the message text and confirm that the application is written correctly and the command is being used correctly.
Chapter 3 Mirroring Controller Messages

This chapter explains messages output by Mirroring Controller.

3.1 Message Numbers Beginning with MCA00000

3.1.1 MCA00001

"could not read file "(0)"; exception=(1): (2)"

[Description]
Could not read the file.

[Parameters]
(0): file name
(1): exception type
(2): exception detail

[System Processing]
Processing will be aborted.

[Action]
Identify the cause according to the message, and then remove it.

3.1.2 MCA00002

{0}: "wrong number of server ID in definition file "(1)"

[Description]
Invalid descriptions were found in definition file.

[Parameters]
(0): command name
(1): file name

[System Processing]
Processing will be aborted.

[Action]
Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

3.1.3 MCA00003

{0}: "server ID not found in definition file "(1)" line (2)"

[Description]
Invalid descriptions were found in definition file.

[Parameters]
(0): command name
(1): file name
(2): line number
3.1.4 MCA00004

{0}: "server ID specified in definition file "(1)" too long (max (2) bytes) line (3)"

[Description]
Invalid descriptions were found in definition file.
[Parameters]
{0}: command name
(1): file name
(2): max length of server ID
(3): line number

[Action]
Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

3.1.5 MCA00005

"invalid host name or IP address "(1)" in definition file "(0)"

[Description]
Invalid descriptions were found in definition file.
[Parameters]
{0}: file name
(1): host name or IP address

[Action]
Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

3.1.6 MCA00006

{0}: "invalid port number in definition file "(1)" line (2)"

[Description]
Invalid descriptions were found in definition file.
[Parameters]
{0}: command name
(1): file name
3.1.7 MCA00007

[0]: “invalid format specified in definition file "(1)" line (2)"

[Description]
Invalid descriptions were found in definition file.

[Parameters]
(0): command name
(1): file name
(2): line number

[System Processing]
Processing will be aborted.

[Action]
Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

3.1.8 MCA00008

[0]: “invalid value for parameter "(2)" in definition file "(1)"

[Description]
Invalid parameter was found in definition file.

[Parameters]
(0): command name
(1): file name
(2): parameter name

[System Processing]
Processing will be aborted.

[Action]
Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

3.1.9 MCA00009

[0]: “no value for parameter "(2)" specified in definition file "(1)"

[Description]
Invalid parameter was found in definition file.

[Parameters]
(0): command name
3.1.10 MCA00010

{0}: "unrecognized parameter "{2}" in definition file "{1}""

[Description]
Unrecognized parameter was found in definition file.

[Parameters]
{0}: file name
{1}: command name
{2}: parameter name

[System Processing]
Processing will be aborted.

[Action]
Correct the definition file according to the message and parameter description of "Cluster Operation Guide".

3.1.11 MCA00011

%s: no operation mode specified

[Description]
No operation mode was specified.

[Parameters]
%s: command name

[System Processing]
Processing will be aborted.

[Action]
Re-execute after specifying operation modes.

3.1.12 MCA00012

%s: unrecognized operation mode "%s"

[Description]
Unrecognized operation mode was specified.

[Parameters]
%s: command name
%s: operation mode
3.1.13 MCA00013

%s: option "%%s" duplicated

[Description]
Certain option is duplicated.

[Parameters]
%s: command
%s: option

[System Processing]
Processing will be aborted.

[Action]
Re-execute after correcting options.

3.1.14 MCA00014

%s: "%%s" option conflicts with "%%s" option

[Description]
Options are conflicting.

[Parameters]
%s: command
%s: option
%s: option

[System Processing]
Processing will be aborted.

[Action]
Re-execute after correcting options.

3.1.15 MCA00015

%s: option requires an argument -- %%s

[Description]
No argument specified for the option.

[Parameters]
%s: command
%s: option
3.1.16 MCA00016

% s: neither "% s" option nor environment variable "% s" specified

[Description]
Both of required option and equivalent environment variable were not specified.

[Parameters]
% s: command
% s: option
% s: environment variable

[Action]
Re-execute after specifying required option or equivalent environment variable.

3.1.17 MCA00017

% s: out of memory

[Description]
Out of memory error occurred.

[Parameters]
% s: command

[Action]
Obtain free memory space by stopping unnecessary processes or changing system settings.

3.1.18 MCA00018

out of memory

[Description]
Out of memory error occurred.

[Action]
Obtain free memory space by stopping unnecessary processes or changing system settings.
3.1.19 MCA00019

detected an error on the monitored object "](0)\{(1)\}": (2)

[Description]
An error was detected on the monitored object.

[Parameters]
(0): monitored object (server, database process, data storage destination directory, transaction log storage destination directory, tablespace directory)
(1): object name (host name, database process name, directory path)
(2): error detail ("no response:", "read/write error:" and detailed information)

[System Processing]
Perform failover or detaching.
If failover or detaching is already performed, these functions would be disabled.

[Action]
Refer to the description about workaround for failure of "Cluster Operation Guide".

3.1.20 MCA00020

unexpected error occurred in the monitoring process: (0)

[Description]
Monitoring process cannot continue because an unexpected error was occurred during its processing.

[Parameters]
(0): error detail

[System Processing]
Continues processing.

[Action]
Refer to the description about workaround for failure of "Cluster Operation Guide".

3.1.21 MCA00021

starting to (2) from (0) to (1).

[Description]
Switching standby server to primary server.

[Parameters]
(0): server ID of primary server
(1): server ID of standby server
(2): "fail over" or "switch over"

[Action]
If Mirroring Controller executed switching automatically, find the message output before this message from system log or event log to identify the cause of switching, and then work around according to the Action of the message.
3.1.22 MCA00022

[2] completed.switched from {0} to {1}

[Description]
Switching standby server to primary server was completed.

[Parameters]
{0}: server ID of primary server
{1}: server ID of standby server
{2}: "fail over" or "switch over"

3.1.23 MCA00023

failed to {2} from {0} to {1}

[Description]
Failed to switch to primary server because of unexpected failure.

[Parameters]
{0}: server ID of primary server
{1}: server ID of standby server
{2}: "fail over" or "switch over"

[System Processing]
Processing of switching will be aborted.

[Action]
Find the message output before this message from display, system log or event log, and then work around according to the Action of the message.

3.1.24 MCA00024

starting to detach standby server "(0)" {1}

[Description]
Detaching standby server because of failure detected on standby server.

[Parameters]
{0}: server ID
{1}: "automatically" or none

[Action]
If Mirroring Controller executed detaching automatically, find the message output before this message from system log or event log to identify the cause of detaching, and then work around according to the Action of the message.

3.1.25 MCA00025

detach standby server "(0)" completed {1}

[Description]
Detached standby server.

[Parameters]
3.1.26 MCA00026

**failed to (2) standby server "(0)" {1}**

[Description]
Failed to detach standby server.

[Parameters]
(0): server ID
(1): "automatically" or none
(2): "detach"

[System Processing]
Processing of detaching will be aborted.

[Action]
Refer to the description about workaround for failure of "Cluster Operation Guide".

3.1.27 MCA00027

**another "(0)" command is running**

[Description]
Cannot execute command with this operation mode because another command is running on the same or another server.

[Parameters]
(0): command name

[System Processing]
Processing will be aborted.

[Action]
There is a case executing another command. Wait for completion of another command on the same or another server, and then re-execute.

In addition, there are the following cases when using mc_ctl command.

- There is a case under processing of a failover and an automatic detach by Mirroring Controller. Wait for completion of the processing under operation, and re-execute.
- If any of the following cases occurs, there is a possibility that the processing of Mirroring Controller interrupts. Re-execute the mc_ctl command after restarting Mirroring Controller.
  - When abnormality occurs in the network
  - When another server is downed
  - When Mirroring Controller is stopped forcibly

3.1.28 MCA00028

**communication timeout of Mirroring Controller occurred server:"(0)"**

[Description]
Either of the followings has occurred.
- communication timeout between mc_ctl command and Mirroring Controller process has occurred.
- communication timeout between Mirroring Controller processes have occurred.
- Terminating database instance was not completed in the specified time.

[Parameters]
{0}: server ("localhost" or server ID)

[System Processing]
Processing will be aborted.

[Action]
Completion synchronization for terminating database instance might have timed out, because connections remained. Disconnect all connections, and re-execute it.
Reduce CPU or network load caused by the other processes. If could not reduce it, extend remote_call_timeout in "server identifier".conf.

3.1.29 MCA00029

could not create PID file of Mirroring Controller detail of cause: "{0}"

[Description]
Could not create PID file of Mirroring Controller.

[Parameters]
{0}: detail of cause

[System Processing]
Processing will be aborted.

[Action]
Identify the cause according to the message, and then remove it.

3.1.30 MCA00030

could not remove PID file of Mirroring Controller detail of cause: "%s"

[Description]
Could not remove PID file of Mirroring Controller.

[Parameters]
{0}: detail of cause

[Action]
Identify the cause according to the message, and then remove it.

3.1.31 MCA00031

could not read PID file of Mirroring Controller detail of cause: "%s"

[Description]
Could not read PID file of Mirroring Controller.

[Parameters]
{0}: detail of cause
3.1.32 MCA00032

**invalid contents of PID file "%s" of Mirroring Controller**

[Description]

The contents of PID file of Mirroring Controller is invalid.

[Parameters]

{0}: file name

[System Processing]

Processing will be aborted.

[Action]

The following causes could be considered.
- The file was stored or replaced by mistake
- The file was corrupted

When starting Mirroring Controller, move or remove the file shown in the message.
When stopped Mirroring Controller, find ID of process named "mcagent" and terminate forcibly by using OS command.

3.1.33 MCA00033

**Mirroring Controller is already running**

[Description]

Mirroring Controller is already running.

[System Processing]

Processing will be aborted.

[Action]

If needed, stop Mirroring Controller, and re-execute.
If Mirroring Controller is stopped and cannot restart, refer to "Cluster Operation Guide" for information on the action required when an error occurs.

3.1.34 MCA00034

**cannot execute %s command because Mirroring Controller is not running**

[Description]

Cannot execute Mirroring Controller command because Mirroring Controller process is not running.

[Parameters]

{0}: command name

[System Processing]

Processing will be aborted.

[Action]

Start Mirroring Controller, and re-execute.
3.1.35 MCA00035

failed to start database instance

[Description]
Failed to start database instance.

[System Processing]
Processing will be aborted.

[Action]
Find the database message output in the log files of database output before this message, and then work around according to the Action of the message.

3.1.36 MCA00036

failed to stop database instance target server:

[Description]
Failed to stop database instance.

[Parameters]
{0}: target server ("localhost" or server ID)

[System Processing]
Processing will be aborted.

[Action]
Find the database message output in the log files of database on the target server output before this message, and then work around according to the Action of the message.

3.1.37 MCA00037

Mirroring Controller option is not installed

[Description]
This functionality is enabled by installing Mirroring Controller option.

[Parameters]
{0}: target server ("localhost" or server ID)

[System Processing]
Processing will be aborted.

[Action]
To use this functionality, install Mirroring Controller option, and then re-execute.

3.1.38 MCA00038

starting Mirroring Controller

[Description]
Starting Mirroring Controller.
3.1.39 MCA00039

**Mirroring Controller started**

[Description]
Mirroring Controller started.

3.1.40 MCA00040

**Failed to start Mirroring Controller**

[Description]
Failed to start Mirroring Controller.

[System Processing]
Processing will be aborted.

[Action]
Work around according to the Action of the message output before this message.
On Windows, if there is no message outputted before this message, please refer to the message outputted to an event log.

3.1.41 MCA00041

**Stopping Mirroring Controller**

[Description]
Stopping Mirroring Controller.

3.1.42 MCA00042

**Mirroring Controller stopped target server:”(0)”**

[Description]
Mirroring Controller stopped.

[Parameters]
(0): target server ("localhost" or server ID)

3.1.43 MCA00043

**Failed to stop Mirroring Controller target server:”(0)”**

[Description]
Failed to stop Mirroring Controller.

[Parameters]
(0): target server ("localhost" or server ID)

[System Processing]
Processing will be aborted.

[Action]
Identify the cause from system log or event log on the target server, and work around.
3.1.44 MCA00044

**Stopping Mirroring Controller forcibly**

[Description]

Stopping Mirroring Controller forcibly.

3.1.45 MCA00045

**Stopped Mirroring Controller forcibly**

[Description]

Mirroring Controller stopped forcibly.

3.1.46 MCA00046

**Enabled failover target server: "{0}"**

[Description]

Enabled failover and automatic detach.

3.1.47 MCA00047

**Failed to enable failover target server: "{0}"**

[Description]

Failed to enable failover and automatic detach.

[System Processing]

Processing will be aborted.

[Action]

Identify the cause from messages on system log or event log, and work around.

3.1.48 MCA00048

**Disabled failover target server: "{0}"**

[Description]

Disabled failover and automatic detach.

3.1.49 MCA00049

**Failed to disable failover target server: "{0}"**

[Description]

Failed to disable failover and automatic detach.

[System Processing]

Processing will be aborted.

[Action]

Identify the cause from messages on system log or event log, and work around.
3.1.50 MCA00050

(0): "server ID ")(2)" specified with option ")(1)" does not exist in definition file ")(3)"

[Description]
server ID specified with the option does not exist in definition file.

[Parameters]
(0): command name
(1): option
(2): server ID
(3): file name

[System Processing]
Processing will be aborted.

[Action]
Re-execute after correcting options or definition file.

3.1.51 MCA00051

(0): "IP address of the command execution server is not specified in definition file ")(1)"

[Description]
IP address of the command execution server is not specified in definition file.

[Parameters]
(0): command name
(1): file name

[System Processing]
Processing will be aborted.

[Action]
Correct the definition file according to the message and parameter descriptions of "Cluster Operation Guide".

3.1.52 MCA00052

(0): "wrong server ID ")(2)" in definition file ")(1)"

[Description]
Invalid descriptions were found in definition file.

[Parameters]
(0): command name
(1): file name
(2): server ID

[System Processing]
Processing will be aborted.

[Action]
Correct the definition file according to the message and parameter descriptions of "Cluster Operation Guide".
3.1.53 MCA00054

"could not write to file "{0}": exception={1}: {2}"

[Description]
Failed to detach or synchronize standby server because could not write to the file.

[Parameters]
{0}: file name
{1}: exception type
{2}: exception detail

[System Processing]
Processing will be aborted.

[Action]
Check the error detail and eliminate causes, and detach or synchronize standby server according to "Actions when an Error Occurs" of "Cluster Operation Guide".

3.1.54 MCA00055

unexpected error occurred in the monitoring process: {0}

[Description]
Monitoring process could not continue because the unexpected error occurred.

[Parameters]
{0}: detail of cause

[System Processing]
Continues monitoring.

[Action]
Check the error detail and eliminate causes.
If you cannot clear the problem, contact Fujitsu technical support.

3.1.55 MCA00056

unexpected error occurred: {0}

[Description]
An unexpected error occurred.

[Parameters]
{0}: detail of cause

[System Processing]
Processing will be aborted.

[Action]
Check the error detail and eliminate cause.
If you cannot clear the problem, contact Fujitsu technical support.
3.1.56 MCA00057

**failed to stop Mirroring Controller forcibly**

[Description]
Failed to stop Mirroring Controller forcibly.

[System Processing]
Processing will be aborted.

[Action]
Check [Action] of the message output before this message, and re-execute.
If re-execution fails, terminate forcibly mc_agent process with OS command.

3.1.57 MCA00058

**could not access path "%s" specified as a directory for Mirroring Controller detail of cause:"%s"**

[Description]
could not access path specified as a directory for Mirroring Controller.

[Parameters]
%s: path name
%s: detail of cause

[System Processing]
Processing will be aborted.

[Action]
Check the error detail and eliminate causes.

3.1.58 MCA00059

**system call error occurred:"%s" detail of cause:"%s"**

[Description]
System call error occurred.

[Parameters]
%s: system call name
%s: detail of cause

[System Processing]
Processing will be aborted.

[Action]
Check the error detail and eliminate causes.

3.1.59 MCA00060

**could not get installation path**
[Description]
Enterprise Postgres may not be installed.

[System Processing]
Processing will be aborted.

[Action]
Re-install Enterprise Postgres.

3.1.60 MCA00061

could not access path "\%1\$s" for parameter "\%2\$s" in definition file "\%3\$s" detail of cause: "%4\$s"

[Description]
could not access path for parameter in definition file.

[Parameters]
\%3\$s: file name
\%2\$s: parameter name
\%1\$s: path name
\%4\$s: detail of cause

[System Processing]
Processing will be aborted.

[Action]
Check the error detail and eliminate causes.

3.1.61 MCA00062

promotion processing completed

[Description]
Promotion processing completed.

3.1.62 MCA00063

promotion processing failed

[Description]
Promotion processing failed.

[System Processing]
Processing will be aborted.

[Action]
Clear the problem according to [Action] of the message which was output before this message in system log or in database server log.

3.1.63 MCA00064

stopped database instance forcibly
[Description]
Database instance stopped forcibly.

3.1.64 MCA00065

failed to stop database instance forcibly
[Description]
Failed to stop database instance forcibly.

[System Processing]
Processing will be aborted.

[Action]
Clear the problem according to [Action] of the message which was output before this message in system log or in database server log.

3.1.65 MCA00067

did not switch during a degeneration use
[Description]
Did not switch during a degeneration use.

[System Processing]
Processing will be aborted.

[Action]
If Mirroring Controller executed switching automatically, find the message output before this message from system log or event log to identify the cause of degeneration, and then eliminate causes according to [Action] of the message and try to switch with command.

3.1.66 MCA00068

{0}: "users other than an instance administrator have the access privileges for definition file "{1}""

[Description]
users other than an instance administrator have the access privileges for definition file.

[Parameters]
{0}: command name
{1}: file name

[System Processing]
Processing will be aborted.

[Action]
Revoke all the access privileges for users other than an instance administrator.

MCA00069
could not execute because Mirroring Controller of the server "{0}" is not running
[Description]
Could not execute because Mirroring Controller is not running.

[Parameters]
{0}: server ID

[System Processing]
Processing will be aborted.

[Action]
Start Mirroring Controller, and try to switch with command.

3.1.67 MCA00070

Try "%%s --help" for more information.

[Description]
--help option can show more additional information.

[Parameters]
%%s: command name

[System Processing]
None.

[Action]
Check the message output before this message, and refer to descriptions shown by '--help' option.

3.1.68 MCA00071

starting to {0}

[Description]
Switching standby server to primary server.

[Parameters]
{0}: "switch over"

3.1.69 MCA00072

failed to {0}

[Description]
Failed to switch to primary server because of an unexpected failure.

[Parameters]
{0}: "switch over"

[System Processing]
Processing of switching will be aborted.

[Action]
Find the message output before this message from display, system log or event log, and then eliminate causes according to [Action] of the message.
### 3.1.70 MCA00073

**error detected in handling of the database instance detail of cause:{0}**

**[Description]**
Error detected in handling of the database instance for the following purposes.
- Obtain the port number of database instance
- Access to the data storage destination directory

**[Parameters]**
{0}: detail of cause

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the error detail and eliminate causes.

### 3.1.71 MCA00074

**could not read PID file of Mirroring Controller detail of cause:{0}**

**[Description]**
Could not read PID file of Mirroring Controller.

**[Parameters]**
{0}: detail of cause

**[Action]**
Identify the cause according to the message, and then remove it.

### 3.1.72 MCA00075

**invalid contents of PID file "{0}" of Mirroring Controller**

**[Description]**
The contents of PID file of Mirroring Controller is invalid.

**[Parameters]**
{0}: file name

**[System Processing]**
Processing will be aborted.

**[Action]**
The following causes could be considered.
- The file was stored or replaced by mistake
- The file was corrupted

When starting Mirroring Controller, move or remove the file shown in the message.
When stopped Mirroring Controller, find ID of process named "mcagent" and terminate forcibly by using OS command.

### 3.1.73 MCA00076
cannot execute "[0]" command because Mirroring Controller is not running

[Description]
Cannot execute Mirroring Controller command because Mirroring Controller process is not running.

[Parameters]
{0}: command name

[System Processing]
Processing will be aborted.

[Action]
Start Mirroring Controller, and re-execute.

3.1.74 MCA00077

%s: argument of option "%s" is too long

[Description]
Argument of option is too long.

[Parameters]
%s: command name
%s: option

[System Processing]
Processing will be aborted.

[Action]
Re-execute after correcting options.

3.1.75 MCA00078

%s: invalid option -- %s

[Description]
Invalid option.

[Parameters]
%s: command name
%s: option

[System Processing]
Processing will be aborted.

[Action]
Re-execute after correcting options.

3.1.76 MCA00079

%s: unnecessary operand "%s"

[Description]
Unnecessary operand.
3.1.77 MCA00080

**%s: unrecognized operation mode or no operation mode specified**

[Description]
Unrecognized operation mode or no operation mode specified.

[Parameters]
%s: command name

[System Processing]
Processing will be aborted.

[Action]
Re-execute after correcting or specifying operation mode.

3.1.78 MCA00081

**start to enable the parameter "{1}" required to build in the standby server "{0}"**

[Description]
Start to enable the parameter required to build in the standby server.

[Parameters]
(0): server ID
(1): parameter name

3.1.79 MCA00082

**enableing the parameter "{1}" required to build in the standby server "{0}" completed**

[Description]
Enableing the parameter required to build in the standby server completed.

[Parameters]
(0): server ID
(1): parameter name

3.1.80 MCA00083

**failed to enable the parameter "{1}" required to build in the standby server "{0}"**

[Description]
Failed to enable the parameter required to build in the standby server.
The following causes could be considered.
- another command is running
- can not access definition file
- parameter does not exist

[Parameters]
(0): server ID
(1): parameter name

[System Processing]
Processing will be aborted.

[Action]
- If the parameter is not set
  On the primary server, set the parameter of postgresql.conf file according to "parameter" description of "Cluster Operation Guide" and execute pg_ctl command with reload mode.
- Otherwise
  Find the message output before this message from display, system log or event log, and then eliminate causes according to [Action] of the message. Then, on the primary server, set the parameter of postgresql.conf file according to "parameter" description of "Cluster Operation Guide" and execute pg_ctl command with reload mode.

3.1.81 MCA00084

primary server is already running

[Description]
Primary server is already running.

[System Processing]
Processing will be aborted.

[Action]
The standby server might be running without creating recovery.conf. Create recovery.conf, and re-execute.

3.1.82 MCA00085

cannot start Mirroring Controller because database instance is not running

[Description]
Cannot start Mirroring Controller because database instance is not running.

[System Processing]
Processing will be aborted.

[Action]
Start database instance, and re-execute.

3.1.83 MCA00086

could not get state of database instance detail of cause:"(0)"
**Could not get state of database instance.**

*Parameters*

- {0}: detail of cause

*System Processing*

Processing will be aborted.

*Action*

Check the error detail and eliminate causes.

### 3.1.84 MCA00087

**Unusable character is included in path "%-s" specified as a directory for Mirroring Controller**

*Description*

Unusable character is included in path specified as a directory for Mirroring Controller.

*Parameters*

- %-s: path name

*System Processing*

Processing will be aborted.

*Action*

Correct the path specified as a directory for Mirroring Controller according to the message and mc_ctl command descriptions of "Reference".

### 3.1.85 MCA00088

**%-1$s: unusable character is included in server ID "%-3$s" specified with option "%-2$s"**

*Description*

Unusable character is included in server ID specified with option.

*Parameters*

- %-1$s: command name
- %-2$s: option
- %-3$s: server ID

*System Processing*

Processing will be aborted.

*Action*

Correct the server ID specified with option according to the message and mc_ctl command descriptions of "Reference".

### 3.1.86 MCA00089

**Only instance administrator can execute this command**

*Description*

Only instance administrator who created the directory for Mirroring Controller can execute this command.
[System Processing]
Processing will be aborted.

[Action]
Re-execute the command by the instance administrator who created the directory for Mirroring Controller.

3.1.87 MCA00090
could not read file "{0}": Permission denied
[Description]
No read permissions for the file.

[System Processing]
Processing will be aborted.

[Action]
Re-execute the command, after granting the read permissions to the file.

3.1.88 MCA00091
"host name or IP address "{1}" of the primary server and the standby server in definition file "{0}" are same, but the --local-server option was not specified"
[Description]
Host name or IP address of the primary server and the standby server in definition file are same, but the --local-server option was not specified.

[Parameters]
(0): file name
(1): host name or IP address

[System Processing]
Processing will be aborted.

[Action]
If the primary server and the standby server are built in the same server, execute the mc_ctl command with the --local-server option.
If the primary server and the standby server are built in the different server, correct host name or IP address in the definition file.

3.1.89 MCA00092
this feature is not available in this edition
[Description]
This feature is not available in this edition.

[System Processing]
Processing will be aborted

[Action]
Please install the right edition for this feature.
3.1.90 MCA00093

**Installation environment is destroyed**

[Description]

Enterprise Postgres may not be installed correctly or may be destroyed.

[System Processing]

Processing will be aborted.

[Action]

Re-install Enterprise Postgres.

3.1.91 MCA00094

**%s: invalid argument for option %s**

[Description]

Invalid argument for option.

[Parameters]

%s: command name
%s: option

[System Processing]

Processing will be aborted.

[Action]

Re-execute after correcting options.

3.1.92 MCA00095

**could not remove file or directory "%(0)"**

[Description]

Could not remove the file or the directory.

[Parameters]

%(0): file name or directory name

[System Processing]

Processing will be aborted.

[Action]

Check the status of the file or the directory and eliminate causes, and then remove it.

3.1.93 MCA00096

**"could not write file "%(0)": exception=(1): (2)"**

[Description]

Could not write the file.

[Parameters]

%(0): file name
3.1.94 MCA00097

**setup of standby server completed**

**Description**
Setup of standby server completed.

3.1.95 MCA00098

**setup of standby server failed**

**Description**
Setup of standby server failed.

3.1.96 MCA00099

**{0}: server""{1}"" is running as a standby server**

**Description**
Could not continue processing because database instance to be duplicated is not running as a primary server.

**Parameters**

{0}: command name
{1}: server ID

3.2 Message Numbers Beginning with MCA00100

3.2.1 MCA00100

**cannot execute {0} command because Mirroring Controller is running**
Cannot execute this command because Mirroring Controller is running on the server to be set up.

Parameters

{0}: command name

System Processing

Processing will be aborted.

Action

Execute this command on server where primary server is not running. If execute it on the right server, stop Mirroring Controller and then re-execute it.

3.2.2 MCA00101

cannot execute {0} command because database instance is running

Description

Cannot execute this command because database instance is running on the server to be set up.

Parameters

{0}: command name

System Processing

Processing will be aborted.

Action

Execute this command on server where primary server is not running. If execute it on the right server, stop database instance and then re-execute it.

3.2.3 MCA00102

{0}: invalid argument value {2} for option {1}

Description

Invalid argument for option.

Parameters

{0}: command name
{1}: option
{2}: argument value

System Processing

Processing will be aborted.

Action

Re-execute after correcting argument value for the option.

3.2.4 MCA00103

could not move file or directory from {0} to {1}

Description

Could not move the file or the directory.
[Parameters]

(0): source file or directory
(1): target file or directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the file or the directory and eliminate causes, and then remove it.

3.2.5 MCA00104

could not create directory (0)

[Description]

Could not create the directory.

[Parameters]

(0): target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

3.2.6 MCA00105

could not read the access privileges of (0)

[Description]

Could not read the access privileges.

[Parameters]

(0): target directory

[System Processing]

Processing will be aborted.

[Action]

Check the status of the directory and eliminate causes, and then remove it.

3.2.7 MCA00106

failed to set the access privileges of (0)

[Description]

Failed to set the access privileges.

[Parameters]

(0): target directory
[System Processing]
Processing will be aborted.

[Action]
Check the status of the directory and eliminate causes, and then remove it.

3.2.8 MCA00107

service "(0)" is not registered

[Description]
Service is not registered.

[Parameters]
(0): Service name

[System Processing]
Processing will be aborted.

[Action]
Register service, and re-execute.

3.2.9 MCA00108

could not start service "(0)" detail of cause:"(1)"

[Description]
Could not start service.

[Parameters]
(0): Service name
(1): detail of cause

[System Processing]
Processing will be aborted.

[Action]
Check the error detail and eliminate causes.

3.2.10 MCA00109

could not start service "%(0)s" detail of cause:"%(1)s"

[Description]
Could not start service.

[Parameters]
%(0)s: Service name
%(1)s: detail of cause

[System Processing]
Processing will be aborted.
3.2.11 MCA00110

**service "%%s" is not registered**

**[Description]**
Service is not registered.

**[Parameters]**

%%s: Service name

**[System Processing]**
Processing will be aborted.

**[Action]**
Register service, and re-execute.

3.2.12 MCA00111

**Mirroring Controller service "%%s" has been registered**

**[Description]**
Mirroring Controller service has been registered with Windows Service.

**[Parameters]**

%%s: Service name

3.2.13 MCA00112

**Mirroring Controller service "%%s" has been unregistered**

**[Description]**
Mirroring Controller service has been unregistered from Windows Service.

**[Parameters]**

%%s: Service name

3.2.14 MCA00113

**service name "%%s" is already in use**

**[Description]**
Service name is already in use.

**[Parameters]**

%%s: Service name

**[System Processing]**
Processing will be aborted.

**[Action]**
Check the service name, and re-execute.
3.2.15 MCA00114

could not register service "%s" detail of cause: "%s"

[Description]
An error occurred during registration of service.

[Parameters]
%s: Service name
%s: detail of cause

[System Processing]
Processing will be aborted.

[Action]
Check the error detail and eliminate causes.

3.2.16 MCA00115

could not unregister service "%s" detail of cause: "%s"

[Description]
An error occurred during deregistration of service.

[Parameters]
%s: Service name
%s: detail of cause

[System Processing]
Processing will be aborted.

[Action]
Check the error detail and eliminate causes.

3.2.17 MCA00116

%s: option "%s" is required

[Description]
A required option is not specified.

[Parameters]
%s: command name
%s: option

[System Processing]
Processing will be aborted.

[Action]
Specify the required option, and re-execute.

3.2.18 MCA00117

no authority to execute this command
[Description]
Only the administrative user can run this command.

[System Processing]
Processing will be aborted.

[Action]
Invoke the administrator's prompt, and re-execute this command.

3.2.19 MCA00119
could not receive respons from {0} server({1})
[Description]
An error was detected on the server.

[Parameters]
{0}: monitored object (server)
{1}: server type (primary, standby)

[System Processing]
Perform failover or detaching.
If failover or detaching is already performed, these functions would be disabled.

[Action]
Refer to the description about workaround for failure of "Cluster Operation Guide".

3.2.20 MCA00120
detected streaming replication error in {0} server({1})
[Description]
A streaming replication error was detected.

[Parameters]
{0}: monitored object (database process)
{1}: server type (primary, standby)

[System Processing]
Perform failover or detaching.
If failover or detaching is already performed, these functions would be disabled.

[Action]
Refer to the description about workaround for failure of "Cluster Operation Guide".

3.2.21 MCA00121
disk drives are available
[Description]
Database where data storage, transaction log storage and tablespaces are saved is working correctly.
3.2.22 MCA00122

A [0] server([1]) is running normally

[Description]
A server is running normally.

[Parameters]

[0]: server type (primary, standby)
[1]: monitored object (server)

3.2.23 MCA00123

Streaming Replication has started

[Description]
Streaming Replication has started

3.2.24 MCA00124

postmaster is running in [0] server([1])

[Description]
postmaster is running

[Parameters]

[0]: server type (primary, standby)
[1]: monitored object (server)

3.2.25 MCA00125

failed to get the standby server information

[Description]
Failed to get the standby server information

[System Processing]
Perform failover or detaching.
If failover or detaching is already performed, these functions would be disabled.

[Action]
Refer to the description about workaround for failure of "Cluster Operation Guide".

3.2.26 MCA00126

[0] server([1]) was downed

[Description]
database server was downed

[Parameters]

[0]: server type (primary, standby)
[1]: monitored object (server)
Perform failover or detaching.
If failover or detaching is already performed, these functions would be disabled.

Action
Refer to the description about workaround for failure of "Cluster Operation Guide".

### 3.2.27 MCA00127

**You can promote the standby server**

[Description]
You can promote the standby server

### 3.2.28 MCA00128

**You cannot promote the standby server**

[Description]
You cannot promote the standby server

### 3.2.29 MCA00129

**detected a disk I/O error in {0} server({1})**

[Description]
A disk I/O error was detected.

[Parameters]
- {0}: server type (primary, standby)
- {1}: monitored object (server)

[System Processing]
Perform failover or detaching.
If failover or detaching is already performed, these functions would be disabled.

[Action]
Refer to the description about workaround for failure of "Cluster Operation Guide".
FJQSS User Guide
(Information Collection Tool)
Preface

This manual describes information to use the outline and the tool of FJQSS (Information Collection Tool).

Purpose of this Manual

The purpose of this manual is to be able to gather the collected information by using FJQSS (Information Collection Tool) when trouble occurs.

Reader of this Manual

This manual is targeted at the user who gathers the collected information when the trouble occurs.

You can obtain information on the method of gathering the function and the collected information of FJQSS (Information Collection Tool) obtain by referring to this manual.

Structure of this Manual

The structure of this manual is as follows:

Chapter 1 outline

Chapter 2 FJQSS (Information Collection Tool)

Appendix A Messages and error codes

Notations

The following notations are used in this manual;

Symbols used in this manual

The following symbols are used in this manual.

Example:[Enter]key

Symbols used in command

This subsection describes the symbols used in the examples of commands.

Example:

```
fjqss_collect [-s]
```

Meaning of Symbols

<table>
<thead>
<tr>
<th>Symbol</th>

Chapter 1 Outline

This chapter explains the outline of FJQSS (Information Collection Tool).

1.1 FJQSS (Information Collection Tool)

This appendix explains FJQSS (Information Collection Tool) that archives the information for investigation (middleware logs and operation system logs) with an easy operation. Executing FJQSS right after a problem occurs makes a rapid investigating of the causes.
Chapter 2 Collecting the information

This chapter explains the method of gathering the survey material, the confirm method of the survey material, and notes.

2.1 Collection method

This section explains the operating procedure of FJQSS (Information Collection Tool).

Collecting information can be done by using the command. You can operate the Collection by the method that shows the product selection menu, or the method that does not show such the menu.

- 2.1.1 Collecting with showing menu
- 2.1.2 Collecting without showing menu

2.1.1 Collecting with showing menu

This subsection explains the operating procedure of FJQSS (Information Collection Tool) with showing the product selection menu.

Authority to execute

User Authority of the root user is necessary.

Prior confirmation

Set the output directory of the collected information if necessary. The output directory of default is the /var/tmp directory on Solaris, or the /tmp directory on Linux. See [2.3 Changing a path of the output directory] for details of changing the output directory.

Synopsis

If you execute the command specifying the output directory by the parameter:

```
fjqss_collect output_directory
```

If you execute the command specifying the output directory by the environment variable or the environmental configuration file:

```
fjqss_collect
```

Path to this command

```
/opt/FJSVqstl
```

Notes in executing the command

- Do not put fjqss_collect or its copy into any other directory. They work only if they are in the path shown above in [Path to this command].
- Execute this command immediately after the problem occurs.
- Multiple execution of this command is not available. If you do that, the following error message appears:

```
FJQSS is already started. Please restart FJQSS after the executing one ends.
```

Operating procedure

This part explains the operating procedure of FJQSS (Information Collection Tool).

1. Log on to the server, open the console window and execute the information collection command in the console window.

Hereafter, it explains by the example when outputting the information to the default output directory:

```
> cd /opt/FJSVqstl
> ./fjqss_collect
```
2. The product selection menu appears. It shows the list of the products whose information can be collected.

3. Put the number of the product of which you want to collect the information:

```
FJQSS Product Selection

1. MW Product B (Server Side)
2. MW Product B (Client Side)

Please input a number of the product of which you want to collect the information.>>1
```

4. Check the indicated name(s) of the middleware(s) whose investigation information are to be collected, then press the [Y] key to start.

Collection starts and the following indicator appear in the command prompt:

```
The following product information is collected.
MW Product B (Server Side)
Input 'Y-key' to collect data, or 'N-key' to stop.(default=N):y
preparing: ######################################## 100% [00:01]
```

The time and the disk space required for the collection depend on the condition of the target system.

5. Check the contents of the output directory.

After the FJQSS (Information Collection Tool) has completed the collection, the following prompt appears. Verify that the information have been collected in the directory whose name is indicated in the prompt:

```
The following product information is collected.
MW Product B (Server Side)
Input 'Y-key' to collect data, or 'N-key' to stop.(default=N):y
preparing: ######################################## 100% [00:01]
collecting: ######################################## 100% [00:01]
archiving: ######################################## 100% [00:01]
compress: ######################################## 100% [00:15]
Completed.
Gathered investigation informations archived to /tmp/ezcollect20121018172939/result20121018172939.tar.gz(206KB)
```

This is an example on Linux.

The gathered investigation informations are archived to /var/tmp/… directory on Solaris, or /tmp/… directory in Linux.

The following files are created in the output directory (ezcollectYYYYMMDDHHMMSS: YYYYMMDDHHMMSS indicates the time (year, month, day, hours, minutes and seconds) that the collection started). See [2.2 Checking the collected information] for the output directory:

- resultYYYYMMDDHHMMSS.tar.gz
  The collected information.
- result.txt
  The result log is a text file to indicate if the collection of information has succeeded.
  This file indicates the names and the results of collection (OK/NG) of each material.
- ez.log
  The activity log of the FJQSS (Information Collection Tool).

**Aborting FJQSS (Information Collection Tool)**

This subsection explains how to abort running FJQSS (Information Collection Tool).
Although it is recommended that you wait until the collection ends, you can press [CTRL] + [C] key combination to abort the execution if it is necessary. The following prompt appears if [CTRL] + [C] is pressed and the execution is aborted.

```
The following product information is collected.
MW Product B (Server Side)
Input 'Y-key' to collect data, or 'N-key' to stop.(default=N):y
preparing:  ################## 40% [00:01]
Stopped FJQSS process.
```

The output directory that has been made in the collecting might remain when the executing is aborted. There is no influence in the operation of FJQSS because the output directory will be newly made when FJQSS is executed again.

Moreover, there is no influence in the operation of FJQSS even if the remaining output directory was deleted.

**Note**

Do not close the command prompt before the collection ends. If you do so, the temporary directories might remain in the work directory. Please delete the following directories if they remain in the work directory.

- `ezcollectYYYYMMDDHHMMSS`
- `ezworkYYYYMMDDHHMMSS`

See [2.3 Changing a path of the output directory] for details of the work directory.

## 2.1.2 Collecting without showing menu

This subsection explains the operating procedure of FJQSS (Information Collection Tool) without showing the product selection menu.

You can use the procedure in the shell script.

### Authority to execute

User Authority of the root user is necessary.

### Prior confirmation

Verify the product identification name of the product of which you collect the information by the product information showing command. See [2.1.3 Getting the product identification name] for details.

Set the output directory of the collected information if necessary. The output directory of default is the `/var/tmp` directory on Solaris, or the `/tmp` directory on Linux. See [2.3 Changing a path of the output directory] for details of changing the output directory.

### Synopsis

The specification of product identification name by "-pr <product identification name>" is necessary if you specify the silent mode option by ":s".

If you execute the command specifying the output directory by the parameter:

```
fjqss_collect -pr <product identification name> [-s] output_directory
```

If you execute the command specifying the output directory by the environment variable or the environmental configuration file:

```
fjqss_collect -pr <product identification name> [-s]
```

### Description

The `fqjss_collect` command collects the information required for the investigation.

### Option

-pr
This option specifies the product identification name of the product of which you collect the information.

Path to this command

```
/path/to/command
```

Notes in executing the command

- Do not put fjqss_collect or its copy into any other directory. They work only if they are in the path shown above in [Path to this command].
- Execute this command immediately after the problem occurs.
- Multiple execution of this command is not available. If you do that, the following error message appears:

```
FJQSS is already started. Please restart FJQSS after the executing one ends.
```

2.1.3 Getting the product identification name

This subsection explains how to get the product identification name which you specify when collecting the information without showing Product Selection Menu.

The product identification name can be got by executing the product information showing command.

Authority to execute

User Authority of the root user is necessary.

Synopsis

```
fjqss_mwpinfolist
```

Description

This command shows the list of the information of products of which the information collection is available.

Each product's information is shown in one line.

The product's Information is shown in order of "No." (number), "KEY" (product identification name), "DispName" (product name) and "Path" (destination directory of the information)

Example of the result of executing the product information showing command:

```
MW Product List
No. KEY        DispName                 Path
--------------------------------------------------------------------------------
1.  PRODUCTA  MW PRODUCT A            /opt/FJSVPRDA/server/fjqss_tool1
2.  PRODUCTB  MW PRODUCT B            /opt/FJSVPRDB/server/fjqss_tool1
3.  PRODUCTC  MW PRODUCT C            /opt/FJSVPRDC/server/fjqss_tool1
```

If you collect the information of the product No.1, specify the product identification name "PRODUCTA" as the parameter to collect the information of the "MW PRODUCT A" by the procedure of 2.1.2 Collecting without showing menu.

Path to this command

```
/path/to/command
```
2.2 Checking the collected information

The collected information are created in the output directory (ezcollectYYYYMMDDHHMMSS) as file "resultYYYYMMDDHHMMSS.tar.gz".

The output directory is created at the output specified for an environmental configuration file destination at the output destination. If no destination is specified, then the output directory is created at the /var/tmp directory on Solaris, or the /tmp directory on Linux.

You can specify a path of the output directory if you execute the information collecting command in the console window. See [2.3 Changing a path of the output directory] for details of the environmental configuration file and the output destination.

Verify that the following file and directory exist:

- Result log (result.txt)
  The result log is a text file to indicate if the collection of information has succeeded.
  This file indicates the names and the results of collection (OK/NG) of each material.

- Collected information (resultYYYYMMDDHHMMSS.tar.gz)

Note

Collected information (resultYYYYMMDDHHMMSS.tar.gz) is compressed and archived by gzip and tar. Collected information contains the following files.

- resultdir
  This directory contains the collected files.

- result.txt
  The result log is a text file to indicate if the collection of information has succeeded.
  This file indicates the names and the results of collection (OK/NG) of each material.

- ez.log
  The activity log of the FJQSS (Information Collection Tool).

- convert.txt
  If the file path name of information collecting is too long and information collecting can't get in former file name, file path name is converted and gathered. Former file path name and Converted file path name are output to convert.txt. convert.txt is output in the form of the following.

Output form

<Former file path name>,<Converted file path name>

convert.txt is output when there was only information collecting for which the conversion of the file path name was necessary.

2.3 Changing a path of the output directory

You can change a path of the output directory by two methods below.

- Specifying a path of the output directory in the option of the information collecting command.
- Specifying a path of the output directory by setting the environment variable.
- Specifying a path of the output directory by updating the environmental configuration file.

The method of specifying in the option of the command explains in [2.1.1 Collecting with showing menu and 2.1.2 Collecting without showing menu]. Hereafter, the method of specifying by the environment variable and by the environmental configuration file will be explained.

-
Specifying a path of the output directory by setting the environment variable

You can specify the directory where the output directory will be created by setting the environment variable EZ_OUTPUTDIR before executing this command.

**Description format:**

```
EZ_OUTPUTDIR="the directory path where the output directory will be created"
export EZ_OUTPUTDIR
```

**Example:**

If “/etc/work” is specified to %EZ_OUTPUTDIR%:

```
EZ_OUTPUTDIR=/etc/work
export EZ_OUTPUTDIR
```

Then the directory below will be created as the output directory:

```
/etc/work/ezcollectYYYYMMDDHHMMSS
```

Specifying a path of the output directory by updating the environmental configuration file

Environmental configuration file (FJQSSconf.txt) is a file that defines the operating environment of FJQSS.

It exists in following directory.

```
<Directory where the product is installed>/fjqss_tooln (n=1,2,...,9)
```

The items that can be specified for environmental configuration file are shown below.

<table>
<thead>
<tr>
<th>Item</th>
<th>Outline</th>
<th>Omission</th>
</tr>
</thead>
<tbody>
<tr>
<td>OutputDir</td>
<td>The directory path where the output directory will be created (*3).</td>
<td>Possible (*2)</td>
</tr>
<tr>
<td>WorkDir</td>
<td>The directory path where the work directory (*1) will be created by FJQSS execution (*3).</td>
<td>Possible(*2)</td>
</tr>
</tbody>
</table>

(*1) The work directory is a directory that temporarily stores information necessary for the execution of FJQSS. When FJQSS ends, stored information is automatically deleted.

(*2) If the specification is wrong or omitted, the /var/tmp directory (on Solaris), or the /tmp directory (on Linux) is used.

(*3) You can specify the directory by the relative path from an absolute path or environmental configuration file.

The format of environmental configuration file is shown below.

**Description format:**

```
OutputDir="the directory path where the output directory will be created"
WorkDir=“work directory”
```

**Example:**

If “/etc/work” is specified to OutputDir, “/etc/tmp” is specified to WorkDir.

```
OutputDir=/etc/work
WorkDir=/etc/tmp
```

Then the directory below will be created as the output directory:

```
/etc/work/ezcollectYYYYMMDDHHMMSS
```

And the directory below will be created as the work directory:

```
/etc/tmp/ezworkYYYYMMDDHHMMSS
```
If the plural specifications of the output directory is done, then the specification becomes effective in the following order by priority:

1. Specification in the option of the information collecting command.
2. Specification by setting the environment variable.
3. Specification by updating the environmental configuration file.
## Appendix A Messages and error codes

### A.1 Error Messages

The message which FJQSS outputs can have an error code. See [A.2 Error Codes] for detail of error codes.

<table>
<thead>
<tr>
<th>Look for</th>
<th>What to do</th>
</tr>
</thead>
<tbody>
<tr>
<td>FJQSS is already started.</td>
<td>Check if FJQSS is running. Multiple execution of it is not available.</td>
</tr>
<tr>
<td>Please restart FJQSS after the executing one ends.</td>
<td></td>
</tr>
<tr>
<td>The file used with FJQSS is not found.</td>
<td>Please contact the Fujitsu engineer, and pass on the PRODUCT_IDENTIFICATION_NAME, PATH_NAME and ERROR_CODE in the message. About detail meanings of the ERROR_CODE, see [A.2 Error Codes].</td>
</tr>
<tr>
<td>Please contact a Fujitsu technological member.</td>
<td></td>
</tr>
<tr>
<td>(product=PRODUCT_IDENTIFICATION_NAME, errcode=ERROR_CODE)</td>
<td></td>
</tr>
<tr>
<td>Failed in the copy of materials used with FJQSS to the work directory.</td>
<td>Please contact a Fujitsu technological member.</td>
